No. MC-FC-35452. By order of March 7, 1973, the Motor Carrier Board approved the lease by The Tri-State Transit Authority, Huntington, W. Va., of the operating rights in Certificates Nos. MC-5008 and MC-5008 (Sub-No. 10) issued December 12, 1955, and April 16, 1962, respectively, to Ohio Valley Bus Co., a corporation, Huntington, W. Va., authorizing the transportation of passengers and their baggage, and express and newspapers in the same vehicle with passengers, between the junction of the highway of the Ashland-Coal Grove Bridge across the Ohio River and U.S. Highway 52, and South Point, Ohio, between Russell, Ky., and Ironton, Ohio, and between Russell, Ky., and Flatwoods, Ky., serving all intermediate points in each instance, restricted, however, to the pickup and discharge of passengers originating at or destined to the junction of the highway over the Ashland-Coal Grove Bridge and U.S. Highway 52, South Point and Ironton, Ohio, Russell and Flatwoods, Ky., and intermediate points; between Huntington, W. Va., and Ashland, Ky., between Huntington, W. Va., and Burlington, Ohio, and between Huntington, W. Va., and Proctorville, Ohio, serving all intermediate points in each instance; between Burlington, Ohio, and the site of the Ordnance plant near South Point, Ohio, serving all intermediate points within 1 mile of South Point; between Ashland, Ky., and Russell, Ky., serving all intermediate points, restricted to the transportation of passengers moving between points both of which are on carrier's authorized routes, and from Proctorville, Ohio, to Proctorville, Ohio, over a circular route, serving all intermediate points; and passengers and their baggage, between Ashland, Ky., and Hanging Rock, Ohio, serving all intermediate points restricted to the pickup and discharge of passengers originating at or destined to Ashland, Ky., Hanging Rock, Ohio, and intermediate points, and between Huntington, W. Va., and the U.S. Veterans Hospital, Wayne County, W. Va., serving all intermediate points. Amos A. Bolen, Post Office Box 2185, Huntington, W. Va. 25722, attorney for applicants.

No. MC-FC-74144. By order entered March 9, 1973, the Motor Carrier Board

approved the transfer to Sam Crain, doing business as Sam Crain Trucking, Dove Creek, Colo., of the operating rights set forth in Certificate No. MC-112079 (Sub-No. 1), issued October 16, 1967, to Vernon C. Rowley, doing business as Vernon C. Rowley Trucking, Blanding, Utah, authorizing the transportation of uranium and vanadium ores, in bulk, from points in San Juan County, Utah, to Naturita, Durango and Uravan, Colo., and Thompson, Utah. P. Bennon Redd, Monticello, Utah 84535, attorney for applicants.

No. MC-FC-74206. By order of March 9, 1973, the Motor Carrier Board approved the transfer to Ernest W. Wessner, Womelsdorf, Pa., of Certificate No. MC-95161 issued to Ralph R. Boltz, doing business as Boltz Brothers, Myerstown, Pa., authorizing the transportation of: Agricultural commodities, feeds, fertilizer, etc., between specified points in Maryland and Pennsylvania. James E. Fullerton, attorney, 407 North Front Street, Harrisburg, PA 17101.

No. MC-FC-74237. By order of March 9, 1973, the Motor Carrier Board approved the transfer to Joseph Sabini, John Sabini, Angelo Sabini, a partnership, doing business as Sabini's Moving and Storage Co., Stamford, Conn., of Certificate No. MC-93461 issued October 8, 1959, to David Sabini, Joseph Sabini and John Sabini, a partnership, doing business as Sabini's Moving and Storage Co., Stamford, Conn., authorizing the transportation of: Household goods, as defined, between Stamford, Conn., and points within 15 miles thereof, on the one hand, and, on the other, points in Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island. Roy Pelton, Sabini's Moving and Storage Co., 614 Shippin Avenue, Stamford, CT 06902, applicants' representative.

[SEAL] ROBERT L. OSWALD,  
Secretary.

## WESTERN RAILROAD TRAFFIC ASSOCIATION

## Application for Approval of Amendments to Agreement

MARCH 14, 1973.

The Commission is in receipt of an application in the above-entitled proceeding for approval of amendments to the agreement therein approved.

Filed February 6, 1973 by:

J. M. Soubey, Jr., 222 South Riverside Plaza, Suite 1200, Chicago, IL 60606 (Attorney-in-Fact).

Ed White, Attorney for Applicants, 222 South Riverside Plaza, Suite 1200, Chicago, IL 60606.

The amendments seek to broaden the jurisdiction of the Association by inclusion of Illinois Freight Association territory rail carriers as subregional organizations of Western Trunk Line

Committee subject to separate organizational and procedural provisions as set forth in newly added sections 12, 13, and 14 to Article VII, and to make other incidental changes made necessary by the foregoing changes.

The complete application may be inspected at the Office of the Commission, in Washington, D.C.

## NOTICES

Any interested person desiring to protest and participate in this proceeding shall notify the Commission in writing on or before April 16, 1973. As provided by the general rules of practice of the Commission, persons other than applicants should fully disclose their interest, and the position they intend to take with respect to the application. Otherwise,

the Commission, in its discretion, may proceed to investigate and determine the matters involved without public hearing.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.  
[FR Doc. 73-5718 Filed 3-23-73; 8:45 am]

## CUMULATIVE LISTS OF PARTS AFFECTED—MARCH

DEPARTMENT OF DEFENSE  
Department of the Navy  
UNITED STATES NAVY REGULATIONS,  
1973

Notice of Implementation

On February 26, 1973, the President of the United States approved United States Navy Regulations, 1973, which replaced United States Navy Regula-

NOTICES

tions, 1948. United States Navy Regulations are issued in accordance with the provisions of title 10, United States Code, section 6011, for the government of all persons in the Department of the Navy, and are endowed with the sanction of law as to duty, responsibility, authority, distinctions, and relationships of various commands, officials, and individuals. The full text of United States Navy Regula-

tions, 1973, is published at this time for notice to the public. Appropriate articles of United States Navy Regulations, 1973, will be codified and incorporated in Title 32, Code of Federal Regulations.

[SEAL] MERLIN H. STARING,  
Rear Admiral, JAGC, U.S. Navy,  
Judge Advocate General of the  
Navy.

0101. Origin and Authority.

1. The naval affairs of the country began with the war for independence, the American Revolution. On 11 October 1775, Congress passed legislation forming a committee to purchase and outfit a battleship. This in effect created the Continental Navy. The battalions of Marines were authorized on 10 November 1775. The Constitution of the United States on 7 August 1789, transferred responsibility for the conduct of naval affairs to the Navy Department. On 30 April 1798, the Congress established a separate Navy Department with the Secretary of the Navy as its chief officer. On 11 July 1798, the U. S. Marine Corps was established as a separate service, and in 1834 was made a part of the Department of the Navy.

2. The National Security Act of 1947, as amended, is the fundamental law governing the position of the Department of the Navy in the organization for national defense. In 1947, the Act provided to establish the Department of the Defense as an Executive Department and to establish the Departments of the Army, Navy, and Air Force (formerly established as Executive Departments by the National Security Act) as executive departments within the Department of Defense.

3. The responsibilities and authority of the Department of the Navy are vested in the Secretary of the Navy, and are subject to his reassignment and delegation. The Secretary is bound by the provisions of law, the direction of the President and the Secretary of Defense, and, along with all Government agencies, the regulations of certain non-defense agencies in their respective areas of functional responsibility.

0102. Objectives.

The fundamental objectives of the Department of the Navy, within the Department of Defense, are to coordinate, train, equip, prepare, and maintain the effectiveness of Navy and Marine Corps forces for the performance of military missions as directed by the President or the Secretary of Defense, and (b) to support Navy and Marine Corps formations, including the support of such forces and the forces of other military departments, as directed by the Secretary of Defense. The Department of the Navy is organized into three major functional areas, which are assigned to unified commands or commands, namely, the Navy, the Marine Corps, and the Naval Air Force. The Department of the Navy is also responsible for the material and fiscal support, and technological support through research and development.

0103. Composition.

The Department of the Navy is separately organized under the Secretary of the Navy; it operates under the authority, direction, and control of the Secretary of Defense. It is composed of the executive part of the Department of the Navy: the Headquarters, United States Marine Corps; the entire operating forces, including naval aviation, of the United States Navy and of the United States Marine Corps, and the reserve components of those operating forces!

CHAPTER 2  
THE SECRETARY OF THE NAVY

20201. Responsibilities of the Secretary of the Navy.

The Secretary of the Navy is the head of the Department of the Navy, under the direction, authority, and control of the Secretary of Defense, and he is responsible for the policies and control of the Department of the Navy, including its organization, administration, operation, and efficiency.

## 0202 Succession to Duties.

1. When there is a vacancy in the office of the Secretary of the Navy, or during the absence or disability of the Secretary, the Under-Secretary or Assistant Secretaries of the Navy succeed to the duties of the Secretary. If the Secretary does not prescribe an order for succession to his duties, the Assistant Secretaries shall succeed to those duties after the Under-Secretary in the order in which they took office as Assistant Secretaries.
2. During the temporary absence of the above officials, the Chief of Naval Operations or, in his absence, the Vice-Chief of Naval Operations succeeds to the duties of the Secretary.

0203. The Civilian Executive Assistants.

1. Each Civilian Executive Assistant to the Secretary of the Navy are the Under Secretary of the Navy and the Assistant Secretaries of the Navy and the Deputy Under Secretary of the Navy. It is the policy of the Secretary to assign department-wide responsibilities essential to the efficient administration of the Department of the Navy to and among his Civilian Executive Assistants.
2. Each Civilian Executive Assistant, within his area of responsibility, shall prepare and submit to the Secretary of the Navy a statement of the affairs of the Department of the Navy in carrying out these duties. The Civilian Executive Assistants shall do so in harmony with the statutory position of the Chief of Naval Operations as "the principal naval adviser and naval executive to the Secretary on the conduct of activities of the Department of the Navy," and the responsibilities of the Chief of Naval Operations and the Commandant of the Marine Corps as set forth in these regulations. Each is authorized and directed to act for the Secretary within his assigned area of responsibility.

3. The Under Secretary of the Navy is designated as the deputy and principal assistant to the Secretary of the Navy, and acts with full authority of the Secretary in the general management of the Department of the Navy, and supervision of offices and organizations as assigned by the Secretary.

and all shore activities, headquarters, forces, bases, installations, activities, and functions under the control or supervision of the Secretary of the Navy. It includes the United States Coast Guard when it is operating as a service in the Navy.

0104. The Principal Parts of the Department of the Navy.

1. Functionally, organizationally and geographically the Department of the Navy has from practically the beginning of the Federal Government under the Constitution consisted of three parts: the Operating Force of the Navy, the New Department, and the Shore Establishment.

2. The OPERATING FORCES OF THE NAVY comprise the several fleets, sea-going Marine Corps, sea-frontier forces, district forces, Fleet Marine Forces, other assigned forces, Corps Forces, the Military Sealift Command, and other forces and activities that may be assigned thereto by the President or the Secretary of the Navy.

3. The NAVY DEPARTMENT refers to the central executive offices of the Department of the Navy located at the seat of the government of the Navy, which is organizationally comprised of the Office of the Secretary of the Navy, which includes his Civilian Executive Staff, the Office of his Staff Assistants, and the Headquarters organizations of the Office of Naval Research, the Office of the Judge Advocate General, the Office of the Comptroller of the Navy, the Office of the Chief of Naval Operations, the Headquarters, United States Marine Corps; and under the command of the Chief of Naval Operations, the Headquarters, Naval Materiel Command, and the headquarters organizations of the Bureau of Naval Personnel and the Bureau of Medicine and Surgery. In addition, the Headquarters, United States Coast Guard, is included when the United States Coast Guard is operating as a service in the Navy.

4. The SHORE ESTABLISHMENT is comprised of shore activities with defined missions assigned for establishment by the Secretary of the Navy.

## NOTICES

## NOTICES

4. The Assistant Secretary of the Navy (Financial Management) is the Comptroller of the Navy, and is responsible for all matters related to the financial management of the Department of the Navy, including budgeting, accounting, auditing, financial planning, procurement, statistical reporting, inventory management, information systems, and management of official correspondence (less that integral to a weapons system) and management of official organizations as assigned by the Secretary. Under the Comptroller, the Deputy Comptroller of the Navy shall, in addition to his other duties, serve as an adviser and assistant to the Chief of Naval Operations and the Commandant of the Marine Corps with respect to financial and budgetary matters.

5. The Assistant Secretary of the Navy (Installations and Logistics) is responsible for all matters related to the procurement, production, supply, distribution, alteration, maintenance, and disposal of material; all transportation; the acquisition, construction, utilization, improvement, alteration, and disposal of installation and facilities, including capital equipment; utilities; health and general spending and public relations; labor relations with respect to contractors; the management of the Navy's industrial security; the Mutual Defense Assistance Program, as related to the supplying of material; and supervision of offices and organizations as assigned by the Secretary.

6. The Assistant Secretary of the Navy (Manpower and Reserve Affairs) is responsible for the overall supervision of manpower and reserve component affairs of the Department of the Navy, including policy and administration of affairs related to military (active and inactive) and civilian personnel, and supervision of offices and organization as assigned by the Secretary.

7. The Assistant Secretary of the Navy (Research and Development) is responsible for all matters related to research, development, engineering, test, and evaluation efforts within the Department of the Navy, including management of the appropriation, "Research, Development, Test and Evaluation, Navy," and for oceanography, ocean engineering and closely related matters, and supervision of offices and organizations as assigned by the Secretary.

8. The Deputy Under Secretary of the Navy is responsible to the Secretary or Under Secretary for acting as a focal point and coordinator for the resolution of problems which require high-level special attention. He shall maintain a general awareness of actual or potential problems and issues and take steps to prevent their development or aggravation.

0204. The Staff Assistants.

The Staff Assistants to the Secretary of the Navy are the Administrative Officer, Navy Department; General Counsel; the Director of Civilian Manpower Administration; Chief of Information; the Chief of Legislative Affairs; the Director, Office of General Information; the Director, Office of Naval Personnel and Oil Shale Research; the Director, Office of Appraisal; and the heads of such other offices and boards as may be established by law. The Secretary for the purpose of assisting the Secretary or any of his Civilian Executive Assistants in the administration of the Department of the Navy.

Navy, each of the foregoing shall supervise all functions and activities internal to his office and assigned shore activities, if any. Each shall be responsible to the Secretary or to one of his Civilian Executive Assistants for the utilization of resources by and the operating efficiency of all activities under his supervision. The duties of the individual Staff Assistants and their respective offices will be as provided by law or as assigned by the Secretary.

0205. The Chief of Naval Research, The Judge Advocate General, The Deputy Comptroller of the Navy.

The Chief of Naval Research shall command the Office of Naval Research and assigned shore activities. The Judge Advocate General shall command the Office of the Judge Advocate General and assigned shore activities. The Deputy Comptroller of the Navy shall command the Office of the Comptroller of the Navy and assigned shore activities. Each of them shall be responsible to the Secretary of the Navy or to one of his Civilian Executive Assistants, as assigned, for the utilization of resources by and the operating efficiency of all activities under their respective commands. The duties of the Chief of Naval Research, the Judge Advocate General, and the Comptroller of the Navy will be as provided by law or as assigned by the Secretary.

#### 0206. Authority Over Organizational Matters.

Subject to the approval of the Secretary of the Navy or guidance hereafter furnished by him, the Civilian Executive Assistants, the Chief of Naval Operations, the Commandant of the Marine Corps, the Chief of Naval Research, the Judge Advocate General, the Deputy Comptroller of the Navy, and the Staff Assistants are individually authorized to organize, assign, and direct the responsibilities within their respective commands or offices in the organization of the Department of the Navy, including the establishment and disestablishment of such component organizations as may be necessary, subject to the following:

- The authority to disestablish may not be exercised with respect to any organizational component of the Department established by law.
- The Secretary retains unto himself the authority to approve the establishment of and disestablishment of shore activities, which will be done in accordance with procedures prescribed by him.

#### CHAPTER 3 THE CHIEF OF NAVAL OPERATIONS

##### 0301. Senior Military Officer of the Department of the Navy.

1. The Chief of Naval Operations is the senior military officer of the Department of the Navy, and takes precedence above all other officers of the naval service, except an officer of the naval service who is serving as Chairman of the Joint Chiefs of Staff.

2. The Chief of Naval Operations is the principal naval adviser to the President and to the Secretary of the Navy on the conduct of the naval service, and the principal naval adviser and naval officer to the Secretary on the conduct of the activities of the Department of the Navy.

3. The Chief of Naval Operations is the Navy member of the Joint Chiefs of Staff and is responsible for keeping the Secretary of the Navy fully informed on matters considered or acted upon by the Joint Chiefs of Staff. In this capacity, he is responsible, under the President and the Secretary of Defense, for duties external to the Department of the Navy, as prescribed by law.

##### 0302. Succession to Duties.

The Vice Chief of Naval Operations, and then the officers of the Navy, eligible for command at sea, on duty in the office of the Chief of Naval Operations in the order of seniority, shall, unless otherwise directed by the President, succeed to the duties of the Chief of Naval Operations during his absence, or disability, or in the event of a temporary vacancy in that office.

##### 0303. Specific Authority and Duties of the Vice Chief of Naval Operations.

1. The Vice Chief of Naval Operations has such authority and duties with respect to the Department of the Navy as the Chief of Naval Operations, with the approval of the Secretary of the Navy, may delegate to or prescribe for him. Orders issued by the Vice Chief of Naval Operations in performing such duties have the same force and effect as those issued by the Chief of Naval Operations.

2. Orders issued by the Vice Chief of Naval Operations in performing other duties have the same force and effect as those issued by the Chief of Naval Operations.

##### 0304. Authority and Responsibility.

1. Internal to the administration of the Department of the Navy, the Chief of Naval Operations, under the direction of the Secretary of the Navy, shall command the Operating Forces of the Navy. The Chief of Naval Operations shall also command the Naval Material Command, the Bureau of Naval Personnel, and the Bureau of Medicine and Surgery. In addition, he shall command such shore

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

activities as may be assigned to him by the Secretary. He shall be responsible to the Secretary for the utilization of resources by, and the operating efficiency of, all commands and activities under his command.

In addition, the Chief of Naval Operations has the following specific responsibilities:

- To organize, train, equip, prepare, and maintain the readiness of Navy forces, including those for assignment to unified or specified commands for the performance of military missions as directed by the Secretary of the Navy, and the Chief of Staff, Naval Forces, when assigned to such commands or specified commands, and to exercise command of the command to whom they are assigned.
- To determine and direct the efforts necessary to fulfillment of current and future requirements of the Navy (less Fleet Marine Forces and other assigned Marine Corps forces) for manpower, material, weapons, facilities, and services, including the determination of quantities, military performance requirements, and times, places, and priorities of need.
- To exercise leadership in maintaining a high degree of competence among Navy officers and enlisted and civilian personnel in necessary fields of specialization, through education, training, and employment; to provide for personnel advancement, and to maintain the morale and motivation of Navy personnel and the prestige of a Navy career.
- To plan and provide health care for personnel of the naval service and their dependents.
- To direct the organization, administration, training, and support of the Naval Reserve.
- To inspect and investigate components of the Department of the Navy to determine and maintain efficiency, discipline, readiness, effectiveness, and economy, except in those areas where such responsibility rests with the Commandant of the Marine Corps.
- To determine the needs of naval forces and activities for research, development, test, and evaluation; to plan and provide for the conduct of development, test, and evaluation which are adequate and responsive to long-range objectives, immediate requirements, and fiscal limitations; and to provide assistance to the Assistant Secretary of the Navy (Research and Development) in the direction, review, and appraisal of the overall Navy RDT&E Program to insure fulfillment of stated requirements.
- To formulate Navy strategic plans and policies and participate in the formulation of joint and combined strategic plans and policies and related command relationships.
- To budget for commands, bureaus, and offices assigned to the command of the Chief of Naval Operations, and other activities and programs as assigned, except as may be otherwise directed by the Secretary of the Navy.

3. The Chief of Naval Operations, under the direction of the Secretary of the Navy, shall exercise overall responsibility for the effectiveness of the command of the Navy (except the Marine Corps) in the performance of the Department of the Navy in matters related to the effectiveness of the support of the Operating Forces of the Navy, the coordination and direction of assigned Navy-wide programs and functions including those assigned by higher authority, the coordination of activities of the Department of the Navy in matters concerning effectiveness, efficiency, and economy, and matters essential to naval military administration, such as security, intelligence, discipline, communications, and matters related to the customs and traditions of the naval service.

##### 0305. Naval Vessel Register, Classification of Naval Craft, and Status of Ships and Service Craft.

1. The Chief of Naval Operations shall be responsible for the Naval Vessel Register (except the Secretary of the Navy shall strike vessels from the Register) and the assignment of classification for administrative purposes to water-borne craft and the designation of status for each ship and service craft. The classification of water-borne craft and the status of ships and service craft are found in the glossary.

2. Commissioned vessels and craft shall be called "United States Ship" or "U.S.S.".

3. Civilian manned ships of the Military Sealift Command or other commands designated "active status" in section shall be called "United States Naval Ship" or "U.S.N.S.".

4. The Chief of Naval Operations shall designate hospital ships and medical aircraft as he deems necessary. Such designation shall be in compliance with the Geneva Convention for the Amelioration of the Conditions of Wounded, Sick and Shipwrecked Members of the Armed Forces at Sea of 12 August 1949 and he shall ensure compliance with the notice provisions of that Convention.

##### 0306. The Chief of Naval Material.

The Chief of Naval Material, under the command of the Chief of Naval Operations, shall command the Naval Material Command in addition to the tasks which may be assigned by the Chief of Naval Operations, he shall:

- Provide direct staff assistance to the Secretary of the Navy and the Civilian Executive Assistants in matters pertaining to contracting, procurement, production and exploratory development, laboratories assigned to the Chief of Naval Material and to related matters. In these areas, the Chief of Naval Material shall inform the Chief of Naval Operations and, when appropriate, the Commandant of the Marine Corps in matters of policy and significant actions.
- Be responsive directly to the Commandant of the Marine Corps in providing necessary planning and programming data requirements and in meeting these particular material support needs of the U. S. Marine Corps which are

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

required to be provided by the Naval Material Command.

- c. Provide the Commandant of the Marine Corps with timely advice concerning training and technical requirements essential for the operation and maintenance by Marine Corps personnel of new equipment under development.
- d. Be responsive to the heads of other organizations in meeting their material support needs which are provided by the Naval Material Command.
- e. Provide guidance to Navy and Marine Corps Commands, as required, on functional areas related to Naval Material Command acquisition and logistics support responsibilities and other technical or professional matters as appropriate.

0307. The Chief of Naval Personnel and the Chief, Bureau of Medicine and Surgery.

The Chief of Naval Personnel, under the command of the Chief of Naval Operations, shall command the Bureau of Naval Personnel. The Chief, Bureau of Medicine and Surgery, shall command the Bureau of Medicine and Surgery. The command of the Chief of Naval Operations, shall command the Bureau of Medicine and Surgery. In addition to the tasks which may be assigned by the Chief of Naval Operations, they shall:

- a. Be responsive directly to the Commandant of the Marine Corps in meeting those particular needs of the United States Marine Corps which are required to be provided by their respective bureaus.
- b. Be responsive to the heads of other organizations in meeting the particular needs of such organizations which are provided by the Chief of Naval Personnel and the Chief, Bureau of Medicine and Surgery.

0308. Naval Inspector General.

There is in the Office of the Chief of Naval Operations the Office of the Naval Inspector General. The Naval Inspector General, when directed, shall inquire into and report upon any matter which affects the discipline or military efficiency of the Department of the Navy; however, the Secretary of the Navy shall direct inquiry when such matters are related to the Marine Corps. He shall make such inspections, investigations, and reports as the Secretary or the Chief of Naval Operations directs. The Naval Inspector General shall periodically propose programs of inspections to the Chief of Naval Operations and shall recommend additional inspections or investigations as may appear appropriate.

0309. Commander in Chief U.S. Atlantic Fleet.

1. The Commander in Chief of U. S. Atlantic Fleet is a naval commander in chief of the Operating Forces of the Navy under the command of the Chief of Naval Operations. He shall command the U. S. Atlantic Fleet and is responsible

for the administration, training, maintenance, support and readiness of the Atlantic Fleet, including those forces temporarily assigned to the operational command of other commanders.

2. The Commander in Chief U. S. Atlantic Fleet is a naval component commander of the unified command under the Commander in Chief, Atlantic.
3. The organization of the Atlantic Fleet, the forces assigned and their employment shall be as specified by the Chief of Naval Operations except for the employment of forces assigned to the operational command of unified and specified commanders.

0310. Commander in Chief U.S. Pacific Fleet.

1. The Commander in Chief U. S. Pacific Fleet is a naval commander in chief of the Operating Forces of the Navy under the command of the Chief of Naval Operations. He shall command the U. S. Pacific Fleet and is responsible for the administration, training, maintenance, support and readiness of the Pacific Fleet, including those forces temporarily assigned to the operational command of other commanders.

2. The Commander in Chief U. S. Pacific Fleet is a naval component commander of the unified command under the Commander in Chief, Pacific.

3. The organization of the Pacific Fleet, the forces assigned and their employment shall be as specified by the Chief of Naval Operations except for the employment of forces assigned to the operational command of unified and specified commanders.

0311. Commander in Chief U.S. Naval Forces, Europe.

1. The Commander in Chief U. S. Naval Forces, Europe is a naval commander in chief of the Operating Forces of the Navy under the command of the Chief of Naval Operations. He shall represent the Chief of Naval Operations in the U. S. Naval sectors in the general areas of Europe, North Africa, and the Middle East. He shall command those forces assigned by the Chief of Naval Operations or by other naval commanders.

2. The Commander in Chief U. S. Naval Forces, Europe is the naval component commander of the unified command under the Commander in Chief, U. S. European Command.

0312. Commander, Military Sealift Command.

1. The Commander, Military Sealift Command is a naval commander of the Operating Forces of the Navy under the command of the Chief of Naval Operations. He shall provide ocean transportation for personnel and cargo of the Department of Defense (excluding that transported by units of the Department of Defense with policies and procedures approved by the Secretary of Defense for Ocean Transportation Security of the Navy) and for the Department of Defense. He shall also operate ships in support of scientific projects and other programs for agencies or departments of the United States.

2. The Military Sealift Command shall operate and maintain government owned ships and augment operational capability by shipping cargo and passengers on commercially operated ships, chartering ships, and exercising operational control over ships activated from National Defense Reserve Fleet to meet emergency needs.

0313. Commander, Naval Intelligence Command.

The Commander, Naval Intelligence Command, under the command of the Chief of Naval Operations, shall be responsible for directing and managing the activities of the Naval Intelligence Command to insure fulfillment of the intelligence, counterintelligence, investigative, and security requirements of the Department of the Navy.

0314. Commander, Naval Communications Command.

The Commander, Naval Communications Command, under the command of the Chief of Naval Operations, shall exercise overall responsibility throughout the Department of the Navy for the coordination of the provision, operation, and maintenance of adequate and secure naval communications.

0315. Oceanographer of the Navy.

The Oceanographer of the Navy, under the command of the Chief of Naval Operations, shall act as the Naval Oceanographic Program Director under the policy direction of the Secretary of the Navy. He shall be responsible for an integrated and effective Naval Oceanographic Program and the management of all national oceanographic facilities and efforts assigned to the Department of the Navy.

0316. Commander, Naval Weather Service Command.

The Commander, Naval Weather Service Command, under the command of the Chief of Naval Operations, shall insure that Department of the Navy meteorological and oceanographic analyses and forecasts are met. He shall provide technical guidance in meteorological matters throughout the naval service.

0317. Commander, Naval Security Group Command.

The Commander, Naval Security Group Command, under the command of the Chief of Naval Operations, shall be responsible for the provision, operation, and maintenance of an adequate Naval Security Group and shall perform cryptographic and related functions.

0318. Chief of Naval Training.

The Chief of Naval Training, under the command of the Chief of Naval Operations, shall be responsible for the training of Navy personnel, other than training assigned by the Chief of Naval Operations to other authorities, and for the training of Marine Corps aviation personnel.

0319. Chief of Naval Reserve

The Chief of Naval Reserve, under the command of the Chief of Naval Operations, shall be responsible for the administration of Naval Reserve programs, the management of Naval Reserve resources, and for logistic support of the Marine Corps Air Program.

0320. Commandants of Naval Districts.

1. The Commandants of Naval Districts, under the command of the Chief of Naval Operations, shall command assigned naval shore activities; exercise area coordination over all shore activities in the district; represent the Secretary of the Navy, the Chief of Naval Operations and other officials in such matters as may be assigned; execute responsibilities with respect to specified functions as assigned by Sea Frontier Commanders and Chief of Naval Reserve; administer Naval Reserve elements and naval reservists, as assigned; and coordinate public affairs matters throughout the district.

2. Naval districts within the continental United States are defined by statute (10 USC 5221).

0321. President, Board of Inspection and Survey.

The President of the Board of Inspection and Survey, assisted by such other officers and such permanent and semi-permanent sub-boards as may be designated by the Secretary of the Navy, shall:

- a. Conduct acceptance trials and inspections of all ships and service craft prior to acceptance for naval service.
- b. Conduct acceptance trials and inspections on one or more aircraft of each type or model prior to final acceptance for naval service.
- c. Examine, at least once every three years, if practicable, each naval ship to determine its material condition and, if found unfit for continued service, report to higher authority.
- d. Perform such other inspections and trials of naval ships, service craft, and aircraft as may be directed by the Chief of Naval Operations.

CHAPTER 5  
THE UNITED STATES COAST GUARD  
(WHEN OPERATING AS A SERVICE IN THE NAVY)

0501. Relationship and Operation as a Service in the Navy.

1. Upon declaration of war or when the President directs, the Coast Guard shall operate as a service in the Navy, and shall be subject to the orders of the Secretary of the Navy. While so operating as a service in the Navy, the Coast Guard shall execute the same practical operations as it executes in the Navy and shall be subject to the same regulations and discipline as the Navy and shall be subject to the same laws and regulations as the Navy.

2. Whenever the Coast Guard executes as a service in the Navy:

- a. All applicable appropriations of the Coast Guard to cover expenses shall be available for transfer to the Department of the Navy and shall be supplemented, as required, from applicable appropriations of the Department of the Navy.

- b. Personnel of the Coast Guard shall be eligible to receive gratuities, medals, and other awards of honor on the same basis as personnel in the naval service or serving in any capacity with the Navy.

0502. Commandant of the Coast Guard.

1. The Commandant of the Coast Guard is the senior officer of the United States Coast Guard.

2. When reporting in accordance with Section 3, Title 14, U. S. Code to the Secretary of the Navy, the Commandant of the Coast Guard will further report to the Chief of Naval Operations for military functions. The Chief of Naval Operations shall represent the Coast Guard as a member of the Joint Chiefs of Staff.

0503. Duties and Responsibilities.

- In exercising command over the Coast Guard while operating as a service in the Navy, the Commandant shall:

- a. Organize, train, prepare and maintain the readiness of the Coast Guard to function as a specialized service in the Navy for the performance of military missions, as directed.

- b. Plan for and determine the present and future needs of the Coast Guard, both quantitative and qualitative, for personnel, including reserve personnel.

- c. Budget for the Coast Guard, except as may be otherwise directed by the Secretary of the Navy.

- d. Plan for and determine the support needs of the Coast Guard for equipment, materials, weapons or weapons systems, supplies, facilities, maintenance, and supporting services.

- e. Exercise essential military administration of the Coast Guard. This includes, but is not limited to, such matters as security, discipline, intelligence, communications, personnel records and accounting, conformity, as practicable, to Navy procedures.

- f. Enforce or assist in enforcing Federal laws on the high seas and on waters subject to the jurisdiction of the United States.

- g. Administer, promulgate and enforce regulations for the promotion of safety of life and property on the high seas and on waters subject to the jurisdiction of the United States. This applies to those matters not specifically delegated by law to some other executive department.

- h. Develop, establish, maintain and operate, with due regard to the requirements of national defense, aids to maritime navigation, ice breaking facilities, and rescue facilities for the protection of safety on and over the high seas and waters subject to the jurisdiction of the United States.

- i. Engage in oceanographic research on the high seas and in waters subject to the jurisdiction of the United States in coordination with the Office of the Oceanographer of the Navy.

- j. Continue in effect under the Secretary of the Navy those other functions, powers and duties vested in him by appropriate orders and regulations of the Secretary of Transportation on the day prior to the effective date of transfer of the Coast Guard to the Department of the Navy until specifically modified or terminated by the Secretary of the Navy.

CHAPTER 6

COMMANDERS IN CHIEF AND OTHER COMMANDERS

0601. Titles of Commanders.

1. The commander of a principal organization of the Operating Forces of the Navy, as determined by the Chief of Naval Operations, or the commander of a subordinate organization of the Operating Forces of the Navy, as determined by the Chief of Naval Operations, in these regulations, shall have the title "Commander in Chief." The name of the organization under his command shall be added to form his official title.

2. The commander of each other organization of units of the Operating Forces of the Navy, or organization of units of shore activities, shall have the title "Commander," "Commandant," "Commanding General," or other appropriate title. The name of the organization under his command shall be added to form his official title.

0602. Responsibility and Authority of a Commander.

1. A commander shall be responsible for the satisfactory accomplishment of the mission and duties assigned to his command. His authority shall be commensurate with his responsibilities. Normally, he shall exercise authority through his immediate subordinate commanders; but he may communicate directly with any of his subordinates.

2. A commander shall insure that subordinate commands are fully aware of the importance of strong, dynamic leadership and its relationship to the overall efficiency and readiness of naval forces. A commander shall exercise positive leadership and actively develop the highest qualities of leadership in persons with positions of authority and responsibility throughout his command.

3. Subject to orders of higher authority, a commander shall issue such regulations and instructions as may be necessary for the proper administration and operation of his command.

4. A commander shall maintain the same relationship to his flagship, or to a shore activity of his command in which his headquarters may be located, in regard to its internal administration and discipline, as to any other ship or shore activity of his command.

0603. To Assume Assumption of Command.

- Upon assuming command, a commander shall so advise appropriate superiors and the public of his command. When appropriate to his command he shall also advise the senior commanders of other United States armed services and officials of other Federal agencies and foreign governments located within the area encompassed by his command, concerning his assumption of command.

0604. Readiness.

- A commander shall take all practicable steps to maintain his command in a state of readiness to perform its mission. In conformity with the orders and policies of higher authority, he shall:

1. Organize the forces and resources under his command and assign duties to his principal subordinate commanders.

2. Prepare plans for the employment of his forces to meet existing and foreseeable situations.

3. Collaborate with the commanders of other United States armed services and with appropriate officials of other Federal agencies and foreign governments located within the area encompassed by his command.

4. Maintain effective intelligence and keep himself informed of the political and military aspects of the national and international situation.

5. Make, or cause to be made, such inspections as necessary to ensure the readiness, effectiveness, and efficiency of the components of his command.

0605. Observance of International Law.

- At all times a commander shall observe, and require his command to observe, the principles of international law. Where necessary to fulfillment of this responsibility, a departure from other provisions of Navy Regulations is authorized.

0606. Keeping Immediate Superior Informed.

- A commander shall keep his immediate superior appropriately informed of:
  1. The organization of his command, the prospective and actual movements of the units of his command, and the location of his headquarters.

2. Plans for employment of his forces.

3. The condition of his command and of any required action pertaining thereto which is beyond his capacity or authority.

4. Intelligence information which may be of value.

5. Any battle, engagement, or other significant action, involving units of his command.

6. Any important service or duty performed by persons or units of his command.

7. Unexecuted orders and matters of interest upon being relieved of command.

## 0610. Administration and Discipline - Staff Based Ashore.

When a staff is based ashore the enlisted persons serving with the staff shall, when practicable, be assigned to an appropriate activity for purposes of administration and discipline. The staff officers may be similarly assigned. Members of a staff assigned for any purpose to a command or activity shall conform in matters of general discipline to the internal regulations and routine of the command or activity.

## 0611. Administration and Discipline - Staff Unassigned to an Administrative Command.

1. When it is not practicable to assign enlisted persons serving with the staff of a command to an established activity for administration and discipline, the commander may designate an officer of his staff to act as the commanding officer of such persons and shall notify the Judge Advocate General and the Chief of Naval Personnel or the Commandant of the Marine Corps, as appropriate, of his action.

2. If the designating commander desires the commanding officer of staff enlisted personnel to possess authority to convene courts-martial, he should request the Judge Advocate General to obtain such authorization from the Secretary of the Navy.

## 0612. Administration and Discipline - Separate and Detached Command.

Any flag or general officer in command, any officer authorized to convene courts-martial, or the senior officer present may designate organizations which are separate or detached commands. Such officer shall state in writing that it is a separate or detached command and shall inform the Judge Advocate General of the action taken. If authority to convene courts-martial is desired for the commanding officer or officer in charge of such separate or detached command, the officer designating the organization as separate or detached shall request the Judge Advocate General to obtain authorization from the Secretary of the Navy.

## 0607. Organization of a Staff.

1. The term "staff" shall be construed to mean those officers and other designated persons assigned to a commander to assist him in the administration and operation of his command.

2. The officer detailed as chief of staff and aide to a fleet admiral or admiral normally shall be a vice admiral or a rear admiral. The officer detailed as chief of staff and aide to a vice admiral or rear admiral shall normally be a captain or a captain. The detailing of a vice admiral or rear admiral to a commander shall be reserved for selected commanders. An officer detailed as chief staff officer to another officer shall normally not be of the same grade.

3. The staff shall be organized into such divisions as may be prescribed by the commander concerned or by higher authority. These divisions shall conform in nature and designation, as practicable and as appropriate, to those of the staffs of superiors.

4. The staff of a flag or general officer may include one or more personal aides.

## 0608. Authority and Responsibilities of Officers of a Staff.

1. The chief of staff and aide or chief staff officer, under the commander, shall be responsible for supervising and coordinating the work of the staff and shall be kept informed of all matters pertaining to that work. All persons attached to the staff, except a vice commander or deputy responsible directly to the commander, shall be subordinate to the chief of staff and aide or chief staff officer while he is executing the duties of his office.

2. The officers of a staff shall be responsible for the performance of those duties assigned to them by the commander and shall advise him on all matters pertaining thereto. In the performance of their staff duties they shall have no command authority of their own. In carrying out such duties, they shall act for, and in the name of, the commander.

## 0609. Administration and Discipline - Staff Embarked.

In matters of general discipline, the staff of a commander embarked and all enlisted persons serving with the staff shall be subject to the internal regulations and routine of the ship. They shall be assigned regular stations for battle and emergencies. Enlisted persons serving with the staff shall be assigned to the ship for administration and discipline, except in the case of staff embarked for passage only, and provided in that case that an organization exists and is authorized to act for such purposes.

## CHAPTER 7

## THE COMMANDING OFFICER

## 0701. Applicability.

In addition to commanding officers, the provisions of this chapter shall apply, where pertinent, to aircraft commanders, officers in charge (including warrant officers and petty officers when so detailed) and those persons serving the command duty.

## 0702. Responsibility.

1. The responsibility of the commanding officer for his command is absolute, except when, and to the extent, relieved therefrom by competent authority, or as provided otherwise in these regulations. The authority of the commanding officer is commensurate with his responsibility. While he may, at his discretion, and when not contrary to law or regulations, delegate authority to his subordinates for the execution of details, such delegation of authority shall in no way relieve the commanding officer of his continued responsibility for the safety, well-being, and efficiency of his entire command.

2. A commanding officer who departs from his orders or instructions, or takes official action which is not in accordance with such orders or instructions, does so upon his own responsibility and shall report immediately the circumstances to the officer from whom the prior orders or instructions were received.

3. The commanding officer shall be responsible for economy within his command. To this end he shall require from his subordinates a rigid compliance with the regulations governing the receipt, accounting, and expenditure of public money and materials, and the implementation of improved management techniques and procedures.

4. The commanding officer and his subordinates shall exercise leadership through personal example, moral responsibility, and judicious attention to the welfare of persons under their control or supervision. Such leadership shall be exercised in order to achieve a positive, dominant influence on the performance of persons in the Department of the Navy.

## 0703. Presence of Officer Eligible to Command.

1. Except as otherwise provided herein or otherwise authorized by the Chief of Naval Operations or the Commandant of the Marine Corps, as appropriate, at least one officer, either in command or eligible to succeed to command, shall be present and ready for duty at each command (activity, unit, or office). In the absence of the commanding officer, the executive officer, or both, their duties shall devolve upon the officer in command. In the absence of the commanding officer, the duties shall devolve upon the officer in command. In the absence of the commanding officer, the duties shall devolve upon the officer in command. In the absence of the commanding officer, the duties shall devolve upon the officer in command.

senior in rank, eligible to succeed to command, who is attached to and present in the command, the commanding officer shall, prior to his departure, transfer to him the command duty. The commanding officer shall make no change in the existing organization during his temporary absence, and shall endeavor to have the routine and other affairs of the command carried on in the usual manner.

2. A superior, of flag or general grade, shall govern the presence of the officer in command or officer or officers eligible to succeed to command and ready for duty at each command or unit of the Operating Forces of the Navy and the Operating Forces of the Marine Corps. The commanding officer may under criteria or conditions prescribed by a superior of flag or general grade, assign officers not eligible to succeed to command and qualified enlisted men to serve as the Command Duty Officer.

3. Superiors shall determine the need and govern the presence of the officer in command or an officer or officers eligible to succeed to command and ready for duty at commands, offices, or activities not of the Operating Forces of the Navy and not of the Operating Forces of the Marine Corps. Under conditions prescribed by a superior, officers not eligible to command and qualified enlisted men may be assigned a day's command duty.

## 0704. Organization of Commands.

All commands and other activities of the Department of the Navy shall be organized and administered in accordance with law, the Navy Regulations, and the orders of competent authority, and all orders and instructions of the commanding officer shall be in accordance therewith.

## 0705. Effective Organized Force Always Present.

Under no circumstances shall any ship or station be left without an organized force that will be effective in any emergency, and consistent with existing requirements, capable of ensuring satisfactory operation.

## 0706. Relationship With Executive Officer.

The commanding officer shall keep the executive officer informed of his policies and normally shall issue all orders relative to the duties of the command through that officer. Normally, the commanding officer shall require that all communications of an official nature from subordinates to the commanding officer be transmitted through the executive officer.

## 0707. Relieving Procedures.

1. A commanding officer about to be relieved of his command shall:

a. Inspect the command in company with his successor before the transfer is effected.

b. In the case of a ship, and within other commands where appropriate, cause the crew to be exercised in his presence and in the presence of his relief at general quarters and general drills, unless conditions render it impracticable or inadvisable.

## NOTICES

shall be addressed to immediate superior with copies direct to appropriate commands, bureaus, or offices as may have a direct interest. A copy shall be retained by each of the offices between whom the transfer of command takes place.

5. When an officer detailed as commanding officer reports to a command having no regularly detailed commanding officer, the procedure prescribed in the preceding paragraphs of this article shall be followed, insofar as is consistent with the circumstances.

0708. Inspections, Muster, and Sighting of Personnel.

1. The commanding officer shall hold periodic inspections of the material of the command, not on weekends or holidays, to denounce deficiencies and cleanliness. When the size of the command precludes completion of the inspection in a reasonable time, he shall designate zones to be inspected by heads of departments or other responsible officers, and he shall inspect at least one zone, alternating his zone(s) in order that he inspect the entire command at minimum intervals.

2. The commanding officer shall ensure that, consistent with their employment, the personnel under his command present at all times a neat, clean and military appearance, to assist in attaining this standard of appearance he shall, in the absence of operational exigency, hold periodic personnel inspections. Saturday inspections may be held at sea and, in port and ashore, with personnel in duty status as participants. Otherwise, inspections shall not be held on weekends or holidays.

3. Quarters or formations are for the purpose of ceremony, inspection, muster, instruction, or passing of orders and should be reserved for those occasions when purpose cannot otherwise be achieved.

4. The commanding officer shall require a daily report of all persons confined, a statement of their offenses, and the dates of their confinement and release.

5. The presence of all persons attached to the command shall be accounted for daily. Persons who have not been sighted by a responsible senior shall be reported absent.

6. The prohibitions concerning weekend or holiday inspections do not apply to commands engaged in training reservists, and, to other commands with the consent of a superior.

0709. Unauthorized Persons on Board.

The commanding officer shall satisfy himself that there is no unauthorized person on board before proceeding to sea or commencing a flight.

c. Point out defects and peculiarities of the command and account for them to his relief.

d. Deliver to his relief all unexecuted orders, all regulations and orders in force, and all official correspondence and information concerning the command and the personnel thereof as may be of service to his relief. He shall not remove the original records of his official correspondence, original letters, documents, or papers concerning the command and personnel thereof, but he may retain authenticated copies thereof.

e. Deliver to his relief all documents required by these regulations to be either kept or supervised by the commanding officer. If a Navy post office is established within the command, he shall deliver to his relief a current audit of postal accounts and effects.

£ Deliver all magazine and other keys in his custody to his relief.

3. Cause an inventory and audit to be taken of all registered publications charged to the command, in accordance with the provisions of the Registered Publications Manual.

h. Submit reports of fitness of officers and sign all log books, journals, and other documents requiring his signature up to the date of his relief.

- i. At the time of turning over command call all hands to muster. The officer about to be relieved shall read his orders of detachment and turn over the command to his successor, who shall read his orders and assume command. At short intervals this procedure may be modified as appropriate.

2. The officer relieved, although without authority after turning over the command, is, until his final departure, entitled to all the ceremonies and distinctions accorded him while in command.

3. The accomplishment of a normal, routine transfer of command shall be reported by the officer who assumes command. For a command of the Operating Forces of the Navy, the report shall be addressed to the immediate superior with copies to the fleet commander in chief and intermediate superiors. For a command not of the Operating Forces of the Navy, the report shall be addressed to the immediate superior with copies to other superiors as appropriate.

- A report of a transfer of command that contains statements indicating the possible existence of unsatisfactory conditions, or adverse comments with respect to the state of readiness of the command, or the attitude of personnel assigned mission, or any other matter which might cause concern to higher authority, shall constitute the basis of the succeeding officer in relieving may deem necessary. For a command of the Operating Forces of the Navy the report shall be addressed to the Chief of Naval Operations via the chain of command with a copy direct to the commander in chief of the fleet concerned. For a command not of the Operating Forces of the Navy the report

0710. Control of Passengers.

1. Control of passage in and protracted visits to aircraft and ships of the Navy by all persons, within or without the Department of the Navy, shall be exercised by the Chief of Naval Operations.

2. Nothing in this article shall be interpreted as prohibiting the senior officer present from authorizing the passage in ships and aircraft of the Navy by such persons as he judges necessary in the public interest or in the interest of humanity. The senior officer present shall report the circumstances to the Chief of Naval Operations when he gives such authorization.

## 0711, Authority Over Passengers.

Except as otherwise provided in these regulations or in orders from competent authority, all passengers in a ship or aircraft of the naval service are subject to the authority of the commanding officer and shall conform to the internal regulations and routine of the ship or aircraft. The commanding officer of such ship or aircraft shall take no disciplinary action against a passenger not in the naval service, other than that authorized by law; but he may, when he deems such action to be necessary for the efficiency of the ship or aircraft, or for the safety of the subject passenger, take such action as may be necessary to such restraining as the circumstances require until such time as delivery to the proper authorities is possible. A report of the matter shall be made to an appropriate superior of the passenger.

0712. Relations With Organizations and Military Personnel Embarked for Passage.

1. Personnel of the naval service, and other United States armed forces or services, and foreign armed forces are subject to the orders of the commanding officer of the ship or aircraft commander. The provisions of this article shall be applied to organizations and personnel of foreign armed forces, insofar as is feasible, with regard for their customs and traditions.

2. The commanding officer of the ship or the aircraft commander shall respect the identity and integrity of organizational units; and

a. Shall have all orders to personnel given through their respective

b. Shall require that personnel wear the uniform which corresponds as nearly as practicable to the uniform prescribed for ship's company.

C. May require enlisted persons to perform their proportionate share of mess, watch, police, and guard duty whenever he deems it advisable to divide those duties among personnel on board.

d. May require personnel, when in his opinion an emergency exists, to perform such duties as their special knowledge and skill may enable them to perform.

e. Has the power and authority to order an offender placed in naval or military custody as he considers desirable, but in all cases where the offender is to be disembarked for disciplinary action by military authority, he shall be placed in military custody on board the ship or aircraft, if practicable.

3. The foregoing provisions of this article also apply to the Commanding Officer, Military Department, of an in-service ship of the Military Sealift Command, who is authorized to exercise the powers conferred thereby, subject to the paramount authority of the master.

4. When an organized unit is embarked for transportation only in a ship of the Navy, the officer in command of such organized unit shall retain the authority which he possessed over such unit prior to embarkation, including the power to order special or summary courts-martial upon enlisted persons under his command; but nothing in this paragraph shall be construed as impairing the paramount authority of the commanding officer of the ship over all persons embarked therein.

0713. Persons Found Under Incriminating Circumstances.

1. The commanding officer shall keep under restraint or surveillance, as necessary, any person not in the armed services of the United States who is found under incriminating or irregular circumstances within the command, and shall immediately initiate an investigation.

2. Should an investigation indicate that such person is not a fugitive from justice or has not committed or attempted to commit an offense, he shall be released at the earliest opportunity, except:

a. If not a citizen of the United States, and the place of release is under the jurisdiction of the United States, the nearest Federal Immigration authorities shall be notified as to the time and place of release sufficiently in advance to permit them to take such steps as they deem appropriate.

b. Such persons shall not be released in territory not under the jurisdiction of the United States without first obtaining the consent of the proper foreign authorities, except where the investigation shows that he entered the command from territory of the foreign state, or that he is a citizen or subject of that state.

3. If the investigation indicates that such person has committed or attempted to commit an offense punishable under the authority of the commanding officer, the latter shall take such action as he deems necessary.

4. If the investigation indicates that such a person is a fugitive from justice, or has committed or attempted to commit an offense which requires actions beyond the authority of the commanding officer, he shall, at the first opportunity, deliver such person, with full descriptive data,

fingerprints, and a statement of the circumstances to the proper civil authorities.

5. A report shall be made promptly to the Secretary of the Navy, in all cases under paragraph 4 of this article, and in other cases where appropriate.

#### 0714. Rules for Visits.

1. Commanding officers are responsible for the control of visitors to their commands and shall comply with the relevant provisions of the Department of the Navy Security Manual for Classified Information and other pertinent directives.

2. Commanding officers shall take such measures and impose restrictions on visitors as necessary to safeguard the classified material under their jurisdiction. Arrangements for general visiting shall always be based on the assumption that foreign agents will be among the visitors.

3. Commanding officers and others officially concerned shall exercise reasonable care to safeguard the persons and property of visitors to naval activities as well as within the command. Necessary precautions to safeguard the persons and property within his command.

#### 0715. Dealers, Tradersmen, and Agents.

1. In general, dealers or tradesmen or their agents shall not be admitted within a command, except as authorized by the commanding officer.

#### a. To conduct public business.

- b. To transact specific private business with individuals at the request of the latter.

- c. To furnish services and supplies which are necessary and are not otherwise, or are insufficiently, available to the personnel of the command.

2. Personal commercial solicitation and the conduct of commercial transactions are governed by policies of Department of Defense.

#### 0716. Marriages on Board.

The commanding officer shall not perform a marriage ceremony on board his ship or aircraft. He shall not permit a marriage ceremony to be performed on board when the ship or aircraft is outside the territory of the United States, except:

- a. In accordance with local laws and the laws of the state, territory, or district in which the parties are domiciled, and

## NOTICES

- b. In the presence of a diplomatic or consular official of the United States, who has consented to issue the certificates and make the returns required by the consular regulations.

#### 0717. Postal Matters.

Commanding officers shall ensure that mail and postal funds are administered in accordance with instructions issued by the Postmaster General and approved for the naval service by the Chief of Naval Operations, and instructions issued by the Chief of Naval Operations or the Chief of Naval Personnel or the Commandant of the Marine Corps as appropriate, and that postal clerks or other personnel assigned to handle mail perform their duties strictly in accordance with those instructions.

#### 0718. Safeguarding Official Funds.

In the event of the death, unauthorized absence, or mental incapacity as determined by the commanding officer on advice of a medical officer, of a person charged with pecuniary responsibility for official funds or Government property, or if it is necessary to relieve him for any cause, including arrest or suspension, the commanding officer shall take immediate steps to safeguard such funds or property in accordance with the procedures prescribed by the Comptroller of the Navy and other competent authority.

#### 0719. Deficit or Excess of Public Money or Property.

1. In all cases involving a deficit or excess of public money in the custody of a person under his command, except in those cases where adjustments in accounting are authorized by the Secretary of the Navy, the commanding officer shall immediately:

- a. Request investigation by the Naval Investigative Service, other military agencies, or other Federal authority, if the circumstances warrant.

- b. Notify the Navy Accounting and Finance Center, the Chief of Naval Operations and Commander, Naval Supply Systems Command or the Commandant of the Marine Corps as appropriate, and appropriate superiors.

- c. Recommend or convene a Judge Advocate General Manual Investigation or a court of inquiry to determine the facts.

2. Judge Advocate General Manual Investigations and courts of inquiry in these cases shall include in the records of their proceedings the testimony of such investigators as may have been employed in each case, and shall render an opinion as to whether or not there exist indications of criminal guilt on the part of the custodians of the money or of other persons.

3. In cases involving a deficit or excess of public property, similar action shall be taken or, when appropriate, the commanding officer shall cause a survey to be made.

#### 0720. Deaths.

The commanding officer, in the event of death of any person within his command, shall ensure that the cause of death and the circumstances under which death occurred are established, and the appropriate casualty report is submitted.

#### 0721. The American National Red Cross.

1. Pursuant to the request of the Secretary of the Navy and subject to such instructions as he may issue, the American National Red Cross is authorized to conduct a program of welfare, including social, financial, and medical aid, for naval personnel; to assist in matters pertaining to prisoners of war; and to provide such other services as are appropriate functions for the Red Cross. The American National Red Cross is the only volunteer society authorized by the Government to render medical and dental aid to the armed forces of the United States. Other organizations desiring to render medical and dental aid may do so only through the Red Cross.

2. Requests for Red Cross services shall be made to the Chief of Naval Personnel or the Commandant of the Marine Corps or, in the case of medical services, to the Chief, Bureau of Medicine and Surgery.

3. Activities and personnel of the American National Red Cross in areas subject to naval jurisdiction shall conform to such administrative regulations as may be prescribed by appropriate naval authority.

4. Red Cross personnel shall be considered to have the status of commissioned officers, subject to such restrictions as may be imposed by the Chief of Naval Personnel or the Commandant of the Marine Corps.

#### 0722. Observance of Sunday.

1. Except by reason of necessity or in the interest of the welfare and morale of the command, the performance of work shall not be required on Sunday. Except by reason of necessity, ships shall not be sailed nor units of aircraft or troops be deployed on Sunday. The provisions of this paragraph need not apply to commands engaged in training reserve components of the Navy and the Marine Corps.

2. Divine services shall be conducted on Sunday if possible. All assistance and encouragement shall be given to chaplains in the conduct of these services, and chaplains shall be permitted to conduct public worship in the church of which he is a member. A suitable space shall be designated and properly rigged for the occasion, and quiet shall be maintained throughout the vicinity during divine services. The religious preferences and the varying religious needs of individuals shall be recognized, respected, encouraged, and ministered to as practicable. Daily routine in ships and activities shall be modified on Sunday as practicable to achieve this end.

## NOTICES

3. When there is no chaplain attached to the command, the commanding officer shall engage the services of any naval or military chaplain who may be available; or, failing in this, shall, when practicable, invite and may reimburse a civilian clergyman to conduct religious services. Services led by laymen are encouraged. Provision shall be made for sending and receiving church parties as appropriate and practicable.

#### 0723. Publishing and Posting Orders and Regulations.

1. In accordance with Article 137 of the Uniform Code of Military Justice the articles specifically enumerated therein shall be carefully explained to each enlisted person:

- a. At the time of entrance on active duty or within six (6) days thereafter,

- b. Again, after completion of six months active duty; and

- c. Again, upon the occasion of each reenlistment.

2. A text of the articles specifically enumerated in Article 137 of the Uniform Code of Military Justice shall be posted in a conspicuous place or places, readily accessible to all personnel of the command.

3. Instructions concerning the Uniform Code of Military Justice and appropriate articles of Navy Regulations shall be included in the training and educational program of the command.

4. Such general orders, orders from higher authority and other matters which the commanding officer considers of interest to the personnel or which should be published to the command as soon as practicable, such matters shall also be posted in whole or in part, in a conspicuous place or places readily accessible to personnel of the command.

5. Upon the request of any person on active duty in the armed services, the following publications shall be made available for his personal examination:

- a. A complete text of the Uniform Code of Military Justice,

- b. Manual for Courts-Martial,

- c. Navy Regulations,

- d. Manual of the Judge Advocate General,

- e. Marine Corps Manual (for Marine Corps personnel),

- f. Manual of the Bureau of Naval Personnel (for Navy personnel), or Marine Corps Personnel Manual (for Marine Corps personnel).

#### 0724. Maintenance of Logs.

1. A deck log and an engineering log shall be maintained by each ship in

and instructions, and by the utilization of appropriate fleet and service schools.

b. Encourage and provide assistance and facilities to the personnel under his command who seek to further their education in professional or other subjects.

c. Afford frequent opportunities to the executive officer, and to other officers of the ship as practicable, to improve their skill in ship handling.

d. Require those Lieutenants (junior grade) and first lieutenants who have less than two years commissioned or warrant service, and all ensigns and second lieutenants:

(1) To comply with the provisions prescribed for their instruction by the Chief of Naval Operations, the Commandant of the Marine Corps, or other appropriate authorities.

(2) To receive appropriate practical instruction, as the commanding officer deems advisable and to be detailed to as many duties successively as may be practicable.

e. When practicable, designate a senior officer or officers to act as advisers to junior officers. These senior officers shall assist junior officers to a proper understanding of their responsibilities and duties, and shall endeavor to cultivate in them officer-like qualities, a sense of loyalty and honor, and an appreciation of naval customs and professional ethics.

0729. Delivery of Personnel to Civil Authorities and Service of Subpoena or Other Process.

1. Commanding officers or other persons in authority shall not deliver any person in the naval service to civil authorities except as provided by the Manual of the Judge Advocate General.

2. Commanding officers are authorized to permit the service of subpoena or other process as provided by the Manual of the Judge Advocate General.

0730. Delivery of Orders to Personnel.

The commanding officer shall not withhold any orders or other communications received from higher authority for any person under his command, except for good and sufficient reasons, which he shall at once report to such higher authority. Communications of a personal nature may be withheld by a commanding officer for good reason until completion of mission or duty.

0731. Use and Transportation of Marijuana, Narcotics, and Drugs.

1. The commanding officer shall conduct a rigorous program to prevent the illegal introduction, transfer, possession or use of marijuana, narcotics, or other controlled substances as defined in these regulations. The program shall include publicity and instruction covering:

commission, and by such other ship and craft as may be designated by the Chief of Naval Operations.

2. A quartermaster's notebook and a magnetic compass record shall be maintained as adjuncts to the deck log. An ensign's bell book shall be maintained as an adjunct to the engineering log.

3. The Chief of Naval Operations shall prescribe regulations governing the contents and preparation of the deck and engineering logs and adjunct records.

0725. Status of Logs.

The deck log, the engineering log, the quartermaster's notebook, the magnetic compass record, and the engineer's bell book shall each constitute an official record of the command.

0726. Records.

The commanding officer shall require that records relative to personnel, material, and operations as required by current instructions are maintained properly by those responsible therefor.

0727. Welfare of Personnel.

The commanding officer shall:

a. Use all proper means to foster high morale, and to develop and strengthen the moral and spiritual well-being of the personnel under his command, and ensure that chaplains are provided the necessary logistic support for carrying out the command's religious program.

b. Maintain a satisfactory state of health and physical fitness of the personnel under his command.

c. Afford an opportunity, with reasonable restrictions as to time and place, for the personnel under his command to make requests, reports, or statements to him, and shall ensure that they understand the procedures for making such requests, reports, or statements.

d. Ensure that noteworthy performances of duty of personnel under his command receive timely and appropriate recognition and that suitable notations are entered in the official records of the individuals.

e. Ensure that timely advancement in rating of enlisted persons is effected in accordance with existing instructions.

0728. Training and Education.

The commanding officer shall:

a. Endeavor to increase the specialized and general professional knowledge of the personnel under his command by the frequent conduct of drills, classes,

a. The dangers involved in drug abuse,

b. The Federal, state, and local criminal liabilities which may result from introduction, transfer, possession or use, including penalties under the Uniform Code of Military Justice, and other foreign law to which individuals may be subjected.

c. The administrative measures, including discharge under other than honorable conditions, which may result.

2. The commanding officer shall exercise utmost diligence in preventing illegal importation of marijuana, narcotics, or other controlled substances on board his command.

0732. Safety Precautions.

The commanding officer shall require that persons concerned are instructed and drilled in all applicable safety precautions and procedures, that these are complied with, and that applicable safety precautions, or extracts therefrom, are posted in appropriate places. In any instance where safety precautions have not been issued or are incomplete, he shall issue or augment such safety precautions as he deems necessary, notifying, when appropriate, higher authorities concerned.

0733. Responsibility of a Master of an In-Service Ship of the Military Sealift Command.

In an in-service ship of the Military Sealift Command, the master is responsible for the safety and security of the ship and its crew. He is responsible for the safe navigation and technical operation of his ship and has paramount authority over all persons on board. The master is responsible for the preparation of the abandon ship bill and has exclusive authority to order the ship abandoned. He has full authority to enforce appropriate laws of the United States and all applicable orders and regulations of the Navy, Military Sealift Command, and the Civil Service Commission.

0734. Relations With Merchant Seamen.

When in foreign waters, the commanding officer, with the approval of the senior officer present, may receive on board as supernumeraries for rations and passage:

1. Distressed seamen of the United States for passage to the United States, provided they bind themselves to be amenable in all respects to Navy Regulations.

2. As prisoners, seamen from merchant vessels of the United States, provided that the witnesses necessary to substantiate the charges against them are received, or adequate means adopted to ensure the presence of such witnesses on arrival of the prisoners at the place where they are to be delivered to the civil authorities.

0735. Security of Magazines and of Dangerous Materials.

1. The commanding officer shall be the custodian of the keys to all spaces

and receptacles containing projectiles, explosives, and radioactive material, and be fitted with all proper flood coats; but he may designate such persons as he deems qualified to have custody of duplicate keys as he considers necessary. He shall prescribe conditions under which these persons may grant access to such spaces; but otherwise they shall not be opened without his consent.

2. Keys affiliated with nuclear weapons shall be maintained and with custody as directed by orders from competent authority.

3. He shall ensure that, except when undergoing test or overhaul, the flooding and sprinkling systems are ready for use at all times.

4. He shall ensure that inflammable and other dangerous materials are stored and handled in a safe manner, and, when conditions warrant, he himself shall be the custodian of the keys to the spaces involved.

0736. Physical Security.

1. The commanding officer shall take action to protect and maintain the security of the command from the dangers of attack, sabotage or other actions of subversive or militant groups or of any person with intent to do harm.

2. The commanding officer shall take action to protect and maintain the security of the command against dangers from fire, windstorms, or other acts of nature.

0737. Effectiveness for Service.

The commanding officer shall:

1. Exert every effort to maintain his command in a state of maximum effectiveness for war or other service consistent with the degree of readiness as may be prescribed by proper authority. Effectiveness for service is directly related to state of personnel and material readiness.

2. Make himself aware of the progress of any repairs, the status of spares, repair parts and other components, personnel readiness and other factors or conditions that could lessen the effectiveness of his command. When the effectiveness is lessened appreciably it shall be reported to appropriate superiors.

0738. Request for Inspection by Board of Inspection and Survey.

The commanding officer shall report to the Chief of Naval Operations without delay whenever the condition of his ship, or any department therein, is such as to require an inspection by the Board of Inspection and Survey. Such report shall be forwarded through official channels and bear the recommendations of the superiors concerned.

0739. Action With the Enemy.

The commanding officer shall:

clippers, charts, maps, orders, instructions, blueprints, plans, diaries, letters, and other documents (log, and forward or deliver them at the earliest possible moment to the designated authority).

d. Preserve all captured enemy equipment, machinery, fire-control equipment, electronic equipment, aviation equipment, and other property of possible intelligence value, unless destruction is necessary to prevent recapture, and make this material promptly available for intelligence evaluation or other authorized use.

#### 0743. Casualty and Damage.

1. Immediately after its occurrence, the commanding officer shall submit a detailed report of the facts to the senior officer present, the Chief of Naval Operations or the Commandant of the Marine Corps as appropriate, and other superiors when:

- A ship under his command touches the ground (except for landing ships or ships of a similar design making a landing without damage, or for a submarine resting on bottom as part of normal operations).
- A ship under his command has a collision or other serious accident.
- In aircraft under his command is involved in an accident which necessitates extensive repairs, or otherwise requires review or action by higher authority.

2. As soon as possible, the commanding officer of a shore activity shall report a serious fire or other material casualty, or a serious personnel casualty within his command to the Chief of Naval Operations, or the Commandant of the Marine Corps, as appropriate, to other superiors in command, and to the senior officer present in the area.

#### 0744. Loss of a Ship.

1. In the case of the loss of a ship, the commanding officer shall remain by her with officers and crew so long as necessary and shall take such action as may be possible to save the ship, its equipment, and other valuable property. He shall save the ship's command log, and other valuable papers.

2. If it becomes necessary to abandon the ship, the commanding officer should be the last person to leave.

3. The commanding officer shall:

- Take all possible precautions to protect the survivors and such government property as has been saved.
- Report to the nearest United States naval or military command and request instructions and such assistance as is required.
- Report the circumstances to the Secretary of the Navy and the Chief of Naval Operations as soon as possible.

a. Before going into battle or action communicate to his officers, if possible, his plans for battle or action and such other information as may be of operational value should any of them succeed in command.

b. During action, station the executive officer where he can best aid the commanding officer, and, if practicable, where he could probably escape the effects of a casualty disabling the commanding officer, and yet would be able to assume command promptly and efficiently.

c. During action, engage the enemy to the best of his ability. He shall not, without permission, make off action to assist a disabled ship or to take possession of a captured one.

d. Immediately after a battle or action, repair damage so far as possible, exert every effort to prepare his command for further service, and make accurate, explicit, and detailed reports as required.

#### 0740. Search by Foreign Authorities.

1. The commanding officer shall not permit a ship under his command to be searched on any pretense whatsoever by any person representing a foreign state, nor permit any of the personnel within the confines of his command to be removed from the command by such person, so long as he has the capacity to resist such act. If forced, he should be escorted to compel submission, he is to resist that force to the utmost of his power.

2. Except as may be provided by international agreement, the commanding officer of a shore activity shall not permit his command to be searched by any person representing a foreign state, nor permit any of the personnel within the confines of his command to be removed from the command by such person, so long as he has the power to resist.

#### 0741. Prisoners of War.

On taking or receiving prisoners of war, the commanding officer shall ensure that such prisoners are treated with humanity, that their personal property is preserved and protected, and that they are allowed the use of such of their own possessions as is necessary for their health; that they are kept with their families and are properly guarded and that the applicable provisions of the 1949 Geneva Conventions relative to the treatment of prisoners of war are followed.

#### 0742. Captured Material.

On taking possession of any enemy ship, aircraft, installation, or other property or equipment, the commanding officer shall:

- Adopt all possible measures to prevent recapture.
- Secure or remove enemy personnel.
- Secure and preserve the logs, journals, signal books, codes and

#### 0745. Continuation of Authority After Loss of Ship or Aircraft.

When the crew of any naval vessel or naval aircraft is separated from their ship or aircraft, the commanding officer shall, if possible, continue the command and authority given to the officers of the vessel or aircraft, and shall remain in full force until the crew shall be regularly discharged or reassigned by competent authority.

#### 0746. Hospital Ship or Medical Aircraft.

1. The commanding officer of a hospital ship or the commander of a medical aircraft shall be responsible for complying with the appropriate provisions of the Geneva Convention for the Amelioration of the Condition of Wounded, Sick and Shipwrecked Members of the Armed Forces at Sea of 12 August 1949. Where necessary to the fulfillment of this responsibility, a departure from other provisions of Navy Regulations is authorized.

2. One of the central requirements under the 1949 Geneva Convention is that the ship or aircraft maintain a non-combatant status. Under this Convention, the following conditions do not deprive hospital ships or medical aircraft of their non-combatant status:

- The fact that the crews are armed for the maintenance of order, for their own defense or that of the sick and wounded.
- The presence on board of apparatus exclusively intended to facilitate navigation or unclassified communications.
- The discovery on board hospital ships or in sick bays of portable arms and ammunition taken from the wounded, sick and shipwrecked and not yet handed to proper authorities.
- The fact that humanitarian activities of hospital ships or of the crews extend to the care of the wounded, sick or shipwrecked persons.
- The transport of equipment and of personnel intended exclusively for medical duties, over and above normal requirements of the hospital ship.

#### 0747. Status of Boats.

1. Boats shall be regarded in all matters concerning the rights, privileges, and comity of nations as part of the ship or aircraft to which they belong.

2. In ports where war, insurrection or armed conflict exists or threatens, the commanding officer shall:

- Require that boats may from the ship or aircraft have some appropriate and competent person in charge.
- See that steps are taken to make their nationality evident at all times.

#### 0748. Proper Use of Labor and Materials.

1. No government materials shall be diverted from their intended use, except for proper purposes, nor shall any buildings or portions thereof be occupied or used by other than authorized persons.

2. Civilian employees who are paid from appropriated funds shall not be permitted to work on any project for which they are paid from such funds, any work other than that authorized by the Secretary of the Navy, Government, or as otherwise prescribed by the Secretary of the Navy.

0749. Work, Facilities, Supplies, or Services for Other Government Departments, States or Local Governments, Foreign Governments, Private Parties and Morale, Welfare, and Recreational Activities.

1. Work may be done for or facilities, supplies, or services furnished to departments and agencies of the Federal and State governments, local governments, foreign governments, private parties, and morale, welfare, and recreational activities with the approval of a commanding officer provided:

- The cost does not exceed limitations the Secretary of the Navy may approve or specify; and,
- In the case of private parties, it is in the interest of the Government to do so and there is no issue of competition with private industry; and,
- In the case of foreign governments a disqualification of a government has not been issued for the benefits of this article.

2. Work shall not be started nor facilities, supplies, or services furnished, morale, welfare, and recreational activities not classified as humanitarian, or for the benefit of or state or local governments or private parties until funds to cover the cost have been deposited with the commanding officer, or unless otherwise provided by law.

3. Work shall not be started, nor facilities, supplies, or services furnished other Federal Government departments and agencies, or expenses charged to non-appropriated funds of morale, welfare, and recreational activities classified as instrumentalities of the United States until reimbursable funding arrangements have been made.

## NOTICES

2. A ship arriving at, or departing from, a naval station shall be furnished such assistance, including tugs, when available, as in the opinion of the commanding officer of the naval station or the ship may be necessary for her safe handling.

#### 0752. Responsibility for Safety of Ships and Craft at a Naval Station or Shipyard.

1. The commanding officer of a naval station or shipyard shall be responsible for the care and safety of all ships and craft at such station or shipyard not under the command of an officer or assigned to another authority, and for any damage that may be done by or to them. In addition, the commanding officer of a naval station or shipyard shall be responsible for the safe execution of work performed by his activity upon any ship located at that activity.
2. It shall be the responsibility of the commanding officer of a ship in commission which is undergoing overhaul, or which is otherwise immobilized at a naval station or shipyard, to request such services as are necessary to ensure the safety of his ship. The commanding officer of the naval station or shipyard shall be responsible for providing requested services in a timely and adequate manner.
3. When a ship or craft not under her own power is being moved by direction of the commanding officer of a naval station or shipyard, that officer shall be responsible for any damage that may result therefrom to the pilot or other person designated for the purpose shall be in direct charge of such movement, and all persons on board shall cooperate with and assist him as necessary.
4. When a ship operating under her own power is being drydocked, the commanding officer shall be fully responsible for the safety of his ship until the extremity of the ship first to enter the drydock reaches the dock sill and the ship is pointed fair for entering the drydock. The docking officer shall then take charge and complete the docking, remaining in charge until the ship has been properly lashed, dunnage blocks heeled, and the dock pumped down. In undocking, the docking officer shall assume charge when flooding commences, and the extremity of the ship last to leave shall remain in charge until the extremity of the ship last to leave is clear of the dock. When the ship is pointed fair for leaving the dock, the docking officer shall assume responsibility for the safety and control of the ship.
5. If the ship is elsewhere than at a naval station or shipyard, the relationship between the commanding officer and the supervisor of shipbuilding, or other appropriate official, shall be the same as that between the commanding officer and the commanding officer of a naval station or shipyard as specified in this article.

#### 0753. Ships in Drydock.

1. The commanding officer of a ship in drydock shall be responsible for effecting adequate closure, during such periods as they will be unattended, of all openings in the ship's bottom upon which no work is being undertaken

4. Work, facilities, supplies, or services furnished non-appropriated fund activities classified as instrumentalities of the United States in the Navy Comptroller Manual shall be funded in accordance with regulations of the Comptroller of the Navy.

5. Supplies or services may be furnished to naval vessels and military aircraft of friendly foreign governments (unless otherwise provided by law or international treaty or agreement):

- a. On a reimbursable basis without an advancement of funds, when in the best interest of the United States;

- (1) Routine port services (including pilotage, tugs, garbage removal, linehandling, and utilities) in territorial waters or waters under United States control;

- (2) Routine airport services (including air traffic control, parking, servicing, use of runways);

- (3) Miscellaneous supplies (including fuel, provisions, spare parts, and general stores) for non-appropriated fund activities, subject to approval of the competent fleet or force commanders when provided overseas;

- (4) With approval of the Chief of Naval Operations in each instance, overhauls, repairs, and alterations together with necessary equipment and its installation required in connection therewith, to vessels and military aircraft.

- b. Routine port and airport services may be furnished at no cost to the foreign government concerned where such services are provided by persons of the naval service without direct cost to the Department of the Navy.

6. In cases of emergency involving possible loss of life or valuable property, work may be started or facilities furnished prior to authorization, or provision for payment may be made on the basis of a report of the facts and circumstances. Such action shall be made promptly to the Secretary of the Navy at the appropriate authority.

7. Changes and accounting for any work, supplies, or services shall be as prescribed in the Navy Comptroller Manual.

#### 0750. Relations With Personnel of Naval Shipyard or Station.

1. Except in matters coming within the security and safety regulations of the ship, the commanding officer shall exercise no control over the officers or employees of a naval shipyard or station where his ship is moored, unless with the permission of the commander of the naval shipyard or station.

#### 0751. Movement of Ships at a Naval Station.

1. No ship or craft shall be moved or undergo dock trials during its stay at a naval station, except by direction or with the approval of the commanding officer of such station.

by the docking activity. The commanding officer of the docking activity shall be responsible for the closing, at the end of working hours, of all valves and other openings in the ship's bottom upon which work is being undertaken by the docking activity, when such closing is practicable.

2. Prior to undocking, the commanding officer of a ship shall report to the docking officer any material changes in the amount and location of weights on board which have been made by the ship's force while in dock, in the manner, and so forth, that the docking officer may require in the ship's bottom plan. The level of water in the dock shall not be permitted to rise above the keel blocks prior to receipt of this report. The above valves and openings shall be tended during flooding of the dock.

3. When a ship or craft, not in commission, is in a naval drydock, the provisions of this article shall apply, except that the commanding officer of the docking activity or his representative shall act in the capacity of the commanding officer.

#### 0754. Pilotage.

1. The commanding officer shall:
  - a. Pilot the ship under all ordinary circumstances, but he may employ pilots whenever in his judgment such employment is prudent.
  - b. Not call a pilot on board until the ship is ready to proceed.
  - c. Not retain a pilot on board after the ship has reached her destination or point where pilot is no longer required.
  - d. Give preference to licensed pilots.
  - e. Pay pilots no more than the local rates.

2. A pilot is merely an adviser to the commanding officer. His presence on board shall not relieve the commanding officer of his responsibility from their responsibility for the proper performance of the duties with which they may be charged concerning the navigation and handling of the ship. For an exception to the provisions of this paragraph, see "Rules and Regulations Covering Navigation of the Panama Canal and Adjacent Waters," which directs that the pilot assigned to a vessel in those waters shall have control of the navigation and movement of the vessel. Also see the provisions of these regulations concerning the navigation of ships at a naval shipyard or station, or in entering or leaving drydock.

#### 0755. Safe Navigation and Regulations Governing Operation of Ships and Aircraft.

1. The commanding officer is responsible for the safe navigation of his ship or aircraft, except as prescribed otherwise in these regulations for ships at a naval shipyard or station in drydock, or in the Panama Canal, in time of war or armed conflict, or in exercises simulating war or armed conflict,

## NOTICES

competent authority may modify the use of lights or other safeguards required by law to prevent collisions at sea, in port, or in the air. In exercises, such modifications will be employed only when ships or aircraft clearly will not be hazarded.

2. Professional standards and regulations governing ship handling, safe navigation, safe sectoring, and related operational matters shall be promulgated by the Chief of Naval Operations.

3. Professional standards and regulations governing the operation of naval aircraft and related matters shall be promulgated by the Chief of Naval Operations or the Commander of the Marine Corps as appropriate.

#### 0756. Duties of the Prospective Commanding Officer of a Ship.

1. Except as may be prescribed by the Chief of Naval Operations, the prospective commanding officer of a ship not yet commissioned shall have no independent authority over the preparation of the ship for service by virtue of his assignment to such duty, until the ship is commissioned and transferred to his command. As the prospective commanding officer, he shall:
  - a. Procure from the commander of the naval shipyard or the supervisor of shipbuilding the general arrangement plans of the ship, and all the pertinent information relative to the general condition of the ship and the work being undertaken on the hull, machinery, and equipment, upon reporting for duty.
  - b. Inspect the ship as soon after reporting for duty as practicable, and frequently thereafter, in order to keep himself informed of the state of her preparation for service. If, during the course of these inspections, he notes an unsafe or potentially unsafe condition, he shall report such condition to the commander of the naval shipyard or the supervisor of shipbuilding and to his superior for resolution.
  - c. Keep himself informed as to the progress of the work being done, including tests of equipment, and make such recommendations to the commander of the naval shipyard or the supervisor of shipbuilding as he deems appropriate.
  - d. Ensure that requisitions are submitted for articles to outfit the ship which are not otherwise being provided.
  - e. Prepare the organization of the ship.
  - f. Make such reports as may be required by higher authority, and include therein a statement of any deficiency in material or personnel.
2. If the prospective commanding officer does not consider the ship in proper condition to be commissioned at the time the transfer of the naval shipyard or the supervisor of shipbuilding signifies his intention of transferring the ship to him, he shall report that conclusion with his reasons therefor, in writing, to the commander of the naval shipyard or the supervisor of shipbuilding and to the appropriate higher authority.
3. If the ship is elsewhere than at a naval shipyard, the relationship

## 0761. Personnel Organized and Stationed.

Before departure for sea the commanding officer shall ensure that the officers and crew have been properly organized, stationed, and trained to cope effectively with any emergency that might arise in the normal course of scheduled operations.

## 0762. Entering a Port or Landing at a Place Not Designated.

When a ship or aircraft enters a port or lands at a place not designated or permitted by instructions, the commanding officer shall promptly report to his immediate superior the cause for doing so, and an estimate of the delay which will be incurred. When such port or place is within foreign jurisdiction, the nearest United States diplomatic or consular representative, accredited to the government concerned, shall also be informed.

## 0763. Quarantine.

1. The commanding officer or aircraft commander of a ship or aircraft shall comply with all quarantine regulations and restrictions, United States or foreign, for the port or area within which his ship or aircraft is located.

2. Whether or not liable to quarantine, the commanding officer shall afford every facility to visiting health officers, United States or foreign, and shall give all information required by the latter, insofar as permitted by the requirements of military security.

3. The commanding officer shall allow no intercourse with a port or area or with other ships or aircraft until he has consulted local health authorities when:

- Doubt exists as to the sanitary regulations or health conditions of the port or area.
- A quarantine condition exists aboard his ship or aircraft.
- Coming from a suspected port or area, or one actually under quarantine.

4. No concealment shall be made of any circumstance that may subject a ship or aircraft of the Navy to quarantine.

5. Should there appear at any time on board a ship or aircraft conditions which present a hazard of introduction of a communicable disease outside the ship or aircraft, the commanding officer or aircraft commander shall at once report the facts to the senior officer present, to other appropriate authorities and, if in port, to the health authorities having quarantine jurisdiction. He shall prevent all contacts likely to spread disease until pratique is received. The commanding officer of a ship in port shall hoist the appropriate signal.

## NOTICES

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

between the prospective commanding officer and the supervisor of shipbuilding, or other appropriate official, shall be the same as that between the prospective commanding officer and the commander of a naval shipyard as specified in this article.

## 0757. Authority of the Commanding Officer or Prospective Commanding Officer of a Naval Nuclear Powered Ship.

The Chief of Naval Operations shall be responsible for providing the commanding officer or prospective commanding officer of a naval nuclear powered ship with the authority and direction necessary to carry out his responsibilities for the safety of the ship and crew, and the health and safety of the general public in surrounding area.

## 0758. Inspection Incident to Commissioning of Ships.

When a ship is to be commissioned, the authority designated to place such ship in commission shall, just prior to commissioning, cause an inspection to be made to determine the cleanliness and readiness of the ship and its crew and outfit. In the case of the delivery of a ship by a contractor, the above inspection shall precede acceptance of the ship. A copy of the report of this inspection shall be furnished to the officer detailed to command the ship and to appropriate commands, bureau or offices.

## 0759. Commissioning and Assembly Command.

A ship shall be transferred to the prospective commanding officer and placed in commission in accordance with the following procedure:

- The formal transfer shall be effected by the district commander or his representative.
- As many of the officers and crew of the ship as circumstances permit, and a guard and music, shall be assembled and properly distributed on the quarter-deck or other suitable part of the ship.
- The officer effecting the transfer shall cause the national ensign and the proper insignia of command to be hoisted with the appropriate ceremonies, and shall turn the ship over to the prospective commanding officer.
- The prospective commanding officer shall read his orders, assume command, and cause the watch to be set.

## 0760. Preparing for Sea After Commissioning.

In preparing the ship for sea after commissioning, the commanding officer shall endeavor to discover and correct any defect or inadequacy in the crew or in the ship, her installations, equipment, ammunition, and stores; and shall ensure that all installations and equipment can be operated satisfactorily by the crew.

## 0764. Customs and Immigration Inspections.

1. The commanding officer or aircraft commander shall facilitate any proper examination which it may be the duty of a customs officer or an immigration officer of the United States to make on board the ship or aircraft under his command. He shall not permit a foreign customs officer or an immigration officer to make any examination whatsoever, except as hereinafter provided, on board the ship, aircraft, or boats under his command.

2. When a ship or aircraft of the Navy or a public vessel manned by naval personnel is carrying cargo for private contractors, it shall be subject to the local customs regulations of the port, domestic or foreign, in which the ship or aircraft may be, and in all matters relating to such cargo, the procedure prescribed for private merchant vessels and aircraft shall be followed. Government-owned stores or cargo in such ship or aircraft not landed nor intended to be landed nor in any manner trafficked in, are, by the established precedent of international courtesy, exempt from customs duties, but a declaration of such stores or cargo, when required by local customs regulations, shall be made. Commanding officers shall prevent, as far as possible, disputes with the local authorities in such cases, but shall protect the ship or aircraft and the Government-owned stores and cargo from any search or seizure.

3. Upon arrival from a foreign country, at the first port of entry in United States territory, the commanding officer or the senior officer of ships or aircraft in company, shall notify the collector of the port. Each individual aboard shall, in accordance with customs regulations, submit a list of articles purchased or otherwise acquired by him abroad. Dutiable articles shall not be landed until the customs officer has completed his inspection.

4. Commanding officers of naval vessels and aircraft transporting United States civilian and foreign military and civilian passengers shall satisfy themselves that the passenger clearance requirements of the Immigration and Naturalization Service are complied with upon the arrival of the ship or aircraft at the port of destination. Clearance for each passenger by an immigration officer shall be required upon arrival from foreign ports and at the completion of movements between the following: Continental United States (including Alaska and Hawaii), Canal Zone, Puerto Rico, Virgin Islands, Guam, American Samoa, or other outlying places subject to United States jurisdiction. Commanding officers prior to arriving shall advise the cognizant naval or civilian port authority of the aforementioned passengers aboard and shall detain them for clearance as required by the Immigration and Naturalization Service.

5. The provisions of this article shall not be construed to require delaying the movements of any ship or aircraft of the Navy in the performance of her assigned duty.

## NOTICES

## 0765. Environmental Pollution.

The commanding officer shall cooperate with local, state and other governmental authorities in the prevention, control and abatement of environmental pollution to the extent resources and operational considerations permit. He shall be aware of existing policies regarding pollution control and he should recommend remedial measures when appropriate.

## 0766. When Acting Singley.

When acting singley, the commanding officer shall conform to the applicable regulations for the senior officer present.

## 0767. Issue of Personal Necessaries.

1. The commanding officer is authorized to direct, in writing, the issue of clothing and small stores to enlisted persons in a nonpay status, including those in debt to the Government, in such amount as he deems necessary for their health and comfort.

2. He is likewise authorized to direct, in writing, the issue to such enlisted persons of certain other necessities, including toilet articles and tobacco, in the manner and amount prescribed by the Commander Naval Supply Systems Command or the Commandant of the Marine Corps.

## 0768. Care of Ships, Aircraft, Vehicles and Their Equipment.

The commanding officer shall cause such inspections and tests to be made and procedures carried out as are prescribed by competent authority, together with such others as he deems necessary, to ensure the proper preservation, repair, maintenance, and operation of any ship, aircraft, vehicle, and their equipment assigned to his command.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

CHAPTER 8  
PRECEDENCE, AUTHORITY AND COMMAND

0801. Officers of the Naval Service.

1. Officers of the United States naval service shall be known as officers in the line, officers in the staff corps, chief warrant officers, and warrant officers. Warrant officers are, by law, officers in a qualified sense and are classed as being in the line.

2. Officers in the line of the Navy include the following officers in the grade of ensign and above:

- Line officers not restricted in the performance of duty.
- Limited duty officers designated for duty in line technical fields.
- Line officers restricted in the performance of duty designated for engineering duty, aeronautical engineering duty, and types of special duty which include cryptology, intelligence, public affairs, meteorology and oceanography/hydrography.
- Officers in the staff corps of the Navy include:
  - Officers in the Medical, Supply, Chaplain, Civil Engineer, Judge Advocate General's, Dental, Medical Service, and Nurse Corps, not restricted in the performance of duty within their respective corps.
  - Officers in staff corps designated for limited duty within their respective corps.
- In the Navy there are: chief warrant officers, W-4; chief warrant officers, W-3; chief warrant officers, W-2; and warrant officers, W-1. Chief warrant officers and warrant officers whose technical specialty is within the compass of a staff corps are classed as chief warrant officers or warrant officers in the staff corps. All other chief warrant officers and warrant officers are classed as in the line.
- Officers of the Marine Corps of and above the grade of second lieutenant are officers in the line and include those:
  - Not restricted in the performance of duty.
  - Designated for limited duty in appropriate technical fields.

NOTICES

6. Chief warrant officers and warrant officers of the Marine Corps are classed as in the line.

7. The term "line officer of the naval service" shall be construed to refer to line officers of both the Navy and the Marine Corps.

8. Within the Manual for Courts-Martial, United States, 1969 (Revised Edition) and the Manual of the Judge Advocate General, the term "officer" includes chief warrant officers W-4, W-3, and W-2, but does not include a warrant officer W-1 unless the context indicates otherwise.

0802. Precedence of officers.

- The date of rank of an officer is that stated in his commission, or when no commission for his current grade has been issued to him, the date established by the Secretary of the Navy.
- All line officers of the same grade take precedence with each other, (except as provided for when a naval officer is serving as Chairman of the Joint Chiefs of Staff) according to their respective dates of rank, but when such officers have the same date of rank or the same grade or lost numbers, their precedence shall be as indicated in the appropriate lineal lists maintained in accordance with law, and provided that the Assistant Commandant of the Marine Corps, 1<sup>st</sup> and 2<sup>nd</sup> lieutenants, and the grade of lieutenant general pursuant to USC, C. 5232(a), ranks first for all purposes among the officers serving in that grade under that section.
- Line and staff corps officers of the naval service, when of the same grade, shall take precedence with all other line and staff corps officers of the same grade from the date of rank stated in their commissions. Line officers and staff corps officers having the same date of rank shall take precedence with respect to other line and staff corps officers, respectively, in accordance with the lineal lists, in order as shown in the appropriate lineal lists. Staff corps officers having the precedence after their line running mates shall take precedence after their line running mates, and of all line and staff officers junior to their line running mates. When there are officers of more than one staff corps having the same line running mate and the same date of rank as their line running mate they shall take precedence in the following order:
  - Officers in the Medical Corps.
  - Officers in the Supply Corps.
  - Officers in the Chaplain Corps.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

- <sup>1</sup> Surgeon General's grade corresponds to that of Surgeon General of the Army.  
<sup>2</sup> May hold grade corresponding to Major General or Brigadier General.  
<sup>3</sup> And other officers of same grade, with titles appropriate to their duties.

d. Officers in the Civil Engineer Corps.

e. Officers in the Judge Advocate General's Corps.

f. Officers in the Dental Corps.

g. Officers in the Medical Service Corps.

h. Officers in the Nurse Corps.

4. Chief warrant officers (Grades W-2, W-3, and W-4) of the Navy or Marine Corps, in the same grade, take precedence with each other according to the dates of rank stated in their commissions. When the commissions of two or more of them are of the same date, they take precedence according to the order in which their names are shown in the appropriate lineal lists.

5. Warrant officers (Grade W-1) of the Navy or Marine Corps take precedence with each other according to the dates of rank stated in their warrants. When the warrants of two or more of them are of the same date, they take precedence according to the order in which their names are shown in the appropriate lineal lists.

6. The details of computing precedence of officers of the reserve components shall be as prescribed by the Commandant of the Marine Corps or the Chief of Naval Personnel, as appropriate.

0803. Relative Rank and Precedence of Officers of Different Services.

1. Relative rank of grades of officers of the Army, Navy, Marine Corps, Air Force, and Coast Guard when serving in the National Oceanic and Atmospheric Administration and Public Health Service when serving with the military, is indicated in the following table:

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

corps, the senior officer in the formation who is a member of the same staff corps as the commander or commanding officer shall be in command thereof.

2. When serving on shore with a mixed detachment composed of seamen and marines, the marines shall always be placed on the right in battalion or other infantry formation on occasions of ceremony.

0808. Title of Officers Holding Acting Appointments.

An officer holding an acting appointment shall have the title of his acting grade, and when such appointment is revoked, he shall resume the title of his actual grade.

0809. Titles and Authority of Certain Officers.

1. The Commander Naval Supply Systems Command, the Commander Naval Facilities Engineering Command, and the Chief of the Dental Division shall have, while so serving, the additional titles of Chief of Supply Corps, Chief of Civil Engineers, and Chief of Dental Corps, respectively.

2. The Surgeon General, the Chief of Supply Corps, the Chief of Chaplains, the Chief of Civil Engineers, the Judge Advocate General, the Chief of the Dental Corps, the Chief of the Medical Service Corps, the Director of the Nurse Corps, and all the principal advisors and sponsors on matters with ratings associated with the corps. Also, as heads of corps, they shall be spokesmen regarding professional matters with the military and civilian communities.

0810. Manner of Addressing Officers.

1. Except as provided in paragraph 2, every officer in the naval service shall be designated and addressed in official communications by the title of his or her grade, preceding the name.

2. In oral official communications, officers will be addressed by their grade except in the case of the Medical Corps, the Dental Corps and those officers of the Medical Service Corps and the Nurse Corps having doctoral degrees who shall be addressed as "Doctor". When addressing an officer whose grade may be addressed as "Chaplain". When addressing an officer whose grade includes a modifier, the modifier may be dropped.

3. In written communications the name of the corps to which any staff corps officer belongs shall be indicated immediately after his name.

0811. Exercise of Authority.

1. All persons in the naval service on active service, and those on the retired list with pay, and transferred members of the Fleet Reserve and the Fleet Marine Corps Reserve, are at all times subject to naval authority. While on active service they may, if not on leave of absence except as noted below, on the sick list, taken into custody, under arrest, suspended

2. The precedence of officers of the Army, Navy, Marine Corps, Air Force, Coast Guard, and Public Health Service of the same relative grade shall be in accordance with their respective dates of rank, the senior in date of rank taking precedence over the junior.

3. When officers of the Army, Navy, Marine Corps, Air Force, Coast Guard, and Public Health Service have the same or relative grade and the same date of rank, they are serving together they shall have precedence in the order in which they were promoted to that grade. If they were promoted at the same time each has served on active duty as a commissioned officer of the United States.

4. When serving with the Army, Navy, Marine Corps, or Air Force, commissioned officers of the National Oceanic and Atmospheric Administration shall rank with and after officers of corresponding grade in the Army, Navy, Marine Corps, or Air Force of the same length of service in grade.

5. A Public Health Service Officer in uniform may use, for the purpose of identification and address, the military or naval rank corresponding to the grade marking worn. An officer of Army, Navy, Marine Corps, Coast Guard or Public Health Service may use, for the purpose of identification and address, the title of military or naval rank corresponding to the grade marking worn.

0804. Precedence of an Officer in Command.

An officer, either of the line or of a staff corps, detailed to command by competent authority or who has succeeded to command has precedence over all officers or other persons attached to the command of whatever rank and whether they are of the line or of a staff corps.

0805. Precedence of the Executive Officer.

The executive officer, while in the execution of his duties as such, shall take precedence over all persons under the command of the commanding officer.

0806. Precedence on Courts and Boards.

The precedence established by these regulations shall be observed on all courts and boards.

0807. Precedence in Processions on Shore.

1. Officers in processions on shore shall be placed in formation according to their grade but not necessarily according to their order of precedence in grade. All processions on shore where officers appear in an official capacity and where formation is necessary, shall be in the order of rank and seniority. The command thereof shall devolve upon the senior line officer in the formation, except when the commander or commanding officer of the unit in formation is a member of a staff

from duty, in confinement, or otherwise incapable of discharging their duties, exercise authority over all persons who are subordinate to them.

2. A person in the naval service, although on leave, may exercise authority:

a. When in a naval ship or aircraft and placed on duty by the commanding officer or aircraft commander.

b. When in a ship or aircraft of the armed services of the United States other than a naval ship or aircraft, the commanding officer of naval personnel embarked, or when placed on duty by such officer.

c. When senior officer at the scene of a riot or other emergency, or when placed on duty by such officer.

0812. Authority Over Subordinates.

All officers of the naval service, of whatever designation or corps, shall have all the necessary authority for the performance of their duties and shall be obeyed by all persons, of whatever designation or corps, who are, in accordance with these regulations and orders from competent authority, subordinate to them.

0813. Delegation of Authority.

The delegation of authority and the issuance of orders and instructions by a person in the naval service shall not relieve such person from any responsibility imposed upon him. He shall ensure that the delegated authority is properly exercised and that his orders and instructions are properly executed.

0814. Abuse of Authority.

Persons in authority are forbidden to injure their subordinates by tyrannical or capricious conduct, or by abusive language.

0815. Contradictory and Conflicting Orders.

1. An officer who diverts another from any service upon which he has been ordered by a common superior, or requires him to act contrary to the orders of such superior, or interferes with those under such superior's command, must immediately report his action to the officer whose orders he has contravened, and show that the public interest required such action. All orders under such circumstances shall be given in writing when possible.

2. If an officer receives an order which annuls, suspends, or modifies an order previously received, or one contrary to instructions or orders from the Secretary of the Navy, he shall exhibit his first orders,

unless he has been instructed not to do so, and represent the facts in writing to the superior from whom the last order was received. If, after such representation, the officer from whom the last order was received should insist upon the execution of his order, it shall be obeyed. The officer receiving and executing such order shall report the circumstances to the superior from whom he received the original order.

0816. Authority of an Officer in Command.

An officer, either of the line or a staff corps, detailed to command by competent authority, has authority over all officers or other persons attached to the command, whatever their rank, and whether they are of the line or of a staff corps.

0817. Authority of an Officer Who Succeeds to Command.

1. An officer who succeeds to command due to incapacity, death, departure on leave, detachment without relief, or absence due to orders from competent authority of the officer detailed to command has the same authority and responsibility as the officer whom he succeeds.

2. An officer who succeeds to command during the temporary absence of the commanding officer shall make no changes in the existing organization, and shall endeavor to have the routine and other affairs of the command carried on in the usual manner.

3. When an officer temporarily succeeding to command signs official correspondence, the word "Acting" shall appear below his signature.

0818. Authority of a Vice Commander or a Deputy.

A vice commander or a deputy shall exercise command or control only over activities and matters specified in his orders or as directed by his superior.

0819. Authority of the Commander or Commanding Officer of a Base or Station Over Visiting Commands.

While at a naval base or naval station and not under the command of the naval base commander or naval station commanding officer, the officer in command or in charge of a ship, craft, unit of aircraft or troops shall conform to the orders of the naval base commander or naval station commanding officer related to common or specific services he may provide. Such common or specific services may include waterfront operations, airfield operations, security, fire protection, safety, defense, sanitation, recreation, and welfare.

0820. Authority Over Fleet Aircraft at a Naval Station.

1. Fleet aircraft personnel and aircraft units based on shore at a naval station shall constitute the Fleet Air Detachment at that station.

## NOTICES

the orders of such flag officer. Other officers embarked as passengers, senior to the commanding officer, shall have no authority over him.

2. Officers embarked as passengers who are junior to the commanding officer, or commanding officer of the transport unit of a ship of the Military Sealift Command, shall be on the staff of an officer also embarked, may be assigned to duty in the transport unit, and shall be subject to the orders of the commanding officer or commanding officer of the service tender it necessary. The commanding officer or commanding officer of the transport unit shall be the judge of such necessity. Passengers thus assigned shall have the same authority as though regularly attached to the ship.

0824. Authority to Place Self on Duty.

No officer can place himself on duty by virtue of his commission or warrant alone.

0825. Authority in a Boat.

Except when embarked in a boat authorized by the Chief of Naval Operations to have an officer or petty officer in charge, the senior live officer (including commissioned warrant and warrant officers) eligible for command at sea has authority over all persons embarked therein, and is responsible for the safety and management of the boat.

0826. Authority and Responsibility of a Senior Officer Under Certain Circumstances.

1. In the event of a riot or quarrel between persons in the naval service or in other circumstances not provided for in these regulations in which persons in the naval service are involved, the senior officer of the naval service at the scene shall assume command and authority. The senior officer shall be relieved of this responsibility by competent authority. All persons in the naval service in the vicinity shall render prompt assistance and obedience to the officer thus engaged in the restoration of order.

2. Should there be no commissioned officer or warrant officer at the scene, the senior petty officer or non-commissioned officer present shall assume command.

3. The person who assumed command under the above circumstances shall have the authority to apprehend any person in the naval service if necessary.

0827. Authority and Status of Persons in the Coast Guard, National Oceanic and Atmospheric Administration, and Public Health Service.

Whenever, by order of the President, personnel of the Coast Guard and the National Oceanic and Atmospheric Administration, and officers of the Public Health Service, are serving as part of the naval service, they shall be subject to the laws, regulations, and orders which pertain to the Navy insofar as may be necessary for command discipline, and effective naval administration. Otherwise they shall continue to be subject to laws, regulations, and orders of their respective services. They shall have the same

Squadrons and larger tactical units of fleet aircraft, however, shall retain their identity as such, including command of all regularly assigned personnel.

2. The senior officer in command of a unit of fleet aircraft based at a naval station shall have the title Commander Fleet Air Detachment. He shall command the personnel of units of fleet aircraft present when required for the purpose. He shall require that personnel attached to him shall conform to the orders of the commanding officer of the station in matters under the authority of the latter, including, insofar as operating conditions permit, the routine of the station. He shall make such special details of fleet personnel to assist the various departments of the station as may be determined to be necessary by higher authority.

0821. Authority of the Commanding Officer of a Hospital Ship.

1. The naval hospital in a hospital ship embraces all persons attached to the hospital either for duty or for treatment. All activities within the ship which are devoted to the care and treatment of the sick or injured, and all tasks of the ship which are used for the care and treatment of the sick or injured, are living quarters by persons attached to the hospital, or for the stowage of the supplies or equipment belonging to the hospital.

2. The commanding officer of the naval hospital is under the command of the commanding officer of the hospital ship. The commanding officer of the ship shall normally limit the exercise of command over the naval hospital to such military matters as discipline, security, intelligence, communications, fire protection, watertight integrity, stability, stability and maintenance, and overall cleanliness with respect to the hospital, and of the commanding officer of the naval hospital. The commanding officer of the naval hospital shall not exercise control, within the hospital, except as authorized by the commanding officer of the hospital, over its administration or organization, including that of personnel and work, and the establishment of technical methods and procedures, unless such control has been specifically delegated to him by competent authority. Nothing in this article shall be construed to prevent the appropriate assignment of a proportionate share of work of a general nature to personnel attached to the naval hospital.

0822. Authority of an Officer of the Marine Corps Over Naval Forces.

Officers of the Marine Corps may not command ships or naval establishments. This article shall not be construed to prevent an officer of the Marine Corps, when so detailed by the Secretary of the Navy or a Commander in Chief, from having and exercising such authority as may be necessary to direct the operations of all forces assigned to him.

0823. Authority of Officers Embarked as Passengers.

1. The commanding officer of a ship or aircraft, not a flagship, with a flag officer eligible for command at sea embarked as a passenger shall be subject to

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

authority and control over officers and enlisted persons of the other services as that to which their grade, rank or rate entitles them in their respective services.

0828. Authority of Officers With Acting Appointments.

An officer duly appointed to act in any grade shall, while serving under such appointment, have the same authority as if he held a commission in that grade.

0829. Authority of Warrant Officers, Non-Commissioned Officers, and Petty Officers.

Chief warrant officers, warrant officers, non-commissioned officers, and petty officers shall have, under their respective titles, all necessary authority for the proper performance of their duties, and they shall be charged accordingly.

0830. Authority of a Sentry.

A sentry, within the limits stated in his orders, has authority over all persons on his post.

0831. Authority of Juniors to Issue Orders to Seniors.

No officer is authorized by virtue of his rank alone to give any order or grant any privilege, permission, or liberty to any officer his senior. A senior officer is not required to receive such order, privilege, permission, or liberty from his junior, unless such junior is at the time in command of the ship or other command to which the senior is attached, or in command or direction of the military expedition or duty on which such senior is serving, or as executive officer is executing an order of the commanding officer.

0832. Basis for Details.

Appointments, details, transfers, and assignments shall be made on the basis of official records.

0833. Changes in Details to Duty.

No officer, except the senior officer present, shall change the detail of a person assigned by a superior to a specific duty without the permission of that superior. The senior officer present shall not change the detail of any person without good and sufficient reason and shall report all changes and the reasons for them to the superior without delay.

0834. Orders to Active Service.

1. No person who is not on active service or leave of absence shall be ordered into active service or on duty without permission of the Commandant of the Marine Corps or the Chief of Naval Personnel, except:

## NOTICES

a. In the case of a person on leave of absence by the officer who granted the leave or a superior.

b. By the senior officer present on a foreign station.

2. In the event that the senior officer present of a foreign station issues any orders as contemplated by this article, he shall report the facts, including the reasons for issuing such orders, to the Chief of Naval Personnel or the Commandant of the Marine Corps, without delay.

3. Retired officers of the Navy and Marine Corps may be ordered to active service, with their consent, in time of peace. In time of war or a national emergency, such retired officers may, at the discretion of the Secretary of the Navy, be ordered to active service.

0835. Command of A Task Force.

A commander in chief and any other naval commander, may detail in command of a task force, or other task command, any eligible officer under his command whom he desires, and all other officers ordered to the task force or other task command shall be considered subordinate to the designated commander. All orders issued under the authority of this article shall continue in effect after the death or disability of the officer issuing them until revoked by his successor in command or by higher authority. The powers delegated to a commander by this article are not conferred on any other officer by virtue of the fact that he is senior officer present.

0836. Command of Naval Districts.

The officer detailed as commandant of a naval district shall be an officer of the line in the Navy, eligible for command at sea.

0837. Command of Naval Bases.

The officer detailed to command a naval base shall be an officer of the line in the Navy, eligible for command at sea.

0838. Command of Naval Shipyards.

The officer detailed to command a naval shipyard shall be trained in the technical aspects of building and repair of ships and shall have had substantial previous experience in the technical and management phases of such work. Such officer may have been designated for engineering duty.

0839. Command of Ships and Submarines.

1. The officer detailed to command a commissioned ship shall be an officer of the line in the Navy eligible for command at sea.

2. The officer detailed to command an aircraft carrier, an aircraft tender, or a ship with a primary task of operating or supporting aircraft shall be an officer of the line in the Navy, eligible for command at sea, designated as a naval aviator or naval flight officer.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

3. The officer detailed to command a submarine shall be an officer of the line in the Navy, eligible for command at sea, and qualified for command of submarines.

#### 0840. Command of Air Activities.

1. The officer detailed to command a naval aviation school, a naval air station, or a naval air unit organized for flight tactical or administrative purposes shall be an officer of the line in the Navy, designated as a naval aviator or naval flight officer, eligible for command at sea.

2. The officer detailed to command a naval air activity of a technical nature on shore may be an officer of the line in the Navy not eligible for command at sea but designated as a naval aviator or naval flight officer or designated for aeronautical engineering duty.

3. The officer detailed to command a Marine Corps aviation school, a Marine Corps air activity on shore or a Marine Corps air unit organized for flight tactical purposes shall be an officer of the Marine Corps, designated as a naval aviator or naval flight officer.

4. An officer of the Navy shall not normally be detailed to command an aviation unit of the Marine Corps nor shall an officer of the Marine Corps normally be detailed to command an aviation unit of the Navy. Aircraft units of the Marine Corps may, however, be assigned to ships or to naval air activities in the same manner as aircraft units of the Navy and, conversely, aircraft units of the Navy may be so assigned to Marine Corps air activities. A group composed of aircraft units of the Navy and aircraft units of the Marine Corps may be commanded either by an officer of the Navy or Marine Corps.

#### 0841. Multiservice Commands.

1. When different commands of the Army, Navy, Air Force, Marine Corps, and Coast Guard join or serve together, the officer highest in rank in the Army, Navy, Air Force, Marine Corps, or Coast Guard on duty there, who is otherwise eligible to command, commands all those forces unless otherwise directed by the President.

2. An officer of the naval service in command of a unified, specified, joint, or combined command is not authorized to exercise operational control over U.S. naval forces not specifically assigned to him for operations, nor is he authorized to exercise authority as senior officer present or senior officer present afloat over such U.S. naval forces.

#### 0842. Command of Staff Corps Activities.

- An officer in a staff corps shall be detailed to command only such activities as are appropriate to his corps.

#### 0843. Detail of Executive Officer.

1. The officer detailed as executive officer shall be the officer eligible to succeed to command and who, when practicable, is next in

rank to the commanding officer. In the case of a naval hospital, a medical officer not next in rank may be detailed as executive officer by the Chief of Naval Personnel.

2. When no officer has been detailed as executive officer by the Commandant of the Marine Corps, the Chief of Naval Personnel, as appropriate, or when the officer detailed is absent or incapable of performing the duties of his command, the commanding officer shall detail the senior line officer under his command and eligible to succeed to command as executive officer except that, if the commanding officer is a member of a staff corps, he may detail as executive officer the next senior officer in the appropriate staff corps.

#### 0844. Detail of Heads of Department and Other Officers.

When no officer has been detailed by the Commandant of the Marine Corps, or the Chief of Naval Personnel, as head of a department or other subdivision of the command, or to specific duty within the department, subdivision, or when the officer so detailed is absent or incapable of performing his duty, the commanding officer may detail a suitable officer to perform such duty.

#### 0845. Detail of Persons Performing Medical or Religious Services.

Members of Medical, Dental, Chaplain, Medical Service, Nurse, or Hospital Corps shall be detailed or permitted to perform only such duties, in peace or war, as are related to medical, dental, or religious service and the administration of medical, dental, or religious units and establishments. Such duties are in accord with the permissible functions of the Geneva Conventions of August 12, 1949.

#### 0846. Detail of Women.

Women members of the naval service shall not be detailed to duty in aircraft that are operated in combat missions nor shall they be detailed to ships of the Navy other than hospital ships and transports.

#### 0847. Detail of Enlisted Persons for Certain Duties.

- Petty officers and noncommissioned officers shall not be detailed as messmen, except when nonrated men are not available.
- Marines shall not be detailed to perform the duties of master-at-arms, yeoman, or hospital companion, except in case of emergency, which shall be determined by the commanding officer. When necessary to make such assignment, it shall continue only until a suitable person can be selected for the required duty.
- Enlisted naval personnel may be assigned to duty in a service capacity in officers' messes and public quarters only when such assignment is

authorized by the Secretary of the Navy. This shall not be construed to prevent the voluntary employment, in any such capacity, of a retired enlisted person or a transferred member of the Fleet Reserve or Fleet Marine Corps Reserve without additional expense to the Government.

#### 0848. Rank and Grade of an Officer Who Succeeds to Command.

An officer who succeeds to command acquires no increase of rank nor change in grade by virtue of such succession alone.

#### 0849. Succession of a Deputy or Vice Commander.

Except as otherwise provided for specific cases, a deputy or vice commander shall succeed to command or control, as appropriate, in the case of the incapacity or death of the officer whose deputy or vice commander he is, and, unless the latter directs otherwise, at other times during the absence of such officer.

#### 0850. Succession to Command of a Bureau.

1. When there is a vacancy in the office of the chief of a bureau, or during the disability of the chief of a bureau, or during his absence and unless he directs otherwise, the deputy chief of the bureau shall command the bureau until a successor takes office or the disability or the absence ceases.

2. When the foregoing paragraph cannot be complied with because of the disability or absence of the deputy chief of the bureau, the heads of the major divisions of the bureau, in the order recommended by the Chief of Naval Operations and directed by the Secretary of the Navy, shall command the bureau until a successor takes office or the disability or the absence of the chief or deputy ceases.

#### 0851. Succession to Command of the Naval Material Command.

1. When there is a vacancy in the office of the Chief of Naval Material or during the disability of the Chief of Naval Material, the senior officer in command of the Naval Material Command, unless he directs otherwise, shall command the Naval Material Command until a successor takes office, or the disability or the absence ceases.

2. When the foregoing paragraph cannot be complied with because of the disability or absence of the Vice Chief of Naval Material, the officer next senior in rank on the staff of the Chief of Naval Material shall succeed to command of the Naval Material Command, unless otherwise directed by the Chief of Naval Operations or the Secretary of the Navy, until a successor takes office or the disability or the absence of the Chief or the Vice Chief ceases.

#### 0852. Succession to Command of a Naval Systems Command.

1. When there is a vacancy in the office of a commander of a naval systems command or during the disability of a commander of a naval systems command,

or during the absence of a commander of a naval systems command and unless he directs otherwise, the vice commander shall succeed to the command of the naval systems command until a successor takes office, or the disability or the absence ceases.

2. When the foregoing paragraph cannot be complied with because of the absence or disability of the vice commander, the officer on the staff of the commander next senior in rank of the line or same staff corps as the commander, as appropriate, shall succeed to command of the naval systems command. The officer shall be recommended by the Chief of Naval Material or the Chief of Naval Operations and directed by the Secretary of the Navy. The disability of commander or vice commander ceases.

#### 0853. Succession of a Chief of Staff and Other Staff Officers.

In the absence or incapacity of the officer on whose staff he is serving, a chief of staff, chief staff officer, or other officer on a staff may succeed to command if next in rank within the command and otherwise eligible as provided in these regulations.

#### 0854. Succession Prescribed by a Commander in Chief.

A commander in chief and, when approved by the Chief of Naval Operations, any other naval commander may prescribe the order of succession to command, including his own, among the various officers whom he has detailed to command task forces or other task commands. All orders issued under the authority of this article shall continue in effect after the incapacity or death of the officer issuing them until revoked by his successor in command or by higher authority. The powers delegated to a naval commander by this article are not conferred on any other officer by virtue of the fact that he is the senior officer present.

#### 0855. Succession to Command of a Fleet, Subdivision of a Fleet, Fleet Marine Force, or Subdivision of a Fleet Marine Force.

1. In the event of the incapacity, death, departure on leave, or detachment without relief of a commander in chief of a fleet, commander of a subdivision of a fleet, a commanding general of a fleet marine force, or a commanding general of a subdivision of a fleet marine force, or when such officer is absent from his command due to orders from competent authority and so directs, the following applies with regard to succession to command, unless competent authority prescribes that a deputy or other officer shall succeed to command. With respect to:

- A fleet, the senior line officer of the Navy, eligible for command at sea, in the fleet or subdivision of a fleet shall succeed to command.
- A fleet marine force, the senior officer of the Marine Corps, eligible for command, in the fleet marine force or subdivision of a Fleet Marine Force shall succeed to command.

## NOTICES

0859. Succession to Command of a Sea Frontier or of a Naval District.

1. In the event of the incapacity or death of a commander of a sea frontier or of a naval district, or when he is absent from the limits of his command and so directs, he shall be succeeded by the officer eligible for command at sea, designated by the commander or by the commander with the knowledge of the Chief of Naval Operations.

2. During the absence of a commander of a sea frontier or of a commander of a naval district and when he has not directed that he be succeeded in command as provided in the preceding paragraph, the deputy or the chief of staff or chief staff officer shall have authority to assume the duties required to carry on the established routine and to perform the administrative functions of the command. This shall not be construed to limit the authority or responsibility of the senior officer present in emergencies or other unforeseen situations which demand his action.

0860. Succession to Command of a Naval Base.

1. In the event of the incapacity or death of the commander of a naval base, or when he is absent and provided he so directs, he shall be succeeded by the officer, eligible for command at sea, designated by the commander of the naval base, with the approval of the immediate superior.

2. During the absence of a commander of a naval base, and when he has not directed that he be succeeded in command as provided in the preceding paragraph, the chief of staff or chief staff officer shall have authority to issue the orders required to carry on the established routine and to perform the administrative functions of the command. This shall not be construed to limit the authority or responsibility of the senior officer present in emergencies or other unforeseen situations which demand his action.

0861. Succession to Command of a Naval Shore Activity.

In the event of incapacity, death or absence of the commanding officer or officer in charge of a naval shore activity not otherwise provided for in these regulations, the officer next in rank shall succeed him, except:

a. The commanding officer of a naval hospital shall be succeeded by the executive officer who, if so detailed by the Chief of Naval Personnel, need not be next in rank.

b. An officer in the staff corps may succeed to command only at such activities as are appropriate to his corps.

c. When appropriate, the Chief of Naval Operations may specify that the commanding officer shall be succeeded by an officer eligible for command at sea who need not be next in rank.

0862. Succession to Command by Officers Designated for Engineering Duty or Special Duty.

Officers designated for engineering duty, aeronautical engineering

2. During the absence from his command or headquarters of any of the commanders referred to in paragraph 1 of this article, and when such officer has not directed that he be succeeded in command as provided in the preceding paragraph, succession to command shall be as follows:

a. The chief of staff or chief staff officer within a fleet.

b. The deputy or assistant commander within a fleet marine force, or the chief of staff if a deputy or assistant commander is not assigned.

3. An officer succeeding to command shall have authority to issue orders required to carry on the established routine and to perform the administrative functions of the command. This shall not be construed to limit the authority or responsibility of the senior officer present in emergencies or other unforeseen situations which demand his action.

0856. Succession in Battle.

When a flag officer or other commander of ships is incapacitated in battle, the officer next in rank in the flagship shall be eligible to succeed him and shall succeed provisionally until the officer who would succeed him in the preceding article assumes that position. When the officer next in rank to the officer who would succeed him is not on board the ship, the duty of the officer who succeeds him shall be to assume command as soon as practicable, and to direct the flag officer to the officer who will succeed him and to the immediate superior of the flag officer.

0857. Succession to Command of a Ship.

In the event of the incapacity, death, relief from duty, or absence of the officer detailed to command a ship, he shall be succeeded by the line officer in the ship, eligible for command at sea, next in rank and regularly attached to and on board the ship, until relieved by competent authority or until the regular commanding officer returns.

0858. Succession to Command of Aircraft Units and Submarines.

1. In the event of the incapacity, death, relief from duty, or absence of the officer detailed to command an aircraft unit, submarine, group, or wing, he shall be succeeded by the officer next in rank and regularly attached to and on board the unit, until relieved by competent authority or until the regular commanding officer returns.

2. In the event of the incapacity, death, relief from duty, or absence of the officers detailed to command a submarine, the line officer regularly attached to and on board the submarine who is next in rank and qualified for command in submarines shall succeed him, until relieved by competent authority or until the regular commanding officer returns.

duty, or special duty, who are otherwise eligible as provided in these regulations, may succeed to command only on shore.

0863. Succession to Command by Officers of the Marine Corps.

An officer of the Marine Corps shall not succeed to command of any ship or naval shipyard, or of a naval station, except when the officer detailed to command the station is an officer of the Marine Corps.

0864. Succession to Command on Detachment of an Officer in Command Without Relief.

Should an officer in command be detached without relief, he shall be succeeded in command by that officer who, in accordance with these regulations, would succeed to command in case of the incapacity, death, or absence of the officer in command.

0865. Succession to Command by Line Officers Designated for Limited Duty.

Officers of the line designated for limited duty may succeed to command of an activity in conformity with the following:

a. In ships, officers of the line of the Navy designated for limited duty, who are authorized to perform all deck duties afloat, may succeed to command.

b. Within other commands of the naval service, any limited duty officer with a designation appropriate to the function of the activity may succeed to command.

0866. Succession to Command by Chief Warrant Officers and Warrant Officers.

Chief warrant officers and warrant officers may succeed to command of an activity in conformity with the following:

a. In ships, chief warrant and warrant officers who are authorized to perform all deck duties afloat may succeed to command.

b. Within other commands of the naval service, any chief warrant or warrant officer with a designation appropriate to the function of the activity may succeed to command.

0867. Relief of a Commanding Officer by a Subordinate.

1. It is conceivable that most unusual and extraordinary circumstances may arise in which the relief from duty of a commanding officer by a subordinate becomes necessary, either by placing him under arrest or on the sick list; but such action shall never be taken without the approval of the Commandant of the Marine Corps or the Chief of Naval Personnel as appropriate, or the senior officer present, except when reference to such

higher authority is unduly impracticable because of the delay involved or for other clearly obvious reasons. In any event, a complete report of the matter shall be made to the Commandant of the Marine Corps or the Chief of Naval Personnel as appropriate, and the senior officer present, setting forth all facts in the case and the reasons for the action or recommendation, with particular regard to the degree of urgency involved.

2. In order that a subordinate officer, acting upon his own initiative, may be vindicated for relieving a commanding officer from duty, the situation must be obvious and clear, and must admit of the simple conclusion that the retention of command by such commanding officer will seriously and irreversibly prejudice the public interest. The subordinate officer must be next in succession to command; he must be able to refer the matter to a senior officer for one of the reasons set forth in the preceding paragraph; must be certain that the prejudicial actions of his commanding officer are not caused by instructions unknown to the subordinate officer; must have given the matter such careful consideration, and must have made such exhaustive investigation of all the circumstances as may be practicable; and finally, must be thoroughly convinced that the conclusion to relieve his commanding officer is one which a reasonable, prudent, and experienced officer would regard as a necessary consequence from the facts thus determined to exist.

3. Intelligent, fearless initiative is an important trait of military character, and it is not to be fostered by regulations which discourage the exercise of this trait. However, as the action of relieving a senior officer from command involves most serious possibilities, a decision to do so, or to so recommend should be based upon facts established by substantial evidence, and upon the official views of others in a position to form valid opinions, particularly of a technical character. An officer relieving his commanding officer or recommending such action, together with all others who so counsel, must bear the legitimate responsibility for, and must be prepared to justify, such action.

CHAPTER 9  
THE SENIOR OFFICER PRESENT

0901. The Senior Officer Present.

Unless some other officer has been so designated by competent authority, the senior officer present<sup>1</sup> is the senior line officer of the Navy, active duty, eligible for command at sea, who is present on board of any part of the Department of the Navy in the locality or within an area prescribed by competent authority, except where personnel of both the Navy and the Marine Corps are present on shore and the officer of the Marine Corps who is in command is senior to the senior line officer of the Navy. In such cases, the officer of the Marine Corps shall be the senior officer present on shore.

0902. Eligibility for Command at Sea.

The term "eligible for command at sea" shall be construed to apply to all line officers of the line of the Navy, including Naval Reserve, on active duty, except those who are not recommended for the performance of engineering, communications, or other special duties, and except those limited duty officers who are not authorized to perform all deck duties afloat.

0903. Authority and Responsibility.

At all times and places not excluded in these regulations, or in orders from competent authority, the senior officer present shall assume command and direct the movements and efforts of all persons in the Department of the Navy present, when, in his judgment, the exercise of authority for the purpose of cooperation or otherwise is necessary. He shall exercise his authority in a manner consistent with the full operational command vested in the commanders of unified or specified commands.

0904. Authority of Senior Officer of the Marine Corps Present.

The authority and responsibility of the senior officer present are also conferred upon the senior commanding officer of the Marine Corps present with respect to those units of the Marine Corps, including Navy personnel attached, which are in the locality and not under the authority of the senior officer present.

0905. Commands Diverted by the Senior Officer Present.

The senior officer present shall not divert a command from an operation or duty assigned by another authority unless the public interest demands. When orders are issued by the senior officer present which conflict with an operational duty assigned to him by another authority, the senior officer present shall disclose his orders to the senior officer present, to the extent permitted by the instructions contained therein,

in order that the senior officer present may give them due consideration. The senior officer present shall inform a common senior promptly when he has diverted any command from a previously assigned operation or duty and shall release such command when its assistance is no longer required.

0906. Authority Within Commands.

In the exercise of his authority, the senior officer present normally shall not concern himself with the administrative matters within commands other than his own, except to the extent necessary to secure such uniformity and coordination of effort as may be required.

0907. Distinctions Afloat.

The responsibilities, authorities, and distinctions of commanders, officers in command, and others of the shore establishment are as stated by superiors or other competent authorities, and are not necessarily dependent upon relative seniority among the individuals concerned.

0908. To Make Known His Identity as Senior Officer Present.

When doubt may exist or when circumstances require, the senior officer present shall inform all commanding officers concerned in the locality or prescribed geographical area that he is the senior officer present.

0909. Reports and Calls by Juniors.

All commanding officers shall keep themselves informed of the identity of the senior officer present. The senior commander of each unit present shall inform the senior officer present of the orders under which he is acting to the extent permitted therein and of the condition of his command. When circumstances permit, he shall call upon the senior officer present.

0910. Concord of Action With Other Armed Forces.

When in the vicinity of other armed forces of the United States or of an ally of the United States, the senior officer present shall maintain, to the extent possible, the concord of action with the commander of those forces. He shall cooperate with the commander of such forces in the preparation and execution of plans for such joint action as may be necessary.

0911. Relations With Diplomatic and Consular Representatives.

The senior officer present, insofar as possible, shall preserve close relations with the diplomatic and consular representatives of the United States. He shall consider recommendations, requests or other communications from such representatives. While due weight should be given to the opinions and advice of such representatives, the senior officer present is solely and entirely responsible for his official acts.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

0912. Communications With Foreign Officials.

1. As a general rule, when in foreign countries, the senior officer present shall communicate with foreign civil, diplomatic, or consular officials through the local United States diplomatic or consular representatives.

2. . . .

2. In the absence of a diplomatic or consular representative of the United States, the senior officer present in a foreign country has authority to:

- Communicate or communicate with foreign civil authorities as may be necessary.
- Urge upon citizens of the United States the necessity of abstaining from participation in political controversies or violations of the laws of neutrality.

0913. Coordination Procedures Established by a Unified or Specified Command.

In areas where the commander of a unified or specified command has established procedures for coordination of military matters affecting United States and host country relationships, the senior officer present shall adhere to such procedures.

0914. Violations of International Law and Treaties.

On occasions when injury to the United States or to citizens thereof is committed or threatened in violation of the principles of international law or in violation of rights existing under a treaty or other international agreement, the senior officer present shall consult with the diplomatic or consular representatives of the United States, if possible, and he shall take such action as is demanded by the gravity of the situation. In time of peace, action involving the use of force may be taken only in consonance with the provisions of the succeeding article of these regulations. The responsibility for any application of force rests wholly upon the senior officer present. He shall report immediately all the facts to the Secretary of the Navy.

0915. Use of Force Against Another State.

1. The use of force in time of peace by United States naval personnel against another nation or against anyone within the territories thereof is illegal except as an act of self-defense. The right of self-defense may arise in order to counter either the use of force or an immediate threat of the use of force.

2. The conditions calling for the application of the right of self-defense cannot be precisely defined beforehand, but must be left to the sound judgment of responsible naval personnel who are to perform their duties in

this respect with all possible care and foresight. The right of self-defense must be exercised only as a last resort, and then only to the extent which is absolutely necessary to accomplish the end required.

3. Force must never be used with a view to inflicting punishment for acts already committed.

0916. Territorial Integrity of Foreign Nations.

The senior officer present shall respect the territorial integrity of foreign nations. Unless permission has been obtained from foreign authorities:

- No armed force for exercise, target practice, funeral escort, or other purposes shall be landed.
- No persons shall be allowed to visit the shore, except as necessary to conduct official business.

c. No men shall be landed to capture deserters.

d. No target practice with guns, torpedoes, rockets, guided missiles, or other weapons shall be conducted within foreign territorial waters or at any point from which projectiles, torpedoes, or missiles may enter therein.

0917. Dealings With Foreigners.

The senior officer present shall uphold the prestige of the United States. He shall impress upon officers and men that, when in foreign ports, it is their duty to avoid all possible cause of offense to the authorities and inhabitants; that due deference must be shown by them to local laws, customs, ceremonies, and regulations; that moderation and courtesy should be displayed in all dealings with foreigners; and that a feeling of good will and mutual respect should be cultivated.

0918. Readiness and Safety of Forces.

1. The senior officer present shall prescribe the conditions of readiness of all the forces present and under his authority.

2. To the extent which the situation demands, the senior officer present shall be prepared for action and shall guard against surprise attack. With the means at his disposal, he shall put into effect such measures as are necessary to minimize the possibility of the undetected approach of hostile air, surface, or subsurface forces.

3. The senior officer present is responsible for the safety of the units in company and, at sea, shall direct the course to be

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

## 0936. File of the Senior Officer Present Afloat.

1. While in port, the senior officer present afloat shall require that a file of all orders issued by him or other competent authority which are applicable to the naval force present be maintained. This file shall be transmittable to the succeeding senior officer present afloat.

2. Whenever circumstances warrant and for any continuity purposes, the senior officer present afloat may detail a subordinate officer to carry out routine administrative duties and to maintain a SPA (Administration) file. In event a subordinate officer is not available or it is not appropriate for such detailing, the senior officer present afloat may arrange for the detail of an officer for the task.

## 0937. Medical, Dental, Communication, and Other Guard.

When two or more ships are in the vicinity of each other while liberty is being granted, the senior officer present afloat shall designate the daily order in which each ship having a medical officer shall take the medical guard unless facilities or services are available ashore or other adequate provision has been made. Medical communications shall be made with respect to the establishment of a medical guard, communication guard, shore patrol, or any other guard as may be necessary in support of his responsibility.

## 0938. Responsibilities of Subordinates.

The regulations contained in this chapter shall not be construed to relieve commanders junior to the senior officer present, or the senior officer present afloat from their individual responsibilities in relation to their commands.

## 0939. Boarding Calls.

1. When he considers it appropriate, the senior officer present shall send an officer to board and report on ships and craft displaying United States colors found in or arriving at foreign ports.

2. The following information normally shall be obtained by boarding officers:

- Name, nationality, owner, and type of craft.
- Number and names of persons in crew.
- Tonnage and cargo.
- Place from and time out of port.
- Probable date of departure and destination.
- Unusual events during passage, general route taken, and weather conditions encountered.

## NOTICES

3. Under ordinary circumstances the boarding officer can offer assistance in United States postal matters and provide medical and technical advice.

## 0940. Granting of Asylum and Temporary Refuge.

1. If an official of the Department of the Navy is requested to provide asylum or temporary refuge, the following procedures shall apply:

a. On the high seas or in territories under exclusive United States jurisdiction (including territorial seas, territories and possessions):

(1) At his request, an applicant for asylum will be received on board any naval aircraft or waterborne craft or naval station.

(2) Under no circumstances shall the person seeking asylum be surrendered to foreign jurisdiction or control, unless at the direction of the Secretary of the Navy or higher authority. Persons seeking asylum should be afforded every reasonable care and protection permitted by the circumstances.

b. In territories under foreign jurisdiction (including territorial seas, territories, and possessions):

(1) Temporary refuge shall be granted for humanitarian reasons on board a naval aircraft or waterborne craft or naval station only in extreme and unusual circumstances wherein the life or safety of a person is in danger, such as pursuit by a mob. When temporary refuge is granted, such protection shall be terminated only when directed by the Secretary of the Navy or higher authority.

(2) While temporary refuge can be granted in the circumstances set forth above, permanent asylum will not be granted.

(3) Requests for asylum shall be referred to the U.S. Embassy, if any, in the foreign jurisdiction. Individuals requesting asylum shall be afforded temporary refuge only in the circumstances outlined in subparagraph (1).

c. The Chief of Naval Operations or Commandant of the Marine Corps, as appropriate, will be informed by the most expeditious means of all requests for asylum pursuant to a. and b. above as well as the attendant circumstances. The appropriate U.S. Embassy or consular post will be similarly informed of actions taken pursuant to subparagraph 1.b.(3) of this article. The Chief of Naval Operations or Commandant of the Marine Corps will cause the Secretary of the Navy and Department of State to be notified without delay.

2. Personnel of the Department of the Navy shall neither directly nor indirectly invite persons to seek asylum or temporary refuge.

## CHAPTER 10

## HONORS AND CEREMONIES

## 1001. Authority for Dispensing With Honors.

The honors and ceremonies prescribed in these regulations may be dispensed with when directed by the Secretary of the Navy, or when requested by an individual to whom such honors and ceremonies are due.

## 1002. Honors Restricted to Recognized Governments.

No salute shall be fired in honor of any nation or of any official of any nation not formally recognized by the Government of the United States; and, except as authorized by the Secretary of the Navy, no other honors or ceremonies shall be rendered in these regulations shall be rendered or exchanged with such nations or officials.

## 1003. International Honors Modified by Agreement.

Should the required number or frequency of international salutes, official visits, or other honors and ceremonies be deemed excessive, the senior officer present in the United States naval service may make, subject to the requirements of international courtesy, such modification as circumstances warrant and as may be agreed upon with the responsible officials or the senior officer present of the nation involved.

## 1004. Manner of Playing National Anthems.

1. The National Anthem of the United States, "The Star Spangled Banner," when played by a naval band shall be played in its entirety as written and as prescribed in the official U.S. Navy Band arrangement which is designated as the official Department of Defense arrangement.

2. The playing of the National Anthem of the United States, or of any other country, as a part of a medley is prohibited.

3. When a foreign national anthem is prescribed in connection with honors, and it is considered appropriate to perform the National Anthem of the United States therewith, the National Anthem of the United States will be performed last.

4. On other occasions when a foreign national anthem (or anthems) is performed, the National Anthem of the United States will be performed last, except when performed in conjunction with Morning Colors.

## 1005. Procedure During Playing of National Anthems.

1. Whenever the National Anthem is played, all naval service personnel not in formation shall stand at attention and face the national ensign

but in the event that the national ensign is not being displayed, they shall face the source of the music. When ordered they shall come to the salute and remain at attention until the music ceases. Persons in formation are brought to order arms or called to attention as appropriate. The formation commander shall face in the direction of the ensign or in the absence of the ensign shall face in the direction of the music and shall render the appropriate salute for his unit. Persons in formation participating in a ceremony shall, on command, follow the procedure prescribed for the ceremony. Persons in vehicles or in boats shall follow the procedure prescribed for such persons during colors; persons in civilian clothes shall comply with the rules and customs established for civilians.

2. The same marks of respect prescribed during the playing of the National Anthem shall be shown during the playing of a foreign national anthem.

## 1006. Morning and Evening Colors.

1. The ceremonial hoisting and lowering of the national ensign at 0800 and sunset at a naval command ashore or aboard a ship of the Navy not under way shall be known as Morning Colors and Evening Colors, respectively, and shall be carried out as prescribed in this article.

2. The guard of the day and the band shall be paraded in the vicinity of the point of hoist of the ensign.

3. "Attention" shall be sounded, followed by the playing of the National Anthem by the band.

4. At Morning Colors, the ensign shall be started up at the beginning of the music and hoisted smartly to the peak or truck. At Evening Colors, the ensign shall be started from the peak or truck at the beginning of the music and the lowering so regulated as to be completed at the last note.

5. At the completion of the music, "Carry On" shall be sounded.

6. In the absence of a band, or an appropriate recording to be played over a public address system, "To the Colors" shall be played by the bugle at Morning Colors, and "Retreat" at Evening Colors, and the salute shall be rendered as prescribed for the National Anthem.

7. In the absence of music, "Attention" and "Carry On" shall be the signals for rendering and terminating the salute. "Carry On" shall be sounded as soon as the ensign is completely lowered.

8. During colors, a boat under way within sight or hearing of the ceremony shall lie to, or shall proceed at the slowest safe speed. The boat officer, or in his absence the coxswain, shall stand and salute except when dangerous to do so. Other persons in the boat shall remain seated or standing and shall not salute.

## NOTICES

3. Juniors shall salute first. All salutes received when in uniform and covered shall be returned; at other times salutes received shall be appropriately acknowledged. Persons uncovered shall not salute, except when failure to do so would cause embarrassment or misunderstanding.
4. Civilians may be saluted by persons in uniform when appropriate, but the uniform hat or cap shall not be raised as a token of salutation.
5. A person in the naval service not in uniform shall, in rendering salutes or accompanying salutes, comply with the rules and customs established for a civilian, except that when saluting another person in the armed services, the hand salute shall be used.

#### 1010. Occasions for Rendering Hand Salutes.

1. Salutes shall be rendered by persons in the naval service to officers of the armed forces of the United States, the National Oceanic and Atmospheric Administration, the Public Health Service and foreign armed services.
2. All persons in the naval service shall salute all officers senior to themselves on each occasion of meeting or passing near or when addressing or being addressed by such officers, except that:
  - a. On board ship salutes shall be dispensed with after the first daily meeting, except for those rendered to the commanding officer and officers senior to him, to visiting officers, to officers making inspections, and to officers when addressing or being addressed by them.
  - b. When such procedure does not conflict with the spirit of these regulations, at crowded gatherings or in congested areas, salutes shall be rendered only when addressing or being addressed by an officer who is senior to them.
  - c. Persons at work or engaged in games shall salute only when addressed by an officer senior to them and then only if circumstances warrant.
  - d. Persons in formation shall salute only on command.
  - e. When boats pass each other with embarked officers or officials in view, hand salutes shall be rendered by the senior officer and command in each boat. Officers seated in boats shall not rise when saluting; conversely shall rise unless dangerous or impracticable to do so.
  - f. Persons operating moving motor vehicles should not render or return salutes. Passengers will render and return salutes.
  - g. Persons guarding prisoners will not salute.

9. During colors, vehicles within sight or hearing of the ceremony shall be stopped. Persons riding in such vehicles shall remain seated at attention.

10. After Morning Colors, if foreign warships are present, the national ensign of each nation shall be hoisted, and the national ensign of the United States shall be lowered, or exchanged with, the senior official of each such nation; provided that, when in a foreign port, the national anthem of the port shall be played immediately after Morning Colors, followed by the national anthems of other foreign nations represented.

#### 1007. Salutes to the National Ensign.

1. Each person in the naval service, upon coming on board a ship of the Navy, shall salute the national ensign if it is flying; he shall stop on reaching the upper platform of the accommodation ladder, or the shipboard end of the bow, face the national ensign, and render the salute, after which he shall salute the officers of the deck. On leaving the ship, he shall render the salute in reverse order. The officer of the deck shall return both salutes in each case.
2. When passed by or passing the national ensign being carried, uncased, in a military formation, all persons in the naval service shall salute. Persons in vehicles or boats shall follow the procedure prescribed for such persons during colors.
3. The salutes prescribed in this article shall also be rendered to foreign national ensigns and aboard foreign war-of-war.

#### 1008. "Hail to the Chief."

1. The traditional musical selection "Hail to the Chief" is designated as a musical tribute to the President of the United States, and as such shall not be rendered by naval bands as a tribute to other dignitaries. The same honor as accorded during renditions of the National Anthem or "To the Colors" will be given to "Hail to the Chief" by naval personnel.
2. When performed by naval bands, renditions of "Hail to the Chief" shall be as prescribed in the official U. S. Marine Corps Band arrangement which is designated as the official Department of Defense arrangement.

#### 1009. Exchange of Hand Salutes.

1. The hand salute is the long-established form of greeting and recognition exchanged between persons in the armed services. All persons in the naval service shall be alert to render or return the salute as prescribed in these regulations.
2. The salute by persons in the naval service shall be rendered and returned with the right hand, when practicable; except that, with arms in hand, the salute appropriate thereto shall be rendered or returned.

#### 1011. Other Rules of Respect.

1. Juniors shall show deference to seniors at all times by recognizing their presence and by employing a courteous and respectful bearing and mode of speech toward them.
2. Juniors shall stand at attention, unless seated at mess, or unless circumstances make such action impracticable or inappropriate:
  - a. When addressed by an officer senior to them.
  - b. When an officer of flag or general rank, the commanding officer, or an officer senior to him in the chain of command, or an officer making an official inspection enters the room, compartment, or deck space where they may be.
3. Juniors shall walk or ride on the left of seniors when they are accompanying.
4. Officers shall enter boats, aircraft and automobiles in inverse order of rank and shall leave them in order of rank, unless there is special reason to the contrary. The seniors shall be accorded the more desirable seats.
5. Subject to the requirements of the rules for preventing collisions, junior boats shall avoid crowding or embarrassing senior boats.

#### 1012. Saluting Ships and Stations.

Saluting ships and stations of the naval service are those designated as such by the Secretary of the Navy or his duly authorized representative. The gun salutes prescribed in these regulations shall be fired by such ships and stations. Other ships and stations shall not fire gun salutes, unless directed to do so by the senior officer present on exceptional occasions when courtesy requires.

#### 1013. Gun Salutes to the Flag of the President or the Secretary of State.

1. A 21-gun salute shall be fired to the flag of the President:
  - a. By each ship falling in with a ship displaying such flag, arriving at a place where such flag is displayed ashore, or present when such flag is broken.
  - b. By a naval station when a ship displaying such flag arrives at the naval station, or when such flag is broken by a ship present.
  - c. By a flag or general officer assuming command or, while in command, breaking the flag of an increased grade, in the presence of a ship or naval station displaying the flag of the President.
2. Under the circumstances prescribed by this article, a 19-gun salute shall

be fired to the flag of the Secretary of State when he is acting as special foreign representative of the President.

#### 1014. Gun Salutes to the Flag of the Secretary of Defense, Deputy Secretary of Defense, the Secretary of the Navy, Director of the Office of Naval Research and the Assistant Secretary of Defense, the General Counsel, the Under Secretary or an Assistant Secretary of the Navy.

A 19-gun salute shall be fired to the flag of the Secretary of Defense, Deputy Secretary of Defense, Director of Defense Research and Engineering, or the Secretary of the Navy, and a 17-gun salute shall be fired to the flag of an Assistant Secretary of Defense, the General Counsel, the Under Secretary of the Navy or an Assistant Secretary of the Navy:

- a. By a ship falling in with a ship displaying such flag, arriving at a place where such flag is displayed ashore, or present when such flag is broken. In case of two or more ships in company, only the senior shall salute.
- b. By a naval station when a ship displaying such flag arrives at the naval station, or when such flag is broken by a ship present.
- c. By a flag or general officer assuming command, or breaking the flag of an increased grade in the presence of a ship or naval station displaying the flag of such official; provided that such officer is the senior officer present or the senior officer present on shore.
2. When the flags of two or more such officials are displayed under the circumstances prescribed in this article, only the flag of the senior shall be saluted.
1015. Gun Salutes to a Foreign Nation.
  1. When a ship enters a port of a foreign nation, the government of which is formally recognized by the Government of the United States, she shall fire a salute of 21 guns to that nation unless:
    - a. There is present no saluting battery or warships of that nation capable of returning the salute.
    - b. The ship is returning from a temporary absence from port, when, by agreement with local authorities, the salute may be dispensed with.
  2. When a ship is passing through the territorial waters of a foreign nation with no intention of anchoring therein, the salute to the nation need not be fired unless unusual circumstances make it desirable to do so.
  3. In case of two or more ships arriving in port or passing through territorial waters of a foreign nation in company, only the senior shall fire the salute prescribed in this article.
  4. The salute to the nation, if fired, shall precede any salutes fired in honor of individuals.

## NOTICES

1020. Can Salutes to the Senior Officer Present.

1. A flag officer who is the senior officer present shall be saluted by the senior of one or more ships arriving in port.
2. When a flag officer embarked in a ship of his command arrives in port and is the senior officer present, or when a flag officer assumes command and becomes the senior officer present, he shall be saluted by the former senior officer present.
3. A gun salute shall be fired by his flagship when a flag officer who is the senior officer present assumes or is relieved of command, or is advanced in grade.
4. When a flag officer who is not the senior officer present assumes command, he shall fire a salute to the senior officer present.
5. The provisions of this article shall be subject to the provisions of article 1026-4 and shall apply, where appropriate, to officers of the naval service in command ashore.

1021. Gun Salutes to Foreign Flag Officers.

1. When a ship enters a port where there is present no officer of the naval service senior to the senior arriving officer, and finds displayed there, aloft or ashore, the flags of foreign flag officers of one or more nations, salutes shall be exchanged with the senior flag officer present of each nation.
2. The senior officer present of the United States Navy in a port shall exchange gun salutes with the senior foreign flag officer displaying his flag in an arriving warship, provided such flag officer is the senior officer present of his nation.
3. Upon departure from port of the senior officer present of the United States Navy, his successor shall exchange gun salutes with the senior flag officer present of each foreign nation.
4. The senior officer present of the United States Navy shall exchange gun salutes with the senior officer present of a foreign nation when either hoists the flag of an increased grade.
5. In firing the salutes prescribed by this article, the following rules shall govern:
  - a. An officer of a junior grade shall fire the first salute.
  - b. When officers are of the same grade, the arriving officer shall fire the first salute.
  - c. Seniors shall be saluted in order of rank except that when firing salutes to two or more foreign officers of the same grade, the first salute

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

2012 Returning Salute to the Nation Fired by Forelan Warship.

A salute to the nation fired by a foreign warship entering a port of the United States shall be returned by the senior ship present, battery of an armed service of the United States, provided no saluting such salutes, is present in the area.

1017. **Our Salutes to the Flag of a Foreign President, Sovereign, or Member of a Reigning Royal Family.**

- [illegible]

1018. Gun Salutes When Several Heads of State are Present.

1. Each ship upon entering a port where the personal flags or standards of several presidents, sovereigns, or members of reigning royal families are displayed, shall fire a 21-gun salute to each of the several flags or standards displayed, in the following order:
  - a. The president, sovereign, or member of the reigning royal family of the nation to which the port belongs.
  - b. The President of the United States.
  - c. The presidents or sovereigns of other nations, in alphabetical order of the names of the nations in the English language.
  - d. Members of reigning royal families of other nations, in the same order as in subparagraph c. above.
2. In the circumstances set forth in this article, only the flag or standard of the senior dignitary of each nation shall be saluted.

1019. Authority to Fire Gun Salutes to Officers in the United States Naval Service.

Gun salutes prescribed in these regulations for officers and officials entitled to 17 or more guns shall be fired on the occasion of each official visit of the individual concerned. Gun salutes prescribed in these regulations for officers and officials entitled to 15 guns or less shall not be fired unless so ordered by the senior officer present or higher authority.

fired to an officer in that grade shall be to the flag officer of the nationality of the port.

6. When a ship of the Navy falls in at sea with a foreign warship displaying the flag of a flag officer, an exchange of salutes shall be fired: the junior saluting first. Such salutes shall be exchanged only between the senior United States ship and the senior foreign ship. Should flag officers be of the same grade and their relative rank be unknown or in doubt, they should mutually salute without delay.

7. The provisions of this article shall be subject to the provisions of article 1026.4.

1022. Notification of Gun Salute.

Whenever practicable, an official or officer to be saluted shall be notified of the salute and the time that it is to be fired.

1023. Procedure During a Gun Salute.

1. The interval between guns in salutes normally shall be five seconds.
2. During the gun salute, persons on the quarter-deck, or in the ceremonial party, if ashore, shall render the hand salute; observers on deck, or in the vicinity of the ceremonial party if ashore, shall stand at attention facing the personage, or if he is not in view, toward the ceremonial party, and if in uniform, shall salute.
3. Officers being saluted shall render the hand salute during the firing of the gun salute.
4. The boat or vehicle in which a person being saluted is embarked shall be stopped, if practicable to do so, during the firing of the gun salute.

1024. Inability to Render or Return a Gun Salute.

1. A gun salute shall not be fired when a return salute is required and cannot be fired, but shall be considered as having been rendered and returned.
  2. In cases where, from any special cause, a ship, from which a salute is due, is unable to return a salute, the circumstances are to be explained immediately to the Representative of each foreign power.
  3. In cases where, from any special circumstance, the failure to salute cannot be explained without giving offense to a foreign power or official, salutes shall be fired by any ship which can do so with safety.
1025. Returning Gun Salutes.

1025. Returning Gun Salutes.

1. The following rules shall be observed by United States ships and stations:

## NOTICES

a. A salute fired to the nation by a foreign ship arriving in port shall be returned gun for gun.

b. A salute fired to a flag or general officer by a foreign ship or station shall be returned gun for gun.

C. A salute fired in honor of the President of the United States, or of the Secretary of State when acting as special representative of the President, shall not be returned.

d. A salute fired in honor of any official or officer on the occasion of an official visit or inspection shall not be returned.

e. A salute fired by his flagship or headquarters in honor of a flag at general officer shall not be returned.

f. A salute fired in honor of an anniversary, celebration, or solemnity shall not be returned.

g. Subject to the provisions of this article, a salute fired in honor of a United States officer or official shall be returned with the number of guns specified for the grade of the flag or general officer rendering the salute, or, if not a flag or general officer, with seven guns.

2. No return salute may be expected in the case of a salute fired by a United States ship or station in honor of a foreign sovereign, head of state, member of a reigning royal family, or special representative of a head of state, or on the occasion of a foreign anniversary, celebration, or solemnity, or on the occasion of an official visit; otherwise a salute may be expected in honor of a foreign nation, or of a foreign official or officer, and may be expected to be returned gun for gun.

1026. Restrictions on Gun Salutes.

1. In the presence of the President of the United States, or the President, sovereign, or a member of the reigning royal family of a foreign nation, no gun salute which may be prescribed elsewhere in these regulations shall be fired on any other official of lesser rank of that nation.
2. When two or more officials or officers, each entitled to a gun salute, attend an official visit in company to a ship or station, only the senior shall be saluted. If they arrive or depart at different times, each shall be rendered the gun salute to which he is entitled.
3. Salutes shall not be fired in ports or locations where they are forbidden by local regulations.
4. No official or officer, United States or foreign, except those entitled to 17 or more guns, shall be saluted by the same ship or station more than once in twelve months unless, and subject to the other provisions of these regulations, such official or officer has been advanced in grade, makes an official visit or inspection, or is on special duty in which irregular

## 1028. Passing Honors Between Ships.

1. Passing honors, consisting of sounding "Attention" and rendering the hand salute by all persons in view on deck and not in ranks, shall be exchanged between ships of the Navy and between ships of the Navy and the Coast Guard, passing close aboard.

2. In addition, the honors prescribed in the following table shall be rendered by a ship of the Navy passing close aboard a ship or naval station displaying the flag of the officials indicated therein and by naval stations, insofar as practicable, when a ship displaying such flag passes close aboard. These honors shall be acknowledged by rendering the same honors in return.

Official	Uniform	Salute	Honors
President	As prescribed by senior officer present.	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of State when special foreign representative is present	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of Defense, Deputy Secretary of Defense, or Director of Defense Research and Engineering	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of the Navy, Under Secretary of the Navy, or Assistant Secretary of the Navy	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.

courtesy is involved or exceptional circumstances exist; in which latter case the commanding officer, in the absence of instructions, shall exercise his discretion.

5. No officer, except a flag or general officer, shall be saluted with guns except in return for a gun salute rendered by him.

6. No officer of the armed services, while in civilian clothes, shall be saluted with guns, unless such officer is at the time acting in an official civil capacity.

7. No salute shall be fired between sunset and sunrise, before 0800, or on Sunday except when international courtesy so dictates, or when related to death ceremonies. Subject to the provisions of this paragraph, a gun salute in honor of an official or official representative shall be fired at 0800; provided, that if the day is Sunday the salute shall be fired on Monday; provided, that if the day is Sunday the salute shall not be fired if the official or officer has departed meanwhile. In case of a gun salute at 0800, the first gun of the salute shall be fired immediately upon the completion of Morning Colors or the last note of the last national anthem.

## 1027. "Passing Honors" and "Close Aboard" Defined.

"Passing honors" are those honors, other than gun salutes, rendered on occasions when ships or embarked officials or officials representative of ships pass close aboard. "Close aboard" shall mean passing within six hundred yards for ships and four hundred yards for ships. These rules shall be interpreted liberally, to insure that appropriate honors are rendered.

## 1029. Passing Honors to Officials and Officers Embarked in Boats.

1. The honors prescribed in this table shall be rendered by a ship of the Navy being passed close aboard by a boat displaying the flag or pennant of the following officials and officers.

Official	Uniform	Salute	Honors
President	As prescribed by senior officer present.	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of State when special foreign representative is present	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of Defense, Deputy Secretary of Defense, or Director of Defense Research and Engineering	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.
Secretary of the Navy, Under Secretary of the Navy, or Assistant Secretary of the Navy	As the day	National Anthem	Full salute, unless otherwise directed by senior officer present.

2. Persons on the quarter-deck shall salute when a boat passes close aboard in which a flag officer, a unit commander or a commanding officer is embarked under the following circumstances:

- When the officer in the boat is in uniform as indicated by the display of the national ensign in United States ports; or
- When a miniature of a flag or pennant is displayed in addition to the national ensign in foreign ports.

## 1030. Passing Honors to Foreign Dignitaries and Marshals.

1. The honors prescribed for the President of the United States shall be rendered by a ship of the Navy being passed close aboard by a ship or boat displaying the flag or standard of a foreign president, sovereign, or member of a reigning royal family, except that the foreign national anthem shall be played in lieu of the National Anthem of the United States.

2. Passing honors shall be exchanged with foreign warships passed close aboard and shall consist of parading the guard of the day, sounding "Attention," rendering the salute by all persons in view on deck, and playing the foreign national anthem.

## 1031. Sequence in Rendering Passing Honors.

1. "Attention" shall be sounded by the junior when the bow of one ship passes the bow or stern of the other, or, if a senior be embarked in a boat, before the boat is abreast, or nearest to abreast, the quarter-deck.

2. The guard, if required, shall present arms, and all persons in view on deck shall salute.

3. The music, if required, shall sound off.

4. "Carry on" shall be sounded when the prescribed honors have been rendered and acknowledged.

## 1032. Dispensing With Passing Honors.

1. Passing honors shall not be rendered after sunset or before 0800 except when international courtesy requires.

2. Passing honors shall not be exchanged between ships of the Navy engaged in tactical evolutions outside port.

3. The senior officer present may direct that passing honors be dispensed with in whole or in part.

4. Passing honors shall not be rendered by not be required of ships with small bridge areas, such as submarines, particularly when in restricted waters.

## 1033. Crew at Quarters on Entering or Leaving Port.

The crew shall be paraded at quarters during daylight on entering or leaving port on occasions of ceremony except when weather or other circumstances make it impracticable or undesirable to do so. Ordinarily, occasions of ceremony shall be construed as visits that are not operational; at homeport when departing for or returning from temporary deployment and visits to foreign ports not visited regularly by the ship; and when so accompanied by a superior in line of command, the entire crew at quarters, an honor guard may be paraded in a conspicuous place on weather decks.

## 1034. Definitions.

- The term "official visit" shall be construed to mean a formal visit of courtesy requiring special honors and ceremonies.
- The term "call" shall be construed to mean an informal visit of courtesy requiring no special ceremonies.

## NOTICES

## FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

1038. Table of Precedence of Diplomatic and Consular Representatives.

A diplomatic representative in a country to which accredited, and a consular representative in a district to which assigned, takes precedence as follows:

Official	Taken precedence
Chief of a United States diplomatic mission, including a Charge d' Affaires.	Over any officer of the armed services of the United States, except the Secretary of State, whose official status is less than 21 With, but before, commanders or brigadier general.
Career Minister	
Commodore	
First Secretary, when no Ambassador is assigned	With, but after, commanders or brigadier general
Colonel General, or Vice Colonel of the General Staff	
Colonel General, or Commander in Chief of the General Staff	
Colonel or Vice Colonel when in charge of a Consulate	With, but after, captains in the Navy.
Colonel	
Vice Colonel	
Third Secretary	With, but after, lieutenant in the Navy.
Consul General	

An acting chief of a United States diplomatic mission when holding the title of Chargé d'Affaires takes precedence as specified in this table but shall be accorded the honors specified for a Chargé d'Affaires on the occasion of an official visit.

2. Officers of the naval service shall make the first visit to the chief of a diplomatic mission or above the rank of *charge d'affaires*.

3. In the exchange of visits with consular representatives, officers in the naval service shall make or receive the first official visit in accordance with their relative precedence with the consular representatives concerned, as set forth in the precedence table of this chapter.

#### 1043. Official Visits With Governors of United States Territories, Commonwealths, and Possessions.

1. At the seat of government of a United States territory, commonwealth or possession having a governor general or governor commissioned as such by the President, the senior officer present shall make an official visit to the governor at his arrival or assuming command, make an official visit to the governor general or governor, or in his absence to the acting governor general or governor.

2. When the senior officer permanently established in command ashore in such territory, commonwealth or possession is not the senior officer present, he shall also make an official visit to the governor general or governor as soon as practicable after assuming command.

3. Similar visits shall be made whenever a governor general or governor assumes office.

4. A flag or general officer may expect such visits to be returned in person by the official to whom it was made. Other officers may expect such visits to be returned by a suitable representative.

5. The provisions of this article shall apply in the case of an officer of the naval service commissioned as governor general or governor by the President, regardless of his naval or military rank.

6. Modification of the provisions of this article may be effected upon agreement with the governor general or governor.

#### 1044. Official Visits With Foreign Officials and Officers.

1. The senior officer present shall make official visits to foreign officials and officers as custom and courtesy demand.

2. When in doubt as to what foreign officials and officers are to be visited, saluted, or exchanged, or as to the rank of any official or officer, or whether a gun salute involving a return will be returned, the senior officer present shall send an officer to obtain the required information.

3. When exchanging official visits with a foreign officer who occupies a position comparable to the Chairman, Joint Chiefs of Staff, Chief of Staff, U. S. Army, Chief of Naval Operations, Chief of Staff, U. S. Air Force, or Commandant of the Marine Corps, the rank of the foreign officer shall be considered equivalent to those United States officers and the first official visit shall be made accordingly.

## NOTICES

#### 1039. Official Visits to the President and to Civil Officials of Department of Defense.

When the President, the Secretary of Defense, Deputy Secretary of Defense, the Secretary of the Navy, Director of Defense Research and Engineering, an Assistant Secretary of Defense, the Under Secretary of the Navy, or an Assistant Secretary of the Navy, away from the seat of government, arrives in the vicinity of a naval command, the senior officer present shall, if practicable and appropriate, pay him an official visit. Such visit ordinarily is not returned.

#### 1040. Official Visits and Calls Among Officers of the Naval Service.

1. An officer assuming command shall, at the first opportunity thereafter, make an official visit to the senior to whom he is entitled for duty in command, and to any successor of that senior officer, except that for shore commands a call shall be made in lieu of such official visit.

2. Unless dispensed with by the senior, calls shall be made:

a. By the commander of an arriving unit upon his immediate superior in the chain of command if present; and, when circumstances permit, upon the senior officer present.

b. By an officer in command upon an immediate superior in the chain of command on the arrival of the latter.

c. By an officer who has been the senior officer present, upon his successor.

d. By the commander of a unit arriving at a naval base or station upon the commander of such base or station except that when the former is senior, the latter shall make the call.

e. By an officer reporting for duty, upon his commanding officer.

3. When arrivals occur after 1600, or on Sunday, or on a holiday, the required calls may be postponed until the next working day.

#### 1041. Official Visits or Calls Between Officers of the Naval Service and Other Armed Services.

When in the vicinity of a command of another armed service of the United States, the senior officer present in the naval service shall arrange with the commander concerned for the exchange of official visits, or calls, as appropriate.

#### 1042. Official Visits With United States Diplomatic and Consular Representatives.

1. Upon arrival in a foreign port where United States diplomatic or consular representatives accredited to that foreign government are present, the senior officer present shall, if time and circumstances permit, exchange official visits with both the senior diplomatic representative, and the senior consular representative present. When practicable, prior notice of his arrival in port, and the probable duration of stay, shall be given to such representative. A suitable host shall be furnished them for making official visits.

4. The following rules in which the maritime powers generally have concurred shall be observed by officers of the naval service, and their observance by foreign officers may be expected:

a. The senior officer present shall, upon the arrival of foreign warships, send an officer to call upon the officer in command of the arriving ships to offer customary courtesies and exchange information as appropriate; except that in a foreign port such calls shall be made only if the officer in command of the arriving ships is the senior officer present afloat of his nation. This call will be returned at once.

b. Within twenty-four hours after arrival, the senior officer in command of arriving ships shall, if he is the senior officer present of his nation, make an official visit to the senior officer present of each foreign nation who holds a grade equal or superior to his; and the senior officer present of each foreign nation who holds a grade junior to his will make an official visit to him within the same time limit.

c. After the interchange of visits between the senior officers specified above, other flag officers in command and the commanding officers of ships arriving shall exchange official visits. When appropriate, with the flag and commanding officers of ships present. An arriving officer shall make the first visits to officers present who hold grades equal or superior to his, and shall receive the first visits from others.

d. It is customary for calls to be exchanged by committees of warroom officers of the ships of different nations present, in the order in which their respective commanding officers have exchanged visits.

e. Should another officer become the senior officer present of a nation, he shall exchange official visits with foreign senior officers present as prescribed in this article.

#### 1045. Uniform for Official Visits.

Unless otherwise prescribed by the senior concerned:

a. A junior making an official visit shall wear the uniform prescribed in the tables of this chapter opposite the grade of the senior to whom the visit is made.

b. A senior returning an official visit shall wear the uniform corresponding to that which the junior has worn.

c. An officer receiving an official visit, and all participants in the reception, including the crew if paraded, shall wear the uniform prescribed in the tables of this chapter opposite the grade of the official or officer from whom the visit is received.

d. Boat crews shall wear the uniform corresponding to that worn by the senior officer embarked.

## NOTICES

#### 1046. Honors on Departure for, or Return From, an Official Visit.

An officer leaving or returning to his flagship or command upon the occasion of an official visit shall be rendered the honors prescribed for an official visit except that, aboard his flagship, the uniform of the day normally shall be worn and gun salutes shall not be fired.

#### 1047. Procedure for Official Visits.

1. The honors prescribed for an official visit shall be rendered on arrival as follows:

a. When the rail is manned, men shall be uniformly spaced at the rail on each weather deck, facing outboard.

b. "Attention" shall be sounded as the visitor's boat or vehicle approaches the ship.

c. If a gun salute is prescribed on arrival, it shall be fired as the visitor approaches and is still clear of the side. The prescribed flag or pennant shall be broken on the visited ship on the first gun and hauled down on the last gun except where prescribed in the table of honors for the duration of the visit. Other ships firing a concurrent salute shall fire the last gun when the flag is hauled down. The honor of the visitor, if the ship being visited is permitted to display a flag, shall be displayed in the saluting position prior to the arrival on board, the salute shall be rendered, provided local regulations do not forbid gun salutes, after the official has arrived on board and the commanding officer has assumed himself that the official and his party are moved to a position in the ship that is well clear of the saluting battery.

d. The boat or vehicle shall be piped as it comes alongside.

e. The visitor shall be piped over the side, and all persons on the quarterdeck shall stand at attention until the visitor has been received. The termination of the visit shall be indicated by the sounding of the bugle, and a flag or pennant is to be displayed during the visit, it shall be broken at the start of the pipe.

f. The piping of the side, the ruffles and flourishes, and the music shall be rendered in the order named. In the absence of a band, "To the Colors" shall be sounded by bugle in lieu of the National Anthem, when required.

g. The visitor, if entitled to 11 guns or more, shall be invited to inspect the guard upon completion of such honors as may be rendered.

2. The honors prescribed for an official visit shall be rendered on departure as follows:

a. The rail shall be manned, if required.

## NOTICES

2. Officers appropriate to the occasion shall attend the side on the arrival and departure of officials and officers.

1050. Dispersing With Side Boys and Guard and Band.

1. Side boys shall not be paraded on Sunday, or on other days between sunset and 0800, or during meal hours of the crew, general drills and evolutions, and periods of regular overhaul, except in honor of civil officials or foreign officers, when they may be paraded at any time during daylight. Side boys shall be paraded only for scheduled visits.

2. Except for official visits and other formal occasions, side boys shall not be paraded in honor of officers of the armed services of the United States, unless otherwise directed by the senior officer present.

3. Side boys shall not be paraded in honor of an officer of the armed services in civilian clothes unless such officer is at the time acting in an official civil capacity.

4. The side shall be piped when side boys are paraded, but not at other times.

5. The guard and band shall not be paraded in honor of the arrival or departure of an individual at times when side boys in his honor are dispersed with except at naval shore installations.

1051. Uniform for Members of the Marine Corps.

Members of the Marine Corps will wear dress uniform when full dress is prescribed for naval personnel.

1052. Honors to an Official Entitled to 19 or More Guns.

An official or officer entitled to a salute of 19 or more guns shall receive the honors for an official visit, subject to the regulations pertaining to gun salutes, on the occasion of every visit.

1053. Honors for a Flag or General Officer, or Unit Commander, Assisting or Relieving Command.

1. On the occasion of a flag or general officer or unit commander assuming command, and on the departure of such officer after being relieved, honors shall be rendered as for an official visit, subject to the regulations pertaining to gun salutes.

2. If the flag officer or unit commander is assuming a command, he shall read his orders to the assembled officers and crew, immediately after which his flag or command pennant shall be broken, and a gun salute, if required by these regulations, shall be fired.

3. If the flag officer or unit commander is relieving another officer in command, the officer being relieved shall read his orders

b. "Attention" shall be sounded as the visitor arrives on the quarter-deck.

c. At the end of leave taking the guard shall present arms, all personnel on the quarter-deck shall salute, and the ruffles and flourishes, followed by the music, shall be rendered. As the visitor enters the line of side boys, he shall be piped over the side. The salute and present arms shall terminate with the piping and, unless a gun salute is to be fired, a flag or pennant displayed in honor of the visitor shall be hauled down.

d. The boat or vehicle shall be piped away from the side.

e. If a gun salute is prescribed on departure, it shall be fired when the visitor is clear of the side and the flag or pennant displayed in honor of the visitor shall be hauled down with the last gun of the salute.

3. The same honors and ceremonies as for an official visit to a ship of the Navy shall be rendered, insofar as practicable and appropriate, on the occasion of an official visit to a naval station except that manning the rail, piping the side, and parading side boys are not considered appropriate. When, in the opinion of the senior officer present, such honors will serve a definite purpose, they may be rendered.

1048. Returning Official Visits and Calls.

1. An official visit shall be returned within twenty-four hours, when practicable.

2. A flag or general officer shall, circumstances permitting, return the official visits of officers of the grade of captain in the Navy or senior thereto, and to officials of corresponding grade. He may send his chief of staff to return other official visits.

3. Officers other than flag or general officers shall personally return all official visits.

4. Flag and general officers may expect official visits to be returned by persons in foreign governments, officers, and other high officials except chiefs of state. Other officers may expect such visits to be returned by suitable representatives.

5. Calls made by juniors upon seniors in the naval service shall be returned as courtesy requires and circumstances permit; calls made by persons not in the naval service shall be returned.

1049. Side Honors.

1. On the arrival and departure of civil officials and foreign officers, and of United States officers when so directed by the senior officer present, the side shall be piped and the appropriate number of side boys paraded.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

to the assembled officers and crew, and on completion thereof, or after the gun salute, if fired, his flag or command pennant shall be hauled down. The officer succeeding to command shall then read his orders, and on the completion thereof his flag or command pennant shall be broken. Aboard ship the commission pennant shall be displayed while no personal flag or command pennant is flying.

1054. Honors at Official Inspection.

1. When a flag officer or unit commander boards a ship of the Navy to make an official inspection, honors shall be rendered as for an official visit, except that the uniform shall be as prescribed by the inspecting officer, except that the uniform shall be as prescribed by the inspecting officer, unless otherwise prescribed in these regulations, and shall be hauled down on his departure.

2. The provisions of this article shall apply, insofar as practicable and appropriate, when a flag or general officer, in command ashore, makes an official inspection of a unit of his command.

1055. Honors for a Civil Official Taking Passage.

When a civil official of the United States takes passage officially in a ship of the Navy, he shall on embarking and disembarking be made an official visit for an official visit for such official. In addition, if entitled to gun salutes, he shall be rendered this salute when he disembarks in a port of the foreign nation to which he is accredited.

1056. Quarter-Deck.

The commanding officer of a ship shall establish the limits of the quarter-deck and the restrictions as to its use. The quarter-deck shall enforce so much of the main or other appropriate deck as may be necessary for the proper conduct of official and ceremonial functions.

1057. Musical Honors to the President of the United States.

1. If, in the course of any ceremony, it is required that honors involving musical tribute to the President of the United States be performed more than one time, "Hail to the Chief" may be used interchangeably with the National Anthem as honors to the President of the United States.

2. When specified by the President of the United States, the Secretary of State, the Chief of the Secret Service, or their authorized representatives, "Hail to the Chief" may be used as an opportunity for the President and his immediate party to move to or from their places while all others stand fast.

1058. Authorized Display of Flags and Pennants.

1. When the national ensign is displayed on occasions other than those prescribed in these regulations, the manner of display shall be as prescribed in Navy Department publications.

## NOTICES

2. No flags or pennants, other than as prescribed by these regulations or as may be directed by the Secretary of the Navy, shall be displayed from a ship or craft of the Navy, or from a naval station, as an honor to a nation or an individual or to indicate the presence of any individual.

3. All flags and pennants displayed in accordance with these regulations shall conform to the pattern prescribed in Navy Department publications.

4. Flags or pennants of officers not eligible for command at sea shall not be displayed from ships of the United States Navy.

1059. Display of National Ensign, Union Jack and Distinctive Mark From Ships and Craft.

1. The national ensign, union jack, personal flag or pennant, or commission pennant shall be displayed from ships and craft of the Navy as specified in the following table:

Ships or craft	National ensign displayed	Union Jack displayed	Personal flag or pennant displayed
Active:	Yes	Yes	Yes
In commission:	Yes	Yes	Yes
In reserve:	Yes	Yes	Yes
In service, special:	Yes	Yes	Yes
Out of commission:	No	No	No
Out of service:	No	No	No
Special status:	Yes	Yes	Yes
In commission, special:	Yes	Yes	Yes
Out of commission, special:	No	No	No

\* National ensign shall be displayed if necessary to indicate the national character of the ship or craft.  
 \* Applies to display of commission pennant only. A flag officer or unit commander embarked may display a personal flag or command pennant.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

## NOTICES

## 1061. Display of National Ensign During Gun Salute.

1. A ship of the Navy shall display the national ensign at a rehearsal while firing a salute in honor of a United States national anniversary or officials, as follows:
  - a. At the main during the national salute prescribed for the third Monday in February and the 4th of July.
  - b. At the main during a 21-gun salute to a United States civil official.

except by a ship displaying the personal flag of the official being saluted.

- c. At the fore during a salute to any other United States civil official, except by a ship which is displaying the personal flag of the official being saluted.

2. During a gun salute, the national ensign shall remain displayed from the gaff or the flagstaff, in addition to the display of the national ensign prescribed in this article.

## 1062. Display of National Ensign in Boats.

The national ensign shall be displayed from water-borne boats of the naval service:

- a. When under way during daylight in a foreign port.
- b. When ships are required to be dressed or full-dressed.
- c. When going alongside a foreign vessel.
- d. When an officer or official is embarked on an official occasion.

a. When a flag or general officer, a unit commander, a commanding officer, or a chief of staff, in uniform, is embarked in a boat of his command or in one assigned to his personal use.

- f. At such other times as may be prescribed by the senior officer present.

## 1063. Dipping the National Ensign.

1. When any vessel, under the United States registry or the registry of a nation formally recognized by the Government of the United States, comes within the range of the Navy by dipping her ensign, it shall be answered by the ensign of the Navy by dipping her ensign. The national ensign shall be hoisted for the purpose of answering the dip. An ensign being displayed at half-mast shall be hoisted to the truck or peak before a dip is answered.
2. No ship of the Navy shall dip the national ensign unless in return for such compliment.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

2. The distinctive mark of a ship or craft of the Navy in commission shall be a personal flag or command pennant of an officer of the Navy, or a commission pennant. The distinctive mark of a hospital ship of the Navy, in commission, shall be the Red Cross flag.

a. Not more than one distinctive mark shall be displayed by a ship or craft at one time, nor shall the commission pennant and the personal flag of a civil official be displayed at one time.

- b. Except as prescribed in these regulations for certain occasions of ceremony and when civil officials are embarked, the distinctive mark shall be displayed day and night at the after-masthead or, in a masted ship, from the foremast and next conspicuous hoist.

3. When not underway the national ensign and the union jack shall be displayed from 0800 until sunset from the flagstaff and the jack staff, respectively. A ship which enters port at night shall, when appropriate, display the national ensign from the gaff at daylight for a time sufficient to establish her nationality; it is customary for other ships of war to display their national ensigns in return.

4. The national ensign shall be displayed during daylight from the gaff (or from the triatic stay in the case of those ships with masted boats) or from the foremast (or from the triatic stay in the case of those ships with masted boats) and stays which would interfere with the hoisting, lowering or flying of the ensign of a ship underway or with the following circumstances, unless or as otherwise directed by the senior officer present.

a. Getting underway and coming to anchor.

b. Pulling in with other ships.

c. Cruising near land.

d. During battle.

5. The union jack displayed from the jack staff shall be the size of the union of the national ensign displayed from the flagstaff.

6. The union jack shall be displayed at a yardarm to denote that a general court-martial or court of inquiry is in session.

## 1060. National Ensign at Commands Afloat.

The national ensign shall be displayed from 0800 to sunset near the headquarters of every command ashore, or at the headquarters of the senior when the proximity of headquarters of two or more commands makes the display of separate ensigns inappropriate. When an outlying activity of the command is so located that its governmental character is not clearly indicated by the display of the national ensign as prescribed above, the national ensign shall also be displayed at that activity.

3. Of the colors carried by a naval force on shore, only the battalion or regimental colors shall be dipped in rendering or acknowledging a salute.

4. Submarine, or such other ships of the line in which it would be considered hazardous for personnel to do so, shall not be required to dip the ensign.

## 1064. Half-Masting the National Ensign and Union Jack.

1. In half-masting the national ensign it shall, if not previously hoisted, first be hoisted to the truck or peak and then lowered to half-mast. Before lowering from half-mast, the ensign shall be hoisted to the truck or peak and then lowered.

2. When the national ensign is half-masted, the union jack, if displayed from the jack staff, shall likewise be half-masted.

3. Personal flags, command pennants, and commission pennants shall not be displayed at half-mast except as prescribed in these regulations for a deceased official or officer.

4. When directed by the President the national ensign shall be flown at half-mast at military facilities and at military vessels and stations around whether or not the national ensign of another nation is flown at half-mast alongside that of the United States.

## 1065. Following Motions of Senior Officer Present in Hoisting and Lowering the National Ensign.

1. On board ship or at a command ashore, upon all occasions of hoisting, lowering, or half-masting the national ensign, the motions of the senior officer present shall be followed, except as prescribed for answering a dip or firing a gun salute.

2. A ship displaying the flag of the President, Secretary of Defense, Deputy Secretary of Defense, Secretary of the Navy, Director of Naval Research and Engineering, an Assistant Secretary of Defense, Under Secretary of the Navy, or an Assistant Secretary of the Navy shall be regarded as the ship of the senior officer within the meaning of this article.

## 1066. Personal Flags and Pennants Afloat.

1. Except as otherwise prescribed in these regulations, a flag officer or a unit commander afloat shall display his personal flag or command pennant from his flagstaff. At no time shall he display it from more than one ship.

2. When a flag officer eligible for command at sea is embarked for passage in a ship of the Navy, his personal flag shall be displayed from such ship, unless there is already displayed from such ship the flag of an officer his senior.

## NOTICES

3. When a civil official, in whose honor the display of a personal flag is prescribed during an official visit, is embarked for passage in a ship of the Navy, his personal flag shall be displayed from such ship.

4. A personal flag or command pennant may be hoisted down during battle or at any time when the officer concerned, or the senior officer present, considers that it is desirable thus to render a flagship less distinguishable. When hoisted down it shall be replaced with a commission pennant.

5. An officer of the Navy commanding a ship engaged otherwise than in the service of the United States shall not display a personal flag, command pennant, or commission pennant from such ship, or in the bow of a boat.

6. A ship under way shall not display a personal flag or command pennant unless a flag officer or unit commander is aboard. Should a flagship get under way during the absence of the flag officer or unit commander, the personal flag or command pennant shall be hoisted down and replaced with a commission pennant.

## 1067. Broad or Buoye Command Pennant.

1. The broad or buoye command pennant shall be the personal command pennant of an officer of the Navy, not a flag officer, commanding a unit of ships or aircraft.

2. The broad command pennant shall indicate command of:
  - a. A division of battleships, aircraft carriers, or cruisers.
  - b. A force, flotilla, or squadron of ships or craft of any type.
  - c. An aircraft wing, carrier air wing, or carrier air group.

3. The buoye command pennant shall indicate command of:
  - a. A division of ships or craft other than battleships, aircraft carriers, or cruisers.
  - b. A major subdivision of an aircraft wing or group.

## 1068. Display of More Than One Personal Flag or Pennant Aboard Ship.

1. When the personal flag of a civil official is displayed aboard a ship of the Navy, a personal flag or command pennant of an officer of the Navy, shall be displayed, if required, as follows:
  - a. Aboard a single-masted ship, at the starboard yardarm.
  - b. Aboard a two-masted ship, at the fore truck.
  - c. Aboard a ship with more than two masts, at the after truck.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

## NOTICES

3. When the points for display of two or more personal flags adhere are in such close proximity as to make their separate display inappropriate, that of the senior officer present only shall be displayed.
  4. When a personal flag or a foreign design is required to be displayed during the official visit of, or a gun salute to, a chief official or foreign officer, it shall be displayed from the normal point of display of a personal flag or pennant of the officer in command, and the latter's flag or pennant shall be displayed at some other point within the command.
  5. During the official inspection by a flag or general officer of a unit of his command ashore, his personal flag shall displace a personal flag or pennant of the officer in command.
  6. If two or more civil officials, for each of whom the display of a personal flag is prescribed, are present officially at a command ashore at the same time, the flag of the senior only shall be displayed.
1071. Personal Flag or Command Pennant, When Officers Temporarily Succeeded in Command.
1. When a flag or general officer or a unit commander has been succeeded temporarily in command, as prescribed in these regulations, his personal flag or command pennant shall be hoisted down. The officer who, his personal command pennant temporarily to the command shall display the personal flag or command pennant to which he is entitled by these regulations.
  2. In a foreign port upon the occasion of the absence of a flag officer from his command for a period exceeding 72 hours, the command subject to any direction of the flag officer, shall devolve upon the senior officer present who is eligible for the exercise of command at sea, but as standard of the command the flag officer's flag shall continue to be flown in his regular flagship until that ship is under way, at which time the personal flag shall be hoisted down and not again hoisted until the flag officer returns to his flagship. Commanders in chief and fleet commanders have authority to modify this procedure with respect to their personal flags as the exigencies of the service require.
1072. Absence Indicators.
- In ships, the absence of an official or officer whose personal flag or pennant is displayed, a chief of staff, or a commanding officer shall be indicated from sunrise to sunset by the display of an absence indicator as prescribed in current instructions.
1073. Personal Flags and Pennants of Officers in Boats and Automobiles and Aircraft.
1. An officer in command, or a chief of staff when acting for him, when embarked in a boat of the naval service on official occasions shall

## NOTICES

- b. For a unit commander not a flag officer, a replica of his command pennant.
- c. For a commanding officer, or a chief of staff not a flag officer, an arrow.
2. Stuffs for the ensign, and for the personal flag or pennant in a boat assigned to the personal flag or general officer, unit commander, chief of staff, or commanding officer, which a civil official is embarked, shall be fitted at the peak with devices as follows:
- a. A spread eagle: For an official or officer whose official salute is 19 or more guns.
- b. A halberd:
- (1) For a flag or general officer whose official salute is less than 19 guns.
- (2) For a civil official whose official salute is 11 or more guns but less than 19 guns.
- c. A ball:
- (1) For an officer of the grade, or relative grade, of captain in the Navy.
- (2) For a career minister, a counselor or first secretary of embassy or legation, or a consul.
- d. A star: For an officer of the grade, or relative grade, of commander in the Navy.
- e. A flat truck:
- (1) For an officer below the grade, or relative grade, of commander in the Navy.
- (2) For a civil official not listed above, and for whom honors are prescribed for an official visit.
- 107c. Display of Foreign National Design During Gun Salutes.
1. While firing a salute to the nation upon entering a foreign port, returning from a foreign port, or firing a salute to the ensign of a foreign nation, or firing a salute on the occasion of a foreign national anniversary, celebration, or solemnity, a ship shall display the ensign of the foreign nation at the main truck.
2. While firing a salute to a foreign dignitary or official entitled to 21 guns, a ship shall display the national ensign of such dignitary or official at the main truck. While firing a salute to the foreign official entitled to less than 21 guns, or to a foreign officer, or when returning from a foreign port, a ship shall display the ensign of the foreign nation at the main truck.

2. When, in accordance with these regulations, the personal flag of a civil official and the personal flag or command pennant of an officer of the Navy are displayed at the starboard ensign, the personal flag of the civil official shall be displayed outboard.
3. When two or more civil officials, for each of whom the display of a national flag is prescribed, are embarked in the same ship of the Navy, the flag of the senior only shall be displayed.
1069. Display of a Personal Flag or Command Pennant When a National Ensign Is at Masthead.
1. The President's flag, if displayed at a masthead where a national ensign is required to be displayed during an official visit or during periods of dressing or full-dressing ship, shall remain at that masthead and the personal flag or command pennant of the President or of the United States national ensign and to starboard of a foreign national ensign.
  2. Except as provided above, a personal flag or command pennant shall not be displayed at the same masthead with a national ensign, but shall:
    - a. During a gun salute, be lowered clear of the ensign.
    - b. During an official visit, be shifted to the starboard yardarm in a single-masted ship and to the fore truck in a two-masted ship.
    - c. During periods of dressing or full-dressing ship:
      - (1) If displayed from the fore truck or from the masthead of a single-masted ship, be shifted to the starboard yardarm.
      - (2) If displayed from the main truck, be shifted to the fore truck in lieu of the national ensign at that mast.
      - (3) If displayed from the after truck of a ship with more than two masts, remain at the after truck in lieu of the national ensign at that mast.
1070. Personal Flags and Pennants Aboard.
1. A flag or general officer in command ashore shall display his personal flag day and night at a suitable and conspicuous place within his command. When such officer makes an official inspection of an outlying activity of his command, his flag shall, if practicable and appropriate, be shifted to such outlying activity.
  2. A flag officer or unit commander of the operating forces whose headquarters are ashore shall display his personal flag or pennant day and night at a suitable and conspicuous place at his headquarters, unless it is disallowed from a ship of his command.

display from the bow his personal flag or command pennant or, if not entitled to either, a commission pennant.

2. An officer entitled to the display of a personal flag or command pennant may display a miniature of such flag or pennant in the vicinity of the coxswain's station when embarked on other than official occasions in a boat of the naval service.
  3. An officer entitled to the display of a personal flag or command pennant may, when riding in an automobile on an official occasion, display such flag or pennant forward on such vehicle.
  4. An officer entitled to the display of a personal flag or command pennant may, when embarked in an aircraft on an official occasion, display such flag or pennant on both sides just forward and below the cockpit of such aircraft at rest.
1074. Flags of Civil Officials in Boats and Automobiles and Aircraft.
- A flag shall be displayed in the bow of a boat in the naval service whenever a United States civil official is embarked on an official occasion, as follows:
- a. A union jack for:
    - (1) A diplomatic representative of or above the rank of charge d'affaires, within the waters of the country to which he is accredited.
    - (2) A governor general or governor commissioned as such by the President, within the area under his jurisdiction.
  - b. The consular flag for a consular representative.
  - c. The prescribed personal flag for other civil officials when such officials are entitled to the display of a personal flag during an official visit.
  - d. A civil official entitled to the display of a personal flag may, when riding in an automobile on an official occasion, display such flag forward on such vehicle.
  - e. A civil official entitled to the display of a personal flag may, when embarked in an aircraft, display a miniature of such flag on both sides just forward and below the cockpit of such aircraft at rest.
1075. Bow Insignia and Flightstaff Insignia for Boats.
1. A boat regularly assigned to an officer for his personal use shall carry insignia on each bow as follows:
    - a. For a flag or general officer, the stars as arranged in his flag.

## NOTICES

## 1079. Dressing and Full-Dressing Ship.

1. On occasions of dressing ship the largest national ensign with which the ship is furnished shall be displayed from the flagstaff, and except as prescribed for a ship displaying a pennant, the flag or command pennant, a national ensign shall be displayed from each masthead. The national ensign shall be hoisted at the masthead of the mainmast, except when, due to a substantial difference in heights of masthead, a difference in the size of national ensigns is appropriate.
2. On occasions of full-dressing ship, in addition to the dressing of the mastheads, a rainbow of signal flags, arranged in the order prescribed in Navy Department publications, shall be displayed, reaching from the foot of the jackstaff to the mastheads and thence to the foot of the flagstaff. Peculiarly masted or masted ships shall make a display as little modified from the rainbow effect as is practicable.
3. When dressing or full-dressing ship in honor of a foreign nation, the national ensign of that nation shall replace the United States national ensign at the main, or at the masthead in the case of a single-masted ship; provided that when a ship is full-dressed or dressed in honor of more than one nation, the ensign of each such nation shall be displayed at the main, or at the masthead in a single-masted ship.
4. Should half-masting of the national ensign be required on occasions of dressing or full-dressing ship, only the national ensign at the flagstaff shall be half-masted.
5. When full-dressing is prescribed, the senior officer present may direct that the ensign be substituted if, in his opinion, the state of the weather makes such action advisable. He may also, under such circumstances, direct that the ensign be hoisted down from the mastheads after being hoisted.
6. Ships not under way shall be dressed or full-dressed from 0800 until sunset. Ships under way shall not be dressed or full-dressed.

## 1080. Senior Officer Present Afloat Pennant.

If two or more ships of the Navy are together in port, the senior officer present afloat pennant shall be displayed from the ship in which the senior officer present afloat is present. The pennant shall be the ensign of the senior officer's command, and shall be hoisted from the mainmast of the ship. It shall be displayed from the inboard halyard of the starboard main yardarm.

## 1081. Ships Passing Washington's Tomb.

When a ship of the Navy is passing Washington's tomb, Mount Vernon, Virginia, between sunrise and sunset, the following ceremonies shall be observed, insofar as may be practicable: The full guard and band shall be paraded, the bell tolled, and the national ensign half-masted at the beginning of the tolling of the bell. When opposite Washington's tomb, the guard shall present arms; persons on deck shall salute, facing in the

a salute fired by a foreign officer, the national ensign of the foreign official or officer shall be displayed at the fore truck.

3. At a naval station, under the circumstances set forth in the preceding paragraphs of this article, the appropriate foreign ensign shall be displayed from the normal point of display of the national flag or pennant of the officer in command, and the latter's flag or pennant shall be displayed at some other point within the command.

## 1077. Display of National Ensigns of Two or More Nations.

1. When the national ensigns of two or more nations are required to be displayed from the same masthead, the United States national ensign, if displayed, shall be displayed to starboard of all others. The national ensigns of other nations shall be displayed, starboard to port, in the alphabetical order of the names of the nations in the English language, except that the ensign of a foreign nation within whose waters the ship is located, if displayed, shall be to starboard of other foreign ensigns.
2. While a salute is being fired under the foregoing conditions, the ensign of the nation being honored, or whose dignity is being honored, shall be displayed alone.
3. In rendering honors, the national ensign of one nation shall not be displayed above that of another nation at the same masthead.

## 1078. Choice of Foreign Flag or Design in Rendering Honors.

In rendering honors requiring the display of a foreign flag or ensign:

- a. In the case of a government having both a national flag and a national ensign (man-of-war flag), the national ensign shall be displayed except under the conditions set forth in this article.
- b. In the case of a commonwealth, dominion, or similar government recognized as independent by the Government of the United States, which has a national flag of its own but which also employs to which it belongs, the national flag of the empire or federation to which it belongs, the national flag of the commonwealth or dominion shall be displayed except when rendering honors to naval officers; in which latter case the national ensign (man-of-war flag) shall be displayed.
- c. In the case of a government not recognized as independent by the Government of the United States, but as a protectorate or colony, the flag of the government shall be displayed, except when otherwise directed by the Secretary of the Navy.
- d. In the case of a government carried on by a joint mandate or trusteeship and having no distinct national flag of its own, the flags of the several countries comprising the mandate shall be displayed when rendering honors.

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

direction of the tomb, and "Taps" shall be sounded. The national ensign shall be hoisted to the top of the mast and the tolling of the bell shall be continued until the national ensign is lowered. The last note of "Taps" after which the National Anthem shall be played. Upon completion of the National Anthem, "Carry on" shall be sounded.

## 1082. National Holidays.

1. The following shall be observed as holidays on board ships of the Navy and at naval stations and activities: New Year's Day, the 1st of January; Washington's Birthday, the third Monday in February; Memorial Day, the last Monday in May; Independence Day, the 4th of July; Labor Day, the first Monday in September; Columbus Day, the second Monday in October; Veterans Day, the 11th of November; Thanksgiving Day, the fourth Thursday in November; and Christmas Day, the 25th of December, and such other days as may be designated by the President.
2. Whenever any of the above-designated dates falls on Saturday, the preceding day shall be observed as a holiday, and whenever such date falls on Sunday, the following day shall be observed.

## 1083. Ceremonies for National Holidays.

1. On Washington's Birthday, the third Monday in February, and on Independence Day, the 4th of July, every ship of the Navy in commission, not under way, shall full-dress from 0800 until noon each saluting ship, and each naval station equipped with a saluting battery, shall fire a national salute of 21 guns.
2. On Memorial Day, the last Monday in May, each saluting ship, and each naval station having a saluting battery, shall fire at noon a salute of 21 minute-guns. All ships and naval stations shall display the national ensign at half-mast from 0800 until the completion of the salute or until 1200 if no salute is fired or to be fired.
3. When the 4th of July occurs on Sunday, all special ceremonies shall be postponed until the following day.

## 1084. Foreign Participation in United States National Anniversaries or Solemnities.

1. Prior to celebrating a United States national anniversary, or observing a national solemnity, in a foreign place or in the presence of foreign warships, the senior officer present of the United States naval service shall give due notice to the foreign port authorities, and to the senior officer of each nationality present, of the time and manner of the celebration or solemnity, and shall, as appropriate, invite their participation therein. An officer shall be sent to thank the foreign authorities or ships which participate in such celebration or solemnity.
2. When foreign troops participate in parades within the territorial jurisdiction of the United States, they shall be assigned a position of honor ahead of United States troops, except that a small detachment of United States troops will immediately precede the foreign troops as a guard of honor.

## NOTICES

3. On occasions when troops of two or more foreign nations participate, the troops of the nation whose parade is held will be assigned a position ahead of all other detachments, in the order of precedence among foreign troops will be determined, as appropriate, by:
  - a. The relative ranks of the commanders of the forces from which the parade detachments are drawn; or
  - b. The relative ranks of the commanders of the parade detachments; or
  - c. The alphabetical order in the English language of the names of the nations concerned.

## 1085. Observance of Foreign Anniversaries and Solemnities.

1. In a foreign place, or when in company with a foreign warship, when a national anniversary or solemnity is being observed by foreign port authorities or a foreign warship, a ship of the Navy shall, upon official invitation, follow the example of the foreign authority or warship in full-dressing or dressing ship, firing salutes, and half-masting ensigns. Salutes shall not exceed 21 guns unless the senior officer present deems it proper to fire a larger number in order to participate properly in the celebration or solemnity. It shall be the duty of the senior officer to avoid giving offense, upon all such occasions efforts shall be made to secure, if practicable, with the foreign authorities in the time and manner of conducting the ceremonies.
2. Uniform accoutrements of mourning, including mourning badges or bands, may be worn on the uniform when appropriate, or when directed by competent authority, by persons in the naval service who are stationed in, or who are officially visiting, a foreign nation during the period that the foreign government ordains as the period of national mourning.

## 1086. Ships Passing USS ARIZONA Memorial.

When a ship of the Navy is passing the USS ARIZONA Memorial, Pearl Harbor, Hawaii, between sunrise and sunset, the following ceremonies shall be observed, insofar as may be practicable: The full guard and band shall be paraded, the bell tolled, and the national ensign half-masted at the beginning of the tolling of the bell. When opposite the memorial, the guard shall present arms; persons on deck shall salute, facing in the

## 1087. Death of United States Civil Official.

1. Upon the death of a United States Civil Official listed below, the following ceremonies shall be observed:

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

## NOTICES

2. When the day after receipt of notice of death falls upon a Sunday or a national holiday, gun salutes will be fired on the day following Sunday or a national holiday.
  3. The national ensign shall be half-masted upon receipt of notification from any reliable source, including news media, of the death of one of the designated civil officials.
1088. Death of a Person in the Military Service.
1. Upon the death of a person in the military service, the following ceremonies shall be observed:

Demand	National savings and investments		Other matters	
	By:-	Period of (1) (2) (3) (4) (5) (6) (7) (8) (9) (10) (11) (12) (13) (14) (15) (16) (17) (18) (19) (20) (21) (22) (23) (24) (25) (26) (27) (28) (29) (30) (31) (32) (33) (34) (35) (36) (37) (38) (223		

2. At joint installations or commands the procedures prescribed by the responsible military commander or the executive agent will be executed uniformly by all the United States military units present.

[illegible]

3. The national ensign shall be half-masted upon receipt of notification of death of one of the designated officials from any reliable source, including news media.
4. If he deems it appropriate, the senior officer present may direct that the national ensign be lowered in this article be observed during the transfer of the body of the deceased from the ship or naval station, rather than during the funeral.
5. In the event of a military funeral of a person in the naval service on the retired list, ceremonies as prescribed in this article shall be rendered insofar as may be practicable.
6. On the occasion of conducting the funeral of a person in the naval service near ports, stations, or ships of other armed forces, the United States flag shall be flown at half-mast, and the officers thereof shall be duly notified of the time and place of the funeral. Honors to be rendered by ships of the Navy or by naval stations.
7. During the funeral of a flag officer of the Coast Guard, or a general officer of the armed services of the United States, other than naval, and other than those listed in paragraph 1 of this article, at a place where there is a naval station, or where one or more ships of the Navy are present, the ensigns of such stations and ships shall be half-masted during the funeral service and from noon thereafter, and minute-guns, or the firing of a salute, may be ordered. The regulations of the service to which the deceased shall be fixed by the naval station, if practicable, and by the senior saluting ship present.

1089. General Provisions Pertaining to Funerals.

1. If there is no chaplain or clergyman available, the commanding officer, or his representative, shall conduct the funeral service.
2. There shall be six pallbearers and six body bearers. The pallbearers shall, if practicable, be of the same grade or rating as the deceased. If a sufficient number of foreign officers of appropriate grade attend the funeral, they may be invited to serve as additional pallbearers. Pallbearers and body bearers shall follow the procedure prescribed in the Landing Party Manual, U. S. Navy.
3. The wearing of the mourning badge is discretionary for those in attendance at a funeral and shall be worn by the escort for a military funeral as prescribed in the respective Uniform Regulations.
4. Boats taking part in a funeral procession shall display the national ensign at half-mast. If the deceased was a flag or general officer, or

## NOTICES

- at the time of his death a unit commander, or a commanding officer of the unit, or a member of the unit, or a member of the commission present, shall be designated to lead the funeral procession. The funeral procession shall be arranged in marching and displayed at half-mast, and the flag shall be lowered to the top of the mast.
5. The casket shall be covered with the national ensign, so placed that the union is at the head and over the left shoulder of the deceased. The casket shall be placed on the deck, and the casket before it is lowered into the grave or committed to the deep.
6. Persons in the naval service shall salute when the body is carried part team, while the body is being lowered into the grave or committed to the deep, and during the firing of volleys and the sounding of "Taps."
7. Three rifle volleys shall be fired after the body has been lowered into the grave or committed to the deep, followed by "Taps." The volleys shall be sounded by the bugles; except that in a foreign port, when permission has not been obtained to land an armed escort, the volleys shall be fired over the body after it has been lowered into the boat alongside.
8. During burial at sea, the ship shall be stopped, if practicable, and the ensign shall be displayed at half-mast from the beginning of the ceremony until the body is lowered into the grave or committed to the deep. Further display of the ensign at half-mast shall be at the discretion of the commanding officer, and shall be in accordance with the prescribed mourning to circumstances by the senior officer present.

1090, **Funeral Records.**

1. In escort under arms shall, when practicable, accompany the funeral cortege to the place of interment, and shall follow the procedure prescribed in the Landing Party Manual, U. S. Navy.
2. The funeral escort for a President, Vice President, Secretary of Defense, Secretary of the Navy, Under Secretary of the Navy, Assistant Secretary of the Navy, Fleet Admiral, Chief of Naval Operations, or Commandant of the Marine Corps shall be as prescribed by the Secretary of the Navy.
3. Unless otherwise prescribed by the senior officer present, the funeral escort for other persons in the Navy or the Marine Corps shall comprise commands equivalent to the following Infantry units, insofar as is practicable with the Navy or Marine Corps forces available.

## 1094. Transporting Body of Deceased Official.

When a ship of the Navy is transporting the body of a deceased official, the honors and ceremonies prescribed for an official visit shall, if directed by the senior officer present or higher authority, be rendered when the body is received aboard or leaves the ship.

4. The grade or rating of the escort commander normally shall be the same as, or higher than, that of the deceased.

1091. Display of Personal Flag, Command Pennant, or Commission Pennant  
In Funerals on Shore.

If the deceased was a flag or general officer, or at the time of his death, a unit commander or commanding officer, he shall, in his personal flag or command pennant, or commission pennant, shall be drawn in mourning and carried immediately in advance of the body in the funeral procession to the grave.

## 1092. Burial in a Foreign Place.

Before a person in the naval service is buried in a foreign place, the senior officer present shall arrange with the local authorities for the interment of the body and shall also request permission to parade an escort under arms. He shall inform the senior foreign officers present and the appropriate local officials of the time and place of the funeral, and of the funeral honors to be rendered by United States forces present.

## 1093. Death of Diplomatic, Consular, or Foreign Official.

1. On the death in a foreign place of a diplomatic or consular representative of the United States, the senior officer present shall, as circumstances permit, arrange for appropriate participation in the funeral ceremonies by persons in the naval service.

2. When the senior officer present receives official notice of the death or funeral of a foreign official, or member of a foreign armed service, he shall, as circumstances warrant and as international courtesy demands, direct visits of condolence to be made, and arrange for participation by persons in the naval service in the funeral ceremonies.

## CHAPTER 11

## RIGHTS AND RESPONSIBILITIES OF PERSONS IN THE DEPARTMENT OF THE NAVY

## 1101. Officer's Duties Relative to Law, Orders and Regulations.

Every officer in the naval service shall acquaint himself with, obey, and, so far as his authority extends, enforce the law, regulations and orders relating to the Department of the Navy. He will faithfully and dutifully discharge the duties of his office to the best of his ability in accordance with the existing orders and regulations and shall see that the personnel of his command are so instructed. He shall see that the personnel of his command are so instructed with the policies and customs of the service to protect the public interest.

## 1102. Requirement of Exemplary Conduct.

All commanding officers and others in authority in the naval service are required to show in themselves a good example of virtue, honor, patriotism, and subordination; to be vigilant in inspecting the conduct of all persons who are placed under their command to guard against and suppress all dissolute and immoral practices, and to correct, according to the law and regulations of the Navy, all persons who are guilty of them; and to take all necessary and proper measures, under the law, regulations, and customs of the naval service, to promote and safeguard the good character, efficiency, and the general welfare of the community of officers and enlisted persons under their command or charge. (10 USC 5947).

## 1103. Conduct of Persons in the Naval Service.

All persons in the naval service shall show in themselves a good example of subordination, courage, zeal, sobriety, neatness and attention to duty. They shall aid, to the utmost of their ability and to the extent of their authority, in maintaining good order and discipline as well as in other matters concerned with the efficiency of the command.

## 1104. Compliance With Lawful Orders.

All persons in the naval service are required to obey readily and strictly, and to execute promptly, the lawful orders of their superiors.

## 1105. Appeal From Decision of a Superior.

An official appeal by a person in the Department of the Navy from an order or decision of an immediate superior shall be addressed to the next higher command superior having power to act in the matter and shall be forwarded through such immediate superior, except in the case of the latter's refusal or failure to forward it, when it may be forwarded direct with an explanation of such course. If the officer whose order or decision is appealed from is the commanding officer of the person

appealing and if such commanding officer refuses or fails to forward the appeal, the person appealing may appeal to any officer superior to such commanding officer; the latter officer shall forward the appeal directly to the officer exercising general court-martial jurisdiction over the commanding officer. The officer exercising general court-martial jurisdiction shall examine into said appeal and take proper measures; and he shall, as soon as possible, transmit to the Secretary of the Navy a true statement of such appeal, with the proceedings had thereon.

## 1106. Oppression or Other Misconduct by a Superior.

1. If any person in the naval service considers himself oppressed by his superior, or observes in him any misconduct, he shall not fail in his respectful bearing towards such superior, but shall report such oppression or misconduct to the proper authority. Such person will be held accountable if his report is found to be vexatious, frivolous, or false.

2. A report of oppression by, or misconduct of, a superior shall be made to the immediate commanding officer of the person making the report unless the commanding officer is himself the subject of the report, or is the subordinate of the officer who is the subject of the report.

3. If the immediate commanding officer is the subject of the report, the report shall be in writing and shall be forwarded to the superior who exercises general court-martial jurisdiction over the commanding officer reported on, through the immediate commanding officer and any other officers who may be in the chain of command. If the immediate commanding officer reported on or if any superior in the chain of command not having general court-martial jurisdiction shall refuse or fail within a reasonable time to forward the report received to his immediate superior having such jurisdiction, the person making the report may complain to any officer superior to himself and such officer shall forward the complaint directly to the immediate superior exercising general court-martial jurisdiction over the immediate commanding officer.

4. If a superior of the immediate commanding officer is the subject of the report, the report shall be in writing and shall be forwarded through the immediate commanding officer and the officer who is the subject of the report, and any other officers who may be in the chain of command, to the immediate superior exercising general court-martial jurisdiction over the officer reported on. If any officer through whom the report is forwarded refuses or fails to forward the report within a reasonable time, the person making the report may complain to any officer superior to himself, and such officer shall forward the complaint directly to the immediate superior exercising general court-martial jurisdiction over the officer reported on.

5. Any officer exercising general court-martial jurisdiction over a person reported on shall, upon receiving a report of oppression or

## NOTICES

## 1111. Adverse Entries in Medical and Dental Records.

1. The medical officer or dental officer shall inform the person concerned whenever an entry is made in such person's medical record or dental record of a serious illness, operation, injury, or physical defect which may adversely affect, in other than a temporary degree, his efficiency in the performance of duty.

2. The medical officer or dental officer shall inform, in writing, the commanding officer of the ship or station concerned whenever an entry is made in such person's medical record or dental record which indicates that a disease or injury may be attributable to misconduct, or indicating the use by such person of intoxicants, narcotics, narcotic substances or other controlled substances as defined in these regulations to a degree presumed to disqualify him physically, mentally, or morally for performance of duty.

3. The medical officer or dental officer normally shall permit access to the record by the person concerned when adverse entries are made. Should the medical officer or dental officer deem the condition of the person concerned to be such as to make it inadvisable or impractical to inform him of the entry or to permit him access to the record, he shall so advise the commanding officer, and shall make a notation of this action and opinion in the record. As soon as circumstances permit, the person concerned shall be notified of the adverse entry and this fact shall be noted in the record. The person concerned shall have the right to make and have entered in the record such statement in rebuttal as he may desire. If the person concerned does not desire to make a statement, he shall so state in writing.

## 1112. Misconduct and Line of Duty Findings.

Except for the medical and dental entries referred to in the preceding article, no adverse entry concerning misconduct and line of duty shall be made in any person's official record or dental record in accordance with the provisions of the Manual of the Judge Advocate General.

## 1113. Inspection of the Record of a Person in the Naval Service.

The record of a person of the naval service maintained by the Chief of Naval Personnel or the Commandant of the Marine Corps shall be available for inspection by him or his duly authorized agent, designated as such by him in writing.

## 1114. Correction of Naval Records.

1. Any military record in the Department of the Navy may be corrected by the Secretariat of the Navy acting through the Board for Correction of Naval Records, or by the Secretary of the Navy, if he determines that in order to correct an error or to remove an injustice.

2. Applications for corrections under this article may be made only after exhaustion of all other administrative remedies afforded by law or regulation.

misconduct, examine into the matter, and take such action in conformity with the Uniform Code of Military Justice and these regulations as may be proper to redress wrong, if any, complained of; and he shall, as soon as may be practicable, submit to the Secretary of the Navy a true statement of the report and any proceedings had in connection therewith.

## 1107. Direct Communication With the Commanding Officer.

1. The right of any person in the naval service to communicate with the commanding officer at a proper time and place is not to be denied or restricted.

2. Officers who are senior to the executive officer have the right to communicate directly with the commanding officer, but they shall keep the executive officer informed on matters related to the functioning of the command.

3. A head of department, or of any other major subdivision of an activity, has the right to communicate directly with the commanding officer concerning any matter relating to his department or subdivision, but shall keep the executive officer informed.

## 1108. Forwarding Individual Requests.

Requests from persons in the naval service shall be acted upon promptly. When addressed to superior authority, requests shall be forwarded without delay. The reason should be stated when a request is not approved or recommended.

## 1109. Accusations, Replies, and Counter Charges.

1. Whenever an accusation is made against a person in the naval service, either by report or by endorsement upon a communication, a copy of such report or endorsement shall be furnished him at the time.

2. Reports or complaints, and statements submitted in reply to written accusations or in explanation thereof, shall be couched in temperate language and shall be confined to pertinent facts. Opinions shall not be expressed nor the motives of others impugned.

3. Persons in the naval service to whom reports or complaints are submitted for statement shall not reply by making counter charges.

## 1110. Adverse Matter in the Record of a Person in the Naval Service.

Adverse matter shall not be placed in the record of a person in the naval service without his knowledge. Except for the medical and dental entries referred to in the following article, such matter shall be first referred to the person reported upon for such action as he may choose to make. If the person reported upon does not desire to make a statement, he shall so state in writing.

3. Applications for such corrections should be submitted to the Secretary of the Navy (through the Board for Correction of Naval Records) in accordance with the procedures and regulations established by the Secretary of the Navy and approved by the Secretary of Defense.

## 1115. Control of Official Records.

No person, without proper authority, shall withdraw official records or correspondence from the files, or destroy them, or withhold them from those persons authorized to have access to them.

## 1116. Disclosure and Publication of Information.

1. No person in the Department of the Navy shall convey or disclose by oral or written communication, publication, graphic (including photographic) or other means, any classified information except as provided in the Department of the Navy Security Manual for Classified Information. Additionally, no person in the Department of the Navy shall communicate or otherwise deal with foreign entities, even on an unclassified basis, when such would commit the Department of the Navy to disclose classified military information, except as may be required in his official duties and only after coordination with and approval by the release authority stipulated in the Department of the Navy Security Manual for Classified Information.

2. No person in the Department of the Navy shall convey or disclose by oral or written communication, publication, or other means, except as may be required by his official duties, any information concerning the Department of Defense or forces, or any person, thing, plan or measure pertaining thereto, where such information might be of possible assistance to a foreign power; nor shall any person in the Department of the Navy make any public speech or permit publication of any article written by or for him which is prejudicial to the interests of the United States. The regulations concerned with the release of information to the public through any media will be as prescribed by the Secretary of the Navy.

## 3. No person in the Department of the Navy shall, other than in the

discharge of his official duties, disclose any information, whether classified or unclassified, or whether obtained from official records or within the knowledge of the relator, which might aid or be of assistance in the prosecution or support of any claim against the United States.

4. Any person in the Department of the Navy receiving a request from the public for Department of the Navy records shall be governed by security classification markings, distribution statements on technical documents, or markings on official use only, which may be used to identify material or records not available to the general public. The general regulations concerned with the availability of records to the public of the Department of the Navy shall be as prescribed by the Secretary of the Navy.

## NOTICES

5. Persons in the Department of the Navy desiring to submit manuscripts to commercial publishers, on professional, political or international subjects shall comply with regulations promulgated by the Secretary of the Navy.

6. No person in the naval service on active duty or civilian employee of the Department of the Navy shall act as correspondent of a news service or periodical, or as a television or radio news commentator or analyst, unless assigned to such duty in connection with the public affairs activities of the Department of the Navy, or authorized by the Secretary of the Navy. Except as authorized by the Secretary of the Navy, no person in the Department of the Navy shall participate in public affairs activities of the Department of the Navy, shall receive any compensation for acting as such correspondent, commentator, or analyst.

## 1117. Official Records in Civil Courts.

No person in the Department of the Navy shall produce or release any official record in response to a subpoena duces tecum, motion for discovery, interrogatory or otherwise in a civil suit, or in connection with preliminary investigations by attorneys or others except in accordance with the provisions of the Manual of the Judge Advocate General.

## 1118. Leave and Liberty.

It is the policy of the Department of the Navy that leave and liberty will be granted to the maximum extent practicable.

## 1119. Quality and Quantity of Rations.

1. Meals served in the general mess shall be sampled, regularly, by an officer detailed by the commanding officer for that purpose. Should this officer find the quality or quantity of the food unsatisfactory, or if any member of the mess objects to the quality or quantity of the food, the commanding officer shall be notified and he shall take appropriate action.

2. No person employed in the service of the general mess shall receive any subscription from persons entitled to subsist in the mess.

## 1120. Rules for Preventing Collisions, Afloat and in the Air.

1. All persons in the naval service responsible for the operation of naval ships, craft and aircraft shall diligently observe the International Rules for Preventing Collisions at Sea, (commonly called International Rules of the Road), and the Rules, Domestic and International, for the prevention of collisions in inland waters, and regulations as may be established by the Secretary of Transportation and the Secretary of the Navy, in inland waters, or in the air, where such laws, rules and regulations are applicable to naval ships and aircraft. In those situations where such law, rule or regulation is not applicable to

## NOTICES

bound to give only his name, grade or rate, file or serial number and date of birth. In order to communicate with his family, as guaranteed in the Geneva Convention relative to the Treatment of Prisoners of War, he may give the names and addresses of his parents, guardian, or next of kin.

2. Except as provided in the foregoing any person in the naval service captured by the enemy shall evade further questions and shall make no oral or written statement disloyal to, critical of, or harmful to, the United States or its allies.

## 1174. Relations With Foreign Nations.

1. Persons in the Department of the Navy, in their relations with foreign nations, and with the governments or agents thereof, shall conform to international law and to the precedents established by the United States in such relations.

2. The religious institutions and customs of foreign countries visited by persons in the Department of the Navy shall be respected.

## 1175. Language Reflecting Upon a Superior.

No person in the naval service shall use language which may tend to diminish the confidence in or respect due to his superior officer.

## 1176. Suggestions for Improvement.

Any person in the Department of the Navy may address to the Secretary of the Navy via chain of command, suggestions or constructive criticism pertaining to improvements in efficiency or more economical methods of administration or management in the Department of the Navy.

## 1177. Exchange of Duty.

No person in the naval service shall exchange an assigned duty with another without permission from his commanding officer or appropriate superior.

## 1178. Unavoidable Separation From a Command.

Any person in the naval service who is separated from his ship, station, or unit due to shipwreck, disaster, or other unavoidable circumstances, shall proceed as soon as possible to the nearest United States military activity and report to the commanding officer thereof.

## 1179. Combinations for Certain Purposes Prohibited.

Combinations of persons in the naval service for the purpose of representing the interests of a particular class or details to duty, complaining of particulars of duty or procuring preferences are forbidden.

naval ship, craft or aircraft they shall be operated with due regard for safety of others.

2. Any significant infraction of the laws, rules and regulations governing traffic or designed to prevent collisions on the high seas, in inland waters, or in the air, which may be observed by persons in the naval service shall be promptly reported to their superiors, including the Chief of Naval Operations or Commandant of the Marine Corps when appropriate.

3. Reports need not be made under this article if the facts are otherwise reported in accordance with other directives, including duly authorized safety programs.

## 1121. Discharge of Oil, Trash, and Garbage.

1. Except as authorized by law or regulation, no oil, oily waste, or trash shall be discharged into United States or foreign internal waters or prohibited areas. The United States prohibited area is designated as waters within 50 miles of the United States coastline. The Chief of Naval Operations shall provide descriptions of prohibited areas for other nations. Trash discharged at sea should have, or be packaged for, negative buoyancy.

2. Garbage shall not be thrown overboard within a contiguous zone, which is 12 miles from any coastline.

3. Any oil slick within 50 miles of the coastline of the United States shall be reported as soon as possible to nearest Coast Guard District headquarters.

## 1122. Code of Conduct for Members of the Armed Forces of the United States.

1. The code of conduct for members of the Armed Forces of the United States shall be carefully explained to each enlisted person:

- Within six days of his initial enlistment.
- After completion of six months' active service, and
- Upon the occasion of each reenlistment.

2. Instruction in the Code of Conduct for Members of the Armed Forces of the United States shall be included in the general military training program of the command.

3. A text of the Code of Conduct for Members of the Armed Forces of the United States shall be posted in one or more conspicuous places, readily accessible to personnel of the command.

## 1123. Capture by an Enemy.

- A person in the naval service who is captured by the enemy is

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

## 1130. Making of Gifts or Presents.

1. No person in the Department of the Navy shall at any time solicit contributions from other persons in the naval service or from other officers, clerks, or employees in the Government service for a gift or present to persons in superior official positions; nor shall any persons in such superior official positions receive any gift or present offered or presented to them as a contribution from persons in the naval service or from other officers, clerks, or employees in the Government service. No person in the naval service shall accept any gift or present of less value than the value of the gift or present. No person shall make any donation as a gift or present to any such official superior. However, this paragraph does not prohibit a voluntary gift of nominal value or donation in nominal amount made on a special occasion such as marriage, illness or retirement.

2. No person in the Department of the Navy shall solicit subscriptions for the purpose of making a gift to a member of the immediate family of a person in a superior official position.

## 1131. Pecuniary Dealings With Philanthropic Persons.

1. No officer shall borrow money or accept deposits from, or have any pecuniary dealings with an enlisted person, except as may be required in the performance of his duty, and except for the sale of an item of personal property which is for sale to other persons under the same conditions of guarantee and for same consideration, and never having been the property of a government.

2. Superiors of flag or general grade, may authorize, as a duty, an officer or officers to accept deposits from an enlisted person for the sole purpose of temporarily safeguarding his personal funds under emergency or operational situations.

## 1132. Lending Money and Engaging in a Trade or Business.

1. No person in the naval service, on active service, shall, for profit or benefit of any kind, lend money to another person in the armed services, except by permission of his commanding officer; nor, having made a loan to another person in the armed services, shall he take or receive, in payment therefor, then or later, directly or indirectly, without the approval of the commanding officer, a sum of money, or any other thing or service, of a greater amount or value than the sum of money loaned.

2. Unless authorized by his commanding officer or higher authority, no person in the naval service on active service, either for himself or as an agent, shall engage in trade or business on board any ship or within the limits of the jurisdiction of the United States or article for purposes of trade on board any ship of the Navy or within any naval activity.

## 1133. Use of Title for Commercial Enterprises.

No person in the naval service shall, while on extended naval service, use his grade or rating in connection with a commercial enterprise. "Extended naval service," for the purposes of this article, is defined as active duty, other than active duty for training, under a call or order that does not specify a period of thirty days or less. This article shall not apply to a person who is not on active service, or who is on active service but who is not in the naval service, or who is in the naval service but who is not on active service, by persons on either active or inactive service, provided that such material is published in accordance with existing regulations.

## 1134. Report of a Communicable Disease.

All persons in the naval service shall report promptly to a medical representative, or where no medical officer is readily available, to his higher authority the existence or suspicion of communicable disease in persons with whom they are living or otherwise come in contact.

## 1135. Immunization.

Persons in the naval service shall permit such action to be taken to immunize them against disease as is prescribed by competent authority.

## 1136. Possession of Weapons.

Except as may be necessary to the proper performance of his duty or as may be authorized by proper authority, no person in the naval service shall:

- Have concealed about his person any dangerous weapon, instrument or device or any highly explosive article or compound.
- Have in his possession any dangerous weapon, instrument, or device, or any highly explosive article or compound on board any ship, craft, aircraft, or in any vehicle of the naval service or within any base, or other place under naval jurisdiction.

## 1137. Report of Deficit or Excess of Public Money or Property.

Any person in the Department of the Navy who has knowledge of a deficit or excess of public money or public property shall take prompt and appropriate action to bring the matter to the attention of his commanding officer or appropriate superior.

## 1138. Use and Expenditure of Privileges and Supplies.

All persons in the Department of the Navy shall ensure that equisage and supplies in their charge are properly cared for, reserved, and economically used. They shall avoid any unnecessary expenditure of public money. To the extent of their authority, they shall prevent infractions of this regulation by others.

## NOTICES

FEDERAL REGISTER, VOL. 38, NO. 57—MONDAY, MARCH 26, 1973

XUM

## 1157. Reprehend or Admonition.

Any letter of censure to a subordinate from any officer in command is a judicial punishment within the purview of Article 15, Uniform Code of Military Justice, except when issued pursuant to the sentence of a court-martial, if a copy thereof is forwarded to the Headquarters, United States Marine Corps or Bureau of Naval Personnel. Any other criticism, reproof, or instructions, written or oral, shall not in itself constitute a punishment in that sense.

## 1158. Limitations on Certain Punishments.

1. Instruments of restraint, such as handcuffs, chains, irons, and straitjackets, shall not be applied as punishment. Furthermore, chains shall not be used except for safe custody and no longer than is strictly necessary under the following circumstances:

(a) As a precaution against escape during the transfer of a person in custody or confinement;

(b) On medical grounds by direction of the medical officer;

(c) By order of the commanding officer or officer in charge, if necessary to prevent a person from injuring himself or others or from damaging property. In such cases a medical examination shall be made at the earliest practicable time, preferably in advance of the restraint, to ensure that no medical contraindication exists. The commanding officer or officer in charge shall submit a letter report of the details to the next superior authority and, if no medical officer is available to conduct the examination, shall submit a message report in lieu thereof.

2. The punishments of extra duties and hard labor without confinement shall not be performed on Sunday although Sunday counts in the computation of the period for which such punishments are imposed.

3. Guard duty shall not be inflicted as punishment.

## 1159. Treatment and Release of Prisoners.

1. Persons in confinement shall be in the custody of a master-at-arms or other person designated by the commanding officer. They shall not be subjected to cruel or unusual treatment. They shall be visited as necessary, but at least once every 4 hours to ascertain their condition, and to care, as may be appropriate, for their needs.

2. The commanding officer shall direct their release promptly upon the expiration of their sentence. In case of fire or other sudden danger which may imperil their lives, they shall, subject to such special orders as the commanding officer may have issued, be removed to a place of safety.

2. The fitness and performance report is decisive in the service career of the individual officer and enlisted person and has an important influence on the efficiency of the entire Department of the Navy. The preparation of these reports shall be regarded by superior and commanding officers as one of their most important and responsible duties.

3. The Chief of Naval Operations and the Commandant of the Marine Corps shall be responsible for the maintenance and administration of the records and reports in their respective services.

## 1153. Demand for Court-Martial.

Except as otherwise provided in the Uniform Code of Military Justice, a person in the naval service may demand a court-martial either on himself or on any other person in the naval service.

## 1154. Suspension or Arrest of an Officer.

1. An officer placed under arrest or restriction (with or without suspension from duty) on board ship shall not be confined to his room or restriction, from the proper use of any part of the ship to which, before his arrest, arrest, or confinement, he had a right, except the punishment of restriction, unless such arrest or restriction shall be necessary for the safety of the ship or of the officer, or for the maintenance of good order and discipline. Similarly, the officer shall not be confined to his room or other place on shore, the arrest or restriction imposed shall not be unduly rigorous.

2. An officer when placed under arrest shall not visit his commanding officer or other superior officer unless sent for or to obtain medical treatment or in case of emergency, but in case of business requiring attention, he shall make it known in writing.

## 1155. Temporary Restoration to Duty.

A commanding officer or other competent authority may temporarily release an officer from duty or confinement, or suspend an officer from duty or confinement, should an emergency of the service or other sufficient cause make such measure necessary. The order for temporary release shall be in writing and shall assign the reasons. Should the officer be under charges, they need not be withdrawn, and such temporary release and restoration to duty shall not be a bar to any subsequent investigation or trial of the case that the commanding authority may think proper to order, nor to the investigation of any complaint the accused may make in regard to the custody, restriction, arrest or confinement.

## 1156. Refusal to Return to Duty.

No person in the naval service shall persist in considering himself in custody or under restriction, arrest, or confinement, after he has been released by proper authority, nor shall he refuse to return to duty.

or, when appropriate, released within the limits of the command by the master-at-arms, or other custodian, and the commanding officer shall be promptly informed of the action taken.

3. No greater force than that required to restrain or confine the offender shall be used in taking into custody a person intoxicated from the use of alcoholic liquors, or under the influence of marijuana, narcotic substances, or other controlled substances as defined in these regulations.

## 1160. Places of Confinement.

1. Prisoners shall be confined only in brig or other facilities designated as naval places of confinement by the Secretary of the Navy. However, in cases of necessity, the senior officer present may authorize confinement in spaces which provide sufficient security features, safety for both the prisoner and guard personnel, and adequate living conditions.

2. Intoxicated persons or persons under the influence of marijuana, narcotic substances, or controlled substances as defined in these regulations shall not be confined in any place or manner that may be dangerous to them in their condition.

## 1161. Endorsement of Commercial Product or Process.

Except as necessary during contract administration to determine specifications or other matters, no person in the Department of the Navy, in his official capacity, shall endorse or express an opinion of approval or disapproval of any commercial product or process.

## 1162. Action Upon Receipt of Orders.

1. An order from competent authority to an officer requiring such officer to report for duty at a place, or to proceed to any point and report for duty, but fixing no date and not expressing haste, shall be obeyed by reporting within four days, exclusive of travel time, after its receipt for execution. If the order is read "without delay," the officer shall report within forty-eight hours, and if "immediately," within twelve hours. After its receipt for execution, and if "immediately," within twelve hours, the officer shall report for duty, after its receipt for execution. Officers receiving "immediately" orders shall report for duty immediately. Officers shall endorse on their orders the date and hour of their receipt for execution. Any delay in carrying out orders granted by competent authority is in addition to the time allowed by this article.

2. The time allowed by this article may be taken any time between the time of detachment from the officer's original station and the time of reporting at the new permanent duty station. It may, however, be taken only once unless or whether the officer avails himself at that time of all or part of the proceed time.

3. An application for the revocation or modification of orders shall not justify any delay in their execution, if the officer ordered is able to travel.

4. Proceed time for enlisted personnel will be as prescribed by the Chief of Naval Operations or the Commandant of the Marine Corps.

## 1163. Equal Opportunity and Treatment.

Equal opportunity and treatment shall be accorded all persons in the Department of the Navy in respect of their race, color, religion, sex, or national origin consistent with requirements for physical capabilities.

PURPOSE AND FORCE OF REGULATIONS  
WITHIN THE DEPARTMENT OF THE NAVY

1201. PURPOSE AND FORCE OF UNITED STATES NAVY REGULATIONS.

United States Navy Regulations is the principal regulatory document of the Department of the Navy, endowed with the sanction of law, of various duty, responsibility, authority, distinctions, and relationships of various commands, officials, and individuals. Other regulations, instructions, orders, manuals, or similar publications, shall not be issued within the Department of the Navy which conflict with, alter or amend any provision of Navy Regulations.

1202. ISSUANCES CONCERNING MATTERS OVER WHICH CONTROL IS EXERCISED.

Responsible officers and officials of the Department of the Navy may issue, or cause to be issued, orders, instructions, directives, manuals or similar publications concerning matters over which they exercise command, control, or supervision.

1203. IMPOSITION OF WORKLOAD.

Orders, instructions or directives will be issued with due regard for the imposition of workload resulting therefrom and benefits or advantages to be gained, particularly when the imposition of requirements is outside of command lines of authority.

1204. NAVY REGULATIONS CHANGES.

1. The Chief of Naval Operations is responsible for ensuring that Navy Regulations conform to the current needs of the Department of the Navy. When any person in the Department of the Navy deems it advisable that a correction, change or addition should be made to Navy Regulations, he shall forward a draft of the proposed correction, change or addition with a statement of the reasons therefor to the Chief of Naval Operations via the chain of command. The Chief of Naval Operations shall endeavor to obtain the concurrence of the Commandant of the Bureau of Naval Affairs, Judge Advocate General, and other appropriate offices and bureaus. Unresolved disputes concerning such corrections, changes or additions shall be forwarded to the Secretary of the Navy for appropriate action.

2. Changes to Navy Regulations will be numbered consecutively and contain in page changes. Advance changes may be used when required. Subsequent changes will be numbered consecutively and incorporated in page changes at frequent intervals.

## NOTICES

Command --- (OOD) 1. The authority which a commander in the military service lawfully exercises over his subordinates by virtue of rank or assignment. Command includes the authority and responsibility for effectively using available resources and for planning the employment of, organizing, directing, coordinating, and controlling military forces for the accomplishment of assigned missions. It also includes responsibilities for health, welfare, morale, and discipline of assigned personnel. 2. An order given by a commander that is the will of the commander expressed for the purpose of establishing about a particular action. 3. A unit or units assigned to a particular area under the command of one line of command. 4. To designate by a field of weapon fire or by observation from a superior position.

Superior --- A commander or officer in command of a senior force, unit, or organization in line of command. Also, a senior person in line of command.

Flag and General Officers --- Flag officer means an officer of the Navy or Coast Guard above the grade of captain. General officer means an officer of the Marine Corps, the Army, or the Air Force above the grade of colonel.

Person in the naval service --- Means a person, male or female, appointed or enlisted in, or inherited or conscripted into, the Navy or the Marine Corps. Also, same meaning for member of the naval service.

Persons in the Department of the Navy --- All persons in the naval service and civilians employed under the Department of the Navy.

Ships --- A classification of water-borne craft which comprises generally the ocean-going vessels and craft of the Navy, and such other water-borne craft as may be assigned this classification.

Service Craft --- A classification of water-borne craft which comprises generally the water-borne utilitarian craft not classified as ships or boats.

Boats --- A classification of water-borne craft which comprises generally the water-borne craft suitable primarily for shipboard and similar use.

Active Status --- A status of ships and service craft. Active status ships or service craft are assigned to the active fleets and to their supporting activities. Ships and service craft in active status are "in commission," or "in service."

Inactive Status --- A status of ships and service craft. Inactive status ships and service craft are in reserve and not currently required for duty in the active fleets or supporting forces. Ships and service craft in inactive status are "in commission, in reserve," or "in service, in reserve," or "out of commission, in reserve" or "out of service, in reserve."

Special Status --- A status of ships and service craft. Ships and service craft in special status shall include those units for which the Navy is charged with certain responsibilities by reason of custody or title, but which are not in the active or inactive status. Ships and service craft in special status are "in commission, special" or "in service, special" or "out of commission, special" or "out of service, special."

Vessel --- Includes every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water. (1 USC 3).

Naval Activity --- A unit of the Department of the Navy, of distinct identity, and established under an officer in command or in charge.

Naval Station --- A naval activity on shore, having a commanding officer, and located in an area having fixed boundaries, within which all persons are subject to naval jurisdiction and immediate authority of the commanding officer.

# An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

### Title 3—The President

PROCLAMATION 4201

### Loyalty Day, 1973

*By the President of the United States of America*

#### A Proclamation

The meaning of America is rooted deep in the brains and bones of men and women who once cherished a dream that mankind might live in freedom somehow, somewhere on this earth. The dream became an idea, the idea an ideal, and the ideal a reality here in this land. Brighter than the sun, the meaning of America shines across the world, warming those to whom the dignity of living in liberty is still a dream.

Generations of men and women "who more than self their country loved" have given all that liberty demanded to keep the meaning of America alive, both in our land and in the hearts of others abroad. This willingness to give is the measure of our loyalty—it is reflected in how we live our liberty, and how we love our country.

On this Loyalty Day, let us reaffirm our commitment to the great work which began long ago, but which is still unfinished as our Nation is unfinished—to make whole and perfect the meaning of America: "that all men are created equal, that they are endowed by their Creator with certain inalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness."

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, in accordance with the joint resolution of the Congress of July 18, 1958, do call upon the people of the United States, and upon all patriotic, civic and educational organizations to observe Tuesday, May 1, 1973 as Loyalty Day, with appropriate ceremonies in which all may join.

I call also upon appropriate officials of the Government to display the flag of the United States on all Government buildings on that day as an expression of our loyalty to the Nation symbolized by that flag.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of March, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-seventh.

[FR Doc. 73-5861 Filed 3-23-73; 1:27 p.m.]

## PROCLAMATION 4202

# Modifying Proclamation No. 3279, Relating To Imports of Petroleum And Petroleum Products

*By the President of the United States of America*

## A Proclamation

The Chairman of the Oil Policy Committee, in the exercise of his responsibility to maintain a constant surveillance of imports of petroleum and its primary derivatives in respect to the national security, and after consultation with the Oil Policy Committee, has informed me that, in his opinion, the following circumstance indicates a need for further Presidential action under section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862), as amended, namely:

Petitions now pending before the Oil Import Appeals Board for relief in the form of grants of allocations of imports of crude oil, unfinished oils, and finished products would, if acted upon favorably by the Board, exceed in the aggregate the limits of the maximum levels of imports established in section 2 of Proclamation No. 3279,<sup>1</sup> as amended; and, in order that the Board shall be in position to consider such petitions on their merits, the Board should be empowered, without regard to such maximum levels, to modify, on the grounds of exceptional hardship, any allocation made to any person under regulations issued pursuant to section 3 of Proclamation No. 3279, as amended; to grant allocations of imports of crude oil and unfinished oils in special circumstances to persons with importing histories who do not qualify for allocations under such regulations; and to grant allocations of imports of finished products on the grounds of exceptional hardship to persons who do not qualify for allocations under such regulations.

The Chairman of the Oil Policy Committee, after the consultation referred to and in the light of the circumstance mentioned, has recommended that section 4 of Proclamation No. 3279, as amended, be amended as hereinafter provided.

The Chairman has found that the national security will not be adversely affected by the Presidential action which he has recommended.

I agree with the findings and recommendations of the Chairman and deem it necessary and consistent with the national security objectives of Proclamation No. 3279, as amended, that section 4 of Proclamation No. 3279, as amended, be amended as hereinafter provided.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, acting under and by virtue of the authority

## THE PRESIDENT

vested in me by the Constitution and laws of the United States, including section 232 of the Trade Expansion Act of 1962, do hereby proclaim that, effective as of this date, paragraph (b) of section 4 of Proclamation No. 3279, as amended, is hereby amended to read as follows:

"(b) The Appeals Board may be empowered (1) within the limits of the maximum levels of imports established in section 2 of this proclamation, to modify on the grounds of error any allocation made to any person under such regulations; (2) without regard to the limits of the maximum levels of imports established in section 2 of this proclamation, (i) to modify, on the grounds of exceptional hardship, any allocation made to any person under such regulations; (ii) to grant allocations of imports of crude oil and unfinished oils in special circumstances to persons with importing histories who do not qualify for allocations under such regulations; and (iii) to grant allocations of imports of finished products on the grounds of exceptional hardship to persons who do not qualify for allocations under such regulations; and (3) to review the revocation or suspension of any allocation or license. The Secretary may provide that the Board may take such action on petitions as it deems appropriate and that the decisions by the Appeals Board shall be final."

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of March, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-seventh.

[FR Doc.73-5860 Filed 3-23-73;1:25 p.m.]

## THE PRESIDENT

## EXECUTIVE ORDER 11708

**Placing Certain Positions in Levels IV and V of the Executive Schedule**

By virtue of the authority vested in me by section 5317 of title 5 of the United States Code, as amended, it is ordered as follows:

Section 1. The following offices and positions are placed in level IV of the Executive Schedule:

- (1) Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare.
- (2) Administrator, National Institutes of Health, Department of Health, Education, and Welfare.
- (3) Administrator, Health Services and Mental Health Administration, Department of Health, Education, and Welfare.
- (4) Special Assistant to the Secretary (Congressional Relations), Treasury Department.
- (5) Director, United States Secret Service, Treasury Department.
- (6) Director, Office for Drug Abuse Law Enforcement, Department of Justice.
- (7) Director, Office of National Narcotics Intelligence, Department of Justice.
- (8) Associate Director, Office of Management and Budget, Executive Office of the President.
- (9) Assistant Director, Office of Management and Budget, Executive Office of the President.
- (10) Assistant to the Secretary of Defense, Legislative Affairs, Department of Defense.
- (11) Principal Deputy Director of Defense Research and Engineering, Department of Defense.
- (12) Deputy Under Secretary for International Labor Affairs, Department of Labor.
- (13) Counselor to the Secretary of Labor, Department of Labor.
- (14) Assistant to the Secretary for Policy Development, Department of Commerce.

Sec. 2. The following offices and positions are continued in level V of the Executive Schedule:

- (1) Principal Deputy Assistant Secretary of Defense (Comptroller), Department of Defense.
- (2) Deputy Assistant Secretary of Defense for Reserve Affairs, Department of Defense.
- (3) Assistant Secretary, Comptroller, Department of Health, Education, and Welfare.

## THE PRESIDENT

- (4) Deputy Commissioner of Social Security, Department of Health, Education, and Welfare.
- (5) Commissioner on Aging, Department of Health, Education, and Welfare.
- (6) Deputy Director, United States Secret Service, Treasury Department.
- (7) Commissioner, Property Management and Disposal Service, General Services Administration.
- (8) Deputy Assistant Secretary for Model Cities, Department of Housing and Urban Development.

Sec. 3. Except with respect to the positions enumerated in section 2 of this order, Executive Order No. 11248 of October 10, 1965, as amended, is hereby revoked.

THE WHITE HOUSE,  
March 23, 1973

## Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

**Title 5—Administrative Personnel**  
**CHAPTER I—CIVIL SERVICE COMMISSION**  
**PART 213—EXCEPTED SERVICE**  
**Federal Home Loan Bank Board**

Section 213.3354 is amended to show that one position of Secretary to the Director, Office of Economic Research, and Adviser to the Board is excepted under Schedule C.

Effective on March 27, 1973, § 213.3354 (j) is added as set out below.

**§ 213.3354 Federal Home Loan Bank Board.**

(j) One Secretary to the Director, Office of Economic Research, and Adviser to the Board.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc.73-5780 Filed 2-26-73; 8:45 am]

**PART 213—EXCEPTED SERVICE**  
**Department of Housing and Urban Development**

Section 213.3384 is amended to reflect the following title change: From Private Secretary to the Executive Assistant to the Secretary to Administrative Aide to the Executive Assistant to the Secretary.

Effective on March 27, 1973, § 213.3384 (a) (35) is amended as set out below.

**§ 213.3384 Department of Housing and Urban Development.**

(a) Office of the Secretary. . . .  
(35) One Administrative Aide to the Executive Assistant to the Secretary.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.  
[FR Doc.73-5781 Filed 3-26-73; 8:45 am]

**PART 733—POLITICAL ACTIVITY OF FEDERAL EMPLOYEES**

Residence of Anne Arundel County, Md.

Section 733.124 is amended to include political activity privileges to employee residents of Anne Arundel County, Md. Section 733.124(b) is amended by add-

ing "Anne Arundel County (March 14, 1973)" between "Annapolis (May 16, 1941)" and "Berwyn Heights (June 15, 1944)" under the heading "In Maryland". (5 U.S.C. 1308, 3301, 3302, 7301, 7324, 7325, 7327, 42 U.S.C. 2729, E.O. 10577; 3 CFR, 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,

**Title 6—Economic Stabilization**  
**CHAPTER I—COST OF LIVING COUNCIL**  
**PART 130—COST OF LIVING COUNCIL PHASE III REGULATIONS**  
**Base Period Profit Margin and Weighted Annual Average Price Increase**

The purpose of these amendments to Part 130 of the Cost of Living Council regulations is: (1) To make it clear that the fiscal years which may be used in the calculation of base-period profit margin do not include the fiscal year covered in the reporting period; and (2) to set out the methods to be used in computing weighted annual average price increases under § 130.13.

The Price Commission's regulations in effect on January 10, 1973, defined "base period" to mean any two of a person's last 3 fiscal years ending before August 15, 1971. The Council's Phase III definition of base period adds to the number of fiscal years from which 2 years may be selected "any fiscal year completed on or after" August 15, 1971. Some members of the public have interpreted this provision to permit a firm's most recently completed fiscal year to be included in the calculation of base-period profit margin even if it is the year being measured for compliance. Since this is not the appropriate interpretation, the clarifying words "other than the fiscal year for which compliance is being measured" are being inserted in the definition of "base-period".

Section 130.13 provides as an alternative price rule that a person may increase prices to reflect increased costs by a weighted annual average of 1.5 percent over prices authorized or lawfully in effect on January 10, 1973. The amendment set forth below adds to the definitions in § 130.110 a provision setting out the methods to be used in calculating a weighted annual average price increase for purposes of § 130.13. It also provides, as a matter of accounting convenience,

that a firm may demonstrate compliance with that provision by computing the percentage change in prices over those prevailing during the most recent fiscal quarter ending prior to January 11, 1973.

Because these amendments provide immediate guidance and information for the effective implementation of the Economic Stabilization Program, the Director has found that notice and public procedure thereon is impracticable and good cause exists for making them effective in less than 30 days after publication in the FEDERAL REGISTER.

(Economic Stabilization Act of 1970, title II of Public Law 92-210, 85 Stat. 743, Executive Order No. 11695, Cost of Living Council Order No. 14)

In consideration of the foregoing, § 130.110 of Title 6 of the Code of Federal Regulations is amended as set forth below, effective January 11, 1973.

Issued in Washington, D.C. on March 21, 1973.

JAMES W. McLANE,  
Deputy Director,  
Cost of Living Council.

In 6 CFR 130.110, the definition of "Base period" is amended and a definition of "Weighted annual average" is added in alphabetical sequence as follows:

**§ 130.110 Definitions.**

"Base period" means any two, at the option of the person concerned, of the following fiscal years: That person's last 3 fiscal years ending before August 15, 1971, and any fiscal year, other than the fiscal year for which compliance is being measured, completed on or after that date. In determining a base period for the purpose of computing a profit margin during a base period, a weighted average of its profits during the years chosen shall be used.

"Weighted annual average" for purposes of computing a weighted annual average price increase under § 130.13 means the percentage change in prices over those authorized or lawfully in effect on January 10, 1973. However, a firm may in addition demonstrate compliance on the basis of an alternative figure which reflects the percentage change in prices over those prevailing during the most recent fiscal quarter ending prior to January 11, 1973. A firm may measure price changes on the basis of the change in each individual price, or it may measure by any accepted sampling method,

consistently applied, so long as the firm can demonstrate that the method chosen does not result in a weighted average calculation which is materially different from that produced by a measure of the change in each individual price. A firm may weight its price changes according to the quantity sold during the reporting period, or may weight its price changes according to the quantity sold during the most recent fiscal quarter ending prior to January 11, 1973, provided that it can demonstrate that there has been no material difference in product mix between the two periods. The quantity sold may be represented by the value of the sales to which a price change applies as a proportion of the total sales over which the weighted average is computed.

[FR Doc. 73-5738 Filed 3-26-73; 8:45 am]

#### Title 7—Agriculture

### CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

#### SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

#### PART 1430—DAIRY PRODUCTS Price Support Program for Milk

The U.S. Department of Agriculture has announced a price support program for milk for the remainder of this marketing year and for the marketing year April 1, 1973, through March 31, 1974, through purchases by Commodity Credit Corporation (CCC) of dairy products as provided herein. Accordingly, § 1430.282 is revised to read as follows:

#### § 1430.282 Price support program for milk.

(a) (1) The general levels of prices to producers for milk will be supported from March 15, 1973, through March 31, 1974, at \$5.29 per hundredweight for manufacturing milk.

(2) Price support for milk will be through purchases by CCC of butter, nonfat dry milk, and Cheddar cheese, offered subject to the terms and conditions of purchase announcements issued by the Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture.

(3) Commodity Credit Corporation may, by special announcements, offer to purchase other dairy products to support the price of milk.

(4) Purchase announcements setting forth terms and conditions of purchase may be obtained upon request from:

U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service, Livestock and Dairy Division, Washington, D.C. 20250.

or  
U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service, ASCS Commodity Office, 6400 France Avenue S., Minneapolis, MN 55435.

(b) (1) CCC will consider offers of butter, Cheddar cheese, and nonfat dry milk in bulk containers meeting specifications in the announcements at the following prices.

#### RULES AND REGULATIONS

Commodity and location	Purchased and produced before March 15, 1973	Purchased on or after March 15, 1973
Butter: U.S. Grade A or Higher New York, N.Y., and Jersey City, Newark, and Secaucus, N.J. Seattle, Wash., Wash- ington, San Francisco, Calif., California, Alaska, Hawaii, Ore- gon, Arizona, New Mexico, Texas, Loui- siana, Mississippi, Ala- bama, Georgia, Flori- da, and South Caro- lina.	68.75	62.00
U.S. Grade B: 2 cents per pound less than the price for U.S. Grade A.	67.75	61.00

Produced before March 15, 1973

Commodity and location	Produced before March 15, 1973	Produced on or after March 15, 1973
Cheddar cheese: (Standard moisture basis, 37.8-39.2%) Nonfat dry milk, spray process: 50-pound bags with sealed closures.	54.75	62.00
	31.70	37.50

<sup>1</sup> For cheese which is offered on a "dry" basis (less than 37.8 percent moisture) the price per pound shall be as indicated in Form ASCS-150. Copies are available in offices listed in (a)(4).

<sup>2</sup> If upon inspection Type II bags with stitched bottom and top closures do not fully comply with specifications for such closures, the price paid will be subject to a discount of .25 cent (2 1/2 cents) per pound of nonfat dry milk.

(2) Offers to sell butter at any location not specifically provided for in this section will be considered at the price set forth in this section for the designated market (New York, San Francisco, or Seattle) named by the seller, less 80 percent of the lowest published domestic railroad carlot freight rate per pound gross weight for a 60,000 pound carlot, in effect on March 15, 1973, from such other point to the designated market named by the seller. In the area consisting of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia, CCC will purchase only bulk butter produced in that area; butter produced in other areas is ineligible for offering to CCC in these States.

(c) The butter shall be U.S. Grade B or higher. The nonfat dry milk shall be U.S. Extra Grade, except moisture content shall not exceed 3.5 percent. The Cheddar cheese shall be U.S. Grade A or higher.

(d) The products shall be manufactured in the United States from milk produced in the United States and shall not have been previously owned by CCC.

(e) Purchases will be made in carlot weights specified in the announcements. Grades and weights shall be evidenced by inspection certificates issued by the U.S. Department of Agriculture.

(Sec. 201, 401, 63 Stat. 1052, 1054, as amended; sec. 4(d), 62 Stat. 1070, as

amended; 7 U.S.C. 1446, 1421, 15 U.S.C. 714 b(d).)

Signed at Washington, D.C., on March 19, 1973.

GLENN A. WEIR,  
Acting Executive Vice President,  
Commodity Credit Corporation.

[FR Doc. 73-5661 Filed 3-26-73; 8:45 am]

#### Title 9—Animals and Animal Products

### CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

#### SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

[Docket No. 73-517]

#### PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

##### Release of Areas Quarantined

This amendment excludes portions of Bristol and Plymouth Counties in Massachusetts from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded areas, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded areas. No areas in Massachusetts remain under quarantine.

Pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111-113, 114g, 115, 117, 120, 121, 123-126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

In § 76.2, paragraph (e) (2) relating to the State of Massachusetts is deleted.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111-113, 114g, 115, 117, 120, 121, 123-126, 134b, 134f; 37 FR 28464, 28477)

**Effective date.** The foregoing amendment shall become effective March 22, 1973.

The amendment relieves restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rule making proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it

is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 22d day of March 1973.

G. H. WISE,  
Acting Administrator, Animal and  
Plant Health Inspection Service.  
[FR Doc. 73-5745 Filed 3-26-73; 8:45 am]

#### Title 14—Aeronautics and Space

### CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-EA-3; Amdt. 39-1610]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Garrett Emergency Locator Transmitters

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to issue an airworthiness directive applicable to certain series of Garrett Emergency Locator Transmitters and revoke AD 72-22-3.

Since the promulgation of AD 72-22-3 which was applicable to Piper type airplane installation, it has been determined that the deficiency was common to other airplane installations. The AD also will refine the applicability statement and require eventual installation of the Series 3 or 21 part.

Since the foregoing deficiency exists in other aircraft and still presents the same air safety problem, notice and public procedure hereon are impractical and cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended as follows:

1. By revoking AD 72-22-3.

2. By adding the following new airworthiness directive.

**EMERGENCY LOCATOR TRANSMITTERS—GARRETT RESCU/88 SERIES.** Applies to all Garrett Model Rescu/88 Emergency Locator Transmitters Part No. 627484-1 Series 1, Series 2, Series 1 with the letter "M" after the serial number, Series 1 and Series 2 with the designation "M1" after the serial number; Part No. 627484-3 Series 1, Series 2; Part No. 627484-5 Series 1, Series 2.

**Compliance required as indicated:**  
To prevent hazards with inadvertent activation of the Emergency Locator Transmitter interfering with the aircraft's navigation and communication, accomplish the following:

(a) Before further flight, install on all aircraft incorporating an applicable Garrett Model Rescu/88 Emergency Locator Transmitter, a placard in full view of the pilot which reads: "VOR indications may be affected when the VHF radio is keyed". The placard may be removed when (b) has been accomplished.

(b) Within the next 250 hours' aircraft time in service after the effective date of this AD, remove all affected Garrett Model Rescu/88 Emergency Locator Transmitters from all aircraft so equipped. Replace with Garrett

#### RULES AND REGULATIONS

Rescu/88 part number in accordance with the following table or replace with another TSO-approved unit or an equivalent unit approved by Chief, Engineering and Manufacturing Branch, Eastern Region.

Garrett Rescu/88 Part No.	Replace with Garrett P/N
627484-1 Series 1	627484-1 Series 3 or Series 21.
627484-1 Series 2	
627484-1 Series 1 with the letter "M". After the serial number.	
627484-1 Series 1 with the designation "M1". After the serial number.	
627484-1 Series 2 with the designation "M1". After the serial number.	
627484-3 Series 1 or Series 2	627484-3 Series 3 or Series 21.
627484-5 Series 1 or Series 2	627484-5 Series 3 or Series 21.

**Note:** For Piper aircraft see Piper Service Letter 617A which covers this same subject.

This amendment is effective March 29, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on March 14, 1973.

ROBERT H. STANTON,  
Acting Director, Eastern Region.  
[FR Doc. 73-5645 Filed 3-26-73; 8:45 am]

[Docket No. 72-EA-107; Amdt. 39-1611]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Bendix Aircraft Engine Magnetos

On page 2704 of the FEDERAL REGISTER for January 29, 1973, the Federal Aviation Administration published a proposed airworthiness directive applicable to Bendix (Scintilla) S-20, S-200, S-600, and S-1200 magnetos.

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received. Comments were received, however, which suggested minor changes to the applicability statement so as to refine the serial numbers of affected parts. Several corrections have also been made to parts list designations. The foregoing changes are minor in nature and notice and public procedure thereon are unnecessary.

In view of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697], § 39.13 of the Federal Aviation Regulations is amended hereby and the airworthiness directive adopted as published, except as follows:

1. Delete the applicability statement through "except the following" and insert in lieu thereof:

**BENDIX:** Applies to all Bendix Electrical Components Division of the Bendix Corp. (Bendix Scintilla) S4LN or S4RN, S6LN, or S6RN, and S8LN or S8RN magnetos with series Nos. -20 through -26, -200 through -206, -600 through -604, and -1200 through -1227 except the following:

2. In paragraph d, delete the designations L-223-14 and L-528-5 where they appear and insert in lieu thereof L-223-11 and L-528-3, respectively.

This amendment is effective April 2, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on March 16, 1973.

R. M. BROWN,  
Acting Director, Eastern Region.

**BENDIX ELECTRICAL COMPONENTS DIVISION:**  
Applies to all Bendix Electrical Components Division of the Bendix Corp. (Bendix Scintilla) S4LN or S4RN, S6LN, or S6RN and S8LN or S8RN magnetos with series numbers -20 through -26, -200 through -206, -600 through -604 and -1200 through -1227 except the following:

1. Magnetos identified with the Bendix Blue name plate (Bendix remanufactured magnetos) having serial No. 231001 or higher.

2. Magnetos identified with the Bendix Red name plate (new magnetos) having a serial number with the prefix "A" and No. 16058 or higher.

Compliance required as indicated after the effective date of this A.D. unless previously accomplished.

To prevent failure of these magnetos due to malfunction or failure of the ignition coil or rotating magnet, accomplish the following:

a. On magnetos having 1,800 or less hours in service since new or last overhaul on the effective date of this A.D., accomplish paragraph "d" before accumulation of 2,000 hours in service.

b. On magnetos having more than 1,800 hours in service since new or last overhaul, accomplish paragraph "d" within the next 200 hours service after the effective date of this A.D.

c. Magnetos whose time in service since new or last overhaul is unknown will be assumed to have a total of 1,800 hours minimum and thus fall within the requirements of paragraph (b).

d. Identify magnetos per instructions contained in Bendix Electrical Components Division Service Bulletin No. 560, dated August 1972 or later. Magnetos having ignition coils as described in paragraph A, or rotating magnets as described in paragraph B or shown in figure 2 of Bendix Electrical Components Division's Service Bulletin No. 560, dated August 1972 or later, must have these components removed and replaced with serviceable parts as listed in the applicable Bendix Electrical Components Division Service Parts List, numbered and dated as follows or subsequent:

Magneto model	Parts list designation	Parts list date
S4LN-20 series (ignition coil no. 10-160886 or subsequent).	L-227-9	December 1963.
S6LN-20 series (ignition coil no. 10-160886 or subsequent).	L-223-11	October 1963.
S-200 series (ignition coil no. 10-160887 or subsequent).	L-528-3	October 1963.
S-600 series (magnet rotor only).	L-552-3	December 1964.
S-1200 series	L-608-3	September 1971.

e. Upon completion of paragraph d, identify each magneto as follows:

S-20, S-200, and S-600 series magnetos—Metal stamp 0.010 deep maximum the letter

"A" three-sixteenth inch high, midway and centered between the timing plug boss and the curved surface at the rear of distributor housing.

S-1200 series magnetoe—Metal stamp 0.010 deep maximum the letter "A" three-sixteenth inch high, centered between the timing plug boss and data plate, adjacent to the magnetoe housing rib.

[Airspace Docket No. 73-SW-6]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Designation of Transition Area**

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate the Marshall, Tex., transition area.

On February 7, 1973, a notice of proposed rulemaking was published in the *FEDERAL REGISTER* (38 FR 3525) stating the Federal Aviation Administration proposed to designate a transition area at Marshall, Tex.

Interested persons were afforded an opportunity to participate in the rulemaking through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.M.T., May 24, 1973, as hereinafter set forth.

In § 71.181 (38 FR 435), the following transition area is added:

## **MARSHALL, TEX.**

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Harrison County Airport (latitude 32°31'18" N., longitude 90°18'29" W.) and within 2.5 miles each side of Gregg County VORTAC 075° radial extending from the 5-mile-radius area to 21 miles east of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Fort Worth, Tex., on March 17, 1973.

**R. V. REYNOLDS,**  
Acting Director, Southwest Region.  
[FR Doc 73-5740 Filed 3-26-73; 8:45 am]

## **Title 16—Commercial Practices** **CHAPTER I—FEDERAL TRADE COMMISSION**

[Docket No. 8671]

## **PART 13—PROHIBITED TRADE PRACTICES**

### **Sperry and Hutchinson Co.**

Subpart—Coercing and intimidating: § 13.358 *Distributors*. Subpart—Combining or conspiring: § 13.395 *To control marketing practices and conditions*. Subpart—Cutting off access to customers or market: § 13.595 *Threatening withdrawal of patronage from competitors' customers*. Subpart—Cutting off supplies or service: § 13.655 *Threatening disciplinary action or otherwise*.

## **RULES AND REGULATIONS**

(Sec. 6, 38 Stat. 721; 15 U.S.C. 45. Interprets or applies sec. 5, 38 Stat. 710, as amended; 15 U.S.C. 45) (Cease and desist order. The Sperry and Hutchinson Co., New York, N.Y., Docket No. 8671, Feb. 16, 1973)

### **In the Matter of the Sperry and Hutchinson Co., a Corporation**

Order reaffirming previous Commission order, 73 FTC 1099, as to Counts I and II of the complaint and requiring respondent, among other things to cease setting a maximum number of stamps to be dispensed by its retail licensees in relation to the purchases by such retailers' customers and conspiring with others to enforce its policy of limitation.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

Whereas the Commission petitioned the Supreme Court of the United States for a writ of certiorari to the U.S. Court of Appeals for the Fifth Circuit from its decision adverse to the Commission, and

Whereas the Supreme Court granted said writ and, upon its review of the issues relating to Count III of the complaint, ordered the case remanded to the Commission for such further proceedings as may be appropriate, and

Whereas the case has been remanded to the Commission, and

Whereas the Commission has decided to republish as final the following portions of its order, relating to Counts I and II of the complaint, which were neither challenged by respondent nor judicially reviewed by the courts:

Now therefore, it is ordered, That respondent, The Sperry and Hutchinson Co., its officers, agents, representatives, and employees, directly or through any corporate or other device, in connection with the issuing, distribution, sale, or the redemption of trading stamps in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Putting into effect, maintaining, or enforcing any plan or policy under which contracts, agreements, or understandings are entered into with any retailer which have the purpose or effect of:

(a) Fixing or establishing the maximum number of trading stamps which may be dispensed by retailers to their customers in relation to such customers' purchases of goods or services; and

(b) Requiring, expressly or by implication, or suggesting to or inviting any retailer to dispense trading stamps on a basis not to exceed a specified number of trading stamps in relation to purchases by such retailer's customers of goods or services.

2. Securing adherence to a scheme or policy of foreclosing the dispensing of trading stamps at the retail level in excess of any specified ratio of stamps to goods or services sold, by terminating or threatening to terminate or cancel, or refusing to enter into contractual relationship with, or threatening to refuse to deal with, any retailer, or taking any other affirmative action which goes beyond the mere declination to deal with a customer who will not observe such policy.

3. Combining, conspiring, or otherwise knowingly acting in concert with any other person to cause any retailer to dispense trading stamps in any specified ratio of the number of stamps to goods or services sold.

4. Communicating in any way with any other trading stamp company, or acting in any way in response to any communication from any trading stamp company, with respect to the ratio of the number of trading stamps dispensed in relation to goods or services sold by the retailer.

It is further ordered, That the respondent, within sixty (60) days after the effective date of this order:

(a) Notify in writing all of its sales employees, sales representatives, and licensees of the provisions of this cease and desist order; and

(b) Reform all contracts with retailers or others who dispense S&H green stamps to the public to conform with the provisions of this cease and desist order.

It is further ordered, That respondent, The Sperry and Hutchinson Co., shall, within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

Issued: February 16, 1973.

By the Commission.

## **Title 31—Money and Finance: Treasury** **Subtitle B—Regulations Relating to Money and Finance**

## **CHAPTER V—OFFICE OF FOREIGN ASSETS CONTROL, DEPARTMENT OF THE TREASURY**

## **PART 520—FOREIGN FUNDS CONTROL REGULATIONS**

### **Unblocking of Hungarian Property**

A general license is being issued to remove the remaining World War II controls on blocked Hungarian property in the United States. The controls which heretofore applied under § 520.101 of the Foreign Funds Control Regulations to property of Hungary and of any individual, partnership, association, corporation, or other organization which on January 1, 1945, was in Hungary, are being removed in connection with the Settlement of Claims Agreement between the United States and Hungary signed March 6, 1973. All transactions involving Hungarian property subject to Executive Order 8389 are therefore being licensed by the addition of § 520.103 to the regulations. Section 520.101 is being amended to reflect this change.

Section 520.101 is herewith amended by the deletion of Hungary from paragraphs (a) (1) and by redesignating subparagraphs (3), (4), and (5) as subparagraphs (2), (3), and (4).

As amended, § 520.101 reads as follows:

## **§ 520.101 General License No. 101.**

(a) A general license is hereby granted licensing all property now blocked under the order to be regarded as property in which no blocked country or national thereof has, or has had, any interest: *Provided, however*, That the license granted by this paragraph shall not apply to any property blocked by reason of the interest on or since the effective date of the order of any of the following:

(1) Czechoslovakia, Estonia, Latvia, Lithuania, and Germany (except for any interest of Germany now owned by the Federal Republic of Germany, the city of Berlin (Western Sectors) or the Saar);

(2) Any individual, partnership, association, corporation, or other organization which on December 7, 1945, was in Czechoslovakia, Estonia, Latvia, or Lithuania;

(3) Any individual, partnership, association, corporation, or other organization which on December 31, 1945, was in any of the areas of Germany under control or administration of the Union of Soviet Socialist Republics; or

(4) Any other partnership, association, corporation, or other organization which was a national of any country designated in subparagraph (1) of this paragraph by reason of the interest therein of any such country or by reason of the interest therein of any individual, partnership, association, corporation, or other organization specified in subparagraph (2) or (3) of this paragraph.

(b) Nothing in this section shall be deemed to apply to any property subject to §§ 520.205 and 520.205b (General Ruling Nos. 5 and 5B), relating to foreign and domestic scheduled securities.

(c) Nothing in this section shall be deemed to apply (1) to any property or interest title to which is vested in the Attorney General, or as to which an outstanding supervisory order has been issued by the Attorney General or the Alien Property Custodian or the Office of Alien Property Custodian, or (2) to any business enterprise or its property as to which the Attorney General or the Alien Property Custodian or the Office of Alien Property Custodian has issued an outstanding supervisory order, or which has been vested or assets of or interests in which have been vested.

Section 520.103 is hereby added to the regulations.

## **§ 520.103 Unblocking of Hungarian Property.**

A general license is hereby granted licensing the following property blocked under Executive Order 8389, as amended, to be regarded as property in which no blocked country or national thereof has, or has had, any interest:

(a) All property blocked by reason of the interest on or since March 13, 1941, of Hungary or of any individual, partnership, association, corporation, or other organization which on January 1, 1945, was in Hungary.

## **RULES AND REGULATIONS**

These amendments take effect March 27, 1973.

(Sec. 5, 40 Stat. 415, as amended (50 U.S.C. App. 5); E.O. 8389, 5 FR 1400, as amended by E.O. 8785, 6 FR 2897; E.O. 8832, 6 FR 3715; E.O. 8963, 6 FR 6348; E.O. 8998, 6 FR 6785; E.O. 9193, 7 FR 5205; 3 CFR 1943 Cum. ## **Title 37—Patents, Trademarks, and Copyrights** **CHAPTER I—PATENT OFFICE, DEPARTMENT OF COMMERCE**

## **PART 2—RULES OF PRACTICE IN TRADEMARK CASES**

### **Abandonment of Application**

A proposal was published at 37 FR 18391 to revise § 2.68. Full consideration has been given to all comments received pursuant to this notice and changes in the text of the original proposal have been made in view thereof.

The revision of § 2.68 permits an attorney or other person representing the applicant to abandon or withdraw an application. Prior to this revision, the applicant was required to sign the statement of abandonment. The rule is further revised by the addition of a sentence which indicates that in a Patent Office proceeding, abandonment of the application does not affect any rights which the applicant may have in the mark. The word "withdrawal" which has been added to the rule is synonymous with the word "abandonment" in the context of this rule and may be used by those who prefer to do so.

*Effective date.* This revision shall become effective on March 27, 1973.

Part 2 of Chapter I of Title 37 of the Code of Federal Regulations is amended by revising § 2.68 to read as follows:

**§ 2.68 Express abandonment (withdrawal) of application.**

An application may be expressly abandoned by filing in the Patent Office a written statement of abandonment or withdrawal of the application signed by the applicant, or the attorney or other person representing the applicant. The fact that an application has been expressly abandoned shall not, in any proceeding in the Patent Office, affect any rights that the applicant may have in the mark which is the subject of the abandoned application.

Dated: March 15, 1973.

**ROBERT GOTTSCHALK,**  
Commissioner of Patents.

Approved:  
**RICHARD O. SIMPSON,**  
Acting Assistant Secretary for  
Science and Technology.

## **Title 40—Protection of Environment**

## **CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY**

## **SUBCHAPTER E—PESTICIDE PROGRAMS**

## **PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES**

### **Aluminum Phosphide**

A petition (PP 2F1184) was filed by TRW/Hazleton Laboratories, 9200 Leesburg Pike, Vienna, VA 22180, on behalf of Phostoxin Sales, Inc., 2221 Poplar Boulevard, Alhambra, CA 91802 (formerly Hollywood Termite Control Co.), in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing that § 180.225 *Aluminum phosphide; tolerances for residues* be revised to provide for the fumigation of all nonperishable raw agricultural commodities by establishing a tolerance at 0.1 part per million for residues of phosphine from use of aluminum phosphide.

Because certain additional data are needed before a tolerance can be established on all nonperishable raw agricultural commodities, only the use of aluminum phosphide on sunflower seed is considered in this order.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The pesticide is useful for the purpose for which the tolerance is being established.

2. The proposed usage on sunflower seed is not reasonably expected to result in residues of the pesticide in eggs, meat, milk, and poultry. The usage is classified in the category specified in § 180.6 (a) (3).

3. The tolerance established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d) (2), 68 Stat. 512; 21 U.S.C. 346a(d) (2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.225 *Aluminum phosphide; tolerances for residues* is revised by alphabetically inserting the item "sunflower seed" in the list of raw agricultural commodities.

Any person who will be adversely affected by the foregoing order may at any time on or before April 26, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will

## RULES AND REGULATIONS

be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

**Effective date.** This order shall become effective on March 27, 1973.

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: March 22, 1973.

HENRY J. KORP,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5801 Filed 3-26-73; 8:45 am]

#### PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

##### Dimethoate

A petition (PP 3F1301) was filed by American Cyanamid Co., Post Office Box 400, Princeton, NJ 08540, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of a tolerance for combined residues of the insecticide dimethoate (O,O-dimethyl S-(N-methylcarbamoylmethyl) phosphorodithioate) including its oxygen analog O,O-dimethyl S-(N-methylcarbamoylmethyl) phosphorothioate in or on the raw agricultural commodity grapes at 1 part per million.

Based on consideration given the data submitted in the petition and other relevant material, it is concluded that:

1. The insecticide is useful for the purpose for which the tolerance is being established.
2. There is no reasonable expectation that the combined residues from this use and other uses for which dimethoate tolerances have been established will exceed the established tolerances on eggs, meat, milk, or poultry and § 180.6(a)(2) applies.
3. The tolerance established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.204 is amended by revising the paragraph "1 part per million \* \* \*", as follows:

§ 180.204 Dimethoate including its oxygen analog; tolerances for residues.

1 part per million in or on grapes and melons.

Any person who will be adversely affected by the foregoing order may at any time on or before April 26, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections

thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

**Effective date.** This order shall become effective on March 27, 1973.

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: March 22, 1973.

HENRY J. KORP,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5802 Filed 3-26-73; 8:45 am]

#### PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

##### Endosulfan

A petition (PP 3F1314) was filed by FMC Corp., 100 Niagara Street, Middletown, NY 14105, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of tolerances for combined residues of the insecticide endosulfan (6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3-oxide) and its metabolite endosulfan sulfate (6,7,8,9,10,10-hexachloro-1,5,5a,6,9,9a-hexahydro-6,9-methano-2,4,3-benzodioxathiepin-3,3-dioxide) in or on the raw agricultural commodities almond hulls at 1 part per million and almonds at 0.2 part per million (negligible residue).

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The insecticide is useful for the purpose for which the tolerances are being established.
2. Established tolerances for residues in meat and milk are adequate to cover additional residues resulting from the proposed use.
3. There is no reasonable expectation of residues in eggs and poultry and § 180.6(a)(3) applies to these commodities.
4. The tolerances established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.182 is amended by revising the paragraphs "1 part per million \* \* \*" and "0.2 part per million (negligible residue) \* \* \*", as follows:

#### § 180.182 Endosulfan; tolerances for residues.

1 part per million in or on alfalfa hay, almond hulls, and cottonseed.

0.2 part per million (negligible residue) in or on almonds; filberts; macadamia nuts; pecans; potatoes; safflower seed; straw of barley, oats, rye, and wheat; and walnuts.

Any person who will be adversely affected by the foregoing order may at any time on or before April 26, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

**Effective date.** This order shall become effective on March 27, 1973.

(Sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2))

Dated: March 22, 1973.

HENRY J. KORP,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5803 Filed 3-26-73; 8:45 am]

#### PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

##### Methomyl

In response to a petition (PP 3E1303) submitted by Dr. C. C. Compton, Coordinator, Interregional Research Project No. 4, State Agricultural Experiment Station, Rutgers University, New Brunswick, N.J. 08903, on behalf of the IR-4 Technical Committee and the Agricultural Experiment Stations of Indiana and Oregon, a notice was published by the Environmental Protection Agency in the FEDERAL REGISTER of December 16, 1972 (37 FR 26836), proposing establishment of a tolerance for residues of the insecticide methomyl (S-methyl N-[methylcarbamoyl]oxythioacetimidate) in or on the raw agricultural commodity mint hay at 2 parts per million. No comments or requests for referral to an advisory committee were received.

It is concluded that the proposal should be adopted.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental

Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.253 is amended by revising the paragraph "2 parts per million \* \* \*", as follows:

#### § 180.253 Methomyl; tolerances for residues.

2 parts per million in or on beans (succulent), grapefruit, lemons, mint hay, oranges, and tangerines.

Any person who will be adversely affected by the foregoing order may at any time on or before April 26, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

**Effective date.** This order shall become effective on March 27, 1973.

## RULES AND REGULATIONS

(Sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e))  
Dated: March 22, 1973.

HENRY J. KORP,  
Deputy Assistant Administrator  
for Pesticide Programs.

#### Title 50—Wildlife and Fisheries

#### CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

#### PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

##### Incidental Catch; Definition

On December 21, 1972, regulations were promulgated establishing a new Part 216 (37 FR 28177). The new part set forth interim regulations to implement the Marine Mammal Protection Act of 1972 (Public Law 92-522) relating to the taking and importing of marine mammals and marine mammal products. These regulations constituted interim regulations; however, provision was made for the submission of written comments on the interim regulations to the Director, National Marine Fisheries Service, during the period ending February 21, 1973, proposed final regulations on the matters covered by the interim regulations are being prepared taking into account the comments received during that period.

However, it has been brought to the attention of the Director, National Ma-

rine Fisheries Service, that some tuna vessels may be utilizing a system for catching fish which involves the securing of a radio transmitting device to porpoises, then releasing the animals and tracking them to locate schools of porpoise and associated tuna. In order to prevent the continuation of the practice, the following revision of § 216.2(e) is adopted. In view of the exigencies of the situation, this revision shall become effective Monday, April 2, 1973.

The interim regulations are revised by amending the definition of "incidental catch" in § 216.2(e) to read as follows:

#### § 216.2 Definitions.

(e) "Incidental catch" shall mean the taking of a marine mammal (1) because its is directly interfering with commercial fishing operations, or (2) as a consequence of the steps used to secure the fish in connection with commercial fishing operations: *Provided, however*, That the taking of a marine mammal which otherwise meets the requirements of this definition shall not be considered an incidental catch of that mammal if it is used subsequently to assist in commercial fishing operations.

Issued at Washington, D.C. and dated March 22, 1973.

ROBERT W. SCHONING,  
Acting Director, National Marine  
Fisheries Service.

## Proposed Rule Making

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

### DEPARTMENT OF AGRICULTURE

#### Agricultural Marketing Service

[7 CFR Ch. IX]

[Docket No. AO-375]

#### IRISH POTATOES GROWN IN RED RIVER VALLEY OF NORTH DAKOTA AND MINNESOTA

##### Notice of Recommended Decision and Opportunity To File Written Exceptions With Respect to Proposed Marketing Agreement and Order

This document recommends adoption of a marketing agreement and order program for potatoes grown in the Red River Valley to authorize regulation of the grade and quality of potatoes shipped to fresh market outlets. The order as recommended reflects minor changes in the proposal appearing in the notice of hearing to conform with the hearing record.

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to a proposed marketing agreement and order to authorize regulation of the handling of Irish potatoes grown in the Red River Valley of North Dakota and Minnesota. Any marketing agreement and order (hereinafter referred to collectively as the "marketing order") which may result from this proceeding will be effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U.S.C. 601-674) hereinafter referred to as the "act."

Interested persons may file written exceptions to the recommended decision with the Hearing Clerk, Room 112-A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than the close of business on April 9, 1973. Exceptions should be filed in quadruplicate. All such communications will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

**Preliminary statement.** This proposed order was formulated on the record of a public hearing held at Grand Forks, N. Dak., November 29-30, 1972. Notice of the hearing was published in the October 26, 1972, issue of the FEDERAL REGISTER (37 FR 22878). Such notice set forth a proposed marketing order submitted by the Red River Valley Potato Growers Association on behalf of potato

producers in the proposed production area.

**Material issues.** The material issues presented on the record of the hearing are as follows:

- (1) The existence of the right to exercise Federal jurisdiction;
- (2) The need for the proposed regulatory program to effectuate the declared purposes of the act;
- (3) The definition of the commodity and determination of the production area to be covered by the proposed order;
- (4) The identity of the persons and the marketing transactions to be regulated; and
- (5) The specific terms and provisions of the proposed marketing order, including:

- (a) The definition of terms used therein which are necessary and incidental to attain the declared objectives of the act;
- (b) The establishment, maintenance, composition, powers, and duties of a committee which shall be the local administrative agency for assisting the Secretary in the administration of the program;
- (c) The authority to incur expenses and to levy assessments on potatoes handled;
- (d) The method of regulating the handling of Irish potatoes grown in the production area;
- (e) The authority for establishing special regulations applicable to the handling of potatoes for special purposes or to specified outlets, including modifications of grade, quality, or other regulations;
- (f) The authority for the inspection and certification of potatoes handled pursuant to the proposed marketing order;
- (g) The establishment of requirements for reporting and record keeping by handlers;
- (h) The requirement of compliance with all provisions of the marketing order and with regulations issued pursuant thereto; and
- (i) Additional terms and conditions of miscellaneous provisions which are common to marketing agreements and orders.

**Findings and conclusions.** The findings and conclusions on the material issues, all of which are based upon the evidence presented at the hearing and the record thereof, are as follows:

- (1) The Red River Valley of North Dakota and Minnesota is one of the most important potato producing areas in the United States, accounting in recent years for about 10 percent of the U.S. annual

production. The Valley is comprised of 22 counties, 11 of which are in North Dakota and 11 in Minnesota. Potatoes are produced in each of these counties. On the basis of the 1969 agricultural census, these 22 counties accounted for 88 percent of the 29.2 million hundredweight total potato production of these two States. In North Dakota, the Red River Valley portion accounted for 99 percent of the State's potato production, and in Minnesota the Valley accounted for 70 percent.

A small amount of Red River Valley potatoes are consumed locally, but most of the potato crop grown in this production area is for shipment outside of the production area to destinations within these two States and in interstate commerce.

Most shipments of North Dakota and Minnesota potatoes to fresh market outlets are destined to markets south of the Great Lakes and between the Rocky Mountains and the Appalachians. However, some production area potatoes are shipped to the east and west coasts.

Carlot unloads of North Dakota and Minnesota potatoes were reported in 36 of the 41 major cities covered in the 1971 report of Fresh Fruit and Vegetable Unloads by the U.S. Department of Agriculture. The leading cities receiving such potatoes in 1971 were Chicago, Minneapolis, St. Louis, New Orleans, Kansas City, Memphis, and Cincinnati. Also, potatoes from both States were exported to Canada.

Growers and handlers of Red River Valley potatoes maintain close contact with receiving markets outside the production area by modern methods of communication. Exchange of information between shipping point sellers and terminal market receivers as to supplies and demand is a basis for determining price levels. Potato prices and supplies in any one location are promptly known elsewhere and have a direct effect on potato prices in all other locations.

Sales are made on a delivered basis at the receiving markets as well as f.o.b. at shipping points. In some instances handlers consign potatoes to receiving markets for arrival sales.

It is therefore apparent that potatoes produced in the Red River Valley of North Dakota and Minnesota are marketed within the States in which they are produced and in many other States, as well as in Canada. Clearly, shipments of such potatoes, either within the States or to points outside the States in which produced, either enter, or have an effect upon, interstate commerce.

### PROPOSED RULE MAKING

It is hereby found and determined that all sales of potatoes grown in the production area which are destined for distribution outside of such production area and all transportation of such potatoes from points within the production area to points outside of such production area are in the current of interstate or foreign commerce, or directly burden, obstruct, or affect such commerce. It is concluded, therefore, that the right to exercise Federal jurisdiction with respect to the marketing order for Red River Valley potatoes, hereinafter set forth, is established.

(2) Potatoes have been grown commercially in the Red River Valley since the early 1920's, when adequate transportation became available. The valley's potatoes are produced primarily without irrigation, and the seeding rate per acre is kept low in order to achieve desirable size. For this reason yields in the valley average only 140 hundredweight per acre, well below the yield in most other potato producing areas.

As in most specialized potato growing areas, the number of farms has dropped sharply. According to the 1969 Census of Agriculture, there were 618 farms reporting potato production in the 11 counties on the North Dakota side of the Red River Valley, compared with 1,095 farms reporting in the 1964 Census (Exhibit No. 4). On the Minnesota side, there were 553 farms reporting potato production in 1969 compared with 1,076 in 1964.

Harvesting generally occurs from the 1st of September through mid-October, with danger of frost at any time during this period. Potato harvesting proceeds at a rather brisk pace. As a result, mechanical damage in the form of bruising is a major problem. Approximately 90 percent of the crop is stored for marketing over an 8- to 10-month period. Most of the storage facilities are modern, above ground, and well ventilated.

Red River Valley potatoes are marketed in three main outlets: Certified seed, processing (including potato chips, frozen, dehydrated, and canned products), and the fresh market. The proposed marketing order would apply only to potatoes for the fresh market. The bulk of such fresh market potatoes are of the red varieties, although other varieties also are sold for fresh utilization. About 85 to 90 percent of the potatoes destined for fresh market go to packinghouses (wash plants) in the production area for washing, grading, sorting, sizing, and packaging, prior to being transported to markets. The remaining 10 to 15 percent are shipped as dry, bulk loads to operators of wash plants and other distributors outside the production area and closer to terminal markets who, for the most part, wash, grade, sort, size, and package the potatoes for distribution to retail stores and institutional outlets.

Growers sell potatoes by several methods. Some growers grade and package their potatoes and sell them direct to wholesalers or retailers. Others sell through cooperative associations which provide various marketing services, and still others sell their potatoes through brokerage or sales houses located within or outside the production area.

At the present time there are no compulsory minimum quality requirements for shipments of Red River Valley potatoes to the fresh market. Such shipments also are not required to be inspected by an impartial inspection service. Although most packages of potatoes carry a label which may indicate the quality of the commodity therein, there is no assurance that the uninspected potatoes meet the standards of the grade or other indication of quality which may be marked on the containers.

Record evidence indicated that as a result of this situation, prices received for Red River Valley potatoes have been below the prices received by growers in other areas where coordinated marketing programs regulate the quality of potatoes marketed.

During the 1960-70 period, season average farm prices received by growers in North Dakota, which are representative of Red River Valley prices, were much below the parity level in all but 1 year. The average for the 11-year period was \$1.48 per hundredweight which was only 55 percent of parity.

The cost of production in 1972 on a 700-acre farm with 200 acres planted to potatoes was estimated at \$2.06 per hundredweight, nearly double the estimated cost in 1963 and moderately above the average return in recent years when prices were relatively low.

In addition to the lower prices received, according to record evidence the price spread on a given day for potatoes marked with the same grade and size was much greater than could be explained by variations within such grade and size tolerances. There is normally some variance in price due to quality, sizing, and condition of potatoes. But witnesses testified to the effect that price differentials of 50 to 60 cents per hundredweight for the same grade and size of potatoes have been common for this area and are an indication that some shippers were not correctly labeling their potatoes.

Without minimum quality regulations and mandatory inspection, it has been possible for some grower-handlers to offer and sell potatoes of poor quality at low prices, thereby having a detrimental effect upon the market and the price structure for all Red River Valley potatoes. Such disorderly marketing practices have afforded buyers additional price leverage and were damaging to all shippers, even though only a small quantity of the lower quality or inadequately identified potatoes were actually shipped.

It is illogical for producers in the Red River Valley to allow these disorderly marketing practices to continue while, at the same time, expending funds for promotion of their potatoes.

Buyers' and consumers' preferences for potatoes do not suddenly shift from potatoes produced in one area to those of another area. They become accustomed to using potatoes from one area and will continue to do so as long as that area can supply them with potatoes of a quality and price satisfactory to them and in line with those from other areas. If, however, the area fails to supply potatoes which satisfy, customers will shift their allegiance.

The future of the Red River Valley's position in the fresh potato market was indicated by the record to be dependent upon improving the quality of the potatoes marketed and that the best method of achieving this would be to have mandatory minimum quality regulations and inspection.

The establishment of more orderly marketing conditions as may be brought about by the proposed marketing order would tend to establish parity prices to producers of potatoes grown in the production area.

In view of the foregoing, it is concluded that there is a need for a marketing order program to regulate the quality of potatoes grown in the Red River Valley which are destined for fresh market outlets.

(3) A definition of the agricultural commodity to be regulated under the proposed marketing order is necessary to distinguish it from other agricultural commodities. The agricultural commodity grown in the production area and scientifically known as "Solanum tuberosum" is commonly known in the production area and in receiving markets outside the production area as "potatoes," or "Irish potatoes." Such definition should include all types and varieties of potatoes produced in the production area. The types would include round red, round white, long white and long russet types. The leading varieties are Red Pontiac, Red La Soda, La Rouge, Kennebec, Norgold and Russet Burbank, but other varieties are produced or may be introduced in the future.

"Production area" is defined so as to fix the area in which potatoes subject to regulation under the proposed marketing order are grown. Such area includes all territory within the boundaries of the counties of Towner, Ramsey, Cavalier, Pembina, Walsh, Grand Forks, Nelson, Steele, Traill, Cass, and Richland in the State of North Dakota, and of Kittson, Marshall, Polk, Pennington, Red Lake, Norman, Mahanomen, Clay, Becker, Wilkin, and Otter Tail in the State of Minnesota, which geographic area is commonly referred to as the Red River Valley.

The Red River Valley, comprised of the above-named counties, is one of the important potato producing areas within the United States. Its boundaries are distinct, well delineated, and well known by producers and handlers within the valley as well as by potato handlers from outside the area. The 11 counties constituting the North Dakota portion of the production area are grouped along the eastern border of North Dakota, and the 11 counties constituting the remainder of the production area are located along the northern part of the western border of Minnesota. The Red River of the North runs between the two groups of counties, drains the valley and gives the

area the chief identification for its common name.

All boundaries of the Red River Valley are based on county lines which provide a practical basis for establishment of the production area inasmuch as these boundaries do not pass through any major potato producing sections. Therefore, the possibility of confusion or difficulty in administration of a potato marketing order program for this production area because of potatoes being grown close to or on both sides of the boundary lines is minimized.

The same varieties of potatoes are grown in the Minnesota and North Dakota portions of the proposed production area and the markets for both portions are the same. To exclude any portion of the production area would tend to defeat the purpose of the proposed marketing order in that poor quality potatoes from such an excluded section could then be marketed free from regulations and thereby depress the prices of regulated potatoes.

The territory included within the boundaries of the production area constitutes the smallest regional production area that is practicable for carrying out the objectives of the proposed marketing order.

(4) The term "handler" is synonymous with the term "shipper." It should be defined in the marketing order to identify the persons who would be subject to regulation under the marketing order. Any person engaged in the act or acts of handling potatoes grown in the production area, as well as any person who causes such potatoes to be handled, is a handler. Obligation are placed on such persons for meeting regulatory, assessment and reporting requirements of the marketing order.

Any person is a handler who: (1) Sells or transports production area potatoes between the production area and any point outside thereof, or causes such sale or transportation; or (2) handles production area potatoes that are moved out of the production area under a Special Purpose Certificate. More than one handler may be involved in the handling of a given lot of potatoes and each such person should be responsible for complying with the terms of the marketing order.

Common or contract carriers transporting potatoes which are owned by another person are performing a handling activity or function, inasmuch as they are transporting potatoes. However, such handling should not be regulated under the marketing order because such carriers are not responsible for the grade and quality of the potatoes being transported, nor are they responsible for the introduction of such potatoes into commerce. The interest of common or contract carriers in such potatoes is to transport them for a service charge to destinations selected by others. The responsibility for the grade and quality of such potatoes delivered to a common or contract carrier, with the consequent effect of such sale or transportation upon the market for potatoes and the price of

such potatoes to growers, should be borne solely by the person or persons responsible for delivering such potatoes to the carrier or by the person who causes such potatoes to be delivered to such carrier.

The term "handle" is synonymous with "ship" and is defined in the proposed marketing order to establish the marketing functions which are primarily responsible for placing production area potatoes in the current of commerce between the production area and points outside thereof.

A small quantity of Red River Valley potatoes are sold or moved out of the production area into fresh market channels with only a limited amount of preparation for market. Usually such potatoes are partially graded to eliminate the smallest sizes and those with serious quality defects. Although these potatoes may be packed in various types of containers, they are not washed and are seldom inspected to certify the composition of the lot. This type of handling is more common during harvest with the partial grading and packaging occurring in the field immediately after digging, although some growers may sell ungraded potatoes out of their storages directly into fresh market channels.

The major portion of production area potatoes utilized in the fresh market are run over grading machinery for washing, separating into grades and sizes, and placing in appropriate containers. About 85 to 90 percent of the Valley's fresh market potatoes are washed, graded and packaged in wash plants located in the production area. Such potatoes are then sold for movement to markets outside the production area and transported to such markets.

The record shows that from 10 to 15 percent of the production area potatoes which are marketed as washed, graded, and packaged potatoes are so prepared for marketing in wash plants located outside the production area and closer to major population centers, in cities such as Chicago, New Orleans, and Burlington, Iowa. Red River Valley potatoes are shipped ungraded and in bulk to these plants wherein the potatoes are washed, separated into grades and sizes, and placed into appropriate containers. The prepared potatoes are then sold and transported to wholesale distributors, retail stores, or institutional outlets.

The sale or transportation of Red River Valley potatoes from the production area to any point outside thereof—regardless of the degree of preparation for market performed on such potatoes prior to such sale or transportation—has a direct effect upon the potato market and the prices received by growers for such potatoes. The acts of the person making such sales or causing such sales to be made, or the person who transports or who causes the transporting of potatoes to market, constitute handling of such potatoes.

Record evidence indicate that the definition of "handle" should include the shipment of ungraded potatoes in bulk to wash plants outside the production area for preparation for market. As

shown heretofore, a significant portion of production area fresh market potatoes are so handled. It is a long-established practice in the marketing of Red River Valley potatoes, and the equity interests of persons who so market such potatoes would be properly served by permitting the practice to continue under the marketing order. The committee should be well acquainted with the location and facilities of wash plants receiving such potatoes. The evidence indicates that safeguards can be developed for handling such potatoes. Therefore, production area potatoes should be permitted to be shipped, unwashed and in bulk, to such wash plants to be prepared for market, if they are handled as special purpose shipments under safeguards upon recommendation of the committee and approval of the Secretary.

In handling ungraded potatoes that are moved out of the production area in bulk to wash plants to be prepared for market, it should be the responsibility of the person who handles them to maintain their identity until they have complied with the regulations in effect under the proposed marketing order.

The definition of "handle" should not include the activities of a producer in his capacity as a producer, such as production and harvesting functions. However, the sale or transportation of production area potatoes to destinations outside the production area by the producer would be a handling function. Also, inasmuch as nearly all production area potatoes destined for fresh market use are shipped out of the production area, the record indicates that it would serve no useful purpose to regulate under the proposed marketing order any potatoes sold or transported within the production area. Hence, the definition of handle, as provided in the notice of hearing, should be modified accordingly.

(5) (a) Certain terms and provisions of the proposed marketing order should be defined and explained for the purpose of designating specifically their applicability and establishing appropriate limitations on their respective meanings whenever they are used.

"Secretary" should be defined to include not only the Secretary of Agriculture of the United States, the official charged by law with the responsibility for programs of this nature, but also, in order to recognize the fact that it is physically impossible for him to perform personally all functions and duties imposed upon him by law, any other officer or employee of the U.S. Department of Agriculture who is, or who may hereafter be, authorized to act in his stead.

The definition of "Act" provides the correct legal citations for the statute pursuant to which the proposed regulatory program would be operative and avoids the need for referring to these citations throughout the marketing order.

The definition of "person" follows the definition of that term as set forth in the act, and will insure that it will have the same meaning as it has in the act.

The term "producer" as used in the proposed marketing order provides the

basis for determining eligibility for voting in nominations and other procedures relating to the qualifications of membership on the Red River Valley Potato Committee. "Producer" should mean any person engaged in a proprietary capacity in the production of potatoes for market.

The "fiscal period" is the basis for accounting and general record keeping purposes. It is proposed that the fiscal period begin on August 1 of each year, and end on July 31 of the following year. These dates are proposed so that the fiscal period will start prior to but as close to the beginning of the marketing season as possible so that a minimum of expense will be incurred before the marketing season and all past business may be brought up to date. Shipments of new crop potatoes generally begin in September and continue to the following July. If this proposal is initiated, the first fiscal period will begin on the effective date of the marketing order and conclude on July 31, after which the normal period of August 1 to July 31 will constitute the fiscal period. But due to the possible development of new storage techniques or changes in program operations, it would be appropriate to include authority to permit changing the beginning and ending dates of the fiscal period by the Secretary upon recommendation of the committee.

"Grading" is usually a physical operation whereby potatoes are carried by a mechanical conveyor over a series of moving belts, revolving rollers, or tables upon which the potatoes are sorted into various sizes and qualities. This grading or preparation for market is an operation which is applied to most potatoes grown in the production area which are sold or transported to fresh market, even though the extent to which the potatoes are sorted may vary considerably according to the type of outlet. Some of the usual or typical classifications are U.S. No. 1, U.S. Commercial, or U.S. No. 2 grade in combination which a size designation such as 2-inch minimum, Size A, or 2-inch minimum 3½ inches maximum, and similar designations of value attributes based on commonly accepted measures of potato characteristics. A definition of "grading" or "preparing for market," based on the foregoing should be set forth in the proposed marketing order. Such definition should mean the sorting or preparation of potatoes into grades and sizes by any means, including any repacking, regrading, or resorting of potatoes which may have been previously prepared for market. The term "rough grading" as used herein means that the potatoes are partially prepared for market by the removal of some potatoes which are seriously damaged or which are of a size that is obviously unsuitable for fresh market use.

The definition of "grade" is incorporated in the proposed marketing order to enable all persons affected thereby to determine the requirements thereof and to interpret the regulations issued. Grade is defined as including the meanings assigned to such term in the official standards for potatoes issued by the U.S. Department of Agriculture and in the

standards for potatoes issued by the State in which potatoes are first shipped; in modifications or amendments of such standards, and in variations of such standards by regulations under the proposed marketing order. Regulations under such marketing order can then use such terms with the constant meanings assigned thereto in such standards or in such modified or amended standards, or such regulations can vary such terms by prescribing, for example, a percentage of a grade, as may be required at the time of issuing a regulation.

Inspectors of the Federal or Federal-State Inspection Service are qualified to certify the grade of potatoes grown in the proposed production area, in terms of any of the aforesaid standards, or modifications, amendments, or variations thereof.

The term "varieties" is included in the proposed marketing order so that the committee may recognize the real differences in the characteristics of different varieties and differences in types of regulations which might be considered and recommended therefor. The great bulk of potatoes now being produced in the proposed production area fall within the general group known as red or red skinned varieties. However, round white varieties, russets, and other classifications which may come into importance in the future, such as long whites, are also grown. Differences by groups of varieties should be recognized by the committee in their deliberations, and the proposed marketing order should authorize different regulations for different varieties. The meaning set forth in the definition of "varieties" is appropriate for determining different varieties of potatoes grown in the production area.

The definition of "seed potatoes" is desirable to distinguish between potatoes which are handled for table use and those which are handled for seed, so that individual and separate treatment may be given to seed potatoes under the proposed marketing order. The terms "seed potatoes" and "seed" should be considered synonymous for the administration of the marketing order. Only potatoes which have been officially certified by the Official State Seed Certification Agencies of the States of Minnesota or North Dakota and identified as such for use as seed shall be considered seed potatoes.

The term "pack" is commonly used throughout the production area by the Red River Valley potato industry. It refers to one or more of the combinations of factors relating to the grade, size, and weight of the potatoes in particular containers. Differences in pack are also recognized by the size of the package. For example, potatoes in 10-pound bags are referred to as a 10-pound pack. A pack of U.S. No. 1 Reds, 2 to 3 inches, would use grade, variety, and size factors. Pack should be defined as a basis for distinguishing the various sizes of shipping units in which potatoes are packaged as well as the contents of the packages in

terms of the quantity of potatoes and the grade and size thereof.

"Container" should be defined as set forth in the proposed marketing order to provide a basis for differentiating among the numerous shipping units in which potatoes move to market, and the permissible application of different regulations to different units. The principal containers used at present in marketing potatoes are burlap sacks, paper bags, mesh bags, polyethylene bags, cartons, and bulk loads, but other receptacles may be used.

The definition of "committee" is incorporated in the marketing order to identify the administrative agency, as authorized by the act, responsible for administration of the program. The term "Red River Valley Potato Committee" is a proper identification of the agency and reflects the character thereof.

"District" should be defined in the marketing order as referring to each of the geographical sections or divisions of the production area, either as initially established or as later reestablished, in order to provide a basis for the nomination and selection of committee members and for regulatory purposes. The proposed division into districts is adequate and equitable from the standpoint of the present situation and should provide a practical basis for the purposes intended.

The definition of "export" is incorporated in the marketing order so that different regulations may be authorized for export shipments than for domestic shipments. Export markets may have requirements which differ from those of the domestic market and special regulations for certain export shipments would be justified as such shipments would remove potatoes from competition in the domestic market. "Export" should be defined as shipments of potatoes outside the continental United States.

(b) The proposed marketing order should provide for the selection by the Secretary of a local administrative committee as provided by the act. This committee should have the responsibility for local administration of the proposed marketing order. The act provides that a marketing order program be administered locally by an agency selected by the Secretary. The record shows that such a local administrative agency should be established which will be representative of potato producers in the production area and be responsible for the administration of the program; that it should be called the Red River Valley Potato Committee, consisting of 14 members, with a like number of alternates and that it would be a workable group providing adequate industry representation. The committee would be authorized to recommend marketing regulations, and to take care of other administrative matters.

Many producers in this production area also are handlers and, as a result of the operations of committees now serving the potato industry, the record shows that a 14-member committee composed entirely of producers will likely have among its members several who also

## PROPOSED RULE MAKING

are handlers. In such manner both producers and handlers will be adequately represented.

Each member and alternate of the Red River Valley Potato Committee selected to represent producers in a particular district should be a producer of potatoes, or an officer or employee of a corporate producer or other type of business unit engaged in producing potatoes in such district and each such person should reside within the production area. Some qualified persons may reside outside of the district in which their principal potato growing interest lies. However, record evidence shows that such residence should not preclude them from representing the particular district in which they farm. Producers who farm in a district should be intimately acquainted with the problems of producing potatoes grown in such district and each may reasonably be expected to present accurately the problems incident to production or marketing of potatoes grown in such district.

The record evidence indicates that producers nominated for membership on the committee should be producers of potatoes which would be subject to the regulations of the proposed marketing order. Because of their involvement in the fresh market, such producers would be informed of the supply and demand factors particularly affecting the sale of their potatoes and the effect of regulation upon such sales. On the other hand, producers who grow potatoes only for sale as certified seed or for processing would have less interest in the fresh market situation; and such producers should not be eligible for membership on the committee. The same principle also should apply as to the eligibility of persons to vote in nomination meetings.

Circumstances may arise when it is impossible for a member or members to attend particular meetings of the committee or where positions are vacant because of resignations or for other reasons. In such situations it is desirable for the respective alternates to serve in lieu of the members so that there will be no interruption of committee operations and to assure producers in all districts of the production area representation in the conduct of all committee business. Also, the record shows that alternates could relieve members by performing assigned tasks necessary for administration of the program.

The selection of committee members and alternates on the basis of districts, as set forth in the proposed marketing order, is related to acreage and production of potatoes within the production area and such basis provides a practicable and equitable manner of representation.

Each person selected by the Secretary as a committee member or alternate should qualify by filing with the Secretary a written acceptance of his willingness and intention to serve in such capacity. Such acceptance should be filed within 10 days, or by such other time as the Secretary prescribes, after notification of appointment. This requirement is

necessary so that the Secretary may be in a position to promptly select some other eligible person to serve as a member or alternate in the event the initially selected member or alternate fails to properly qualify or indicate his willingness and intention to serve on the committee.

The term of office of committee members and alternates under the proposed program should be for 2 years beginning on August 1 and ending July 31, or such other period recommended by the committee and approved by the Secretary. This will establish an orderly procedure for changing the membership of the committee and will permit some flexibility in case changes in the term of office may be desirable in the future. The term of office should be for 2 years so that members and alternates will have adequate time to familiarize themselves with the operation of the program and thus be in a position to render the most effective service in assisting the Secretary to carry out the declared policy of the act. The beginning of each term of office occurs during a period prior to the commencement of a marketing season and hence should allow adequate time for the committee to organize and start operating before the opening of each season.

Provision is made in the marketing order for staggered terms of office of the committee members and alternates. Under this provision seven of the initial committee members and their alternates will serve for a term ending on July 31 following their appointment; the remaining seven of the initial committee members and their alternates will serve for a term of office ending on the second July 31 following their appointment.

The establishment of such staggered terms will provide for more efficient administration of the program in that members and alternates constituting the newly appointed members of the committee will benefit from the guidance of experienced members who carry over. The experienced members will help insure continuity of the policies and procedures relating to the administration of the marketing order.

It is proposed that no member should serve for more than three consecutive terms so that fresh points of view could be brought before the administrative agency and so that responsibilities of membership may be spread among more producers. This policy is deemed reasonable and desirable.

A quorum of the Red River Valley Potato Committee should consist of 10 members, and 10 concurring votes should be necessary for passing any motion or approving any action of the committee. Such quorum and voting requirements, constituting a minimum of over two-thirds of the membership, are deemed reasonable and adequate.

The committee should be authorized to vote by telephone, telegraph, or other means of communication when matters to be considered are so routine it would be unreasonable to call for an assembled meeting, or, on the other hand, when

rapid action is necessary in an emergency. Votes cast at other than assembled meetings should be confirmed promptly in writing to provide a written record of the votes so cast. In case of an assembled meeting, however, all votes should be cast in person.

The committee should be given those specific powers which are set forth in section 608c(7)(c) of the act because such powers are authorized to be granted by the enabling statutory authority. They are common to marketing agreements and marketing orders operating under the act and necessary so that an agency of the character set forth in the proposed marketing order can properly function.

The duties set forth in the proposed marketing order for the committee are similar to those generally specified for administrative agencies of this character. These duties should enable the committee, and its members and alternates, to undertake and perform such activities as may be necessary for the committee to carry out its prescribed responsibilities. These specified duties, however, are not necessarily all inclusive, in that there may be other duties which are incidental to, and not inconsistent with, the terms and conditions of the proposed marketing order which the committee may need to perform in connection with its operations under this program.

Proponents recommended an additional paragraph to the duties of the committee as set forth in the notice of hearing, to read as follows: "To receive and consider complaints and petitions from producers with respect to marketing problems arising in connection with operations of this marketing order program, and to initiate consideration by the committee within 5 working days following receipt of the same. A request or petition signed by 50 percent of the producers of a variety, or 30 producers, whichever is smaller, shall be sufficient to invoke this duty." The record shows that this additional duty would further assure producers that their problems will be properly considered by the committee. It should, therefore, be included as a duty of the committee.

Committee members and alternates should be reimbursed for reasonable expenses incurred when they are engaged in committee business. These expenses should be paid by the committee because it would not be fair for committee members and alternates who are to serve without compensation to be required to bear such expenses in addition to the time lost from their businesses.

Districts are established in the proposed order to provide a geographical basis for the selection of committee membership. For this purpose, the production area is divided into nine districts as set forth in the notice of hearing. This proposed division into districts is considered to be adequate and equitable at the present time and should provide a practical basis for the purpose intended.

A provision for redistricting and reapportionment of membership is necessary in the proposed order to enable the committee and the Secretary to consider

from time to time whether the basis for representation has changed or could be improved and how such improvement should be made. Future shifts or other changes in the development of acreage and production within the production area cannot be foreseen at the present time. Therefore, it is desirable to provide flexibility of operation so that, if it should be in the best interests of the administration of the proposed marketing order to change the boundaries of some districts and reapportion membership, the committee may so recommend and the Secretary may take such action.

The Red River Valley Potato Committee is the agency established pursuant to the terms and conditions authorized by the Act. Nominations for membership on this committee are provided by the terms of the marketing order as a method for selecting such membership, so that the wishes of the affected industry with respect to membership on such committee may be made known to the Secretary.

The methods for calling and conducting nomination meetings together with the rules for determining the rights and eligibility of those participating in producers' meetings for selection of membership on the committee, as set forth in the notice of hearing, are considered to be equitable and practical.

In the case of the death, removal, resignation, or disqualification of a member, it is proposed that the Secretary select a successor for his unexpired term. Such selection may be by naming a nominee from previously unselected nominees on the current nominee list from the district involved, or by holding another nomination meeting. In any case, if the names of nominees to fill a vacancy are not submitted to the Secretary within 30 days after a vacancy occurs, the Secretary should be authorized to fill such vacancy without regard to nominations. This is necessary to insure that all portions of the production area are adequately represented in the conduct of committee business.

(c) Expenses would have to be incurred by the committee in the administration of the proposed program. These expenses, which should be reasonable, include, but should not be limited to, salaries for a manager, secretary and field personnel, rent for office space and office equipment, supplies and travel expense. Expenses incurred by the committee in operating the marketing order must, under the act, be borne by handlers. The most practical way of distributing the cost of the program equitably among handlers is to require each handler who first handles potatoes subject to regulation under the proposed program to pay his pro rata share of such expenses on the basis of the ratio of his total potato shipments under the proposed marketing order to the total of such potato shipments by all such handlers, during a particular fiscal period.

Good business practice requires that the committee prepare a budget prior to the beginning of each fiscal period showing estimates of income and expenditures necessary for the administration

## PROPOSED RULE MAKING

of the proposed marketing order for such period. The budget should be presented to the Secretary along with the committee's recommendation for a rate of assessment. A rate of assessment would then be established by the Secretary on the basis of the committee's recommendation to balance necessary committee expenses with revenue. If it should become necessary to amend the budget, such a recommendation could be submitted to the Secretary and an amended rate of assessment may also be issued by the Secretary. The changed assessment rate should be applied to all potatoes handled during the fiscal period so that the total payments by each handler will be proportional to his share of the total volume of potatoes handled.

In most cases, the person who first ships the potatoes also applies for inspection, and in such instances the record of inspected shipments could serve as a basis for computing assessments due. Such person is the one who started the commodity on its way to market. Therefore, such person, i.e., the first handler, should be the person who is to pay the assessments. For potatoes which are not so inspected, the handler who first handles the potatoes should continue to be the handler responsible for the assessment and should be so designated by the committee. The requirement that only first handlers pay assessments on the potatoes will preclude multiple assessments on potatoes that are handled more than once, and handlers will be able to arrange their operations accordingly.

It is a matter of good business practice for the committee to maintain books and records clearly reflecting the true, up-to-date condition of its affairs so that the committee, as the agency of the Secretary, will always be prepared for public scrutiny or inspection by the Secretary. The responsibility of the Secretary for the committee's activities, funds, operations, and marketing policies, establishes an additional basis for requiring full accounting and records of all committee actions. The committee should have a periodic audit by a competent public accountant of its financial affairs at least once each fiscal period and should provide copies of such audit to the Secretary to enable him to maintain appropriate supervision and review of the committee's activities and operations. Copies of the audit report should also be available in the office of the committee for inspection by interested producers and handlers.

The assessment rate under the program would be set at the beginning of the season based on a crop of an estimated volume. However, should crop failure or partial crop loss reduce the crop so that assessment income falls below expenses, it might be necessary for handlers to cover the deficit through increased assessments. Since this would impose an extra burden on the industry, it would be equitable and less burdensome for handlers to establish an operating reserve during years of normal production. The reserve fund would be built during years when funds exceed ex-

penses. In order that reserve funds not be accumulated beyond a reasonable amount, however, a limit of not to exceed approximately one fiscal period's budgeted expenses should be provided.

The provisions set forth in the notice of hearing with respect to expenses, budget, assessments, accounting, and excess funds are appropriate and in accordance with established practices for marketing programs of this nature.

(d) The declared policy of the act is to establish and maintain such orderly marketing conditions for potatoes, among other commodities, as will tend to establish parity prices to producers and be in the public interest. The regulation of the handling of potatoes, as authorized in the proposed marketing order, provides a means for carrying out such policy.

In order to facilitate the operation of the program, the committee should, prior to the beginning of each marketing season, prepare and adopt a marketing policy for the season. The marketing policy should set forth the overall plan of the committee for the orderly marketing of potatoes grown in the production area for the season, including, to the extent practical, the kinds of regulations that may be desirable.

Such marketing policy should be made available to the Secretary, and to producers and handlers to enable them to plan their operations.

The factors set forth in the proposed marketing order which the committee should take into consideration in developing its marketing policy are those usually taken into account by producers and handlers in their day-to-day, as well as seasonal, evaluations of the market outlook.

If conditions change during the season requiring a change in policy, the committee should amend the policy statement to bring it up-to-date. The amended policy also should be distributed to interested parties and to the Secretary.

The Red River Valley Potato Committee, as the local administrative agency under the proposed marketing order, should be authorized to recommend such grade and quality regulations, as well as any other regulations and amendments thereto, as are authorized by the proposed marketing order and which will tend to effectuate the declared policy of the act. It is essential to successful operation of the proposed marketing order program that the committee should have such responsibility. The Secretary should look to the committee, as the agency reflecting the thinking of the industry, for its views and recommendations for promoting more orderly marketing conditions so as to increase growers' returns for production area potatoes. The committee should, therefore, have authority to recommend such regulations as are authorized whenever such regulations will in the judgment of the committee, tend to improve returns to producers.

When conditions change so the committee no longer feels the then current regulations are carrying out the policy

## PROPOSED RULE MAKING

of the act, they should have the authority to recommend modification, suspension, or termination of such regulations, as the situation warrants.

The proposed marketing order should authorize the Secretary, on the basis of committee recommendations, or other available information, to issue grade, quality and other appropriate regulations which are necessary for the improvement of growers' returns for production area potatoes.

Proponents of the proposed marketing order testified that the proposed wording of the authority to regulate the handling of particular grades, sizes, qualities, or maturities of potatoes, which appeared in the notice of hearing should be changed to permit the regulation only of the grade and quality of the production area potatoes handled; also, that the committee should not be authorized to recommend any regulation which is more restrictive than U.S. No. 2 grade for such potatoes.

Industry witnesses testified that size and maturity are important considerations but variations associated therewith have not been a significant problem in this production area. As indicated earlier herein, the main problem has been a wide spread in prices for the same grade, and the shipment of some potatoes which do not meet minimal grade standards.

Most of the production area potatoes shipped to fresh market have been U.S. No. 1, or better grade, and this grade will continue to account for the major portion of the shipments. However, under a regulation which would specify that only potatoes of U.S. No. 2 or better grade may be shipped and that all shipments would be inspected and certified, there will be assurance in the production area and in the receiving markets that potatoes certified U.S. No. 1 will in fact be of U.S. No. 1 quality, and potatoes certified U.S. Commercial or U.S. No. 2 will meet the requirements for those grades, and no potatoes of lesser quality than specified by the regulation in effect will be shipped.

Therefore, the wording of the proposed authority with respect to issuance of regulations should be modified accordingly.

All fresh market potatoes should meet the grade and quality requirements recommended by the committee and issued by the Secretary. There should be no problem concerning the applicability of such requirements and of inspection of potatoes which have been washed, graded and packed in the production area, and those potatoes which have been washed in bulk to points outside the production area. With respect to shipments of dry bulk loads of unwashed potatoes to wash plants outside the production area, the record evidence shows that it would be more practical to have them inspected at the wash plants after they are washed, graded and packaged, prior to distribution to retail outlets.

Hence, the authority to regulate the handling of potatoes grown in the production area which are shipped under a special purpose permit to wash plants

at specified locations outside the production area for preparation for market should be included in the proposed marketing order as hereinafter set forth. This is to allow Red River Valley producers and handlers to continue the commercial practices of marketing their potatoes in the most efficient manner and to tailor the regulations to meet the marketing needs of the industry.

Dry bulk potatoes for which arrangements cannot be made for compliance with regulations imposed under the order at wash plants outside of the production area should be inspected prior to leaving the production area and must meet the applicable regulations.

Authority should be provided in the proposed marketing order to regulate the handling of potatoes differently for different varieties and for different packs during any period. Adverse weather may occur during a crop year which might affect one variety significantly more than another. Such authority would then permit the committee to recommend a modification of a grade, or a different grade, such as a State grade for one variety during such season. By having authority to regulate differently for different packs, the committee could recommend different requirements for potatoes packed in 100 pound containers, for example, than for potatoes packed in cartons or in consumer size packages. Therefore, the wording of the appropriate provision in the notice of hearing should be modified accordingly.

Authority for minimum standards of quality when prices are above parity would permit the committee to recommend, and the Secretary to issue, such minimum standards of quality as will be in the interest of consumers as well as of producers. Poor quality potatoes fail to give consumer satisfaction and should not be marketed.

Labeling is a means of advising the buyer and the consumer of the grade and quality of the potatoes being purchased. It will afford a method of establishing a realistic price differential between various grades through grade identity and it will reduce price competition resulting between various packaged lots on which quality indications are not uniform. Labeling requirements relieve the shipper of quality potatoes from the price depressing effect of competing with nonlabeled or mislabeled packages, and a more stable price structure would ultimately result. No hardship would be incurred by the handler by labeling regulations. Labeling authority is incidental to the other regulations and necessary for them to be most effective. Proponents testified that any potatoes identified with the Red River Valley should be required to be inspected and to meet the marketing order requirements.

The record shows that certified seed potatoes should be exempt from regulation under the proposed marketing order because they are not in competition with fresh market potatoes. However, potatoes which are not certified by the seed certification agency of the State in which

the potatoes were grown should be subject to regulations even though such potatoes are described by the handler thereof as seed. Otherwise, they may be competing with fresh market shipments. Also, any potatoes, whether certified as seed or not, destined for the fresh market should be subject to regulations under the order. Therefore, the paragraph applicable to certified seed potatoes, as set forth in the notice of hearing, should be modified accordingly.

Provisions should be included in the proposed marketing order to indicate that the Secretary has the authority to amend or modify any regulation issued whenever he finds that such would tend to effectuate the policy of the act. Also, that he should terminate or suspend a regulation whenever he finds that it no longer tends to effectuate the declared policy of the act.

The proposed marketing order should also provide that the Secretary should notify the committee promptly of any regulation issued or of any modification, suspension or termination, so that the committee will be able to give reasonable notice to all handlers. All persons concerned should be kept fully informed at all times if the program is to operate successfully.

According to the record, it would be desirable to exempt small shipments of production area potatoes from meeting the inspection and assessment requirements so as to eliminate expending committee time, effort, and expense for compliance checking out of proportion to the effects that such insignificant quantities might have on producers' returns. This would permit more efficient operation of the proposed marketing order. Therefore, the committee should be authorized to recommend, and the Secretary to specify, minimum quantities which would be exempt from inspection and assessment requirements under the proposed marketing order.

(e) The Secretary, upon the basis of recommendations and information submitted by the committee, or upon the basis of other information should be authorized to establish special regulations, or to modify, suspend, or terminate grade, quality and other applicable regulations with respect to the handling of potatoes, to facilitate shipments for purposes other than disposition in normal commercial domestic fresh market channels.

Certain outlets for potatoes, such as livestock feed, provide a salvage outlet for culls and offgrade potatoes for which there is no other market. Potatoes moving to these outlets are of such low value that they would bring little or nothing in other outlets so authority should be included to allow them to go to livestock feed without incurring the cost of inspection and assessment. Similarly, potatoes for relief or charity should also be subject to exemption from the regulations. These potatoes would not be moving in the regular channels of trade and would not compete with potatoes shipped under the regulations for domestic fresh market. Therefore, it would not be defeating

the purpose of the program to permit them to move to charitable outlets without inspection and assessment.

Potatoes for export could move under modified requirements which would be tailored to meet the needs of the importing country or they should be able to move under special purpose certificate without grade and quality restrictions as determined by the committee because such potatoes would not compete with domestic fresh market potatoes. If there should be a demand from export outlets for different grades or qualities, the committee and the Secretary should have the requisite authority to effect the appropriate modification, suspension, or termination of regulations for export shipments. Export markets are usually additional outlets for Red River Valley potatoes. Unless the committee has the authority to recommend and the Secretary to issue regulations to meet the requirements for export markets, loss of markets may occur, thereby tending to prevent the accomplishment of the purpose of the program.

Prepeeling is not considered processing, and thus potatoes shipped for prepeeling are subject to marketing order regulations. However, the committee should have the authority to recommend modification or suspension of regulations with respect to potatoes for prepeeling to recognize the different potato requirements of this outlet. In commercial prepeeling, operators can use potatoes with surface defects which might be undesirable for the tablestock market. Of course, inspection would normally be required on such shipments.

Potatoes shipped as certified seed shall be exempt from regulation under the proposed program and potatoes shipped for canning, freezing, and other processing are exempt from regulation under the act. However, it is proper that the committee have authority to impose safeguards to insure that certified seed and potatoes destined for processing not be diverted to the fresh market.

The record indicates that it is necessary to ship unwashed, uninspected potatoes in bulk to specified locations outside the production area to have such potatoes prepared for market. Such handling should be permitted under appropriate safeguards on shipments for specified purposes, to permit established practices to continue without disruption or undue interference.

Potatoes that are moved outside the production area for specified purposes without being inspected before they leave the production area should be handled by the handlers located outside the production area in the same manner as if such handling was performed inside the production area. The record indicates that if potatoes were grown in the production area and graded and washed in wash plants outside the production area, then the person who performs such service should be considered a handler and would be responsible for insuring that the potatoes meet the applicable provisions of the marketing order.

## PROPOSED RULE MAKING

It is essential that the identity of potatoes shipped for specified purposes be maintained to insure they are not used for purposes contrary to those specified. Ungraded potatoes which have been shipped from the production area to specified wash plants for preparation for market should not be mixed with other potatoes as it would be impossible to maintain their identity under such circumstances. Since only those potatoes which meet the requirements of the regulations may be shipped to the fresh market, below grade potatoes graded out of each lot must be kept out of fresh market channels, but may be disposed of in such outlets as livestock feed, relief, or charity. It was indicated in the record that the committee would not lose control over such potatoes, going to fresh market or other outlets, if appropriate safeguards are applied.

The regulations affecting shipments for special purposes may need to be modified or suspended for other purposes which may be specified by the committee and approved by the Secretary. This is to provide flexibility which is needed to cover any situation which may occur but which cannot be foreseen at present. The Secretary and the committee should be required to give prompt notice of any such actions to the persons to be affected. The authority for issuing special regulations for modifying, suspending or terminating grade, quality, inspection or assessment requirements with respect to shipments for special purposes should be accompanied by the additional authority to prescribe adequate safeguards, for approval by the Secretary, to prevent special purpose shipments from entering fresh market channels.

In order to maintain appropriate identification of shipments of potatoes for special purposes, safeguards could require the prior application for, and issuance of, special purpose certificates to handlers of such potatoes. Such certificates should be issued in accordance with rules to be established or approved by the Secretary on the basis of committee recommendations, so that the procedure for the issuance of such certificates may be known to handlers.

The term "special purpose certificate" is intended to mean the written approval or permit necessary to make such shipments. It is important that safeguards should be adequate so that the committee can follow special shipments from the time they leave the local shipping points to their ultimate destination to determine that they do not enter domestic fresh market channels rather than the intended. As experience is gained, the committee should establish procedures for the issuance of special purpose certificates.

The procedure for safeguarding the shipment of potatoes to be used for processing could entail establishment by the committee of lists of approved potato processors to which such potatoes could be shipped. Upon application of a handler for permission to ship potatoes for

processing use, the committee could determine whether the intended receiver was a bona fide processor, and therefore an eligible outlet for unregulated potatoes.

It is appropriate and proper that grower-handlers should be required to file applications with the committee to ship potatoes for certain special purpose outlets. This is an obvious requirement for proper safeguards. It is also appropriate and proper that handlers should be required to obtain inspection if such is determined necessary by the committee. This would apply to such outlets as export shipments. It is also appropriate that handlers should be required, if the committee deems it necessary, to obtain from the receiver an affidavit or acknowledgment that the potatoes were used for the purpose specified.

The committee should have authority to rescind or deny special purpose certificates to any shipper if the committee obtains proof that the potatoes shipped by him were handled contrary to the provisions of the certificate. This is an essential authority which should rest with the committee if it is to have the responsibility for local administration of the marketing order.

The Secretary should retain the right to modify, change, alter or rescind any safeguards prescribed and any certificates issued by the committee. The retention of this right by the Secretary is appropriate in fulfilling the Secretary's responsibility under the provisions of the act. This will provide an appropriate check upon the responsibility of the committee in carrying out its functions in an equitable manner.

The committee should be required to make reports to the Secretary as requested, showing the operation of the safeguards. Such reports may require the committee to show the number of certificates issued, the quantity of potatoes covered by such certificates, the number of applications denied, and any other information with respect to such safeguards as may be requested by the Secretary so that he may discharge his duties under the act and the proposed marketing order.

(f) Inspection of potatoes grown in the production area by the Federal-State Inspection Service is a common and usual practice for the purpose of determining the grade and quality of such potatoes.

This is the only neutral inspection service available and it should be used on all fresh shipments of potatoes to insure that each lot, whether by truck or carload, meets the required grade, quality, and other requirements.

Responsibility for obtaining inspection should fall on each handler because each lot of potatoes must be identified and certified with respect to grade, quality and other regulatory requirements at the time of handling. Each handler, regardless of whether the first or a subsequent handler, should be required to bear responsibility for determining that each of his shipments is inspected and certified. Identification and certification

are essential to proper administration of the marketing order so that a determination could be made as to whether each shipment accords with the regulations. Except as otherwise provided in the marketing order, each handler who first handles potatoes should be required to obtain inspection. Also, subsequent handlers should not be permitted to handle the potatoes unless a properly issued inspection certificate, valid under the terms of the marketing order, applies to such shipment. Where required, the inspection certificate should accompany the shipment. If a handler should receive potatoes which have not been inspected, he should have them inspected before selling or otherwise handling them.

Truckers and other carriers can be supplied with copies of inspection certificates, or evidence thereof, to accompany each lot of potatoes. The committee should be authorized to recommend and the Secretary to issue regulations requiring truckers of potatoes subject to regulation under the proposed program to accompany such potatoes with evidence of inspection in the form of a valid inspection certificate or other evidence thereof. Such authority is incidental to, and necessary to effectuate the other provisions of the marketing order.

There should be authority in this section for the Secretary, upon recommendation of the committee, to modify the inspection requirements in circumstances which would create an undue hardship. If, for example, an inspector is not available locally and has to travel an unreasonable distance to make an isolated inspection, then arrangements should be made by the committee, with the approval of the Secretary, to modify or relieve the inspection requirements, or arrangements may be made for checking compliance en route or at destination.

When potatoes that have been inspected and certified are removed from the containers in which they were so inspected and certified, such potatoes lose their identity insofar as the previously issued inspection certificate is concerned. The inspection certificate loses its applicability to such potatoes. Therefore, inspection and certification should be required with respect to any potatoes that are handled after they are repacked, regarded, or resorted, or further prepared for market, or rehandled in smaller lots. The marketing order provides that any such potatoes shall not be handled unless they are inspected and certified except when this requirement is modified by the Secretary.

At times it may be necessary to have a lot of potatoes inspected at the warehouse instead of on the car or truck. This may be necessary in an emergency such as when a trucker cannot load his truck during regular business hours.

The provisions included in the proposed marketing order for identifying the lot inspected and certified by having appropriate seals, stamps, or tags affixed to the containers by the handler under the supervision of the inspector would

be an appropriate means of complying with the inspection requirement.

It may be necessary in certain other instances to permit warehouse lot inspection. The committee should, as experience in operation under this program is acquired, be able to indicate when it is appropriate to permit warehouse lot inspection along with identification requirements so as to facilitate the handling of inspected potatoes in quantities smaller than those in which originally inspected. This would allow flexibility of operation.

In view of the perishable nature of potatoes and their susceptibility to deterioration, the committee, with the approval of the Secretary, should be authorized to fix the length of time inspection certificates may be valid insofar as the requirements of the proposed marketing order are concerned. This would assure, to the extent feasible, that an inspection certificate properly reflects the grade and quality of a particular lot of inspected potatoes at the time it is handled.

Copies of inspection certificates issued by the Federal-State Inspection Service under jurisdiction of the proposed marketing order should be made available to the committee by the Inspection Service so that the committee may properly discharge its administrative responsibilities under the program.

(g) The committee should have the authority to require that handlers submit to the committee such reports and information as may be needed to perform its functions under the proposed marketing order. It is difficult to anticipate every type of report or kind of information which the committee may require; but it should have the authority to request reports and information, as needed, including those of the types set forth in the proposed marketing order and at such times and in such manner as it may deem necessary.

The Secretary should retain the right to approve, change, or rescind any requests by the committee for information or reports in order to protect handlers from unreasonable requests.

Any reports and records submitted for committee use by individual handlers should be kept confidential and be disclosed to none other than persons authorized. Any reported information released to the industry should be on a composite basis and no release of information should disclose the identity of handlers or their operations. This will assure that the information contained in the reports which may adversely affect a competitive position of a reporting handler in relation to other handlers will not be disclosed.

Since it is possible that a question could arise with respect to the verification of the information obtained in the reports submitted under the program, handlers should be required to maintain complete records on their receipts, handling, and disposition of potatoes for 2 succeeding years. Evidence shows that handlers usually keep such records for their own business operations for

periods of at least 2 years and no hardship would be imposed by requirements of this type under the proposed marketing order.

(h) Except as provided in the marketing order, no handler should be permitted to handle potatoes, the handling of which is prohibited pursuant to the order; and no handler should be permitted to handle potatoes except in conformity with the order. If the program is to be effective, no handler should be permitted to evade its provisions since such action on the part of one or more handlers would be demoralizing to other handlers and would tend to impair operation of the program.

(i) The provisions of §§ 43 through 56, as published in the FEDERAL REGISTER of October 26, 1972 (37 FR 22878), are common to marketing agreements and marketing orders. Each such section sets forth certain rights, obligations, privileges, or procedures which are necessary and appropriate to the effective operation of the proposed marketing order. These provisions are incidental to, and not inconsistent with, section 608c (6) and (7) of the act and are necessary to effectuate the other provisions of the proposed marketing order and to effectuate the declared policy of the act. The substance of such provisions should, therefore, be included in the proposed marketing order.

**General findings.** Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The marketing agreement and order, as hereinafter set forth, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said marketing agreement and order authorize regulation of the handling of Irish potatoes grown in the production area in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in a proposed marketing agreement and order upon which a hearing has been held.

(3) The said marketing agreement and order are limited in application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the act, and the issuance of several marketing orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of potatoes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of potatoes grown in the production area, as defined in said marketing agreement and order, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

**Rulings on briefs of interested parties.** At the conclusion of the hearing, the Administrative Law Judge fixed December 29, 1972, as the final date for interested parties to file briefs with respect to the

evidence adduced at the hearing and the findings and conclusions to be drawn therefrom. No briefs were filed.

**Recommended marketing agreement and order.** The following marketing agreement and order<sup>1</sup> are recommended as the detailed means by which the foregoing conclusions may be carried out.

The marketing agreement and order shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

#### DEFINITIONS

##### § 43.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any other officer, or member of the U.S. Department of Agriculture, who is, or may hereafter be authorized to exercise the powers and to perform the duties of the Secretary of Agriculture.

##### § 43.2 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1-19, as amended, 7 U.S.C. 601-674).

##### § 43.3 Person.

"Person" means an individual, partnership, corporation, association, or any other business unit.

##### § 43.4 Production area.

"Production area" means all territory included within the boundaries of the Counties of Towner, Ramsey, Cavalier, Pembina, Walsh, Grand Forks, Nelson, Steele, Traill, Cass, and Richland of the State of North Dakota, and of Kittson, Marshall, Polk, Pennington, Red Lake, Norman, Mahanomen, Clay, Becker, Wilkin, and Otter Trail of the State of Minnesota.

##### § 43.5 Potatoes.

"Potatoes" means all varieties of Irish potatoes grown within the production area.

##### § 43.6 Handler.

"Handler" is synonymous with "shipper" and means any person (except a common or contract carrier of potatoes owned by another person) who handles potatoes or causes potatoes to be handled.

##### § 43.7 Handle.

"Handle" means to sell, ship, transport, or in any other way to place potatoes, or cause potatoes to be placed, in the current of commerce between the production area and any point outside thereof; or from a wash plant or packing house specified by the committee outside the production area to any other point.

<sup>1</sup>Sections 44-56 apply only to the proposed marketing agreement and not to the proposed order.

##### § 43.8 Producer.

"Producer" means any person engaged in a proprietary capacity in the production of potatoes for market.

##### § 43.9 Fiscal period.

"Fiscal period" means the period beginning on August 1 of each year and ending July 31 of the following year, or such other period as the Secretary may establish pursuant to recommendation of the committee.

##### § 43.10 Grading.

"Grading" is synonymous with "preparing for market" which means the sorting or separating of potatoes into grades and sizes for market purposes.

##### § 43.11 Grade and size.

"Grade" means any one of the officially established grades of potatoes, and "size" means any one of the officially established sizes of potatoes as defined and set forth in:

(a) The U.S. Standards for Potatoes issued by the U.S. Department of Agriculture (§§ 51.1540 to 51.1566 of this title) or amendments thereto or modifications thereof, or variations based thereon;

(b) U.S. Standards for Grades of Peeled Potatoes (§§ 52.2421 to 52.2433 of this title) or amendments thereto or modifications thereof, or variations based thereon;

(c) U.S. Standards for Grades of Seed Potatoes (§§ 51.3000 through 51.3014 of this title), or amendments thereto or modifications thereof, or variations based thereon; and

(d) State standards for potatoes issued by the State in which the potatoes are shipped, or amendments thereto, or modifications thereof, or variations based thereon.

##### § 43.12 Varieties.

"Varieties" means all classifications or subdivisions of Irish potatoes according to those definitive characteristics now or hereafter recognized by the U.S. Department of Agriculture.

##### § 43.13 Seed potatoes.

"Seed potatoes" or "seed" means all potatoes officially certified and tagged, marked, or otherwise appropriately identified under the supervision of the official seed potato certifying agency of the State in which the potatoes were grown or other seed certification agencies which the Secretary may recognize.

##### § 43.14 Pack.

"Pack" means a quantity of potatoes in any type of container and which falls within specific weight limits or within specific grade and/or size limits or any combination thereof, recommended by the committee and approved by the Secretary.

##### § 43.15 Container.

"Container" means a sack, bag, crate, box, basket, barrel, bulk load, or other

receptacle used in the packaging, transportation, sale, or other handling of potatoes.

##### § 43.16 Committee.

"Committee" means the Red River Valley Potato Committee, established pursuant to § 43.20.

##### § 43.17 District.

"District" means each of the geographical divisions of the production area established pursuant to § 43.27.

##### § 43.18 Export.

"Export" means shipment of potatoes beyond the boundaries of the continental United States.

#### COMMITTEE

##### § 43.20 Establishment and membership.

(a) The Red River Valley Potato Committee consisting of 14 members, all of whom shall be producers, is hereby established.

(b) Each person selected as a committee member or alternate shall be a producer or an officer or employee of a producer in the district for which selected and each such person shall be a resident of the production area.

(c) For each member of the committee there shall be an alternate who shall have the same qualifications as the member. An alternate member of the committee shall act in the place and stead of the member for whom he is an alternate during such member's absence. In the event of the death, removal, resignation, or disqualification of a member his alternate shall act for him until a successor for such member is selected and has qualified.

##### § 43.21 Selection.

(a) Committee members and alternates shall be selected by the Secretary on the basis of districts as established pursuant to § 43.27. Selection of committee members for districts shall be as follows: Two members for each of Districts 1, 2, 3, 4, and 7; and one member for each of Districts 5, 6, 8, and 9.

(b) Any person selected by the Secretary as a committee member or as an alternate shall qualify by filing a written acceptance with the Secretary within the time he specifies.

##### § 43.22 Term of office.

(a) The term of office of committee members and alternates shall be 2 years beginning August 1 and ending July 31, or such other date as the Secretary may approve upon recommendation of the committee, except that of the initial 14 members selected, seven shall serve for a term ending on the second July 31 following their selection and seven shall serve for a term ending on the first July 31 following their selection. Each of the initial 14 alternate members shall be selected to serve for the same term of office as the respective member from each district. No member shall serve for more than three consecutive terms.

## PROPOSED RULE MAKING

(b) Committee members and alternates shall serve during the term of office for which they are selected and have qualified, or during that portion thereof beginning on the date on which they qualify during the current term of office and continuing until the end thereof, and until their successors are selected and have qualified.

## § 23 Procedure.

(a) Ten members of the committee shall be necessary to constitute a quorum and 10 concurring votes shall be required to pass any motion or approve any committee action or such other numbers as may be approved by the Secretary pursuant to recommendation of the committee. In assembled meetings, all votes shall be cast in person.

(b) The committee may provide for meeting by telephone, telegraph, or other means of communication. Any vote cast at such meeting shall be confirmed promptly in writing.

## § 21 Powers.

The committee shall have the following powers:

(a) To administer the provisions of this subpart in accordance with its terms;

(b) To make rules and regulations to effectuate the terms and provisions of this subpart;

(c) To receive, investigate, and report to the Secretary complaints of violation of the provisions of this subpart; and

(d) To recommend to the Secretary amendments to this subpart.

## § 25 Duties.

It shall be the duty of the committee:

(a) At the beginning of each fiscal period, to meet and organize, to select from among its members a chairman, and such other officers and subcommittees as may be necessary, and to adopt such rules, regulations and bylaws for the conduct of its business as it may deem advisable;

(b) To act as intermediary between the Secretary and any producer or handler, and to receive and consider complaints or petitions from producers with respect to marketing problems under this program. A petition to the committee signed by 50 percent of the producers of a variety, or 30 producers, whichever is smaller, shall be considered by the committee within 5 working days after receipt.

(c) To furnish to the Secretary such available information as he may request;

(d) To appoint such employees, agents, and representatives as it may deem necessary and to determine the compensation and define the duties of each such person, and to protect the handling of committee funds through fidelity bonds;

(e) To investigate from time to time and to assemble data on the growing, harvesting, shipping, and marketing conditions with respect to potatoes, and to engage in such research and service activities which relate to the handling or marketing of potatoes as may be approved by the Secretary.

(f) To keep minutes, books, and records which clearly reflect all the acts and transactions of the committee; and to furnish the Secretary promptly two copies of the minutes of each committee meeting and two copies of the annual report of the committee's operations.

(g) To make available to producers and handlers the committee voting record on recommended regulations and on other matters of policy;

(h) At the beginning of each fiscal period, to submit to the Secretary a budget of its expenses for such fiscal period, together with a report thereon;

(i) To prepare periodic statements of the financial operations of the committee and to cause the books of the committee to be audited by a competent public accountant at least once each fiscal period, and at such other times as the committee may deem necessary or as the Secretary may request. These reports shall show the receipt and expenditure of funds collected pursuant to this subpart; a copy of each such report shall be furnished to the Secretary and a copy of each such report shall be made available at the principal office of the committee for inspection by producers and handlers; and

(j) To consult, cooperate, and exchange information with other potato marketing committees and other individuals or agencies in connection with all proper committee activities and objectives under this subpart.

## § 26 Expenses and compensation.

Committee members and their respective alternates when acting on committee business shall be reimbursed for reasonable expenses necessarily incurred by them in the performance of their duties and in the exercise of their powers under this subpart. In addition, they may receive reasonable compensation at a rate recommended by the committee and approved by the Secretary.

## § 27 Districts.

(a) For the purpose of determining the basis for selecting committee members, the following districts of the production area are hereby initially established:

District No.	Number of members
<b>NORTH DAKOTA COUNTIES</b>	
1 Pembina, Cavalier, Towner and Ransom.	2
2 Walsh, east of Highway 18.	2
3 Walsh, west of Highway 18.	2
4 Grand Forks.	2
5 Traill, Steele, Richland, Cass, and Nelson.	1
<b>MINNESOTA COUNTIES</b>	
6 Kittson, Marshall, and Pennington.	1
7 Red Lake and Polk, west of Highway 22.	2
8 Norman, Mahanomen, and Polk, east of Highway 32.	1
9 Clay, Otter Tail, Wilkin, and Becker.	1

(b) Redistricting. The Secretary, upon recommendation of the committee, may

reestablish districts within the production area and may reapportion committee membership among the various districts. In recommending any such changes in districts, the committee shall give consideration to (1) the relative importance of new areas of production, (2) changes in the relative positions of existing districts with respect to production, (3) the geographic location of areas of production as they would affect the efficiency of administering this part, (4) the equitable relationship between the committee membership and districts and (5) other relevant factors. Provided, That there shall be no change in the total number of committee members or in the total number of districts. No change in districting may become effective less than 30 days prior to the date on which terms of office begin each year and no recommendations for such redistricting may be made within less than 6 months prior to such date.

## § 28 Nominations.

The Secretary may select the members of the Red River Valley Potato Committee and their respective alternates from nominations which may be made in the following manner, or from other eligible persons:

(a) Nominations for members and alternates of the committee may be submitted by producers, or groups thereof, on an elective basis or otherwise.

(b) In order to provide nominations for committee members and alternates:

(1) The committee shall hold, or cause to be held, nominations by mail or at assembled meetings of producers to fill expiring terms in each district. Such nominations shall be held prior to July 1 of each year, or by such other date as may be approved by the Secretary;

(2) In arranging for such nominations, the committee may, if it deems desirable, utilize the services and facilities of existing organizations and agencies;

(3) At each such meeting at least one nominee shall be designated for each position as member and for each position as alternate member on the committee which is vacant, or which is to become vacant the following July 31;

(4) Nominations for committee members and alternate members shall be supplied to the Secretary, in such manner and form as he may prescribe, not later than July 1 of each year, or such other date as may be approved;

(5) Only producers who reside within the production area may participate in designating nominees for committee members and their alternates;

(6) Regardless of the number of districts in which a person produces potatoes, each such person is entitled to cast only one vote on behalf of himself, his agents, subsidiaries, affiliates, and representatives, in designating nominees for committee members and alternates. In the event a person is engaged in producing potatoes in more than one district, such person shall elect the district within which he may participate as aforesaid in designating nominees. An eligible voter's

privilege of casting only one vote, as aforesaid, shall be construed to permit a voter to cast one vote for each position to be filled in the respective district in which he elects to vote.

(c) If nominations are not made within the time and in the manner specified by the Secretary pursuant to paragraph (b) of this section, the Secretary may, without regard to nominations, select the committee members and alternates on the basis of the representation provided for in this part.

## § 29 Vacancies.

To fill any vacancy occasioned by the failure of any person selected as a committee member or as an alternate to qualify or in the event of the death, removal, resignation, or disqualification of any qualified member or alternate, a successor for his unexpired term may be selected by the Secretary from nominations made in the manner specified in § 28, or from previously unselected nominees on the current nominee list from the district involved or from other eligible persons. If the names of nominees to fill any vacancy are not made available to the Secretary within 30 days after such vacancy occurs, the Secretary may fill such vacancy without regard to nominations, which selection shall be made on the basis of the representation provided for in § 27.

## EXPENSES AND ASSESSMENTS

## § 30 Expenses.

The committee is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred during each fiscal period for its maintenance and functioning, and for such purposes as the Secretary, pursuant to this subpart, determines to be appropriate. Each handler's pro rata share of such expenses shall be proportionate to the ratio between the total quantity of assessable potatoes handled by him as the first handler thereof during a fiscal period and the total quantity of assessable potatoes so handled by all handlers as first handlers thereof during such fiscal period.

## § 31 Budget.

As soon as practicable after the beginning of each fiscal period and as may be necessary thereafter, the committee shall prepare an estimated budget of income and expenditures necessary for the administration of this part. The committee may recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures. The committee shall present such budget to the Secretary with an accompanying report showing the basis for its calculations.

## § 32 Assessments.

(a) The funds to cover the committee's expenses shall be acquired by the levying of assessments upon handlers as provided for in this subpart. Each handler who first handles assessable potatoes shall pay assessments to the com-

## PROPOSED RULE MAKING

mittee upon demand, which assessments shall be in payment of such handler's pro rata share of the committee's expenses.

(b) Assessments shall be levied during each fiscal period upon handlers at a rate per unit established by the Secretary. Such rate may be established upon the basis of the committee's recommendations and other available information.

(c) At any time during, or subsequent to, a given fiscal period the committee may recommend the approval of an amended budget and an increase in the rate of assessment. Upon the basis of such recommendations, or other available information, the Secretary may approve an amended budget and increase the rate of assessment. Such increase shall be applicable to all assessable potatoes which were handled by each first handler thereof during such fiscal period.

(d) The payment of assessments for the maintenance and functioning of the committee may be required irrespective of whether particular provisions of this part are suspended or become inoperative.

## § 33 Accounting.

(a) All funds received by the committee pursuant to the provisions of this part shall be used solely for the purposes specified in this part.

(b) The Secretary may at any time require the committee, its members and alternates, employees, agents, and all other persons to account for all receipts and disbursements, funds, property, and records for which they are responsible. Whenever any person ceases to be a member of the committee or alternate, he shall account to his successor, the committee, or to the person designated by the Secretary, for all receipts, disbursements, funds, and property (including but not being limited to books and other records) pertaining to the committee's activities for which he is responsible, and shall execute such assignments and other instruments as may be necessary or appropriate to vest in his successor, the committee, or person designated by the Secretary, the right to all of such property and funds and all claims vested in such person.

(c) The committee may make recommendations to the Secretary for one or more of the members thereof, or any other person, to act as a trustee for holding records, funds, or any other committee property during periods of suspension of this part, or during any period or periods when regulations under this part are not in effect, and, if the Secretary determines such action appropriate, he may direct that such person or persons may act as such trustee or trustees.

(d) At the end of each fiscal period funds arising from the excess of assessments collected over expenses shall be accounted for as follows:

(1) The committee, with the approval of the Secretary, may establish an operating monetary reserve and may carry over to subsequent fiscal periods excess funds in a reserve so established: Pro-

vided, That funds in the reserve shall not exceed approximately one fiscal period's budgeted expenses. Such reserve funds may be used to defray any expenses authorized under this part and to cover necessary expenses of liquidation in the event of termination of this part. If upon such termination any funds not required to defray the necessary expenses of liquidation, and after reasonable effort by the committee it is found impracticable to return such remaining funds to handlers, such funds shall be disposed of in such manner as the Secretary may determine to be appropriate.

(2) If such excess is not retained in a reserve or used to defray necessary expenses of liquidation, it shall be credited or refunded proportionately to the handlers from whom collected.

## REGULATION

## § 34 Marketing policy.

(a) Prior to each marketing season, the committee shall consider and prepare a policy statement for the marketing of potatoes. In developing its marketing policy, the committee shall investigate relevant supply and demand conditions for potatoes. In such investigations, the committee shall give appropriate considerations to the following:

(1) Market prices of potatoes, including prices by grade, size, quality, and maturity in different packs of fresh potatoes and of the various forms of processed potatoes;

(2) Supplies of potatoes by grade, size, quality, and maturity in the production area and in other production areas, of fresh potatoes, and the supplies of various forms of processed potatoes;

(3) The trend and level of consumer income;

(4) Establishing and maintaining orderly marketing conditions for potatoes;

(5) Orderly marketing of potatoes as will be in the public interest; and

(6) Other relevant factors.

(b) In the event it becomes advisable to change such marketing policy because of changed supply and demand conditions, the committee shall formulate a revised marketing policy statement in accordance with the appropriate considerations in paragraph (a) of this section.

(c) The committee shall submit a report to the Secretary setting forth such marketing policy. Notice of each such marketing policy and any revision thereof shall be given to producers, handlers, and other interested parties by bulletins, newspapers, or other appropriate media, and copies thereof shall be available for examination at the committee office to all interested parties.

## § 35 Recommendation for regulation.

The committee shall recommend to the Secretary regulations, or amendments, modifications, suspension, or termination thereof, whenever it finds that such regulations as provided in this subpart in accordance with the marketing policy established pursuant to § 34 and that

## PROPOSED RULE MAKING

such regulations will tend to effectuate the declared policy of the act.

## § 36 Issuance of regulations.

(a) The Secretary shall limit the handling of potatoes whenever he finds from the recommendations and information submitted by the committee that it would tend to effectuate the declared policy of the act. Such limitation may:

(1) Regulate in any or all portions of the production area the handling of particular grades and/or qualities, of any or all varieties of potatoes during any period;

(2) Regulate the handling at specified locations outside the production area of particular grades and/or qualities, of production area potatoes which have been shipped from the production area to such specified locations for grading or storage pursuant to § 38;

(3) Regulate the handling of particular grades and/or qualities of any or all varieties differently for different packs during any period;

(4) Regulate the handling of potatoes by establishing in terms of grades, minimum standards of quality; and

(5) Require that containers for potatoes handled shall be labeled to show the grade thereon.

(b) Certified seed potatoes used for seed shall be exempt from regulation. Also, no regulation may be issued which is more restrictive than "U.S. No. 2 grade."

(c) The Secretary may amend any regulation issued under this subpart whenever he finds that such amendment would tend to effectuate the declared policy of the act. The Secretary may also terminate or suspend any regulation whenever he finds that such regulation obstructs or no longer tends to effectuate the declared policy of the act.

(d) The Secretary shall notify the committee of any such regulation issued pursuant to this section and the committee shall give reasonable notice thereof to handlers.

## § 37 Minimum quantities.

The committee, with the approval of the Secretary, may establish, for any or all portions of the production area, minimum quantities below which shipments will be free from regulations issued pursuant to this part.

## § 38 Shipments for special purposes.

(a) Whenever the Secretary finds, upon the basis of the recommendations and information submitted by the committee, or from other available information, that it will tend to effectuate the declared policy of the act, he shall modify, suspend, or terminate any or all regulations issued pursuant to this part in order to facilitate shipments of potatoes for:

- (1) Livestock feed;
- (2) Charity;
- (3) Export;
- (4) Prepeeling;
- (5) Certified seed;
- (6) Canning, freezing, and other processing;

(7) The shipment of unwashed, uninspected potatoes from the production area to specified wash plants or packing-houses outside the production area for grading, packing, storage, or other handling, provided the receiver of such potatoes agrees to, and complies with, the safeguard provisions of § 39; or

(8) Such other purposes as may be specified by the committee with the approval of the Secretary.

(b) The Secretary shall give prompt notice to the committee of any modification, suspension, or termination of regulations pursuant to this section, or of any approval issued by him under the provisions of this section.

## § 39 Safeguards.

(a) The committee, with the approval of the Secretary, may prescribe adequate safeguards to prevent shipments pursuant to § 38 from entering channels of trade other than those specifically authorized.

(b) Safeguards provided by this section may include, but shall not be limited to, requirements that handlers shall:

(1) Apply for and obtain, prior to handling, a special purpose certificate from the committee to make such shipments;

(2) Obtain inspection, pay assessments, or both, on shipments to certain outlets which may be specified by the committee, except on shipments to exempted outlets; or

(3) Register with the committee the name of the receiver so that the committee may establish a list of eligible receivers of exempted potatoes to whom such potatoes may be shipped without the need for more cumbersome procedures.

(c) The Secretary, upon recommendation of the committee, may promulgate rules and regulations governing the issuance and contents of special purpose certificates, also of forms for registration of eligible receivers of exempted potatoes.

(d) The committee may rescind, or deny to any handler the special purpose certificate if proof satisfactory to the committee is obtained that potatoes shipped by him for the purpose stated were handled contrary to the provisions of this section.

(e) The committee shall make reports to the Secretary, as requested, showing the number of applications for such certificates, the quantity of potatoes covered by such applications for such certificates, the number of such applications denied, and certificates granted, the quantity of potatoes shipped under duly issued certificates, and such other information as may be requested by the Secretary.

## INSPECTION

## § 40 Inspection and certification.

(a) During any period in which the handling of potatoes is regulated pursuant to § 36 no handler shall handle potatoes unless such potatoes are inspected by an authorized representative of the Federal or Federal-State Inspection Service and are covered by a valid

inspection certificate, except when relieved from such requirements.

(b) Regrading, resorting, or repacking any lot of potatoes shall invalidate any prior inspection certificates insofar as the requirements of this section are concerned. No handler shall handle potatoes after they have been regraded, resorted, repacked, or in any way further prepared for market, unless such potatoes are inspected by an authorized representative of the Federal, or Federal-State Inspection Service. Such inspection requirements on regraded, resorted, or repacked potatoes may be modified, suspended, or terminated upon recommendation by the committee, and approval by the Secretary.

(c) Upon recommendation of the committee, and approval of the Secretary, all potatoes so inspected and certified shall be identified by appropriate seals, stamps, or tags to be affixed to the containers by the handler under the direction and supervision of the Federal, or Federal-State, Inspector or the committee. Master containers may bear the identification instead of the individual containers within said master container.

(d) Insofar as the requirements of this section are concerned, the length of time for which an inspection certificate is valid may be established by the committee with the approval of the Secretary.

(e) When potatoes are inspected in accordance with the requirements of this section, a copy of each inspection certificate issued shall be made available to the committee by the inspection service.

(f) The committee may recommend and the Secretary may require that no handler shall transport or cause the transportation of potatoes by motor vehicle or by other means unless such shipment is accompanied by a copy of the inspection certificate issued thereon, which certificate shall be surrendered to such authority as may be designated.

## REPORTS

## § 41 Reports and records.

(a) Upon the request of the committee, with the approval of the Secretary, every handler shall furnish to the committee in such manner and at such time as may be prescribed, such information as will enable the committee to exercise its duties under this subpart.

(b) Each handler shall establish and maintain for at least 2 succeeding years such records and documents with respect to potatoes received and potatoes disposed of by him as will substantiate the required reports.

(c) For the purpose of assuring compliance with the recordkeeping requirements and certifying reports filed by handlers, the Secretary and the committee through its duly authorized employees, shall have access to such records.

(d) All such reports shall be held under appropriate protective classification and custody by the committee or duly appointed employees thereof, so that the information contained therein which

may adversely affect the competitive position of any handler in relation to other handlers will not be disclosed to any person other than the Secretary, or his authorized agents. Compilations of general reports from data and information submitted by handlers is authorized subject to the prohibition of disclosure of individual handlers identities or operations.

## § 42 Compliance.

Except as provided in this subpart, no handler shall handle potatoes, the handling of which has been prohibited by the Secretary in accordance with provisions of this subpart, and no handler shall handle potatoes except in conformity to the provisions of this subpart.

## EFFECTIVE TIME AND TERMINATION

## § 43 Effective time.

The provisions of this subpart shall become effective at such time as the Secretary may declare above his signature attached to this subpart, and shall continue in force until terminated in one of the ways specified in this subpart.

## § 44 Termination.

(a) The Secretary may, at any time, terminate the provisions of this subpart by giving a least 1 day's notice by means of a press release or in any other manner which he may determine.

(b) The Secretary may terminate or suspend the operation of any or all of the provisions of this subpart whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(c) The Secretary shall terminate the provisions of this subpart at the end of any fiscal year whenever he finds that such termination is favored by a majority of producers who, during the preceding fiscal year, have been engaged in the production for market of potatoes: *Provided*, That such majority has, during such period, produced for market more than 50 percent of the volume of such potatoes produced for market; but such termination shall be effective only if announced at least 50 days prior to the end of the then current fiscal period.

(d) The provisions of this subpart shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

## § 45 Proceedings after termination.

(a) Upon the termination of the provisions of this subpart, the then functioning members of the committee shall continue as trustees, for the purpose of liquidating the affairs of the committee, of all the funds and property then in the possession of or under control of the committee, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(b) The said trustees shall continue in such capacity until discharged by the Secretary; shall from time to time, ac-

## PROPOSED RULE MAKING

count for all receipts and disbursements and deliver all property on hand, together with all books and records of the committee and of the trustees, to such person as the Secretary may direct; and shall upon request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the committee or the trustees pursuant thereto.

(c) Any person to whom funds, property, or claims have been transferred or delivered by the committee or its members, pursuant to this section, shall be subject to the same obligations imposed upon the members of the committee and upon said trustees.

## § 46 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendments to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provisions of this subpart or any regulation issued under this subpart, or (b) release or extinguish any violation of this subpart or of any regulation issued under this subpart, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

## MISCELLANEOUS PROVISIONS

## § 47 Right of the Secretary.

The members of the committee (including successors and alternates), and any agent or employee appointed or employed by the committee, shall be subject to removal or suspension by the Secretary at any time. Each and every order, regulation, decision, determination, or other act of the committee shall be subject to the continuing right of the Secretary to disapprove of the same at any time. Upon such disapproval the disapproved action of the said committee shall be deemed null and void, except as to acts done in reliance thereon or in compliance therewith prior to such disapproval by the Secretary.

## § 48 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon the termination of this subpart, except, with respect to acts done under and during the existence of this subpart.

## § 49 Agents.

The Secretary may, by designation in writing, name any person, including any officer or employee of the Government or name any agency or division in the U.S. Department of Agriculture, to act as his agent or representative in connection with any of the provisions of this subpart.

## § 50 Derogation.

Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States to exercise any powers granted by the act or otherwise, or, in accordance with such powers, to act in the premises whenever such action is deemed advisable.

## § 51 Personal liability.

No member or alternate of the committee, nor any employee or agent thereof, shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any handler or to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate, or employee, except for acts of dishonesty.

## § 52 Separability.

If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder of this subpart, or the applicability thereof, to any other person, circumstance, or thing, shall not be affected thereby.

## § 53 Amendments.

Amendments to this subpart may be proposed, from time to time, by the committee or by the Secretary.

## § 54 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original. \* \* \*

## § 55 Additional parties.

After the effective date hereof, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.<sup>1</sup>

## § 56 Order with marketing agreement.

Each signatory handler requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of potatoes in the same manner as is provided for in this agreement.

Signed at Washington, D.C., on March 21, 1973.

JOHN C. BLUM,  
Deputy Administrator,  
Regulatory Programs.

[FR Doc. 73-5728 Filed 3-26-73; 8:45 am]

<sup>1</sup> Applicable only to the proposed marketing agreement.

[ 7 CFR Parts 1032, 1050 ]  
**MILK IN THE SOUTHERN ILLINOIS AND  
 CENTRAL ILLINOIS MARKETING AREAS**  
**Notice of Proposed Suspension of Certain  
 Provisions of the Orders**

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), the suspension of certain provisions of the order regulating the handling of milk in the Southern Illinois and Central Illinois marketing areas is being considered for the months of March through December 1973.

All persons who desire to submit written data, views, or arguments in connection with the proposed suspension should file the same with the Hearing Clerk, Room 112-A, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250, not later than March 29, 1973. All documents filed should be in quadruplicate.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

In 7 CFR Part 1032, milk in the Southern Illinois marketing area, and in 7 CFR Part 1050, milk in Central Illinois marketing area, the provisions to be suspended are as follows:

1. In § 1032.71 that part of paragraph (f) which reads "except for the months specified below, shall be," and the provisions contained in paragraphs (g) through (k) in their entirety.

2. In § 1050.71 that part of paragraph (f) which reads "except for the months specified below, shall be," and the provisions contained in paragraphs (g) through (k) in their entirety.

**STATEMENT OF CONSIDERATION**

The proposed suspension would make inoperative those provisions of Order No. 32 and Order No. 50 that provide for the accumulation and disbursement of money due producers with the intent of encouraging seasonal adjustments in milk production. Under such provisions (the "takeout-payback" plan), money withheld from the pool during March through July (15 cents per hundredweight March and July, 25 cents per hundredweight April, May, and June) is paid out to producers for deliveries of milk during September through December (20 percent in September and December, 30 percent in October and November).

The suspension is requested by Associated Milk Producers, Inc., a cooperative association which has member producers who supply milk to these markets. The basis for the request is to improve the relationship of uniform prices under the orders to pay prices of nearby manufacturing plants during the "takeout" months of March through July 1973.

The association states that the pay price for milk going into cheese is favorable relative to the uniform prices under

**PROPOSED RULE MAKING**

the orders, and producers are leaving the regulated markets which employ seasonal "takeout-payback" plans. Moreover, the cooperative indicates such producers plan to return to these regulated markets to take advantage of the "payback" moneys this coming fall. The cooperative contends that such practice of producers withdrawing to an alternative market during the "takeout" months circumvents the intent of the seasonal incentive payment plan. Thus, the cooperative urges that the seasonal payment plan be suspended for this year in the southern and central Illinois markets.

Signed at Washington, D.C., on March 21, 1973.

**DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE**

**Fund for the Improvement of  
 Postsecondary Education**  
 [ 45 CFR Ch. XV ]  
**SUPPORT FOR IMPROVEMENT OF  
 POSTSECONDARY EDUCATION**  
**Notice of Proposed Rule Making**

Pursuant to the authority contained in section 404 of the General Education Provisions Act (20 U.S.C. 1221d), "Support for improvement of postsecondary education," notice is hereby given that the Secretary of Health, Education, and Welfare proposes to amend Title 45 of the Code of Federal Regulations by adding a new Part 1501, as set forth below. The new part would be included in a new chapter XV of title 45. The proposed regulations would establish criteria for the awarding of assistance under this program and the procedures by which eligible applicants would apply for such assistance.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed regulations to the office administering the program, the Fund for the Improvement of Postsecondary Education, Department of Health, Education, and Welfare, 400 Maryland Avenue, SW., Room 3139, Washington, DC 20202. Such responses to this notice will be available for public inspection at the above office on Mondays through Fridays between 9 a.m. and 5:30 p.m. All relevant material received not later than April 26, 1973 will be considered.

Dated: March 22, 1973.

CASPAR W. WEINBERGER,  
 Secretary of Health, Education,  
 and Welfare.

Title 45 of the Code of Federal Regulations is amended by adding a new chapter XV, which contains a new Part 1501, to read as follows:

**CHAPTER XV—FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE**

**PART 1501—SUPPORT FOR IMPROVEMENT OF POSTSECONDARY EDUCATION**

- Sec.
- 1501.1 Purpose.
  - 1501.2 Applicability of civil rights provisions.
  - 1501.3 Definitions.
  - 1501.4 Eligibility for assistance.
  - 1501.5 Types of assistance.
  - 1501.6 Criteria for evaluating applications.
  - 1501.7 Applications for assistance.
  - 1501.8 Retention of records.
  - 1501.9 Audits.
  - 1501.10 Limitations on costs.
  - 1501.11 Reporting.
  - 1501.12 Final accounting.

**AUTHORITY:** Sec. 404 of the General Education Provisions Act, as added by sec. 301(a) (2) of Public Law 92-318, 86 Stat. 327 (20 U.S.C. 1221d), unless otherwise noted.

**§ 1501.1 Purpose.**

The purpose of the regulations in this part is to implement the provisions of section 404 of the General Education Provisions Act, as amended, which provides for grants to, and contracts with, institutions of postsecondary education and other public and private educational institutions and agencies to improve postsecondary educational opportunities. The program is administered by the Fund for the Improvement of Postsecondary Education, a unit within the Office of the Assistant Secretary for Education of the Department of Health, Education, and Welfare, with the advice of a Board of Advisors.

(20 U.S.C. 1221d)

**§ 1501.2 Applicability of civil rights provisions.**

(a) Federal financial assistance under this part is subject to the regulations in part 80 of this title, issued by the Secretary of Health, Education, and Welfare and approved by the President, to effectuate the provisions of title VI of the Civil Rights Act of 1964 (Public Law 88-352).

(42 U.S.C. 2000d)

(b) Federal financial assistance under this part is also subject to the provisions of title IX of the Education Amendments of 1972 (prohibition of sex discrimination), and any regulations issued thereunder.

(20 U.S.C. 1681-86; Public Law 92-318, section 906)

**§ 1501.3 Definitions.**

As used in this part—  
 "Fiscal year" means a period beginning on July 1 and ending on the following June 30. (A fiscal year is designated in accordance with the calendar year in which the ending date of the fiscal year occurs.)

"Fund" means the Fund for the Improvement of Postsecondary Education, the unit within the Office of the Assistant Secretary for Education of the

Department of Health, Education, and Welfare which administers the program covered by this part.

"Institution of postsecondary education" means an educational institution which admits as regular students only persons who have completed or left elementary or secondary school.

"Local government" means a local unit of government including specifically a county, municipality, city, town, township, local public authority, special district, intrastate district, council of governments, sponsor group representative organization, and other regional or interstate government entity, or any agency or instrumentality of a local government, exclusive of institutions of postsecondary education and hospitals.

"Nonexpendable personal property" means tangible personal property, including equipment, having a useful life of more than 1 year and an acquisition cost of \$300 or more per unit.

"Nonprofit" means owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

"Personal property" means property of any kind, tangible or intangible, except real property.

"Private" means not under public supervision or control.

"Public," as applied to an institution or agency, means that the institution or agency is a legally constituted organization of government under public administrative control and direction, except that an institution or agency of the Federal Government shall not be considered a public institution or agency.

"Recipient" means an applicant receiving assistance under this part.

"State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any agency or instrumentality of a State exclusive of State institutions of postsecondary education and hospitals.

(20 U.S.C. 1221d)

**§ 1501.4 Eligibility for assistance.**

Institutions of postsecondary education, combinations thereof, and other public and private educational institutions and agencies are eligible to receive assistance under this part. The fact that an applicant has been only recently established will not in itself prejudice such applicant's application.

(20 U.S.C. 1221d)

**§ 1501.5 Types of assistance.**

Public and nonprofit applicants may receive assistance in the form of grants or contracts, depending on the nature and objectives of their proposals. An applicant which is not public or nonprofit may receive assistance only in the form of contracts. Grants may be made to a combination of institutions of postsecondary education only if all institutions in the combination are public or nonprofit. Assistance may support a proposal

**PROPOSED RULE MAKING**

in its entirety or may be conditioned upon the provision of funds from other sources, including the applicant itself. Assistance may be awarded in one payment or in a number of payments, not necessarily equal, over a period of time. (20 U.S.C. 1221d)

**§ 1501.6 Criteria for evaluating applications.**

An application for assistance under this part shall be evaluated in terms of the extent to which the proposal therein:

- (a) Has the potential for advancing one or more of the following general aims and objectives of the Fund:
  - (1) To provide effective educational options not generally available;
  - (2) To increase the cost-effectiveness of educational services;
  - (3) To achieve far-reaching improvements in postsecondary education;
  - (4) To promote learner-centered improvements in postsecondary education;
- (b) Is directed at furthering one or more of the following program objectives:
  - (1) To provide new approaches to teaching and learning, specifically through projects which:
    - (i) Focus on one or more of the following purposes: (a) Education for social responsibility, (b) education for productive lives through career preparation, or (c) education for the enhancement of personal satisfaction; and
    - (ii) (a) Employ one or more of the following techniques or processes to achieve these purposes: (1) The integration of learning experiences, (2) the individualization of educational services, or (3) the improvement of teaching/learning techniques; or
    - (b) Develop and implement new kinds of education assessment to measure and achieve these purposes;
    - (2) To provide educational services for new clientele, specifically through projects which:
      - (i) Serve one or more of the following groups: (a) Young people who academically ranked in the lower half of the high school population or, if they did not attend high school, the elementary school population, (b) adults and part-time learners, (c) minorities, or (d) women; and
      - (ii) Employ programs and services responsive to new clientele, specifically efforts to achieve: (a) Accommodation of education to the needs and potentials of the clientele, (b) remediation of the clientele's skills and knowledge, or (c) access of the clientele to existing programs and services.
      - (3) To revitalize institutional missions, specifically through projects involving one or more of the following activities:
        - (i) The introduction of new structures or activities designed to channel institutional energies more effectively toward the implementation or refinement of an institution's existing mission, or
        - (ii) The phasing out of programs or activities no longer central to an institution's mission. A proposal directed at

furthering this objective will be evaluated by the Fund in terms of the extent to which it (a) will serve an important social objective, (b) will be central to the institution's principal mission, (c) will have a long-term effect on the institution, and (d) will actively involve and be supported by constituencies relevant to the institution's mission.

(4) To implement new missions, specifically through projects which:

- (i) Redirect missions of existing institutions, or
- (ii) Create new institutions.
- (5) To encourage openness in postsecondary education, specifically through projects involving the improvement of one or more of the following:
  - (i) The nature of information about postsecondary education and the ways in which such information is communicated to students, educational institutions, and makers of educational policy.
  - (ii) The standards, practices, and structures used in recognizing and evaluating the performance of individuals and institutions in postsecondary education, and the utilization of the judgments thereby made by other educational and social institutions and agencies.
  - (iii) The forms and techniques by which financial support for postsecondary education is provided, particularly those which affect incentives for teachers and structure relationships among teachers and learners.
  - (iv) The ways in which postsecondary education is regulated by public agencies.

(c) Meets the following criteria:

- (1) Is feasible, has sound project design, and is likely to attain expected results with expected expenditures;
- (2) Will, if appropriate, be supported financially by sources other than the Fund, including the applicant itself; and
- (3) Has the potential for having available financial resources for continuation beyond the period of Fund support, if appropriate.

(20 U.S.C. 1221d)

**§ 1501.7 Applications for assistance.**

(a) An application for assistance under this part must be filed with the Fund on or before the closing date or dates announced by the Fund for each fiscal year.

(b) Except as provided in paragraph (d) of this section, an application must have a title page providing the following information:

- (1) Name and address of applicant.
- (2) Name, address, title, phone number, and signature of applicant's authorizing officer.
- (3) Name, address, title, and phone number of proposed project director.
- (4) Dates of proposed project, including evaluation time.
- (5) Amount of assistance requested.
- (6) Proposal title.
- (7) A brief, one-paragraph description of the proposal.

(c) Except as provided in paragraph (d) of this section, an application must contain the following information, in a format to be selected by the applicant:

- (1) A diagnosis of the problem addressed, including a description of the

## PROPOSED RULE MAKING

problem and, as applicable, a discussion of pertinent empirical data and past attempts to deal with the problem.

(2) A description of the proposed project, including its methodology and schedule, qualifications of the persons who would conduct it, its short-term and long-term objectives, and its specific allocation of available funds in the form of a budget.

(3) A statement as to (i) expected financial support, if any, during the period of Fund support from sources other than the Fund, including the applicant itself, and (ii) if appropriate, expected sources of financial support, including that of the applicant itself, after the period of Fund support has elapsed.

(4) A statement of the significance of the proposed project, with specific reference to the manner in which the project relates to the Fund's objectives.

(5) An evaluation plan, including the criteria by which the project will be evaluated, the methods and schedules for such evaluation, and the cost of such evaluation.

(d) A State or local government seeking assistance under this part must apply in accordance with such procedures, and using such forms, as the Fund may specially prescribe in conformity with pertinent directives of the Office of Management and Budget. Much of the material required of such applicants pursuant to such directives is similar to the material required of applicants proceeding under paragraphs (b) and (c) of this section.

(e) Prior to its disposition of applications for assistance under this part, the Fund may obtain the review and advice of qualified persons not employed by the Department of Health, Education, and Welfare. Any such review shall be in addition to the review of applications by the Fund in accordance with such procedures as it may establish, including consultation with the Board of Advisors to the Fund.

(f) No application for assistance under this part to an institution of postsecondary education shall be approved until the Fund has submitted it to the State postsecondary education commission, if there is one, established or designated pursuant to section 1202 of the Higher Education Act of 1965 in the State in which the institution is located and afforded the commission an opportunity to submit its comments and recommendations as to the application to the Fund.

(g) No application for assistance under this part shall be approved until the procedure for implementing the evaluation plan required under paragraph (c) of this section or, as applicable, paragraph (d) of this section has been established and a schedule for the submission of reports on such evaluation by the applicant to the Fund has been agreed upon.

(20 U.S.C. 1221d; OMB Circular No. A-102, Attachment M)

## § 1501.8 Retention of records.

(a) *Records.* Each recipient shall keep intact and accessible records relating to the receipt and expenditure of Federal

funds (and to the expenditure of the recipient's contribution to the cost of the project, if any), including all accounting records and related original and supporting documents that substantiate direct and indirect costs charged to the award.

(b) *Period of retention.* (1) Except as provided in paragraph (b) (2) and (d) of this section, the records specified in paragraph (a) of this section shall be retained for 3 years after the date of the submission of the final expenditure report or, with respect to a grant or contract which is renewed annually, for 3 years after the date of the submission of an annual expenditure report.

(2) Records for nonexpendable personal property which was acquired with Federal funds shall be retained for 3 years after its final disposition.

(c) *Microfilm copies.* Recipients may substitute microfilm copies in lieu of original records in meeting the requirements of this section.

(d) *Audit questions.* The records involved in any claim or expenditure which has been questioned by Federal audit shall be further retained until resolution of any such audit questions.

(e) *Audit and examination.* The Secretary of Health, Education, and Welfare and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to all such records and to any other pertinent books, documents, papers, and records of the recipient.

(OMB Circular No. A-75; OMB Circular No. A-102, Attachment C; 20 U.S.C. 1221d)

## § 1501.9 Audits.

(a) All expenditures by recipients shall be audited by the recipient or at the recipient's direction to determine, at a minimum, the fiscal integrity of financial transactions and reports, and the compliance with laws and regulations.

(b) The recipient shall schedule such audits with reasonable frequency, usually annually, but not less frequently than once every 2 years, considering the nature, size, and complexity of the activity.

(c) Copies of audit reports shall be made available to the Fund to assure that proper use has been made of the funds expended. The results of such audits will be used to review the recipient's records and shall be made available to Federal auditors. Federal auditors shall be given access to such records or other documents as may be necessary to review the results of such audits.

(d) Each recipient shall use a single auditor for all of its expenditures under Federal education assistance programs, regardless of the number of Federal agencies providing such assistance.

(20 U.S.C. 1221d; OMB Circular No. A-102, Attachment G, 2, Attachment C, 1)

## § 1501.10 Limitations on costs.

The amount of the award shall be set forth in the grant award or contract document. The total cost to the Federal Government will not exceed the amount

set forth in the grant award or contract document. The Federal Government shall not be obligated to reimburse the recipient for costs incurred in excess of such amount unless and until the Fund has notified the recipient in writing that such amount has been increased and has specified such increased amount in a revised grant award or contract document. Such revised amount shall thereupon constitute the revised total cost of the performance of the grant or contract that may be borne by the Federal Government.

(31 U.S.C. 200)

## § 1501.11 Reporting.

The recipient shall comply with the schedule for reporting on its evaluation of the project agreed upon pursuant to § 1501.7(g).

(20 U.S.C. 1221d; OMB Circular No. A-102, Attachment M)

## § 1501.12 Final accounting.

(a) In addition to such other accounting as the Fund may require the recipient shall render, with respect to the project, a full account of funds expended, obligated, and remaining.

(b) A report of such accounting shall be submitted to the Fund within 90 days of the expiration or termination of the grant or contract, and the recipient shall remit within 30 days of the receipt of a written request therefor any amounts found by the Fund to be due. Such period may be extended at the discretion of the Fund upon the written request of the recipient.

(20 U.S.C. 1221d; 31 U.S.C. 628)

## DEPARTMENT OF TRANSPORTATION

## Federal Aviation Administration

## [ 14 CFR Part 71 ]

[Airspace Docket No. 73-NW-03]

## TRANSITION AREA

## Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Twin Falls, Idaho transition area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash., 98108. All communications received on or before April 26, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences

## PROPOSED RULE MAKING

must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108.

A new ILS approach procedure is proposed for the Twin Falls City-County Airport, Twin Falls, Idaho. A review of the airspace requirements for the new procedure reveals that additional transition area airspace would be required to provide controlled airspace protection for aircraft executing the proposed procedure.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (38 FR 435) the description of the Twin Falls, Idaho, transition area is amended to read as follows:

## TWIN FALLS, IDAHO

That airspace extending upward from 700 feet above the surface within 9.5 miles north and 5 miles south of the Twin Falls VORTAC 088° and 281° radials extending from the VORTAC to 30 miles east and 18.5 miles west; within 5 miles each side of the Twin Falls 156° radial extending from the VORTAC to 9.5 miles southeast of the VORTAC; that airspace extending upward from 1,200 feet above the surface within a 14-mile radius of the Twin Falls VORTAC, extending clockwise from the VORTAC 173° radial to the VORTAC 311° radial; within that airspace southeast of the Twin Falls bounded on the north by V-269, on the east by a 21-mile arc centered on the VORTAC and on the southeast by V-484; within that airspace north of Twin Falls bounded on the north by V-500, on the east by longitude 114°01'00" W., on the south by V-269 and on the southwest by V-293; that airspace northwest of Twin Falls bounded on the north by V-330, on the east by V-293, and on the south by V-4; that airspace within 9 miles southwest and 6 miles northeast of the Twin Falls VORTAC 311° radial extending from the VORTAC to 39 miles northwest of the VORTAC.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Wash., on March 16, 1973.

J. H. TANNER,  
Acting Director, Northwest Region.

[FR Doc. 73-5741 Filed 3-26-73; 8:45 am]

## FEDERAL HOME LOAN BANK BOARD

## [ 12 CFR Part 563 ]

[73-437]

## FEDERAL SAVINGS AND LOAN INSURANCE CORP.

## Investments in Entities Which Invest in Loans Through Out-of-State Offices

Several Federal savings and loan associations, and several State-chartered as-

sociations, whose accounts are insured by the Federal Savings and Loan Insurance Corporation, desire that their service corporations be authorized to establish offices in States other than the State in which the insured institution has its principal or home office. It appears that the principal purpose for establishing such out-of-State offices is to conduct through such offices the activities of originating, purchasing, selling, and servicing loans, and participations in loans, secured by real estate located outside the State in which the parent insured institution has its principal office.

Federal savings and loan associations and subsidiary insured institutions of savings and loan holding companies are not now authorized to invest in service corporations which conduct any activities through an office located outside the State in which the investing institution has its principal office. However, at least one State has authorized two or more service corporations of insured institutions chartered by that State to conduct the above-mentioned activities through out-of-State offices. Other States may grant similar authority in the near future.

The establishment of out-of-State offices of service corporations of insured institutions for the purpose of conducting real estate mortgage lending and servicing activities through such offices is of concern to the Board because of the responsibilities of the Federal Savings and Loan Insurance Corporation under title IV of the National Housing Act. In order to aid the Board in its determination as to whether service corporation lending activities through out-of-State offices is consistent with the safe and sound operation of insured institutions and with the provision of economical home financing for the Nation, the Board proposes to amend the rules and regulations for Insurance of Accounts (12 CFR Parts 561-572) by adding a new § 563.9-5 captioned "Investments in entities which invest in loans through out-of-State offices".

Proposed § 563.9-5 would prohibit insured institutions from making or maintaining an investment in any service corporation which, through its own or a subsidiary's out-of-State office, conducts mortgage lending or servicing activities with respect to loans secured by real estate located outside of the State in which the principal office of such insured institution is located.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, DC 20552, by April 30, 1973, as to whether these proposals should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the general regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

It is proposed to amend Part 563 (12 CFR Part 563) by adding a new § 563.9-5 to read as follows:

## § 563.9-5 Investments in entities which invest in loans through out-of-State offices.

No insured institution shall make or maintain any investment in any corporation, partnership, or any other form of legal entity (a) which maintains an office, either directly, or indirectly through any subsidiary, located outside the State where the principal office of such insured institution is located, and (b) which, through any such out-of-State office, makes or participates in the making of loans, purchases, or sells loans or participation interests in loans, or services loans, if such loans are secured by real estate located outside such State. As used in this section, the term "State" shall include any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States.

(Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended; 12 U.S.C. 1725, 1726, 1730, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071)

Dated: March 20, 1973.

By the Federal Home Loan Bank Board.

[SEAL] EUGENE M. HERRIN,  
Assistant Secretary.

[FR Doc. 73-5795 Filed 3-26-73; 8:45 am]

## [ 12 CFR Part 584 ]

[73-436]

## FEDERAL SAVINGS AND LOAN INSURANCE CORP.

## Excepted Acquisitions

The Federal Home Loan Bank Board has determined that it should propose an amendment to the Regulations for Savings and Loan Holding Companies (12 CFR Chapter V, Subchapter F) governing acquisitions of insured institutions under section 408(e) (1) (B) (ii) of the National Housing Act.

Section 408(e) provides generally that the acquisition of an insured institution requires prior written approval from the Federal Savings and Loan Insurance Corporation. Paragraph (e) (1) (B) (ii) of that section excepts from that requirement an acquisition effected by means of a reorganization in which a person or group of persons, having had control of the insured institution for more than 3 years, vests control of that institution in a newly formed holding company subject to the control of the same person or group of persons. This provision has been tracked in § 584.4 of this part, and has been the subject of Board Ruling 589.2 of its Holding Company Regulations (12 CFR 584.4, 589.2).

Upon review of acquisitions effected under this exception, the Board has determined to propose an amendment to the Savings and Loan Holding Company Regulations under which a company

## PROPOSED RULE MAKING

which proposes to acquire an insured institution without such prior written approval, because the company considers its acquisition to fall within the exception of section 408(e)(1)(B)(ii), would be required to submit the following information on a form provided by the Corporation: (a) A statement presenting the facts and circumstances material to the proposed acquisition, together with (b) a request for a ruling from the Corporation that it falls within the exception. Where the Holding Companies Section of the Board's Office of Examinations and Supervision deems the statement inadequate, the company would be required to submit additional data if such a request were made within 60 days of receipt of the company's statement. If the Corporation does not issue a ruling within 60 days of receipt of the initial filing, or, in the case where additional data is requested, within 60 days of receipt of the additional data, the company will be deemed to fall within the exception.

In furtherance of the foregoing, the Board proposes to amend Part 584 of the Regulations for Savings and Loan Holding Companies (12 CFR Part 584) by adding, immediately after § 584.4 thereof a new § 584.4a as follows:

**§ 584.4a Request for ruling for exception to requirement of prior written approval of acquisitions.**

Any company other than a savings and loan holding company, which proposes to acquire an insured institution without the prior written approval of the Corporation pursuant to paragraph (b) (2) of § 584.4, shall, prior to such acquisition, request a ruling from the Corporation whether the proposed acquisition may be so effected. Such request shall be in form prescribed by the Corporation and shall be filed with the Corporation by submitting the original and one copy to the Director, Holding Companies Section, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, and one original and one copy to the Supervisory Agent. The company shall submit additional information: (a) If the Director, within 60 days after the receipt by him of the request for a ruling, so requests in writing and, in such event, (b) if thereafter the Director requests such information in writing within 60 days after his receipt of any such additional information. If the Corporation does not issue a ruling by the expiration of 60 days after receipt by the Director of the initial filing, or, where the Director requests additional information, by the expiration of 60 days after receipt by the Director of such additional information, the company shall be deemed to have acquired the institution without such prior written approval.

mation, by the expiration of 60 days after receipt by the Director of such additional information most recently requested by him, the proposed acquisition may be effected without prior written approval of the Corporation.

(Sec. 402, 48 Stat. 1256, as amended, § 408, 48 Stat. 1261, as added by 73 Stat. 691, as amended; 12 U.S.C. 1725, 1730a, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Comp., p. 1071)

Interested persons are invited to submit written data, views and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue NW., Washington, DC 20552, by April 30, 1973, as to whether these proposals should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the General Regulations of the Federal Home Loan Bank (12 CFR 505.6).

Dated: March 20, 1973.

By the Federal Home Loan Bank Board.

## Notices

### DEPARTMENT OF STATE

[Public Notice 385]

#### CULTURALLY SIGNIFICANT OBJECTS

##### Temporary Exhibition Within United States

Notice is hereby given of the following determination.

Pursuant to the authority vested in me by Public Law 89-259 of October 19, 1965 (79 Stat. 985), Executive Order 11312 of October 14, 1966 (31 FR 13415, Oct. 18, 1966), and Delegation of Authority No. 113 of December 23, 1966 (32 FR 58, Jan. 5, 1967), I hereby determine that (1) the objects described, in the list attached below, to be imported, pursuant to a loan agreement between Mr. Edward J. Piszcz for the Copernicus Society, the Smithsonian Institution, the Franklin Institute, the Hayden Planetarium, the Detroit Institute of Arts, the Milwaukee Public Museum, and the Museum of Science and Industry and Dr. Jerzy Bukowski, Professor Marian Dobrowolski, and Dr. Mieczyslaw Klimaszewski of Jagiellonian University of the Polish People's Republic, for temporary exhibition without profit within the United States are of cultural significance and that (2) the temporary exhibition or display of such objects within the United States, at the Smithsonian Institution, on or about April 6 to 30, in Washington, D.C., at the Franklin Institute, on or about May 1 to 21, in Philadelphia, Pa., at the Hayden Planetarium, on or about May 22 to June 11, in New York City, at the Detroit Institute of Arts, on or about June 12 to 20, in Detroit, Mich., at the Milwaukee Public Museum, on or about June 21 to 29, in Milwaukee, Wis., and at the Museum of Science and Industry, on or about June 30 to July 18, 1973, in Chicago, Ill., is in the national interest.

Public notice of this determination is ordered to be published in the FEDERAL REGISTER.

Dated: March 22, 1973.

JOHN RICHARDSON, Jr.,  
Assistant Secretary for  
Educational and Cultural Affairs.

#### CATALOGUE OF ITEMS INCLUDED IN THE EXHIBITION OF THE ORIGINAL COPERNICUS INSTRUMENTS

1. Arabian Astrolabe dated 1054—with six circular plates/saftha for measurement of different geographical latitudes. Made in Cordoba, in Spain. On the back/dorsum is the Julian Calendar with Arabic and Latin inscriptions from the XIV c. Bought by Martin Bylica in Italy who added the sixth plate for the geographical latitude of Padua and Buda. It is the oldest astronomical instrument in Poland.

2. Martin Bylica's of Olkusz Celestial Globe dated 1480—with the astrolabe and two sundials. Made by Hans Dorn in Vienna under the supervision of Martin Bylica of Olkusz. On horizontal plate is the proprietary sign of Bylica and on the sundial is the date 1480. It is one of the biggest preserved medieval globes.  
Ball, Base and Casing—bronze.  
Ht.: 136 cm., Diam. 40 cm.
3. Martin Bylica's of Olkusz Astrolabe, dated 1486—with two plates for geographical latitude of Buda and Cracow. The instrument was designed by Hans Dorn under the supervision of Martin Bylica. Marked with the Proprietary sign of Martin Bylica and the date 1486. It is one of the biggest preserved medieval astrolabes provided with a magnetic compass put in the head of the handle.  
Brass  
Diameter 453 cm.
4. Martin Bylica's of Olkusz Torquetum dated 1487—with a sundial and a compass dated c. 1487. The instrument was designed by Hans Dorn under the supervision of Martin Bylica. It was made to read off ecliptic coordinates and was used in astrology. On equatorial plate is a sundial and a magnetic compass. Torquetum of Martin Bylica and torquetum of Nicholas of Cusa are the only medieval torqueta preserved to our times.  
Brass  
Ht.: 41 cm., Base 42.33 x 56 cm.
5. Earth Globe—So Called "Gold Jagiellonian Globe" dated c. 1510—the terrestrial globe is encircled with an armillary sphere and provided inside the ball with a clock mechanism moving the indicator and the sphere. The clock tells hours, days, months, and position of the Sun in the sky. On the southern hemisphere is engraved a continent with the inscription: "America Noviter Reperta." The globe is considered the most precious item in the Jagiellonian University collection. It has been owned by the University since the 16th Century. Ball—gilt brass with an engraved celestial map. Diameter 73 cm. Including the sphere 12 cm.
6. Portrait of Nicholas Copernicus, the Elder, the Astronomer's Father—17th Century, unsigned, oil canvas doubled, size 60 x 47 cm. Inscription at the top: "Nicholas Copernicus Pater Nicolai Copernici Astrologiae Unius Miraculi Nati 1473 19 February." Inscription at the bottom: "Joannes Broscius Curzelowiensis Depingit Curavit Torunil at que hic Reposuit." The portrait was painted in 1614 for Prof. John Brozek and was modelled on the epitaph portrait in Torun. Owned by the Jagiellonian University since that time.
7. Portrait of Nicholas Copernicus/1473-1543/Unsigned, oil canvas 39.5 x 28 cm. Inscription at the bottom: "N Copernic. N an. 1473 O an. 1547"
8. Portrait of Nicholas Copernicus. Oil on panel. 67 x 48 cm. Inscription at the bottom: "Clarissimus et Doctissimus Doctor Nicholas Copernicus Torunensis Canonici Warmiensis Astronomus Incomparabilis 1575." Replica of an unpreserved portrait from the 17th Century.
9. Picture of Foundation of the Cracow Academy—Distemper on Panel 100 x 128 cm. Inscription on top frame: "Fundatio Academiae Cracoviensis A.D. MCD." Inscription at bottom: "Ex altari et epitaphio ad Mausoleum Dni Vladislai Jagellonis R.P. et M.D. III." Replica painted after the woodcut from 17th century; possessed by the Jagiellonian Library.
10. Bust of Nicholas Copernicus—Francis Wyspianski/1836-1901.  
Plaster  
Ht.: 60 cm. Signed by Francis Wyspianski
11. Nicholas Copernicus. Miniature of the monument erected in 1830 in front of the Palace of the Academy of Sciences in Warsaw. Chiselled by Thorwaldsen. Souvenir mold is the expression of the worship of Nicholas Copernicus in the 19th century. Bronze Ht.: 38 cm., Width at Base: 13.5 cm.
12. Photographic Print of Enrollment of Nicholas Copernicus to the Jagiellonian University—The enrollment of Copernicus into the Faculty of Arts/Artium in the University. Metricae studiosorum Universitatis Cracoviensis. Part I including years 1400-1508. K. 365 MSS No. 258 in the Jagiellonian Library, Cracow. Parchment 78 x 54.5 cm.
13. Photographic Print of the Document Certifying Nicholas Copernicus' Doctoral degree, obtained at the University of Ferrara. The Book of Authenticated Deeds preserved in Archive di Stato in Ferrara. (Call No. 237, p. 446). Note made by bishop's notary Thomas Mileghini. Photographic print made in 1964. Gift of the University on the occasion of its 600th Anniversary.
14. Matthew of Miechow. "Chronica Polonorum." Cracow. Jerome Vietor, 1521. The first chronicle issued in Poland, written by Matthew of Miechow/1457-1523—first the student, then the professor and at last Rector Magnificus of the Jagiellonian University. He was also the court physician and astrologer of King Sigismund I. His activity in the field of history, medicine, and astrology places him among the most eminent humanists in Cracow. The Matthew of Miechow Chronicle was printed in Jerome Vietor's printing office (working) in Cracow in the years 1517-1546.
15. Miechowita's Document 1522-1524.
16. Facsimile of the Nicholas Copernicus Treatise, "De Revolutionibus." "De Revolutionibus Orbium Coelestium Libri VI." Manuscript. Facsimile edited in 1972 for the occasion of the 500th Anniversary of Copernicus' birth. MSS preserved in the Jagiellonian Library, Cracow.
17. Mace of Frederic the Jagiellonian 1493—Mace of Rector Magnificus of the Jagiellonian University. Designed by Martin Marcinec/died 1518/, the king's goldsmith. Gift of Cardinal Frederic the Jagiellonian, the Great Chancellor of the Kingdom and the University, died 1503. This mace is used up till present time, on very special occasions, as an insignium of Rector Magnificus' office.

18. Mace of Zbigniew Olesnicki, 1450—Mace of Rector Magnificus of the Jagiellonian University, dated 1445. Owned by Cracow Cardinal Zbigniew Olesnicki who bequeathed it to the Jagiellonian University. There are three coats of arms in the crown wreathing the mace: Papal, Royal, and the one belonging to Cardinal Zbigniew Olesnicki. Today the mace is carried by Rector Magnificus as the insignium of his office.  
Silver Length of Staff 1159 mm.
19. Wood Block, Map of Northern Celestial Hemisphere—Publ. John Kochanowski: "Phenomena or the Register of Celestial Signs." 1585-1586. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. 24.5 x 26 cm.
20. Wood Block, Comet Above the Landscape. The scientists are watching on the background of the landscape the appearance of a comet in the sky. Printed as a front picture in the treatise: "Experiments about Peter Slowaczus's Comet in the year 1577." Cracow, 1849. 5.8 x 7.5 cm.
21. Wood Block, Zodiac Man—Picture from the calendar coming from the second half of the 16th century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. 10.3 x 7.5 cm.
22. Wood Block, Sundial—Printed in the book "Usus Almanach Seu Ephemerides Interpretatio" 1532 Ungler. It describes fundamental rules of astrology and calendariography. The present sundial tells hours after the sunrise and before the sunset. It may be cut out and stuck on a cylinder and used for gnomon measurements. 10.3 x 7.5 cm.
23. Wood Block, Eclipse with a Dragon—the second half of the 16th Century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849.
24. Wood Block, Medicine and Astrology—Signed J.B. the second half of the 16th Century. The theme of the woodcut is connected with astrological therapeutics. It personifies medicine and astrology. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 6.5 x 3 cm.
25. Wood Block, "Coniunctio Solis et Lunae" with Greek Inscriptions.—The woodcut presents the movement of the Moon around the Earth, its approaching and going away from the Sun and explains the origin of the Moon's phases. Often met in astronomical treatises since the 9th Century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 7.4 x 9.8 cm.
26. Wood Block, Geocentric Universe. Met in astronomical treatises in the years 1518-1534. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 10.2 x 11 cm.
27. Wood Block, "The Ram"—the Zodiac figure on the background of the Sun and the Moon. 16th-17th century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 7 x 5.8 cm.
28. Wood Block, "Taurus"—the Zodiac figure on the background of the Sun and the Moon. 16th-17th century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 7 x 5.8 cm.

29. Wood Block "Gemini"—the Zodiac figure on the background of the Sun and the Moon. 16th-17th Century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 7 x 5.8 cm.
30. Wood Block, "Cancer"—the Zodiac figure on the background of the Sun and the Moon. 16th-17th Century. Publ. J. Muczkowski: "The Collection of Woodcut Imprints from the 16th and 17th Centuries." Cracow, 1849. Size: 7 x 5.8 cm.

#### TRAVEL INTO OR THROUGH CUBA, NORTH KOREA, AND NORTH VIETNAM Restriction on Use of U.S. Passports Correction

In FR Doc. 73-5642, FR Doc. 73-5643, and FR Doc. 73-5644 appearing on pages 7588 and 7589 of the issue for Friday, March 23, 1973, the expiration dates, which in each case appear in the paragraph preceding the "Effective date" paragraph, have been incorrectly calculated. These dates, now reading "June 25, 1973" should read "September 25, 1973".

#### DEPARTMENT OF THE TREASURY Bureau of Alcohol, Tobacco and Firearms POLYVINYL CHLORIDE LIQUOR BOTTLES

##### Notice of Availability of Final Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Bureau of Alcohol, Tobacco and Firearms, in the Department of the Treasury has prepared a Final Environmental Impact Statement concerning the proposed use of polyvinyl chloride plastic in the manufacture of liquor bottles. The statement was filed with the Council on Environmental Quality on March 21, 1973.

The statement discusses the probable environmental impact of the use of polyvinyl chloride plastic in the manufacture of liquor bottles. Such usage will cause a partial replacement of glass liquor bottles primarily in the half-gallon and 1-gallon sizes. Consideration is given to the impact of such replacement on all methods of solid waste disposal, the use of natural resources, safety, and litter.

Copies of the statement are available for inspection during regular working hours at the offices of the:

Assistant Director (Regulatory Enforcement), Bureau of Alcohol, Tobacco and Firearms, Room 1603, 1111 Constitution Avenue NW., Washington, DC 20226.  
Regional Directors, Bureau of Alcohol, Tobacco and Firearms.  
Chief, Library Division, Treasury Department Library, Room 5010, U.S. Treasury Department, 15th Street and Pennsylvania Avenue NW., Washington, DC 20220.

Copies are also available for purchase from the:

National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

It is anticipated that a decision on the use of polyvinyl chloride liquor bottles will be made shortly after the expiration of 30 days from the date of this notice.

[SEAL] WARREN F. BRECHT,  
Assistant Secretary of the Treasury.

#### DEPARTMENT OF DEFENSE

##### Office of the Secretary DOD-INDUSTRY INTEGRATED LOGISTIC SUPPORT ADVISORY COMMITTEE

##### Notice of Meeting

The DOD-Industry Integrated Logistic Support Advisory Committee to the Assistant Secretary of Defense (Installations and Logistics) will meet in open session beginning 0900-1600, March 27, 1973, in Conference Room 1E 801 No. 7, the Pentagon, Washington, D.C. In accordance with the Federal Advisory Committee Act the public is permitted to attend on a first-come basis subject to the limited number of seats available. Persons wishing to attend must submit their names, with affiliation, to Mrs. Roose (OX 7-0053) prior to close of business on March 23, 1973, in order to gain entrance to the Pentagon. The purpose of the meeting is to discuss the following agenda items and (1) review some of the past practices followed during the acquisition of major weapon systems and results realized; and (2) explore new areas and techniques to be considered in logistics support concepts during early development of major weapon systems for the DOD.

Presentation on the "Acquisition of research and development"—report

of the Commission on Government Procurement.

Presentation on the "Acquisition of major systems"—report of the Commission on Government Procurement.

Presentation on "Defense procurement and acquisition"—GAO.

Discussion on "Quantitative design-to-parameters for logistic support."

Discussion on "Methods and techniques for inclusion of logistic support parameters in source selection evaluation for contract award."

Discussion on "Failure-free warranty."

Discussion on "New DOD policy directive as related to provisioning of weapon systems."

Committee review and discussion:

1. Status Report, Task No. 2—Revamp ILS Guide 4100.35G.
2. Actions taken, Tasks 1, 3, 4, and 5.

MAURICE W. ROCHE,  
Director, Correspondence and  
Directives Division, OASD  
(Comptroller).

#### DEPARTMENT OF AGRICULTURE

##### Commodity Credit Corporation TOBACCO EXPORT PAYMENTS

##### Termination of Program

Notice is hereby given of the termination, effective as of June 25, 1973, of the Tobacco Export Program for which regulations issued by CCC are published in 7 CFR Part 1490. Pursuant to § 1490.12 of the regulations, the termination shall not be applicable to tobacco exported prior to the effective date of termination or to tobacco for which offers to export have been accepted by CCC in accordance with § 1490.6 of the regulations.

Exporters, who submit offers to export, are cautioned to take careful note of the provisions of § 1490.6(e) regarding the liquidated damages to be paid upon failure of the exporter to comply with all terms and conditions of the contract which would result from CCC's acceptance of an exporter's offer.

The required content of exporters' offers to export is outlined in § 1490.6 of the regulations. In accordance therewith, each offer must state that the exporter or a subsidiary of the exporter has already purchased or contracted to purchase the tobacco which the exporter is offering to export. The kind and type (as for example, "flue-cured, type 11-14," or "fire-cured, type 21-23") of tobacco which the exporter is offering to export must be stated, and for each stated kind and type, the quantity of 1972 crop and the quantity of 1971 and prior crops tobacco which it is offered to export. Quantities must be stated in terms of "unstemmed-leaf packed-weight or unstemmed-leaf packed-weight equivalent" so that the quantities will be appropriately stated regardless of whether unstemmed tobacco, stemmed tobacco, or both unstemmed tobacco and stemmed tobacco, is exported. Each offer must also state that it is subject to the terms and conditions of the Tobacco Export Program and that the tobacco will be ex-

ported within 48 months following the month of acceptance of the offer by CCC.

Effective date: June 25, 1973.

Signed at Washington, D.C., on March 19, 1973.

KENNETH E. FRICK,  
Executive Vice President,  
Commodity Credit Corporation.

#### DEPARTMENT OF COMMERCE

##### Maritime Administration

[Docket No. S-337]

##### ECOLOGICAL SHIPPING CORP.

##### Notice of Application

Notice is hereby given that application has been filed under the Merchant Marine Act of 1936, as amended, for operating-differential subsidy with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, to expire on June 30, 1973 (unless extended only for subsidized voyages in progress on that date). Inasmuch as the below-listed applicant, and/or related persons or firms, employ ships in the domestic intercoastal or coastwise service, written permission of the Maritime Administration under section 805 (a) of the Merchant Marine Act, 1936, as amended, will be required if the application for operating-differential subsidy is granted.

The following applicant has requested permission involving the domestic intercoastal or coastwise services described below:

Name of applicant. Ecological Shipping Corp. (Ecological).

Description of domestic service and vessels. The applicant, Ecological, will bareboat charter from Sun Shipbuilding & Dry Dock Co. or one of its subsidiary companies or nominee the 80,759 deadweight ton tanker SS *Notre Dame Victory*, which Ecological proposes to employ in bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics. Ecological does not directly or indirectly own, operate or charter any vessels engaged in the domestic intercoastal or coastwise service and is not applying under section 805(a) for permission to operate the SS *Notre Dame Victory* in domestic service. Sun Shipbuilding & Dry Dock Co., a wholly owned subsidiary of Sun Oil Co., is a stockholder in Ecological and is therefore an affiliated company. Accordingly, Ecological requests written permission under section 805(a) for the following: Sun Oil Co., through other wholly owned subsidiaries, owns and/or operates the following oil tankers which are normally operated in the coastwise trade: *Delaware Sun*, *New Jersey Sun*, *Western Sun*, *Eastern Sun*, *Pennsylvania Sun*, *Texas Sun*, and *America Sun*. In addition, Sun Shipbuilding & Dry Dock Co., through its wholly owned subsidiaries, owns the following vessels which are eligible for operation in the

domestic trades and which are bareboat chartered to operators who have, are, or may operate these vessels in the domestic, intercoastal, or coastwise trades: Trailerships *Ponce De Leon* and *Eric K. Holzer* and oil tankers *Joseph D. Potts*, *Sohio Intrepid* and *Sohio Resolute*. Sun Shipbuilding & Dry Dock Co., through a wholly owned subsidiary, bareboat charter the trailership *Fortaleza* for recharter to an operator who operates the ship in the domestic trades. Sun Shipbuilding & Dry Dock Co., through a wholly owned subsidiary, is a participant in a joint venture which bareboat charters the GTS *Adm. Wm. M. Callaghan* for recharter to Military Sealift Command. The *Callaghan* is eligible for operation in the domestic trades but is under long-term obligation to MSC. Sun Shipbuilding & Dry Dock Co. holds approximately 32.9 percent of the stock of Transamerican Trailer Transport, which operates the *Ponce De Leon*, *Eric K. Holzer*, and *Fortaleza* in the domestic trades. Neither Sun Shipbuilding & Dry Dock Co., Sun Oil Co., nor Transamerican Trailer Transport, nor any predecessors in interest, was in operation as a common carrier by water in the domestic, intercoastal, or coastwise trade in 1935.

Interested parties may inspect this application in the Office of the Secretary, Maritime Administration, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20235.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in this application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must, by close of business on April 3, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for April 5, 1973, at 10 a.m. in Room 4896, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20235. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act.

By order of the Maritime Administration.

Dated: March 22, 1973.

JAMES S. DAWSON, JR.,  
Secretary.

[FR Doc. 73-5942 Filed 3-26-73; 8:45 am]

**National Bureau of Standards  
VOLUNTARY PRODUCT STANDARDS  
Notice of Action on Proposed Withdrawal**

In accordance with § 10.12 of the Department's Procedures for the Development of Voluntary Product Standards (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of the nine standards identified below:

PS	2-66	Standard size of blackboard slate.
CS	3-65	Builders' template hinges.
CS	123-79	Grading of diamond powder.
SPR	10-47	Milk and cream bottles.
SPR	86-36	Classification of iron and steel scrap.
SPR	174-65	Cast iron radiators.
SPR	239-48	Flat veneer products.
SPR	236-54	Delivery cases for glass milk bottles and paperboard milk containers.
SPR	265-63	Forms for two-way concrete joist floor and roof construction.

Public notice of the Department's intention to withdraw these standards was published in the *FEDERAL REGISTER* on January 15, 1973 (38 FR 1523 and 1524), and a 45-day period was provided for the submission of comments or objections concerning the proposed withdrawal. No objections to the Department's intention of withdrawing any of these standards have been received by the National Bureau of Standards.

The effective date for the withdrawal of these standards will be May 15, 1973. This withdrawal action terminates the authority to refer to these standards as Voluntary Product Standards developed under the Department of Commerce Procedures.

Dated: March 21, 1973.

**RICHARD W. ROBERTS,**  
*Director.*

[FR Doc.73-5747 Filed 3-26-73; 8:45 am]

**DEPARTMENT OF HEALTH,  
EDUCATION, AND WELFARE**

**Food and Drug Administration**

[DESI 9217; Docket No. FDC-D-552; NDA 5-691 etc.]

**CERTAIN ANTIHYPERTENSIVE-  
BARBITURATE COMBINATION DRUGS  
Notice of Withdrawal of Approval of New  
Drug Applications**

On December 23, 1972, there was published in the *FEDERAL REGISTER* (37 FR 28432) a notice of opportunity for hearing (DESI 9217) in which the Commissioner of Food and Drugs proposed to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the new drug applications for the subject drugs. The basis of the proposed withdrawal of approval was the lack of substantial evidence that these fixed combination drugs will have the effects that they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling, and that each component of such combinations contributes to the total effects claimed.

**NOTICES**

A notice was published in the *FEDERAL REGISTER* of October 27, 1971, withdrawing approval of NDA 10-129 for Veratensil R-S Tablets containing rauwolfia serpentina, phenobarbital, powdered extract aconite, veratrum viride, potassium bicarbonate, and potassium nitrate; formerly marketed by Richlyn Laboratories, 3725 Castor Avenue, Philadelphia, PA 19124. Approval was withdrawn on the grounds that reports required under section 505(j) of the Act (21 U.S.C. 355(j)) and §§ 130.13 and 130.35 (e) and (f) of the new drug regulations (21 CFR 130.13 and 130.35) had not been submitted. At that time no final effectiveness classification of the drug had yet been made. The conclusions described herein are applicable to that drug product.

Neither Mallinckrodt, holder of the following new drug applications, nor any other interested person has filed a written appearance of election as provided by said notice. The failure to file such an appearance constitutes an election by such persons not to avail themselves of the opportunity for a hearing.

1. That part of NDA 5-691 pertaining to Vertavis-Phen Tablets containing veratrum viride and phenobarbital; and
2. That part of NDA 9-217 pertaining to Unitenes-Phen Tablets containing cryptenamine as tannate salts, and phenobarbital; Mallinckrodt Chemical Works, Pharmaceutical Products Division, Post Office Box 5439, St. Louis, MO 63160.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug applications reviewed and are subject to this notice. See 21 CFR 130.40 (37 FR 23185, Oct. 31, 1972). Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

The Commissioner of Food and Drugs, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1053, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to him (21 CFR 2.120), finds that on the basis of new information before him with respect to the drugs evaluated together with the evidence available to him when the applications were approved, there is a lack of substantial evidence that the drugs will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof.

Therefore, pursuant to the foregoing findings, approval of pertinent parts of the above new drug applications and all amendments and supplements applying thereto is withdrawn effective on the date of publication hereof in the *FEDERAL REGISTER*. Shipment in interstate commerce of the above-listed drug products or of any identical, related, or similar product, not the subject of an approved

new drug application, is henceforth unlawful.

Dated: March 12, 1973.

**SAM D. FINE,**  
*Associate Commissioner  
for Compliance.*

[FR Doc.73-5757 Filed 3-26-73; 8:45 am]

[DESI 10176; Docket No. FDC-D-600; NDA No. 10-176 etc.]

**CERTAIN COMBINATION ANTICHOLIN-  
ERGIC GASTROINTESTINAL DRUGS**

**Notice of Opportunity for Hearing on Pro-  
posal To Withdraw Approval of New  
Drug Applications**

In a notice (DESI 10176) published in the *FEDERAL REGISTER* of April 22, 1971 (36 FR 7614), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the drugs described below stating that the drugs were regarded as possibly effective and lacking substantial evidence of effectiveness for the various labeled indications. The possibly effective indications have been reclassified as lacking substantial evidence of effectiveness in that no data have been received pursuant to the notice. Lakeside has stated that marketing of Tridal Tablets has been discontinued.

NDA No.	Drug	NDA Holder
10-176	Tridal Tablets containing piperidate hydrochloride and piperidate bromide.	Lakeside Laboratories, Inc., 1707 East North Ave., Milwaukee, WI 53201.
10-907	Benzonine Suspension containing dicyclanil hydrochloride, sodium lauryl sulfate and hydrolyzed sodium carboxymethyl-cellulose.	Merrell-National Laboratories, Division of Richardson-Merrell Inc., 110 East Amity Rd., Cincinnati, OH 45216.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, Oct. 31, 1972). Any manufacturer or distributor of such an identical, related, or similar

product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before April 26, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before April 26, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested per-

son, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: March 16, 1973.

**NATIONAL ADVISORY COUNCIL ON EX-  
TENSION AND CONTINUING EDUCATION  
Notice of Public Meeting**

Notice is hereby given, pursuant to Federal Advisory Committee Act, P.L. 92-463, that the next meeting of the National Advisory Council on Extension and Continuing Education will be held on May 30 and 31, 1973, at the Cosmopolitan Hotel in Denver, Colo. The meetings on both days will begin at 9 a.m., local time.

The National Advisory Council on Extension and Continuing Education is authorized under Public Law 89-329. The Council is directed to advise the Commissioner of Education in the preparation of general regulations and with respect to policy matters arising in the administration of title I, and to report annually to the President on the administration and effectiveness of all federally supported extension and continuing education programs, including community service programs.

The meeting of the Council shall be open to the public. Complete agenda and records shall be kept of all Council proceedings and they will be available for public inspection at the Office of the Council's Executive Director, located in Room 710, 1325 G Street NW., Washington, DC.

**DEPARTMENT OF HOUSING AND  
URBAN DEVELOPMENT**

**Office of the Secretary**

[Docket No. D-73-221]

**ASSISTANT SECRETARY FOR COMMUNITY  
PLANNING AND DEVELOPMENT**

**Delegation of Authority**

The Department is combining certain of its administrative components. As a result, certain powers, functions, and responsibilities are being transferred or consolidated. The former positions of Assistant Secretary for Community Development and Assistant Secretary for Community Planning and Management are both being abolished and a new position of Assistant Secretary for Community Planning and Development is being created. All of the authority and functions formerly exercised by either the Assistant Secretary for Community Development and the Assistant Secretary for Community Planning and Management are being delegated and assigned to the new office.

Accordingly, the Secretary delegates as follows:

**Section A. Authority delegated.** The Assistant Secretary for Community Planning and Development is authorized to exercise the power and authority of the Secretary with respect to all programs and matters heretofore vested in the Assistant Secretary for Community Development and the Assistant Secretary for Community Planning and Management by delegations or designations in effect immediately prior to this authorization, and all power and authority reserved to the Secretary by delegations to the Assistant Secretary for Community Development and the Assistant Secretary for Community Planning and Management in effect immediately prior to this authorization remain reserved to the Secretary.

**Sec. B. Continuation in effect of re-delegations.** All redelegations of authority by the Assistant Secretary for Community Development and the Assistant Secretary for Community Planning and Management that are in effect as of the date of issuance of this authorization are continued in effect as if issued under this document, unless and until expressly modified or revoked by a delegation or redelegation of authority issued hereafter.

**Sec. C. Superseding.** This delegation supersedes preceding delegations to the Assistant Secretary for Community Development and the Assistant Secretary for Community Planning and Management.

(Sec. 7(d), Department of HUD Act; 42 U.S.C. 3535(d))

**Effective date.** This delegation of authority is effective as of March 7, 1973.

JAMES T. LYNN,  
Secretary of Housing  
and Urban Development.

[Docket No. D-73-223]

#### ASSISTANT SECRETARY FOR POLICY DEVELOPMENT AND RESEARCH Delegation of Authority

The Department is combining certain administrative components. As a result, various powers, functions, and responsibilities are being transferred or consolidated. The former position of the Assistant Secretary for Research and Technology is being abolished, a new position of Assistant Secretary for Policy Development and Research is being created, and there is being consolidated in the new position the powers, responsibilities, and functions heretofore exercised by the Assistant Secretary for Research and Technology and certain of the powers, responsibilities, and functions heretofore exercised by the Deputy Under Secretary for Policy Analysis and Program Evaluation. The position of Deputy Under Secretary for Policy Analysis and Program Evaluation is re-titled Deputy Under Secretary.

Accordingly, the Secretary delegates as follows:

**Section A. Authority delegated.** The Assistant Secretary for Policy Development and Research is authorized to exercise the power and authority of the Secretary with respect to all programs and matters heretofore vested in the Assistant Secretary for Research and Technology by delegations or designations in effect immediately prior to this authorization, and is further authorized to exercise all of the authority, powers, functions, and duties heretofore delegated and assigned to the Deputy Under Secretary for Policy Analysis and Program Evaluation which relate to:

1. Policy and program analysis and evaluation and policy and program formulation and development.
2. Economic analysis.
3. Data systems and statistics.

**Sec. B. Continuation in effect of re-delegations.** All redelegations of authority by the Assistant Secretary for Research and Technology in effect as of the date of issuance of this authorization are continued in effect as if issued under this document, unless and until expressly modified or revoked by a delegation or redelegation of authority issued hereafter.

**Sec. C. Superseding.** This delegation supersedes preceding delegations to the Assistant Secretary for Research and Technology and any delegations or assignments to the Deputy Under Secretary for Policy Analysis and Program Evaluation that are inconsistent with section A of this document.

(Sec. 7(d), Department of HUD Act; 42 U.S.C. 3535(d))

**Effective date.** This delegation is effective as of March 7, 1973.

JAMES T. LYNN,  
Secretary of Housing  
and Urban Development.

[Docket No. D-73-225]

#### EXECUTIVE ASSISTANT TO THE SECRETARY

##### Delegation of Authority To Authorize or Approve Travel

James A. Wilderotter, Executive Assistant to the Secretary, is hereby empowered to:

1. Authorize or approve travel of employees within the Office of the Secretary, including experts and consultants; of members of advisory committees; and of invitational non-Government persons; and
2. Take related action provided for in HUD Handbook 2300.2A, Travel.

(Sec. 7(d), Department of HUD Act; 42 U.S.C. 3535(d))

**Effective date.** This delegation of authority is effective March 4, 1973.

JAMES T. LYNN,  
Secretary of Housing  
and Urban Development.

[FR Doc. 73-5752 Filed 3-26-73; 8:45 am]

[Docket No. N-73-143]

#### OFFICE OF DEPUTY UNDER SECRETARY Notice of Establishment

There has been established in the Department of Housing and Urban Development a Deputy Under Secretary who serves in the Office of the Secretary to assist the Under Secretary and perform such duties as he prescribes.

(Sec. 7(d), Department of HUD Act; 42 U.S.C. 3535(d))

**Effective date.** This notice shall be effective March 7, 1973.

JAMES T. LYNN,  
Secretary of Housing  
and Urban Development.

#### DEPARTMENT OF TRANSPORTATION

Coast Guard  
[CGD 73-57N]

#### EQUIPMENT, CONSTRUCTION, AND MATERIALS

##### Termination of Approval Notice

1. Certain laws and regulations (46 CFR Ch. I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Shelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been terminated as herein described during the period from December 27, 1972, to January 25, 1973 (List No. 4-73). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of title 46, United States Code, section 1333 of title 43, United States Code, and section 198 of title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction and materials are set forth in 46 CFR Parts 160 to 164.

3. Notwithstanding the termination of approval listed in this document, the equipment affected may be used as long as it remains in good and serviceable condition.

##### BUOYANT VESTS, KAPOK, OR FIBROUS GLASS

The Billy Boy Products, Inc., Quincy, Mich. 49082, no longer manufactures certain kapok buoyant vests for Sears, Roebuck and Company, 925 South Homan Avenue, Chicago, IL 60607 and Approval No. 160.047/547/0 was therefore terminated effective December 27, 1972.

**SPECIAL PURPOSE WATER SAFETY BUOYANT DEVICES FOR DESIGNATED USE ON ALL MOTORBOATS AND FOR GENERAL USE ON MOTORBOATS OF CLASSES A, 1, OR 2 NOT CARRYING PASSENGERS FOR HIRE**

The Farwest Garments, Inc., 1100 Poplar Place South, Seattle, WA 98144, no longer manufactures certain special purpose water safety buoyant devices and Approval No. 160.064/186/0 was therefore terminated effective January 3, 1973.

#### DECK COVERINGS FOR MERCHANT VESSELS

The Kompolite Products Co., Inc., 55 Webster Avenue, New Rochelle, NY 10801, Approval No. 164.006/33/0 expired and was terminated effective January 25, 1973.

Dated: March 20, 1973.

G. H. READ,  
Captain, U.S. Coast Guard, Acting  
Chief, Office of Merchant  
Marine Safety.

#### ATOMIC ENERGY COMMISSION

[Docket No. 50-213]

#### CONNECTICUT YANKEE ATOMIC POWER CO.

##### Availability of AEC Draft Environmental Statement

Pursuant to the National Environmental Policy Act of 1969 and the U.S. Atomic Energy Commission's regulations in Appendix D to 10 CFR Part 50, notice is hereby given that a draft environmental statement prepared by the Commission's Directorate of Licensing, related to the proposed issuance of a full-term operating license for the Haddam Neck Plant by Connecticut Yankee Atomic Power Co., located in Haddam, Middlesex County, Conn., is available for inspection by the public in the Commission's Public Document Room at 1717 H Street NW., Washington, DC and in the Russell Library, 119 Broad Street, Middletown, CT 06457. The draft statement is also being made available at the Mid-state Regional Planning Agency, Post Office Box 139, Middletown, CT 06458 and the Office of State Planning, Department of Finance and Control, 340 Capitol Avenue, Hartford, CT 06115. Copies of the Commission's Draft Environmental Statement may be obtained by request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545. Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

The Applicant's Environmental Report, as supplemented, submitted by Connecticut Yankee Atomic Power Co. is also available for public inspection at the above-designated locations. Notice of availability of the Applicant's Environmental Report was published in the Federal Register on August 11, 1972 (37 FR 16217).

Pursuant to 10 CFR Part 50, Appendix D, interested persons may, on or before May 11, 1973, submit comments on the Applicant's Environmental Report, as supplemented, and the Draft Environ-

mental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Applicant's Environmental Report and the Draft Environmental Statement (local agencies may obtain these documents upon request). When comments thereon by Federal, State, and local officials are received by the Commission, such comments will be made available for public inspection at the Commission's Public Document Room in Washington, D.C. and the Russell Library, 119 Broad Street, Middletown, CT 06457. Comments on the Draft Environmental Statement from interested members of the public should be addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Md., this 21st day of March 1973.

For the Atomic Energy Commission.

B. J. YOUNGBLOOD,  
Chief, Environmental Projects  
Branch 3, Directorate of Li-  
censing.

#### PREPARATION OF ENVIRONMENTAL REPORTS FOR NUCLEAR POWER PLANTS Regulatory Guides; Notice of Issuance and Availability

The Atomic Energy Commission has issued a new guide, Regulatory Guide 4.2, in its regulatory guide series. This series has been developed to describe and make available to the public methods acceptable to the AEC regulatory staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The new guide, "Preparation of Environmental Reports for Nuclear Power Plants," is in Division 4, "Environmental and Siting Guides," of the regulatory guide series. The guide will serve as an aid to applicants for nuclear power plant construction permits and operating licenses in the preparation of their environmental reports. It provides comprehensive guidance on the information needed by the AEC for evaluation of the environmental impact associated with construction and operation of a nuclear power plant.

Regulatory Guide 4.2 represents a substantial revision of the August 1972 version, taking into account extensive written comments on the earlier draft received from Federal and State agencies, utilities and utility groups, architect-engineering firms, equipment suppliers, environmental groups and others, as well as information gathered at the public meeting held at the AEC regulatory offices in Bethesda, Md., on October 12, 1972.

Comments and suggestions in connection with improvements in regulatory guides are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545. Attention: Chief, Public Proceedings Staff. Copies of issued guides made be obtained by request to the U.S. Atomic Energy Commission, Washington, D.C. 20545. Attention: Director of Regulatory Standards.

Other Division 4 regulatory guides currently being developed include the following:

Standardized Procedures for Analyses of Radioactivity in Environmental Samples (Pu).  
Standardized Procedures for Analyses of Radioactivity in Environmental Samples (I-129, I-131).  
Standardized Procedures for Analyses of Radioactivity in Environmental Samples (Sr-89, Sr-90).

(5 U.S.C. 522(a))

Dated at Bethesda, Md., this 22d day of March 1973.

For the Atomic Energy Commission.

ROBERT MINOGUE,  
Acting Director  
of Regulatory Standards.

[FR Doc. 73-5841 Filed 3-26-73; 8:45 am]

# ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

## Notice of Meeting

MARCH 23, 1973.

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on April 12-14, 1973, at Room 1046, 1717 H Street NW., Washington, DC.

The following constitutes that portion of the Committee's agenda for the above meeting which will be open to the public:

(1) Thursday, April 12, 10 a.m.-3 p.m.—application for operating license—Cooper Nuclear Station. (Presentations by regulatory staff and applicant.)

(2) Friday, April 13, 10 a.m.-3 p.m.—Application for operating license—Prairie Island Nuclear Generating Plant Units 1 and 2. (Presentations by regulatory staff and applicant.)

In addition to the above agenda items, the Committee will hold executive sessions not open to the public, under the authority of section 10(d) of Public Law 92-463 (the Federal Advisory Committee Act), to consider the above applications and other matters.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items (1) and (2) listed above, the following requirements shall apply:

(a) Persons wishing to submit written statements on those agenda items may do so by mailing 25 copies thereof, postmarked no later than April 5, 1973, to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon the application for operating license and related documents for the Cooper Nuclear Station or the application for operating license and related documents for the Prairie Island Nuclear Generating Plant, Units 1 and 2, as appropriate. These applications and related documents are on file and available for public inspection at the AEC's Public Document Room, 1717 H Street NW., Washington, DC 20545. In addition, the Cooper Nuclear Station documents are available at the Auburn Public Library, 1118 15th Street, Auburn, NE 68305, and the Prairie Island Nuclear Generating Plant documents are available at the Environmental Library of Minnesota, 1222 Fourth Street SE., Minneapolis, MN 55414.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement, and shall set forth reasons justifying the need for such oral statement and its usefulness to the Committee. To the extent that the time available for the meeting permits, the Committee will receive oral

## NOTICES

statements during a period of not more than 30 minutes at an appropriate time, chosen by the Chairman, between the hours of 11 a.m. and 2 p.m. on each day.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Committee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on April 11, 1973, to the Office of the Executive Secretary of the Committee (telephone: 301-973-5651) between 8:30 a.m. and 5:15 p.m. e.s.t.

(e) Questions may be propounded only by members of the Committee and its consultants.

(f) Seating for the public will be available on a first-come-first-served basis.

(g) Copies of minutes of public sessions will be made available for copying, in accordance with the Federal Advisory Committee Act, on or after May 29, 1973, at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, DC, upon payment of all charges required by law.

JOHN V. VINCIGUERRA,  
Advisory Committee  
Management Officer.

## CIVIL AERONAUTICS BOARD ASSOCIATED AIR FREIGHT, INC.

Application for Pickup and Delivery Zone

MARCH 22, 1973.

In accordance with Part 222 (14 CFR Part 222) of the Board's Economic Regulations (effective June 12, 1964), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 25340, from Associated Air Freight, Inc., 187-16 146th Avenue, Jamaica, NY 11434, for authority to provide pickup and delivery service between Hartford, Conn., and Danbury, Conn., which is 63 miles from Hartford.

Under the provisions of § 222.3(c) of Part 222, interested persons may file an answer in opposition to or in support of this application on or before April 10, 1973. An executed original and 19 copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, DC 20428. It shall set forth in detail the reasons for the position taken and include such economic data and facts as are relied upon, and shall be served upon the applicant and state the date of such service.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

## PAN AMERICAN WORLD AIRWAYS, INC. Postponement of Hearing

At the request of the Bureau of Enforcement, hearing in the above-entitled proceeding previously scheduled for March 27, 1973 (38 FR 5279), is hereby postponed until May 1, 1973, at 10 a.m. (local time), in Room 911, Universal Building, 1825 Connecticut Avenue NW., Washington, DC, before the undersigned administrative law judge.

Dated at Washington, D.C., March 21, 1973.

[SEAL] RICHARD M. HARTSOCK,  
Administrative Law Judge.

[FR Doc. 73-5788 Filed 3-26-73; 8:45 am]

[Docket No. 20993; Order 73-3-81]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

Allowable Free Storage Time for Imports

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 21st day of March 1973.

On November 29, 1972, the U.S. Court of Appeals for the District of Columbia Circuit filed its decision in "American Importers Association v. Civil Aeronautics Board," C.A.D.C. No. 24,849, remanding for further proceedings the record on which the Board based its approval, subject to conditions, of an agreement between various air carriers and foreign air carriers embodied in a resolution of the Traffic Conferences of the International Air Transport Association (IATA) relating to the allowable free storage time for import shipments at U.S. air terminals. Pending further proceedings on the remand, the Court suspended its decision "with respect to the approval by the Board of the agreement" by its Orders 70-5-93 and 70-10-53.

The subject agreement, as approved and conditioned by the Board, provided a 48-hour period of free storage on import shipments at U.S. air terminals, excluding weekends and legal holidays, commencing at 8 a.m. of the day "following notification to the consignee or his agent that a consignment has arrived and is available for the purpose of clearing customs." The agreement, by elimi-

ating the Board's approval of the subject agreement by the appealed orders ran until Sept. 30, 1971. Subsequently, by Order 71-10-49, dated Oct. 13, 1971, the Board approved a new agreement adopted by the member carriers of IATA which, in effect, extended the existing provisions for free storage another 2 years, i.e., to Sept. 30, 1973. Under these circumstances, we expect all parties to cooperate to achieve a prompt resolution of the issues delineated herein.

## NOTICES

inating a provision which permitted carriers, by local agreement, to extend the permissible free storage time at local airports, had the effect of changing the theretofore existing period of free storage by 1 day.

In its remand concerning the subject agreement, the Court of Appeals concluded that the record of the proceedings furnished "an inadequate basis" for reaching the public interest determinations which were deemed necessary in view of the "colorable antitrust claims" arising from the agreement. It determined that an expansion of the record to reflect the effect of the conditioned agreement on "the ongoing operations at international air terminals . . . might well . . . illuminate factors bearing on the public interest to a degree which justifies amplification of the record for Board consideration prior to final decision by the court." Principally, the Court concluded we had an inadequate record before us since we lacked information on the experience gained by shippers and carriers: (1) Under the IATA free storage rule, as conditioned and approved by us in Order 69-9-90, dated September 15, 1969 (i.e., 48-hour free storage period would not begin to run until 8 a.m. of the day after the consignee is notified he can clear his shipment out of customs and the 48-hour period would not include legal holidays and weekends); and (2) under the procedures set up by the carriers (pursuant to Order 70-5-93, dated May 19, 1970), which were designed to insure proper application of storage charges, and the records maintained in conjunction with such procedures.

This did not necessarily mean decreasing "free" storage time from 3 to 2 days. "Free" time could still be 4, 5, or even 7 days depending on circumstances. This is due to the condition we attached to our approval of the amended IATA storage rule, i.e., the 48-hour free period would not start running until 8 a.m. of the day after the consignee is notified his shipment is available for pick up. Given this condition, and the fact that holidays and weekends are not included in the 48-hour period, an importer could end up with 7 "free" days if his shipment arrives on a Friday of a Monday holiday weekend and he is not notified until Tuesday of his shipment's arrival. Computing 48 hours from Wednesday at 8 a.m., he could pick up his shipment early Friday morning (before 8 a.m.) and not incur demurrage.

We took no action on the weekend-holiday computation rule since that rule, as framed, was already part of the subject resolution in the agreement.

In Order 70-5-93, the Board made it clear that it was incumbent upon the carriers to maintain records and employ procedures to insure the correct application of storage charges when appropriate, and that the Board would expect the records and procedures developed by the carriers "to provide adequate safeguards against the assessment of storage in situations where freight is not available for pickup because it cannot be located, as referred to by AIA, or for that matter, any other reason after notification of arrival." Accordingly, the Board is now calling for information concerning the manner in which carriers have been applying the storage provisions in accordance with Order 70-5-93.

Accordingly, we are calling for submissions from all interested persons pursuant to the intent of the Court's decision. Specifically, the Board desires the further information and data as set forth in Appendix A attached hereto.

To insure prompt compliance with the mandate of the Court, all interested persons are directed to submit to the Board, within 30 days after the effective date of this order, data and information addressed to the points set forth in Appendix A. Within 15 days thereafter, all interested persons are directed to file such replies in rebuttal thereto as they desire.

Accordingly, pursuant to the Federal Aviation Act of 1958 and the order of the U.S. Court of Appeals for the District of Columbia Circuit in "American Importers Association v. Civil Aeronautics Board," C.A.D.C. No. 24,849, dated November 29, 1972,

It is ordered, That:

1. The record in Docket 20993 be and hereby is reopened for the purpose of receiving additional evidence;

2. Any interested person may submit comments in accordance with the schedule set forth above addressed to the matters delineated in the appendix.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

## APPENDIX A

I. Carrier parties, AIA, and/or individual shipper-importers are to submit the following:

(1) By midmonth of each annual quarter and for airports which experienced a relatively high degree of import activity for the calendar year 1972, supply the following data:

(a) Total number of import shipments received;

(b) Number of such shipments which were assessed demurrage;

(c) Total amount of demurrage assessed;

(d) Reasons why each shipment incurred demurrage;

(e) Explanation of each incident where demurrage was assessed in accordance with the time limitations of the agreement, but such charge was not assessed;

(f) Where possible, provide arrival time, notification time, and pick-up time of import shipments received.

(2) By midmonth of each annual quarter and for airports which experienced a relatively high degree of import activity for the calendar year 1972, supply the following data:

(a) Total number of import shipments received;

(b) Number of such shipments which were assessed demurrage;

(c) Total amount of demurrage assessed;

(d) Reasons why each shipment incurred demurrage;

(e) Explanation of each incident where demurrage was assessed in accordance with the time limitations of the agreement, but such charge was not assessed;

(f) Where possible, provide arrival time, notification time, and pick-up time of import shipments received.

(3) The Court specifically gave the Board wide latitude in determining the procedures which it should use to obtain the necessary amplification of the record. As the information necessary to enable the Board to render adequate public interest determinations regarding the agreement is largely related to facts not in dispute, we see no purpose to be served in initiating full-scale evidentiary hearings. Rather, we anticipate that written submissions from interested persons addressed to the points outlined in the appendix will not only provide a complete record in conformity with the Court's decision but will also enable the prompt resolution of the reopened proceedings.

At the very least we expect John F. Kennedy International, O'Hare International, and L.A. International to be sampled. However, this should not in any way suggest precluding other airport sampling if carriers and/or importers so desire.

calendar year 1972, supply data on the average length of time shipments were in:

(a) Free storage (where no demurrage is charged);

(b) Storage beyond the free period (where demurrage is charged);

(c) Storage (whether or not demurrage is charged).

(3) Provide any additional data or information relevant to the determinations required by the court's decision including information related to the need for flexibility in free storage time at local airports.

II. For carrier parties only, provide a detailed description, including company manuals, setting forth the procedures to be followed in notifying shippers of shipment arrivals; making shipments available to shippers; assessing demurrage; and the means to determine compliance with such procedures. If these procedures differ by airport, detail the information accordingly. Submit copies of all records maintained pursuant to such procedures.

III. For AIA and/or individual shipper-importers only, describe how an import shipment is processed through your organization, including information on:

(a) The manner in which notification of its arrival is received;

(b) The steps taken to ensure the shipment is picked up within the "free" storage period;

(c) The method employed to ensure that subsequent pick up attempts are made by your employees when the original pick up attempt is unsuccessful;

(d) The method employed to ensure that all demurrage assessments are in accordance with governing carrier tariff provisions.

## COMMISSION ON CIVIL RIGHTS

IOWA STATE ADVISORY COMMITTEE

Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Iowa State Advisory Committee will convene at 8:30 a.m. on March 30, 1973, at the Federal Building, Fort Dodge, Iowa 50501. This meeting shall be open to the public and the press.

The purposes of this meeting shall be to collect information concerning legal developments constituting a denial of the equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin which pertain to minority housing, education, and employment problems in Fort Dodge, Iowa; to appraise denials of equal protection of the laws under the Constitution because of race, color, religion, sex, or national origin as these pertain to minority housing, education, and employment problems in Fort Dodge, Iowa; and to disseminate information with respect to denials of the equal protection of the laws because of race, color, religion, sex, or national origin as these pertain to minority housing, education, and employment problems in Fort Dodge, Iowa; and to related areas.

A closed or executive session of the Iowa State Advisory Committee will convene on March 29, at 1 p.m. At this session committee members will discuss

matters which may tend to defame, degrade, or incriminate individuals, and as such this session is closed to the public.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., March 19, 1973.

ISAIAH T. CRESWELL, Jr.,  
Advisory Committee  
Management Officer.

# DELAWARE RIVER BASIN COMMISSION WEST DEPTFORD TOWNSHIP PROJECT, ET AL.

## Notice of Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Thursday, March 29, 1973, in the New Jersey Cultural Center Auditorium (adjacent to the State House) on West State Street in Trenton beginning at 2 p.m. The subjects of the hearing will be as follows:

A. A proposal to amend the Comprehensive Plan so as to include therein the following projects:

1. *West Deptford Township:* A well water supply project to augment public water supplies in West Deptford Township, Gloucester County, N.J. Two new wells and three existing wells will be utilized to provide a maximum combined diversion from the ground of 4.08 million gallons per day.

2. *Willingboro Township Municipal Utilities Authority:* A well water supply project to augment public water supplies in Willingboro Township and the Village of Rancocas, Burlington County, N.J. Two new wells and five existing wells will be utilized to provide a maximum combined diversion from the ground of 10 million gallons per day.

B. A proposal to approve the following water pollution abatement schedules as submitted in accordance with section 3-4.2(2) of the Basin Regulations-Water Quality:

1. *Amoco Chemicals Corp. (A-73-1):* A violation of the effluent requirements of the Commission's Basin Regulations was determined for this facility located in New Castle, Del., and discharging into Zone 5 of the Delaware Estuary. An allocation of carbonaceous (first-stage) oxygen demand will be made for this facility. The proposed abatement schedule requires a minimum waste reduction of 87.5 percent and requires that facilities to accomplish this reduction shall go into operation not later than April 1, 1975.

2. *E. I. du Pont de Nemours & Co., Inc. (A-71-15 Revision):* An allocation of first-stage oxygen demand has been made for this facility located in Edge Moor, Del., and discharging into Zone 5 of the Delaware Estuary. An original abatement schedule for this facility was approved on May 27, 1971, and requires a minimum waste reduction of 87.5 percent and that treatment facilities to accomplish this reduction shall go into operation not later than September 30, 1974. The proposed revision changes the interim dates of the abatement schedule but the completion date of the original schedule remains unchanged.

Documents relating to the above projects may be examined at the Commission offices.

## NOTICES

Commission offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing.

W. BRINTON WHITALL,  
Secretary.

MARCH 15, 1973.

## ENVIRONMENTAL PROTECTION AGENCY ANSUL CO.

### Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U.S.C. 346a (d) (1)), notice is given that a petition (PP 3F1357) has been filed by the Ansul Co., Marinette, Wis. 54143, proposing establishment of tolerances (40 CFR Part 180) for residues of the herbicide methanearsonic acid (expressed as As<sub>2</sub>O<sub>3</sub>) in or on the raw agricultural commodities sugarcane at 0.39 part per million and grapes at 0.33 part per million from application of the disodium and monosodium salts of methanearsonic acid.

The analytical method proposed in the petition for determining residues of the herbicide consists of reduction of the residues to arsine which is then reacted with silver diethyldithiocarbamate in pyridine. The resulting red color is measured spectrophotometrically at 560 nanometers.

Dated: March 22, 1973.

HENRY J. KOPF,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5798 Filed 3-26-73; 8:45 am]

## EFFLUENT STANDARDS AND WATER QUALITY INFORMATION ADVISORY COMMITTEE

### Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given that a meeting of the Effluent Standards and Water Quality Information Advisory Committee will be held at 9:30 a.m., April 3, 1973, in the Crystal City Marriott Hotel in Crystal City, Arlington, Va.

This is a regularly scheduled meeting of this advisory committee. The agenda includes a review of the Agency's approach to developing effluent guidelines in implementing the Federal Water Pollution Control Act, as amended. The Committee will also discuss their future activities and the timing of these.

The meeting will be open to the public. Any member of the public wishing to attend or participate should contact Mr. Harold Coughlin, Effluent Guidelines Division, at (703) 557-1944.

WILLIAM D. RUCKELSHAUS,  
Administrator.

MARCH 22, 1973.

[FR Doc. 73-5797 Filed 3-26-73; 8:45 am]

## W. R. GRACE & CO.

### Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408 (d) (1), 68 Stat. 512; 21 U.S.C. 346a (d) (1)), notice is given that a petition (PP 3F1356) has been filed by W. R. Grace & Co., Washington Research Center, Clarksburg, MD 21029, proposing establishment of a tolerance (40 CFR Part 180) for residues of the fungicide ammonium isobutyrate in or on the raw agricultural commodity sorghum grain intended for use as animal feed only at 20,000 parts per million.

The analytical method proposed in the petition for determining residues of the fungicide is a gas chromatographic procedure with flame ionization detection.

Dated: March 22, 1973.

HENRY J. KOPF,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5799 Filed 3-26-73; 8:45 am]

## FEDERAL COMMUNICATIONS COMMISSION

[Report 640]

### COMMON CARRIER SERVICES INFORMATION

#### Domestic Public Radio Services Applica- tions Accepted for Filing

MARCH 19, 1973.

Pursuant to §§ 1.227(b) (3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business 1 business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cutoff dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60-day period, only if the Commission has not acted upon the application by that time pursuant to the application.

1. All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

2. The above alternative cutoff rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the Rules).

#### POINT-TO-POINT MICROWAVE RADIO SERVICE—continued

6648-C1-P-73—Indiana Bell Telephone Co. (KIT661), 1 mile southwest of New Unionville, Ind. Latitude 39°12'04" N., longitude 86°28'19" W. C.F. to change antenna system, power and replace transmitters on frequencies 6245.5V and 6226.5V toward Bloomington, Ind.; change frequencies from 6212.0H and 630.7H MHz to 6245.5H and 6226.5H MHz toward Morgantown, Ind.

6649-C1-P-73—Same (KIT660), 2.3 miles north-northeast of Morgantown, Ind. Latitude 39°24'15" N., longitude 86°15'03" W. C.F. to change frequencies from 5960.0H and 6078.6H MHz to 5974.8H and 6093.5H MHz toward New Unionville, Ind.; delete frequencies 5974.5V and 6093.5V MHz toward Indianapolis, Ind.

6650-C1-P-73—Same (KSL95), 119 East Seventh Street, Bloomington, IN. Latitude 39°10'07" N., longitude 86°31'48" W. C.F. to change antenna system, power and replace transmitters on frequencies 5974.8H and 6093.5H MHz toward New Unionville, Ind.; delete point of communication toward Hindustan, Ind.

6651-C1-P-73—United Telephone Company of Florida (KIW80), corner of East Avenue and Fourth Street, Boca Grande, Fla. C.F. to change antenna system and to change polarization from H to V on frequencies 6378.8V and 6397.4V MHz toward Pine Island, Fla.

6652-C1-P-73—Same (KJKA4), Tipson Drive, Pine Island, Fla. Latitude 26°36'50" N., longitude 82°06'51" W. C.F. to change antenna system and to change polarization from H to V on frequencies 6028.7V and 6145.3V MHz toward Boca Grande, Fla.

6653-C1-P-73—Western Telecommunications, Inc. (WOF60), Los Angeles, latitude 33°58'46" N., longitude 118°24'54" W. to add frequency 6345.5V on azimuth 09°33' towards new point of communication at Magic Mountain.

6654-C1-P-73—Same (New), C.F. for a new station, Magic Mountain, latitude 34°23'09" N., longitude 118°19'57" W., frequency 5974.8H on azimuth 189°36' towards Los Angeles and frequency 5945.2H on azimuth 333°18' towards Winters Ridge.

6657-C1-P-73—Same (New), C.F. for a new station, Winters Ridge, latitude 34°56'46" N., longitude 118°40'30" W., frequency 6226.9H on azimuth 183°06' towards Magic Mountain, and frequency 6197.2V on azimuth 339°50' towards Bakersfield.

6658-C1-P-73—Same (New), C.F. for a new station, Bakersfield, latitude 35°22'08" N., longitude 118°58'31" W., frequency 6004.5V on azimuth 149°39' towards Winters Ridge and frequency 5974.8H on azimuth 29°43' towards Mount Pleasant.

6659-C1-P-73—Same (New), C.F. for a new station, Mount Pleasant, latitude 35°38'27" N., longitude 118°47'08" W., frequency 6226.9H on azimuth 209°50' towards Bakersfield, and frequency 6197.2H on azimuth 329°06' towards Visalia.

6660-C1-P-73—Same (New), C.F. for a new station, Visalia, latitude 36°19'28" N., longitude 119°17'29" W., frequency 5945.2V on azimuth 149°48' towards Mount Pleasant, and frequency 5974.8V on azimuth 01°24' towards Bear Mountain.

6661-C1-P-73—Same (New), C.F. for a new station, Bear Mountain, latitude 36°44'46" N., longitude 119°16'43" W., frequency 6197.2V on azimuth 181°24' towards Visalia, and frequency 6226.9V on azimuth 269°37' towards Fresno.

6662-C1-P-73—Same (New), C.F. for a new station, Fresno, latitude 36°44'10" N., longitude 119°46'17" W., frequency 6063.8V on azimuth 88°20' towards Bear Mountain, and frequency 5945.2H on azimuth 342°38' towards Rabbit Hill.

6663-C1-P-73—Same (New), C.F. for a new station, Rabbit Hill, latitude 37°06'04" N., longitude 119°55'37" W., frequency 6197.2V on azimuth 162°33' towards Fresno, and frequency 6226.9H on azimuth 200°07' towards Merced.

6664-C1-P-73—Same (New), C.F. for a new station, Merced, latitude 37°17'20" N., longitude 120°27'32" W., frequency 5945.2V on azimuth 109°47' towards Rabbit Hill and frequency 5974.8H on azimuth 350°56' towards Rushing Mountain.

6665-C1-P-73—Same (New), C.F. for a new station, Rushing Mountain, latitude 37°49'43" N., longitude 120°34'03" W., frequency 6226.9H on azimuth 170°52' towards Merced, and frequency 6197.2V on azimuth 241°55' toward Modesto.

6666-C1-P-73—Same (New), C.F. for a new station, Modesto, latitude 37°36'38" N., longitude 121°00'04" W., frequency 5945.2V on azimuth 61°40' towards Rushing Mountain, and frequency 5945.2V on azimuth 278°49' towards Alhambra.

6667-C1-P-73—Same (New), C.F. for a new station, Alhambra, latitude 37°43'28" N., longitude 121°30'52" W., frequency 6197.2V on azimuth 98°25' towards Modesto, and frequency 10,775H on azimuth 253°13' towards Sunol Ridge.

Domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

#### APPENDIX

#### APPLICATIONS ACCEPTED FOR FILING DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

6645-C2-P-73—Professional Communications, Inc. (KGR857), C.F. to add frequency and antenna location (No. 3), operating on frequency: 152.03 MHz at 1611 Peach Street, Erie, PA.

6646-C2-P-73—Illinois Consolidated Telephone Co. (KSJ764), C.F. to replace transmitter, change power and add 152.3 emission. To operate on frequency 152.54 MHz at 301 North Madison, Litchfield, IL.

6647-C2-P-73—The Mountain States Telephone and Telegraph Co. (KOE513), C.F. for additional facilities and to change antenna system. Operating on 152.81 MHz at 6 miles south-southwest of Casper, Natrona County, Wyo. (Location No. 1) and 158.07 MHz at 103 North Durbin Street, Casper, Natrona County, Wyo. (Location No. 2).

6648-C2-P-73—Intrastate Radio Telephone, Inc. of San Francisco, Calif. C.F. for new one-way signaling stations to operate on 43.22 MHz at the following locations: Location No. 1, Wells Fargo Building, 44 Montgomery Street, San Francisco, CA. Location No. 2, Round Top Peak, Oakland, Calif. Location No. 3, San Bruno Peak, near South San Francisco, Calif. Location No. 4, 1200 Lakeshore Building, Oakland, Calif. Location No. 5, 7842 El Cerrito, Castro, Calif. Location No. 6, 4322 Base at Mount Sutro Tower, San Francisco, Calif.

6649-C2-P-73—Cable Telephone Company, Inc. (New), C.F. for a new two-way station, to operate on 152.78 MHz at Grodon, Ark. (Latitude 31°05'30" N., longitude 85°07'24" W.)

6650-C2-P-73—Radio Teletype Service (KLI956), C.F. for additional facilities, frequency: 434.072 MHz at Cooper Lake Road, 1.5 miles east of Mableton, Ga.

6651-C2-P-73—Area-Wide Paging Systems, Inc. Consent to Assignment of License from Area-Wide Paging Systems, Inc., assignor to Digital Paging Systems of Cleveland, Inc., assignee.

6652-C2-P-73—Mountain View Telephone Co. (New), C.F. for a new two-way station, to operate on 152.60 MHz at 1.8 miles southwest of Mountain View, Ark.

6653-C2-P-73—Empire Communications Co. (KOK331), C.F. to change antenna location, and control point location. Operating on frequency: 152.21 MHz at 392 East Third Street, Eugene, OR, and 454.15 MHz control at the same location.

6654-C2-P-73—Empire Communications Co. (KLI959), C.F. to change antenna system, antenna and control point location, operating on 152.24 MHz at 222 East Broadway, Eugene, OR.

#### Informative

It appears that the following applications may be mutually exclusive and subject to the Commission's rules regarding ex parte presentations, by reason of potential electrical interference.

Texas: Frequency: 152.21.  
Communication Industries (KKG565), 6980-C2-P-72.  
Albert W. Dale (KLI959), 8409-C2-P-72.

#### POINT-TO-POINT MICROWAVE RADIO SERVICE

6647-C1-P-73—Microwave Transmission Corp. (New), 9 miles west of Soledad, Palo Alto Peak, Calif. Latitude 36°24'12" N., longitude 121°29'14" W. C.F. for a new station on frequencies 11,665H and 11,425H MHz toward Atherton, Calif.

No. 58—Pt. I—7

FEDERAL REGISTER, VOL. 38, NO. 58—TUESDAY, MARCH 27, 1973

6608-C1-P-73—Same (New), C.P. for a new station, Sunol Ridge, latitude 37°39'17" N., longitude 121°57'25" W., frequency 11,625V on azimuth 73°02' towards Alamo, frequency 11,605V on azimuth 201°20' towards San Francisco, and frequency 11,385V on azimuth 177°29' towards San Jose.  
 6609-C1-P-73—Same (WO161), San Francisco, latitude 37°47'42" N., longitude 122°24'24" W., C.P. to add frequency 10,775V on azimuth 111°04' towards new point of communication Sunol Ridge.  
 6610-C1-P-73—Same (New), C.P. for a new station, San Jose, latitude 37°19'55" N., longitude 121°56'01" W., frequency 11,015V on azimuth 357°30' towards Sunol Ridge, and frequency 10,955H on azimuth 173°31' towards Mount Thayer.  
 6611-C1-P-73—Same (New), C.P. for a new station, Mount Thayer, latitude 37°09'35" N., longitude 121°54'33" W., frequency 11,405H on azimuth 363°32' towards San Jose, frequency 11,425H on azimuth 325°43' towards Palo Alto, frequency 6197.2V on azimuth 180°41' towards Monterey, and frequency 6226.9H on azimuth 156°32' towards Salinas.  
 6612-C1-P-73—Same (New), C.P. for a new station, Palo Alto, latitude 37°27'15" N., longitude 122°09'40" W., frequency 10,975V on azimuth 145°34' towards Mount Thayer.  
 6613-C1-P-73—Same (New), C.P. for a new station, Monterey, latitude 36°37'18" N., longitude 121°55'02" W., frequency 6152.8H on azimuth 00°41' towards Mount Thayer.  
 6614-C1-P-73—Same (New), C.P. for a new station, Salinas, latitude 36°40'03" N., longitude 121°38'39" W., frequency 5945.2V on azimuth 336°42' towards Mount Thayer.

## Informative

Applicant, Western Telecommunications, Inc., is filing 20 applications to provide Specialized Common Carrier services between Los Angeles and San Francisco, Calif., with intermediate stops in Bakersfield, San Jose, Palo Alto, Salinas and Monterey, Calif.  
 1891-C1-P-73—Union Telephone Co. (KSV50), 1/2 block west of Town Center, Manila, Utah, latitude 40°59'17" N., longitude 109°43'24" W., C.P. to add frequency 2189V MHz toward Hickey Mountain, Wyo., via Passive Reflector; add frequencies 11,405V and 11,565H MHz toward Dutch John, Utah via Passive Reflector; add frequencies 11,405V and 11,645V MHz toward Greendale, Utah via Passive Reflector; add frequencies 11,495V MHz toward Grizzly Ridge Repeater, Utah via Passive Reflector.  
 6477-C1-P-73—Same (New), approximately 5.25 miles southwest of Dutch John, Greendale, Utah, latitude 40°52'53" N., longitude 109°28'11" W., C.P. for a new station on frequencies 11,405H and 11,645V MHz toward Manila, Utah via Passive Reflector.  
 6478-C1-P-73—Same (New), 2 blocks northeast of Town Center, Dutch John, Utah, latitude 40°55'58" N., longitude 109°23'33" W., C.P. for a new station on frequencies 11,325V and 11,565H MHz toward Manila, Utah via Passive Reflector.  
 6479-C1-P-73—Same (New), 19.67 miles north of Vernal, Grizzly Ridge, Utah, latitude 40°55'58" N., longitude 109°23'33" W., C.P. for a new station on frequencies 11,325V and 11,565H MHz toward Vernal, Utah; frequencies 11,485V and 11,245H MHz toward Manila, Utah via Passive Reflector.  
 6480-C1-P-73—Same (KPV43), 0.5 mile south of Urie, Wyo., latitude 41°18'32" N., longitude 110°20'10" W., C.P. to change frequencies from 6415 to 2179V MHz toward Hickey Mountain, Wyo.  
 6481-C1-P-73—Same (KPV44), 4.5 miles northwest of Lonetree, Hickey Mountain, Wyo., latitude 41°6'19" N., longitude 110°12'27" W., C.P. to change frequencies from 6295 to 2199V MHz toward Urie, Wyo.; add new frequency 2118.2V MHz toward Manila, Utah via Passive Reflector, and to delete path to Dutch John Mountain, Utah on frequency 6295H MHz.  
 1890-C1-P-73—Union Telephone Co. (KQV88), 3.7 miles northeast of Dutch John Mountain, Utah, latitude 40°57'17" N., longitude 109°27'47" W., C.P. to delete path toward Hickey Mountain Wyo. on 6175V MHz.  
 6618-C1-P-73—Southern Bell Telephone and Telegraph Co. (KIY63), 218 College Street, Greenville, S.C., latitude 34°51'19" N., longitude 82°24'00" W., C.P. to add frequency 3710V MHz toward Paris Mountain, S.C.  
 6619-C1-P-73—Same (KIY62), on Paris Mountain, 6 miles north of Greenville, S.C., latitude 34°56'39" N., longitude 82°24'40" W., C.P. to add frequencies 11,495V, 11,285H, 11,365H, 11,445H, 11,525H and 11,605H MHz toward Greer, S.C.; frequencies 6226.9H and 6345.5H MHz toward Greenville, S.C.

FEDERAL REGISTER, VOL. 38, NO. 58—TUESDAY, MARCH 27, 1973

## NOTICES

FEDERAL RESERVE SYSTEM  
CITIZENS AGENCY, INC.

## Order Approving Formation of Bank Holding Company and Continuation of Insurance Agency Activities

The Citizens Agency, Inc., Minneapolis, Minn., has applied for the Board's approval, under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)), of formation of a bank holding company through acquisition of an additional 60 percent or more of the voting shares of The Citizens National Bank of Minneapolis, Minneapolis, Minn. (Bank). Applicant at present owns 22 percent of the voting shares of Bank. Consummation of the proposal would result in Applicant owning all shares of Bank except for directors' qualifying shares.

At the same time, Applicant has applied for the Board's approval under section 4(c)(8) of the Act, 12 U.S.C. 1843(c)(8) and § 225.4(b)(2) of the Board's Regulation Y for Applicant to continue to engage in the activities of a general insurance agency in a community of less than 5,000 persons.

Notice of receipt of the applications has been given in accordance with sections 3 and 4 of the Act, and the time for filing comments and views has expired. The Board has considered the applications in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)), and the considerations specified in section 4(c)(8) of the Act.

Applicant (wholly owned by a husband and wife) presently owns 110 shares of Bank and proposes to acquire an additional 300 shares of Bank from Applicant's own shareholders. Bank, with deposits of \$5.7 million, is the larger of two banks in Minneapolis and the third largest of five banks in Ottawa County. (All banking data are as of June 30, 1972.) On the facts herein and particularly since the transaction involves only a change from individual to corporate ownership of a single bank, consummation of the proposal will have no adverse effects on existing or potential competition.

Considerations relating to financial and managerial resources and prospects of Applicant and Bank appear to be generally satisfactory and consistent with approval. Although Applicant will assume debt incurred by its owners when Bank shares were acquired, it appears that such debt may be adequately serviced without placing an undue strain on Bank earnings. Considerations relating to the convenience and needs of the communities involved, with respect to the acquisition of Bank, are consistent with approval. It is the Board's judgment that the transaction would be in the public interest and that the application to acquire Bank should be approved.

Applicant has operated a general insurance agency from Bank's premises in

## Informative—Continued

6646-C1-P-73—Same (New), 7 miles southwest of San Ardo, Williams Hill, Calif., latitude 35°57'04" N., longitude 121°00'03" W., C.P. for a new station on frequencies 10,755H and 10,995H MHz toward Palo Escrito, Calif.

MARCH 19, 1973.

## Major Amendments

2783-C1-P-71—United Video, Inc. (New), 6 miles east of Warrenburg, Mo., latitude 38°45'24" N., longitude 93°37'46" W., Application amended: (a) To delete Elm, Mo., as point of communication and (b) to add frequency 11,225.0V MHz toward new point of communication at Odessa, Mo., on azimuth 310°41'.  
 2784-C1-P-71—Same (New), 2 miles south of Odessa, Mo., latitude 38°58'16" N., longitude 93°57'03" W., Application amended: (a) To relocate station to foregoing coordinates; (b) to delete Lees Summit, Mo., as point of communication; and (c) to add frequency 10,895V MHz toward new point of communication at Raytown, Mo., on azimuth 279°24'.  
 2785-C1-P-71—Same (New), 2 miles east of Raytown, Mo., latitude 39°01'46" N., longitude 94°24'19" W., Application amended: (a) To relocate station to foregoing coordinates; (b) to change frequency to 11,425V MHz toward Kansas City, Kans., on azimuth 291°43'; and (c) to add frequency 11,425V MHz, via power split, toward new point of communication at Raytown, latitude 39°00'39" N., longitude 94°27'48" W., Mo., on azimuth 247°40'. (Informative: United proposes to deliver the signal of KPLR-TV, St. Louis, Mo., to CATV systems in Kansas City, Kans. and Raytown, Mo.)  
 1878-C1-P-72—United Video, Inc. (New), 2 miles south of Stamps, Ark., latitude 33°19'34" N., longitude 93°29'39" W., Application amended: (a) To change frequencies to 5945.2H MHz and 6004.5H MHz toward Stephens, Ark., on azimuth 81°51' and (b) to add frequencies 5945.2H MHz and 6004.5H MHz toward Hope and Magnolia, Ark., on azimuths 350°57' and 99°18', respectively.  
 1879-C1-P-72—Same (New), 2.5 miles south of Stephens, Ark., latitude 33°22'30" N., longitude 93°04'53" W., Application amended: (a) To change azimuth toward Camden, Ark., to 39°25' and (b) to add frequencies 6197.2H MHz and 6315.9H MHz, via power split, toward new point of communication at El Dorado, latitude 33°14'09" N., longitude 92°38'45" W., Ark., on azimuth 110°43'.  
 1880-C1-P-72—Same (New), 1.9 miles northwest of Camden, Ark., latitude 33°36'06" N., longitude 92°51'31" W., Application amended: (a) To relocate station to foregoing coordinates, and (b) to change azimuth toward Elberta, Ark., to 73°11'. (Informative: United proposes to deliver the signals of television stations KDTV and KTVT, Dallas/Fort Worth, Tex., to CATV systems in Camden, Hope, and El Dorado, Ark. In addition, United proposes to deliver the signals of stations KARK-TV and KTHV, Little Rock, Ark., to CATV system in Magnolia, Ark. See Public Notices dated Aug. 14, 1972, Sept. 5, 1972, and Feb. 5, 1973.)  
 3516-C1-P-72—United Video, Inc. (New), 8.25 miles east-northeast of Preston, Okla., latitude 35°44'36" N., longitude 95°50'30" W., Application amended: (a) To add frequencies 11,505V MHz and 11,345V MHz toward new point of communication at Tulsa (latitude 36°05'58" N., longitude 95°54'05" W.), Okla., on azimuth 352°15'; (b) to change polarity of frequencies toward Muskogee, Okla., to vertical; and (c) to change azimuth toward Muskogee, Okla., to 97°03'. (Informative: United proposes to deliver the television signals of stations KDTV and KTVT, Dallas/Fort Worth, Tex., to CATV system in Tulsa, Okla.)  
 4575-C1-P-70—Southwest Texas Transmission Co. (KKY46), Las Moras, 3 miles northeast of Brackettville, Tex., latitude 29°21'33" N., longitude 100°23'11" W., Application amended to add frequency 6078.6H MHz toward Eagle Pass latitude 28°43'46" N., longitude 100°28'42" W., Tex., on azimuth 187°20'. (Informative: Southwest Texas Transmission proposes to deliver full-time the signal of KLRN-TV, San Antonio, Tex., to CATV system in Eagle Pass. The signal of KLRN-TV is presently delivered to the CATV system on a part-time basis.)  
 1122-C1-P-73—United Video, Inc. (New), 0.2 mile northeast of Winterset, Iowa, latitude 41°22'07" N., longitude 93°59'06" W., Application amended to change polarity of frequency 6226.9 MHz toward Urbandale, Iowa, to horizontal and to change azimuth toward Urbandale to 33°13'.  
 4405-C1-P-73—KHC Microwave Corp. (New), Fullerton, 11 miles east of Fort Polk, La., latitude 31°02'15" N., longitude 93°01'26" W., Application amended: (a) To change to horizontal the polarity of frequencies 6226.9 MHz and 6286.2 MHz toward Flatswoods, La., on azimuth 19°07' and (b) to change azimuth toward Leesville, La., to 292°56'.  
 4205-C1-P-73—United Video, Inc. (New), 3 miles southwest of Taylorville, Ill., latitude 39°30'43" N., longitude 89°15'02" W., Application amended: (a) To change frequencies to 6034.2V MHz and 6152.8V MHz toward Springfield, Ill., on azimuth 313°37'; (b) to change frequency to 6152.8V MHz toward Decatur, Ill., on azimuth 26°48'; and (c) to relocate receive station at Decatur to latitude 39°52'45" N., longitude 89°00'35" W.  
 4224-C1-P-73—Eastern Microwave, Inc. (RCK70), Mount Greylock, Mass., latitude 42°38'14" N., longitude 73°09'56" W., Application amended: (a) To change frequency 5989.7H MHz to 6078.6H MHz toward Beech Hill (KCK71), N.H. and (b) to change frequency 5937.5H MHz to 6078.6V toward Florida Mountain latitude 42°40'32" N., longitude 73°04'06" W., N.H., on azimuth 60°51'.  
 4227-C1-P-73—Same (New), Wood Hill, 2.2 miles southwest of Lawrence, Mass., latitude 42°39'17" N., longitude 71°13'05" W., Application amended to change frequency 11,305V MHz to 11,545V MHz toward Boston (Prudential Building), Mass., on azimuth 162°04'.

[FR Doc. 73-5691 Filed 3-26-73; 8:45 am]

Minneapolis (population approximately 2,000) since 1967. The insurance agency was established de novo by Applicant. Net commissions for 1971 and 1972 were reported to be respectively, \$8,600 and \$13,600. The Board has previously determined by regulation that the conduct of a general insurance agency in a community of less than 5,000 persons is closely related to banking (12 CFR 225.4 (a)(9)(iii)(a)). The evidence shows that there are five competing insurance agencies. There is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices, or other adverse effects on the public interest. It does appear that approval of the application will assure the community of Minneapolis of the continued operation of a convenient alternative source of insurance agency services. Based upon the foregoing and other considerations reflected in the record, the Board has determined that the public interest factors that the Board is required to consider regarding the continuation of Applicant's insurance agency activities are favorable and the application should be approved.

On the basis of the record, the applications to acquire Bank shares and to continue to engage in insurance agency activities are approved for the reasons summarized above. The acquisition of Bank shares shall not be consummated (a) before April 18, 1973, nor (b) later than June 19, 1973, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The determination as to the insurance agency activities is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,<sup>1</sup> effective March 19, 1973.

[SEAL] **TYNAN SMITH,**  
Secretary of the Board.  
[FR Doc. 73-5769 Filed 3-26-73; 8:45 am]

#### MANUFACTURERS HANOVER CORP. Order Approving Acquisition of Bank

Manufacturers Hanover Corp., Dover, Del., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)), to acquire 100 percent of the voting shares of State Bank of Ontario, Ontario, N.Y. (Bank).

<sup>1</sup> Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan and Bucher. Absent and not voting: Chairman Burns.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the third largest banking organization in New York, controlling four banks with aggregate deposits of \$9.2 billion, representing approximately 9½ percent of all deposits of commercial banks in the State.<sup>1</sup> Acquisition of Bank (deposits of \$20.1 million) would constitute applicant's initial entry into the Rochester banking market and would not change applicant's ranking among banking organizations in the State, nor would it significantly increase the concentration of banking resources in New York.

Bank is the 7th largest of 16 banks in the Rochester banking market, controlling 1 percent of total deposits in that market.<sup>2</sup> (Banking data for the Rochester market are as of June 30, 1970.) Applicant's nearest banking subsidiary to Bank is approximately 200 miles distant and it does not appear that any meaningful competition exists between Bank and any of applicant's subsidiary banks. Further, it seems unlikely that meaningful competition would develop in the near future between Bank and any of applicant's banking subsidiaries in light of the facts presented, notably, the distance separating these banks and New York's statutes prohibiting applicant's banking subsidiaries from branching into the Rochester market until 1976. Moreover, the introduction of applicant as a vigorous competitor into the Rochester market could be beneficial in view of the concentrated nature of that market (the four largest banking organizations control 92 percent of market deposits), and would not raise barriers to entry by other banking companies since seven independent banks would remain as potential members of other bank holding companies. On the basis of the record before it, the Board concludes that consummation of the proposal herein would have no adverse effects on competition in any relevant area.

The financial condition, managerial resources, and future prospects of applicant, its subsidiary banks and Bank appear generally satisfactory and are consistent with the approval of the application.

Considerations relating to the convenience and needs of the community to be served are also consistent with, and lend weight toward, approval of the application, since applicant through Bank will be able to provide additional services at

<sup>1</sup> All banking data are as of June 30, 1972, except where otherwise noted, and are adjusted to reflect bank holding company formations and acquisitions approved by the Board through Feb. 28, 1973.

<sup>2</sup> The Rochester banking market is approximated by Wayne and Monroe Counties and the northern half of Livingston County.

a more convenient location for many customers in the Rochester area. Among the services which Bank does not presently offer but will provide as a result of its affiliation with applicant are: Expanded trust and loan and credit services, a wider variety of consumer financing, international banking services, and computer services. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before April 18, 1973, or (b) later than June 19, 1973, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of New York, pursuant to delegated authority.

By order of the Board of Governors,<sup>1</sup> effective March 19, 1973.

[SEAL] **TYNAN SMITH,**  
Secretary of the Board.  
[FR Doc. 73-5770 Filed 3-26-73; 8:45 am]

#### PATAGONIA CORP.

##### Proposed Acquisition of Tucson Finance Co.

Patagonia Corp., Tucson, Ariz., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire (through Model Finance Co. of Tucson, Ariz., a wholly owned subsidiary of Patagonia Corp.'s wholly owned subsidiary, Model Finance Co.) certain assets of Tucson Finance Co., Tucson, Ariz. Notice of the application was published on February 15, 1973, in the Tucson Daily Citizen, a newspaper circulated in Tucson, Ariz.

Applicant states that the proposed subsidiary would engage in the activities of a consumer finance company by making personal loans primarily to wage earners, and acting as agent or broker in the sale to its debtors of credit life, accident, and health insurance which is directly related to extensions of credit to those debtors. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound

<sup>1</sup> Voting for this action: Vice Chairman Robertson and Governors Mitchell, Daane, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns.

banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 16, 1973.

Board of Governors of the Federal Reserve System, March 20, 1973.

#### STOCKGROWERS STATE BANK CO., INC. Amendment to Application for Formation of Bank Holding Company

Notice that Stockgrowers State Bank Co., Inc., Worland, Wyo., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to remain a bank holding company through retention of 92.6 percent or more of the voting shares of the Stockgrowers State Bank, Worland, Wyo., was published on March 2, 1973 (38 FR 4388). That application has now been substantially amended.

The factors that are considered in acting on the amended application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The amended application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the amended application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 16, 1973.

Board of Governors of the Federal Reserve System, March 20, 1973.

#### NATIONAL ADVISORY COMMITTEE ON OCCUPATIONAL SAFETY AND HEALTH

##### SUBCOMMITTEE ON STATE PROGRAMS Notice of Meeting

Notice is hereby given of a meeting to be held by the Subcommittee on State Programs of the National Advisory Committee on Occupational Safety and Health established by section 7(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 556).

The meeting will begin at 9 a.m., on April 13, 1973, in room 107 A, B, and C of the Department of Labor Building, 14th Street and Constitution Avenue NW., Washington, DC.

The sole purpose of the meeting will be to evaluate the matters discussed and the information received at the March 15, 1973, meeting of this subcommittee (38 FR 5514) and to determine what recommendations to make to the full committee with respect thereto.

Members of the public are invited to attend the proceedings.

Any written data, views, and arguments received by the Committee's executive secretary at or before the meeting concerning the matters to be considered together with 25 duplicate copies will be provided to the members and be included in the minutes of the meeting.

Submissions to the executive secretary should be addressed as follows:

Mr. Roger W. Grant, Executive Secretary,  
National Advisory Committee on Occupational Safety and Health, Room 11205,  
1726 M Street NW., Washington, DC 20210.

As all requests to be heard orally at the March 15, 1973, meeting were granted in full, no further opportunity to address the subcommittee on April 13, 1973, will be provided.

Signed at Washington, D.C., this 22d day of March 1973.

**ROGER W. GRANT,**  
Executive Secretary.

[FR Doc. 73-5789 Filed 3-26-73; 8:45 am]

#### OFFICE OF THE FEDERAL REGISTER

##### LIST OF ACTS REQUIRING PUBLICATION IN THE "FEDERAL REGISTER"

The basic provisions requiring or authorizing publication of documents in the FEDERAL REGISTER are contained in 5 U.S.C. 551-559 and 44 U.S.C. 1501-1511. This appendix lists the acts contemplated by 44 U.S.C. 1505(a)(3). Notice is hereby given that the Office of the Federal Register is amending the list of acts requiring the publication of documents in the FEDERAL REGISTER by adding to the list the following acts enacted in 1972:

Description of Act	Citation
Foreign Assistance Development Loan Fund.	86 Stat. 20; 22 U.S.C. 2414.
Black Lung Benefits.	86 Stat. 1521; 30 U.S.C. 921(b), 931(c).
Education Amendments.	86 Stat. 235; 20 U.S.C. 1232 note.
Tinicum National Environmental Center.	86 Stat. 391; 16 U.S.C. 668dd note.
San Francisco National Wildlife Refuge.	86 Stat. 399; 16 U.S.C. 668gg.
Social Security Act Amended.	86 Stat. 406; 42 U.S.C. 415(l), 430.
Ports and Waterways Safety.	86 Stat. 424; 46 U.S.C. 391a.
Sawtooth National Recreation Area.	86 Stat. 612; 16 U.S.C. 460aa.
John D. Rockefeller, Jr., Memorial Parkway.	86 Stat. 619; 16 U.S.C. 461 note.
Grant-Kohrs Ranch National Historic Site.	86 Stat. 632; 16 U.S.C. 461 note.
Seal Beach National Wildlife Refuge.	86 Stat. 633; 16 U.S.C. 668dd note.
Economic Opportunity.	86 Stat. 688; 42 U.S.C. 2971b.

# OFFICE OF MANAGEMENT AND BUDGET BUSINESS ADVISORY COUNCIL ON FEDERAL REPORTS

## Notice of Public Meeting

Pursuant to Public Law 92-463, notice is hereby given of a meeting of an ad hoc panel of the Business Advisory Council on Federal Reports to be held in Room 2010, New Executive Office Building, 726 Jackson Place NW., Washington, DC, on Friday, March 30, 1973 at 9:30 a.m.

The purpose of the meeting is to obtain advice on reporting problems involved in a public use report of the Cost of Living Council entitled, "Report or Record of Prices, Costs, and Profits" (Form CLC-2) including "Calculation of Cost Justification to Support Net Price Increases on Form CLC-2" (Schedule C). The meeting will be open to public observation and participation.

VELMA N. BALDWIN,  
Assistant to the Director  
for Administration.

[FR Doc. 73-5730 Filed 3-26-73; 8:45 am]

## POSTAL RATE COMMISSION

[Docket RM73-2]

## LIMITED PARTICIPATION IN COMMISSION PROCEEDINGS BY PERSONS NOT PARTIES

### Order Denying Petition for Amendment or Repeal of Rule

MARCH 23, 1973.

On February 7, 1973, the Commission published in the Federal Register a new rule allowing limited participation in Commission proceedings, docket RM73-2 (38 FR 3510). The new rule was related to Commission rules in docket RM73-1 (proposed August 2, 1972 (37 FR 15437) and modified March 22, 1973 (38 FR 7527)) increasing the information which full participants are asked to file in Commission proceedings. Recognizing that some mailers may not be able to participate except on a limited basis, the Commission fashioned its limited participa-

tion rule so as to grant those mailers access to Commission proceedings without automatically subjecting them to the entire docket RM73-1 information filing requirements.

On February 12, 1973, the Postal Service submitted a "Motion" requesting modification of the limited participation rule. In essence, the Service asks us to change the rule so that limited participation would be unavailable to any person who seeks to file any evidence or to cross-examine the Service's case. Although the Service would allow limited participants to state their position by way of briefs, it presumably knows that the Commission is precluded by law from considering arguments which are not supported on the record. Consequently, the Service's proposal would force persons who choose limited participation to waive valuable hearing rights.

The Service's motion gives no recognition whatsoever to the necessary relationship between the Docket RM73-1 rules and the limited participation rule. The Service ardently supported the proposed Docket RM73-1 rules requiring intervenors to file more evidence. For mailers who do not plan to take a major role in Commission proceedings, however, the Docket RM73-1 rules may be burdensome. To the extent that the limited participation rule helps to resolve this problem, it is complementary to the Docket RM73-1 filing rules.

The Service's fears concerning the effect of the limited participation rule are also misconceived. Without the limited participation rule, the Service (and others) would have been allowed—without asking the presiding officer's permission—to request extensive information from all participants. Under the new rule, limited participants are no longer subject to such requests without the presiding officer's approval. The presiding officer, however, still retains broad authority to control the hearings (39 CFR § 3001.23). And the rule expressly advises limited participants that "failure to provide relevant and material information in support of their claims will be taken into account in determining the weight to be placed on their evidence and arguments." Contrary to the Service's contentions, we fail to perceive how such a rule can be unfair.

The Commission orders:

(a) The February 12, "Motion of the United States Postal Service for Modification of Order Promulgating Amendments to Rules of Practice and Procedure," is hereby denied.

(b) The Secretary shall cause publication of this order to be made promptly in the FEDERAL REGISTER.

By the Commission.

[SEAL] JOSEPH A. FISHER,  
Secretary.

[FR Doc. 73-5749 Filed 3-26-73; 8:45 am]

<sup>1</sup> Although the Service's filing is denominated as a "motion," it is actually a petition for "amendment . . . or repeal of a rule." (See 5 U.S.C. § 553(e).)

## SECURITIES AND EXCHANGE COMMISSION

[File 500-1]

### CRYSTALOGRAPHY CORP.

#### Order Suspending Trading

MARCH 19, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, \$0.01 par value, and all other securities of Crystallography Corp., being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors:

It is ordered, Pursuant to section 15(c) (5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from March 20, 1973, through March 29, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,  
Secretary.

## SMALL BUSINESS ADMINISTRATION

[Delegation of Authority No. 30-V; Amdt. 1]

### REGION V

#### Delegation of Authority to Conduct Program Activities in the Field Offices

Delegation of Authority No. 30-V (37 FR 17607) is hereby amended to effect changes previously published therein and to reflect Amendments to Delegation of Authority No. 30 (Revision 14) (37 FR 12651), as published in (37 FR 19405, 37 FR 21466 and FR 23594) to read as follows:

#### PART I—FINANCING PROGRAM

##### SECTION A. Loan approval authority.

1. *Small Business Act* section 7(a) loans. . . .

c. Supervisory Loan Officers, Financing Branch Regional Financial Services Division. . . . \$50,000

3. *Displaced business and other economic injury loans.* a. To decline displaced business loans, coal mine health and safety, consumer protection (meat, egg, poultry), occupational safety and health, strategic arms limitation economic injury, and economic injury disaster loans in connection with declarations made by the Secretary of Agriculture for natural disasters in any amount and to approve such loans up to the following amounts (SBA share):

#### NOT APPLICABLE

b. To approve or decline displaced business loans, coal mine health and safety loans, consumer protection (meat, egg, poultry), occupational safety and health, strategic arms limitation economic injury disaster loans in connection with declarations made by the Secretary of Agriculture for natural disasters up to the following amounts (SBA share):

#### SEC. B. Other financing authority. 1. a.

To enter into business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), occupational safety and health, coal mine health and safety, and strategic arms limitation economic injury loan participation agreements with banks:

3. To cancel, reinstate, modify, and amend authorizations:

a. For business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), occupational safety and health, coal mine health and safety, and strategic arms limitation economic injury loans:

b. For "fully disbursed" or "partially disbursed" business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), occupational safety and health, strategic arms limitation economic injury, and coal mine health and safety loans:

c. For business, economic opportunity, disaster, displaced business, consumer protection (meat, egg, poultry), coal mine health and safety, strategic arms limitation economic injury and occupational safety and health loans personally approved under delegated authority:

#### PART II—DISASTER PROGRAM

SECTION A. *Disaster loan authority.* 1. To decline direct disaster and immediate participation disaster loans in any amount and to approve such loans up to the total SBA funds of (1) \$50,000 per household for repairs or replacement of the home and/or not to exceed an additional \$10,000 allowable for household goods and personal items, but in no event may the money loaned for physical loss or damage exceed \$55,000 for a single

disaster on home loans, except for funds to refinance prior liens or mortgages, which may be approved to refinance prior liens or mortgages, which may be approved in addition to the foregoing limits for amounts up to \$50,000; and (2) \$500,000 on disaster business loans (excluding displaced business loans, coal mine health and safety, occupational safety and health, strategic arms limitation economic injury, and economic injury disaster loans in connection with declarations made by the Secretary of Agriculture for natural disasters) except to the extent of refinancing of a previous SBA disaster loan:

2. To decline direct disaster and immediate participation disaster loans (excluding displaced business loans, coal mine health and safety, occupational safety and health, strategic arms limitation economic injury, and economic injury disaster loans in connection with declarations made by the Secretary of Agriculture for natural disasters) in any amount and to approve such loans up to the total SBA funds of \$50,000:

#### NOT APPLICABLE

4. To appoint as a processing representative any bank in the disaster area: a. Chief, Regional Financial Services Division. b. Chiefs, Financing, Borrower Services, Community Economic Development Branches. c. District Directors.

SEC. B. *Administrative authority.* 1. *Establishment of Disaster Field Offices.* (a) To establish field offices upon receipt of advice of the designation of a disaster area and to close disaster field offices when no longer advisable to maintain such offices; and (b) to obligate the Small Business Administration to reimburse the General Services Administration for the rental of temporary office space.

(1) Chief, Regional Administrative Division.

(2) District Directors.

2. *Purchase and contract authority.* a. To contract for local credit bureau services and loss verification services pursuant to Chapter 4 of Title 41, United States Code, as amended, subject to the limitations contained in section 257 (a) and (b) of that chapter.

(1) Chief, Regional Administrative Division.

(2) District Directors.

b. To purchase office supplies and equipment, including office machines and rent regular office equipment and furnishings; contract for repair and maintenance of equipment and furnishings; contract for printing (Government sources only); contract for services required in setting up and dismantling and moving SBA exhibits; and issue Government bills of lading pursuant to Chapter 4 of Title 41, United States Code, as amended, subject to the limitations contained in section 257 (a) and (b) of that chapter.

(1) Chief, Regional Administrative Division. (2) District Directors. (3) Disaster Branch Managers, as assigned.

#### PART III—COMMUNITY ECONOMIC DEVELOPMENT (CED) PROGRAM

#### PART V—PROCUREMENT AND MANAGEMENT ASSISTANCE

#### SECTION A. *Certificate of competency approval authority.* 1. . . .

a. Chief, Regional PMA Division.

2. . . .

a. Chief, Regional PMA Division.

#### PART VI—LEGAL SERVICES

#### SECTION A. *Authority to conduct litigation activities.* 1. . . .

b. . . .

(a) Regional Counsel.

(2) [Deleted]

(a) [Deleted]

3. . . .

a. Regional Counsel.

b. Regional Attorneys.

c. District Directors.

d. District Counsels.

e. District Attorneys.

f. Branch Managers (except Marquette, Mich.).

g. Branch Attorneys (except Marquette, Mich.).

SEC. B. *Loan closing authority.*

1. . . .

PART VII—ELIGIBILITY AND SIZE DETERMINATIONS

#### SECTION A. *Eligibility determinations.*

1. a. In accordance with Small Business Administration standards and policies, to determine eligibility of applicants for assistance under any program of the Agency.

(1) Except: The SBIC Program:

(a) Chief, Regional Financial Services Division.

(b) Chiefs, Financing, Borrower Services, Community Economic Development Branches, Regional Financial Services Division.

(c) Chief, Regional Procurement and Management Assistance Division.

(d) District Directors.

(e) Chiefs, District Financial Services Division.

(f) Chiefs, District Financing Division.

(g) Branch Managers.

SEC. B. *Size determinations.* 1. a. To make initial size determinations in all cases within the meaning of the Small Business Size Standards Regulations, as amended, and further, to make product classification decisions for financial assistance purposes only:

(1) Chief, Regional Financial Services Division.

(2) Chiefs, Financing, Borrower Services, Community Economic Development

Branches, Regional Financial Services Division.  
 (3) Chief, Regional Procurement and Management Assistance Division (except product classification decisions).  
 (4) District Directors.  
 (5) Chiefs, District Financial Services Division.  
 (6) Chiefs, District Financing Division.  
 (7) Branch Managers.

#### PART VIII—ADMINISTRATIVE

SECTION A. Authority to purchase, rent or contract for equipment, services, and supplies.

2. To purchase office supplies and equipment, including office machines and rent regular office equipment and furnishings; contract for repair and maintenance of equipment and furnishings; contract for printing (Government sources only); contract for services required in setting up and dismantling and moving SBA exhibits; and issue Government bills of lading pursuant to Chapter 4 of Title 41, United States Code, as amended, subject to the limitations contained in section 257 (a) and (b) of that chapter.

- Chief, Regional Administrative Division.
- Regional Office Services Assistant.
- District Directors.
- Chiefs, District Administrative Division.
- Branch Manager, Springfield, Ill.
- To rent motor vehicles and garage space for the storage of such vehicles when not furnished by this Administration.

a. Chief, Regional Administrative Division.  
 b. Regional Office Services Assistant.  
 c. District Directors.  
 d. Chiefs, District Administrative Division.  
 e. Branch Managers.  
 f. Disaster Branch Managers as assigned.

#### TARIFF COMMISSION

[TEA-W-190]

GOLD STAR HAT AND CAP COMPANY,  
 INC., NEW YORK, N.Y.

Workers' Petition for a Determination;  
 Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the workers and former workers of Gold Star Hat and Cap Co., Inc., New York, N.Y., the U.S. Tariff Commission, on March 21, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with nonknit cotton headwear (of the type provided for in item 702.10 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed on or before April 6, 1973.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: March 22, 1973.

By order of the Commission.

KENNETH R. MASON,  
 Secretary.

[FR Doc 73-5793 Filed 3-26-73; 8:45 am]

[TEA-W-191]

KAYSER-ROTH CORPORATION, NEW YORK,  
 NEW YORK

Workers' Petition for a Determination;  
 Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expan-

sion Act of 1962, on behalf of the workers of the Freeport, Maine, plant of the Kayser-Roth Shoes Division of the Kayser-Roth Corp., New York, N.Y., the U.S. Tariff Commission, on March 22, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with footwear for men and women (of the types provided for in items 700.26, 700.27, 700.29, 700.35, 700.43, 700.45, and 700.55 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed on or before April 6, 1973.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: March 22, 1973.

By order of the Commission.

KENNETH R. MASON,  
 Secretary.

#### DEPARTMENT OF LABOR

Occupational Safety and Health  
 Administration

##### TEXAS DEVELOPMENTAL PLAN

State Occupational Safety and Health Standards and Their Enforcement; Notice of Submission of Plan and Availability for Public Comment

1. Submission and description of Plan. Pursuant to section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and §1902.11 of Title 29, Code of Federal Regulations, notice is hereby given that an Occupational Safety and Health Plan for the State of Texas has been submitted to the Assistant Secretary of Labor for Occupational Safety and Health. The Assistant Secretary has preliminarily reviewed the plan and hereby gives notice that the question of approval of the plan is in issue before him.

The plan provides that the Division of Occupational Safety within the State Department of Health is to administer the plan throughout the State. Further, the Division of Occupational Safety is to be administered by an Occupational Safety Board consisting of five members, the Commissioner of Labor Statistics, the Commissioner of Health, and three public members to be appointed by the Governor and confirmed by the Texas State Senate. The plan defines the

covered occupational safety and health issues as defined by the Secretary of Labor in 29 CFR 1902.2(c)(1). All safety and health standards and amendments thereto which have been adopted by the Secretary of Labor have been adopted by the State.

Included in the plan is proposed draft legislation which is presently being considered by the Texas Legislature. The legislation is accompanied by a statement of legal opinion that it will meet the requirements of the Federal Act and is consistent with the constitution and other laws of the State of Texas. Under the proposed legislation the Occupational Safety Board is to have full authority to enforce and to administer laws respecting employee safety and health. Further, the draft legislation provides for the coverage of all employees within the State including employees of the State and its political subdivisions.

The legislation is intended to bring the plan into conformity with the requirements of 29 CFR Part 1902 in areas such as procedures for variances and protection of employees from hazards; procedures for the development and promulgation of standards, including standards for protection of employees against new and unforeseen hazards; and procedures for prompt restraint or elimination of imminent danger situations.

The legislation also proposes to insure inspections in response to complaints; give employer and employee representatives an opportunity to accompany inspectors in order to aid inspections; notification of employees or their representatives when no compliance action is taken as a result of alleged violations, including informal review; protection of employees against discharge or discrimination in terms and conditions of employment; notification of employees of their protections and obligations; provision for prompt notice to employers and employees of alleged violations of standards and abatement requirements; a system of sanctions against employers for violations of standards; employer right of review and employee participation in review procedures; and provision for programs to encourage voluntary compliance by employers and employees. Included within the plan is a Time Schedule providing for full implementation of the plan within the required 3-year period following the beginning of the plan's operation. To carry out its safety and health program the plan contains rules and regulations for the Occupational Safety Board regarding inspections, recording, variances, coverage, and the promulgation of standards as well as an Operations Manual modeled on the Federal Compliance Operations Manual. The plan also describes the resources that are to be devoted to it as well as the State's merit system for personnel.

2. Location of plan for inspection and copying. A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of Federal and State Operations, Occupational Safety and Health Administration, Room 305, Railway Labor

Building, 400 First Street NW., Washington, DC 20210; Regional Administrator, Occupational Safety and Health Administration, Texaco Building, Suite 600, 1512 Commerce Street, Dallas, TX 75201; and the Division of Occupational Safety, Texas State Department of Health, 3711 North Lamar, 3d Floor, Austin, TX 78756. Copies of the plan may be obtained at the expense of the person(s) requesting the copies.

3. Public participation. Interested persons are hereby given until April 26, 1973, in which to submit to the Assistant Secretary written data, views, and arguments concerning the plan. The submissions are to be addressed to the Director, Office of Federal and State Operations, Occupational Safety and Health Administration, Railway Labor Building, Room 305, U.S. Department of Labor, Washington, D.C. 20210. The written comments will be available for public inspection and copying, at the expense of the person(s) requesting such copies, at the above address.

Any interested person(s) may request an informal hearing concerning the proposed plan, or any part thereof, whenever particularized written objections thereto are filed by April 26, 1973. If the Assistant Secretary finds that substantial objections are filed, he shall hold a formal or informal hearing on the subjects and issues involved.

The Assistant Secretary of Labor for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision as to approval or disapproval of the plan.

Signed at Washington, D.C., this 22d day of March 1973.

CHAIN ROBBINS,  
 Acting Assistant  
 Secretary of Labor.

#### COST OF LIVING COUNCIL

##### LUMBER PRICES

##### Notice of Public Hearing

Notice is hereby given that the Cost of Living Council will hold public hearings beginning at 9:30 a.m., April 4, 1973, at the General Services Administration Auditorium, 18th and F Streets NW., Washington, D.C., to receive comments from interested persons on appropriate wage and price control actions which might effectively restrain lumber prices.

##### BACKGROUND

Since January 11, 1973, rapid increases have been experienced in the prices of the softwood lumber and plywood products most frequently used as building materials. The Wholesale Price Index (WPI) for softwood lumber for the month of February 1973 increased 8 percent. These price increases represent a continuation of a tendency for higher prices of lumber and plywood which began early in 1971.

Increased demand for lumber and wood products was stimulated by a sharp

increase in private housing starts. In 1972, 2.38 million private houses were started, representing a 66-percent increase over 1.4 million houses started in 1970 and 16-percent increase over the 2.05 million houses started in 1971. This increased demand pressure has continued into early 1973. In January 1973, housing starts rose to an annual rate of 2.46 million units, up 5.3 percent over December 1972.

In addition, log exports reached a record rate of 3 billion board feet during calendar year 1972. This volume represented a 7-percent increase over the corresponding 1970 volume and a 27-percent increase over the corresponding 1971 volume. On the supply side, a decrease in timber sales from the national forests was experienced in 1972.

##### ADMINISTRATIVE ACTIONS ON SUPPLY SIDE

Several courses of action designed to increase supply have been undertaken through efforts of the Cost of Living Council. The Counselor to the President on Natural Resources, Earl Butz, has assigned a Government team to work on a continuing basis in the next month with the Forest Service and the Bureau of Land Management. The administration will develop and implement plans to assure sales of 11.8 billion board feet in calendar year 1973 from the Forest Service lands, and set higher output goals and develop specific action plans for 1974 and 1975.

Secondly, based upon initiatives of the Cost of Living Council, U.S. officials are meeting with Japanese officials in Tokyo to set specific goals to insure that Japan's log imports from the United States do not cause increasing price pressures for softwood lumber in the United States. Furthermore, the Cost of Living Council has requested the Department of Transportation to resolve railroad car bottlenecks which could be contributing to high lumber and plywood price levels. The Railroad Administration is working on a number of actions which involve appropriate allocation of cars for grain shipments and for timber and lumber shipments.

##### WAGE AND PRICE CONTROLS AS SUPPLEMENT TO SUPPLY ACTIONS

The lumber industry has experienced a variety of price controls starting with the freeze in August 1971. The Phase II customary initial percentage markup limitations were applied to lumber retailers and wholesalers. Lumber manufacturers were required to cost justify price increases, and stumpage suppliers were exempt. On May 2, 1972, the small business exemption was promulgated, and the majority of the lumber industry was exempted. Because of the pricing pressures experienced in the lumber industry, it was determined that recontrol of these exempt lumber firms was necessary. Thus, the small firm exemption was rescinded for lumber firms and mandatory controls were reimposed in July 1972. In October 1972, in an effort to

gain further information, reporting requirements were extended to lumber firms with \$5 million or more in annual sales or revenues. Since the commencement of Phase III the lumber industry has been under voluntary guidelines.

The Cost of Living Council is considering the reimposition of mandatory wage and price controls on the lumber industry as a means of supplementing the governmental actions designed to increase available supplies.

The Council has given consideration to a plan designed specifically for the lumber industry. However, it is anticipated that alternative approaches or modifications will be suggested at the hearings. Therefore, interested persons are invited to testify or submit written testimony concerning other ideas, changes, or improvements in the plan.

The plan now under consideration by Cost of Living Council consists of the following major elements: A mandatory markup or gross margin limitation, a modification of the small business exemption and the imposition of reporting and recordkeeping requirements.

To avoid any incentive for further price increases during the pendency of the hearings, the base period used in defining the markup or gross margin limitation would be chosen from a period prior to March 26, 1973. In the event mandatory controls are imposed, they would be effective as of the date of this notice.

#### DESCRIPTION OF PROGRAM

Some form of markup or gross margin limitation is contemplated. It is expected to be applied to each level in the production and distribution chain: Manufacturer, wholesaler, and retailer. A firm would be required to aggregate costs for the current period and compare them to aggregate revenues from the sale of finished products in the current period. The ratio or "margin" between these current revenues would be limited to a historic margin determined on a firm basis. These mandatory controls would allow a dollar-for-dollar passthrough of raw material costs and would allow firms flexibility in choosing areas in which to increase prices to pass through their cost increases. However, it would prevent windfall profits due to a heavy demand situation experienced at any particular level in the distribution chain. In addition, when supplies increase and/or demand pressures recede, prices would have to be lowered to reflect these factors.

Many alternatives are still being considered relating to the scope of coverage needed for the mandatory system. The following issues will be explored during the hearings: The levels of distribution to be included; treatment of multiindustry companies; the size of firms to be included at each level and how to achieve equality between integrated and nonintegrated firms.

Consideration will also be given to alternative methods to disgorge excess revenues due to Phase II profit margin violations. The Council wishes to hear views on how to insure that remedial actions for these Phase II violations will

benefit the consumer and not merely intermediate lumber users.

The Council would also like to receive suggestions on the most effective methods of enforcement for Phase III. Consideration is being given to the advisability of reporting and recordkeeping requirements concerning gross margins, costs, prices, price movements, and other relevant data.

The public hearing hereby scheduled will be conducted under the authority of section 207 of the Economic Stabilization Act of 1970 which requires that to the maximum extent possible, formal hearings be conducted for the purpose of acquiring information bearing on a change or a proposed change in prices which have or may have a significantly large impact upon the national economy.

Any person who has a substantial interest in the subject of the hearing, or who is a representative of a group or class of persons which has substantial interest in the subject of the hearing, may submit, on or before 12 noon, April 2, 1973, a written request to make an oral presentation. Any such written request should include a description of the substantial interest concerned; if appropriate, a statement of why the requesting person is a proper representative of a group or class of persons which has such an interest; and a concise summary of the proposed oral presentation and a phone number where the requesting party may be contacted on April 4. Oral requests should be made by calling 202-254-8610. Oral presentations may be supplemented by written submissions filed with the Council not later than April 12, 1973.

The Council reserves the right to select the persons to be heard at the hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. Each presentation may be limited, based on the number of persons requesting to be heard. In addition, the Council requests all other interested persons to submit written suggestions and comments on the subject for Council consideration not later than April 12, 1973.

Persons selected to be heard must send 50 copies of their statement to the Executive Secretariat 24 hours in advance of appearance.

All written submissions and written requests to make an oral presentation should be sent to Lumber Hearings, Executive Secretariat, Cost of Living Council, 2000 M Street NW., Washington, DC 20508.

Any information or data considered by the person furnishing it to be confidential must be submitted in writing, one copy only, before the person's scheduled appearance, or by April 12, 1973, as applicable. The Cost of Living Council reserves the right to determine the confidential status of the information or data and to treat it accordingly.

The hearing will be an informal one. A Cost of Living Council official will be designated to preside. It will not be a judicial- or evidentiary-type hearing.

Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. Any decision made by the Council with respect to the subject matter of the hearing will be based on all information available to the Council, from whatever source received, and will not be based solely on the record of the hearing. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and may not exceed 10 minutes each.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, before April 4, 1973. Any person who makes an oral statement and who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The Council, or the presiding officer if the question is submitted at the hearing, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the Council and made available for inspection at the Public Reference Facility of the Council, Room 2313, 2000 M Street NW., Washington, DC, between the hours of 8:30 a.m. and 5:30 p.m., Monday through Friday. Anyone may buy a copy of the transcript from the reporter.

Issued in Washington, D.C., on March 26, 1973.

JAMES W. McLANE,  
Deputy Director,  
Cost of Living Council.

#### INTERSTATE COMMERCE COMMISSION

[Notice 206]

#### ASSIGNMENT OF HEARINGS

MARCH 22, 1973.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 30032 Sub 3, Houdek Motor Service, Inc., now assigned April 2, 1973, at Chicago, Ill., is postponed to May 7, 1973, in Room 1922, Illinois State Building, 160 North La Salle Street, Chicago, Ill.

MC 135532, J. B. Levin, Inc., now assigned April 4, 1973, at Boston, Mass., is postponed to April 25, 1973, on the Fifth Floor, 150 Causeway Street, Boston, MA.

AB 5 Sub 92, George P. Baker, Richard C. Bond, and Jervis Langdon, Trustees of the Property of Penn Central Transportation Co., debtor, abandonment Marietta Branch between Marietta and Dexter City, Washington and Noble Counties, Ohio, now assigned April 26, 1973, at Marietta, Ohio, will be held at the City Hall Annex, Second Floor, 308 Putnam Street.

MC 115869, Hendrie & Co., Ltd., now assigned April 9, 1973, at Buffalo, N.Y., will be held in the Seventh Floor Courtroom, U.S. Courthouse, 68 Court Street.

AB 5 Sub 90, George P. Baker, Richard C. Bond, and Jervis Langdon, Jr., trustees of the Property of Penn Central Transportation Co., debtor, abandonment portion Ontario Secondary Track between Hamlin and River View, Monroe, Orleans, and Niagara Counties, N.Y., now assigned April 11, 1973, at Buffalo, N.Y., will be held in the Seventh Floor Courtroom, U.S. Courthouse, 68 Court Street.

MC 113861 Sub 51, Wooten Transports, Inc., Extension—Memphis, Tenn., now assigned April 2, 1972, at Memphis, Tenn., is postponed indefinitely.

FD-25949, Lehigh Valley Railroad Co., abandonment between Dushore and Towanda, Pa., now being assigned hearing May 1, 1973 (3 days), at Towanda, Pa., in a hearing room to be later designated.

MC-30605 Sub 147, The Santa Fe Trail Transportation Co., application is dismissed.

MC 124174 Sub 91, Momen Trucking Co., now assigned April 30, 1973, at Columbus, Ohio, will be held in Room 2, State Office Building, 65 South Front Street.

MC 126034 Subs 1, 3, 4, Bucks County Construction Co., now being assigned May 29, 1973, at Philadelphia, Pa., in a hearing room to be later designated.

MC 109098 Sub 2, Fogg's Daily Service, now being assigned May 31, 1973 (2 days), at Philadelphia, Pa., in a hearing room to be later designated.

MC 29120 Sub 131, All-American Transport, Inc., now assigned April 16, 1973, at St. Louis, Mo., is canceled and transferred to modified procedure.

MC 95084 Sub 90, Hove Truck Line, now being assigned hearing June 4, 1973 (2 days), at Kansas City, Mo., in a hearing room to be later designated.

MC 107295 Sub 634, Pre-Fab Transit Co., now being assigned hearing June 6, 1973 (2 days), at Kansas City, Mo., in a hearing room to be later designated.

MC 115331 Sub 306, Truck Transport, Inc., now being assigned hearing June 8, 1973 (1 day), at Kansas City, Mo., in a hearing room to be later designated.

MC 119774 Sub 54, Mary Ellen Stidham, N. M. Stidham, A. E. Mankins (Inez Mankins, Executrix), and James E. Mankins, Sr., doing business as Eagle Trucking Co., now being assigned hearing June 11, 1973 (2 days), at Kansas City, Mo., in a hearing room to be later designated.

MC 128007 Sub 44, Hofer, Inc., now being assigned hearing June 13, 1973 (3 days), at Kansas City, Mo., in a hearing room to be later designated.

MC 124211 Sub 222, Hilt Truck Line, Inc., now being assigned hearing June 6, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 51146 Subs 284, 285, 286, and 287, Schneider Transport, Inc., now being assigned May 22, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 124796 Sub 97, Continental Contract Carrier Corp., now being assigned hearing June 11, 1973 (1 week), at Chicago, Ill., in a hearing room to be later designated.

MC 116519 Sub 17, Frederick Transport, Ltd., now being assigned hearing June 4, 1973 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 123407 Sub 101, Sawyer Transport, Inc., now being assigned continued hearing June 6, 1973 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 136109, Ray J. Forney, now being assigned hearing June 15, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 114211 Sub 184, Warren Transport, Inc., now being assigned hearing June 14, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 106497 Sub 74, Parkhill Truck Co., now being assigned hearing June 8, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 50069 Sub 457, Refiners Transport & Terminal Corp., now being assigned hearing June 13, 1973 (1 day), at Chicago, Ill., in a hearing room to be later designated.

MC 61592 Sub 290, Jenkins Truck Line, Inc., now being assigned hearing June 11, 1973 (2 days), at Chicago, Ill., in a hearing room to be later designated.

MC 123048 Sub 221, Diamond Transportation System, Inc., now being assigned hearing June 7, 1973 (2 days), at Chicago, Ill., in a hearing room to be later designated.

[R.S.O. 994: ICC Order 86]

#### CHESAPEAKE & OHIO RAILWAY CO.

##### Rerouting or Diversion of Traffic

MARCH 22, 1973.

In the opinion of R. D. Pfahler, agent, The Chesapeake & Ohio Railway Co. is unable to transport traffic over its lines in Michigan because of snow drifts.

It is ordered, That:

(a) The Chesapeake & Ohio Railway Co., being unable to transport traffic over its lines in Michigan because of snow drifts, that carrier is hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained. The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) Notification to shippers. Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to

traffic diverted or rerouted by said agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date. This order shall become effective at 4 p.m., March 19, 1973.

(g) Expiration date. This order shall expire at 11:59 p.m., March 24, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., March 19, 1973.

INTERSTATE COMMERCE  
COMMISSION,  
R. D. PFAHLER,  
Agent.

[SEAL]

[Notice 239]

#### MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 16, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74231. By order of March 9, 1973, the Motor Carrier Board

## NOTICES

approved the transfer to Gem Tours, Inc., Santa Barbara, Calif., of License No. MC-130162 issued October 25, 1972, to Pauline B. Chaput and Arvilla V. Smith, a partnership, doing business as Gem Tours, Goleta, Calif., authorizing it to engage in operations as a broker of passengers and their baggage, in charter operations, beginning and ending at points in San Luis Obispo, Santa Barbara, and Ventura Counties, Calif., and extending to points in the United States, including Alaska and Hawaii, J. Robert Andrews, Cavalletto, Webster, Mullen & McCaughey, 112 East Victoria Street, Santa Barbara, CA 93101, applicants' attorney.

No. MC-FC-74269. By order of March 21, 1973, the Motor Carrier Board approved the transfer to Congo Corp.,

Texas City, Tex., of Certificate of Registration No. MC-121498 issued December 23, 1969, to H. C. Daniel, Texas City, Tex., evidencing a right to engage in transportation in interstate commerce as described in Certificate No. 7259 which corresponds to the rights embraced in predecessor's Certificate No. 7259, issued prior to October 15, 1962, transferred and reissued September 8, 1964, and September 19, 1967, respectively, by the Railroad Commission of Texas. J. E. Shaw, 816 Houston First Savings Building, Houston, Tex. 77002, attorney for applicants.

No. MC-FC-74311. By order of March 14, 1973, the Motor Carrier Board approved the transfer to Decato Bros., Inc., Lebanon, N.H., of the operating rights in Certificates Nos. MC-55898,

MC-55898 (Sub-No. 39), MC-55898 (Sub-No. 43), MC-55898 (Sub-No. 44), and MC-55898 (Sub-No. 45) issued October 4, 1967, February 3, 1970, May 13, 1971, January 7, 1972, and January 3, 1972, respectively, to Harry A. Decato, doing business as Decato Bros. Trucking Co., Lebanon, N.H., authorizing the transportation of various commodities from, to, and between specified points and areas in New Hampshire, Rhode Island, Connecticut, Maine, Vermont, Massachusetts, New York, Ohio, Delaware, Maryland, Pennsylvania, New Jersey, Indiana, Illinois, Michigan, and Wisconsin. David M. Marshall, 135 State Street, Springfield, MA 01103, attorney for applicants.

**Title 40—Protection of Environment**  
**CHAPTER I—ENVIRONMENTAL**  
**PROTECTION AGENCY**

**PART 130—STATE CONTINUING**  
**PLANNING PROCESS**

**Notice of Interim Regulations**

Notice is hereby given that these regulations are set forth as interim regulations by the Environmental Protection Agency (EPA).

Section 303(e) of the Federal Water Pollution Control Act, as amended (86 Stat. 816; 33 U.S.C. 1314 (1972)), requires each State to submit a continuing planning process which is consistent with the Act. These proposed regulations describe the necessary elements of a State's continuing planning process. They also set forth procedures governing planning process adoption, submission, and revision and EPA approval. These regulations also provide a mechanism for States to satisfy portions of sections 208, 303(d) (Critical waters and maximum daily loads); 305(b) (State reports on water quality and related information, including nonpoint sources); 314 (Clean lakes); after June 30, 1973, 516(b) (Federal/State estimate of publicly owned treatment works construction needs); and they provide data for 305(a) and 104(a)(5) (Federal report on water quality).

**Purpose.** The purpose of the continuing planning process is to provide the States the water quality assessment and program management information necessary to make centralized coordinated water quality management decisions; to provide the strategic guidance for developing the State program submittal under section 106 of the Act; and to encourage water quality objectives which take into account overall State policies and programs, including those for land use and other related natural resources.

**Goals of the State process.** The goals of such a State process are to:

Provide a basis upon which the State's overall program (106) will be developed. This will be accomplished by developing an annual strategy, which will be based upon basin plans where they are completed and upon available information where the plans are not completed. This annual strategy will assist the State:

In directing resources—planning, monitoring, permitting, and financial assistance against water quality problems on a priority basis.

In establishing a coordinated schedule of action.

In reporting on progress in achieving program targets and scheduled milestones.

Insure that applicable water quality standards are attained. Where water quality standards violations occur an assessment will be made whether the application of Best Practical Control Technology (BPT) for industry and secondary treatment for municipalities will correct the water quality problem. If not, a maximum pollutant load will be calculated and individual discharge allocations will be made to meet these loads.

Specify the requirements for, and schedule the completion of, section 303 basin plans for all waters.

Insure public participation in the development of the planning process and of plans.

The complexity and timing of a plan for a specific area will be tailored to the problems of the area. No process need require individual plans to be more elaborate than is necessary for sound water quality management.

**Classification of waters.** To establish priorities, and to assist the State in assessing water quality problems, the process provides that the waters of each State will be classified according to the severity of pollution and the anticipated difficulty of developing and implementing remedial efforts. Waters will be classified into two classes:

(1) Water quality class: Any segment where it is known that water quality does not meet applicable water quality standards and is not expected to meet water quality standards even after the application of the effluent limitations required by sections 301(b)(1)(A) and 301(b)(1)(B) of the Act.

(2) Effluent limitation class: Any segment where water quality is meeting and will continue to meet applicable water quality standards or where there is adequate demonstration that water quality will meet applicable water quality standards after the application of the effluent limitations required by sections 301(b)(1)(A) and 301(b)(1)(B) of the Act.

**Content of the planning process.** The State continuing planning process provides for the development of basin plans. The process will:

Delineate planning areas and identify planning agencies.

Classify waters into water quality or effluent classes.

Identify the elements to be included in the plans in accordance with provisions of Part 131 of this chapter.

Provide a phased schedule for the completion of plans.

Establish a mechanism whereby the State's priorities for construction of publicly owned treatment works, for processing waste water discharge permits and for other program priorities will be established. The program priorities will be reported in the section 106 State program.

Provide a mechanism for determining investment requirements on publicly owned treatment works.

Provide a basis for assessing achievement of interim program milestones and final ambient results to be reported as part of the section 106 State program.

Each State will prepare its plans pursuant to the approved process schedule for plan preparation. If after his approval of the process the Regional Administrator finds that the State's approved process is deficient, he will confer with the State as to his findings and may request the State to revise its process as appropriate. If the State fails to make the necessary revisions in a timely manner, the Regional Administrator may

withdraw his approval of the process, after consultation with the Administrator, if he finds that the process is grossly deficient. Such finding may be based, among other things, on a substantial failure of plans developed pursuant to the process to conform with the requirements of the Act, or on a substantial failure of the State to meet the approved phasing of planning, or on a substantial failure of the State to implement plans.

Federal properties, facilities, and activities are subject to Federal, State, interstate, and local standards and effluent limitations for control and abatement of pollution. The State's planning process should include provision for Federal sources. It is contemplated that Federal agencies will provide information to the States in accordance with procedures established by the Administrator.

**Plan content.** Companion regulations under section 303(e), Part 131 of this chapter, describe the preparation of plans pursuant to the planning process: Part 131 should be consulted during the development of the planning process under Part 130.

In effluent limitation classes the plan should contain discharge priorities, compliance schedules for discharges with permits and target abatement dates for other dischargers and other management information as may be necessary; while in water quality classes, in addition to the above information, the plan should establish maximum daily loads and should determine the greater effluent reductions required for dischargers to attain the water quality goals. Similarly, the monitoring and surveillance program will focus primarily on those areas where water quality problems are most severe and where existing information is most deficient.

Publication of regulations governing Part 131, Preparation of Plans Pursuant to State Continuing Planning Process, has been delayed. Publication of these regulations is expected shortly.

Prior to the adoption of final regulations within 180 days from this date, consideration will be given to comments, suggestions, or objections which may be submitted in writing to: Chief, Planning and Standards Branch; Office of Air and Water Programs; Room 1007, Crystal Mall Building No. 2, Environmental Protection Agency, Washington, D.C. 20460. All comments, suggestions, or objections received on or before May 11, 1973 will be considered.

These interim continuing planning process regulations shall become effective on March 27, 1973. It is necessary that these regulations take effect prior to a 30-day period after publication because States have begun to seek EPA approval of a State operated permit program as provided under section 402(b) of the Act, and because no such approval can be made unless a State's continuing planning process under section 303(e) of the Act has been first approved. See 40 CFR 124.93. For the same reason,

notice of proposed rule making and public comment thereon, prior to the effective date of these regulations, is impracticable and contrary to the public interest.

WILLIAM D. RUCKELSHAUS,  
 Administrator.

MARCH 20, 1973.

**Subpart A—Scope and Purpose; Definitions**

Sec.	Scope and purpose.
130.1	Definitions.
130.2	
<b>Subpart B—General Requirements</b>	
130.10	Process coverage.
130.11	Classification of segments.
130.12	Planning agencies.
130.13	Legal authorities.
130.14	Public participation.
130.15	Separability.
<b>Subpart C—Contents of Basin Plans</b>	
130.20	Level of complexity of plans.
130.21	Establishment of planning areas (basins).
130.22	Relation between plans and other planning provisions.
130.23	Water quality standards.
130.24	Total maximum daily loads.
130.25	Individual point source discharge allocation; impact on water quality.
130.26	Schedules of compliance.
130.27	Inventory of individual dischargers.
130.28	Assessment of municipal needs for publicly owned waste treatment works.
130.29	Nonpoint sources of pollutants.
130.30	Monitoring and surveillance.
130.31	Intergovernmental cooperation.
130.32	Adoption of plans.
<b>Subpart D—Preparation of Annual State Strategy</b>	
130.40	State strategy.
130.41	Problem assessment and priorities.
130.42	Schedule for plan preparation.
130.43	State municipal discharge inventory.
130.44	State industrial discharge inventory.
<b>Subpart E—Requirements for Approval of Planning Process; Reports</b>	
130.50	Submission of process.
130.51	Contents of process submittal.
130.52	Planning process review; approval or disapproval.
130.53	Prohibition of approval of certain planning processes.
130.54	Revisions.
130.55	Reports.
<b>Subpart F—Relationship of Process to Permit and Construction Grant Programs</b>	
130.60	Relationship of continuing planning process with State participation in National Pollutant Discharge Elimination System.
130.61	Relationship of continuing planning process with construction grants.

AUTHORITY: Secs. 303 and 501, 86 Stat. 816; 33 U.S.C. 1314 (1972).

**Subpart A—Scope and Purpose; Definitions**

**§ 130.1 Scope and purpose.**

(a) This part establishes regulations specifying procedural and other elements which must be present in a State continuing planning process to obtain approval of the Administrator pursuant to section 303(e) of the Federal Water Pollution Control Act, as amended, 86 Stat. 816, 33 U.S.C. 1314. This part provides that each State must achieve compliance with the requirements of this regulation not later than June 30, 1975, and in-

cludes specification of levels of compliance which shall be achieved prior to that date.

(b) The purpose of the continuing planning process is: To provide the States the water quality assessment and program management information necessary to make centralized coordinated water quality management decisions; to provide the strategic guidance for developing the State program submittal under section 106 of the Act; and to encourage water quality objectives which take into account overall State policies and programs, including those for land use and other related natural resources.

(c) The State continuing planning process is directed toward the attainment of water quality standards established pursuant to sections 301 and 302 of the Act to achieve the goals set forth in the Act. The planning process will develop an annual strategy for directing resources, establishing priorities, scheduling of actions; and reporting programs toward achievement of program objectives.

(d) The total State planning process is comprised of:

(1) The annual State strategy, which sets the State's major objectives and priorities for preparing basin plans and its annual program plan.

(2) Individual basin plans, which establish specific targets for controlling pollution in individual basins.

(3) The annual program plan (section 106), which establishes the results expected and the resources committed for the State program each year. The annual plan is developed from the objectives and priorities of the annual State strategy, and, when available, from the specific targets developed in basin plans.

(4) Reports, which measure program performance in achieving programmed results.

The "continuing planning process" is the process by which the State develops the foregoing plans and reports.

(e) This part describes:

(1) The general requirements for the planning process (Subpart B).

(2) The content of the basin plans (Subpart C).

(3) The preparation of the annual State strategy (Subpart D).

(4) The requirements for approval of the planning process (Subpart E).

(5) The relationship of the process to permit and construction grants programs (Subpart F).

**§ 130.2 Definitions.**

As used in this part, the following terms shall have the meanings set forth below.

(a) The term "Act" means the Federal Water Pollution Control Act, as amended, 33 U.S.C. —, et seq.

(b) The term "EPA" means the U.S. Environmental Protection Agency.

(c) The term "Administrator" means the Administrator of the U.S. Environmental Protection Agency.

(d) The term "Regional Administrator" means the appropriate EPA Regional Administrator.

(e) The terms "continuing planning process," "planning process," and "process" mean the continuing planning process required by section 303(e) of the Act. Such process develops the State focal point for water quality management decisions. This includes phasing of plans to be prepared during fiscal years 1973, 1974, and 1975.

(f) The term "plan" means the water quality management plan for each hydrologic basin or other approved basin unit within a State. Such plan constitutes a mechanism for implementing applicable effluent limitations and water quality standards, and will consist of such components as are necessary for sound planning and program management in the basin covered by the plan.

Requirements for the preparation of such plans are described in Part 131 of this chapter.

(g) The term "effluent limitation" means any restriction established by a State or the Administrator on quantities, rates, and concentrations of chemical, physical, biological, and other constituents which are discharged from point sources into navigable waters, the waters of the contiguous zone, or the ocean, but does not include schedules of compliance.

(h) The terms "schedule of implementation" and "schedule of compliance" are synonymous and mean a description for each source of remedial measures to be accomplished and a sequence of actions or operations leading to compliance with applicable effluent limitations, water quality standards and other requirements of State and Federal law.

(i) The term "municipal needs" means the total capital funding required for construction of publicly owned treatment works, as defined in section 212(2) (A) and (B) of the Act, that are required to meet national water quality objectives of sections 301 and 302 of the Act.

(j) The term "National Pollutant Discharge Elimination System" means the Federal permitting system authorized under section 402 of the Act including any State or interstate program which has been approved by the Administrator, in whole or in part, pursuant to section 402 of the Act.

(k) The term "phasing of planning" means the State schedule approved by the Regional Administrator for the preparation of plans, pursuant to the continuing planning process, during the fiscal years 1973, 1974, and 1975.

(l) The term "basin" means the streams, rivers, and tributaries and the total land and surface water area contained in one of the 267 major and minor basins defined by EPA, or other basin unit as agreed upon by the State(s) and the Regional Administrator. Unless specified otherwise, "basin" shall refer only to those portions within the borders of a single State.

(m) The term "segment" means a portion of a basin the surface waters of which have common hydrologic characteristics (or flow regulation patterns); common natural physical, chemical, and biological processes, and which have common reactions to external stresses, e.g., discharge of pollutants.

(n) The term "cluster" means two or more dischargers which discharge pollutants in such a way that the combination of their effluents causes or may cause water quality standards violations.

(o) The term "significant discharger" means any discharger who is causing serious or critical water quality problems relative to the segment to which it discharges.

(p) The definitions of the following terms contained in section 502 of the Act shall be applicable to such terms as used in this part unless the context otherwise requires: "State," "State water pollution control agency," "navigable waters," "point source," and "discharge."

#### Subpart B—General Requirements

##### § 130.10 Process coverage.

(a) The process shall provide for the preparation of plans for all waters within the State, as provided in Subpart C.

(b) The process shall establish phasing of plans to be accomplished during the fiscal years 1973, 1974, and 1975, as provided in Subpart D.

(c) The process shall provide for the method by which the State shall coordinate all water quality planning, programming and management.

(d) The process shall provide the method by which the State shall coordinate its water quality management planning with related State and local comprehensive, and functional and project planning activities, including land use and other natural resources planning activities.

(e) The process shall provide the method by which the State shall coordinate its water quality management planning with that of its neighboring States.

##### § 130.11 Classification of segments.

(a) This section establishes a classification system which the process shall employ to categorize segments for purposes of preparing a plan. The requirements of this part and Part 131 of this chapter vary according to the classification of each segment, so that the time and resources to be expended in developing the plan for that segment, as well as the substantive content of the plan, will be commensurate with the severity of the water pollution problem.

(b) This classification of segments shall also be utilized in constructing the State Discharge Priority List developed in Subpart D of this part.

(c) The classification shall be based upon measured in-stream water quality, where available.

(d) Each segment shall be classified as follows:

(1) *Water quality class.* Any segment where it is known that water quality does not meet applicable water quality standards and which is not expected to meet water quality standards even after the application of the effluent limitations required by sections 301(b)(1)(A) and 301(b)(1)(B) of the Act.

(2) *Effluent limitation class.* Any segment where water quality is meeting and will continue to meet applicable water

quality standards or where there is adequate demonstration that water quality will meet applicable water quality standards after the application of the effluent limitations required by sections 301(b)(1)(A) and 301(b)(1)(B) of the Act.

(3) Any classification shall reflect any necessary allowance for anticipated economic and demographic growth over at least a 5-year period and an additional allowance reflecting the degree of precision and validity of the analysis upon which the classifications are based. Where the analysis is less precise or there is uncertainty concerning growth projections, a greater margin of safety shall be required for the assignment of any segment to an Effluent Limitation Class. In determining the additional allowance, consideration should be given to economic and demographic projections that are utilized in other State programs. (See § 131.210.)

(e) The classification of all waters should be included in the submission of the planning process by the Governor of each State to the Regional Administrator.

(1) Submission and approval or disapproval shall also be in accordance with §§ 130.50 and 130.52.

(2) Review and revisions of such classifications shall be made in accordance with § 130.54.

##### § 130.12 Planning agencies.

(a) (1) The Governor of a State shall designate a State agency responsible for conduct of the required planning. The Governor may designate a local or interstate agency to conduct all or any portion of the planning within each basin and may assign planning responsibilities under the process and Part 131 of this chapter to any such designated agency.

(2) The process shall set forth the criteria followed in designating planning agencies pursuant to paragraph (a) of this section and in determining the jurisdiction thereof. Locally elected officials of general purpose units of governments, and other pertinent local and areawide organizations within the jurisdiction of the potentially designated agency shall be consulted prior to any designation. The criteria for such determinations shall be included.

(b) (1) The initial submission shall include a specific designation of each planning agency responsible for conducting all or any portion of the planning pursuant to the process within each basin. Each designation shall include:

(i) The agency's name, address, and name of director.

(ii) The agency's jurisdiction (geographical coverage and extent of planning responsibilities).

(2) In the event that all or a portion of a plan is to be undertaken by an agency other than the State water pollution control agency, evidence from such other agency shall be supplied which shows acceptance of such designation and that agency's intent to comply within the times set forth in the process.

(3) The State may make additional assignments, as set forth in this section,

from time to time. Such designations and delegations shall be accomplished by revising the process as provided in § 130.54.

##### § 130.13 Legal authorities.

The State shall specify that it has or will seek to obtain legal authority, as necessary, to prepare and adopt plans pursuant to the planning process.

##### § 130.14 Public participation.

Each process or any revision thereof shall be developed with provision for public participation in accordance with section 101(e) of the Act, and any regulation issued by the Administrator thereunder. Public participation with adequate opportunity for public hearing upon proper showing shall be required on significant elements of the planning process including proposed State strategy and priority lists developed under the continuing planning process pursuant to section 106 regulations.

##### § 130.15 Separability.

If any provision of this part, or the application of any provision of this part to any person or circumstances, is held invalid, the application of such provision to other persons or circumstances, and the remainder of this part, shall not be affected thereby.

#### Subpart C—Contents of Basin Plans

##### § 130.20 Level of complexity of plans.

(a) The process shall provide that plans for water quality segments will contain all the following parts while plans for effluent limitation segments shall include items (4), (5), and (6). See § 130.11 for segment classification.

(1) An assessment of total maximum daily loads necessary to meet water quality standards for the specific criteria being violated;

(2) An assessment of nonpoint source pollution and, where applicable, needed control measures;

(3) Already established effluent limit requirements for significant dischargers and target limits, not previously established, for significant dischargers that are required to achieve water quality standards;

(4) An assessment of needs for publicly owned treatment works;

(5) An inventory and categorization of significant individual discharges;

(6) Already established schedules of compliance and target dates of abatement for significant dischargers not on a compliance schedule.

(b) The process will allow for basin plans containing one or more water quality segments and/or one or more effluent limitation segments. The level of planning shall be related to requirements of segments within the basin.

##### § 130.21 Establishment of planning areas (basins).

The process shall provide for establishment of planning areas, as follows:

(a) Each planning area (basin) shall be the area within the basin boundary.

(b) Except as provided in paragraph (c) of this section, the basin boundaries

shall be those identified as minor basins in the EPA water quality information system.

(c) The process may provide for the establishment of planning boundaries differing from those identified in the EPA basin system. Any such differing boundaries shall be submitted to the Regional Administrator for approval.

(d) The initial submission shall include a map of adequate scale clearly delineating the boundaries of each proposed basin within the State and an identification of the basin's segments. (See § 131.201 of this chapter.)

##### § 130.22 Relation between plans and other planning provisions.

The process shall provide that each basin plan will be coordinated with each applicable water quality subplan (see § 131.204 of this chapter) and other applicable State and local plans including land use and natural resources plans for the basin.

##### § 130.23 Water quality standards.

The process shall provide that each basin plan will set forth the water quality standards applicable to the navigable waters covered by the plan. (See § 131.202 of this chapter.) The process, including the basin plans developed as part of the process, shall be the one used by the States to assist in making the necessary revisions of water quality standards to bring them into conformance with the goals of the Act.

##### § 130.24 Total maximum daily loads.

The process shall provide that for each water quality segment the plan will establish total maximum permissible daily loads, including consideration of nonpoint source contributions, required to meet the applicable violated water quality standard as provided in § 131.205(a) of this chapter.

##### § 130.25 Individual point source discharge allocation; impact on water quality.

(a) The process shall provide that each plan will identify, locate, and describe each significant point source of pollutants and any other point source as is appropriate in accordance with § 131.206(a) of this chapter.

(b) The process shall provide that in water quality segments in each plan target pollutant discharge allocations and thermal discharge allocations for point, and nonpoint sources where feasible, will be established as provided in § 131.206(b) of this chapter.

(c) The process shall provide that each plan will establish controls over the disposition of all residual waste from any municipal, industrial, or other water or waste water treatment processing, as prescribed in § 131.203(e) of this chapter.

##### § 130.26 Schedules of compliance.

The process shall provide that each plan will develop schedules of compliance or target dates of abatement as prescribed in § 131.207 of this chapter.

##### § 130.27 Inventory of individual dischargers.

(a) The process shall provide that each plan will include an inventory of significant dischargers and categorization of these dischargers by segment. Such inventory and categorization shall be used:

(1) In determining projects for construction, with Federal financial assistance, of publicly owned waste water facilities required to meet the applicable requirements of the Act.

(2) For the issuance of permits to municipal, industrial, and other point source discharges.

##### § 130.28 Assessment of municipal needs for publicly owned water treatment works.

The process shall provide that each plan will assess the needs for publicly owned waste treatment works in the basin, as prescribed in § 131.210 of this chapter.

##### § 130.29 Nonpoint sources of pollutants.

The process shall provide that in water quality segments each plan will identify, evaluate, and, to the extent possible, establish controls over nonpoint sources of pollutants, as prescribed in § 131.211 of this chapter.

##### § 130.30 Monitoring and surveillance.

(a) The process shall provide for a monitoring and surveillance program which is designed to assure collection of data necessary to establish and review water quality goals, determine maximum daily loads, load allocations and effluent limitations, as described in §§ 130.24 and 130.25; establish the relationship between water quality and individual discharges and identify non-point sources of pollutants.

(b) Each monitoring and surveillance program shall include a program for producing the annual reports required under section 305(b), beginning with the report required by January 1, 1975. (See § 130.55.)

##### § 130.31 Intergovernmental cooperation.

(a) The process shall provide that in the preparation of basin plans, areawide and local planning inputs will be reviewed and will be included in the basin plan as appropriate. (See § 130.22.)

(b) The process shall provide that local governments within the State will be encouraged to utilize existing or carry out appropriate institutional or other arrangements with other local governments, in the same State, for cooperation in the development and implementation of plans.

(c) The process shall provide for interstate cooperation whenever a plan involves the interests of more than one State. Such provision shall include the following assurances:

(1) That when a plan is under development in the State for an area affecting or affected by waters of one or more other States, the planning agency will cooperate with each such other State in

the analyses and planning pertinent to such area including but not limited to problem assessment and priorities and schedule for plan preparation. (See §§ 130.41 and 130.42.)

(2) That when a plan is under development in another State for an area affecting or affected by waters of the State, the State will cooperate with such other State in the analyses and planning pertinent to such area.

(d) The use of interstate agencies in all phases of interstate cooperation in water quality management planning is encouraged.

(e) The process shall describe the mechanism for approval of water quality management plans involving interstate waters.

##### § 130.32 Adoption of plans.

The process shall provide that the plans will be officially adopted, after appropriate public hearings, as the official water quality management plans of the State and that the plans may be revised, after public hearings, as appropriate. Hearings will be held on the plan except for those portions of the plan where hearings were previously held; for example, on segments where public hearings were held in conjunction with the issuance of permits. (See §§ 131.401 and 131.404 of this chapter.)

#### Subpart D—Preparation of Annual Strategy

##### § 130.40 State strategy.

(a) The planning process shall provide for the preparation of an annual State strategy. The Governor or his designee(s) shall be provided with the opportunity for involvement in the identification and resolution of significant issues in the formulation of the State strategy. The strategy shall contain:

(1) A statewide assessment of water quality problems and the causes of these problems;

(2) A listing of the geographical or discharger priorities of these problems;

(3) A listing of the priorities and scheduling of permits, construction grants, basin plans, and other appropriate program actions;

(b) The strategy should be based upon information derived from completed plans when available and from available information in areas where plans are not complete.

(c) The strategy shall be submitted as part of the section 106 State program submittal as required pursuant to § 130.55.

##### § 130.41 Problem assessment and priorities.

(a) Based on the annual statewide assessment of the water quality problems and causes of these problems developed pursuant to § 130.40(a)(1), the State shall rank each segment in priority order, taking into account:

(1) Severity of pollution problems.

(2) Population affected.

(3) Need for preservation of high quality waters.

(4) National priorities as determined by the Administrator.

## RULES AND REGULATIONS

(b) Segments of the same basin need not be listed together; however, their ranking in the State list shall be consistent with their ranking in any approved plan.

(c) This ranking shall generally govern the development of plans, construction of publicly owned treatment works, issuance of permits, and other program activities.

#### § 130.42 Schedule for plan preparation.

(a) The process shall establish a schedule for plan preparation. The schedule shall provide a sequence for phasing the completion of plans to assure the orderly implementation of the planning process, consistent with existing planning efforts and needs and the expanding capabilities for planning in the State. Such schedule shall determine the State's priorities for the development of plans pursuant to the process during the period covered by the schedule. It shall provide for an initial number of plans to be completed not later than June 30, 1973; an additional number of plans to be completed not later than June 30, 1974; and for remaining plans to be completed by June 30, 1975.

(b) The schedule of basin plans shall be determined following consideration of:

- (1) The ranking of segments pursuant to § 130.41 and the number of water quality segments in the basin; and
- (2) Any other factors that the State may deem appropriate in developing and scheduling plans for sound water quality management.

#### § 130.43 State municipal discharge inventory.

(a) Each State shall establish not later than June 30, 1973, and shall thereafter maintain, a State Municipal Discharge Inventory. Such an inventory shall set forth for the State a ranking of significant municipal dischargers. The State Municipal Discharge Inventory shall be used in establishing priorities and output estimates for municipal facilities construction and in issuing municipal permits to be developed as part of the State program submittal required under section 106 of the Act. This list shall become the list of municipalities required in § 35.915(b) of this chapter for award of construction grants.

(b) The State Municipal Discharge Inventory shall be revised and submitted at least once each year as required pursuant to § 130.55.

(c) The State Municipal Discharge Inventory shall be prepared as follows:

- (1) The State shall rank and categorize significant municipal dischargers consistent with the segment rankings contained in § 130.41.
- (2) Dischargers of the same basin need not be listed together; however, their ranking and categorization in the State list shall be in accordance with their ranking and categorization in any approved plan.

#### § 130.44 State industrial discharge inventory.

Each State shall establish not later than June 30, 1973, and shall thereafter

maintain, a State Industrial Discharge Inventory. The procedures used in § 130.43 for constructing and submitting the municipal inventory shall be used in developing the industrial discharge inventory. The State Industrial Discharge Inventory shall be used in establishing priorities and output estimates for issuing industrial permits to be developed as part of the State program submittal required under section 106 of the Act.

#### Subpart E—Requirements for Approval of Planning Process; Reports

##### § 130.50 Submission of process.

(a) The Governor of each State shall submit to the Regional Administrator the continuing planning process pursuant to section 303(e) of the Act.

(b) Submission shall be accomplished by delivering five copies of the planning process to the Regional Administrator and a letter from the Governor notifying him of such action.

##### § 130.51 Contents of process submittal.

(a) The submittal shall at a minimum contain the following:

- (1) A map of the State showing basins and segments.
- (2) A listing of the classifications of segments.
- (3) A description of the planning method employed to formulate plans.
- (4) A listing of the planning agency or agencies that will perform the planning.
- (5) A schedule for plan preparation.
- (6) A description of participation of the public in the development of the process, including participation of local governments.
- (7) A specification that legal authorities required to prepare and adopt plans required by the planning process exist or will be obtained.
- (8) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(b) A specification that legal authorities required to prepare and adopt plans required by the planning process exist or will be obtained.

(c) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(d) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(e) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(f) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(g) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(h) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(i) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(j) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(k) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(l) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(m) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(n) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(o) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(p) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(q) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(r) A description of reports including the State strategy that will be submitted under section 106 of the Act.

(s) A description of reports including the State strategy that will be submitted under section 106 of the Act.

## RULES AND REGULATIONS

any State if approval of the continuing planning process is withdrawn following approval, including withdrawal of process approval based on gross failure to comply with the schedule for plan preparation (§§ 130.40 and 130.41) or on failure of plans to conform with the process (§ 130.52).

(c) In connection with any permit issued to a significant discharger in a cluster where water quality violations occur, or are suspected to occur, and for which no plan has been approved by the Regional Administrator, the water quality impact of the discharges of all members, municipal and industrial, of the

cluster to which such major discharger belongs, must be considered in connection with the issuance of such discharger's permit.

#### § 130.61 Relationship of continuing planning process with construction grants.

(a) Before approving a grant for any project for any treatment works under section 201(g) of the Act after June 30, 1973, the Regional Administrator shall determine, pursuant to 40 CFR 35.925-2, that such works are in conformity with any applicable plan approved in accordance with this part and Part 131 of this

chapter. Disapproval by the Regional Administrator of a plan, or relevant portion thereof, for the area where a project is to be located may constitute grounds for not approving a grant for such project.

(b) The Regional Administrator may suspend or terminate a grant for any project for any treatment works in accordance with § 35.950 of this chapter if he determines that such grant is inconsistent with a plan, for the area of the project, approved subsequent to approval of the grant.

## How To Find U.S. Statutes and United States Code Citations

[Second Revised Edition—1971]

This useful guide is designed to enable the user to obtain—quickly and easily—up-to-date and accurate citations to the United States Statutes at Large and the United States Code.

It contains typical legal references which require further citing. The official published volumes in which the citations may be found

are shown alongside each reference—with suggestions as to the logical sequence to follow in using them. Additional finding aids, some especially useful in citing current legislation, also have been included. Examples are furnished at pertinent points and a list of references, with descriptions, is carried at the end.

## PART I

(Part II begins on page 8113)

### HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

SENIOR CITIZENS MONTH, 1973—Presidential Proclamation .....	8047
CIVIL DISORDER REINSURANCE—HUD notice of Standard Reinsurance Contract requirements; effective 3-28-73 .....	8076
FOOD STAMPS—USDA permits optional implementation of public assistance withholding by States; effective 3-28-73 .....	8049
BOATING SAFETY—New and amended Coast Guard regulations on lifesaving equipment (3 documents) .....	8113
RUG AND CARPET FLAMMABILITY—FTC suspends requirement and proposes alternative method for laundry procedures on certain backings; comments by 5-14-73 .....	8101
CERTIFICATED AIRPORTS— FAA requires use by domestic and flag carriers; effective 5-21-73 .....	8055
FAA proposal to require use by supplemental carriers and others; comments by 4-17-73 .....	8067
CIVIL AIRCRAFT SONIC BOOM—FAA amendment to grant public protection .....	8051
ANTIBIOTICS—FDA proposals on ampicillin and cephaloglycin; comments by 5-29-73 .....	8064
PESTICIDES—EPA proposed interim tolerance for certain residues on apples; comments by 4-27-73 .....	8069
CABLE TV—FCC advance notice of petitions for waiver of cross-ownership divestiture requirements .....	8082
CONTROLLED SUBSTANCES—GSA revises instructions for use and disposal; effective 3-28-73 .....	8057
ANTIDUMPING—Treasury Dept. notice of withholding of appraisement on germanium point contact diodes from Japan .....	8072

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$2.50 per month or \$25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

## List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

an active and honored place in our families, our communities, and our Nation.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby designate the month of May, 1973, as Senior Citizens Month.

I invite the officials of the Federal, State, and local governments, leaders of voluntary and private organizations, and all Americans everywhere to join in appropriate recognition of OLDER AMERICANS IN ACTION during this month and throughout the coming year.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of March, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-seventh.

[FR Doc.73-6050 Filed 3-27-73;9:40 am]

## Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

### Title 5—Administrative Personnel CHAPTER I—CIVIL SERVICE COMMISSION PART 213—EXCEPTED SERVICE Executive Office of the President

Section 213.3303 is amended to show that one position of Secretary to the Director, Office of Telecommunications Policy, is excepted under Schedule C.

Effective on March 28, 1973, § 213.3303 (1) (6) is added as set forth below.

§ 213.3303 Executive Office of the President.

(1) Office of Telecommunications Policy.

(6) One Secretary to the Director. (5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.

[FR Doc.73-5858 Filed 3-27-73;8:45 am]

### PART 213—EXCEPTED SERVICE Department of Agriculture

Section 213.3313 is amended to show that two positions of Confidential Assistant to the Deputy Under Secretary for Congressional Relations are excepted under Schedule C.

Effective on March 28, 1973, § 213.3313 (c) (6) is added as set forth below.

§ 213.3313 Department of Agriculture.

(c) Office of the Under Secretary.

(6) Two Confidential Assistants to the Deputy Under Secretary for Congressional Relations.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.

[FR Doc.73-5857 Filed 3-27-73;8:45 am]

### PART 213—EXCEPTED SERVICE Department of Health, Education, and Welfare

Part 213 is amended to reflect the transfer of functions of and the Office of Consumer Affairs from the Executive Of-

fice of the President to the Department of Health, Education, and Welfare.

Effective on March 28, 1973, § 213.3316 (m) is added and § 213.3371 is revoked as set forth below.

§ 213.3316 Department of Health, Education, and Welfare.

(m) Office of Consumer Affairs.

(1) One Public Affairs Officer.

(2) One Director for Communications.

(3) One Director for Consumer Education.

(4) One Writer-Editor.

(5) One Confidential Assistant to the Special Assistant to the President for Consumer Affairs.

§ 213.3371 [Reserved]

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION  
[SEAL] JAMES C. SPRY,  
Executive Assistant to the Commissioners.

### Title 7—Agriculture CHAPTER II—FOOD AND NUTRITION SERVICE, DEPARTMENT OF AGRICULTURE

#### PART 270—GENERAL INFORMATION AND DEFINITIONS

#### PART 271—PARTICIPATION OF STATE AGENCIES AND ELIGIBLE HOUSEHOLDS

##### Food Stamp Program

Pursuant to the authority contained in the Food Stamp Act of 1964, as amended (78 Stat. 703, as amended; 7 U.S.C. 2011-2025), regulations governing the operation of the Food Stamp Program are hereby amended.

Public Law 92-603 (86 Stat. 1329), approved October 30, 1972, revokes the statutory provision that no person shall be charged with a violation on the basis of information contained in the affidavit. Accordingly, this provision of the regulations is deleted. Public Law 92-603 also revokes the legislative authority for the mandatory requirement that the State offer to any household, if it so elects, to have the cost of the total coupon allotment deducted from any federally aided public assistance grant or payment. In lieu thereof, this amendment gives the State agency the option of providing the procedure for the voluntary deduction of the food stamp purchase requirement from the federally aided public assistance grant or payment and distributing the full coupon allotment to the participant.

It is the policy of the Department that 30 days' notice will be given to proposed rule making in the formulation of rules and regulations governing the Food Stamp Program. However, because these provisions of Public Law 92-603 are mandatory and become effective on January 1, 1973, it is hereby determined that it is impracticable and contrary to the public interest to give notice of proposed rule making with respect to this amendment.

Section 270.4(c) is revised to read as follows:

§ 270.4 Coupons as obligations of the United States, crimes and offenses.

(c) All individuals, partnerships, corporations, or other legal entities including State agencies and their delegates (referred to in this paragraph as "persons") having custody, care and control of coupons and ATP cards shall at all times, in receiving, storing, transmitting, or otherwise handling coupons and ATP cards, take all precautions necessary to avoid acceptance, transfer, negotiation, or use of spurious, altered, or counterfeit coupons and ATP cards and to avoid any unauthorized transfer, negotiation, or use of coupons and ATP cards. Such persons shall also safeguard coupons and ATP cards from theft, embezzlement, loss, damage, or destruction. Any false statement made by any person, in any application or certification required by this subchapter, by the Plan of Operation of any State agency, or by instructions of FNS, may subject such person to criminal prosecution under any applicable provision of Federal law or to civil liability under the provisions of 31 U.S.C. 231 or either, or both, as well as to any legal action as may be maintained under State law.

Section 271.6(d) (2) is revised to read as follows:

§ 271.6 Methods of distributing, issuing, and accounting for coupons and receipts.

(d) . . . . .

(2) The State agency may, at its option, permit any household participating in the program, if it so elects, to have the cost of its full monthly coupon allotment deducted from any grant or payment such household may be entitled to receive under any federally aided public assistance program, and have its full monthly coupon allotment distributed to it.

(78 Stat. 703, as amended; 7 U.S.C. 2011-2025)

#### Title 14—Aeronautics and Space

### CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 73-NW-5-AD; Amdt. 39-1614]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### McKinnon Model G-21 Series Airplanes

Amendment 39-1525 (31 FR 13697), AD 72-20-4 requires inspections of the elevator and rudder torque tubes for corrosion and cracks and replace as necessary on McKinnon Model G-21 series airplanes. After issuing Amendment 39-1525, due to service experience and extreme life and service time on the failed part, the agency has determined that new inspection times and procedures are warranted when new parts have been installed. Therefore, the AD is being superseded by a new AD that requires annual visual inspections and tube replacement every 6,000 hours or 7 years.

Since this amendment relieves a restriction and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, 31 FR 13697, § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

McKinnon. Applies to Model G-21 series airplanes.

Compliance required as indicated.

Applicable to torque tube assemblies, Grumman Part Nos. 12755-1, 12756-1, 12757-1, and 12758-1, and the support tubes, Part Nos. 12725-1 and -2.

A. Applicable to those torque tube and support tube assemblies having less than 6,000 hours' time in service, or less than 7 years' life since manufacture:

To prevent hazards in flight associated with the failure of the elevator or rudder torque tubes, unless already accomplished within the last eleven (11) months, visually inspect the external condition of the tubes within one (1) month after the effective date of this AD, and at intervals thereafter not to exceed twelve (12) months from last inspection. Tubes which are cracked or show evidence of corrosion must either be repaired or replaced in accordance with FAR Part 43 and Advisory Circular 43.13-1 prior to further flight.

B. Applicable to those torque tube and support tube assemblies having more than 6,000 hours' time in service, or more than 7 years' life since manufacture. Within the next year, unless already accomplished:

(1) Visually inspect the support tubes, Part Nos. 12725-1 and -2 for corrosion. If corrosion is found, repair or replace in accordance with FAR Part 43 and Advisory Circular 43.13-1 before further flight.

(2) Remove all bolted bellcranks, arms, and pedals from the torque tubes. Using visual and dye penetrant methods, or an FAA-

#### RULES AND REGULATIONS

approved equivalent inspection, inspect the parts removed from the torque tubes for corrosion and cracking. Repair and replace in accordance with FAR Part 43 and AC 43.13-1.

(3) Discard elevator torque tube, Part No. 12755-1; rudder torque tube, Part No. 12756-1 and the L.H. and R.H. rudder pedal torque tubes, Parts Nos. 12757-1 and 12758-1. Install new manufactured parts or fabricate replacement tubes in accordance with FAR 43 and AC 43.13-1 from new manufacture stock 2024-T3 (material specifications WW-T-700/3 or equivalent) in conformance with the above drawings taking special care to corrosion-proof the interior as well as the exterior surfaces of the tubes.

(4) Reassemble and relubricate the visual inspection program per (A) until reaching the rebuild threshold per (B).

C. Aircraft with badly corroded but uncracked torque tubes may be flown in accordance with FAR 21.197 to a base where a repair or replacement can be performed.

D. Upon submission of substantiating data by an owner or operator through an FAA Maintenance Inspector, the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, may adjust the repetitive inspection intervals specified in this AD.

This supersedes Amendment 39-1525 (31 FR 13697), AD 72-20-4.

This Amendment becomes effective on or before March 28, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Seattle, Wash., on March 20, 1973.

C. B. WALK, Jr.,  
Director, FAA Northwest Region.

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### PART 73—SPECIAL USE AIRSPACE

##### Alteration of Restricted Area, Control Zone and Transition Areas Designation of Control Zone and Transition Area

The purpose of these amendments to Parts 71 and 73 of the Federal Aviation Regulations is to alter Restricted Areas R-5306A, R-5306B, and R-5306C Cherry Point, N.C., the Jacksonville, N.C., control zone and the Jacksonville, N.C., the New Bern, N.C., and the North Carolina transition areas. The altered restricted areas are added to the list of those having airspace included in the Continental Control Area, and both a control zone and a transition area are designated for Cherry Point MCAS, N.C.

These amendments will allow better utilization of airspace. The restricted portion is reduced in size and the excess is returned to public use. Some of the excess is used for specified control zones and transition areas as described herein. The retained restricted airspace is redefined to establish five new restricted areas. These are designated for joint use and when released by the using agency they will be accessible to the public. Redefining the restricted areas also permits the establishment of a straight-in approach to Simmons-Nott Airport, New

Bern, N.C. This approach will provide a greater degree of safety for pilots executing an IFR approach to that airport.

Since these amendments restore airspace to the public use and by relieving a restriction provide a public benefit and since these amendments are considered minor in nature, notice and public procedure thereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, these amendments will become effective more than 30 days after publication.

In consideration of the foregoing, Parts 71 and 73 of the Federal Aviation Regulations are amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

1. In § 73.53 (38 FR 863):

a. The description for R-5306A Cherry Point, N.C., is amended to read as follows:

R-5306A CHERRY POINT, N.C.

Boundaries. Beginning at latitude 35°-23'15" N., longitude 76°-34'40" W.; to latitude 35°-18'15" N., longitude 76°-16'40" W.; to latitude 35°-04'30" N., longitude 76°-04'30" W.; to latitude 34°-46'45" N., longitude 76°-24'45" W.; to latitude 34°-46'00" N., longitude 76°-30'00" W.; to latitude 35°-06'00" N., longitude 76°-51'20" W.; thence to point of beginning. Designated altitudes. Surface to, but not including FL 180.

Time of designation. Continuous. Controlling agency. Federal Aviation Administration, Washington ARTC Center.

Using agency. Commanding General, U.S. Marine Corps Air Station, Cherry Point, N.C.

b. The description for R-5306B Cherry Point, N.C., is amended to read as follows:

R-5306B CHERRY POINT, N.C.

Boundaries. Beginning at latitude 35°-08'00" N., longitude 76°-51'20" W.; to latitude 34°-46'00" N., longitude 76°-30'00" W.; to latitude 34°-45'10" N., longitude 76°-40'30" W.; to latitude 34°-42'00" N., longitude 76°-54'45" W.; to latitude 34°-51'00" N., longitude 77°-05'30" W.; to latitude 34°-49'30" N., longitude 77°-10'00" W.; to latitude 35°-03'00" N., longitude 76°-57'00" W.; thence to point of beginning.

Designated altitudes. From 3,000 feet to, but not including FL 180.

Time of designation. Continuous. Controlling agency. Federal Aviation Administration, Washington ARTC Center.

Using agency. Commanding General, U.S. Marine Corps Air Station, Cherry Point, N.C.

c. The description for R-5306C Cherry Point, N.C., is amended to read as follows:

R-5306C CHERRY POINT, N.C.

Boundaries. Beginning at latitude 34°-51'00" N., longitude 77°-05'30" W.; to latitude 34°-42'00" N., longitude 76°-54'45" W.; to latitude 34°-41'50" N., longitude 76°-56'20" W.; to latitude 34°-37'30" N., longitude 76°-56'20" W.; thence southwest along a line 3-nautical miles from and parallel to the shoreline to latitude 34°-34'30" N., longitude 77°-09'00" W.; to latitude 34°-44'50" N., longitude 77°-14'40" W.; to latitude 34°-49'30" N., longitude 77°-10'00" W.; thence to point of beginning.

Designated altitude. Surface to, but not including FL 180.

Time of designation. Continuous. Controlling agency. Federal Aviation Administration, Washington ARTC Center.

Using agency. Commanding General, U.S. Marine Corps Air Station, Cherry Point, N.C.

d. The following restricted areas are added:

(1) R-5306D CHERRY POINT, N.C.

Boundaries. Beginning at latitude 34°-44'-50" N., longitude 77°-14'40" W.; to latitude 34°-34'30" N., longitude 77°-09'00" W.; thence southwest along a line 3-nautical miles from and parallel to the shoreline to latitude 34°-30'20" N., longitude 77°-15'50" W.; to latitude 34°-33'00" N., longitude 77°-19'00" W.; to latitude 34°-36'05" N., longitude 77°-26'08" W.; to latitude 34°-40'00" N., longitude 77°-22'00" W.; to latitude 34°-39'10" N., longitude 77°-20'50" W.; thence to point of beginning.

Designated altitudes. Surface to, but not including FL 180.

Time of designation. Continuous. Controlling agency. Federal Aviation Administration, Washington ARTC Center.

Using agency. Commanding General, U.S. Marine Corps Air Station, Cherry Point, N.C.

(2) R-5306E CHERRY POINT, N.C.

Boundaries. Beginning at latitude 34°-40'-20" N., longitude 77°-22'12" W.; to latitude 34°-40'00" N., longitude 77°-22'00" W.; to latitude 34°-36'05" N., longitude 77°-26'08" W.; to latitude 34°-38'12" N., longitude 77°-26'00" W.; thence to point of beginning. Designated altitudes. Surface to, but not including FL 180.

Time of designation. Continuous. Controlling agency. Federal Aviation Administration, Washington ARTC Center.

Using agency. Commanding General, U.S. Marine Corps Air Station, Cherry Point, N.C.

2. In § 71.171 (38 FR 351):

a. The following control zone is added:

CHERRY POINT MCAS, N.C.

The airspace within a 5-mile radius of Cherry Point MCAS (latitude 34°-54'30" N., longitude 76°-53'00" W.); within 1.5 miles each side of the 316° bearing from Cherry Point RBN, extending from the 5-mile radius zone to 1.5 miles northwest of the RBN.

b. The description of the Jacksonville, N.C., control zone is amended by deleting the words:

" \* \* \* southwest of the TACAN; excluding the portion within R-5306C \* \* \* " and substituting " \* \* \* southwest of the TACAN \* \* \* " therefor.

3. In § 71.181 (38 FR 435):

a. The following transition area is added:

CHERRY POINT MCAS, N.C.

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Cherry Point MCAS (latitude 34°-54'30" N., longitude 16°-53'00" W.); excluding the portion within the New Bern, N.C., transition area.

b. The description of the Jacksonville, N.C., transition area is amended by deleting the words:

" \* \* \* southwest of the RBN; excluding the portion within R-5306B and C \* \* \* " and substituting " \* \* \* southwest of the RBN \* \* \* " therefor.

c. The description of the New Bern, N.C., transition area is amended by deleting the words:

" \* \* \* longitude 77°-02'35" W.; excluding the portion within R-5306A \* \* \* " and substituting " \* \* \* longitude 77°-02'35" W. \* \* \* " therefor.

#### RULES AND REGULATIONS

d. The description of the North Carolina 1,200-foot transition area is amended by deleting the words:

" \* \* \* excluding that airspace within R-5306A, B and C, R-5311 \* \* \* " and substituting " \* \* \* excluding the portion within R-5311 \* \* \* " therefor.

4. In § 71.151 (38 FR 341) the following restricted areas are added:

R-5306A Cherry Point, N.C.  
R-5306B Cherry Point, N.C.  
R-5306C Cherry Point, N.C.  
R-5306D Cherry Point, N.C.  
R-5306E Cherry Point, N.C.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[Airspace Docket No. 72-SW-48]

#### PART 73—SPECIAL USE AIRSPACE

##### Alteration of Restricted Area

The purpose of this amendment to Part 73 of the Federal Aviation Regulations is to extend the time of designation of the Socorro, N. Mex., Restricted Area, R-5118.

The Department of the Air Force has requested that the time of designation of R-5118 be extended through September 30, 1973, to accommodate the impact of Athena rockets launched from sites located within the Green River, Utah, Restricted Area, R-6409.

Use of R-5118 was expected to terminate on April 12, 1973. However, aircraft used to support the Athena program were not available from January 15, 1973, through March 1, 1973, and aircraft availability is necessary for the successful completion of the program. Although this action imposes an additional restriction upon airspace users, the Department of the Air Force intends use of the area only to complete the current Athena program. Use of R-5118 will be publicized through the issuance of Notices to Airmen.

Because of an urgent need to have the area available, due and timely action is of the essence; therefore, notice and public procedure hereon are deemed impracticable and good cause exists to make this amendment effective without regard to the 30-day period preceding effectiveness.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective on March 28, 1973, as hereinafter set forth.

In § 73.51 (38 FR 658) the Socorro, N. Mex., Restricted Area, R-5118, is amended as follows:

In the time of designation, "April 12, 1973," is deleted and "September 30, 1973," is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 20, 1973.

H. B. HELSTROM,  
Chief, Airspace and  
Air Traffic Rules Division.

#### SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Docket No. 10261, Amdt. 91-112]

#### PART 91—GENERAL OPERATING AND FLIGHT RULES

##### Civil Aircraft Sonic Boom

The purpose of this amendment is to afford the public protection from civil aircraft sonic boom. The primary basis for this amendment is section 611 of the Federal Aviation Act of 1958 (49 U.S.C. 1431). This amendment prohibits the supersonic flight of civil aircraft except under the terms of an authorization to exceed mach 1.

This amendment is based on a notice of proposed rule making (Notice 70-16) issued on April 10, 1970, and published in the FEDERAL REGISTER on April 16, 1970 (35 FR 6189). Interested persons have been afforded an opportunity to participate in the making of these amendments. Due consideration has been given to all matter presented.

Pursuant to 49 U.S.C. 1431(a), the Federal Aviation Administration has consulted with the Secretary of Transportation, concerning all matters contained herein, prior to the adoption of this amendment. Pursuant to section 8(b) of the guidelines of the Council on Environmental Quality concerning statements on proposed Federal actions affecting the environment, published in the FEDERAL REGISTER on April 23, 1971 (36 FR 7724), the Federal Aviation Administration has submitted this amendment to the Environmental Protection Agency for review and comment.

Several comments in response to Notice 70-16 expressed concern for the airport noise levels to be expected from supersonic aircraft. The problem of airport noise levels is distinct from the sonic boom problem and is the subject of separate proposed regulatory action by the FAA (see Notice 70-33, Civil Supersonic Aircraft Noise Type Certification Standards, advance notice of proposed rule making, issued on August 4, 1970, and published in the FEDERAL REGISTER (35 FR 12555) on August 6, 1970).

Comments expressed concern that the exhaust of supersonic transport aircraft could have long-term environmental effects on the upper atmosphere. Under the Clean Air Amendments of 1970 (Public Law 91-604, December 31, 1970), Part B of title II of the Clean Air Act, as amended, provides, in section 231, that the Administrator of the Environmental Protection Agency shall issue "emission standards applicable to emissions of any air pollutant from any class or classes of aircraft or aircraft engines which in his judgment cause or contribute to or are likely to cause or contribute to air pollution which endangers the public

health or welfare." When such standards are issued for supersonic aircraft, the Department of Transportation will comply with section 232 of that Act, which directs the Secretary of Transportation to prescribe regulations to insure compliance with all standards prescribed under section 231. Such regulation, however, is distinct from the purpose of this amendment, which is limited to the control and abatement of sonic boom.

The policy of environmental management underlying this amendment is, first, that the burden of establishing the environmental acceptability of new and potentially harmful actions rests on the proponent of such actions rather than on the potentially affected public, but, second, that where consistent with this objective, reasonable opportunity for demonstrating or developing environmental acceptability should be available to the proponent of action who is willing and able to control his demonstration of acceptability in the public interest. Reasonable opportunity for the operators or manufacturers of civil supersonic aircraft to conduct sonic boom research is thus provided, in this amendment, in the form of closely controlled authorizations to exceed mach 1 in designated test areas (where the test cannot be safely or properly conducted offshore).

However, it is not intended that any of the burden of environmental risk be shifted to the general public in the form of an uncertain probability of sonic boom annoyance. The policy against causing the public at large to bear the risk of annoyance caused by sonic boom experimentation provides the basis for rejecting comments to the notice suggesting that regular air carrier routes be used as experimental sonic boom corridors. Contrary to the concern expressed in some comments, there is no authority whatsoever in this amendment for sonic boom producing flight over the United States except in the designated test areas.

Several comments concerned operation of supersonic aircraft outside of the United States. Two main issues were stressed. First was the concern that sonic booms may be injurious to sea life, damaging to ships, or annoying to persons at sea. In addition, there was considerable concern expressed that, because of the width of the sonic boom swath, the borders of the United States may be subjected to sonic booms generated by supersonic aircraft that are outside of the United States. Both of these issues involve regulation of foreign aircraft in international airspace over the high seas. For this reason, international concern and cooperation is a highly desirable part of any satisfactory resolution of these issues on a worldwide basis. In this connection, the National Environmental Policy Act of 1969 states (section 102(2)(E)) that the proper response to worldwide environmental issues is for Federal agencies, where consistent with U.S. foreign policy, to "lend appropriate support to initiatives, resolutions, and programs designed to maximize international cooperation in anticipating and

preventing a decline in the quality of mankind's world environment." Since before the passage of that Act, the International Civil Aviation Organization (ICAO) has been actively engaged in establishing a basis for international sonic boom control for civil aircraft. To this end, the ICAO sonic boom panel, with U.S. representation, has been meeting since 1969 to study the problem. In March of 1971, the ICAO Council, in further recognition of the importance of the sonic boom problem, replaced the sonic boom panel with a committee having wider scope and reporting directly to the Council. The United States is represented in all proceedings of the Sonic Boom Committee. In response to public comments, the FAA believes that the form of international cooperation now underway provides an appropriate means of orderly investigation of the sonic boom problem over the high seas.

Several comments stated that the notice was unclear with respect to the intent of the FAA to protect the territorial seas of the United States from sonic boom. The intent of this amendment is to provide the territorial seas of the United States with the same degree of sonic boom protection that is provided for the land areas of the United States. For this reason, the words "excluding the territorial waters thereof," which appeared in proposed § 91.55(c), are deleted from this amendment.

One comment requested that the final rule include military aircraft and not be limited to civil aircraft. The limitation to civil aircraft is appropriate at this time to reflect the limits of regulatory authority under title VI of the Federal Aviation Act of 1958, which provides the primary legal basis for this amendment.

Concern was expressed that the general terms of the provisions for the issuance of authorizations to exceed mach 1 will actually authorize what the rule is designed to prohibit. It was stated, for example, that the words "necessary for aircraft development" could be interpreted as permitting almost any sonic boom producing flight desired by those concerned with aircraft development. The FAA agrees that proposed § 91.55(b) could be read as implying that an authorization to exceed mach 1 would be issued upon a mere showing that one of the listed categories (e.g., aircraft development) applies. This was not intended. The intent of the proposal was to require environmental investigation of the effects of the issuance of an authorization to exceed mach 1 for flight in a designated test area. For this reason, proposed § 91.55(e) provided that "an application for an authorization to exceed mach 1 may be denied if the Administrator finds that such action is necessary to protect and enhance the environment." However, in order to more adequately describe the extent of the environmental investigation that is intended, this amendment requires the applicant for an authorization to exceed mach 1 in a designated test area to submit all information deemed necessary to permit the Administrator

to comply with the National Environmental Policy Act of 1969 and related Executive orders, guidelines, and orders, that are determined to apply to the issuance of an authorization or designation of a test area. In addition, in agreement with other comments, the provision for issuance of authorizations to exceed mach 1 for flights "necessary for aircraft development" is eliminated from this amendment for reasons discussed below.

Several comments requested that all opportunity for supersonic airworthiness investigations and sonic boom flight testing be eliminated from the final rule and stated that no provision should exist for the issuance of an authorization to exceed mach 1 under any condition. Abandonment of civil supersonic air transportation technology itself is in effect urged by these comments. The FAA agrees that the rule should not permit environmentally unacceptable authorizations to be issued. However, the FAA does not agree that the legitimate concern for environmental controls on supersonic flight provides a sound policy basis for requiring that the technology of civil supersonic air transportation itself be prevented from developing in forms that are environmentally acceptable and that are also safe, convenient, productive, and profitable to future generations. Such abandonment of emergent technology is not a rational substitute for its controlled growth. Experimentation and research are an inescapable aspect of environmental, as well as technological, improvements in the public interest, where complex technologies and their interactions are involved. Further, such research is also necessary to promote exploration and understanding of the complex interface between technology and quality of life so that both may be maximized, consistent with the policy of "productive harmony" in section 101 (a) of the National Environmental Policy Act of 1969. Finally, concerted and controlled research efforts may actually achieve a supersonic vehicle that delivers more transportation more quickly with less total environmental cost than subsonic aircraft delivering the same necessary service volume, and the fruits of this research may have environmentally beneficial secondary impacts in the development of other aircraft classes.

It is believed that environmentally responsible growth, not the abandonment of growth, was intended by that Act, which directs Federal agencies to consider environmental amenities "along with" (not in lieu of) economic and technological considerations. Closely controlled experimentation and research are also consistent with the commitment to responsible growth in the President's state of the Union address of June 22, 1970, which states that "the argument is increasingly heard that a fundamental contradiction has arisen between economic growth and the quality of life, so that to have one we must forsake the other. The answer is not to abandon growth, but to redirect it."

It should also be noted, as stated above, that the detailed provisions for environmental analysis and public coordination

of environmental statements in the guidelines of the Council on Environmental Quality will be complied with in the designation of test areas and in the issuance of authorizations to exceed mach 1 where such actions are determined to be major Federal actions significantly affecting the quality of human environment. The policy of environmental protection in the National Environmental Policy Act of 1969 will be complied with in the issuance of authorizations to exceed mach 1. Therefore, it is not believed that a rule preventing all regulatory opportunity for sonic boom experimentation and research is necessary from an environmental standpoint.

Several comments stressed the current lack of definitive conclusions regarding the effect or acceptability of civil aircraft sonic booms, and urged that steps be taken later to determine whether environmentally acceptable boom generating characteristics can be developed and that the rule be periodically reviewed to take advantage of new knowledge concerning sonic booms. Closely related to this comment was a request that the FAA should now be regulating only the sonic boom characteristics (signatures), not flight conditions such as speed. The FAA agrees that the technology of supersonic air transportation should be given fair opportunity to prove itself fully compatible with the environment. For this reason, the rule contains provisions for flight testing, in designated test areas only, where necessary to establish means of reducing or eliminating the effects of sonic boom (and where the test cannot be safely or properly conducted offshore), subject to FAA's duty to comply with all applicable environmental statutes, Executive orders, and guidelines. The FAA further agrees that the regulation should be reviewed to relieve any restrictions that are demonstrated not to be necessary for consistency with all applicable environmental statutes, Executive orders, and guidelines. However, under the current state of the art of sonic boom control, there is no basis for establishing an "acceptable" overpressure limit, nor is there any assurance that a regulation that addresses only the sonic boom "signature" can provide a predictable basis for protecting the public from sonic boom of any given intensity. Further, it is doubtful that such a rule could be fairly and effectively enforced since, as pointed out in another comment, flight crews at present have no means of monitoring or sensing the surface "signature" of sonic booms. The mach meter, on the other hand, even under today's limited knowledge, can be both an effective shield of the public from sonic boom and a clear and unambiguous indicator of violation to the flight crew. The FAA therefore believes that, under the current limits of sonic boom control technology, control of flight conditions (e.g., speed) is necessary in order to insure effective control of sonic boom generation at the source and believes that the speed limit established as a general operating rule should positively prevent sonic boom generation

that could affect the surface. Mach 1 is believed to be such a speed limit. In this connection, the FAA does not agree with other comments suggesting that a high subsonic speed limit, rather than mach 1, is necessary to prevent sonic boom from reaching the surface.

A similar comment concluded that the proposed rule, by banning sonic boom rather than permitting acceptable sonic booms, would so beludge the future operability of small supersonic civil aircraft as to make it unrealistic to seek financing for their development. The commentator stated that, "it would be unacceptably risky to incur the preliminary design, scale model, prototype, and testing costs, without which there could be no prospect of even starting to find out whether the end product of development could operate as far as sonic boom characteristics are concerned." The FAA believes that, until a truly acceptable and controllable sonic boom signature can be conservatively demonstrated, the aircraft industry must weigh the above-cited risk against the market potential for the aircraft. For the company that decides that the potential market is worth the investment risk, this amendment offers opportunities for that company to demonstrate the environmental acceptability of its sonic boom characteristics. In the meantime, as stated above, it is not believed that the risk cited by the commentator should be shifted to the general public in the form of an uncertain and uncontrolled probability of disturbance from sonic boom. This would be the result of attempting to define an acceptable sonic boom under the limitations of current knowledge.

It should be noted that none of the industry comments recommending an operating authority to create "acceptable" sonic booms contained any evidence that would support a definition of "acceptability" in terms of specific overpressures, any evidence that industry has developed means of controlling those overpressures, or indeed, any evidence that overpressure itself is a proper index of annoyance.

One comment stated that the proposal was in effect a combination of certification and operating rule, that any showing of sonic boom characteristics should therefore be required of applicants for type certificates (e.g., manufacturers) rather than operators, as in the case of other type certification rules, and that operators should only be required to comply with type certification operating limitations and should not have to go through the environmental or other demonstrations involved in the issuance of an authorization to exceed mach 1. When and if the technology of predicting and closely controlling the generation of clearly acceptable sonic booms reaches a level of certainty comparable to that involved in the airworthiness determinations now made by the FAA during type certification, some provision for approving flight in excess of mach 1 might conceivably become an appropriate aspect of type certification (together with appropriate operating limitations).

However, under the current rudimentary state of the art of sonic boom prediction and control, no approval to exceed mach 1 should be given during type certification, particularly since such approval would thereby become protected by the procedural requirements applicable to the amendment, modification, suspension, or revocation of certificates under section 609 of the Federal Aviation Act. At this early stage in the development of civil supersonic air transportation, it is believed that type certification is too cumbersome a procedure to provide the continuous and flexible administrative control and review that is necessary to insure that no unacceptable environmental impacts result from sonic boom research. In the light of the increasing public concern for environmental understanding and control, the flexibility and control inherent in the form of operating rule contained in this amendment (and not available in type certification) is also believed to be necessary to insure that supersonic air transportation is given a fair chance to prove itself compatible with environmental values while at the same time protecting those values as research progresses.

Several comments opposed the proposal not on its specific merits but on the basis that all sonic boom control should be done directly by the Congress. The Department of Transportation appreciates the concern that underlies these comments and has on previous occasions stated to congressional committees that no objections would be interposed to further congressional action per se to protect the public from sonic boom. Any forthcoming statutes concerning sonic boom will be administered by the Department if such is the will of the Congress. In the meantime, the Department recognizes that the question of who provides protection from sonic boom is secondary to the need to provide effective protection, and intends to insure that the public receives the full measure of protection from sonic boom intended by the Congress in Public Law 90-411 and subsequent environmental laws, Executive orders, and guidelines.

One comment stated that the FAA should make clear the right of State and local municipal authorities to enact their own restrictions on supersonic overland flights and sonic booms. This would be inappropriate in view of the Federal preemption of the flight of aircraft as acknowledged in legislative history of Public Law 90-411. Senate Report 1353 (90th Cong. 2d sess., July 1, 1968) accompanying H.R. 3400 specifically states that "since the flight of aircraft has been preempted by the Federal Government, State and local governments can presently exercise no control over sonic boom. The bill makes no change in this regard." (P. 7.)

One comment suggested that the regulation provide an exception to permit operation at speeds in excess of mach 1 for safety, stating that there may be emergency situations where a pilot may have to increase speed (such as in an emergency descent) in order to protect

his aircraft and passengers. The current emergency deviation authority given the pilot in command by § 91.3 is adequate in this regard.

One comment stated that the rule should be clarified to indicate that the "conditions and limitations" referred to in proposed § 91.55(c) include weather or other atmospheric conditions. Atmospheric conditions are a fundamental variable affecting the propagation of sonic boom. They are thus a fundamental portion of the conditions and limitations referred to in § 91.55. It is not believed that further clarification is necessary.

One comment raised a potentially important point with respect to the meaning of the phrase "cause a sonic boom to reach the surface." In this connection, the question was asked whether a pressure event that was not perceptible by man but was detectable by instruments on the surface would be considered a "sonic boom." Perceptibility or audibility are highly subjective variables. These variables are closely related to the equally subjective concept of "acceptability" as applied to sonic boom overpressure control and limitation. As stated above, the technology of sonic boom propagation control had not yet achieved a prediction capability adequate to insure public protection from sonic boom. Thus, while a measurable but imperceptible boom might be demonstrated under one set of atmospheric conditions, an attempt to duplicate the event, under today's limited knowledge, may result in a perceptible boom on the surface. Considering all of the above factors, together with the Department's commitment to provide real and effective sonic boom protection as research proceeds, it is believed reasonable to require public protection from "measurable sonic boom overpressures." This term is therefore adopted in this amendment in response to this comment.

One comment stated that there is no proof of any incompatibility between the quality of the environment and the technical and economic advantages of supersonic transportation, that no civil supersonic transport will be put into service for years, that research should yield much information during this period, and that no emergency requiring this amendment exists at this time. The commentator stated that most activities involved in economic progress "entail favorable consequences for some people and unfavorable for others" and urged that this amendment either be postponed or that it be revised to incorporate language that would permit sonic boom to reach the surface provided that such sonic boom does not "create damage" to people, property, and environment.

With respect to the question of the timing of this amendment the FAA does not believe that the potential for further research justifies postponement of this amendment until supersonic air transportation is imminent. While the FAA agrees that no emergency now exists, early promulgation of this amendment is believed to be appropriate in order to insure that, to the maximum extent possible, persons concerned with the devel-

opment or future operation of supersonic civil aircraft will not miscalculate and make major technological decisions on the economic assumption that regular overland sonic boom may ultimately be permitted. Also, under the influence of an early regulation, industry efforts to develop environmentally acceptable alternative designs, such as the supercritical wing for efficient cruise at transonic speeds may be further encouraged.

With respect to the request to permit all sonic booms that do not "create damage" on the surface, it is believed that not only is such a standard vague and difficult to enforce since proof of damage is best left to the courts, but such a standard ignores the fact that much annoyance and environmental disturbance might thereby be permitted short of actual damage. The goal of the FAA is to prevent the disturbance itself and not permit the level of public protection to decay to the point of actual damage.

One comment opposed the proposed procedure under which an authorization to exceed mach 1 could be terminated, without notice or other protective process, if the Administrator determines that such action is necessary to protect the environment. The authority to operate supersonically is not viewed as a matter of right but as a privilege conditioned entirely upon demonstrated ability to control the environmental effects of such operation in the public interest. If, at any time and for any reason, the effects of such flight are not being controlled within the conditions and limitations under which an authorization is issued, or those conditions and limitations are determined to be environmentally inadequate, no vested interest in continuing such flight is created by the authorization and its effectiveness must remain within the immediate control of the FAA. However, it is believed that the necessary authority to take immediate action against the authorization can be properly exercised by temporary amendment or suspension pending final amendment or termination, and that procedural fairness can be better served, consistent with environmental protection, by providing for immediate temporary amendment or suspension rather than immediate termination, and by permitting the holder to show, during the period of temporary amendment or suspension, why the authorization should not be finally amended or terminated. This change is incorporated in this amendment.

One comment concluded that, because the flights for which an authorization to exceed mach 1 may be issued are described in the singular, the rule prohibits the grant of an authorization to exceed mach 1 covering more than one flight. This is not correct. In this amendment, as throughout the Federal Aviation Regulations, the singular includes the plural (see § 1.3, Rules of Construction, in Part 1 of the Federal Aviation Regulations). The extent of the coverage of an authorization will be determined, in large part, by the completeness of control over sonic boom demonstrated by the applicant.

One comment pointed out that Part 91 is used by a wide range of general aviation and other subsonic operators and should be kept as useful as possible to them. The FAA agrees. Therefore, the detailed provisions concerning authorizations to exceed mach 1 are issued as new Appendix B of Part 91, leaving in the main body of that part only the prohibition against supersonic flight without an authorization to exceed mach 1.

One comment questioned the provision for issuance of an authorization to exceed mach 1 for flights that are "necessary for aircraft development" (in addition to flights that are necessary to show compliance with airworthiness rules or necessary for sonic boom research). If the flight is neither necessary for airworthiness compliance purposes nor necessary for sonic boom research, the FAA agrees that no separate and clear reason for permitting supersonic flight is stated in the words "necessary for aircraft development." These words are therefore omitted from this amendment. Also, since the purposes of § 2(a) (1) and (3) are not limited to pure "research and development," those words are deleted from the section. No substantive change from the notice results.

One comment requested that the rule be modified to eliminate authority to grant permission for overland supersonic flight in designated test areas where the purpose of the flight can be achieved by overocean flight. The FAA agrees that feasibility of overocean testing is a valid consideration in the issuance of authorizations to exceed mach 1 in designated test areas over the United States. This amendment therefore requires applicants for such authorizations to show why the flight test cannot be safely or properly conducted over the ocean.

In consideration of the foregoing, Subchapter F of Chapter I of Title 14 of the Code of Federal Regulations is amended effective April 27, 1973, as to all persons, by amending Part 91 of the Federal Aviation Regulations as herein-after set forth:

1. Section 91.1(b)(3) is amended to read as follows:

§ 91.1 Applicability.

(b) Each person operating a civil aircraft of U.S. registry outside of the United States shall—

(3) Except for §§ 91.15(b), 91.17, 91.38, 91.43, and 91.55, comply with Subparts A, C, and D of this part so far as they are not inconsistent with applicable regulations of the foreign country where the aircraft is operated or Annex 2 to the Convention on International Civil Aviation.

2. A new § 91.55 is added to read as follows:

§ 91.55 Civil aircraft sonic boom.

No person may operate a civil aircraft at a true flight mach number greater than 1 except in compliance with condi-

tions and limitations in an authorization to exceed mach 1 issued to the operator under Appendix B of this part.

3. A new Appendix B is added to read as follows:

#### APPENDIX B

##### AUTHORIZATIONS TO EXCEED MACH 1 (§ 91.55)

SECTION 1. Application. (a) An applicant for an authorization to exceed mach 1 must apply in a form and manner prescribed by the Administrator and must comply with this appendix.

(b) In addition, each application for an authorization to exceed mach 1 covered by section 2(a) of this appendix must contain all information, requested by the Administrator, that he deems necessary to assist him in determining whether the designation of a particular test area, or issuance of a particular authorization, is a "major Federal action significantly affecting the quality of the human environment" within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), and to assist him in complying with that Act, and with related Executive orders, guidelines, and orders, prior to such action.

(c) In addition, each application for an authorization to exceed mach 1 covered by section 2(a) of this appendix must contain—

(1) Information showing that operation at a speed greater than mach 1 is necessary to accomplish one or more of the purposes specified in section 2(a) of this appendix, including a showing that the purpose of the test cannot be safely or properly accomplished by overocean testing;

(2) A description of the test area proposed by the applicant, including an environmental analysis of that area meeting the requirements of paragraph (b) of this section; and

(3) Conditions and limitations that will insure that no measurable sonic boom overpressure will reach the surface outside of the designated test area.

(d) An application is denied if the Administrator finds that such action is necessary to protect or enhance the environment.

SEC. 2. Issuance. (a) For a flight in a designated test area, an authorization to exceed mach 1 may be issued when the Administrator has taken the environmental protective actions specified in section 1(b) of this appendix, and the applicant shows one or more of the following:

(1) The flight is necessary to show compliance with airworthiness requirements.

(2) The flight is necessary to determine the sonic boom characteristics of the airplane, or is necessary to establish means of reducing or eliminating the effects of sonic boom.

(3) The flight is necessary to demonstrate the conditions and limitations under which speeds greater than a true flight mach number of 1 will not cause a measurable sonic boom overpressure to reach the surface.

(b) For a flight outside of a designated test area, an authorization to exceed mach 1 may be issued if the applicant shows conservatively under paragraph (a) (3) of this section that—

(1) The flight will not cause a measurable sonic boom overpressure to reach the surface when the aircraft is operated under conditions and limitations demonstrated under paragraph (a) (3) of this section; and

(2) Those conditions and limitations represent all foreseeable operating conditions.

#### SEC. 3. Duration.

(a) An authorization to exceed mach 1 is effective until it expires or is surrendered, or until it is suspended or terminated by the Administrator. Such an authorization may be amended or suspended by the Administrator at any time if he finds that such action is necessary to protect the environment.

Within 30 days of notification of amendment, the holder of the authorization must request reconsideration or the amendment becomes final. Within 30 days of notification of suspension, the holder of the authorization must request reconsideration or the authorization is automatically terminated. If reconsideration is requested within the 30-day period, the amendment or suspension continues until the holder shows why, in his opinion, the authorization should not be amended or terminated. Upon such showing, the Administrator may terminate or amend the authorization if he finds that such action is necessary to protect the environment, or he may reinstate the authorization without amendment if he finds that termination or amendment is not necessary to protect the environment.

(b) Findings and actions by the Administrator under this section do not affect any certificate issued under title VI of the Federal Aviation Act of 1958.

(Sec. 307(c), 313(a), 611, Federal Aviation Act of 1958, 49 U.S.C. 1348(c), 1354(a), 1431; sec. 2(b)(2), 6(c), Department of Transportation Act, 49 U.S.C. 1651(b)(2), 1655(c), title I of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 et seq., Executive order 11514, Protection and Enhancement of Environmental Quality, March 5, 1970)

Issued in Washington, D.C., on March 23, 1973.

ALEXANDER P. BUTTERFIELD,  
Administrator.

[FR Doc. 73-4870 Filed 3-13-73; 8:45 am]

[Amended Filing 3-26-73; 8:45 am]

[Docket No. 12240; Amdt. No. 121-102]

#### PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

##### Use of Certificated Land Airports

The purpose of this amendment to Part 121 of the Federal Aviation Regulations is to require domestic and flag air carriers that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board and that operate large aircraft (other than helicopters) to conduct their scheduled operations into regular airports certificated by the FAA pursuant to the requirements of Part 139 of this chapter.

This amendment is based on notice of proposed rule making No. 72-25, published in the Federal Register on September 20, 1972 (37 FR 19380). Except for certain clarifying changes, and except as specifically discussed hereinafter, this amendment and the reasons therefor are the same as those contained in Notice 72-25.

As stated in Notice 72-25, new Part 139 which prescribes certification and operating rules for land airports serving CAB-certificated scheduled air carriers operating large aircraft (other than helicopters), was issued on June 12, 1972 (37 FR 12278). The new Part 139 provides, insofar as is pertinent here, that, after May 20, 1973, no person may operate a land airport regularly serving any scheduled CAB-certificated air carriers operating large aircraft (other than helicopters) into that airport, in any State of the United States, the District of Columbia, or any territory or possession of the United States, without or in viola-

tion of an airport operating certificate for that airport, or in violation of the approved airport operations manual for that airport. In order to be consistent with the safety objectives of new Part 139, an amendment to Part 121 was proposed in Notice 72-25 making the use of certificated regular airports mandatory for domestic and flag air carriers when conducting scheduled operations in large airplanes in any State of the United States, the District of Columbia, or any territory or possession of the United States.

The public comments received generally concurred in the proposal. However, the commentators indicated they desired further clarification of the classes of persons that will be subject to the amendment. As stated in the regulation, domestic and flag air carriers certificated by the CAB will be subject to this amendment only when conducting scheduled operations in large airplanes in any State of the United States, the District of Columbia, or any territory or possession of the United States. Accordingly, an air carrier when conducting charter or special service operations will not be required to conduct those operations at certificated airports nor would an air carrier be required to designate and use a certificated airport as an alternate, refueling, or provisional airport.

This amendment changes the proposal set forth in Notice 72-25, by adding to the beginning of § 121.590 the phrase "Unless otherwise authorized by the Administrator." This phrase has been added so that air carriers subject to § 121.590 may be granted appropriate relief by the Administrator in the event any exemptions are granted airport operators regarding certification under Part 139.

(Secs. 313(a), 601, 604, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1424; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

In consideration of the foregoing, and for the reasons given in Notice 72-25, Part 121 of the Federal Aviation Regulations is amended, effective May 21, 1973, by adding a new § 121.590 to Subpart T to read as follows:

§ 121.590 Use of certificated land airports: Domestic and flag air carriers certificated by the CAB.

Unless otherwise authorized by the Administrator, after May 20, 1973, no domestic or flag air carrier, and no pilot being used by them, may operate a large airplane into a regular land airport in scheduled operations in any State of the United States, the District of Columbia, or any territory or possession of the United States, unless that airport is certificated under Part 139 of this chapter. For the purposes of this section, a regular airport means one approved as a regular terminal or intermediate stop on an authorized route.

Issued in Washington, D.C., on March 22, 1973.

ALEXANDER P. BUTTERFIELD,  
Administrator.

# CHAPTER V—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

## PART 1203a—NASA SECURITY AREAS

This new Part 1203a codifies NASA regulations governing the establishment, maintenance, and revocation of security areas designated for the protection of facilities, property, or classified information and material in the possession or custody of NASA or NASA contractors located at NASA installations and component installations. These regulations also provide for the removal and possible prosecution of unauthorized persons who may enter NASA security areas.

These regulations are effective April 9, 1973.

EDWIN H. STEVENS,  
NASA Director of Security.

## PART 1203a—NASA SECURITY AREAS

New Part 1203a added:

Sec.	Purpose and scope.
1203a.100	Definitions.
1203a.101	Establishment, maintenance, and revocation of security areas.
1203a.102	Access to security areas.
1203a.103	Violation of security areas.
1203a.104	Implementation by field or component installations.

AUTHORITY: 18 U.S.C. 799.

### § 1203a.100 Purpose and scope.

(a) To insure the uninterrupted and successful accomplishment of the NASA mission, certain designated security areas may be established and maintained by NASA installations and component installations in order to provide appropriate and adequate protection for facilities, property, or classified information and material in the possession or custody of NASA or NASA contractors located at NASA installations and component installations.

(b) This Part 1203a sets forth:

- (1) The designation and maintenance of security areas.
- (2) The responsibilities and procedures in connection therewith, and
- (3) The penalties that may be enforced through court actions against unauthorized persons entering security areas.

### § 1203a.101 Definitions.

For the purpose of this part, the following definitions apply:

(a) **Security area.** A physically defined area, established for the protection or security of facilities, property, or classified information and material in the possession or custody of NASA or a NASA contractor located at a NASA installation or component installation, entry to which is subject to security measures, procedures, or controls. Security areas which may be established are:

- (1) **Restricted area.** An area wherein security measures are applied primarily for the safeguarding or the administrative control of property or to protect operations and functions which are vital or essential to the accomplishment of the mission assigned to a NASA installation or component installation.

(2) **Limited area.** An area wherein security measures are applied primarily for the safeguarding of classified information and material or unclassified property warranting special protection and in which the uncontrolled movement of visitors would permit access to such classified information and material or property, but within which area such access may be prevented by appropriate visitor escort and other internal restrictions and controls.

(3) **Closed area.** An area wherein security measures are applied primarily for the purpose of safeguarding classified information and material; entry to the area being equivalent, for all practical purposes, to access to such classified information and material.

(b) **Temporary security area.** A designated interim security area, the need for which will not exceed 30 days from date of establishment. A temporary security area may also be established on an interim basis, pending approval of its establishment as a permanent security area.

(c) **Permanent security area.** A designated security area, the need for which will exceed 30 days from date of establishment.

§ 1203a.102 Establishment, maintenance, and revocation of security areas.

(a) **Establishment.** (1) Directors of NASA field and component installations, and the Director of Headquarters Administration for NASA Headquarters (including component installations) may establish, maintain, and protect such areas as restricted, limited, or closed depending upon the opportunity available to unauthorized persons either to:

- (i) Obtain knowledge of classified information,
  - (ii) Damage or remove property, or to
  - (iii) Disrupt Government operations.
- (2) The concurrence of the Director of Security, NASA Headquarters, will be obtained prior to the establishment of a permanent security area.

(3) (i) As a minimum, the following information will be submitted to the Director of Security 15 workdays prior to establishment of each permanent security area:

- (a) The name and specific location of the NASA field or component installation, facility, or property to be protected.
- (b) A statement that the property is owned by, or leased to, the United States for use by NASA or is the property of a NASA contractor located on a NASA installation or component installation.

(c) Designation desired: i.e., restricted, limited, or closed.

(d) Specific purpose(s) for the establishment of a security area.

(ii) For those areas currently designated by the installation as "permanent security areas," the information set forth in subparagraph (d) (3) (i) of this section will be furnished to the Security Division, NASA Headquarters, within 30 workdays of the effective date of this part.

(b) **Maintenance.** The security measures which may be utilized to protect

such areas will be determined by the requirements of individual situations. As a minimum such security measures will:

(1) Provide for the posting of signs at entrances and at such intervals along the perimeter of the designated area as to provide reasonable notice to persons about to enter thereon. The Director of Security, NASA Headquarters, upon request, may approve the use of signs that are now being used pursuant to a State statute.

(2) Regulate authorized personnel entry and movement within the area.

(3) Deny entry of unauthorized persons or property.

(4) Prevent unauthorized removal of classified information and material or property from a NASA installation or component installation.

(c) **Revocation.** Once the need for an established permanent security area no longer exists, the area will be returned immediately to normal controls and procedures or as soon as practicable. The Director of Security will be informed of permanent security area revocations within 15 workdays.

### § 1203a.103 Access to security areas.

(a) Only those NASA employees, NASA contractor employees, and visitors who have a need for such access and who meet the following criteria may enter a security area:

(1) **Restricted area.** Be authorized to enter the area alone or be escorted by or under the supervision of a NASA employee or NASA contractor employee who is authorized to enter the area.

(2) **Limited area.** Possess a security clearance equal to the level of the classified information or material involved or be the recipient of a satisfactorily completed national agency check if classified material or information is not involved. Personnel who do not meet the requirements for unescorted access may be escorted by a NASA employee or NASA contractor employee who meets the access requirements and has been authorized to enter the area.

(3) **Closed area.** Possess a security clearance equal to the classified information or material involved.

(b) The directors of NASA field and component installations, and the Director of Headquarters Administration for NASA Headquarters (including component installations) may rescind previously granted authorizations to enter a security area when an individual's continued presence therein is no longer required, threatens the security of the property therein, or is disruptive of Government operations.

### § 1203a.104 Violation of security areas.

(a) **Removal of unauthorized persons.** The directors of NASA field and component installations (or their designees) and the Director of Headquarters Administration for NASA Headquarters (including component installations) or his designee may order the removal or eviction of any person whose presence in a designated security area is in violation of the provisions of this part or any regulation or order established pursuant to the provisions of this part.

(b) **Criminal penalties for violation.** Whoever willfully violates, attempts to violate, or conspires to violate any regulation or order establishing requirements or procedures for authorized entry into an area designated restricted, limited, or closed pursuant to the provisions of this part may be subject to prosecution under 18 U.S.C. 799 which provides penalties for a fine of not more than \$5,000 or imprisonment for not more than 1 year, or both.

### § 1203a.105 Implementation by field and component installations.

If a Director of a NASA field or component installation finds it necessary to issue supplemental instructions to any provision of this part, the instructions must first be published in the FEDERAL REGISTER. Therefore, the proposed supplemental instructions will be sent to the Security Division (Code DHZ), NASA Headquarters, in accordance with NASA Management Instruction 1410.10 for processing.

[FR Doc. 73-5847 Filed 3-27-73; 8:45 am]

## Title 19—Customs Duties

### CHAPTER I—BUREAU OF CUSTOMS, DEPARTMENT OF THE TREASURY

[T.D. 73-85]

## PART 16—LIQUIDATION OF DUTIES

### Refrigerators, Freezers, Other Refrigerating Equipment and Parts From Italy

In the FEDERAL REGISTER of November 10, 1972 (37 FR 23928), the Commissioner of Customs announced that information had been received in proper form pursuant to § 16.24(b) of the Customs regulations (19 CFR 16.24(b)) which appeared to indicate that certain payments made by the Government of Italy on the exportation from Italy of refrigerators, freezers, other refrigerating equipment, and parts thereof constitute the payment or bestowal of a bounty or grant, directly or indirectly, within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303) upon the manufacture, production, or exportation of the merchandise to which the payments apply. The notice provided interested parties 30 days from the date of publication to submit data, views, or arguments concerning the existence or nonexistence and the net amount of a bounty or grant.

An investigation was conducted pursuant to § 16.24(d) of the Customs regulations (19 CFR 16.24(d)).

After consideration of all information received, the Bureau is satisfied that exports of refrigerators, freezers, other refrigerating equipment, and parts thereof from Italy are subject to bounties or grants within the meaning of section 303.

Accordingly, notice is hereby given that refrigerators, freezers, other refrigerating equipment, and parts thereof imported directly or indirectly from Italy,

(R.S. 251, secs. 303, 624; 46 Stat. 687, 759; 19 U.S.C. 66, 1303, 1624.)

[SEAL] VERNON D. ACREE,  
Commissioner of Customs.

Approved: March 23, 1973.

EDWARD L. MORGAN,  
Assistant Secretary  
of the Treasury.

## APPENDIX A

The amounts set forth below will be collected as estimated countervailing duties unless satisfactory evidence is provided with respect to any particular importation that a lesser amount is applicable.

Per kilogram  
(Litre)

Complete refrigerators (cabinets, chests, and refrigerated counters, refrigerated display cases, water coolers, and the like).....	17.85
Insulated cold cabinets (unequipped), isothermal cabinets, ice-cream storage cabinets, and the like.....	14.82
Refrigerating apparatus and components, thereof, fixed on a common baseplate, including freezers and parts.....	21.24

[FR Doc. 73-6037 Filed 3-27-73; 8:45 am]

## Title 41—Public Contracts and Property Management

### CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

## SUBCHAPTER H—UTILIZATION AND DISPOSAL

### CONTROLLED SUBSTANCES

Parts 101-43.101-44, 101-45, and 101-46 are amended to update certain references and to provide revised instructions relating to the utilization and disposal of controlled substances pursuant to the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513, approved October 27, 1970).

The table of contents for Subchapter H is amended to provide new and revised entries as follows:

101-43.104-4	Controlled substances.
101-43.104-12	(Reserved)
101-43.309	Controlled substances.
101-43.313-1	Controlled substances.
101-43.313-8	Drugs, biologicals, and reagents other than controlled substances.
101-44.201-1a	Controlled substances.
101-44.201-12	(Reserved)
101-44.321	Drugs, biologicals, and reagents other than controlled substances.
101-45.204a	Controlled substances.
101-45.216	(Reserved)
101-45.309-6	Controlled substances.
101-45.309-7	Drugs, biologicals, and reagents other than controlled substances.

## PART 101-43—UTILIZATION OF PERSONAL PROPERTY

### Subpart 101-43.1—General Provisions

Section 101-43.104-4 is added, and the text of § 101-43.104-12 is deleted and the section reserved as follows:

### § 101-43.104-4 Controlled substances.

"Controlled substances" for purposes of this regulation is defined as:

- (a) Any narcotic, depressant, stimulant, or hallucinogenic drug or any other

drug or other substance or immediate precursor included in Schedules I, II, III, IV, or V of section 202 of the Controlled Substances Act (21 U.S.C. 812) except exempt chemical preparations and mixtures and excluded substances listed in Part 308, Title 21, Code of Federal Regulations;

(b) Any other drug or substance which the Attorney General determines to be subject to control pursuant to Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970; or

(c) Any other drug or substance which by international treaty, convention, or protocol is to be controlled by the United States.

§ 101-43.104-12 [Reserved]

Subpart 101-43.3—Utilization of Excess

Sections 101-43.306, 101-43.309, 101-43.313-1, 101-43.313-8, 101-43.313-9a(e), and 101-43.316-1(a)(5) are revised as follows:

§ 101-43.306 Property not required to be reported.

Excess property which is not required to be formally reported to GSA in accordance with this Part 101-43 is nonetheless a valuable source of supply for Federal agencies. Regional offices and area utilization officers of GSA are responsible for local screening of such property, for making it available to Federal agencies, and for consummating its expeditious transfer to them. Federal holding agencies shall cooperate with GSA representatives in making information available and in providing access to their nonreportable excess property. To the extent such property is not covered by the utilization screening processes of GSA, executive agencies shall make reasonable efforts to obtain utilization among Federal agencies of that property having utilization potential. In the case of controlled substances (as defined in § 101-43.104-4), this solicitation shall be limited to those agencies specified in § 101-43.309.

§ 101-43.309 Controlled substances.

Holding agencies shall arrange for transfers in accordance with § 101-43.315-5. In effecting the utilization of excess controlled substances, the holding agencies shall transfer excess controlled substances only to those Federal agencies which certify that they are registered with the Bureau of Narcotics and Dangerous Drugs (BNDD), Department of Justice, and are authorized to procure the particular controlled substances being transferred. The certification shall include the registration number of the BND Form 223, certificate of registration, issued by BNDD.

§ 101-43.313-1 Controlled substances.

All controlled substances that the holding agency determines to be excess shall become surplus after the holding agency has complied with the utilization requirements of §§ 101-43.102 and 101-43.309. It is not required that the holding agency report the controlled substance to GSA as excess personal property.

§ 101-43.313-8 Drugs, biologicals, and reagents other than controlled substances.

Drugs, biologicals, and reagents in Federal Supply Class 6505, excluding controlled substances which will be handled as provided in §§ 101-43.309 and 101-43.313-1, which are from time to time determined to be excess and fit for human use shall be handled as provided in § 101-43.306. Such items may be separately packaged or may be components of a drug kit. The holding agency shall destroy, as provided in § 101-45.505, those separately packaged items which have been determined by the holding agency to be unfit for human use. Reports of the availability of any usable items which are in kits with other items that are unfit for human use shall clearly indicate which items are unfit for human use.

§ 101-43.313-9a Medical shelf-life items held for national emergency purposes.

(e) Medical shelf-life items held for national emergency purposes which have a remaining useful life of 3 or more months and which are not reportable in accordance with § 101-43.4901 shall be made available for use by other Federal agencies as provided in § 101-43.306. Upon determination that such items are excess a surplus release date shall be established by the holding agency providing a minimum of 15 calendar days for selection of the items for Federal use. In the instance of controlled substances (as defined in § 101-43.104-4), each executive agency shall comply with the provisions of §§ 101-43.309 and 101-43.313-1.

§ 101-43.316-1 Utilization.

(a) \* \* \*

(5) Controlled substances.

Subpart 101-43.4—Utilization of Abandoned and Forfeited Personal Property

Section 101-43.402-5(d)(1) is revised as follows:

§ 101-43.402-5 Property required to be reported.

(d) \* \* \*

(1) Controlled substances (as defined in § 101-43.104-4), regardless of quantity, condition, or acquisition cost, shall be reported to the Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537.

PART 101-44—DONATION OF PERSONAL PROPERTY

Subpart 101-44.2—Definition of Terms

Section 101-44.201-1a is added, and the text of § 101-44.201-12 is deleted and the section reserved as follows:

§ 101-44.201-1a Controlled substances.

"Controlled substances" for purposes of this regulation is defined as:

(a) Any narcotic, depressant, stimulant, or hallucinogenic drug or any other drug or other substance or immediate precursor included in Schedules I, II, III, IV, or V of section 202 of the Controlled Substances Act (21 U.S.C. 812), except exempt chemical preparations and mixtures and excluded substances listed in Part 308, Title 21, Code of Federal Regulations;

(b) Any other drug or substance which the Attorney General determines to be subject to control pursuant to Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970; or

(c) Any other drug or substance which by international treaty, convention, or protocol is to be controlled by the United States.

§ 101-44.201-12 [Reserved]

Subpart 101-44.3—Donation for Educational, Public Health, and Civil Defense, Including Research or Public Airport Purposes

Sections 101-44.321(a) and 101-44.322(b) are revised as follows:

§ 101-44.321 Drugs, biologicals, and reagents other than controlled substances.

(a) Surplus drugs, biologicals, and reagents which are in Federal Supply Class 6505 and which are not required to be destroyed as provided in § 101-45.505 may be donated for educational, public health, and civil defense purposes. If the report of excess or other communication from the holding activity listing the drugs, biologicals, and reagents indicates any items which are unfit for human use, GSA will not offer such items for donation. Controlled substances (as defined in § 101-44.201-1a), shall not be donated for any purpose.

§ 101-44.322 Donation of shelf-life items.

(b) Prior to donation, drugs, biologicals, and reagents other than controlled substances except those requiring refrigeration or deep freeze and which are excepted from the provisions of § 101-43.313-9 shall be processed as provided in § 101-44.321.

PART 101-45—SALE, ABANDONMENT, OR DESTRUCTION OF PERSONAL PROPERTY

Subpart 101-45.2—Definition of Terms

Section 101-45.204a is added, and the text of § 101-45.216 is deleted and the section reserved as follows:

§ 101-45.204a Controlled substances.

"Controlled substances" for purposes of this regulation is defined as:

(a) Any narcotic, depressant, stimulant, or hallucinogenic drug or any other drug or other substance or immediate precursor included in Schedules I, II, III, IV, or V of section 202 of the Controlled Substances Act (21 U.S.C. 812) except exempt chemical preparations and mixtures and excluded substances listed in

Part 308, Title 21, Code of Federal Regulations;

(b) Any other drug or substance which the Attorney General determines to be subject to control pursuant to Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970; or

(c) Any other drug or substance which by international treaty, convention, or protocol is to be controlled by the United States.

§ 101-45.216 [Reserved]

Subpart 101-45.3—Sale of Personal Property

Section 101-45.309-6 is revised and § 101-45.309-7 is amended as follows:

§ 101-45.309-6 Controlled substances.

Surplus controlled substances (as defined in § 101-45.204a) which are not required to be destroyed as provided in § 101-45.505 may be offered for sale by sealed bid in accordance with the provisions of this Subpart 101-45.3: Provided, That the following safeguards and instructions are observed:

(a) The invitation for bids shall:

(1) Consist only of surplus controlled substances;

(2) Require the normal bid deposit prescribed in § 101-45.304-10;

(3) Be distributed only to bidders who are registered with the Bureau of Narcotics and Dangerous Drugs, Department of Justice, to manufacture, distribute, or dispense the controlled substances for which the bid is being submitted; and

(4) Contain the following special condition of sale:

The Bidder shall complete, sign, and return with his bid the certificate as contained in this invitation. No award will be made or sale consummated until after this agency has obtained from the Bureau of Narcotics and Dangerous Drugs, Department of Justice, verification that the Bidder is registered to manufacture, distribute, or dispense those controlled substances which are the subject of the award.

(b) The following certification shall be made a part of the invitation for bids (and contract) to be completed and signed by the bidder and returned with the bid:

The Bidder certifies that he is registered with the Bureau of Narcotics and Dangerous Drugs, Department of Justice, as a manufacturer, distributor, or dispenser of the controlled substances for which bids are submitted and that the registration number is -----

Name of bidder (print or type).

Signature of bidder.

Address of bidder (print or type).

City State Zip code

(c) As a condition precedent to making an award for surplus controlled substances, the following shall be submitted to the Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537:

(1) The name and address of the bidder(s) to whom an award is proposed to

be made and the bidder(s) registration number(s);

(2) The name and address of both the holding activity and the selling activity;

(3) A description of the controlled substances, how those substances are packaged, and the quantity of substances proposed to be sold to the bidder;

(4) The identification of the invitation for bids by its number and time within which such bid(s) remains valid; and

(5) A request for advice as to whether the bidder is a registered manufacturer, distributor, or dispenser.

§ 101-45.309-7 Drugs, biologicals, and reagents other than controlled substances.

Surplus drugs, biologicals, and reagents other than controlled substances which are not required to be destroyed as provided in § 101-45.505 may be offered for sale by sealed bid in accordance with the provisions of this Subpart 101-45.3: Provided, That the following safeguards and instructions are observed to insure stability, potency, and suitability of the product and its labeling for use in civilian channels:

(d) Sales of surplus drugs, biologicals, and reagents other than controlled substances shall be processed as follows:

Subpart 101-45.5—Abandonment or Destruction of Surplus Property

Section 101-45.505 is amended as follows:

§ 101-45.505 Destruction of surplus drugs, biologicals, and reagents.

(a) \* \* \*

(1) Controlled substances. (i) Controlled substances in a deteriorated condition or otherwise unusable.

(ii) Quantities of controlled substances determined to be surplus at one time and one place having an acquisition cost of less than \$500.

(iii) Controlled substances which have been offered for sale in accordance with the provisions of § 101-45.309-6 but for which no satisfactory or acceptable bid or bids have been received.

(2) Drugs, biologicals, and reagents.

(i) Surplus drugs, biologicals, and reagents other than controlled substances (a) determined by the holding agency to be unsafe because of deterioration or overage condition, (b) in open or broken containers, or (c) recommended for destruction by the Food and Drug Administration.

(ii) Surplus drugs, biologicals, and reagents other than controlled substances with an acquisition cost of less than \$500 per manufacturers' lot/batch number.

(iii) Surplus drugs, biologicals, and reagents other than controlled substances which have been offered for sale in accordance with the provisions of § 101-45.309-7 but for which no satisfactory or acceptable bid or bids have been received.

(b) When surplus drugs, biologicals, and reagents, including controlled substances, are required to be destroyed by the holding agency, they shall be destroyed in such a manner as to insure total destruction of the substance to preclude the utilization of any portion thereof. The destruction shall be in accordance with Federal, State, and local air and water pollution control standards. When major amounts are to be destroyed, the action shall be coordinated with local air and water pollution control authorities. As to controlled substances, in addition to the requirements set forth herein, each executive agency shall comply with the provisions of 21 CFR 307.21 of the Bureau of Narcotics and Dangerous Drugs (BNDD) regulations or with equivalent procedures approved by the Bureau of Narcotics and Dangerous Drugs (BNDD).

(c) Destruction of surplus drugs, biological, and reagents, including controlled substances, shall be performed by an employee of the holding agency in the presence of two additional employees of the agency as witnesses to that destruction, unless, in the case of controlled substances, the Regional Director of the Bureau of Narcotics and Dangerous Drugs directs otherwise.

(d) When surplus drugs, biologicals, and reagents, including controlled substances, have been destroyed, the fact, manner, and date of the destruction and the type and quantity so destroyed shall be certified to by the agency employee charged with the responsibility for that destruction. The two agency employees who witnessed the destruction shall sign the following statement which shall appear on the certification below the signature of the certifying employee:

I have witnessed the destruction of the (controlled substances) (drugs, biologicals, and reagents other than controlled substances) described in the foregoing certification in the manner and on the date stated herein:

witness----- date-----

witness----- date-----

#### Title 45—Public Welfare

### CHAPTER X—OFFICE OF ECONOMIC OPPORTUNITY

#### PART 1068—COMMUNITY ACTION PROGRAM GRANTEE FINANCIAL MANAGEMENT

##### Subpart—Allowability of Costs for Organization Dues, Membership Fees, and Donations

Notice is hereby given that the regulations set forth below are promulgated as interim regulations by me as Acting Director of the Office of Economic Opportunity. As a result of the prospective delegation of certain programs to other Federal departments, prospective funding changes, and changes in the management and administration of certain programs, the Office of Economic Opportunity has been required to institute emergency guidelines and instructions in advance of 30-day prior notice in the FEDERAL REGISTER. Accordingly, the regulations published below are effective on the dates indicated therein. Moreover, in view of the nature of the problems which these regulations are designed to remedy, having been advised by counsel, I find that to publish them in the FEDERAL REGISTER 30 days prior to their effective date would be impracticable and contrary to the public interest.

The regulations below will remain in effect unless and until superseded by permanent regulations published in the FEDERAL REGISTER. Interested persons wishing to comment before permanent regulations are promulgated may submit written data, views, and comments by mailing them to the Acting Director, Policy Regulation, Office of Program Review, Office of Economic Opportunity, 1200 19th Street NW., Washington, DC 20506, in time to arrive before April 25, 1973.

After careful consideration is given to all relevant material submitted, and to such other information as may be available, the Acting Director of OEO may modify these interim regulations as he deems appropriate and publish them as permanent regulations in the FEDERAL REGISTER.

Chapter X, Part 1068 of Title 45 of the Code of Federal Regulations is amended by adding four new sections, reading as follows:

Sec.  
1068.7-1 Purpose.  
1068.7-2 Applicability of this subpart.  
1068.7-3 Policy.  
1068.7-4 Form of requests for authorization.

AUTHORITY: Sec. 602, 78 Stat. 530, 42 U.S.C. 2942.

##### § 1068.7-1 Purpose.

The purpose of this subpart is to establish restrictions on charging dona-

tions, organization dues, and membership fees to project funds.

##### § 1068.7-2 Applicability of this subpart.

This subpart applies to all programs affording legal assistance which are funded until title II of the Economic Opportunity Act as amended, if the assistance is administered by OEO.

##### § 1068.7-3 Policy.

Project funds shall not be expended to pay for membership fees or dues or make contribution to any person, organization, association, or entity without the written authorization of the Associate Director for the Office of Legal Services, or his designee. (Project funds include both funds derived from the Federal grant and required matching share.)

##### § 1068.7-4 Form of requests for authorization.

Requests for authorization shall state the name and address of the organization, function and nature of the organization's activities, the purpose of the request, and the itemized cost to be charged against project funds.

This subpart shall become effective on March 28, 1973.

HOWARD PHILLIPS,  
Acting Director.

[FR Doc. 73-5941 Filed 3-27-73; 8:45 am]

#### PART 1070—COMMUNITY ACTION PROGRAM GRANTEE OPERATIONS

##### Subpart—Use of OEO Grant Funds for the Purpose of Program or Other Involvement in All Communications Media

Notice is hereby given that the regulations set forth below are promulgated as interim regulations by the Acting Director of the Office of Economic Opportunity. As a result of the prospective delegation of certain programs to other Federal departments, prospective funding changes, and changes in the management and administration of certain programs, the Office of Economic Opportunity has been required to institute emergency guidelines and instructions in advance of 30-day prior notice in the FEDERAL REGISTER. Accordingly, the regulations published below are effective on the dates indicated therein. Moreover, in view of the nature of the problems which these regulations are designed to remedy, having been advised by counsel, I find that to publish them in the FEDERAL REGISTER 30 days prior to their effective date would be impracticable and contrary to the public interest.

The regulations below will remain in effect unless and until superseded by permanent regulations published in the FEDERAL REGISTER. Interested persons wishing to comment before permanent regulations are promulgated may submit written data, views, and comments by mailing them to the Acting Director, Policy Regulation, Office of Program Review, Office of Economic Opportunity, 1200 19th Street NW., Washington, DC 20506, in time to arrive on or before April 25, 1973.

After careful consideration is given to all relevant material submitted, and to such other information as may be available, the Acting Director of the OEO may modify these interim regulations as he deems appropriate and publish them as permanent regulations in the FEDERAL REGISTER.

Chapter X, Part 1070 of Title 45 of the Code of Federal Regulations is amended by adding five new sections, reading as follows:

Sec.  
1070.4-1 Purpose.  
1070.4-2 Applicability.  
1070.4-3 Background.  
1070.4-4 Definitions.  
1070.4-5 Policy.

AUTHORITY: Sec. 602, 78 Stat. 530, 42 U.S.C. 2942.

##### § 1070.4-1 Purpose.

This subpart provides policy governing the funding by OEO of all grantees in relation to all communications media, as defined herein, and all newsletters or house organs of OEO grantees.

##### § 1070.4-2 Applicability.

This subpart applies to all grantees funded by OEO.

##### § 1070.4-3 Background.

(a) The earlier draft Instruction 7044-1, which this subpart supersedes, covered only newspapers and newsletters or house organs. Further, it was applicable only to grantees funded under title II and title III-B of the Economic Opportunity Act of 1964, as amended. This did not provide a policy for title VII grants for Community Economic Development, nor for Special Impact grants under former title I-D, which has been repealed. Funding of such other communications media as general coverage magazines, radio, television and cable television, are, in effect and in terms of policy, no different than funding newspapers. This policy is set forth under § 1070.4-5(a) below.

(b) Experience also indicated that it is necessary and desirable to define further and reiterate OEO policy concerning the publishing with OEO funds of newsletters and house organs in order to establish clear lines of responsibility for same. This policy is set forth under § 1070.4-5(b) below.

(c) With specific reference to cable television (CATV) it should be noted that based on discussion between Federal Communications Commission (FCC) staff and OEO, there is reason to doubt that the FCC would issue necessary certificates of compliance for CATV projects subject to the restrictions contained in section 603(b) of the Economic Opportunity Act and the OEO implementing regulations.

##### § 1070.4-4 Definition.

"Communications media" as used herein is confined to communications that are directed, or made readily available, to the general public. It specifically

includes all radio broadcasting and telecasting, general coverage newspapers and magazines. The term "Communications media" excepts house organs or newsletters, bulletins, etc. which are specifically addressed to an organization's constituency and which are not given external distribution by the organization beyond its constituency. Policy on such publications, based largely on former draft Instruction 7044-1 which has been in effect, is covered in this subpart under § 1070.4-5(b).

##### § 1070.4-5 Policy.

(a) Concerning "communications media." It is OEO policy not to provide funds to establish or operate any mass communication medium such as a general coverage newspaper or magazine, radio station or television station including a cable television system. However, under special circumstances and with the express written approval of the Director, OEO may make grants to help establish such a medium if such action is in furtherance of the grantee's approved OEO program, by assisting in the planning and initial expenses provided that: (1) The grantee agrees that OEO funds are to be provided only on a minimum, one-time basis, and not to provide long-term (over 1 year) operational or other support. (2) The grantee shall make a showing of interest by other investors and assure early divestiture from the grantee to a local public corporation with communitywide ownership not under the control of the CDC or other OEO grantee. (3) Ownership and management of the physical assets be separated from control of publishing or programming and the latter be under the control of a separate entity over whom the grantee cannot exercise any influence. This may be effected by the use of an "arms length" contract with some independent organization, or by the grantee-owner of the physical assets subcontracting the use of its assets to such an organization. In either event, OEO shall have the right of prior approval or disapproval of the entity which would control the output of the medium.

(b) Concerning newsletters or house organs. (1) OEO grantees may determine that publishing newsletters or house organs is essential to the accomplishment of the grantee's approved program. The OEO grant office reserves the right to review the grantee's justification of its need to publish a newsletter or house organ. Newsletters are under local grantee control as are all other program activities. While they reflect the policies and opinions of the local grantee, newsletters also are subject to the same laws and regulations, such as those restricting political activity, which govern all OEO funded programs.

(2) The grantee's principal representative board and boards of limited purpose agencies and community development corporations have the ultimate responsibility of insuring that the content of all grantee publications coming under their jurisdiction reflect the policies and opinions of the local program and are in accord with OEO policy. To accomplish

this, the board may elect to delegate the review function to the Executive Director. In all cases, publications must be reviewed prior to printing to assure compliance with this policy and the sanction of the board.

(3) Responsibility for the content and distribution of such publication must be established. Arrangements shall be made by the grantee with each of its delegate agencies, neighborhood councils, and any other group it funds which are or may be publishing a newsletter or house organ to expediate this review process.

(4) Newsletters or house organs shall not be prepared or circulated for purposes other than informing the grantee's constituency on the program of the grantee and reporting information of direct use to the grantee's constituency in the accomplishment of the grantee's stated program.

(5) Project funds will not be spent for newsletters or house organs unless a review procedure has been established in accordance with this subpart.

(c) Use of advertising time and space as non-Federal share. OEO does not credit as an in-kind contribution for a grantee's non-Federal share requirement any news coverage, editorial comment, advertising or public service time or space in any communications media such as radio, television, magazines, wire services and news services. This policy does not, however, prohibit a grantee from selling Federal or non-Federal funds for publicizing or advertising program activities when the grantee can show that the expense is the best way of achieving a legitimate program purpose. This is an allowable expenditure although not an allowable in-kind contribution for a grantee's non-Federal share requirement. This policy also does not prohibit a grantee from accepting public service time or notices in the mass media, as long as such activities are not treated as in-kind, non-Federal share contributions.

*Effective date.* This subpart shall become effective April 1, 1973.

HOWARD PHILLIPS,  
Acting Director.

#### Title 46—Shipping

### CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

#### SUBCHAPTER J—MISCELLANEOUS

##### PART 351—DEPOSITORIES

In FR Doc. 71-17943, appearing in the FEDERAL REGISTER of December 8, 1971 (36 FR 23317), the Maritime Administration, Department of Commerce, invited comments with respect to a rule governing criteria for approval of a depository under any program authorized by the Merchant Marine Act, 1936, as amended (46 U.S.C. 1101 et seq.). No comments were submitted.

The final rule has been modified so as to remove the requirements that the depository be a U.S. citizen within the meaning of the Merchant Marine Act and that it be a corporation. These requirements are unnecessary because they

tend to duplicate requirements of the Federal Deposit Insurance Corporation. A new Part 351 is therefore added to Subchapter J, Title 46, Chapter II, Code of Federal Regulations as follows:

Sec.  
351.1 Purpose.  
351.2 Qualification of depository.

AUTHORITY: Sec. 204, 49 Stat. 1987, as amended; 46 U.S.C. 1114.

##### § 351.1 Purpose.

The purpose of this part is to set forth the criteria necessary for depositories of funds under all programs authorized by the Merchant Marine Act, 1936, as amended (46 U.S.C. 1101 et seq.) (Act).

##### § 351.2 Qualifications of depository.

(a) *General qualification.* Any depository which is a member of the Federal Deposit Insurance Corporation will be approved for deposit of funds under the maritime programs authorized by the Act.

(b) *Limitation on amount of deposits.* No person making deposits under the programs authorized by the Act shall make or maintain deposits which exceed 5 percent of the depository's total deposits.

*Effective date.* This regulation shall be effective on April 1, 1973.

Dated: March 21, 1973.

By order of Assistant Secretary for Maritime Affairs.

JAMES S. DAWSON, Jr.,  
Secretary,  
Maritime Administration.

### CHAPTER X—INTERSTATE COMMERCE COMMISSION

#### SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1128]

##### PART 1033—CAR SERVICE

##### Louisville and Nashville Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 22d day of March 1973.

It appearing, that there is a substantial movement of coal and other traffic routed via the lines of the Louisville and Nashville Railroad Co. (L&N) and the Clinchfield Railroad Co. (CRR); that there is no connection between the L&N and the CRR; that a line of the Norfolk and Western Railway Co. (N&W) connects with the L&N at Norton, Va., and with the CRR at St. Paul, Va., a distance of approximately 22.46 miles; that the N&W has agreed to use of such line by the L&N; that operation by the L&N over the aforementioned trackage of the N&W will facilitate and expedite movements of traffic routed via the L&N and the CRR; that such operation by the L&N is necessary in the interest of the public and the commerce of the people, pending disposition of the application of the L&N, in Finance Docket No. 27320,

seeking permanent authority to operate over these tracks of the N&W; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered, That:

§ 1033.1128 Service Order No. 1128.

(a) *Louisville and Nashville Railroad Co. authorized to operate over tracks of Norfolk and Western Railway Co.* The Louisville and Nashville Railroad Co. (L&N) be, and it is hereby, authorized to operate over tracks of the Norfolk and Western Railway Co. (N&W) between N&W milepost N 442.90, in the vicinity of St. Paul, Va., and N&W milepost N 465.36, in the vicinity of Norton, Va., a distance of approximately 22.46 miles.

(b) *Applications.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the L&N over tracks of the N&W is deemed to be due to carrier's disability, the rates applicable to traffic moved by the L&N over these tracks of the N&W shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.* This order shall become effective at 11:59 p.m., March 25, 1973.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 30, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies secs. 1(10-17), 15 (4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), 17(2))

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,  
Secretary.

# RULES AND REGULATIONS

[S.O. 1129]

## PART 1033—CAR SERVICE

### Chicago, Rock Island and Pacific Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 22d day of March 1973.

It appearing, that the Chicago, Rock Island and Pacific Railroad Co. (RI) is unable to operate over its line between Trenton, Mo., and St. Joseph, Mo., because of damage resulting from flooding and excessive rainfall; that RI operations to and from St. Joseph, Mo., can be accomplished by use of tracks of the Burlington Northern Inc. (BN) between BN milepost 0.0 at Kansas City, Mo., and BN milepost 62.6 at St. Joseph, Mo., a distance of approximately 62.6 miles; that the BN has consented to use of such tracks by the RI; that operation by the RI over the aforementioned tracks of the BN is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered, That:

§ 1033.1129 Service Order No. 1129.

(a) *Chicago, Rock Island and Pacific Railroad Co. authorized to operate over tracks of Burlington Northern Inc.* The Chicago, Rock Island and Pacific Railroad Co. (RI) be, and it is hereby, authorized to operate over tracks of the Burlington Northern Inc. (BN) between BN milepost 0.0 at Kansas City, Mo., and BN milepost 62.6 at St. Joseph, Mo., a distance of approximately 62.6 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the RI over tracks of the BN is deemed to be due to carrier's disability, the rates applicable to traffic moved by the RI over these tracks of the BN shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.* This order shall become effective at 11:59 p.m., March 25, 1973.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 15, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10-17),

15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2))

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,  
Secretary.

## Title 50—Wildlife and Fisheries

### CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

#### PART 33—SPORT FISHING

##### Ouray National Wildlife Refuge, Utah

The following special regulation is issued and is effective on March 28, 1973.

#### § 33.5 Special regulations; sport fishing, for individual wildlife refuge areas.

##### UTAH

##### OURAY NATIONAL WILDLIFE REFUGE

The Green River channel within Ouray National Wildlife Refuge, Uintah County, Utah, shall be open to sport fishing by rod, reel, and pole from April 1, 1973, through December 31, 1973. Vehicle access is limited to existing routes delineated on maps available at refuge headquarters and from the Area Manager, Federal Building, Room 2215, 125 South State Street, Salt Lake City, UT 84111. Sport fishing shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1973.

H. J. JOHNSON,  
Refuge Manager, Ouray National  
Wildlife Refuge, Vernal, Utah.

FEBRUARY 8, 1973.

## Proposed Rule Making

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### [7 CFR Part 51]

#### FRESH PLUMS AND PRUNES

##### Proposed U.S. Standards for Grades

Notice is hereby given that the U.S. Department of Agriculture is considering the amendment of U.S. Standards for Grades of Fresh Plums and Prunes (7 CFR 51.1520-51.1538). These grade standards are issued under authority of the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621-1627), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers and consumers. Official grading services are also provided under this act upon request of any financially interested party and upon payment of a fee to cover the cost of such services.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposal should file the same, in duplicate, not later than April 30, 1973, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, where they will be available for public review during official hours of business (7 CFR 1.27(b)).

*Statement of considerations leading to the proposed amendment of the grade standards.* The U.S. Standards for Grades of Fresh Plums and Prunes were last revised April 23, 1966. They were amended May 9, 1969, to change the standard pack section.

Late in 1971 a grower-shipper organization in the State of Washington requested a change in the method of determining the diameter of Italian-type prunes.

The U.S. Standards for Fresh Plums and Prunes now provide for ring sizing, the greatest diameter at center cross section, except that Italian-type prunes must be caliper sized, the shortest diameter at center cross section. The Washington State request would have all fresh plums and prunes measured by ring sizers.

A size comparison study between suture and check diameters (shortest versus greatest) made during the 1971 season at Washington State University

indicates that, on the average, an Italian-type prune with a suture (shortest) diameter of 1 1/4 inches will have a cheek (greatest) diameter of 1 1/4 inches. Thus, the weight of 100 prunes will remain constant whether sized by the shortest diameter to a 1 1/4 inch minimum or by the greatest diameter to a 1 1/4 inch minimum.

Upon inquiry in other prune producing States early in 1972 it was learned that some producers and packers believed there was need for further investigation before proposing the requested change. Consequently, no action was taken to amend the standards at that time.

Additional data comparing the ring sizing and caliper sizing of prunes were obtained in Idaho during the 1972 season. This data confirmed the results of the previous study in Washington and indicated that changing to ring sizing and a 1 1/4-inch minimum diameter would not materially change the size of prunes marketed.

Late in 1972 the request by the State of Washington organization for amendment of the standards was renewed. It was supported by the Idaho-Oregon Prune Marketing Committee. Inquiries indicate that the change would create few, if any, new problems. It would have the benefit of simplifying sizing under the grade standards in that plums and prunes would be sized by the same method.

Copies of a study draft to consider amendment of the standards, explaining the suggested changes, were sent to representatives of the prune industry, including receivers, in January 1973.

Comments received on the suggested changes in measurement and minimum size requirements were generally favorable. One adverse comment resulted from not understanding that the specified minimum size would be increased when the method of measuring diameter was changed.

This request to change the method of determining diameter appears reasonable and desirable if the minimum diameter requirement in the U.S. Fancy and U.S. No. 1 grades is increased from 1 1/4 to 1 1/4 inches.

The sections proposed to be amended presently read as follows:

Section 51.1520, paragraph (a): Italian type prunes shall be well colored and, unless otherwise specified, shall be not less than 1 1/4 inches in diameter. (See § 51.1525.)

Section 51.1521, paragraph (a): Italian type prunes shall be fairly well colored and, unless otherwise specified, shall be

not less than 1 1/4 inches in diameter. (See § 51.1525.)

Section 51.1537: "Diameter" means the greatest dimension measured at right angles to a line from the stem to blossom end of the fruit, except that in the case of Italian type prunes diameter means the shortest dimension measured through the center of the fruit at right angles to a line from stem to blossom end.

As proposed to be amended, paragraphs (a) of §§ 51.1520, 51.1521, and 51.1537 and set forth below:

§ 51.1520 U.S. Fancy.

(a) Italian type prunes shall be well colored and, unless otherwise specified, shall be not less than 1 1/4 inches in diameter. (See § 51.1525.)

§ 51.1521 U.S. No. 1.

(a) Italian type prunes shall be fairly well colored and, unless otherwise specified, shall be not less than 1 1/4 inches in diameter. (See § 51.1525.)

§ 51.1537 Diameter.

"Diameter" means the greatest dimension measured at right angles to a line from the stem to blossom end of the fruit.

(Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended; 7 U.S.C. 1622, 1624)

Dated: March 22, 1973.

E. L. PETERSON,  
Administrator,  
Agricultural Marketing Service.

## [7 CFR Ch. IX]

[Docket No. AO-377]

### RYEGRASS SEED GROWN IN OREGON

#### Notice of Extension of Time for Filing Briefs

Notice is hereby given that the time for filing briefs, proposed findings, and conclusions on the record of the public hearing held January 30-February 1, 1973, at Albany, Oreg., with respect to a proposed marketing agreement and order regulating the handling of ryegrass seed grown in Oregon, originally published January 10, 1973, 38 FR 1197, pursuant to the order of the presiding administrative law judge issued at the hearing is hereby extended to May 1, 1973.

At the hearing, the Administrative Law Judge directed that briefs be filed on or before March 19, 1973, on the understanding that a copy of the transcript of the hearing would be available

8067

ence between the potency value divided by 10 and the percent ampicillin content of the sample determined by the non-aqueous acid titration is not more than six. The potency-base titration concordance is such that the difference between the potency value divided by 10 and the percent ampicillin content of the sample determined by the nonaqueous base titration is not more than six.

(vii) It is crystalline.

(viii) It gives a positive identity test for ampicillin.

Percent ampicillin content =  $\frac{(A-B) \text{ (normality of lithium methoxide reagent) } (349.4) (100) (100)}{\text{Weight of sample in milligrams } (100-m)}$

where:

A = Milliliters of lithium methoxide reagent used in titrating the sample;

B = Milliliters of lithium methoxide reagent used in titrating the blank;

m = Percent moisture content of the sample.

Calculate the difference between the potency and the ampicillin content as follows:

Difference =  $\frac{\text{Potency in micrograms per milligram} - \text{percent ampicillin content}}{10}$

(ii) Base titration.

Percent ampicillin content =  $\frac{(A-B) \text{ (normality of perchloric acid reagent) } (349.4) (100) (100)}{\text{Weight of sample in milligrams } (100-m)}$

where:

A = Milliliters of perchloric acid reagent used in titrating the sample;

B = Milliliters of perchloric acid reagent used in titrating the blank;

m = Percent moisture content of the sample.

Calculate the difference between the potency and the ampicillin content as follows:

Difference =  $\frac{\text{Potency in micrograms per milligram} - \text{percent ampicillin content}}{10}$

d. In the proposed revision of § 149b.4 additionally revising paragraphs (a) (1), (a) (3), and (b) (7), and by inserting a new subdivision (viii) in the revision of paragraph (a) (1) to read as follows:

#### § 149b.4 Sterile sodium ampicillin.

(a) . . . . .

(1) . . . . .

(1) Its potency is not less than 845 micrograms and not more than 988 micrograms of ampicillin per milligram. If it is packaged for dispensing, it contains not less than 90 percent and not more than 115 percent of the number of milligrams of ampicillin that it is represented to contain.

(viii) The potency-base titration concordance is such that the difference be-

(3) . . . . .  
(1) Results of tests and assays on the batch for potency, safety, loss on drying, pH, ampicillin content, concordance, crystallinity, and identity.

(b) . . . . .

(5) *Ampicillin content.* Proceed as directed in § 141.544 of this chapter, using both the titration procedures described in paragraphs (e) (1) and (e) (2) of that section. Calculate the percent ampicillin content as follows:

(i) *Acid titration.*

Percent ampicillin content =  $\frac{(A-B) \text{ (normality of lithium methoxide reagent) } (349.4) (100) (100)}{\text{Weight of sample in milligrams } (100-m)}$

where:

A = Milliliters of lithium methoxide reagent used in titrating the sample;

B = Milliliters of lithium methoxide reagent used in titrating the blank;

m = Percent moisture content of the sample.

Calculate the difference between the potency and the ampicillin content as follows:

Difference =  $\frac{\text{Potency in micrograms per milligram} - \text{percent ampicillin content}}{10}$

(ii) Base titration.

Percent ampicillin content =  $\frac{(A-B) \text{ (normality of perchloric acid reagent) } (349.4) (100) (100)}{\text{Weight of sample in milligrams } (100-m)}$

where:

A = Milliliters of perchloric acid reagent used in titrating the sample;

B = Milliliters of perchloric acid reagent used in titrating the blank;

m = Percent moisture content of the sample.

Calculate the difference between the potency and the ampicillin content as follows:

Difference =  $\frac{\text{Potency in micrograms per milligram} - \text{percent ampicillin content}}{10}$

tween the potency value divided by 10 and the percent ampicillin content of the sample determined by the nonaqueous base titration is not more than six.

(ix) It is crystalline.

(x) It passes the identity test for sodium ampicillin.

(3) . . . . .

(1) Results of tests and assays on the batch for potency, sterility, pyrogens, safety, moisture, pH, ampicillin content, concordance, crystallinity, and identity.

(b) . . . . .

(7) *Ampicillin content.* Proceed as directed in § 141.544 of this chapter, using the titration procedure described in paragraph (e) (2) of that section. Calculate the ampicillin content as follows:

Percent ampicillin content =  $\frac{(A-B) \text{ (normality of perchloric acid reagent) } (174.7) (100) (100)}{\text{Weight of sample in milligrams } (100-m)}$

where:

A = Milliliters of perchloric acid reagent used in titrating the sample;

B = Milliliters of perchloric acid reagent used in titrating the blank;

m = Percent moisture content of the sample.

Calculate the difference between the potency and the ampicillin content as follows:

Difference =  $\frac{\text{Potency in micrograms per milligram} - \text{percent ampicillin content}}{10}$

§§ 149b.11, 149b.12, 149b.13, 149b.14, 149b.15, 149b.16, 149b.17, 149b.18, 149b.19, and 149b.20. [Amended]

e. In the proposed revision of §§ 149b.11, 149b.12, 149b.13, 149b.14, 149b.15, 149b.16, 149b.17, 149b.18, 149b.19, and 149b.20 by inserting the word "concordance," between "ampicillin content," and "crystallinity," in paragraph (a) (3) (i) in each of these sections.

Interested persons may, on or before May 28, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane,

Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: March 16, 1973.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### [14 CFR Part 71]

[Airspace Docket No. 73-80-20]

#### TRANSITION AREA

##### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Toccoa, Ga., transition area.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, Post Office Box 20636, Atlanta, GA 30320. All communications received on or before April 27, 1973, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 724, 3400 Whipple Street, East Point, GA.

The Toccoa transition area described in § 71.181 (38 FR 435) would be amended as follows:

" \* \* \* longitude 83°17'40" W. ) \* \* \*  
83°17'40" W. ) within a 9-mile radius of Habersham County Airport, Cornelia, Ga. (latitude 34°30'20" N, longitude 83°33'15" W. ) \* \* \* " would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for IFR operations at Habersham County Airport. A prescribed instrument approach procedure to this airport, utilizing the Toccoa VOR, is proposed in conjunction with the alteration of this transition area.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on March 16, 1973.

DUANE W. FREER,  
Acting Director, Southern Region.

#### [14 CFR Part 73]

[Airspace Docket No. 73-WA-15]

#### EXTENSION OF TEMPORARY RESTRICTED AREAS R-5116 A AND B

##### Proposed Designation

The Federal Aviation Administration (FAA) is considering an amendment to

## PROPOSED RULE MAKING

Issued in Washington, D.C., on March 16, 1973.

H. B. HELSTROM,  
Chief, Airspace and Air  
Traffic Rules Division.

[FR Doc. 73-5828 Filed 3-27-73; 8:45 am]

#### [14 CFR Part 75]

[Airspace Docket No. 72-WA-70]

#### AREA HIGH ROUTES

##### Proposed Alterations

The Federal Aviation Administration (FAA) is considering an amendment to Part 75 of the Federal Aviation Regulations that would alter the following RNAV routes:

1. J951R from Washington, D.C., to St. Louis, Mo.

2. J974R from Washington, D.C., to Los Angeles, Calif.

3. J981R from Los Angeles, Calif., to Washington, D.C.

4. J982R from Los Angeles, Calif., to Kansas City, Mo.

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, IL 60018. All communications received on or before April 27, 1973, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

On August 5, 1972, an amendment to Part 73 of the Federal Aviation Regulations was published in the FEDERAL REGISTER (37 FR 15857) which designated temporary Restricted Areas R-5116 A and B for the period October 1, 1972, through March 31, 1973.

On January 19, 1973, an amendment to Part 73 of the Federal Aviation Regulations was published in the FEDERAL REGISTER (38 FR 1923) which extended the time of designation of Restricted Areas R-5116 A and B from April 1, 1973, through June 30, 1973.

Subsequent to the publication of these amendments, the Department of the Air Force submitted a further request for the designation of R-5116 A and B, from sunrise to sunset, for the period July 1, 1973, through September 30, 1973. This extension is needed to make up launch missions which were canceled because of adverse weather conditions, conflicting events, or system malfunctions. The area would be activated for only the minimum time needed for each launch mission, and the same procedures which are currently in effect would apply to this proposed designation. These procedures include:

(1) Advance notification to the public, through all available news media and scheduled flight service station broadcasts, of the activation of these areas, and

(2) coordination by the Air Force with the Albuquerque ARTC Center so the missile launchings will have a minimum impact on air traffic operations.

The proposed amendment would extend the time of designation of Restricted Areas R-5116 A and B from July 1, 1973, through September 30, 1973.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

J951R is established for Washington, D.C., to St. Louis, Mo., service and the route currently begins at Casanova, Va.

J974R is established for Washington to Los Angeles, Calif., service and the route begins at Casanova. This route is proposed for realignment from Front Royal to Henderson rather than Casanova to Henderson in order to coincide with Washington terminal flows. J974R currently crosses J981R (used for Los Angeles to Washington service) at Torreon, N. Mex. In order to eliminate this crossing, it is proposed to realign J974R so as to remain north of and laterally separated from J981R. This would require renumbering parts of the existing J981R as J974R and vice versa. In addition, some new segments are proposed to provide route continuity.

J981R is established for Los Angeles to Washington service and currently crosses J974R (used for Washington to Los Angeles service) at Torreon, N. Mex. In order to eliminate this crossing, it is proposed herein to realign J981R so as to remain south of and laterally separated from J974R. The existing initial segment of J981R between Seal Beach, Calif., and Parker, Calif., would be revoked since it is not used for en route traffic. The eastern end of the route would terminate at Diana, W. Va., rather than at Front Royal, Va., so as to properly coincide with Washington terminal flows.

J982R is established for Los Angeles to Kansas City service. Its current alignment conflicts with the proposed westbound traffic flow between Wichita, Kans., and Springer, N. Mex. The proposed realignment would make the route compatible with established and proposed traffic flows east of Los Angeles.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 21, 1973.

H. B. HELSTROM,  
Chief, Airspace and  
Air Traffic Rules Division.  
[FR Doc. 73-5830 Filed 3-27-73; 8:45 am]

J974R is established for Washington to Los Angeles, Calif., service and the route begins at Casanova. This route is proposed for realignment from Front Royal to Henderson rather than Casanova to Henderson in order to coincide with Washington terminal flows. J974R currently crosses J981R (used for Los Angeles to Washington service) at Torreon, N. Mex. In order to eliminate this crossing, it is proposed to realign J974R so as to remain north of and laterally separated from J981R. This would require renumbering parts of the existing J981R as J974R and vice versa. In addition, some new segments are proposed to provide route continuity.

J981R is established for Los Angeles to Washington service and currently crosses J974R (used for Washington to Los Angeles service) at Torreon, N. Mex. In order to eliminate this crossing, it is proposed herein to realign J981R so as to remain south of and laterally separated from J974R. The existing initial segment of J981R between Seal Beach, Calif., and Parker, Calif., would be revoked since it is not used for en route traffic. The eastern end of the route would terminate at Diana, W. Va., rather than at Front Royal, Va., so as to properly coincide with Washington terminal flows.

J982R is established for Los Angeles to Kansas City service. Its current alignment conflicts with the proposed westbound traffic flow between Wichita, Kans., and Springer, N. Mex. The proposed realignment would make the route compatible with established and proposed traffic flows east of Los Angeles.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 21, 1973.

[Docket No. 12650; Notice No. 73-10]

SUPPLEMENTAL AIR CARRIERS, SCHEDULED AIR CARRIERS WITH HELICOPTERS, AND CERTAIN AIR TAXI OPERATIONS

Use of Certificated Land Airports

The Federal Aviation Administration is considering amending Parts 121, 127, and 135 of the Federal Aviation Regulations to require supplemental air carriers, scheduled air carriers with heli-

## PROPOSED RULE MAKING

copters that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board, and air taxi operators when conducting operations pursuant to a CAB-approved route substitution agreement with a certificated air carrier to conduct their operations into airports certificated by the FAA under the airport certification and operation rules when amended.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, DC 20591. All communications received on or before April 17, 1973, will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments in the rules docket, for examination by interested persons.

Part 139, Certification and Operations: Land airports serving CAB-certificated scheduled air carriers operating large aircraft (other than helicopters), was issued on June 12, 1972, as an amendment to the Code of Federal Regulations effective July 21, 1972 (37 FR 12278). That part provides, insofar as is pertinent here, that, after May 20, 1973, no person may operate a land airport regularly serving any scheduled CAB-certificated air carriers operating large aircraft (other than helicopters) into that airport, in any State of the United States, the District of Columbia, or any territory or possession of the United States, without or in violation of an airport operating certificate for that airport, or in violation of the approved airport operations manual for that airport.

Subsequent to the issuance of Part 139, and in accordance with Notice 72-25 published in the Federal Register on September 20, 1972 (37 FR 19380), the FAA is amending Part 121 of the Federal Aviation Regulations by adding a new § 121.590 to Subpart T of Part 121 to require that domestic and flag air carriers that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board and that operate large aircraft (other than helicopters) conduct their scheduled operations into regular airports certificated by the FAA under Part 139.

In Notice No. 73-8, published in the Federal Register March 12, 1973 (38 FR 6692), the FAA proposed to amend Part 139 of the Federal Aviation Regulations to: (1) Broaden the applicability of Part 139 to make it applicable to all airports serving air carriers certificated by the Civil Aeronautics Board; (2) provide for the issuance of airport operating certificates to the airports that would be required by this proposal to comply with Part 139; and (3) provide separately cer-

tain certification and operation rules for heliports that are required by the nature of those airports.

Part 139 is currently applicable to land airports regularly serving scheduled air carriers that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board and that operate large aircraft (other than helicopters) into those airports. The preamble to Part 139 stated that further rules would be developed as soon as possible and in such depth as would comply with the legislative mandate of section 612 of the Federal Aviation Act of 1958, as to all other airports serving air carriers certificated by the Civil Aeronautics Board.

The proposed changes in the title of Part 139, as implemented by appropriate changes in the affected sections, would eliminate the original limitations of that part. Airport operating certificates would be required for all airports serving air carriers certificated by the Civil Aeronautics Board. Airports that do not regularly serve CAB-certificated scheduled air carriers operating large aircraft but do provide service to CAB-certificated air carriers include airports that serve: (1) Certificated supplemental air carriers; (2) certificated air carriers operating small aircraft (12,500 pounds or less maximum certificated takeoff weight); (3) certificated air carrier charter operations; (4) operators that conduct operations pursuant to a CAB-approved route substitution agreement with a certificated air carrier; or (5) certificated air carriers operating helicopters.

Accordingly, the FAA considers it appropriate to supplement new § 121.590 with a proposal to extend the requirement for the use of airports certificated under part 139. Consistent with the safety objective of Part 139 and with the proposed changes, this proposal would require, in addition to domestic and flag air carriers already covered by § 121.590, supplemental air carriers governed by Part 121 and scheduled air carriers using helicopters that are governed by Part 127 to use certificated airports for their operations conducted in any State of the United States, the District of Columbia, or any territory or possession of the United States. Since not only regular airports, but also provisional and fueling airports, serve air carriers that hold certificates of public convenience and necessity issued by the Civil Aeronautics Board, they will be required by Part 139, if amended, to be certificated. Consequently, the amendment proposed herein would require Part 121 supplemental air carriers with helicopters, when conducting operations governed by those parts, to operate exclusively at airports and heliports that are certificated under Part 139. In addition, the FAA proposes to extend the requirement for the use of airports certificated under Part 139 to Part 135 air taxi operators but only when they conduct operations pursuant to a CAB-approved route substitution agreement with a certificated air carrier.

It should be noted that Part 121 of the Federal Aviation Regulations requires that under certain prevailing weather conditions an alternate airport alternate to the departure or destination airport be designated in dispatching an air carrier flight, to be used in the event that weather conditions at the departure or destination airport are below landing minimums. With the improved weather forecasting techniques and radio navigation aids currently available, such airports are very infrequently used, and are therefore not considered as "serving" air carriers. Accordingly, air carriers that would otherwise be required to operate at airports certificated under Part 139 will not be required under this proposal to use certificated airports as alternates.

This amendment is proposed under the authority of sections 313(a), 601, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1424), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend Parts 121, 127, and 135 of the Federal Aviation Regulations as follows:

1. By amending § 121.590 of Part 121 to read as follows:

§ 121.590 Use of certificated land airports; Domestic, flag, and supplemental air carriers certificated by the CAB including their charter operations and their operations with small aircraft.

Unless otherwise authorized by the Administrator, after May 20, 1973, no domestic, flag, or supplemental air carrier and no pilot being used by them may, in the conduct of operations governed by this part, operate an aircraft into a land airport in any State of the United States, the District of Columbia, or any territory or possession of the United States, unless that airport is certificated under Part 139 of this chapter. However, an air carrier may designate and use as a required alternate airport for departure or destination an airport that is not certificated under Part 139 of this chapter.

2. By adding a new § 127.218 to Subpart N of Part 127 to read as follows:

§ 127.218 Use of certificated heliports; Scheduled helicopter air carriers.

Unless otherwise authorized by the Administrator, after May 20, 1973, no scheduled helicopter air carrier and no pilot being used by it may, in the conduct of operations governed by this part, operate a helicopter into a heliport in any State of the United States, the District of Columbia, or any territory or possession of the United States, unless that heliport is certificated under Part 139 of this chapter.

3. By adding a new § 135.120 to Subpart C of Part 135 to read as follows:

§ 135.120 Use of certificated airports; Operations conducted pursuant to a route substitution agreement.

Unless otherwise authorized by the Administrator after May 20, 1973, no ATCO certificate holder and no pilot

being used by it may, in the conduct of operations pursuant to a CAB-approved route substitution agreement with a certificated air carrier, operate an aircraft into a land airport in any State of the United States, the District of Columbia, or any territory or possession of the United States, unless that airport is certificated under Part 139 of this chapter. However, a certificate holder may designate and use as a required alternate airport one that is not certificated under Part 139 of this chapter.

Issued in Washington, D.C., on March 16, 1973.

C. R. MELUGIN, Jr.,  
Acting Director,  
Flight Standards Service.

## ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 180]

## TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

## 4,6-Dinitro-o-Cresol and Its Sodium Salt; Proposed Interim Tolerance

Dr. C. C. Compton, Interregional Research Project No. 4, State Agricultural Experiment Station, Rutgers University, New Brunswick, N.J. 08903, on behalf of the Agricultural Experiment Stations of California, Idaho, Oregon, Utah, and Washington; the U.S. Department of Agriculture; and the Northwest Horticultural Council submitted a petition (PP 1E1087) proposing establishment of an exemption from the requirement of a tolerance for residues of 4,6-dinitro-o-cresol and its sodium salt as plant regulators in or on the raw agricultural commodity apples from application to apple trees at the blossom stage as a fruit-thinning agent.

This Agency has concluded that an interim tolerance of 0.02 part per million for residues of 4,6-dinitro-o-cresol and its sodium salt in or on apples should be established until processing of the pending petition is completed and action taken thereon.

Based on consideration given the data submitted in the petition and other relevant material, it is concluded that:

1. 4,6-dinitro-o-cresol and its sodium salt are useful for the purpose for which the tolerance is proposed.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The proposed interim tolerance will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic

## PROPOSED RULE MAKING

Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Admin-

istrator for Pesticide Programs (36 FR 9038), it is proposed that § 180.319 be amended by alphabetically inserting a new item in the table as follows:

§ 180.319 Interim tolerances.

Substance	Use	Tolerances in parts per million	Raw agricultural commodity
...	...	...	...
4,6-Dinitro-o-cresol and its sodium salt.	Plant regulator.	0.02	Apples from application to apple trees at the blossom stage as a fruit-thinning agent.
...	...	...	...

Any person who has registered or submitted an application for the registration of an economic poison under the Federal Insecticide, Fungicide, and Rodenticide Act containing any of the ingredients listed herein may request, on or before April 27, 1973, that this proposal be referred to an advisory committee in accordance with section 408(e) of the act.

Interested persons may, on or before April 27, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, Fourth and M Streets SW., Waterside Mall, Washington, D.C. 20460, written comments (preferably in triplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. All written submissions made pursuant to this proposal will be made available for public inspection at the office of the Hearing Clerk.

Dated: March 22, 1973.

HENRY J. KOPF,  
Deputy Assistant Administrator  
for Pesticide Programs.

[FR Doc. 73-5800 Filed 3-27-73; 8:45 am]

## FEDERAL POWER COMMISSION

[18 CFR Part 2]

[Docket No. R-474]

UTILIZATION AND CONSERVATION OF NATURAL RESOURCES  
Natural Gas

MARCH 26, 1973.

This notice, issued pursuant to 5 U.S.C. 553 and sections 4, 5, 7, and 16 of the Natural Gas Act (15 U.S.C. 717c, 717d, 717g), submits for public comment a proposed new section of our regulations (18 CFR 2.78(c)) that will define certain terms used by the Commission in orders issued in its Statement of Policy in Docket No. R-469 and in its Notice of Proposed Policy Statement in Docket No. R-467 (18 CFR 2.78 (a) and (b)) and its notice of proposed rulemaking in Docket No. R-468. These definitions are intended to standardize end use classi-

fications and service priorities and thereby aid the industry in meeting its responsibilities to serve the public's needs during a critical nationwide gas supply shortage, and also to assist the Commission in discharging its regulatory responsibility to effectuate curtailment plans in a uniform, non-discriminatory manner. In enunciating these definitions, we believe that the uniformity obtained will enhance the attainment of those goals.

In reaching the proposed definitions, the following considerations and objectives were involved:

**Residential.** In defining this category of service the primary consideration involves separating gas usage within a household unit from the central type of facilities associated with an apartment development. A problem may arise when considering multiunit complexes where-in service is rendered through a single meter. Such service may include the requirements of a central heating and air conditioning facility or individual types of uses such as gas stoves or separate space heating units. In this situation that portion of the requirement that is utilized on an individual dwelling unit basis should be considered as a residential service and that portion utilized within a central facility considered as a commercial use.

**Commercial.** This category is composed of those consumers whose primary function is the sale of goods or services either wholesale or retail and who purchase gas for their own use. Institutions such as hospitals, schools, etc., either public or private and Federal, State, and local government facilities would also fit within this category as providing a service. However, government facilities such as arsenals or publicly owned electric power generating facilities may provide several categories of service within the confines of the installation such as that to base housing, post exchanges and commissaries, offices, and steam or electric power generation. In this situation, the purchaser, although not actually involved in the resale of natural gas, does

## PROPOSED RULE MAKING

perform a service similar to a distributor and, therefore, should report requirements on the same basis. Volumes should be segregated as to actual use within the facilities where possible.

**Industrial.** Aside from the usual industrial type of service (such as mining, manufacturing, prefabrication, and assembly) electric power generation for sale or distribution and agricultural utilization should also be considered within this category. There may be industrial customers that serve, within their industrial complex, residential and commercial facilities not specifically related to the plant operation such as company towns. These requirements should be treated similar to those uses within a defense installation and classified within each applicable category of end use.

**Firm and interruptible service.** The differentiation between firm and interruptible service centers primarily around the seller's obligation to deliver a specific volume of gas within a definite time frame. Another consideration would be whether or not the contract in question anticipated interruption on a regular basis or required installation of alternate fuel capability. A contract that provides for service subordinate to the maintenance of a higher priority of service on an emergency basis only would be considered as firm. Service provided at seller's option or on an "when, as, and if available" basis would be considered interruptible.

**Plant protection.** Plant protection volumes should be defined as the minimum gas requirements needed to protect equipment from physical harm or to prevent danger to human safety. It may include gas needed to protect materials in process but should not be construed to include deliveries to maintain plant production on a "business as usual" basis.

**Feedstock gas.** Feedstock gas is defined as gas used for its chemical properties in creating an end product rather than being utilized as a fuel.

**Process gas.** Process gas should be very narrowly defined and limited to those applications of natural gas as a fuel for which there is no technically feasible alternative. It appears that consideration of a broader definition would involve complicated economic judgments which may be beyond the scope of the objective to classify markets by end use.

**Boiler fuel.** The basic concept of boiler fuel is the use of gas as a fuel to raise steam. However, it appears necessary to include within this category industrial use of gas for turbine generation of electricity where the existence of the turbine unit could subvert a curtailment plan by diverting gas that would normally have been utilized in a boiler for the same ultimate purpose.

**Alternate fuel capabilities.** In order to provide a maximum incentive for natural gas consumers to install alternate facilities where possible, this term should be defined as a situation where an alternate fuel could have been utilized whether or not the facilities for such use have actually been installed. If such definition were to include only existing facilities, installed and operative, the consumer, with the foresight to do so, would be penalized and those without would be inclined to delay such installation.

Accordingly, it is proposed that, in considering curtailment and certificate matters coming within the context of Docket Nos. R-467, R-468 and R-469, certain terms used in § 2.78 (a) and (b) of our general policy and interpretations (18 CFR § 2.78 (a) and (b)) will be uniformly defined. To accomplish that end, we propose to amend our regulations under authority granted the Federal Power Commission by the Natural Gas Act, as amended, particularly sections 4, 5, 7, and 16 (52 Stat. 822, 824, 825; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f), to include a new section 2.78(c) that will read as follows:

§ 2.78 Utilization and conservation of natural resources—natural gas.

(c) When used in paragraphs (a) and (b) of this section, the following terms will be defined as follows:

(1) **Residential.** Service to customers which consists of direct natural gas usage in a residential dwelling for space heating, air conditioning, cooking, water heating, and other residential uses.

(2) **Commercial.** Service to customers engaged primarily in the sale of goods or services including institutions and local and Federal government agencies for uses other than those involving manufacturing or electric power generation.

(3) **Industrial.** Service to customers engaged primarily in a process which creates or changes raw or unfinished materials into another form or product including the generation of electric power.

(4) **Firm service.** Service from schedules or contracts under which seller is expressly obligated to deliver specific volumes within a given time period and which anticipates no interruptions, but which may permit unexpected interruption in case the supply to higher priority customers is threatened.

(5) **Interruptible service.** Service from schedules or contracts under which seller is not expressly obligated to deliver specific volumes within a given time period, and which anticipates and permits interruption on short notice, or service under schedules or contracts which ex-

pressly or impliedly require installation of alternate fuel capability.

(6) **Plant protection gas.** Is defined as minimum volumes required to prevent physical harm to the plant facilities or danger to plant personnel when such protection cannot be afforded through the use of an alternate fuel. This includes the protection of such material in process as would otherwise be destroyed, but shall not include deliveries required to maintain plant production.

(7) **Feedstock gas.** Is defined as gas used for its chemical properties, of natural gas as a raw material in creating an end product.

(8) **Process gas.** Is defined as gas use for which alternate fuels are not technically feasible such as in applications requiring precise temperature controls and precise flame characteristics.

(9) **Boiler fuel.** Is considered to be natural gas used as a fuel for the generation of steam or electricity, including the utilization of gas turbines for the generation of electricity.

(10) **Alternate fuel capabilities.** Is defined as a situation where an alternate fuel could have been utilized whether or not the facilities for such use have actually been installed.

Any interested persons may submit to the Federal Power Commission, Washington, D.C. 20426, not later than April 12, 1973, data, views, comments, or suggestions, in writing, concerning all or part of the amendment proposed herein. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Washington, D.C., during regular business hours. Submittals to the Commission should indicate the name, title, mailing address, and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing requests a conference with the staff of the Federal Power Commission to discuss the proposed amendment. The staff, in its discretion, may grant or deny requests for a conference. The Commission will consider all written submittals before acting on the proposed amendment herein.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,  
Secretary.

## Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF STATE

[Public Notice CM-18]

## RECOGNITION AND ENFORCEMENT OF FOREIGN JUDGMENTS STUDY GROUP

## Notice of Meeting

A meeting of the Recognition and Enforcement of Foreign Judgments Study Group, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will take place on Monday, April 2, 1973, in room 231, Langdell Hall West, Harvard Law School, Cambridge, Mass. The meeting, which will begin at 10:30 a.m., will be open to the public.

The primary purpose of the meeting is to study the question of recognition and enforcement of foreign judgments, with particular emphasis on identifying the problems that should be resolved in bilateral treaties that the United States plans to negotiate on the subject in the near future.

Members of the public who desire to attend the meeting will be admitted up to the limits of the capacity of the meeting room.

ROBERT E. DALTON,  
Executive Director.

MARCH 23, 1973.

[FR Doc. 73-5868 Filed 3-27-73; 8:45 am]

[Public Notice CM-19]

## STUDY GROUP ON MARITIME BILLS OF LADING

## Notice of Meeting

A meeting of the Maritime Bills of Lading Study Group, a subgroup of the Secretary of State's Advisory Committee on Private International Law, will take place on Wednesday, April 11, 1973, in room 5519 of the Department of State. The meeting, which will begin at 10 a.m., will be open to the public.

The primary purposes of the meeting are to consider a report on the work of the fourth and fifth sessions of the working group on this subject established by the United Nations Commission on International Trade Law (UNCITRAL) and to study issues and make recommendations on questions to be taken up at the next meeting of the working group.

Members of the general public who desire to attend the meeting will be admitted up to the limits of the capacity of the meeting room. Entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Accordingly, members of the general public who plan to attend the

meeting are requested to inform the Chairman of the Advisory Committee of their names and addresses prior to April 11. The mailing address of the Chairman is Office of the Legal Adviser, Department of State; the telephone number is area code 202-632-8134. All non-Government attendees at the meeting should use the C Street entrance to the building.

ROBERT E. DALTON,  
Executive Director.

## NOTICE OF GRANTING OF RELIEF

Notice is hereby given that pursuant to 18 U.S.C. 925(c) the following named persons have been granted relief from disabilities imposed by Federal laws with respect to the acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding 1 year.

It has been established to my satisfaction that the circumstances regarding the convictions and each applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be contrary to the public interest.

Amos, Charles G., 3795 West Outer Drive, Detroit, MI, convicted on December 12, 1949, by a General Court-martial convened at Osaka, Honshu, Japan, and on April 13, 1956, in the Records Court for the city of Detroit, Mich.

Beetem, Denver L., Sr., 142 A Street, Lincoln, NE, convicted on March 27, 1970, in the District Court, Third Judicial District of Nebraska for Lancaster County.

Bell, Bennie Franklin, Jr., Route 1, Box 242, Rogers Lane, Austin, TX, convicted on April 14, 1960, in the Criminal District Court, Travis County, Tex.

Bell, Wayne F., 17421 Spanaway Lane East, Spanaway, WA, convicted on May 20, 1959, in the Superior Court of the State of California in and for the county of San Diego, and January 25, 1960, in the Superior Court of the State of Washington in and for Pierce County.

Davenport, Richard L., 3017 South 17th Street, Apartment No. 3, Lincoln, NE, convicted on January 12, 1965, in the District Court of Cherry County, Nebr.

Edgington, Robert W., 920 Prazier Street, Des Moines, IA, convicted on July 15, 1946, and September 21, 1954, in Polk County District Court, Des Moines, Iowa, and on January 14, 1949, in Lee County District Court, Keokuk, Iowa.

Frederick, Donald Wayne, 408-12th Street West, Birmingham, AL, convicted on or about June 6, 1968, before a general court-

martial convened at Fort Gordon, Ga., and on January 14, 1969, by the Jefferson County Court, Jefferson County, Ala.

Gilbert, Jack B., Durham, N.C., convicted on or about March 25, 1964, in the U.S. District Court for the Middle District of North Carolina.

Hamilton, Henry, 1513 32d Avenue South, Seattle, WA, convicted on May 19, 1947, in the District Court, 25th Judicial District, Guadalupe County, Tex., and on September 24, 1947, in the District Court in and for the county of Hays, Tex.

Hilliker, Thomas P., Route No. 1, 466 North Coleman Road, Shepherd, MI, convicted on January 16, 1958, in the Circuit Court for the county of Iosco, Tawas City, Mich.

Hubbard, Jerome L., 42 Willow Lane, Mount Vernon, WA, convicted on August 28, 1962, in the District Court, 4th Judicial District, Sheridan, Wyo., and on January 24, 1966, in the Circuit Court of the State of Oregon, county of Multnomah, and on September 28, 1966, in the Superior Court of the State of Washington, county of Spokane.

Jones, Emmett, 6528 Sterling Street, Detroit, MI, convicted on May 20, 1936, in the Court of Quarter Sessions of the Peace for the County of Allegheny, Pa., and in the Court of Oyer and Terminer and General Jail Delivery for the County of Allegheny, Pa., and on October 22, 1948, in the Court of Quarter Sessions, of the Peace for the County of Allegheny, Pa., and on July 19, 1956, in the Justice Court for Wayne County, Mich.

Kiddy, Lester Raymond, 8101 Oakridge Drive SW, Tacoma, WA, convicted on April 20, 1965, in the Superior Court for the State of Washington in and for Spokane County.

Maranville, Jackie A., Walnut Cove, N.C., convicted on May 5, 1970, in the U.S. District Court for the Middle District of North Carolina.

Melloway, Carl L., 1115 Hikam Street, Boonville, MO, convicted on December 10, 1962, in the Circuit Court of Boone County, Mo.

Numrick, John E., 921 Indiana Avenue, Springfield, IL, convicted on October 21, 1935, in the U.S. District Court, District of Wyoming.

Patterson, Gerald F., 412 East Sheridan Road, Lansing, MI, convicted on March 29, 1930, January 16, 1933, and on April 5, 1944, in the Circuit Court for the county of Ingham.

Rakes, Frank W., Route 3, Box 174, Ferrum, VA, convicted on November 9, 1964, in the U.S. District Court, Western District, Va.

Richards, Johnny F., 308 West Dunklin, Jefferson City, MO, convicted on August 15, 1969, in the U.S. District Court, Southern District, Iowa.

Sawicki, William V., 2373 Nelbel Street, Hamtramck, MI, convicted on February 25, 1939, in the U.S. District Court, Eastern District of Michigan, Detroit, Mich.

Spadaro, Frank, 340 East 66th Street, New York, NY, convicted on or about November 19, 1956, by the Kings County Court, Kings County, N.Y.

Springstead, Richard Allen, 1825 Beach Avenue NE, Salem, OR, convicted on April 26, 1955, in the Circuit Court of the State of Oregon for the county of Lane, and on March 24, 1958, in the Circuit Court of the State of Oregon for the county of Marion,

and on April 23, 1963, in the Superior Court of the State of California in and for the county of Santa Barbara.  
Sprinkel, Perre La Faun, Post Office Box 652, Kent, WA, convicted on October 10, 1950, in the Superior Court of the State of Washington for Spokane County, and on August 26, 1953, in the U.S. District Court for the Western District of Pennsylvania, and February 1, 1955, in the Circuit Court of the State of Oregon for the county of Multnomah, and on June 13, 1957, in the Superior Court of the State of California in and for the county of Kern, and on October 13, 1959, in the Superior Court of the State of California in and for the county of San Joaquin.

Thompkins, James E., 700 Judson Street, Apartment C, Evansville, IN, convicted on August 8, 1946, in Vanderburgh Circuit Court, Evansville, Ind.  
Walker, Dale E., 4400A Gibson Avenue, St. Louis, MO, convicted on March 19, 1962, in the Circuit Court for Franklin County, Mo.  
Yobe, Donald L., Rural Delivery No. 2, Mount Joy, PA, convicted on September 22, 1967, in the Cumberland County Court, Carlisle, Pa.

Signed at Washington, D.C., this 21st day of March 1973.

**Internal Revenue Service**  
[Order No. 83 (Rev. 4)]  
**DIRECTOR OF INTERNATIONAL OPERATIONS ET AL.**

**Authority To Permit Inspection of Certain Returns and Related Documents**

Pursuant to authority vested in the Commissioner of Internal Revenue by 26 CFR 301.6103(a)-1, authority is delegated as follows:

1. District Directors, the Director of International Operations, Service Center Directors, and the Chief, Disclosure Staff, are authorized to permit inspection of returns in their custody by any applicant eligible therefor in accordance with paragraph (c) of § 301.6103(a)-1, including any applicant with respect to whom inspection is made discretionary with the Secretary or the Commissioner or the delegate of either, provided such applicant meets the requirements embodied by such paragraph. The authority delegated in this paragraph of this order is limited to returns as filed by or on behalf of the taxpayer, including any schedules, lists and other written statements which have been filed with the Internal Revenue Service by or on behalf of the taxpayer or which have previously been furnished by the Service to the taxpayer.

2. District Directors, the Director of International Operations, Service Center Directors, and the Chief, Disclosure Staff, are authorized to furnish returns, or copies thereof, without written application, to United States Attorneys and attorneys of the Department of Justice, in accordance with paragraph (h) of § 301.6103(a)-1, for official use in proceedings before a U.S. grand jury or in litigation in any court provided such use pertains to the prosecution of claims and demands by, and offenses against, the United States, or the defense of claims and demands against the United States, or officers and employees thereof, in cases arising under the internal revenue laws or related statutes which were referred by the Department of Treasury to the Department of Justice for such prosecution or defense.

3. The Assistant Commissioner (Compliance) and the Chief, Disclosure Staff, are authorized to act on all other requests not covered in paragraph 2 above, from U.S. attorneys and attorneys of the Department of Justice for inspection and copies of returns, in accordance with paragraphs (g) and (h) of § 301.6103(a)-1.

4. The authority delegated in paragraphs 1 and 2 may be redelegated, but not lower than to Division Chiefs. The authority delegated in paragraph 3 may not be redelegated.

5. This Order supersedes Delegation Order No. 83 (Rev. 3), issued February 28, 1972.

[SEAL] **JOHNNIE M. WALTERS,**  
Commissioner of Internal Revenue.  
[FR Doc. 73-5845 Filed 3-27-73; 8:45 am]

**Office of the Secretary**  
**GERMANIUM POINT CONTACT DIODES FROM JAPAN**

**Withholding of Appraisement Notice**

Information was received on August 21, 1972, that germanium point contact diodes from Japan are being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of September 23, 1972, on page 20047. The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), notice is hereby given that there are reasonable grounds to believe or suspect that the purchase price (section 203 of the Act; 19 U.S.C. 162) of germanium point contact diodes from Japan is less, or is likely to be less, than the foreign market value (section 205 of the Act; 19 U.S.C. 164).

Statement of reasons. The information currently before the Bureau of Customs tends to indicate that the probable basis of comparison for fair value purposes will be between purchase price and the adjusted home market price of such or similar merchandise.

Preliminary analysis suggests that purchase price will probably be calculated by deducting included inland freight and shipping charges from the f.o.b. or f.o.r. export price, as appropriate.

Adjusted home market price will probably be based on the weighted-average delivered price with a deduction for inland freight. Adjustments will probably be made for differences in packing costs.

Using the above criteria, there are reasonable grounds to believe or suspect that purchase price will be lower than the adjusted home market price.

Customs officers are being directed to withhold appraisement of germanium point contact diodes from Japan in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

Germanium point contact diodes produced by Tokyo Shibaura Electric Co., Ltd. (Toshiba), of Tokyo, Japan, are excluded from this withholding of appraisement since 100 percent of its export sales during the period under consideration were examined and the home market price of Toshiba's merchandise was found to be lower than the purchase price of identical merchandise in every instance.

In accordance with §§ 153.32(b) and 153.37, Customs Regulations (19 CFR 153.32(b), 153.37), interested persons may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street NW., Washington, DC 20229, in time to be received by his office not later than April 9, 1973. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

This notice, which is published pursuant to § 153.34(b), Customs Regulations (19 CFR 153.34(b)), shall become effective on March 28, 1973. It shall cease to be effective on September 28, 1973, unless previously revoked.

[SEAL] **EDWARD L. MORGAN,**  
Assistant Secretary  
of the Treasury.

**DOD WAGE COMMITTEE**  
**Notice of Closed Meetings**

Pursuant to the provisions of section 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that meetings of the Department of Defense Wage Committee will be held on:

Tuesday, April 3, 1973.  
Tuesday, April 10, 1973.  
Tuesday, April 17, 1973.  
Tuesday, April 24, 1973.

These meetings will convene at 9:30 a.m. and will be held in room 1E-801, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and make recommendations to the Assistant Secretary of Defense (Manpower and Reserve Affairs) on all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees paid from appropriated funds pursuant to Public Law 92-392.

At these scheduled meetings, the Committee will consider wage survey specifications, wage survey data, local reports and recommendations, statistical analyses and proposed pay schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92-463 and 5 U.S.C. 552(b) (2) and (4), the Assistant Secretary of Defense (Manpower and Reserve Affairs) has determined that these meetings will be closed to the public.

However, members of the public who may wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Department of Defense Wage Committee, room 3D-281, the Pentagon, Washington, D.C.

## NOTICES

Soil Conservation Service  
GEORGETOWN CREEK WATERSHED  
PROJECT, IDAHONotice of Availability of Final  
Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Soil Conservation Service, U.S. Department of Agriculture, has prepared a final environmental statement for the Georgetown Creek Watershed Project, Bear Lake County, Idaho, USDA-SCS-ES-WS-(ADM)-73-3(F).

The environmental statement concerns a plan for watershed protection, flood prevention, and irrigation. The planned works of improvement include conservation land treatment supplemented by 8,500 feet of channel alteration and conversion from a surface to a pressure distribution irrigation system for 3,500 acres of cropland.

The final environmental statement was transmitted to CEQ on March 6, 1973.

Copies are available for inspection during regular working hours at the following locations:

Soil Conservation Service, USDA, South Agriculture Building, Room 5227, 14th and Independence Avenue SW., Washington, DC 20250.

Soil Conservation Service, USDA, Room 345, 304 North Eighth Street, Boise, ID 83702.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151. Please order by name and number of statement. The estimated cost is \$5.50.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines.

WILLIAM B. DAVEY,  
Deputy Administrator for Watersheds, Soil Conservation Service.

## DEPARTMENT OF COMMERCE

## Bureau of East-West Trade

[Case No. 346]

## ERWIN TAUTNER

Order Conditionally Restoring Export  
Privileges

By order effective August 31, 1965 (30 FR 11180), the above-named respondent (Erwin Tautner; Gruenbach, Austria) and other parties were denied all U.S. export privileges for the duration of export controls. The order included a provision to the effect that 5 years after the date thereof the above respondent might apply for modification of the denial order. The respondent filed such application dated January 12, 1973. The application was referred to the Hearing Commissioner and considered by him. He has reported that it appears from said respondent's representations and otherwise from information in possession of the Compliance Division, Office of Export Control, that conditional restoration of said respondent's export privileges is consistent with the purposes of the export control program. The Hearing Commissioner has recommended that an order be entered conditionally restoring export privileges to said respondent and placing him on probation for 2 years.

The undersigned has considered the record herein and concurs with the Hearing Commissioner that conditional restoration of Erwin Tautner's export privileges and placing him on probation for 2 years is consistent with the purposes of the U.S. Export Administration Act of 1969 as amended and regulations thereunder.

Accordingly, it is hereby ordered, That the export privileges of Erwin Tautner be and hereby are restored conditionally, and the said respondent is placed on probation for 2 years.

The order was issued by the Office of Export Control which was formerly in the Bureau of International Commerce. By departmental orders effective November 17, 1972, the Office of Export Control is now in the Bureau of East-West Trade (37 FR 25535 and 25557).

## NOTICES

bation for 2 years from the date of this order. The conditions of probation are that the said respondent: (1) Shall fully comply with all of the requirements of the Export Administration Act of 1969 as amended and all regulations, licenses, and orders issued thereunder; (2) shall on request of the Office of Export Control, or a representative of the U.S. Government, acting on its behalf, promptly disclose fully the details of his participation in any and all transactions involving U.S. origin commodities or technical data, including information as to the disposition or intended disposition of such commodities or technical data, and on such request shall also furnish all records and documents relating to such matters. Further, on such request, said respondent shall promptly disclose the names and addresses of his partners, agents, representatives, employees, and other persons associated with him in trade or commerce.

Upon a finding by the Director, Office of Export Control, or such other official as may be exercising the duties now exercised by him, that said respondent has failed to comply with any of the conditions of probation, said official, with or without prior notice to said respondent, by supplemental order, may revoke the probation of said respondent and deny to him all export privileges for such period as said official may deem appropriate. Such order shall not preclude the Bureau of East-West Trade from taking further action for any violation as may be warranted.

This order shall become effective forthwith.

Dated: March 21, 1973.

RAUER H. MEYER,  
Director, Office of Export Control, Bureau of East-West Trade.

#### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

##### Federal Insurance Administration

[Docket No. N-73-146]

#### NATIONAL INSURANCE DEVELOPMENT PROGRAM

##### Notice of Offer To Provide Reinsurance Against Excess Aggregate Loss Resulting From Riots or Civil Disorders

The purposes of this notice are:

(1) To publicly offer Federal reinsurance against excess aggregate losses resulting from defined riots or civil disorders to insurers eligible for such reinsurance for the contract year commencing May 1, 1973 and ending April 30, 1974;

(2) To provide the method by which the offer may be accepted; and

(3) To set forth the terms and conditions of the Standard Reinsurance Contract (1973-74).

Since the offer to provide reinsurance and the terms and conditions of the Standard Reinsurance Contract for the May 1, 1973 to April 30, 1974 contract year must appear in time for acceptance by eligible insurers on or before April 30, 1973, this notice of offer to provide insurance against excess aggregate losses resulting from riots or civil disorders is effective March 28, 1973.

The Standard Reinsurance Contract (1973-74) provides for an aggregate basic premium rate of \$0.05 per \$100 of direct premiums earned on lines reinsured.

Payment of an additional premium will be required if the total amount of all excess aggregate losses paid by the reinsurer under all Standard Reinsurance Contracts issued for the period between May 1, 1973, and April 30, 1974, exceeds the total amount of all aggregate basic premiums under all such contracts.

The maximum amount of the additional premium is four times the insurer's aggregate basic premium.

The additional premium shall be equal to: The amount of the insurer's aggregate basic premium if there is an excess of all paid losses over all aggregate basic premiums; twice that amount if the excess is greater than the total amount of all aggregate basic premiums but does not exceed twice that amount; three times that amount if the excess is greater than twice the amount of all aggregate basic premiums but does not exceed three times that amount; four times that amount, if the excess is greater than three times the total amount of all aggregate basic premiums under all such contracts.

Both the aggregate basic premium and the additional premium, if any, are payable on an advance estimated basis as specified in the contract. Interest shall accrue at 6 percent (6%) per annum on any portion of any amount due the reinsurer which is not paid to the reinsurer within 30 days from its due date.

The offer to provide reinsurance is as follows:

##### OFFER TO PROVIDE REINSURANCE

Pursuant to the provisions of the Urban Property Protection and Reinsurance Act of 1968, as amended (12 U.S.C. 1749bbb-1749bbb-21), subject to all regulations promulgated thereunder and to the terms and conditions set forth in the Standard Reinsurance Contract (1973-74) as printed below, the Federal Insurance Administrator (hereinafter referred to as the "reinsurer") offers to enter into the Standard Reinsurance Contract (1973-74), the terms and conditions of which are as printed hereinbelow, with any eligible insurer which accepts this offer. The reinsurer's offer to provide reinsurance is effective March 28, 1973.

##### METHOD OF ACCEPTANCE OF OFFER

(1) Acceptance of this offer shall be by telegraphed or mailed notice of acceptance to the reinsurer. If the date and time of dispatch of the notice of acceptance are no later than midnight, e.s.t., April 30, 1973, reinsurance coverage shall be in effect from 12:01 a.m., e.s.t., May 1, 1973. If the date and time of dispatch of the notice of acceptance are later than midnight, e.s.t., April 30, 1973, reinsurance coverage shall be in effect from 12:01 a.m., e.s.t., on the day after such notice of acceptance is dispatched. The date and time of dispatch of the notice of acceptance must be clearly shown either by telegraph dispatch notation or postmark, and such notation or postmark shall be conclusive proof of the date and time of dispatch.

(2) The telegram or letter accepting this offer of reinsurance shall indicate the States in which reinsurance on lines of mandatory coverage is to be provided and shall specifically designate for each such State the lines of optional coverage, if any, for which reinsurance is to be provided. The notice of acceptance shall be in substantially the following form:

The [name of insurer or insurers] hereby accepts the offer, as filed with the Office of the Federal Register, of the Standard Reinsurance Contract (1973-74), pursuant to the Urban Property Protection and Reinsurance Act of 1968, as amended, for the mandatory and [specify] optional lines in the following States: [specify].

(3) Any eligible insurer accepting this offer of reinsurance shall be supplied copies of the Standard Reinsurance Contract (1973-74), Form HUD 1801, for execution and return to the reinsurer.

##### TERMS AND CONDITIONS OF THE STANDARD REINSURANCE CONTRACT (1973-74)

[At this point in the contract, the insurance company or companies reinsured are required to list the names and addresses of the principal company and all property insurance companies under common or related ownership or control as defined in the contract, and space is provided for the execution of the contract by the parties.]

This CONTRACT, made by and between the Federal Insurance Administrator (hereinafter referred to as the "Reinsurer") and the company or companies specified above (hereinafter referred to as the "Company"):

WITNESSETH:  
Subject to the provisions of the Urban Property Protection and Reinsurance Act of 1968, as amended, and to the terms and conditions herein set forth, the Reinsurer hereby obligates itself to pay, as reinsurance of the Company, the amount of the Company's excess aggregate losses resulting from riots or civil disorders in such lines of mandatory and optional coverage as are designated separately for each State by the Company in its notice of acceptance and confirmed under sec. XVII.

## NOTICES

##### SECTION I. Policies reinsured. This Standard Reinsurance Contract applies to:

(A) All policies or contracts of direct property insurance issued by the Company to any property owner, except for policies for which the business is handled for or through any State pool or any other continuing organization, pool, or association of insurers, and

(B) The Company's participations in State pools and, as may be approved by the Reinsurer, in other continuing organizations, pools, or associations of insurers, which policies, contracts, or participations are in force on the effective date hereof or which commence or are renewed on or after such effective date in all the mandatory and in such optional standard lines of property insurance listed below as are designated separately for each State by the Company in its notice of acceptance and confirmed under sec. XVII.

##### Lines of MANDATORY COVERAGE

(A) Fire and extended coverage;  
(B) Vandalism and malicious mischief;  
(C) Other allied lines of fire insurance;  
(D) Burglary and theft; and  
(E) Those portions of multiple peril policies covering similar perils to those provided in (A), (B), (C), (D);

##### Lines of OPTIONAL COVERAGE

(F) Inland marine;  
(G) Glass;  
(H) Boiler and machinery;  
(I) Ocean marine;  
(J) Aircraft physical damage.

SEC. II. *Premiums.* The aggregate basic premium due the Reinsurer for the reinsurance coverage provided under this contract shall be computed by applying an annual rate of five hundredths of one per centum (0.05 percent) to an aggregate premium base consisting of the sum of the products of the Company's direct premiums earned in each State for each reinsured line for the calendar year 1972 multiplied by the specified percentage of such earned premium, as defined in sec. XVII of this contract.

If the total amount of all excess aggregate losses paid by the Reinsurer under this contract and all like Standard Reinsurance Contracts issued for the period between May 1, 1973, and April 30, 1974, exceeds the total amount of all aggregate basic premiums paid or payable to the Reinsurer under all such contracts, the Company shall be obligated to pay the Reinsurer, at or subsequent to adjustment, an additional premium determined on the basis of the amount of the remainder derived by subtracting the total amount of all aggregate basic premiums paid or payable to the Reinsurer under all such contracts from the total amount of all excess aggregate losses paid by the Reinsurer under all such contracts. The amount of the additional premium shall be equal to the product of the Company's aggregate basic premium multiplied:

By a factor of one, if the remainder is less than or equal to the total amount of all aggregate basic premiums under all such contracts;

By a factor of two, if the remainder is greater than the total amount of all aggregate basic premiums under all such contracts, but is less than or equal to twice that amount;

By a factor of three, if the remainder is greater than twice the total amount of all aggregate basic premiums under all such contracts, but is less than or equal to three times that amount; or

By a factor of four, if the remainder is greater than three times the total amount of all aggregate basic premiums under all such contracts.

An advance premium, which shall be an estimated premium only, shall be computed by the Company on the basis of its direct premiums earned in the calendar year 1971 in the manner required for the computation of the aggregate basic premium. If any line of insurance is added during the term of this contract for which the Company had no premium writings in 1971, the premium base for the advance premium shall be estimated by State for the period from the date of attachment of coverage to the expiration date of this contract. In no event shall the advance premium be less than \$25 for each State in which reinsurance is provided under this contract. The advance premium shall be paid to the Reinsurer without demand within 30 days from the effective date of coverage.

At the option of the Reinsurer and prior to adjustment, the Company shall pay the additional premium on an estimated basis. An estimated additional premium payment equal to the amount of the Company's advance premium shall be payable to the Reinsurer if the total amount of all excess aggregate losses paid by the Reinsurer under this contract and all like Standard Reinsurance Contracts issued by the Reinsurer for the period between May 1, 1973, and April 30, 1974, exceeds the total amount of all estimated premiums collected by the Reinsurer under all such contracts (the total amount of all advance premiums plus the total amount of any estimated additional premium payments). The total amount of estimated additional premium payments, whether required separately or concurrently, shall not exceed four times the amount of the Company's advance premium. The actual amount of the additional premium shall subsequently be computed and adjusted in accordance with the provisions of the preceding paragraphs and sec. VII.

With the exception of the advance premium which is due without demand of the Reinsurer within 30 days from the effective date of coverage, premium amounts shall be due 30 days after the demand of the Reinsurer. Interest shall accrue at 6 percent (6%) per annum on any portion of any premium amount which is not received on or before 30 days from its due date.

The aggregate basic premium, together with any additional premium which may be due the Reinsurer in accordance with the preceding paragraphs, shall be deemed fully earned on the date that such reinsurance coverage attaches, except as otherwise provided in sec. VI.

SEC. III. *Assessments.* If any other company (or companies) reinsured by the Reinsurer under a like Standard Reinsurance Contract incurs aggregate losses in reinsured lines in any State during the period of this contract, which in total exceed its net retention for all such lines, and as a result lodges claims against the Reinsurer, then the Company, on demand of the Reinsurer, shall pay to the Reinsurer an assessment sufficient to meet the Company's equitable share of all such excess aggregate losses incurred in the State, but only to the extent that such losses exceed the unused net amount of all reinsurance premiums paid or payable by all reinsured companies into the National Insurance Development Fund for the period from August 1, 1968, through April 30, 1974 (including interest earned thereon), for reinsurance in such State. Such share shall be in the proportion that—

(A) The amount, if any, by which the Company's net retention in lines reinsured hereunder in such State exceeds the Company's aggregate losses in such lines, bears to

(B) The aggregate amount of unabsorbed net retention for all the lines of insurance

of all companies reinsured hereunder in such State.

but such share shall not exceed the amount of the Company's unabsorbed net retention under (A). An assessment will be required only after the termination of coverage provided by this contract.

Sec. IV. *Claims.* The Company shall advise the Reinsurer by letter (A) of all losses from a single occurrence which exceed \$50,000 and (B) whenever it appears that aggregate losses have been incurred in an amount equal to 90 percent (90%) of the Company's net retention in any State, on the basis of its direct premiums earned and reported to the Reinsurer for the calendar year 1971.

When the Company incurs aggregate losses which exceed its net retention in any State, the Company may make claim upon the Reinsurer for the payment of excess aggregate losses in that State by filing a certification of loss and thereafter such supporting documentation of such losses as may be required by the Reinsurer, and following the receipt of such certifications and documentation the Reinsurer shall, as promptly as possible, in such installments and on such conditions as may be determined by the Reinsurer to be appropriate (including advance payments made on the basis of preliminary determinations of loss) pay to the Company the amount of such excess aggregate losses subject to adjustments on account of underpayments or overpayments.

If the ultimate amount of losses to be paid by the Company has not been finally determined when the certification of loss is filed, the Company shall, in due course, file one or more supplementary certifications of loss and thereafter the Reinsurer or the Company, as the case may be, shall pay the balance due.

Claims paid pursuant to computations of net retentions based upon the direct premiums earned for the calendar year 1972 shall be recomputed and adjusted at the termination of the coverage provided by this contract on the basis of direct premiums earned in reinsured lines for the calendar year 1973.

Sec. V. *Inception and expiration dates.* Provided the Company has requested reinsurance by States and lines of coverage on or before April 30, 1973, this Standard Reinsurance Contract shall be in effect from 12:01 a.m. e.s.t. on May 1, 1973, and shall expire at 12:00 p.m. (midnight) e.s.t. on April 30, 1974, unless sooner terminated.

If the Company applies for coverage on or after May 1, 1973, this contract shall be effective from 12:01 a.m. e.s.t. on the day after such application is dispatched, as determined by the date of postmark or telegram, provided the Company requests coverage by State and line and otherwise complies with the eligibility requirements of this contract.

This contract applies only to losses occurring during the term hereof, as follows: (A) If at the inception of this contract any riot or civil disorder is in progress, no coverage shall be provided for losses resulting therefrom unless this contract is a continuation of coverage from the previous year's contract.

(B) If this contract terminates while a riot or civil disorder covered hereby is in progress, no coverage shall be provided for any losses resulting therefrom which occur after the date and time of termination of this contract.

Sec. VI. *Cancellations.* Reinsurance under this contract may be canceled by the Company in its entirety or with respect to any State upon written notice by the Company to the Reinsurer stating that it desires to cancel the reinsurance coverage specified and that it will pay any premium due the Reinsurer in accordance with the provisions of this con-

tract, subject to any adjustments which may be required under sec. VII; provided, however, that no coverage shall attach under this contract if the Company has wilfully concealed or misrepresented any material fact with respect thereto.

Reinsurance under this contract may be canceled by the Reinsurer in its entirety or with respect to any State upon 30 days written notice to the Company of such cancellation, stating the reasons for cancellation, which shall be limited to one or more of the following grounds: fraud or misrepresentation subsequent to the inception of the contract, nonpayment of premium or any other amount due the Reinsurer, and the grounds set forth in the second paragraph of sec. XII.

Whenever the Reinsurer determines, in his discretion, that any cancellation of reinsurance is involuntary and without fault on the part of the Company, the premium due the Reinsurer for the coverage afforded under this contract shall be prorated in the ratio of—

(A) The number of days for which coverage was provided prior to the cancellation of such coverage plus thirty, to

(B) The total number of days of coverage provided under this contract from the inception of coverage up to and including April 30, 1974.

In the event of any cancellation of reinsurance coverage under this section, the net retention and assessment of such Company shall be computed, without proration, on the basis of the direct premiums earned for the calendar year 1973. Refunds of premiums, if any, due the Company upon cancellation may, at the discretion of the Reinsurer, be deferred until after final adjustments have been made in accordance with the provisions of sec. VII hereof.

Sec. VII. *Adjustments.* The Company shall report to the Reinsurer within 60 days after request its direct premiums earned for the calendar year 1973 in all reinsured lines in all States for which reinsurance was provided under this contract, for the purpose of computing and adjusting the reinsurance premium due to the Reinsurer with respect to the coverage provided. The direct premiums earned to be reported for any line of insurance added during the contract term for any State in which the Company had no premium writings in such line in 1973 shall be the direct premiums earned for the first four months of 1974 as estimated by the Company, subject to audit by the Reinsurer.

In no event shall the adjusted amount of direct premiums earned by the Company result in a basic premium to the Reinsurer in an amount less than \$25 for each State during the contract year, which shall constitute the minimum adjusted reinsurance premium for any State under this contract.

On or before July 31, 1974, or such later date as may be permitted at the option of the Reinsurer, the Company shall report to the Reinsurer its aggregate losses.

Any overpayment or underpayment between the Reinsurer and the Company shall be adjusted and paid in accordance with the obligations assumed hereinafter.

Sec. VIII. *Insolvency.* In the event of insolvency of the Company the reinsurance under this contract shall be payable by the Reinsurer to the Company or to its liquidator, receiver, or statutory successor on the basis of the liability of the Company under all policies, contracts, or participation shares reinsured without diminution because of the insolvency of the Company.

It is further agreed that the liquidator, receiver, or statutory successor of the Company shall give written notice to the Reinsurer of the pendency of any claim against the Company on the policies, contracts, or participation shares reinsured within a rea-

sonable time after such claim is filed in the insolvency proceeding, and that during the pendency of such claim the Reinsurer may investigate such claim and interpose, at its own expense, in the proceeding where such claim is to be adjudicated, any defense or defenses which may be deemed available to the Company or its liquidator, receiver, or statutory successor. The expense thus incurred by the Reinsurer shall be chargeable, subject to court approval, against the Company as part of the expense of liquidation to the extent of a proportionate share of the benefit which may accrue to the Company solely as a result of the defense undertaken by the Reinsurer.

Sec. IX. *Errors and omissions.* Inadvertent delays, errors, or omissions made in connection with any transaction under this contract shall not relieve either party from any liability which would have attached had such delay, error, or omission not occurred, provided always that such delay, error, or omission is rectified as soon as possible after discovery.

Sec. X. *Restriction of benefits.* No Member of or delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this contract, or to any benefit that may arise therefrom, but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

Sec. XI. *Participation in statewide plans.* No reinsurance shall be offered or effective under this contract in any State unless there is in effect in such State, on the date coverage commences, a continuing statewide plan to make essential property insurance more widely available, and the Company is fully participating in such plan on a risk-bearing basis and is certified by the State Insurance authority as meeting the requirements of this section. Except with respect to its runoff business after ceasing to do business within a State, the Company shall not be eligible for reinsurance under this contract in any State in which it is not engaged in the direct writing of property insurance at the time coverage is requested, or in which it is writing business on a nonadmitted basis, unless it reports such nonadmitted business to the State Insurance authority and participates in the statewide plan of such State on the basis of such reported business. The Company shall file and maintain with the State Insurance authority in each State in which it is participating in the statewide plan a statement pledging its full participation and cooperation in carrying out the plan and shall file a copy of each such statement with the Reinsurer. The Company shall not direct any agent, broker, or other producer not to solicit business through such plans and shall not penalize in any way any agent, broker, or other producer for submitting applications for insurance under such plans. The Company shall also establish and carry out an education and public information program to encourage agents, brokers, and other producers to utilize the programs and facilities available under such statewide plans.

In the event that the Company after the inception of this contract voluntarily withdraws from any State plan, pool, or other facility required by the provisions of this section, such withdrawal shall be deemed to constitute cancellation by the Company with respect to that State as of the effective date of the withdrawal.

Sec. XII. *Limitations on reinsurance.* Reinsurance hereunder shall not be applicable to insurance policies subsequently written in a State by the Company after the close of the second full regular session of the appropriate State legislative body following August 1, 1968, if the State has not enacted legislation to reimburse the Reinsurer, as necessary, for

the portion of the aggregate losses specified in section 1223(a)(1) of the National Housing Act, as amended (12 U.S.C. 1749bbb-9(a)), paid by the Reinsurer under this contract.

The Reinsurer shall cancel coverage, in accordance with the provisions of this contract, with respect to any State in which—

(A) the Reinsurer has found (after consultation with the State Insurance authority) that (1) it is necessary to have a suitable program adopted, in addition to required statewide plans, to make essential property insurance available without regard to environmental hazards and that such a program has not been adopted; or (2) the Company is not fully participating in the statewide plan; and, where it exists, in a State pool or other facility; and, where it exists, in any other program found necessary to make essential property insurance more readily available in the State; or

(B) following a merger, acquisition, consolidation, or reorganization involving the Company and one or more insurers with or without such reinsurance, the surviving insurer does not meet all criteria or eligibility for reinsurance and within 10 days pay any reinsurance premiums due; or

(C) the Reinsurer has found (after consultation with the State Insurance authority) that a statewide plan is not complying with the Reinsurer's statutory or regulatory criteria or has become inoperative.

Notwithstanding the foregoing provisions, reinsurance may at the election of the Company be continued, up to and including April 30, 1974, for the term of such policies and contracts reinsured prior to the date of termination of reinsurance under this section, provided the Company pays the reinsurance premiums in such amounts as may be required. For the purposes of this section, the renewal, extension, modification, or other change in a policy or contract for which any additional premium is charged, shall be deemed to be a policy or contract written on the date such change was made.

Reinsurance under this contract shall be subject to all of the provisions of the Urban Property Protection and Reinsurance Act of 1968, 12 U.S.C. 1749bbb-1749bbb-21, as amended, and to all regulations duly promulgated by the Reinsurer pursuant thereto prior to the inception of any particular coverage provided under this contract.

Sec. XIII. *Arbitration.* If any misunderstanding or dispute arises between the Company and the Reinsurer with reference to the amount of premium due, the amount of loss, or to any other factual issue under any provision of this contract, other than as to legal liability or interpretation of law, such misunderstanding or dispute may be submitted to arbitration for a determination which shall be binding only upon approval by the Reinsurer. The Company and the Reinsurer may agree on and appoint an arbitrator who shall investigate the subject of the misunderstanding or dispute and make his determination. If the Company and the Reinsurer cannot agree on the appointment of an arbitrator, then two arbitrators shall be appointed, one to be chosen by the Company and one by the Reinsurer.

The two arbitrators so chosen, if they are unable to reach an agreement, shall select a third arbitrator who shall act as umpire, and such umpire's determination shall become final only upon approval by the Reinsurer. The Company and the Reinsurer shall bear equally all expenses of the arbitration.

Findings, proposed awards, and determinations resulting from arbitration proceedings carried out under this section shall, upon objection by the Reinsurer or the Company, be inadmissible as evidence in any subsequent proceedings in any court of competent jurisdiction.

Sec. XIV. *Access to books and records.* The Reinsurer and the Comptroller General of the United States, or their duly authorized representatives, shall have access for the purpose of investigation, audit, and examination to any books, documents, papers, and records of the Company that are pertinent to the business reinsured under this contract. Such audits shall be conducted to the maximum extent feasible in cooperation with the State Insurance authorities and through the use of their examining facilities. The Company shall keep records which fully disclose all matters pertinent to the business reinsured, including premiums and claims paid or payable under this contract. Records relating to premiums shall be retained and available for three (3) years after final adjustment of premiums, and to reinsurance claims three (3) years after final adjustment of such claims.

Sec. XV. *Information and annual statements.* The Company shall furnish to the Reinsurer such summaries and analyses of information in its records as may be necessary to carry out the purposes of the Urban Property Protection and Reinsurance Act of 1968, as amended, in such form as the Reinsurer, in cooperation with the State Insurance authority, shall prescribe; and the Company shall file with the Reinsurer a true and correct copy of the Company's Fire and Casualty annual statement, or amendment thereof, as filed with the State Insurance authority of the Company's domiciliary State, at the time it files such statement or amendment with the State Insurance authority. The Company shall also file with the Reinsurer an equivalent of page 14 of such annual statement for each State in which reinsurance is provided under this contract.

Sec. XVI. *Exclusions.* Reinsurance under this contract shall not be applicable with respect to any claim for:

(A) All or any part of a loss which is the direct or indirect result of controlled or uncontrolled nuclear reaction, radiation, or radioactive contamination; or

(B) Any loss to any aircraft while the aircraft is in flight, including the period between the time when power is turned on for the purpose of taxiing connected to take-off until the time when the landing run has ended, taxiing has been completed, and power has been turned off; or

(C) Any loss to any aircraft, or resulting from collision with aircraft, which is precipitated or caused by hijacking of any aircraft or attempt thereof, including loss from wrongful seizure, wrongful diversion from course or flight pattern, or wrongful exercise of command or control, of an aircraft, by any person or persons, through the use of force or violence or the threat of force or violence.

Sec. XVII. *Definitions.* As used in this contract the term—

(1) "aggregate losses" means the sum total of losses resulting from riots or civil disorders occurring in a State and allocable to a State in which reinsurance is provided;

(2) "Company" means any company authorized to engage in the insurance business under the laws of any State, except that if there are two or more companies within a State in which reinsurance is to be provided under this contract which, as determined by the Reinsurer:

(A) are under common ownership and ordinarily operate on a group basis; or

(B) are under single management direction; or

(C) are otherwise determined by the Reinsurer to have substantially common or interrelated ownership, direction, management, or control;

then all such related, associated, or affiliated companies, excluding nonadmitted com-

panies which are not specifically included by endorsement to this contract, shall be reinsured only as one aggregate entity;

(3) "Continuing organization, pool, or association of insurers" means an industry pool created to provide direct insurance to meet special problems of insurability, such as for a particular class or type of business;

(4) "Direct premiums earned" means direct premiums earned as reported in column 2 on page 14 of the Company's Fire and Casualty annual statement for the specified calendar year, in the form adopted by the National Association of Insurance Commissioners, subject to (A) adjustment as approved by the Reinsurer for cessions to pools, facilities, and associations, and for the inclusion of participations in such pools, facilities, and associations, and (B) such other appropriate adjustments as may be approved or required by the Reinsurer, which shall include adjustments for dividends paid or credited to policyholders and reported in column 3 on page 14, subject to a maximum credit of 20 percent (20%) of direct premiums earned for any one line of insurance;

(5) "Excess aggregate losses" means that part of aggregate losses which is equal to the sum of—

(A) Ninety percent of the Company's aggregate losses in excess of its net retention, until the Company's 10 percent share of aggregate losses under this provision (A) equals the amount of its net retention;

(B) Ninety-five percent of the Company's remaining aggregate losses (after deducting the Reinsurer's share of aggregate losses under (A)) in excess of twice its net retention, until the Company's 5 percent share of aggregate losses under this provision (B) equals the amount of its net retention; and

(C) Ninety-eight percent of the Company's remaining aggregate losses (after deducting the Reinsurer's share of aggregate losses under (A) and (B)) in excess of an amount equal to three times its net retention;

(6) "Losses" means all claims proved, approved, and paid by the Company under reinsured policies, resulting from riots or civil disorders occurring in a State during the period of this contract, after making proper deduction for salvage and for recoveries other than reinsurance, together with an allowance for expense in connection therewith, hereby agreed to equal an amount per claim of 8 percent (8%) of the first \$25,000 of any such claim, plus 3 percent (3%) of the amount by which such claim exceeds \$25,000 but is less than \$100,000, plus 1 percent (1%) of the amount by which the claim exceeds \$100,000; it does not mean any claim excluded under sec. XVI;

(7) "Net retention" means the amount of aggregate losses that the Company must stand before the Reinsurer's liability hereunder attaches and shall be one aggregate figure for each State which shall be the larger of either \$1,000 or the amount determined by applying a factor of 2½ percent (2½%) to the specified percentage of the Company's direct premiums earned in the State for the calendar year 1972 on those lines of insurance hereby reinsured;

(8) "Riot" means:

(A) Any tumultuous disturbance of the public peace by three or more persons mutually assisting one another, or otherwise acting in concert, in the execution of a common purpose by the unlawful use of force and violence resulting in property damage of any kind;

(B) Any pattern of unlawful incidents taking place within close proximity as to time and place and involving property damage intentionally caused by persons apparently having civil disruption, civil disobedience, or civil protest as a primary motivation, at least two of which incidents result

in property damage in excess of \$1,000 each; or

(C) Any occurrence of property damage in excess of \$2,000 caused by persons whose unlawful conduct in causing the occurrence clearly manifests their primary purpose of civil disruption, civil disobedience, or civil protest;

(9) "Specified percentage" means 100 percent (100%) of the direct premiums earned for each line of insurance reinsured under this contract, except that the specified percentage of Homeowners multiple peril shall be 85 percent (85%) and that of Commercial multiple peril shall be 65 percent (65%);

(10) "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the territories and possessions, and the Trust Territory of the Pacific Islands; and

(11) "State pool" means any State Fair Plan pool or insurance placement facility which is intended to meet the requirements of Part A of the Urban Property Protection and Reinsurance Act of 1969 (82 Stat. 558, 84 Stat. 1791, 12 U.S.C. 1749bbb-3-1749bbb-6a).

Sec. XVIII. *Schedule of coverages.* The Company shall indicate with an (X) in the appropriate column and line those States in which the mandatory lines are to be reinsured under this contract. Coverage of mandatory lines may be designated only for those States in which the Company is eligible for reinsurance in accordance with sec. XI of this contract.

The Company shall also indicate by State with an (X) in the appropriate column and line any optional lines which are to be reinsured under this contract. Coverage of optional lines is available only for those States in which the mandatory lines are reinsured. [The schedule of mandatory and optional coverages by State and line is set forth at this point in the Contract.]

*Effective date.* This Notice of Offer shall be effective on March 28, 1973.

#### CIVIL AERONAUTICS BOARD

[Docket No. 25346; Order 73-3-89]

#### RAMAR AIR FREIGHT CORP.

##### Order of Suspension and Investigation

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 23d day of March 1973.

By tariff revisions filed February 22, and marked to become effective March 24, 1973, Ramar Air Freight Corp. (Ramar), an air freight forwarder, proposes, inter alia, to increase excess valuation charges from 20 to 30 cents per \$100 of excess valuation applicable to that portion of the shipper's declared value in excess of 50 cents per pound or \$50 per shipment, whichever is higher, and lower the time allowed for filing a formal claim in all cases except claims for loss from approximately 9 months to as little as 7 days.

In support of its filing, the forwarder asserts that it is "Updating Ramar's rules and regulations to reflect current direct carriers provisions."

Upon consideration of all relevant matters, the Board finds that Ramar's proposals may be unjust, unreasonable,

unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that these revisions should be suspended pending investigation.

In support of its proposed increase in excess value charges, Ramar makes no showing that existing revenues from such charges do not cover the claim expenses incurred in connection with excess value shipments. Our conclusion, in this case, is consistent with the Board's decision as a result of an investigation in "Increased excess value charge proposed by Imperial Air Freight Service, Inc.", Docket 23538, wherein increase from 15 to 25 cents per \$100 was found unlawful on the ground that "(Imperial) failed to submit the necessary data upon which to establish the relationship between excess valuation revenues and costs." Also, the proposed rate of 30 cents per \$100 is significantly above the current rates of 15-20 cents of most forwarders and 10-15 cents of the airlines.

Direct carriers and most major forwarders, including Ramar, provide approximately 9 months for the filing of all formal claims, and a 15-day time limit for initially reporting concealed loss and damage claims. Ramar's proposal does not require initial reporting, but provides time limits for filing formal claims of 7 days for damage claims and 14 days for delay claims. The Board, by Order 71-7-87, inter alia, suspended a proposal by Midland Forwarding Corporation doing business as ABC Air Freight, another forwarder, to reduce the time limit for reporting concealed loss and damage claims from 12 to 7 days on the ground that such time limit was more stringent than the time limits currently in effect for the direct carriers and the majority of other forwarders.

Our action is consistent with the aforementioned order in that Ramar's proposed time limits for formal filing appear unreasonably short compared with other carriers and would have the effect of denying shippers the right to claim damages that might otherwise be legitimate and reasonable.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a) and 1002 thereof,

It is ordered, That:

1. An investigation be instituted to determine whether the charges and provisions in Rule No. 15(E)(2) on original page 6 and the provisions in Rule No. 60(A) on original page 13 and original page 14 of Ramar Air Freight Corp.'s CAB No. 3 and rules, regulations or practices affecting such charges and provisions are, or will be unjust, unreasonable, unjustly discriminatory, unduly prefer-

<sup>1</sup> Orders 72-4-141/142, dated Apr. 26, 1972.

<sup>2</sup> The Board is suspending this entire rule (although Ramar's proposed 270-day time limit for filing formal claims for loss is generally less stringent than its current provisions and similar to those of other forwarders and direct carriers) since the tariff does not lend itself to partial suspension of this rule.

ential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful charges and provisions, and rules, regulations, or practices affecting such charges and provisions;

2. Pending hearing and decision by the Board, the charges and provisions in Rule No. 15(E)(2) on original page 6 and the provisions in Rule No. 60(A) on original page 13 and original page 14 of Ramar Air Freight Corp.'s CAB No. 3 are suspended and their use deferred to and including June 21, 1973, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension, except by order or special permission of the Board;

3. The proceeding herein designated Docket No. 25346 be assigned for hearing before an Administrative Law Judge of the Board at a time and place hereafter to be designated; and

4. Copies of this order shall be filed with the tariff and served upon Ramar Air Freight Corp., which is hereby made party to Docket No. 25346.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

#### COST OF LIVING COUNCIL FOOD INDUSTRY WAGE AND SALARY COMMITTEE

##### Notice of Meetings

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 779) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212(f) of the Economic Stabilization Act, as amended, section 4(a)(iv) of Executive Order 11695 and Cost of Living Council Order No. 14, will meet at 10 a.m., Wednesday, March 28, 1973, and every Wednesday thereafter until further notice, in the main Conference Room of the Cost of Living Council, Seventh Floor, 2000 M Street NW., Washington, DC.

The Food Industry Wage and Salary Committee will be holding these meetings to perform five basic functions:

1. Review all remaining food industry wage and salary cases filed before January 11, 1973, and advise on the disposition of these cases under Phase II Regulations.
2. Review all new food industry wage and salary cases filed since January 11, 1973, and advise on the disposition of these cases under existing regulations.
3. Advise the Cost of Living Council and the Labor-Management Advisory Committee relative to any wage stabilization policies which are necessary to meet the special problems of the food industry (and its various branches) within the general framework of wage stabilization policies.
4. Cooperate with labor and management organizations in the food industry which operate under collective bargaining agreements and with appropriate government agencies to facilitate the settlement of disputes in 1973 within stabilization policies and to encourage longer-run dispute settlement machinery and procedures.
5. Work with labor and management organizations in the food industry under collective bargaining agreements to improve the structure and performance of collective bargaining in the industry.

The Director of the Cost of Living Council has determined that the meeting to be held on March 28, 1973, will consist of exchanges of opinions, that the dis-

cussions, if written, would fall within exemption (5) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on March 27, 1973.

JAMES W. McLANE,  
Deputy Director,  
Cost of Living Council.

#### FEDERAL COMMUNICATIONS COMMISSION

#### NATIONAL INDUSTRY ADVISORY COMMITTEE BROADCAST SERVICES SUBCOMMITTEE

##### Notice of Meeting

MARCH 22, 1973.

Pursuant to the provisions of Public Law 92-463, announcement is made of a public meeting of Working Group IV, Broadcast Services Subcommittee, National Industry Advisory Committee, to be held Wednesday, April 11, 1973. The Working Group will meet at 1229 20th Street NW., Washington, DC, Room A-205 at 10 a.m.

*Purpose.* To prepare and submit recommendations to the Federal Communications Commission concerning voluntary organized industry participation in the Emergency Broadcast System (EBS).

*Agenda.* The agenda for the meeting is, as follows:

ITEM

1. Review of text of Emergency Action Notification messages.
2. Review of television slide requirements.
3. Review of provisions of FCC rules and Annex VI of Basic EBS Plan.
4. Preparation of scripts for all Closed Circuit Tests by a Drafting Group for Working Group IV.
5. Appointment of a Drafting Group for Working Group IV.

It is suggested that those desiring more specific information about the meeting telephone the Emergency Communications Division (202) 632-7232.

FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-5914 Filed 3-27-73; 8:45 am]

#### STEERING COMMITTEE OF THE FEDERAL/STATE-LOCAL ADVISORY COMMITTEE

##### Meetings Scheduled

MARCH 23, 1973.

The Steering Committee of the Cable Television Federal/State-Local Advisory Committee will hold open meetings on April 5 and 6, 1973. The meeting on April 5 will begin at 10 a.m. and the meeting on April 6 will begin at 9:30 a.m. The meetings will be held in the Silver

Room of the Denver Hilton Hotel, Denver, Colo.

The agenda for these meetings will be the continuation of a discussion of issues to be included in the final Advisory Committee report.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-5915 Filed 3-27-73; 8:45 am]

#### STEERING COMMITTEE OF THE TECHNICAL ADVISORY COMMITTEE

##### Meeting Scheduled

MARCH 21, 1973.

The Steering Committee of the Cable Television Technical Advisory Committee will hold an open meeting on April 3, 1973. The meeting will begin at 10 a.m. and will be held in Room A110 of the FCC Annex, 1229 20th Street, Washington, D.C.

The agenda for the meeting will be a discussion of outside funding to be provided for the committee, the mechanics of soliciting and properly controlling such funds, and necessary support facilities and budget requirements.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[Docket No. 19664; FCC 73R-122]

#### UNITED BROADCASTING CO. OF FLORIDA, INC.

##### Memorandum Opinion and Order Enlarging Issues

In regard application of United Broadcasting Co. of Florida, Inc., Docket No. 19664, File No. BR-4447; for renewal of license for Radio Station WFAB, Miami, Fla.

1. The above-captioned application was designated for hearing by Commission Order FCC 72-1195, released January 2, 1973 and published at 38 FR 1232, January 10, 1973. That order included issues which sought to determine whether United Broadcasting Co. of Florida, Inc. was qualified to continue as licensee of this Commission because of certain operating practices during the past licensed period. United has now filed a petition to enlarge the issues to permit it to show the meritorious aspects of the station's past operation. There have been no oppositions filed. The petition to enlarge issues will be granted. It is well settled that where a hearing involves issues concerning the past operation of the broadcasting station, the licensee will be permitted to show the meritorious aspects of its operation prior to the time it was put on notice that its qualifications were in question. Lum A. Humphries, trading as Wagoner Radio, 12 FCC 2d 978, 13 RR 2d 1146 (1968), Chronicle Broadcasting Co., 18 FCC 2d

#### NOTICES

120, 16 RR 2d 494 (1969), and the cases cited therein.

2. Accordingly, it is ordered, That the petition to enlarge issues, filed by United Broadcasting Co. of Florida, Inc., on January 23, 1973, is granted; and

3. It is further ordered, That the issues in this proceeding are enlarged as follows:

To determine whether the past programming of Station WFAB has been meritorious, particularly in regard to public service programs.

4. It is further ordered, That the burden of proceeding with the introduction of evidence and the burden of proof under the issue added herein shall be on the applicant.

Adopted: March 16, 1973.

Released: March 22, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-5916 Filed 3-27-73; 8:45 am]

#### WAIVER OF CABLE TV CROSS-OWNERSHIP DIVESTITURE REQUIREMENT

##### Public Notice of Petitions

MARCH 14, 1973.

The Commission will issue public notices announcing the filing of petitions (pursuant to paragraph 51 of its "Memorandum Opinion and Order in Docket No. 18397," FCC 73-80, released January 31, 1973), for waiver of the cable television cross-ownership divestiture requirements in § 76.501 of its rules. Persons interested in filing comments on, or oppositions to, such a petition will be permitted to do so within 30 days after the issuance of the public notice announcing that the petition has been filed. The petitioner may file reply comments within 20 days after the filing of such comments and oppositions. Other procedural requirements regarding such comments, oppositions, and replies are set forth at § 76.7 of the Commission's rules. Copies of such petitions, and comments, oppositions, and reply comments responsive to them, will be available for examination in the Public Reference Room of the Commission's Cable Television Bureau.

In paragraph 51 of the above-cited order, the Commission—

• • • invite(d) the filing—within 120 days after the issuance of this memorandum opinion and order—of petitions for waiver of the mandatory-divestiture requirement (of § 76.501 of the rules) (fully supported by pertinent facts, views, arguments, and data) from all cross owners et al. of co-located television stations and cable systems who believe that grandfathering would be appropriate in their case.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-5912 Filed 3-27-73; 8:45 am]

#### FEDERAL PREVAILING RATE ADVISORY COMMITTEE

##### PROPOSED PLANS TO IMPLEMENT PAY SYSTEMS FOR FEDERAL PREVAILING RATE EMPLOYEES

##### Notice of Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, April 5, 1973.  
Thursday, April 12, 1973.  
Thursday, April 19, 1973.  
Thursday, April 26, 1973.

The meetings will convene at 10 a.m. and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, DC.

The Committee's primary responsibility is to study the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the Committee will consider proposed plans for implementation of Public Law 92-392, which law established pay systems for Federal prevailing rate employees.

The meetings will be closed to the public under a determination to do so, made under the provisions of section 10(d) of Public Law 92-463.

However, members of the public who may wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Federal Prevailing Rate Advisory Committee, Room 5451, 1900 E Street NW., Washington, DC.

DAVID T. ROADLEY,  
Chairman, Federal Prevailing Rate  
Advisory Committee.

# **CANTON COMPANY OF BALTIMORE AND SEA-LAND SERVICE, INC.** **Notice of Agreement Filed**

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before April 17, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:  
Raymond S. Clark, President, Canton Company of Baltimore, Canton House, 300 Water Street, Baltimore, MD 21203.

Agreement No. T-2757, between Canton Company of Baltimore (Canton) and Sea-Land Service, Inc. (Sea-Land), provides for the 19-year lease to Sea-Land of approximately 5 acres of improved land area for use in connection with its activities at the port. As compensation, Canton is to receive \$42,611.40 annually.

Dated: March 20, 1973.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,  
Secretary.

[FR Doc 73-5807 Filed 3-27-73; 8:45 am]

# **CITY OF OAKLAND AND UNITED STATES LINES, INC.** **Notice of Agreements Filed**

Notice is hereby given that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 17, 1973. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:  
J. Kerwin Rooney, Port Attorney, Port of Oakland, 66 Jack London Square, Post Office Box 2064, Oakland, Calif. 94607.

Agreement No. T-2758, between the city of Oakland (City) and United States Lines, Inc. (USL), provides for the 25-year preferential assignment to USL of approximately 20 acres (including 86,754 square feet of wharf area and 79,524 square feet of berth area) of improved premises located at the City's Middle Harbor Terminal, for use in connection with USL's operations at the port. The City retains secondary use rights to the facility. As compensation, City is to receive all tariff charges applicable to USL's operations at the facility (exclusive of crane rental or crane maintenance).

## NOTICES

nance charges), subject to an annual minimum of \$500,000 and an annual maximum of \$692,000. Should USL exceed the annual minimum, 50 percent of all secondary use revenues received by the port will apply to meet USL's maximum. Should the above combination of compensation exceed USL's maximum, no further tariff charges will be paid. In the event that the cost of improvements to the facility exceeds \$3,719, USL's compensation will be adjusted accordingly. Agreement No. T-2758 also provides for USL options on Areas "B" (consisting of approximately 8 acres, including 86,520 square feet of wharf area and 79,310 square feet of berth area) and "C" (consisting of approximately 7 acres), exercisable between the fifth and eighth years of the agreement's term. In the event these options are exercised, USL's compensation will be adjusted accordingly.

Agreement No. T-2758-A, also between the City and USL, provides for the City's purchase from USL of two container cranes for installation on the facility assigned to USL under Agreement No. T-2758. The purchase price of the cranes will be \$3,200,000.

Agreement No. T-2758-B, also between the City and USL, provides for the lease to USL of the two cranes purchased from it under the terms of Agreement No. T-2758-A, above, for the purpose of servicing its vessels. The term of T-2758-B is to run concurrently with that of T-2758. As compensation, the City is to receive \$1 annually. Under this agreement, as in Agreement No. T-2758, the City retains secondary use rights.

Agreement No. T-2758-C, also between the City and USL, provides for the lease to USL of certain office facilities adjacent to the facility assigned to USL under Agreement No. T-2758 for a term running concurrently with that of Agreement No. T-2758. As compensation, the City is to receive \$15,155.04 annually, renegotiable after every 5-year period of the term.

Dated: March 20, 1973.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,  
Secretary.

[Docket No. 72-35]

#### PACIFIC WESTBOUND CONFERENCE

##### Amendment to Order of Investigation of Rates, Rules, and Practices Pertaining to the Movement of Wastepaper and Woodpulp

Pursuant to section 102(2) (c) of the National Environmental Policy Act of 1969, Public Law 91-190, the Federal Maritime Commission prepared a draft environmental impact statement with regard to subject proceeding. By notice of December 13, 1972, the Commission has made that statement available, and has invited interested persons to submit comments on or before January 15, 1973. Having received such comments:

It is further ordered, That all commentators make themselves available, if requested, for cross-examination in accordance with the Commission's rules of practice and procedure (46 CFR Part 502 et seq.) as may be directed by the Presiding Administrative Law Judge;

It is further ordered, That the parties of record direct themselves to the issues raised by the draft environmental impact statement;

It is further ordered, That any commentator, who does not make himself available for cross-examination if so requested by the Presiding Administrative Law Judge, will have his comments removed from the record;

It is further ordered, That the Presiding Administrative Law Judge include, as a separate and distinct portion of his initial decision, findings of fact and conclusions of law pertaining to the issues raised by the draft environmental impact statement.

By the Commission.

[SEAL] FRANCIS C. HURNEY,  
Secretary.

[FR Doc. 73-5815 Filed 3-27-73; 8:45 am]

A copy of any such statement should also be forwarded to the party filing the

agreement (as indicated hereinafter) and the statement should indicate that this has been done.

##### Notice of agreement filed by:

Milton A. Mowat, Manager, Regulatory Affairs, Port of Portland, Box 3529, Portland, OR 97208.

Agreement No. T-2765, between the Port of Portland (Port) and Handcor, Inc. (a corporation comprised of Jones Oregon Stevedoring Co.; Brady Hamilton Stevedoring Co.; Portland Stevedoring Co.; and Western Stevedoring & Terminal Corp.) (Handcor), is a memorandum of understanding under which Handcor will perform the services of stuffing and unstuffing all containers and the boarding and debarking of all general cargo at the Port's Terminal No. 2. On all containers formerly stuffed or unstuffed by the Port, Handcor will assess rates appearing in the Port's present container Tariff No. 1, minus the applicable service and facilities charge specified under the Port's present Tariff No. 3-A. The agreement also provides that, on all container and general cargo handled by Handcor for persons other than the Port, Handcor will assess its customers directly, on an equal and nondiscriminatory basis. The Port will assign coordinating personnel to Terminal No. 2 to keep Handcor informed as to the needs of the Port on a day-to-day basis as well as to direct the movement of containers between the container yard and stuffing area. The term of the agreement is to be initially for 90 days, terminable thereafter by either party upon 30 days' prior written notice to the other.

Dated: March 22, 1973.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,  
Secretary.

#### UNITED STATES GULF/PERU SOUTHBOUND POOLING AGREEMENT

##### Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before April 9, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination

## NOTICES

or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

**Notice of agreement filed by:**

Lloyd F. Dolese, Lykes Bros. Steamship Co., Inc., Lykes Center, 300 Poydras Street, New Orleans, LA 70130.

Agreement No. 10044, between Compania Peruana De Vapores (CPV) and Lykes Bros. Steamship Co., Inc., provides for the establishment of a pooling, sailing, and equal access to government-controlled cargo arrangement for the apportionment of freight revenues on all cargo, with certain specified exceptions, transported by the parties from U.S. ports in the Gulf of Mexico to ports in Peru, including Peruvian cargo transhipped at non-Peruvian ports. The intent is that the lines will equally participate in the cargo revenues generated by both of them when operating within the scope of the agreement.

The parties will each maintain a minimum of 13 sailings per calendar year subject to conditions of force majeure. Sailings for a period of less than a calendar year will be on a pro rata basis.

Provisions with respect to adjustments in the event of sailing and space deficiencies, and pool accounting and settlement are set forth in the agreement. Lykes Bros. Steamship Co., Inc., shall be accorded the status of a Peruvian flag line with respect to the carriage of south-bound cargo in the foreign commerce of Peru. Lykes Bros. Steamship Co., Inc., will support applications for waivers which shall place Peruvian flag vessels of Compania Peruana De Vapores on a basis of equal opportunity with Lykes Bros. Steamship Co., Inc. vessels with respect to the carriage of government-controlled cargo.

Agreement No. 10044 will, upon approval, cancel and supersede Agreement No. 9865, and shall remain in effect for 2 years unless earlier canceled as provided therein.

Dated: March 21, 1973.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,  
Secretary.

**FEDERAL POWER COMMISSION**

**NATIONAL POWER SURVEY; TECHNICAL ADVISORY COMMITTEE ON FUELS TASK FORCE ON ENVIRONMENTAL CONSIDERATIONS AND CONSTRAINTS**

**Agenda and Notice for Meeting**

Meeting to be held at the Federal Power Commission Offices, 1425 K Street

NW., Washington, DC, 9:30 a.m., April 5, 1973, Room 785.

1. Meeting called to order by FPC Coordinating Representative.

2. Objectives and purposes of meeting.

A. Approval of minutes of March 15, 1973, meeting.

B. Discuss progress of assignments given.

C. Discuss preparation of draft reports.

D. Other business.

E. Date for next meeting.

3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

KENNETH F. PLUMB,  
Secretary.

**NATIONAL POWER SURVEY; TECHNICAL ADVISORY COMMITTEE ON RESEARCH AND DEVELOPMENT TASK FORCE—ENERGY DISTRIBUTION RESEARCH**

**Agenda and Notice for Meeting**

Meeting to be held at the Federal Power Commission Offices, 441 G Street NW., Washington, DC, 10 a.m., April 2, 1973, Room 2043.

1. Meeting called to order by FPC Coordinating Representative.

2. Objectives and purposes of meeting.

A. Approve minutes of March 7, 1973.

B. Review previous work.

C. Report on Task Force Project Assignments.

D. Other business.

E. Schedule date of next meeting.

3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the Task Force.

KENNETH F. PLUMB,  
Secretary.

**NATIONAL POWER SURVEY; TECHNICAL ADVISORY COMMITTEE ON FUELS TASK FORCE ON UTILITY FUELS REQUIREMENTS**

**Agenda and Notice for Meeting**

Meeting to be held at the Federal Power Commission Offices, 1425 K Street NW., Washington, DC, April 6, 1973, 9:30 a.m. e.s.t., Room 785.

1. Meeting called to order by FPC Coordinating Representative.

2. Objectives and purposes of meeting.

A. Approval of minutes of February 15, 1973, meeting.

B. Further discussion of basic assumptions and additional source materials needed for completion of draft reports.

C. Preliminary reports on assignments made at previous meeting:

(1) Coal—Mr. DeCarlo.

(2) Gas—Mr. Hodson.

(3) Oil—Mr. Deloney.  
(4) Nuclear—Mr. Goodwin.  
D. Time schedule for completion of study projects.

E. Other business.  
F. Dates for future meetings.

3. Adjournment.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at the time and in the manner permitted by the committee.

[Docket No. E-8071]

**ARKANSAS POWER & LIGHT CO.**

**Filing of Initial Rate Schedule**

MARCH 22, 1973.

Take notice that Arkansas Power & Light Co. (Arkansas Power) on March 8, 1973, tendered for filing an initial Power Service Agreement between the City Water and Light Plant of the City of Jonesboro, Ark. (Jonesboro), and Arkansas Power, to become effective June 1, 1973. Copies of the filing were served on Arkansas Power and the Arkansas Public Service Commission.

The filing is described in the letter of transmittal as follows:

The aforementioned agreement is for a term of at least 7 years, beginning on or about June 1, 1973, and provides for an initial block of at least 5,000 kw. in 1973 and up to a maximum of 50,000 kw. during the term of the agreement. The City Water and Light Plant of Jonesboro, Ark., is not now served by Arkansas Power & Light Co. and there is no interconnection between their respective systems. The city electric system has need of additional firm capacity and energy to supplement its own generation and other sources of firm power supply in order to adequately supply the city's customers.

The rates and charges provided for in the aforementioned agreement were arrived at through negotiations with the City Water and Light Plant of Jonesboro, and they are designed to produce a return approximately equal to the company's overall rate of return.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 12, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 73-5887 Filed 3-27-73; 8:45 am]

[Docket No. E-8078]

**BUCKEYE POWER, INC.**

**Notice of Application**

MARCH 20, 1973.

Take notice that on March 14, 1973, Buckeye Power, Inc. (Applicant), of Columbus, Ohio, filed an application seeking an order for approval of the issuance of short-term obligations in the form of promissory notes to commercial banks, such notes to be issued on or before December 31, 1973, with a final maturity date of not later than December 30, 1974.

The net proceeds from the notes will be used to provide general funds for the company's construction program.

Any person desiring to be heard or to make any protest with reference to such application should on or before April 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 73-5876 Filed 3-27-73; 8:45 am]

[Docket No. C173-578]

**CAR-TEX PRODUCING CO.**

**Notice of Application**

MARCH 20, 1973.

Take notice that on February 28, 1973, Car-Tex Producing Co. (Applicant), Post Office Box 655, Carthage, TX 75633, filed in Docket No. C173-578 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the sale of natural gas to Arkansas Louisiana Gas Co. from production in the Carthage Field, Panola and Harrison Counties, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the volumes of casinghead gas available from the producer thereof, Hurley Petroleum Corp., have declined below economic limits for Applicant's type of operation. Hurley Petroleum Corp. filed an application pursuant to section 7(b) of the Natural Gas Act in Docket No. C173-431 for permission and approval to abandon its sale to Applicant, commenced a sale of natural gas to Texas Eastern Transmission Corp. within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) on February 19, 1973, and proposes in Docket No. C173-558 to continue the latter sale within the

## NOTICES

contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP73-236]

**C. B. GAS GATHERING CO.**

**Notice of Application**

MARCH 22, 1973.

Take notice that on March 16, 1973, C. B. Gas Gathering Co. (Applicant), Post Office Box 1873, Corpus Christi TX 78403, filed in Docket No. CP73-236 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Natural Gas Pipeline Co. of America from the Willamar Field, Willacy County, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 12,000 Mcf of gas per day for 2 years commencing on or after May 15, 1973, at 45 cents per Mcf at 14.65 p.s.i.a., subject to upward and downward B.t.u. adjustment, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

Any person desiring to be heard or to make any protest with reference to said application should on or before April 16, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if not petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[Project 2530]

**CENTRAL MAINE POWER CO.**

**Application for Change in Land Rights**

MARCH 22, 1973.

Public notice is hereby given pursuant to section 4(e) of the Federal Power Act (16 U.S.C. 791a-825r) that an application for a change in land rights was filed on December 21, 1972, by Central Maine Power Co. (Correspondence to: Mr. Seward B. Brewster, Secretary, Central Maine Power Co., 9 Green Street, Augusta, ME 04330) Licensee for Project No. 2530, known as the Hiram Project, located on the Saco River in the towns of Hiram Baldwin, Brownfield, and Denmark, in the counties of Cumberland and Oxford, Maine.

Applicant proposes to lease for 1 year and thereafter from year to year approximately 1.5 acres of project lands to the towns of Hiram to provide recreational facilities for its residents and others. The land to be leased is situated north of Hiram Dam on the west shore of the Saco River. The land is about 1,600 feet long and varies in width from 20 to 125 feet, and is bordered by the road leading from Hiram to Cornish and the Saco River.

The town proposes to erect two open wood-frame picnic shelters with picnic tables and plans to develop a small boat and canoe landing to allow public access to the Saco River from the Hiram-Cornish Road.

Any person desiring to be heard or to make protest with reference to said application should on or before May 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

#### CONNECTICUT LIGHT & POWER CO.

##### Further Extension of Time and Postponement of Hearing; Correction

MARCH 2, 1973.

In the notice issued February 28, 1973, and published in the FEDERAL REGISTER March 7, 1973 (38 FR 6228): Hearing Date, next to last line, change "May 5, 1973" to "May 8, 1973."

KENNETH F. PLUMB,  
Secretary.

[FR Doc.73-5878 Filed 3-27-73; 8:45 am]

#### NOTICES

[Project 2485]

#### THE CONNECTICUT LIGHT & POWER CO. ET AL.

##### Application for Extension of Time To Complete Construction

MARCH 21, 1973.

Public notice is hereby given that application was filed on January 26, 1973, under section 13 of the Federal Power Act (16 U.S.C. 791a-825r) by Northeast Utilities Service Co. on behalf of the joint licensees, The Connecticut Light & Power Co., The Hartford Electric Light Co., and Western Massachusetts Electric Co. (Correspondence to: Mr. Walter F. Fee, Vice President-Engineering, Northeast Utilities Service Co., Post Office Box 270, Hartford, CT 06101 for an extension of time to complete construction of Northfield Mountain Project No. 2485 located on the Connecticut River in Franklin County, Mass.

The joint licensees for the Northfield Mountain Project No. 2485 are seeking an 8-month extension of time until December 31, 1973, for completion of construction of project facilities because of an accidental flooding on April 22, 1972, of the major equipment in the project's underground powerhouse. The major equipment installed to that date, including four turbine generators and the main control room circuitry and wiring, were in varying stages of assembly.

Restoration of the equipment has been completed and installation is proceeding on a schedule for in-service dates as follows: Unit No. 1—March 1973; Unit No. 2—May 1973; and Unit No. 3—July 1973. Unit No. 4 went into operation on November 30, 1972.

Article 31 of the license, as modified, requires completion of construction of project works by April 30, 1973. Applicants seek an extension for completion of project works to December 31, 1973, to allow for the possibility of further delays beyond the control of the applicants that may arise during the final installation of equipment and preliminary operations of the project.

Any person desiring to be heard or to make protest with reference to said application should on or before April 30, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.73-5882 Filed 3-27-73; 8:45 am]

[Project 2192]

#### CONSOLIDATED WATER POWER CO.

##### Application for New License

MARCH 21, 1973.

Public notice is hereby given that application was filed on February 10, 1969; revised on February 27, 1970; supplemented on January 4, 1971, February 10, 1971, June 17, 1971, May 8, 1972, and September 5, 1972, under section 15 of the Federal Power Act (16 U.S.C. 791a-825r) by Consolidated Water Power Co. (Correspondence to: Mr. F. E. Hustung, Secretary, Consolidated Water Power Co., Wisconsin Rapids, Wis. 54494) for a new license for constructed Project No. 2192, known as the Biron Hydro Project, located on the Wisconsin River in Wood and Portage Counties, Wis.

The Biron Hydro Project with an installed capacity of 8,825 horsepower consists of the following: (1) A 2,533-foot long concrete gravity dam (maximum height about 34 feet) which includes an intake section and a spillway in three sections, having a total length of 780 feet, equipped with 22 tainter gates; (2) dikes extending upstream from the ends of the dam 2 miles on the right bank and 1½ miles on the left bank; (3) a 2,078-acre reservoir with normal water surface elevation at 1,036.1 feet (U.S.G.S. datum); (4) a powerhouse, integral with the dam, containing two 1,450 kW generators; (5) part of an industrial building containing one 400 kW generator and six turbines, totaling 4,425 horsepower, connected to nonpower wood grinders; and (6) all other facilities appurtenant to the project.

Applicant estimates the net investment as of June 30, 1970, at \$434,786.62. Applicant's estimate of fair value as of February 18, 1970, was \$1,700,000. Applicant estimates that the annual State and local tax revenue produced by the project is \$55,000.

The primary recreational feature of the project is the 2078-acre, 13-mile-long reservoir. Most of the 700 acres of project land owned by the applicant is low-lying and suited for wildlife. This land is generally open to hunting and fishing except at some cottage site leases. According to a State resource study of the river, most of the remaining shoreline is occupied by residential and commercial developments.

The applicant has developed a boat-launching site and a forestry tour at the project. The town of Plover operates a small park on the reservoir with facilities for picnicking and boat launching.

Private development includes a marina, a campground (to open in 1973) and a recreational area (picnicking, swimming, boating, and hiking) to be developed by Consolidated Employees' Recreation Association.

There are no plans for additional recreational development.

Over half of the power produced by the project is hydromechanical, which is used for grinding wood by applicant's parent company, Consolidated Papers, Inc. Electric energy produced by the project is sold to the parent company for use in the manufacture of pulp and paper products both in the adjacent mill and elsewhere. Electricity is also sold wholesale to the city of Wisconsin Rapids and sold retail in and around the village of Biron.

The original license expired on June 30, 1972, and the project is currently being operated under an annual license.

Any person desiring to be heard or to make protest with reference to said application should on or before May 30, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc.73-5871 Filed 3-27-73; 8:45 am]

[Docket No. CP73-230]

#### DISTRIGAS OF NEW YORK CORP.

##### Notice of Application

MARCH 20, 1973.

Take notice that on March 7, 1973, DISTRIGAS OF NEW YORK CORP. (Applicant), 125 High Street, Boston, MA 02110, filed in Docket No. CP73-230 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of liquefied natural gas (LNG) proposed to be imported from Algeria at its terminal located at Staten Island, N.Y., to distribution companies in New Jersey, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 8.8 trillion B.t.u. equivalent LNG per year from its deepwater terminal at Staten Island to New Jersey Natural Gas Co., Public Service Electric & Gas Co., and South Jersey Gas Co. Applicant states that importation of a major portion of the LNG from Algeria has been

requested by DISTRIGAS CORP. in pending Docket No. CP73-132 and that importation of the balance was authorized in Opinion No. 613 issued March 9, 1972, in Docket No. CP70-196 (47 FPC -----).

Applicant states that it will make the sales under its proposed FPC Gas Rate Schedules LT-1 and LT-2. The vaporized LNG will be transported by DISTRIGAS Pipeline Corp. from the Staten Island terminal to delivery point in New Jersey by means of facilities proposed in pending Docket No. CP73-148.

Applicant states that the base rates to be charged under both Rate Schedules LT-1 and LT-2 are \$0.903 per million B.t.u. for LNG delivered in the summer months and \$1.503 per million B.t.u. for LNG delivered in the winter months. An extra charge, the application indicates, will be made for transportation through the facilities of DISTRIGAS Pipeline Corp. and for vaporization or any barge delivery, as appropriate, all as set forth in the Rate Schedules.

Applicant states that the proposed sales will make a significant contribution toward meeting the pressing requirements of the buyers for supplemental gas supplies in the contract period.

Any person desiring to be heard or to make any protests with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-8074]

#### FAIRHOPE, ALA., AND ALABAMA POWER CO.

##### Petition for Declaratory Order

MARCH 22, 1973.

On March 8, 1973, city of Fairhope, Ala. (Fairhope), filed a petition for declaratory judgment to determine and terminate a controversy existing between Fairhope and Alabama Power Co. (Alabama) respecting the date of termination of the contract for electric service between them dated March 28, 1966, designated as FPC Rate Schedule No. 100.

In its petition, Fairhope requests the Commission to declare that the contract was terminated on September 18, 1972, pursuant to the notice of cancellation served by Alabama Power, and to declare that the increased charges made and collected between May 3, 1972, and September 18, 1972, were illegal. Fairhope also requests that the Commission order a refund with interest of the difference between the charges stated in the contract and the increased rates collected.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 11, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. E-7740]

#### INDIANA & MICHIGAN ELECTRIC CO.

##### Order Denying Petition To Show Cause and Postponing Dates for Filing Evidence and Hearing

MARCH 19, 1973.

Richmond Power & Light of the city of Richmond, Ind. (RP&L), on January 30, 1973, purportedly pursuant to section 206(a) of the Federal Power Act and §§ 1.6(d) and 1.7(a) of the Commission's rules of practice and procedure petitioned the Commission to issue an order to show cause against Indiana & Michigan Electric Co. (I&M). RP&L asks that I&M be directed to show cause why its rate schedule FPC No. 58, including proposed Tariff WS (Supplement No. 5), which became effective subject to refund on January 13, 1973, should not be modified with respect to RP&L's new 60 megawatt plant. In response on February 27, 1973, I&M filed a motion to dismiss the petition of RP&L, in which it asks that the petition be denied. On March 1, 1973,

## NOTICES

A group of intervenors requested an extension of time for serving their evidence from March 7, 1973, to March 14, 1973.

According to its allegations, RP&L is a municipal utility system supplying electric service for public, domestic, and industrial use in and around the city of Richmond, Ind. RP&L's facilities include the Whitewater Valley Generating Station with one unit, which has a nameplate capacity of 33 mw and the older Johnson Street Station of 27,600 kW nameplate capacity, which has been put in cold reserve. RP&L has been purchasing part of its bulk power requirements from I&M under a contract dated November 15, 1965, which provides for service to RP&L under I&M's Tariff IP. That agreement was filed with the Commission and was accepted for filing effective January 1, 1966, as I&M's Rate Schedule FPC No. 58.

The agreement, as both RP&L and I&M point out, provides that I&M will provide maintenance power of up to the 33 mw nameplate capacity of RP&L's Whitewater Valley Station, that I&M will make available power in scheduled outages without demand charges, and that the ratchet in the rate schedule will apply only to the RP&L load less 33 mw. The contract also provides that on ninety days notice either party may call for a reconsideration of the terms and conditions. I&M says that not until after its rate increase filing in this docket on June 13, 1972, did RP&L seek a change in the contract to give effect to its planned 60 mw generating unit.

On June 13, 1972, without giving notice to RP&L according to its allegations, I&M tendered for filing a new Tariff WS containing new rates and conditions which I&M proposes to make applicable to RP&L as Supplement No. 5 to Rate Schedule FPC No. 58. RP&L contends that these changes coupled with a substantial rate increase produce an intolerable situation in which RP&L is effectively barred from the use of its new 60 mw unit.

RP&L moved to reject I&M's tariff filing, but by order issued August 11, 1972, the Commission denied the motion and accepted the tendered rate schedule for filing subject to a 5-month suspension and refund.<sup>2</sup> After denial of rehearing by the Commission on September 11, 1972, RP&L petitioned the U.S. Court of Appeals for the District of Columbia Circuit for review of the Commission's orders, and that that proceeding is now pending before the Court.

In the proceedings before the Commission I&M and the Staff have filed their written testimony and exhibits and a prehearing conference was held before Presiding Administrative Law Judge William Jensen on February 12, 1973, at

<sup>1</sup> City of Anderson, Ind., the Indiana & Michigan Municipal Distributors Association, and RP&L.

<sup>2</sup> By Order No. 442, — FPC —, December 3, 1971, the public utility whose proposed rates are suspended shall refund as required by final order of the Commission the portion of the increased rates or charges found not justified with seven percent interest.

which service of the intervenors' evidence was rescheduled for March 7, 1973, I&M's rebuttal for April 5, 1973, and the hearing for April 24, 1973.

In its petition for order to show cause RP&L states that it seeks an interconnection agreement with I&M on an equalized reserve basis in accordance with the Gainesville decision,<sup>3</sup> but wants immediate relief in the following particulars:

(1) Although not changed by the WS Tariff filing, RP&L requests that the contract capacity for which it pays a demand charge be modified to reflect the new 60 mw unit. The contract now provides that contract capacity shall be the difference between the maximum 30-minute kilovolt-ampere demand on the customer's system and 33,000 kilovolt-amperes. RP&L would add a proviso that after the new unit goes into operation the contract capacity shall be the difference between the demand and 77,500 kilowatts (93,000 kw divided by 120 percent). RP&L proposes that 20 percent of its load met by its own capacity be dedicated to reserves.

(2) RP&L objects to the billing demand ratchet imposed by Tariff WS. Under the original rate schedule billing demand was to be no less than 60 percent of the contract capacity of the customer. Under the WS Tariff billing demand is to be no less than 60 percent of the highest billing demand established during the term of service, 60 percent of the contract capacity or 400 kw. RP&L argues that under this provision it would be unable to reduce its minimum obligation even if a change in contract capacity is made.

(3) Rate Schedule WS provides that energy be supplied by I&M for maintenance purposes without a demand charge but the maintenance demand is not to be greater than customer's firm capabilities at the date of the agreement (33 mw). RP&L requests that this limitation be the customer's firm capability at the time the maintenance energy is supplied (approximately 93,000 kw), in order to reflect its new generating capacity.

(4) RP&L asks that Rate Schedule WS be revised to exclude from monthly billing demand extraordinary individual demands caused by temporary maintenance or repairs on RP&L's generating facilities as well as on its transmission or distribution system. RP&L would also like eliminated a provision that temporary maintenance be prearranged on terms satisfactory to I&M.

RP&L contends that unless relief is granted it would be virtually required either to operate the new 60 mw generating unit substantially below capacity or to close it down for much of the year. RP&L says that the cost to it under Tariff WS would be \$925,500 more than it would be if consideration is given to its new generating capacity. It contends further that refunds will not afford it protection because of the demand obligation imposed on it prior to Tariff WS going into effect and because it would not

<sup>3</sup> Gainesville v. Florida Power Corporation, 40 FPC 1227 (1968) 41 FPC 4 (1969), affirmed 402 U.S. 515 (1971).

know whether it would be more economical to operate its new generating unit in lieu of purchasing power from I&M or to shut it down and purchase greater quantities of energy from I&M, for which it will be required to pay demand charges.

Finally, it contends that the issues presented involve questions of law and policy and therefore there is no need for evidentiary hearings on the matters raised. If I&M should raise factual questions it requests that either a conference be scheduled so that stipulations can be effectuated or separate hearings be held.

I&M objects that RP&L seeks an advance determination that it is entitled to a rate reduction of nearly \$1 million per year. It contends that RP&L's predicament arises from its entering into a 10-year contract to purchase capacity from I&M and then installing further capacity of its own. It further contends that there is no inherent illegality in the rate provisions and the request for an order to show cause should be rejected citing Central Vermont Public Service Corp., — FPC —, Docket No. E-7685, issued July 13, 1972. I&M asserts that RP&L's allegations can be established only by competent evidence regarding numerous and complex factual considerations, such as its load factor, the availability and operating characteristics and costs of its units, fuel costs, and other variables. It points out that the Federal Power Act is not designed to protect RP&L from loss resulting from incorrect operating decisions. It adds that separate hearings would be unwarranted and highly prejudicial to I&M.

As discussed above, RP&L has made a number of requests for changes in I&M's tariff that relate intimately to the compensation each party should receive for energy and capacity and to the operation of their respective systems. The changes that RP&L requests would reduce its payments to I&M by substantial amounts. The resolution of these questions requires evidence on the costs and operations of the two parties. By our order of August 11, 1972, we provided a hearing for the resolution of questions arising out of I&M's rate filing. We have authority under sections 205 and 206 of the Power Act to prescribe the just and reasonable rate as of the time the rate filing went into effect and to order a refund of such portion of such increased rates as shall be found not justified. To the extent RP&L has a justifiable complaint independently existing prior to I&M's rate filing, we have authority to rectify it as we would in a proceeding instituted under section 206. Under the Power Act we are not responsible for possible errors in judgment that RP&L may make in purchasing power or operating its plant. We are not required to assure RP&L that it will receive the lowest cost source of power, but merely that the rates charged by I&M be just and reasonable and not unduly discriminatory. Central Vermont Public Service Corporation, supra. To conclude, we need the data provided by a hearing to resolve the questions raised by RP&L; we are unable to determine these questions on the basis of pleadings.

## NOTICES

Furthermore, we are of the opinion there is no justification for holding a separate hearing with respect to I&M's relationship with RP&L. This proceeding covers a \$6,180,000 rate increase to I&M's resale customers in Indiana including a number of cities and cooperatives. It would not be equitable either to I&M or to its other customers to hold a separate hearing with respect to RP&L. In any case we would find it impossible to pass upon the appropriate credit for capacity, demand charge ratchet, allowance for maintenance energy, computation of billing demand, or more general questions as to the operation of the systems of I&M and RP&L that would arise in a hearing, without having I&M's other sales and customers before us.

It follows, therefore, that we shall deny RP&L's petition for an order to show cause. Of course, RP&L can make the same contentions it has made in its petition in the forthcoming hearing. At that hearing I&M will be well advised to address itself to the questions raised by RP&L.

As noted above, certain intervenors, including RP&L, by motion filed March 1, 1973, request an extension of time from March 7, 1973, until March 14, 1973, for the filing of their testimony and exhibits so as to permit coordination of the work being done by separate consulting firms. In view of our denial of RP&L's petition, we shall extend the service date for the intervenors' evidence until April 2, 1973, in order to give RP&L opportunity to present evidence on its contentions made in the petition. In conformity, the rebuttal service date for I&M will be May 2, 1973; and the hearing date will be May 22, 1973, subject to adjustment, if necessary, by the Administrative Law Judge.

The Commission further finds: It is necessary and appropriate to carry out the provisions of the Federal Power Act that RP&L's petition to show cause be denied, and that the extensions of time be made as provided below.

The Commission orders: (A) The petition to show cause filed on January 30, 1973, by RP&L is hereby denied.

(B) The date by which the intervenors' evidence shall be served is extended to April 2, 1973; the date for I&M's rebuttal is extended to May 2, 1973; and the hearing date is extended to May 22, 1973, subject to adjustment, if necessary, by the Administrative Law Judge.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket No. C173-592]

HERMAN G. KAISER

Notice of Application

MARCH 21, 1973.

Take notice that on March 5, 1973, Herman G. Kaiser (Applicant), 4120 East

51st Street, Tulsa, OK 74135, filed in Docket No. C173-592 an application pursuant to section 7(c) of the Natural Gas Act and § 2.75 of the Commission's general policy and interpretations (18 CFR 2.75) for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Co. (Panhandle) from the Chaney Dell Field, Major County, Okla., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes under the optional gas pricing procedure to sell natural gas to Panhandle from the Chaney Dell Field at an initial rate of 32.0 cents per Mcf at 14.65 p.s.i.a. subject to upward and downward Btu adjustment. The basic contract for the subject sale provides for 0.25-cent per Mcf price escalations each year beginning September 1, 1977, for tax reimbursement to the seller for 75 percent of any new or additional taxes and for a contract term of 20 years from August 7, 1972. Applicant expects to deliver to Panhandle approximately 65,000 Mcf per month at the downstream side of the Union Texas Petroleum's Chaney Dell Plant in Major County, Okla., for this sale.

Applicant states that he is applying for the instant authorization as a result of the U.S. Court of Appeals for the District of Columbia decision on December 12, 1972, in Docket No. 71-1560, et al., and its refusal on February 5, 1973, to reconsider its initial decision, which set aside the Commission's Order promulgating small producer regulations. Applicant requests that should this application be approved, it be allowed to take effect retroactively to the date of first deliveries which was August 7, 1972. Applicant is the holder of a small producer certificate in Docket No. CS71-179.

Applicant asserts that the present area rate of 21.0 cents per Mcf for sales from the subject area is patently not representative of the current value of the subject gas and does not take into consideration the expense and risk involved in drilling in zones such as the Red Fork Formation. Applicant alleges that the price of 32.0 cents per Mcf proposed herein is lower than present intrastate prices offered within the State of Oklahoma. Applicant states that even though the 32.0 cents per Mcf is the contractual rate with Panhandle, Union Texas actually gathers, compresses and processes the gas for Applicant and after this is done Applicant only receives a net of approximately 26.0 cents per Mcf. Applicant further asserts that the base price of 32.0 cents per Mcf is lower than alternative sources of energy such as the importation of liquefied natural gas, the production of synthetic gas or the gasification of coal.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and pro-

cedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP73-234]

MIDWESTERN GAS TRANSMISSION CO.

Notice of Application

MARCH 21, 1973.

Take notice that on March 13, 1973, Midwestern Gas Transmission Co. (Applicant), Post Office Box 2511, Houston, TX 77001, filed in Docket No. CP73-234 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 12,000 Mcf of natural gas per day for Northern States Power Co. (Northern States), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport and deliver up to 12,000 Mcf (14.73 p.s.i.a.) of natural gas per day to Northern States at existing delivery points located at the terminus of Applicant's Fargo and Grand Forks laterals in North Dakota. The application indicates that Northern States is currently experiencing a shortage of gas supply to meet the anticipated load growth of its residential and small volume commercial and industrial customers in the communities of Fargo and Grand Forks, and that the proposed service will assist in assuring maintenance of adequate service to these customers.

Applicant will receive such gas for transportation at the interconnection of its and Northern Natural Gas Co.'s (Northern Natural) facilities in Chicago and Isanti Counties, Minn. Applicant will render the service at a transportation charge of 2.0 cents per Mcf for gas deliv-

ered at Fargo and 2.6 cents per Mcf for gas delivered at Grand Forks.

With the exception of one new point of interconnection between Applicant's and Northern Natural's facilities in Isanti County, Minn., Applicant states that all deliveries will be made through existing facilities. Applicant will install a side valve at the new interconnection and will be reimbursed for its cost by Northern States.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMBS,  
Secretary.

[FR Doc 73 5893 Filed 3-27-73; 8:45 am]

[Docket No. RP71-87]

**MISSISSIPPI RIVER TRANSMISSION CORP.  
Proposed Changes in Rates and Charges**

MARCH 21, 1973.

Take notice that on March 8, 1973, Mississippi River Transmission Corp. (MRT) tendered for filing copies of Tenth Revised Sheet No. 3A as part of its FPC Gas Tariff, First Revised Volume No. 1.

MRT states that on February 14, 1973, it transmitted for filing with the Federal Power Commission two copies of Tenth Revised Sheet No. 3A as part of its FPC Gas Tariff, First Revised Volume No. 1. The company says that such tariff sheet, which reflected a reduction in the Rate

Schedule CD-1 charges, contained a proposed effective date of April 1, 1973. A copy of the filing was served on each of the jurisdictional customers of Mississippi and the State commissions of Arkansas, Illinois, and Missouri.

MRT further states that recent inquiries by it indicate that the Commission has not received such filing. Accordingly, MRT transmits two copies of the February 14, 1973, filing to the Commission. In view of the fact that the filing reflects a reduction in the Rate Schedule CD-1 charges and MRT's jurisdictional customers have previously received a copy of such filing, MRT requests that the tariff sheet become effective April 1, 1973, as proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before March 30, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMBS,  
Secretary.

[Project 2709]

**MONONGAHELA POWER CO. ET AL.**

**Order Providing for Hearing and Ruling on Motions; Correction**

MARCH 14, 1973.

In the order providing for hearing and ruling on motions, issued March 9, 1973 (38 FR 7020), change last sentence in ordering Paragraph (A) to read as follows:

"The time for the submission of additional testimony and exhibits by the participants and the time for convening hearing sessions in Washington, D.C. and such other places as may be necessary shall be determined by the Administrative Law Judge in conjunction with the dates set forth below."

KENNETH F. PLUMBS,  
Secretary.

[FR Doc 73 5877 Filed 3-27-73; 8:45 am]

[Docket No. CP72-279]

**NATURAL GAS PIPELINE CO. OF AMERICA**

**Notice of Petition To Amend**

MARCH 22, 1973.

Take notice that on March 16, 1973, Natural Gas Pipeline Co. of America (Petitioner), 122 South Michigan Avenue, Chicago, IL 60603, filed a petition to amend the Commission's order issued December 6, 1972 (48 FPC —)

in Docket No. CP72-279 pursuant to section 7(c) of the Natural Gas Act by authorizing the continuation through February 28, 1974, of the 59,100 Mcf per day of 100-day storage service under Petitioner's FPC Gas Rate Schedule S-3, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner and Michigan Wisconsin Pipe Line Co. (Michigan Wisconsin) have entered into an amendatory transportation and storage agreement, dated March 2, 1973, extending the term of the original agreement, dated April 4, 1972, for the period through February 28, 1974, on the same terms and conditions as previously authorized in this docket. Under the original agreement Petitioner delivered to Michigan Wisconsin near Woodstock, Ill., a total of 5,910,000 Mcf of gas during the summer months. Such gas was provided by Petitioner's customers by scheduling storage injection volumes from within their respective effective monthly quantity entitlements. Michigan Wisconsin caused the injection of an equivalent volume of gas into storage for redelivery to Petitioner during the period of November 1972 through February 1973.

Petitioner states that it has offered this continued service to all of its customers, allocating the 59,100 Mcf of gas per day among them pro rata to their existing daily contract quantities under Rate Schedules DMO-1 and G-1. The volumes not accepted were then reoffered to accepting customers pro rata until the total volume was contracted for.

Applicant further states that the proposed additional winter period service is urgently needed by its customers to enable them to meet their respective presently attached peak-day requirements in the event of a severe winter in 1973-74.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 16, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMBS,  
Secretary.

[Docket No. E-7600]

**NEPOOL POWER POOL AGREEMENT  
Further Extension of Time**

MARCH 21, 1973.

On March 13, 1973, the New England Power Pool Executive Committee filed a

motion for a further extension of time for filing testimony and exhibits as established by order issued September 21, 1972, and amended by notices issued October 27, 1972, December 13, 1972, and February 23, 1973. The motion states that counsel for the intervenors have no objection to the requested extension.

Service of testimony and exhibits, June 1, 1973.

Testimony by staff, June 22, 1973.

Rebuttal testimony, July 13, 1973.

Prehearing conference, July 24, 1973 (10 a.m., e.d.t.).

Cross examination on all evidence, August 2, 1973 (10 a.m., e.d.t.).

KENNETH F. PLUMBS,  
Secretary.

[Docket No. C172-301, etc.]

**NORTHERN MICHIGAN EXPLORATION CO.  
ET AL.**

**Order on Ruling Appeal**

MARCH 20, 1973.

Dockets Nos. C172-301, C172-770, CP72-122, CP72-128, C173-495.

The Central Illinois Light Co. has appealed to us from the ruling of the Presiding Administrative Law Judge, issued February 9, 1973, with respect to Central Illinois' efforts to obtain information from certain parties to this proceeding. By an application dated January 25, 1973, Central Illinois had applied to the Administrative Law Judge for subpoenas, or alternatively, for an order directing answers to information requests, directed to two applicants in this proceeding, the Northern Michigan Exploration Co., and the Trunkline Gas Co., and to five intervenors, the Northern Illinois Gas Co., the Brooklyn Union Gas Co., the Laclede Gas Co., the Illinois Power Co., and the Associated Gas Distributors.

Central Illinois represents that the information it seeks is relevant to the question whether, in its words, "distributors should engage in exploration and development activities and tie whatever reserves are found to their systems." Answers to Central Illinois' application to the Administrative Law Judge were filed by the Northern Michigan Exploration Co., Trunkline, Northern Illinois, and the Associated Gas Distributors. All opposed the application, essentially on the ground that the information sought is neither material nor relevant to the instant proceedings. In his ruling of February 9, 1973, the Administrative Law Judge agreed, stating in part:

While it may be true that the information sought might be relevant and material to the general policy determination indicated by CILCO in its application, and while full and complete discovery should be encouraged, such discovery must be kept within workable bounds on a proper and logical basis with respect to the relevancy of the information sought to be discovered to the subject matter of this proceeding.

The Presiding Judge has ruled on the prehearing conference held herein, that pursuant to the discretion vested in him by the Commission Order remanding these proceedings, the issues raised relating to the gen-

eral policy question indicated by the movants herein with respect to vertical integration, and evidence in connection therewith would not be heard. The information sought herein bearing upon such general policy question of vertical integration is thus not relevant to the inquiry in these proceedings.

From this ruling Central Illinois has appealed, pursuant to § 1.28 of our rules which permits appeals while hearings are in progress "in extraordinary circumstances where prompt decision by the Commission is necessary to prevent detriment to the public interest". In its appeal filed February 15, 1973, Central Illinois also asked that we waive section 1.9 of our Rules, relating to answers. The Commission's Secretary on February 22 fixed February 26 as the date by which answers were to be filed with respect to the appeals. We approve that action, believing that the time afforded was sufficient in the circumstances.

On February 26 four answers were filed. The City of Indianapolis, doing business as the Citizens Gas & Coke Utility, filed in support of Central Illinois. Three other parties filed in opposition—the Northern Michigan Exploration Co., Trunkline, and the Associated Gas Distributors. Each of these three doubts that the "extraordinary circumstances" referred to in § 1.28 are here present. As to the merits, their answers argue that Central Illinois' appeal is now, in part, moot, because some of Central Illinois' questions were answered at the reopened hearing; that Central Illinois had an opportunity in the initial hearings to explore these questions; and that if Central Illinois is successful in this appeal, it is unlikely that this case can be decided as promptly as we have indicated we would prefer. Subsequently, by letter dated February 26, the Michigan Public Service Commission indicated that it agrees with the Northern Michigan Exploration Co.

Turning first to the procedural question, we believe that extraordinary circumstances are present here. It seems probable to us that if the February 9 ruling of the Administrative Law Judge were to stand, the record which would ultimately come to us on the vertical integration question—a question which, as we define it below, is fundamental to our decision in this case—would not be full and complete. In his initial decision of October 5, 1972, the Administrative Law Judge stated that there was insufficient "hard evidence" in the record to permit "an important policy decision which would, in effect, exclude distributors from the production and exploration industry" (In Dec., p. 11). The record developed at the remanded hearing on February 15, 1973, contributes nothing substantial to that subject. Given these considerations, and given the fact that our ultimate decision in this case could turn on precisely this question, we think that "extraordinary circumstances" are here present. We are therefore willing to entertain the appeal.

Before turning to the merits of the Central Illinois appeal, we think it important for us to indicate what we mean by the "vertical integration question".

That phrase should not be translated for the purposes of this case to refer to anti-trust issues only. Antitrust issues are clearly comprehended by it, but so also are a considerable number of other public policy issues: e.g., (1) the effects upon the production segment of the gas industry arising from the entry of distributors, (2) the preemption of pipeline capacity by distributors, (3) the applicability of pipeline curtailment plans to distributor-acquired and distributor-transported gas, (4) the ability of pipelines to serve all customers, and to function, in effect, as common carriers, (5) consequences upon small distributors and their ability to serve their customers, (6) the effects upon competition at each industry segment, e.g. production, transmission, and distribution, and the overall public interest, and (7) the reservation of gas for a distributor's own use and the sale of gas by a distributor to a pipeline. These above-enumerated policy issues are in no way all-inclusive, but are merely illustrative of some of the issues which seem to us to require attention. We use the phrase "vertical integration question" here as a convenient shorthand, but the phrase should be understood to embrace all of the broad implications which we have ascribed to it.

As to the merits of Central Illinois' appeal, we conclude that we will not be able to decide this case wisely if the record before us is not full and complete on the issue of vertical integration, as we have defined it. We therefore ask the Presiding Administrative Law Judge to turn anew to this issue and to express his views on it. To permit him to do so, we understand that further hearings may be required. We infer from the language of the Initial Decision quoted above that the record to date is, in his judgment, inadequate to permit a decision on the public policy issues here involved. If that is so, then the Administrative Law Judge should grant the Central Illinois request for further information, to such extent as he finds appropriate for the development of a full and complete record to permit resolution of these issues. We therefore refer the Central Illinois request back to the Administrative Law Judge, and we ask that he grant the request to the extent we have described, that he provide for such further hearings as may be necessary, and that he discuss in his supplemental initial decision the issues we have outlined.

We are aware that the additional proceedings that will thereby be required will result in an inability on the part of the Administrative Law Judge to comply with a portion of our remand order of December 6, 1972. In that order we asked him to "establish a schedule which will afford to us a reasonable interval to give consideration to this case before further contract deadlines occur." We are aware that the underlying contracts carry a termination date of July 23, 1973, with a further extension to October 23, 1973, in certain circumstances. Notwithstanding our language of December 6, 1972, we believe that the issues we have described are of such magnitude that we cannot be compelled to decide them on

the basis of a timetable created by private parties.

We recognize also that in our remand order we expressly refrained from asking that "further evidence be taken on such question" of vertical integration, and we also refrained from directing the Administrative Law Judge "to decide the question." Such matters, we then stated, are better left to his discretion. We have lately concluded, however, that this question is of critical importance and that it cannot properly be carved out of, or passed over in, these proceedings. On orders of January 9, 1973, and February 9, 1973, in Transcontinental Gas Pipe Line Corp., Docket No. CP73-4, indicate that the issue is present there as well, i.e., "whether it is in the public interest to authorize proposals which encourage natural gas distributors to enter the production business and tie whatever gas is found and produced to their systems". We propose, as well, to come to terms with the issue in the instant case. Accordingly, we ask the Presiding Administrative Law Judge to grant the application of Central Illinois dated January 25, 1973, to the extent necessary to develop a complete record on this subject. Questions already answered on the record, or questions which are objectionable because they seek to elicit information which, because of its nature, is protected, of course need not be answered.

On January 22, 1973, there was filed a motion to consolidate with these proceedings the application filed that day by Corbin J. Robertson et al., Docket No. CI73-495. That motion states that the gas in question in Docket No. CI73-495, which Corbin J. Robertson et al., propose to sell to the Northern Michigan Exploration Co., is the same gas as is involved in these consolidated proceedings. In Docket No. CI73-495, Corbin J. Robertson et al., seek a certificate for the sale under § 2.75 of Part 2 of our general rules of practice and procedure. Central Illinois has filed in support of the motion to consolidate. The Northern Michigan Exploration Co. has asked us to expedite our action on the motion to consolidate.

These consolidated proceedings are intimately connected with the pending application in Docket No. CI73-495. We find that consolidation would expedite these proceedings. It is illogical to adjudicate the issues in the previously consolidated proceedings without being able to determine if the gas supply, as evidenced in the producer application pursuant to § 2.75 of our rules of practice and procedure, will be made available, e.g., the justness and reasonableness of the rate and whether the present or future public convenience and necessity is served. Inasmuch as we have previously asked the Administrative Law Judge to grant in appropriate part Central Illinois' request for answers to information requests, further proceedings will probably be required, at which time the evidentiary presentation in CI73-495 may be made.

Because we are ordering the consolidation of these proceedings, it is not necessary for us to act upon the petition filed on February 13, 1973, by Central Illinois for leave to intervene in docket No. CI73-495.

The Commission further finds:

(1) The application of the Central Illinois Light Co. to the Presiding Administrative Law Judge, dated January 25, 1973, should be granted to such extent as the Administrative Law Judge may find appropriate, in light of this order, for the development of a full and complete record to permit determination of the public policy issues here involved.

(2) It is appropriate and in the public interest that the motion to consolidate, filed on January 22, 1973, by the Applicants in Corbin J. Robertson et al., Docket No. CI73-495, be granted.

The Commission orders:

(A) The Presiding Administrative Law Judge shall, consistent with this order, grant the application dated January 25, 1973, of the Central Illinois Light Co. in these proceedings, to the extent he deems the information sought therein to be appropriate for the development of a full and complete record on the public policy issues here involved, and he shall provide for such hearings as may be necessary for the development of a full and complete record to permit resolution of the issues outlined in the body of this order.

(B) Corbin J. Robertson et al., Docket No. CI73-495, and Northern Michigan Exploration Co. et al., Dockets Nos. CI72-301 et al., are consolidated for hearing and decision.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

[Docket No. CP73-231]

**NORTHERN NATURAL GAS CO.  
Notice of Application**

MARCH 21, 1973.

Take notice that on March 12, 1973, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, NE 68102, filed in docket No. CP73-231 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of an additional point for an exchange of gas between Applicant and El Paso Natural Gas Co. (El Paso), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to a service agreement dated August 17, 1963, it agreed to deliver to El Paso up to 575,000 Mcf of natural gas per day at El Paso's Plains Compressor Station in Yoakum County, Tex., and at a point of interconnection in Section 262, Block D, John H. Gibson Survey, Yoakum

County, Tex., in return for El Paso's concurrently delivering equal volumes of gas to Applicant at El Paso's Dumas Compressor Station in Moore County, Tex., and at other designated points in Moore County, Tex., Beaver County, Okla., and Ochiltree County, Tex. Applicant herein seeks authorization in accordance with an amendment to the 1963 service agreement dated February 1, 1973, providing an additional delivery point in Woodward County, Okla., through which El Paso may deliver a portion of the authorized total exchange volumes, not to exceed 10,000 Mcf of natural gas per day. In docket No. CP73-220, El Paso has filed an application for authorization to construct and operate approximately 29.2 miles of 6-inch pipeline extending from its Northwest Quinlan Field in Woodward County, Okla., to the location of the proposed delivery point on Applicant's 16-inch field transmission line.

Applicant states that to accommodate the delivery point interconnection, it will be necessary to install a 6-inch side valve and telemetry equipment at said delivery point, at an estimated cost of \$37,300. Applicant plans to finance this cost from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 73-5875 Filed 3-27-73; 8:45 am]

[Docket No. CP73-233]  
**NORTHERN NATURAL GAS CO.  
Notice of Application**

MARCH 21, 1973.

Take notice that on March 12, 1973, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, NE 68102, filed in Docket No. CP73-233 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain compressor and pipeline facilities on its existing gas supply systems located in the Anadarko and Permian Basin Areas of Kansas, Oklahoma, Texas, and New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant seeks authority to construct and operate up to 39,500 compressor horsepower and 6.1 miles of 12-inch pipeline to be installed in Applicant's traditional gas supply areas. Applicant states that such facilities are required to offset the natural decline of reservoir pressures in the depletion-type gas fields connected to its system by its existing Hugoton, Beaver, Spearman and Lea County Gathering Systems and are necessary to enable Applicant to receive gas volumes committed to it for use in meeting its firm delivery commitments.

Applicant states further that the exact amount of compressor horsepower, types and sizes of units to be utilized, and specific locations of all such units in each of the subject fields cannot be finally determined until further reservoir, well performance and gathering system operating data resulting from the 1972-73 heating season operations have been evaluated. Additionally, Applicant indicates that the subject application is being filed at this time in order to provide the necessary lead time to obtain requisite authorizations and to enable Applicant to install the proposed facilities in time for use during the 1973-74 heating season.

The estimated cost of the proposed facilities is \$13,117,000, which cost will be financed from cash on hand and from funds generated through operations.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any persons wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to

[Project 2310]  
**PACIFIC GAS & ELECTRIC CO.  
Application for Change in Land Rights**

MARCH 22, 1973.

Public notice is hereby given that application for change in land rights was filed on January 19, 1973, under the Federal Power Act (16 U.S.C. 791a-825r) by Pacific Gas & Electric Co. (Correspondence to: Mr. J. F. Roberts, Jr., Vice President—Rates and Valuation, Pacific Gas and Electric Co., 77 Beale Street, San Francisco, CA 94106) for Project No. 2310, the Drum-Spaulling Project, located on the South Yuba and Bear Rivers and tributaries in Nevada and Placer Counties, California.

Pacific Gas and Electric Co., licensee for the Drum-Spaulling Project No. 2310, seeks Commission authorization to permit construction of a bridge across a natural watercourse, Wooley Creek, sometimes used as a spillway channel for flows from its Bear River and Boardman Canals. The company has a right-of-way and easement to use Wooley Creek for such purposes.

Sylvan Vista Development Co., Inc., would construct the 50-foot-long bridge on lands of a third party from whom an easement has been obtained for this purpose. The bridge would provide access to property owned by the Development Co. about 8 miles north of Auburn, Calif.

Any person desiring to be heard or to make protest with reference to said application should on or before May 7, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-7723]

**THE POTOMAC EDISON CO.  
Notice Deferring Procedural Dates**

MARCH 22, 1973.

On March 19, 1973, The Potomac Edison Co. filed a request for a further extension of the procedural dates established by order issued July 11, 1973, as amended by notices issued November 8, 1972, December 6, 1972, and February 23, 1973, pending disposition of the offer of settlement filed on February 1, 1973.

Upon consideration, notice is hereby given that the procedural dates are de-

ferred pending further order of the Commission in the above matter.

KENNETH F. PLUMB,  
Secretary.

[Docket No. RP73-47]

# SEA ROBIN PIPELINE CO.

## Proposed Changes in Rates and Charges

MARCH 21, 1973.

Take notice that Sea Robin Pipeline Co. (Sea Robin) on March 14, 1973, tendered for filing as a part of Original Volume No. 1 and Original Volume No. 2 of its FPC Gas Tariff "revised proposed tariff sheets" to comply with the Commission order issued November 13, 1972, in this docket. Sea Robin also submitted for filing as a part of Original Volume No. 1 and Original Volume No. 2 of its FPC Gas Tariff "alternate revised proposed tariff sheets." These alternative sheets are submitted to replace the tariff sheets which were included in Sea Robin's original application for rate increase filed on September 29, 1972, and suspended by the Commission order until April 15, 1973. The company has also filed supplemental cost and revenue data. Sea Robin conditionally withdraws all tariff sheets included in the original application. The original application, according to Sea Robin, reflected an increase in rates to its customers necessary to compensate for a jurisdictional revenue deficiency of \$30,789,109 in cost of service for the twelve month period ended June 30, 1972, and except for revisions concerning noncertificated facilities included in rate base made pursuant to the Commission's order, the data in support of the application for rate increase as filed on September 29, 1972, remains unchanged. The company requests that either the "revised proposed tariff sheets" or the "alternate revised proposed tariff sheets" be accepted for filing and permitted to become effective on April 15, 1973.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 5, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

## NOTICES

[Docket No. RP73-89]

# SEA ROBIN PIPELINE CO.

## Proposed Purchased Gas Adjustment Clause

MARCH 21, 1973.

Take notice that Sea Robin Pipeline Co. (Sea Robin) on March 14, 1973, tendered for filing original sheet Nos. 4 through 7 of its FPC Gas Tariff, original volume No. 1, comprising its Purchase Gas Adjustment (PGA) clause. The company states that a cost of service study having a base period ending less than 12 months before the submission of this PGA clause is on file in Sea Robin Pipeline Co., Docket No. RP73-47, as revised. According to Sea Robin, its "currently effective rate schedules and the alternate revised proposed tariff sheets filed in Docket No. RP73-47 contain a monthly gas cost tracking provision. In filing proposed revised tariff sheets in Docket No. RP73-47, Sea Robin included a rate of 25.65 cents per Mcf in the Rate Schedules X-1 and X-2 which is equal to the gas cost in the filing, subject to adjustment pursuant to a PGA clause to become effective April 15, 1973, the same date that the increased rates in the above mentioned docket become effective."

The Company requests that the tariff sheets be allowed to become effective on April 15, 1973, as proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 3, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. RP73-90]

# THE UNION LIGHT, HEAT & POWER CO.

## Proposed Changes in Rates and Charges

MARCH 22, 1973.

Take notice that The Union Light, Heat, & Power Co. (Union) on March 15, 1973, tendered for filing proposed changes in its FPC Gas Tariff, original volume No. 3. The revisions are First Revised Sheets Nos. 4 and 5, to replace original sheets Nos. 4 and 5. The proposed changes would increase by \$66,974 revenues from jurisdictional sales and services of liquefied natural gas based on a volume of sales for the 12 month period ending December 31, 1972. The annual jurisdictional revenue increases computed at the proposed tariff rates for the same period when normalized for anticipated operations, according to the company, amounts to \$284,901. Union states in its transmittal letter:

The rate increase is designed for the purpose of securing sufficient jurisdictional revenue to recoup the cost of service of Union's LNG operations lost as a result of reduced actual wholesale sales volumes and increased per unit of production expenses experienced during the 12 months period ended December 31, 1972, from those volumes and expenses originally anticipated in its original rate filing.

Union requests that the Commission limit the suspension period for this proposed rate increase to no more than 1 day and asks for an effective date of May 1, 1973.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 13, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

## FEDERAL RESERVE SYSTEM

### CHEMICAL NEW YORK CORP.

## Proposed Acquisition of CNA Nuclear Leasing, Inc.

Chemical New York Corp., New York, N.Y., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of CNA Nuclear Leasing, Inc., Boston, Mass. Notice of the application was published on November 20, 1972, in the Boston Globe, a newspaper circulated in Boston, Mass.

Applicant states that the proposed subsidiary would engage in the activities of leasing personal property and equipment and financing the acquisition of coal piles and other similar natural resource financing. Such leasing activities have been specified by the Board in § 225.4(a)(6) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). Applicant states that the coal and other natural resource financing transactions are of the type of financing activities that have been specified by the Board in § 225.4(a)(1) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). Whether such coal and other natural resource financing transactions are within the scope of § 225.4(a)(1) of Regulation Y is currently under consideration by the Board.

Interested persons may express their views on the question of whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or

at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 18, 1973.

Board of Governors of the Federal Reserve System, March 22, 1973.

## FIRST SECURITY NATIONAL CORP.

### Acquisition of Bank

First Security National Corp., Beaumont, Tex., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of the successor by merger to Bank of Lancaster, Lancaster, Tex. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

First Security National Corp. is also engaged in the nonbanking activities of originating, selling, and servicing mortgage loans for others. In addition to the factors considered under section 3 of the Act (banking factors), the Board will consider the proposal in the light of the company's nonbanking activities and the provisions and prohibitions in section 4 of the Act (12 U.S.C. 1843).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 17, 1973.

## FROST REALTY CO.

### Order Approving Acquisition of Banks

MARCH 22, 1973.

Frost Realty Co., San Antonio, Tex., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares of the successors by merger to both the Frost National Bank of San Antonio (Frost Bank), and Citizens National Bank of San Antonio (Citizens Bank), both of San Antonio, Tex. The respective banks into which each bank is to be merged have no significance except as a means to acquire all of the shares of the respective banks. Accordingly, the proposed acquisition of the shares of the successor organizations is treated herein as the proposed acquisition of shares of each bank.

Applicant also applied to acquire additional shares of Texas State Bank and Harlandale State Bank, both of San Antonio, Tex. Applicant has owned slightly less than 25 percent of the shares of both of these banks since 1969 and has had buy-sell agreements with officers and directors of Frost Bank with respect to additional shares of both banks. Applicant has withdrawn its applications with respect to these two banks and has committed itself to divest its existing interests in such banks within two years from the acquisition of Frost Bank and Citizens Bank.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant was organized in 1966 to acquire certain assets of Frost Bank. Since its inception, Frost Bank has held 100 percent of the shares of Applicant in trust for the benefit of Frost Bank's shareholders. Frost Bank, with deposits of \$451.9 million, is the ninth largest commercial bank in Texas and the largest commercial bank in the San Antonio banking market, controlling approximately 1.5 percent of deposits in commercial banks in the State and approximately 25 percent of deposits in that market.<sup>2</sup>

Applicant's proposed acquisition of Frost Bank represents a corporate reorganization, whereby Applicant, all of whose shares are held in trust by Frost Bank, would become the parent corporation by acquiring all of the shares of Frost Bank. Since Applicant's acquisition of Frost Bank is only a corporate reorganization, and because Applicant has voluntarily agreed to divest itself of all interest, including the shares subject to buy-sell agreements, in both Harlandale State Bank and Texas State Bank within 2 years from the date of acquisition of Frost Bank and Citizens Bank, it does not appear that any existing or potential competition would be eliminated upon Applicant's acquisition of Frost Bank. Similarly, Applicant's acquisition of Frost Bank would not result in any change in total market or State deposits.<sup>3</sup>

Citizens Bank, with deposits of approximately \$20.6 million, is the 19th largest of 37 banks in the San Antonio banking market controlling approximately 1.1 percent of total deposits in commercial banks in that market.

Citizens Bank is located 6 miles north of Frost Bank and its service area is entirely within the area served by Frost Bank. Although there is some existing competition between the two banks, several factors limit its importance. Citizens Bank primarily competes with three other similar-size banks located within a 5 mile radius of it. It also appears that the banking business of Frost Bank and Citizens Bank differ somewhat, in that commercial loans represent approximately 90 percent of Frost Bank's total loans, whereas consumer loans represent

<sup>2</sup> Banking data are as of June 30, 1972, adjusted to reflect holding company formations and acquisitions approved through Dec. 31, 1972.

<sup>3</sup> In commenting on Applicant's earlier proposal to acquire Frost Bank, Harlandale State Bank, Texas State Bank, and Citizens Bank, the U.S. Department of Justice stated that the acquisition of all four banks would have a significantly adverse effect on competition, as would the acquisition of Frost Bank without the divestiture of Harlandale State Bank and Texas State Bank.

approximately 73 percent of Citizens Bank's total loans. Further, Frost Bank and Citizens Bank have been closely associated since the inception of Citizens Bank. Frost Bank financed 40 percent of Citizens Bank's initial capitalization and has loaned Citizens Bank funds for its banking premises. The chairman of Frost Bank controls 25 percent of Citizens Bank's voting shares and has a buy-sell agreement with the chairman of Citizens Bank with respect to an additional 28 percent of such voting shares. It appears that this close association between the two banks has grown stronger over the years and it is unlikely that such relationships would terminate in the future in the absence of this proposal. In addition, within 2 years from its acquisition of Frost Bank and Citizens Bank, Applicant has agreed to divest all of its interests in Harlandale Bank and Texas Bank, thereby adding two independent banks to the San Antonio market and reducing the amount of deposits Applicant and Frost Bank control in that market. On the basis of these facts, it does not appear that Applicant's acquisition of Citizens Bank would have a significant adverse effect on existing or potential competition in the San Antonio market.

The financial and managerial resources and future prospects of Applicant, Frost Bank and Citizens Bank are satisfactory and consistent with approval. Applicant's acquisition of Frost Bank would not affect the convenience and needs of the community being served by Frost Bank. Upon acquisition of Citizens Bank by offering trust services, prove and increase the services of Citizens Bank by offering trust services, construction and mortgage lending and international banking services through Frost Bank, and by implementing a credit card program. Although the banking needs of the area being served by Citizens Bank appear to be adequately met at present, the increased and improved services Applicant proposes to offer at Bank should increase the convenience of area residents. Accordingly, considerations relating to the convenience and needs of the communities to be served with respect to Frost Bank are consistent with approval of the application, and, with respect to Citizens Bank, such factors are consistent with, and lend some weight toward approval of the application. It is the Board's judgment that the proposed acquisitions would be in the public interest and that the applications should be approved in light of Applicant's commitment to divest its entire interest, including shares owned or controlled by the chairman of the board and directors of Frost Bank, in both Harlandale Bank and Texas Bank.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be consummated (a) before the 30th calendar day following the effective date of this Order or (b) later than 3 months after the effective date of this Order, unless such period is extended for good cause by the Board, or

by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors,<sup>4</sup> effective March 21, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.  
[FR Doc. 73-5906 Filed 3-27-73; 8:45 am]

#### INTEGRITY HOLDING CO. Formation of Bank Holding Company

Integrity Holding Co., Wilmington, Del., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 56 percent of the voting shares of Integrity Finance Corp., Wilmington, Del., and thereby indirectly to acquire 34 percent of the voting shares of the First National Bank of Wilmington, Wilmington, Del. Applicant, in addition, intends to directly acquire 4.5 percent of the voting shares of that bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Philadelphia. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 17, 1973.

Board of Governors of the Federal Reserve System, March 21, 1973.

[SEAL] CHESTER B. FELDBERG,  
Assistant Secretary of the Board.  
[FR Doc. 73-5903 Filed 3-27-73; 8:45 am]

#### FEDERAL OPEN MARKET COMMITTEE Rules of Organization

The Federal Open Market Committee has amended its rules of organization in order to include references to the selection of a Deputy Manager of the System Open Market Account and a Deputy Special Manager for Foreign Currency Operations.

Effective March 20, 1973, section 5 of the rules of organization is amended to read as follows:

SEC. 5. *Manager, Special Manager, and Deputies.* The committee selects a Manager of the System Open Market Account and a Special Manager for Foreign Currency Operations for such account, and it may also select a Deputy Manager and a Deputy Special Manager for Foreign Currency Operations. All of the foregoing shall be satisfactory to the Federal Reserve Bank selected by the committee to execute open market transactions for such account, and all shall serve at the pleasure of the committee.

<sup>4</sup> Voting for this action: Vice Chairman Robertson and Governors Mitchell, Brimmer, and Bucher. Absent and not voting: Chairman Burns and Governors Daane and Sheehan.

The Manager and Special Manager, or their deputies, keep the committee informed on market conditions and on transactions they have made and render such reports as the committee may specify.

By order of the Federal Open Market Committee, March 20, 1973.

ARTHUR L. BROIDA,  
Deputy Secretary.  
[FR Doc. 73-5901 Filed 3-27-73; 8:45 am]

#### FEDERAL TRADE COMMISSION LAUNDERING PROCEDURES FOR CARPETS AND RUGS

##### Opportunity To Submit Comments and Extension of Requirement

The Commission by Notice published in the FEDERAL REGISTER on May 19, 1972, announced that it had determined to suspend temporarily the present washing requirement under the Standard for the Surface Flammability of Carpets and Rugs (DOC FF 1-70) as published in the FEDERAL REGISTER at 35 FR 6211 on April 16, 1970 for carpets containing alumina trihydrate in the backing until September 15, 1972. Written comments were invited and public hearings were held July 18, 1972, for the purpose of (1) considering the possible need for an alternative washing procedure, (2) considering the adoption of specified alternative procedures proposed in the course of the hearings, and (3) obtaining information concerning alumina trihydrate and other substances possessing flame retardant properties and their utilization and characterization as fire retardant treatments. (The suspension of washing procedures did not apply to carpets subject to the Standard for the Surface Flammability of Small Carpets and Rugs (DOC FF 2-70) as published in the FEDERAL REGISTER at 35 FR 19702 on December 29, 1970.) As a result of various extensions the period of suspension under the original notice was extended to March 6, 1973.

After an analysis of the record and the receipt of comment from the Department of Commerce, notice is hereby given that comments will be received on a proposed alternative laundering procedure under the Standard for the Surface Flammability of Carpets and Rugs (DOC FF 1-70) as authorized by paragraph 4(b) of such standard. Comments of the Department of Commerce in this regard have been made a part of the public record.

Any approval of a proposed alternative laundering procedure as hereinafter set forth will be predicated upon industry providing a detailed description of rotary brush and roll-a-jet procedures utilized in laundering carpets and rugs and verification by industry (1) that such rotary brush and roll-a-jet procedures are normally used laundering procedures for carpeting and (2) that the proposed laboratory procedure is an acceptable laboratory procedure and produces results comparable to rotary brush and roll-a-jet procedures.

The Commission remains of the opinion that its announcement of April 10,

1972, "that the use of alumina trihydrate in adhesives, foams, or latexes in carpet backings or elsewhere in the backings will be considered as a fire retardant treatment as defined in the Standard for the Surface Flammability of Carpets and Rugs (DOC FF 1-70)" is correct and appropriate. However, in view of the evidence that alumina trihydrate when used in carpets and rugs in this manner is not generally removed by normal laundering such as rotary brush and roll-a-jet procedures, comment is requested on the advisability of eliminating the laundering requirements for carpets and rugs subject to DOC FF 1-70 where and only where the fire retardant treatment present is alumina trihydrate used as hereinbefore indicated and such carpets and rugs are customarily laundered by rotary brush or roll-a-jet procedures.

In conjunction with this proceeding, the Commission proposes to establish recordkeeping requirements in accordance with its authority under section 5(c) of the Flammable Fabrics Act so as to specify and set forth type and chemical composition of fire retardant treatment utilized in carpets and rugs subject to the Standard for the Surface Flammability of Carpets and Rugs (DOC FF 1-70) or the Standard for the Surface Flammability of Small Carpets and Rugs (DOC FF 2-70), and the method of application and any other pertinent details as to such fire retardant treatment.

Written comments on the subject matter of this Notice will be received by the Federal Trade Commission for 45 days after its publication in the FEDERAL REGISTER.

The suspension of the washing requirement contained in the Standard for the Surface Flammability of Carpets and Rugs (DOC FF 1-70) has been previously extended to March 6, 1973. Notice is hereby given that the suspension of the washing requirement is extended until the completion of this proceeding.

The proposed alternative method for washing of carpets and rugs subject to DOC FF 1-70 is as follows:

##### ALTERNATE METHOD FOR WASHING OF TEXTILE FLOOR COVERINGS FOR DOC FF 1-70<sup>1</sup>

A laboratory procedure to produce results comparable to the "Rotary Brush" and the "Roll-A-Jet" methods customarily used for textile floor coverings in service.

##### 1. Purpose and scope.

1.1 This laboratory method is designed to evaluate the permanence of fire-retardant treatments with a severity similar to the "Rotary Brush" and "Roll-A-Jet" washing procedures customarily used for textile floor coverings. The method is suitable whenever cleaning procedures, in which a textile floor covering is wetted down, scrubbed, rinsed, and dried, are to be simulated.

1.2 This method is applicable to either soiled or unsoiled textile floor coverings.

1.3 This method is applicable for evaluating the permanence of fire-retardant treatments for textile floor coverings.

##### 2. Principle.

<sup>1</sup> This procedure may also be used for small rugs normally laundered by the rotary brush or roll-a-jet procedures and covered by DOC FF 2-70, "Standard for the Surface Flammability of Small Carpets and Rugs."

2.1 The test is performed by wetting the textile floor covering with water, applying a solution of a sodium alkylsulfate surfactant, hand scrubbing with a nylon bristle brush, rinsing, extracting excess water, and then drying in a vented oven.

3. *Apparatus and Materials.*  
3.1 Cleaning agent—a 1 percent, by volume, solution of a sodium alkylsulfate (see note 6.1).

3.2 A brush having nylon bristles 0.056 to 0.066 cm. (0.022 to 0.026 in.) in diameter and a bristle height of 2.2 to 2.9 cm. (0.88 to 1.13 in.). Width of the brush should be approximately 5 cm. (2 in.). A desirable length of the brush should be approximately one dimensional width of the test specimen (see note 6.2).

3.3 A hydro extractor (see note 6.3).

3.4 Laboratory oven, a vented circulating air type, capable of removing the moisture from the specimens when maintained at 105° C. (221° F.) for 2 hours (see note 6.4).

##### 4. Procedure.

4.1 Cut eight test specimens, 25.4 x 25.4 cm. (10 x 10 in.) in size, from the sample and free from defects or creases. The perimeter shall be stitched to prevent delamination, distortion, or other degradation.

4.2 Immerse the test specimen to be washed in a container of water at 18 to 30° C. (65 to 85° F.) until it appears to be uniformly wet. Remove specimen, drain until excess water runs off, and then position on a flatworking surface with traffic surface up.

4.3 Apply 60 ml. of the surfactant solution at a temperature of 18 to 30° C. (65 to 85° F.) distributed uniformly over the traffic surface of the test specimen. Hand scrub, with minimum pressure, the traffic surface with the nylon bristle brush for five strokes in one direction, lifting the brush between strokes. Rotate the specimen a quarter-turn and repeat the brush strokes, doing this until the specimen has been stroked five times in each direction for a total of 20 strokes.

4.4 Thoroughly rinse each specimen on both sides by spraying forcibly with water at 46 to 52° C. (115 to 125° F.) until foaming ceases.

4.5 Position the eight washed and rinsed test specimens in the hydroextractor to extract excess water so there is no overlapping and spin dry for approximately 3 minutes.

4.6 Place the damp-dry set of specimens in the oven at 104 to 110° C. (220 to 230° F.) for 30 minutes and then remove for additional washing. This 30 minute timing is for the first nine washings. On the 10th and final cycle, keep the set of specimens in the oven until dry, or for not less than 2 hours. Remove the set of specimens from the oven and allow to stand at least 8 hours in order to come to equilibrium conditions with the laboratory environment. Cut the specimens to 22.86 x 22.86 cm. (9 x 9 in.) in size, condition as prescribed in the standard for the surface flammability of carpets and rugs, DOC FF 1-70, and test.

5. *Report.*  
5.1 State that the set of test specimens was washed according to this procedure.

5.2 Report results of testing as required by DOC FF 1-70.

##### 6. Notes.

6.1 Orvus WA paste has been found to be suitable. Available from Procter & Gamble Co., textile specialties section, Post Office Box 599, Cincinnati, OH 45201.

6.2 A suitable brush may be obtained from the Atlanta Brush Co., 19 Hilliard Street, Atlanta, GA 30312 (stock No. 1-4638).

6.3 A satisfactory means of extracting excess water from specimens is the use of the spin-dry cycle only in a home laundry type of washing machine. Care must be used in setting the machine or closing the water valves so that no rinse water is admitted during this spin-dry cycle.

6.4 Procedure 2 of ASTM D 2654-71, "Moisture Content and Moisture Regain of Textile Material", without the predrying feature for the incoming air describes a satisfactory oven.

(Sec. 5, Flammable Fabrics Act, 67 Stat. 112, as amended by 81 Stat. 570, 16 USC 1194; paragraph 4(b), standard for the surface flammability of carpets and rugs (DOC FF 1-70), 35 FR 6311, Apr. 16, 1970; paragraph 4(b), standard for the surface flammability of small carpets and rugs (DOC FF 2-70), 35 FR 19702, Dec. 29, 1970)

By direction of the Commission dated March 20, 1973.

[SEAL] CHARLES A. TOBIN,  
Secretary.

[FR Doc. 73-5932 Filed 3-27-73; 8:45 am]

## OFFICE OF EMERGENCY PREPAREDNESS

### NEW YORK

#### Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in me by the President under Executive Order 11575 of December 31, 1970; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744); notice is hereby given that on March 21, 1973, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of New York resulting from high winds, wave action, and flooding, beginning on or about March 16, 1973, are of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of New York. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in me by the President under Executive Order 11575 to administer the Disaster Relief Act of 1970 (Public Law 91-606) I hereby appoint Mr. Thomas R. Casey, Regional Director, OEP Region 2, to act as the Federal Coordinating Officer to perform the duties specified by section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of New York to have been adversely affected by this declared major disaster.

The counties of:

Jefferson.	Orleans.
Monroe.	Oswego.
Niagara.	Wayne.

Dated: March 23, 1973.

DARRELL M. TRENT,  
Acting Director,  
Office of Emergency Preparedness.  
[FR Doc. 73-5867 Filed 3-27-73; 8:45 am]

## NOTICES

### SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-10054]

#### NEW YORK, AMERICAN, MIDWEST, PBW, AND PACIFIC COAST STOCK EX- CHANGES AND NASD

##### Notice of Extension of Deadline for Submitting Comments

The Division of Market Regulation announced that it has extended from March 23, 1973, to April 6, 1973, the deadline for submitting comments on the joint plan filed with the Commission on March 2, 1973, by the New York, American, Midwest, PBW and Pacific Stock Exchanges and the NASD (the "Plan") pursuant to Rule 17a-15 under the Securities Exchange Act of 1934, providing for reporting of prices and volume of completed transactions with respect to securities registered on exchanges. The staff has determined to extend the deadline in order to afford an additional opportunity for public comment. The Plan will continue to be available for inspection in the Commission's public reference room, and all interested persons may submit written comments on the Plan. All comments should be directed to John M. Lufkin, Associate Director, Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol Street, Washington, DC 20549, and should refer to File No. S7-433.

[SEAL] RONALD F. HUNT,  
Secretary.

MARCH 22, 1973.

[File No. 500-1]

#### CHARNITA, INC.

##### Order Suspending Trading

MARCH 21, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, \$0.10 par value, and all other securities of Charnita, Inc., being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

It is ordered, Pursuant to section 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from 10 a.m. (e.s.t.) on March 21, 1973, through March 30, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,  
Secretary.

## DEPARTMENT OF LABOR

### Office of the Secretary

#### AIRCO, INC.

##### Investigation Regarding Eligibility for Adjustment Assistance

After reviewing the Tariff Commission's report on its investigation of the petition for adjustment assistance filed on behalf of workers formerly employed by Airco Speer Electronic Components, division of Airco, Inc., DuBois, Pa. plant (TEA-W-157) under section 301(c)(2) of the Trade Expansion Act of 1962, and in which report the Commission being equally divided, made no finding with respect to radio frequency coils, molded ceramic capacitors, and fixed precision metal film resistors, the President decided under the authority of section 330(d)(1) of the Tariff Act of 1930 as amended, to consider the findings of those Commissioners who found in the affirmative as the finding of the Commission. Accordingly, he has advised the Secretary of Labor that he may certify the group of workers involved as eligible to apply for adjustment assistance.

In view of the Tariff Commission's report, the President's authorization, and the responsibilities delegated to the Secretary of Labor under section 8 of Executive Order 11075 (28 FR 473), the Director, Office of Foreign Economic Policy, Bureau of International Labor Affairs, has instituted an investigation, as provided in 29 CFR 90.5 and this notice. The investigation relates to the determination of whether any of the group of workers covered by the Tariff Commission report should be certified as eligible to apply for adjustment assistance, provided for under Title III, Chapter 3, of the Trade Expansion Act of 1962, including the determination of related subsidiary subjects and matters, such as the date unemployment or underemployment began or threatened to begin and the subdivision of the firm involved to be specified in any certification to be made, as more specifically provided in Subpart B of CFR Part 90.

Interested persons should submit written data, views, or arguments relating to the subjects of investigation to the Director, Office of Foreign Economic Policy, U.S. Department of Labor, Washington, D.C. 20210 on or before April 9, 1973.

Signed at Washington, D.C. this 21st day of March 1973.

GLORIA G. VERNON,  
Director, Office of  
Foreign Economic Policy.

[FR Doc. 73-5931 Filed 3-27-73; 8:45 am]

## INTERSTATE COMMERCE COMMISSION

[Notice 207]

### ASSIGNMENT OF HEARINGS

MARCH 23, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 1977 Sub 15, Northwest Transport Service, Inc., now being assigned hearing June 11, 1973 (1 week), at Phoenix, Ariz., in a hearing room to be later designated.

MC 136564 Sub 1, Shippers Leasing, Inc., now being assigned June 18, 1973 (1 day), at San Francisco, Calif., in a hearing room to be later designated.

MC 136172 Sub 2, Dick Bell Trucking, Inc., now being assigned June 19, 1973 (2 days), at San Francisco, Calif., in a hearing room to be later designated.

MC 107743 Sub 20, System Transport, Inc., now being assigned June 21, 1973 (2 days), at San Francisco, Calif., in a hearing room to be later designated.

MC 123061 Sub 64, Leatham Brothers, Inc., now being assigned June 25, 1973 (3 days), at Seattle, Wash., in a hearing room to be later designated.

MC-138232, Inquisitor's Club, now being assigned hearing June 28, 1973 (2 days), at Seattle, Wash., in a hearing room to be later designated.

FD-24679, Spokane, Portland & Seattle Railway Co. and Union Pacific Railroad Co.—Control—Peninsula Terminal Co., FD-24890, Southern Pacific Co.—Common Use of Terminal Facilities—Peninsula Terminal Co., FD-24891, Southern Pacific Co.—Common Use of Certain Terminal Facilities—Union Pacific Railroad Co., now being assigned hearing June 25, 1973 (1 week), at Portland, Oreg., in a hearing room to be later designated.

MC-115826 Sub 246, W. J. Digby, Inc., now being assigned hearing June 5, 1973 (1 day), at Denver, Colo., in a hearing room to be later designated.

MC-52858 Sub 108, Convoys Co., now being assigned hearing June 8, 1973 (1 day), at Denver, Colo., in a hearing room to be later designated.

MC-C-7998, Red Ball Motor Freight, Inc.—Investigation and Revocation of Certificates, now being assigned hearing June 18, 1973 (1 day), at New Orleans, La., in a hearing room to be later designated.

MC-26396 Sub 51 and Sub 63, Popelka Trucking Co., doing business as the Waggoners, now being assigned hearing June 11, 1973 (1 week), at Missoula, Mont., in a hearing room to be later designated.

MC 128383 Sub 17, Pinto Trucking Service, Inc., now assigned March 27, 1973, at New York, N.Y., hearing is canceled and transferred to modified procedure.

MC 115840 Sub 77, Colonial Fast Freight Lines, Inc., now being assigned hearing June 11, 1973 (3 days), at New Orleans,

## NOTICES

La., in a hearing room to be later designated.

MC 115162 Sub 255, Poole Truck Line, Inc., now being assigned hearing June 14, 1973 (1 day), at New Orleans, La., in a hearing room to be later designated.

MC-32882 Sub 66, Mitchell Bros. Truck Lines, now being assigned hearing June 18, 1973 (1 week), at Portland, Oreg., in a hearing room to be later designated.

MC-113855 Sub 261, International Transport, Inc., now being assigned hearing June 18, 1973 (1 week), at Portland, Oreg., in a hearing room to be later designated.

MC 133095 Sub 19, Texas Continental Express, Inc., now being assigned hearing June 15, 1973 (1 day), at New Orleans, La., in a hearing room to be later designated.

MC 87532 Sub 7, Clay Products Transport, Inc., now being assigned June 4, 1973 (1 day), at Columbus, Ohio, in a hearing room to be later designated.

MC 134599 Sub 53, Interstate Contract Carrier Corporation, now being assigned June 5, 1973 (2 days), at Columbus, Ohio, in a hearing room to be later designated.

MC 50089 Sub 458, Refiners Transport & Terminal Corp., now being assigned June 7, 1973 (2 days), at Columbus, Ohio, in a hearing room to be later designated.

MC 5623 Sub 19, Arrow Trucking Co., now being assigned June 11, 1973 (2 days), at Columbus, Ohio, in a hearing room to be later designated.

MC 135524 Sub 6 and 7, G. F. Trucking Co., now being assigned June 13, 1973 (3 days), at Columbus, Ohio, in a hearing room to be later designated.

AB-3 Sub 2, Missouri Pacific Railroad Co. abandonment between Eudora, Ark., and Delhi, La., in Chicot County, Ark., and West Carroll and Richland Parishes, La., now being assigned hearing June 20, 1973 (3 days), at Oak Grove, La., in a hearing room to be later designated.

MC 136693, Robert A. Dely, doing business as D. & D. Delivery Service, now being assigned June 4, 1973 (2 days), at Dallas, Tex., in a hearing room to be later designated.

MC 108207 Sub 363, Frozen Food Express, Inc., now being assigned June 6, 1973 (3 days), at Dallas, Tex., in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc. 73-5921 Filed 3-27-73; 8:45 am]

### FILING OF MOTOR CARRIER INTRASTATE APPLICATIONS

MARCH 23, 1973.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things, that protests and requests for information concerning the time and place of State commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State commission with which the application is filed and shall

not be addressed to or filed with the Interstate Commerce Commission.

New York Docket No. T-9147, filed February 26, 1973. Applicant: COOPERSTOWN AND CHARLOTTE VALLEY RAILWAY, 1 Railroad Avenue, Cooperstown, NY 13326. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of general commodities and refrigerated products between stations on the Cooperstown and Charlotte Valley Railway, i.e., Cooperstown Junction, Hartwick, Milford, Cooperstown, on the one hand, and, on the other, all points in Delaware, Greene, Schoharie, and Otsego Counties. Both intrastate and interstate authority sought.

HEARING: Date, time, and place not shown. Requests for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12226, and should not be directed to the Interstate Commerce Commission.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc. 73-5928 Filed 3-27-73; 8:45 am]

### FOURTH SECTION APPLICATION FOR RELIEF

MARCH 23, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the general rules of practice (49 CFR 1100.40) and filed on or before April 12, 1973.

FSA No. 42650—Sand from Brady, Tex. Filed by Southwestern Freight Bureau, agent (No. B-393), for interested rail carriers. Rates on and, in carloads, as described in the application, from Brady, Tex., to Prestonsburg, Ky. Grounds for relief—Destination rate relationship. Tariff—Supplement 178 to Southwestern Freight Bureau, agent, tariff ICC 4797. Rates are published to become effective on May 1, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc. 73-5924 Filed 3-27-73; 8:45 am]

[Notice 7]

### MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

MARCH 23, 1973.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the qual-

## NOTICES

ity of the human environment resulting from approval of its application) to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Passengers, 1969 (49 CFR 1042.2(c)(9)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.2(c)(9)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before April 27, 1973.

Successfully filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

## MOTOR CARRIERS OF PASSENGERS

No. MC-1515 (Deviation No. 642) (cancels Deviation No. 456), GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed March 9, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over deviation routes as follows: (1) from Pittsburgh, Pa., over U.S. Highway 22 to junction Interstate Highway 79, thence over Interstate Highway 70, thence over Interstate Highway 70 to junction U.S. Highway 40, and (2) from Washington, Pa., over city streets to junction Interstate Highway 70, thence over Interstate Highway 70 to junction Interstate Highway 79, and return over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Pittsburgh, Pa., over U.S. Highway 19 to Washington, Pa., thence over U.S. Highway 40 to junction Interstate Highway 70, and return over the same route.

No. MC-1515 (Deviation No. 643) GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed March 14, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over a deviation route as follows: From junction U.S. Highway 24 and Ohio Highway 424 east of Napoleon, Ohio, over U.S. Highway 24 to junction Ohio Highway 424 approximately 4 miles west of Defiance, Ohio, with the following access routes: (1) From Napoleon, Ohio, over Ohio Highway 108 to junction U.S. Highway 24, and (2) from Defiance, Ohio, over Ohio Highway 66 to junction U.S. Highway 24, and return

over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From junction U.S. Highway 24 and Ohio Highway 424 northeast of Napoleon, Ohio Highway 424 via Napoleon and Defiance, Ohio, to junction U.S. Highway 24 approximately 4 miles west of Defiance, Ohio, and return over the same route.

No. MC-1515 (Deviation No. 644), GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed March 14, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over a deviation route as follows: From junction New Indiana Highway 37 and Old Indiana Highway 37 approximately 1 mile south of Bedford, Ind., over New Indiana Highway 37 to junction Old Indiana Highway 37 just north of Bloomington, Ind., with the following access routes: (1) From Bedford, Ind., over Old Indiana Highway 37 via Oolitic, Ind., to junction New Indiana Highway 37, (2) from Bloomington, Ind., over Indiana Highway 45 to junction New Indiana Highway 37, and (3) from Bloomington, Ind., over Indiana Highway 46 to junction New Indiana Highway 37, and return over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From junction New Indiana Highway 37 and Old Indiana Highway 37 approximately 1 mile south of Bedford, Ind., over Old Indiana Highway 37 via Oolitic, Ind., to junction New Indiana Highway 37 just north of Bloomington, Ind., and return over the same route.

No. MC-1515 (Deviation No. 645) (cancels Deviation Nos. 477 and 598), GREYHOUND LINES, INC. (Eastern Division), 1400 West Third Street, Cleveland, OH 44113, filed March 14, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over a deviation route as follows: From Nashville, Tenn., over Interstate Highway 65 to junction U.S. Highway 31 near Kimberly, Ala., with the following access routes: (1) From Columbia, Tenn., over Tennessee Highway 99 to junction Interstate Highway 65, (2) from Columbia, Tenn., over Tennessee Highway 50 to junction Interstate Highway 65, (3) from Pulaski, Tenn., over Alternate U.S. Highway 31 to junction Interstate Highway 65, (4) from Pulaski, Tenn., over U.S. Highway 64 to junction Interstate Highway 65, (5) from Athens, Ala., over Alabama Highway 251 to junction Interstate Highway 65, and (6) from Decatur, Ala., over Alabama Highway 67 to junction Interstate Highway 65, and return over the same routes, for operating convenience only.

The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Nashville, Tenn., over U.S. Highway 31 to junction Tennessee Highway 7, thence over Tennessee Highway 7 to junction Alabama Highway 251 (Alabama-Tennessee State line) at Ardmore, Ala., thence over Alabama Highway 251 to junction U.S. Highway 31 at Athens, Ala., thence over U.S. Highway 31 to Birmingham, Ala., and return over the same route.

No. MC-2661 (Deviation No. 4), INDIAN TRAILS, INC., 109 East Comstock Street, Owosso, MI 48867, filed March 7, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle, over a deviation route as follows: From Flint, Mich., over Interstate Highway 75 to junction Michigan Highway 25 (approximately 2 miles west of Bay City, Mich.), thence over Michigan Highway 25 to Bay City, Mich., with the following access roads: (1) From Flint, Mich., over Michigan Highway 21 to junction Interstate Highway 75, (2) from Flint, Mich., over Pierson Road to junction Interstate Highway 75, (3) from Saginaw, Mich., over Interstate Highway 75, and (4) from Bay City, Mich., over Michigan Highway 13 to junction Interstate Highway 75, and return over the same routes, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From Port Austin, Mich., over Michigan Highway 25 via Caseville and Unionville, Mich., to Bay City, Mich., thence over U.S. Highway 23 to Flint, Mich., thence over Michigan Highway 78 via Perry and Charlotte, Mich., to Battle Creek, Mich., thence over U.S. Highway 12 via Kalamazoo, Mich., and Michigan City, Ind., to Chicago, Ill. (also from Charlotte over U.S. Highway 27 to Marshall, Mich., thence over U.S. Highway 12 to Battle Creek), and return over the same route.

No. MC 2890 (Deviation No. 92), AMERICAN BUSLINES, INC., 300 South Broadway Avenue, Wichita, KS 67201, filed March 14, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of passengers and their baggage, and express and newspapers in the same vehicle with passengers, over a deviation route as follows: From St. Joseph, Mo., over Interstate Highway 29 to Council Bluffs, Iowa, and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property, over a pertinent service route as follows: From St. Joseph, Mo., over U.S. Highway 71 to Clarinda, Iowa, thence over Iowa Highway 2 to Sidney, Iowa, thence over U.S. Highway 275 to Balfour, Iowa, thence over U.S. Highway 34 to Glenwood, Iowa, thence over U.S. Highway 275 to junction Iowa Highway 375, thence over Iowa

Highway 375 to Council Bluffs, Iowa, and return over the same route.

By the Commission.

[Notice 11]

MOTOR CARRIER ALTERNATE ROUTE  
DEVIATION NOTICES

MARCH 23, 1973.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969 (49 CFR 1042.4(c)(11)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed on or before April 27, 1973.

Successfully filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

## MOTOR CARRIERS OF PROPERTY

No. MC-200 (Deviation No. 28), RISS INTERNATIONAL CORPORATION, Post Office Box 2809, Kansas City, MO 64142, filed March 5, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of general commodities, with certain exceptions, over a deviation route as follows: From Harrisburg, Pa., over U.S. Highway 11 to junction Interstate Highway 81, thence over Interstate Highway 81 to junction Interstate Highway 40, thence over Interstate Highway 40 to junction Interstate Highway 30, thence over Interstate Highway 30 to Dallas, Tex., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Harrisburg, Pa., over U.S. Highway 22 to junction Ohio Highway 7, thence over Ohio Highway 7 to junction U.S. Highway 40, thence over U.S. Highway 40 to junction U.S. Highway 66, thence over U.S. Highway 66 to junction U.S. Highway 69, thence over U.S. Highway 69 to junction U.S. Highway 75, thence over U.S. Highway 75 to Dallas, Tex., and return over the same route.

## NOTICES

No. MC-57254 (Deviation No. 1), ASSOCIATED FREIGHT LINES, 841 Folger Avenue, Berkeley, CA 94710, filed March 14, 1973. Carrier proposes to operate as a common carrier, by motor vehicle, of general commodities, with certain exceptions, over a deviation route as follows: From junction California Highways 14 and 58 over California Highway 58 to Barstow, Calif., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over pertinent service routes as follows: (1) From Los Angeles, Calif., over U.S. Highway 66 to junction Interstate Highway 15, thence over Interstate Highway 15 to Las Vegas, Nev., and (2) from Fresno, Calif., over U.S. Highway 99 to Bakersfield, Calif., thence over California Highway 58 to Mojave, Calif., thence southerly over California Highway 14 to Palmdale, Calif., thence westerly over unnumbered county road by way of Adelanto to Victorville, Calif., thence northerly over U.S. Highway 66 and Interstate Highway 15 via Barstow, Calif., to Las Vegas, Nev., and return over the same routes.

By the Commission.

[Notice 23]

MOTOR CARRIER APPLICATIONS AND  
CERTAIN OTHER PROCEEDINGS

MARCH 23, 1973.

The following publications are governed by the new Special Rule 1100.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

The publications hereinafter set forth reflect the scope of the applications as filed by applicant, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed, but also will eliminate any restrictions which are not acceptable to the Commission.

APPLICATIONS ASSIGNED FOR ORAL HEARING  
MOTOR CARRIERS OF PROPERTY

No. MC 124266 (Sub-No. 1) (Amendment) filed October 5, 1972, published in the FEDERAL REGISTER issue of November 16, 1972, and republished, as amended, this issue. Applicant: NELSON GWILLIM, Route 2, Box 144, Carlinville, IL 62626. Authority sought to op-

Except as otherwise specifically noted, each applicant (on applications filed after Mar. 27, 1972) state that there will be no significant effect on the quality of the human environment resulting from approval of its application.

erate as a contract carrier, by motor vehicle, over irregular routes, transporting: (1) *Meat products*, from Oklahoma City, Okla., and the commercial zone thereof, and Chicago, Ill., and the commercial zone thereof, to Granite City, Ill., and the commercial zone thereof; (2) (a) *shortening, salad dressing and pickle products*, from Chicago, Ill., and the commercial zone thereof, to Granite City, Ill., and the commercial zone thereof; (b) *cheese products*, from Carthage, Mo., and the commercial zone thereof, to Granite City, Ill., and the commercial zone thereof; and (c) *cookie products*, from Denver, Colo., and the commercial zone thereof, to Granite City, Ill., and the commercial zone thereof; (3) (a) *cream and condensed products*, in bulk, from Joplin, Mo., and the commercial zone thereof, and Springfield, Mo., and the commercial zone thereof, to St. Louis, Mo., and the commercial zone thereof; and (b) *condensed and mixed products*, in bulk, from O'Fallon, Ill., and the commercial zone thereof, to plant sites of Prairie Farms at Marietta, Ga., and La Fayette, Ind.; (4) *cartons*, from points in Kentucky and Missouri (except Springfield and Kansas City, Mo., and the commercial zones thereof), to the plant sites of Prairie Farms in Illinois and Iowa; (5) *ice cream products*, between Marietta, Ga., and the commercial zone thereof, St. Louis, Mo., and the commercial zone thereof, Oklahoma City, Okla., and the commercial zone thereof, and points in Texas; and (6) *butter*, from St. Louis, Mo., and the commercial zone thereof, to points in Illinois, Michigan, Kentucky, Tennessee, and Texas, under contract with Prairie Farms Dairy, Inc. Note: The purpose of this republication is to redescribe the commodities and territory proposed to be served and to add the commodity cartons.

HEARING: April 27, 1973 (1 day), at 9:30 a.m. United States Standard Time, at St. Louis, Mo.

No. MC 119639 (Sub-No. 5) (Republication), filed November 24, 1971, published in the FEDERAL REGISTER issue of January 6, 1972, and republished this issue. Applicant: INCO EXPRESS, INC., 2201 Sixth Avenue South, Seattle, WA 98134. Applicant's representative: Joseph O. Earp, 411 Lyon Building, 607 Third Avenue, Seattle, WA 98104. An order of the Commission, Division 1, Acting as an Appellate Division, dated March 2, 1973, and served March 15, 1973, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of plastic coated fabric and liquid plastic, in vehicles equipped with mechanical refrigeration, between points in King and Snohomish Counties, Wash., on the one hand, and, on the other, points in Alameda, Contra Costa, Los Angeles, and Orange Counties, Calif.; that applicant is fit, willing, and able properly to perform such service and to conform to the re-

quirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a certificate in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

**APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE**

No. MC 42289 (Sub-No. 10), filed March 14, 1973. Applicant: LOMBARD BROS. INCORPORATED, 249 Mill Street, Waterbury, CT 06720. Applicant's representative: Hugh M. Joseloff, 410 Asylum Street, Hartford, CT 06103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except household goods, office furniture and equipment, and commodities requiring use of dump trucks, tank trucks, or special equipment), between points in Rhode Island. The instant application is a matter directly related to MC-F-11821 published in the FEDERAL REGISTER issue of March 28, 1973. Note: Applicant states that the requested authority can be tacked with its existing authority at Providence, R.I., and serve its presently authorized territory. If a hearing is deemed necessary, applicant requests it be held at Hartford, Conn., or Washington, D.C.

No. MC 120265 (Sub-No. 2), filed March 14, 1973. Applicant: VANDALIA AIR FREIGHT, INC., Dayton Municipal Airport, Vandalia, Ohio 45377. Applicant's representative: James R. Stiver, 50 West Broad Street, Columbus, OH 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: Regular routes: *Property*, (1) between Vandalia, Ohio, airport and Dayton, Ohio, over Interstate Highway 75, serving all intermediate points; (2) between Vandalia, Ohio, airport and Springfield, Ohio, from Vandalia airport over Interstate Highway 75 to junction Interstate Highway 70, thence over Interstate Highway 70 to Springfield, and return over the same route, serving all intermediate points; and (3) between Vandalia, Ohio, airport and Sidney, Ohio, over Interstate Highway 75, serving all intermediate points. Restriction: Restricted to transportation of property having a prior or subsequent movement by aircraft. Irregular Routes: *Property*, including property having a prior or subsequent movement by aircraft, between points in Butler Township (Montgomery

County), Ohio, on the one hand, and, on the other, points in Ohio. Restriction: Restricted against the transportation of property from or to Vandalia, Ohio (except shipments originating in or destined to a point in said Butler Township), household goods, office furniture and fixtures, furnishing dump truck service, and livestock (except when handled in connection with aircraft transportation). Note: The instant application is a matter directly related to MC-F-11805 published in the FEDERAL REGISTER issue of March 7, 1973. Quick Air Freight, Inc., acquisition of Vandalia Air Freight, Inc., and is in effect a conversion of a certificate of registration. Applicant states that the requested authority can be tacked, to a degree, with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Columbus, Ohio.

No. MC 135639 (Sub-No. 2), filed March 5, 1973. Applicant: QUEENSWAY, INC., 105 North Keyser Avenue, Old Forge, PA 18518. Applicant's representative: Morton E. Kiel, 140 Cedar Street, New York, NY 10006. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Lockport and Buffalo, N.Y.: From Lockport over New York Highway 31 to its intersection with New York Highway 425, thence over New York Highway 425 to its intersection with New York Highway 384 at North Tonawanda, thence over New York Highway 384 to Buffalo, and return over the same route, serving all intermediate points and the off-route points of Lackawanna, Gardenville, Amherst, Getzville, Pendleton, Newfane, Olcott, Akron, Depew, Lancaster, Williamsville, Wilson, and Hamburg, N.Y.; and (2) between Lockport and Rochester, N.Y.: From Lockport over New York Highway 31 to Middleport, thence over New York Highway 31E to Medina, thence over New York Highway 31 to Rochester, and return over the same route, serving all intermediate points and the off-route points of Johnson Creek, Jeddo, Carlton, Hamlin, Clarendon, Shelby, Barker, Lyndonville, and Hilton, N.Y. Note: This application is a matter directly related to MC-F-11812 to convert a certificate of registration to a certificate of public convenience and necessity, published in the FEDERAL REGISTER issue of March 14, 1973. Applicant has pending in No. MC-F-11733 a common control application, published in the FEDERAL REGISTER issue of December 13, 1972. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

**APPLICATIONS UNDER SECTIONS 5 AND 210a(b)**

The following applications are governed by the Interstate Commerce Commission's special rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 CFR 1.240).

**MOTOR CARRIERS OF PROPERTY**

No. MC-F-11820. Authority sought for control by UNITED TRUCK SERVICE, 2800 West Bayshore Road, Palo Alto, CA 94303, of (A) WEST NEBRASKA EXPRESS, INC., 515 South Beltline Highway, Scottsbluff, NE 69361, and (B) WILSON BROTHERS TRUCK LINE, INC., 700 East Fairview Street, Carthage, MO 64836, and for acquisition by O.N.C. FREIGHT SYSTEMS, and ROCOR INTERNATIONAL, and, in turn, by DAVID P. ROUSH, all of Palo Alto, Calif. 94303, of control of WEST NEBRASKA EXPRESS, INC., and WILSON BROTHERS TRUCK LINE, INC., through the acquisition by UNITED TRUCK SERVICE. Applicants' attorneys: Roland Rice, 1111 E Street NW, Suite 618, Washington, DC 20004, and Russell E. Lovell, Post Office Box 419, Scottsbluff, NE 69361. Operating rights sought to be controlled: *General commodities*, with exceptions, as a *common carrier* over regular routes, between Henry, and Omaha, Nebr., serving various intermediate and off-route points in Nebraska, between Denver, Colo., and Gering, Nebr., serving various intermediate and off-route points in Wyoming and Nebraska, between Denver, Colo., and Pine Bluffs, Wyo., serving various intermediate points in Nebraska, and Sterling, Colo., with restriction; *general commodities*, with exceptions, over irregular routes, between points in Nebraska within 25 miles of Morrill, Nebr., including Morrill, on the one hand, and, on the other, points in Nebraska, between intercontinental ballistic missile testing and launching sites, and supply points therefor, located in Logan County, Colo., and Banner, Cheyenne, Kimball, Morrill, and Scotts Bluff Counties, Nebr., with restriction; over three alternate routes for operating convenience only: *meats, meat products, and meat byproducts, etc.*, from Scottsbluff, Nebr., to points in Iowa, Kansas, Minnesota, Missouri, North Dakota, and Wisconsin, from Gordon, Nebr., to Chicago, Ill., from Scottsbluff and York, Nebr., to points in Michigan, Indiana, and Ohio, from Scottsbluff, Nebr., to Chicago, Ill., from Gering, Nebr., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia, from the plantsite and storage facility of Swift & Co., at Gering, Nebr., to points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee, from the plantsite and storage facilities of Geo. A. Hormel & Co.,

at Scottsbluff, Nebr., to points in Georgia, North Carolina, and South Carolina, with restrictions; *fresh hams*, from Austin, Minn., Sioux Falls and Huron, S. Dak., Wichita, Kans., Chicago, Ill., and points in Iowa and Missouri, to Scottsbluff, Nebr., from points in Indiana, Ohio, and Minnesota (except Austin), to Scottsbluff, Nebr., with restrictions; *frozen bakery products*, from Appleton, Wis., to points in North Dakota, South Dakota, Minnesota, those in that part of Iowa on and north of U.S. Highway 20 and on and west of U.S. Highway 169, and those in that part of Kansas on and west of U.S. Highway 75; and (B) numerous specified commodities primarily food *flour, meats, fruits, dairy products, and citrus juices*, as a *common carrier* over irregular routes, from, to, and between specified points in the States of Alabama, Louisiana, Mississippi, Missouri, Kansas, Oklahoma, Minnesota, Texas, Florida, Tennessee, Kentucky, Nebraska, Iowa, South Dakota, Wyoming, Wisconsin, Arkansas, North Dakota, Indiana, Illinois, Georgia, South Carolina, North Carolina, Arizona, California, Colorado, Nevada, New Mexico, Utah, and Montana, with certain restrictions, as more specifically described in Docket No. MC-116544 and subnumbers thereunder. This notice does not purport to be a complete description of all of the operating rights of the carrier involved. The foregoing summary is believed to be sufficient for purposes of public notice regarding the nature and extent of this carrier's operating rights, without stating, in full, the entirety, thereof. UNITED TRUCK SERVICE is authorized to operate as a *common carrier* in California. Application has been filed for temporary authority under section 210a(b).

No. MC-F-11821. Authority sought for purchase by LOMBARD BROS. INCORPORATED, 249 Mill Street, Waterbury, CT 06706, of the operating rights of JOHNSTON TRANSPORTATION, INC., 384 Charles Street, Providence, RI 02904. Applicants' attorney: Hugh M. Joseloff, 410 Asylum Street, Hartford, CT 06103. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC-118665 (Sub-No. 2), covering the transportation of *general commodities*, as a *common carrier*, in interstate commerce, within the State of Rhode Island. Vendee is authorized to operate as a *common carrier* in Connecticut, Massachusetts, Pennsylvania, New Jersey, Rhode Island, New York, Maryland, Delaware, and the District of Columbia. Application has not been filed for temporary authority under section 210a(b). Note: MC-42289 (Sub-No. 10), is a matter directly related.

No. MC-F-11822. Authority sought for control by O.N.C. FREIGHT SYSTEMS, 2800 West Bayshore Road, Palo Alto, CA 94303, of (A) NORTHWEST MOTOR FREIGHT COMPANY, and (B) CASHMERE TRANSFER COMPANY, both of 435 Rock Island Road, East Wenatchee, WA 98801, and for acquisition by ROCOR INTERNATIONAL, and, in turn, by DAVID P. ROUSH, AND DIANE

G. ROUSH, all of 2800 West Bayshore Road, Palo Alto, CA 94303, of control of NORTHWEST MOTOR FREIGHT COMPANY, and CASHMERE TRANSFER COMPANY, through the acquisition by O.N.C. FREIGHT SYSTEMS. Applicants' attorneys: George R. LaBissoniere, 1424 Washington Building, Seattle, Wash. 98101, and Martin J. Rosen, 140 Montgomery Street, San Francisco, CA 94104. Operating rights sought to be controlled: (A) *General commodities*, excepting among others, dangerous explosives, household goods and commodities in bulk, as a *common carrier* over regular routes, between Wenatchee, and Oroville, Wash., between Chelan, and Manson, Wash., between Chelan, and Chelan Falls, Wash., between junction U.S. Highway 97 and Washington Highway 16 (near Pateros, Wash.) and Winthrop, Wash., service is authorized to and from all intermediate points, between Oroville, Wash., and the port of entry on the United State-Canada boundary line, at or near Oroville, Wash., serving no intermediate points; (B) *General commodities*, excepting among others, classes A and B explosives, household goods, and commodities in bulk, as a *common carrier* over irregular routes, between points in Okanogan, Douglas, Chelan, Kittitas, Grant, and Yakima Counties, Wash., between points in Kittitas County, Wash., on the one hand, and, on the other, Seattle and Tacoma, Wash.; *household goods* as defined by the Commission, *heavy machinery, and building materials* (except cement in bulk), between points in Chelan County, Wash., on the one hand, and, on the other, points in Washington. O.N.C. FREIGHT SYSTEMS is authorized to operate as a *common carrier* in Arizona, California, Nevada, Oregon, and Washington. Application has been filed for temporary authority under section 210a(b).

No. MC-F-11823. Authority sought for purchase by COLE'S EXPRESS, 444 Perry Road, Bangor, ME 04402, of a portion of the operating rights of PEERLESS MOTOR EXPRESS, INC., Water Street, Holbrook, MA, and for acquisition by GALEN L. COLE, individually and as Trustee, of the estate of A. J. COLE, MERRILL TRUST CO., Trustees, Bangor, Maine 04402, of control of such rights through the purchase. Applicants' attorneys: Francis P. Barrett, 60 Adams Street, Milton, MA 02187, Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, MA 02043, and Roger C. Wendell, 50 Congress Street, Boston, MA 02109. Operating rights sought to be transferred: *General commodities*, excepting among others, dangerous explosives, household goods and commodities in bulk, as a *common carrier* over regular routes, between Brockton and Boston, Mass., between Holbrook and Boston, Mass., between Boston and Lowell, Mass., serving all intermediate points; *general commodities*, excepting among others, classes A and B explosives, household goods and commodities in bulk, over irregular routes, between points in Massachusetts. Vendee is authorized to operate as a

*common carrier* in Maine, Massachusetts, and New Hampshire. Application has been filed for temporary authority under section 210a(b).

No. MC-F-11824. Authority sought for purchase by CAPE COD OVERLAND EXPRESS, INC., Ladge Drive, Avon, Mass. 02322, of a portion of the operating rights of PEERLESS MOTOR EXPRESS, INC., Water Street, Holbrook, Mass., and for acquisition by HENRY F. LYONS, 59 Woodside Avenue, Brockton, MA, of control of such rights through the purchase. Applicants' attorneys: Francis P. Barrett, 60 Adams Street, Milton, MA 02187, Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, MA 02043, and Roger C. Wendell, 50 Congress Street, Boston, MA 02109. Operating rights sought to be transferred: *General commodities*, excepting among others, classes A and B explosives, household goods and commodities in bulk, as a *common carrier* over regular routes, between Boston, Mass., and Providence, R.I., serving all intermediate points, and the off-route points of Canton and Wellesley, Mass.; *general commodities*, except articles of unusual value, classes A and B explosives, livestock, carnival equipment, household goods as defined by the Commission, commodities in bulk, and commodities requiring refrigerator equipment, over irregular routes, between points within five miles of Boston, Mass., including Boston, on the one hand, and, on the other, points in Rhode Island; *shoes*, between Holbrook, Mass., and points and places in Massachusetts within ten miles of Holbrook, on the one hand, and, on the other, Providence, R.I. Vendee is authorized to operate as a *common carrier* in Massachusetts. Application has been filed for temporary authority under section 210a(b). Note: MC-52963 (Sub-No. 4), is a matter directly related.

No. MC-F-11825. Authority sought for purchase by B & T TRANSPORTATION CO., 200 Frontage Road, Boston, MA 02118, of a portion of the operating rights of PEERLESS MOTOR EXPRESS, INC., Water Street, Holbrook, MA 02343, and for acquisition by ALBERT P. SAGANSKY, AND LEONARD LEWIN, both of Boston, Mass. 02118, and RHODE LEWIN, 239 Tappan Street, Brookline, Mass., of control of such rights through the purchase. Applicants' attorneys: Francis P. Barrett, 60 Adams Street, Milton, MA 02187, Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, MA 02043, and Roger C. Wendell, 50 Congress Street, Boston, MA 02109. Operating rights sought to be transferred: *General commodities*, excepting among others, dangerous explosives, household goods and commodities in bulk, as a *common carrier* over irregular routes, between Holbrook, Mass., and points and places in Massachusetts within 10 miles of Holbrook, on the one hand, and, on the other, points and places in Connecticut. Vendee is authorized to operate as a *common carrier* in Rhode Island, Connecticut, and Massachusetts. Application has been filed for temporary authority under section 210a(b).

## NOTICES

No. MC-F-11826. Authority sought for purchase by MEADOWS VAN & STORAGE, INC., Box 1023 Shookstown Road, Frederick, MD 21701, of the operating rights and property of ROUTZAHN'S MOVING & STORAGE, INC., Frederick County, Frederick, Md. 21701, and for acquisition by VERONICA MEADOWS, 1705 West Seventh Street, Frederick, MD 21701, HARRY KEMP, Route 8, Frederick, Md. 21701, and FREDERICK KEMP, Montevue Road, Frederick, Md. 21701, of control of such rights and property through the purchase. Applicants' representative: Charles E. Creager, Suite 523, 816 Easley Street, Silver Spring, MD 20910. Operating rights sought to be transferred: Household goods, as a common carrier over irregular routes, between Hagerstown, Md., and points within 25 miles thereof, on the one hand, and, on the other, points in New York, Maryland, Pennsylvania, Virginia, West Virginia, and North Carolina. Vendee is authorized to operate as a common carrier in Maryland, Pennsylvania, Virginia, West Virginia and the District of Columbia, and as a contract carrier in Maryland, and Virginia. Application has been filed for temporary authority under section 210a(b).

No. MC-F-11827. Authority sought for purchase by JOE HODGES TRANSPORTATION CORPORATION, 1205 South Platte River Drive, Denver, CO 80223, of the operating rights of TODDMAN TRANSPORT CO., Post Office Box 13426, Fort Worth, TX 76118, and for acquisition by NAVAJO FREIGHT LINES, INC., also of Denver, Colo. 80223, of control of such rights through the purchase. Applicants' attorney and representative: Jack Goodman, 39 South La Salle Street, Chicago, IL 60603, and Frank Mikos, Revenue Officer of Internal Revenue Service, 819 Taylor Street, Fort Worth, TX 76102. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC-120750 (Sub-No. 1), covering the transportation of property, as a common carrier, in interstate commerce, within the State of Texas. Vendee is authorized to operate as a common carrier in Oklahoma and Texas. Application has been filed for temporary authority under section 210a(b). Note: MC-120634 (Sub-No. 19), is a matter directly related.

No. MC-F-11828. Authority sought for purchase by CAUPELL TRANSPORT, INC., Building 33, State Farmers Market, Forest Park, Ga. 30050, of the operating rights of W. D. FRISBEE, doing business as FRISBEE MOTOR EXPRESS, Post Office Box 591, Austell, GA

30001, and for acquisition by E. E. CAUPELL, 4410 Davidson Avenue NE., Atlanta, GA 30319, of control of such rights through the purchase. Applicants' attorney: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. Operating rights sought to be transferred: Bananas, as a common carrier over irregular routes, from Tampa, Fla., and New Orleans, La., to Atlanta, Ga., and Central City, Ky., from Mobile, Ala., Miami, Jacksonville, and Port Everglades, Fla., Charleston, S.C., and Brunswick and Savannah, Ga., to Central City, Ky., and to the site of the Georgia State Farmers Market at or near Forest Park and Atlanta, Ga., from Gulfport, Miss., to Atlanta, Ga., and Central City, Ky. Vendee is authorized to operate as a common carrier in Georgia, South Carolina, Tennessee, Florida, Alabama, Kentucky, Louisiana, North Carolina, Mississippi, and Virginia. Application has been filed for temporary authority under section 210a(b).

By the Commission.

[S.O. No. 1124]

# NATIONAL GRAIN AND FEED ASSOCIATION

**Demurrage and Free Time on Freight Cars**  
At a session of the Interstate Commerce Commission, Division 3, acting as an appellate division, held at its office in Washington, D.C., on the 20th day of March 1973.

Upon consideration of the petition filed by the National Grain and Feed Association on March 15, 1973, requesting postponement and reconsideration of Service Order No. 1124.

It appearing, that Service Order No. 1124 was issued by Division 3 in accordance with applicable law and upon its determination that an emergency exists because of an acute shortage of freight cars in all sections of the country; that the Association's members have had ample opportunity to review their operations to avoid the excessive detention of freight cars; that numerous cars are held idle for excessive periods awaiting loading or unloading; and that the petition states no errors of fact or law warranting the relief sought, and for good cause appearing;

It is ordered, That the petition be, and it is hereby, denied.

By the Commission, Division 3, acting as an appellate division.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[No. 35787]

# LOUIS PADNOS IRON & METAL CO.

## Petition for Investigation

MARCH 19, 1973.

Notice is hereby given that on December 18, 1972, Louis Padnos Iron & Metal Co. filed a petition seeking the institution of an investigation for the purpose of determining the lawfulness of the practice of the railroads in utilizing "gross v. gross" weights in considering claims for loss and damage of rail shipments of scrap iron and steel.

The petitioner asserts that it is entitled to reimbursement of its "full and actual loss", pursuant to section 20(11) of the Interstate Commerce Act, and that such loss lawfully should be measured by the difference between origin and destination net weights. Petitioner states that it is the practice of the railroads, principally the Chesapeake and Ohio Railway Co., to pay only those claims for loss established by a comparison of gross weights.

Any person interested in the matter which is the subject of the instant petition and who wishes to participate actively in any further proceedings herein shall notify this Commission, by filing with the Commission's Office of Proceedings, room 5342, on or before April 30, 1973, an original and one copy of a statement of his intention to participate. Thereafter the nature of further proceedings herein, if any, will be designated. The petition and statements of intent to participate, if any, filed with the Commission will be available for public inspection at the offices of the Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, D.C., during regular business hours.

A copy of this notice will be served upon the petitioner; and notice of the filing of this petition will be given to the general public by depositing a copy of this notice in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication therein.

[SEAL] ROBERT L. OSWALD,  
Secretary.

CHAPTER I—COAST GUARD,  
DEPARTMENT OF TRANSPORTATION

## SUBCHAPTER S—BOATING SAFETY

[CGD 72-120R]

## PART 175—EQUIPMENT REQUIREMENTS

## Personal Flotation Devices

The purpose of these amendments is to establish new carriage requirements for lifesaving equipment on certain vessels to which the Federal Boat Safety Act of 1971 applies. A notice of proposed rulemaking was published on October 6, 1972 (37 FR 21262), proposing adoption of these carriage requirements under the authority of sections 5 and 39 of the Federal Boat Safety Act of 1971 (85 Stat. 213, 215, 216, 228; 46 U.S.C. 1454, 1488; 49 CFR 146(o)(1)).

In addition a supplemental notice of proposed rulemaking was published on January 5, 1973 (38 FR 887), proposing clarification to the carriage requirements by extending the throwable device requirement to all boats.

On November 20, 1972, a public hearing was held at U.S. Coast Guard Headquarters in Washington, D.C., to receive the views of interested persons on the proposed regulations. During the period October 6, 1972, to December 11, 1972, and January 5, 1973, to January 30, 1973, written comments from interested persons were received. The Coast Guard has considered these oral and written comments in preparing the final rule.

The requirements have been developed in accordance with the requirements of section 6 of the Federal Boat Safety Act of 1971. The Boating Safety Advisory Council has been consulted and its opinions and advice have been considered in the formulation of these regulations. The transcript of the proceedings of the meeting of the Boating Safety Advisory Council at which these regulations were discussed is available for examination in Room 6240, U.S. Coast Guard Headquarters, Department of Transportation Headquarters Building, 400 Seventh Street SW., Washington, DC 20590. The minutes of the meetings are available from the Executive Director, Boating Safety Advisory Council at this address.

Several comments suggest that "ski belts" be considered as approved devices and allowed for carriage in lieu of buoyant cushions or other similar devices. The Coast Guard approves personal flotation devices which fall into two general groups; devices that an individual would wear and devices intended to be grasped by an individual in the water. A ski belt when compared to the group of devices designed to be worn does not perform satisfactorily. It provides insufficient buoyancy in the wrong location as commonly worn. People will wear ski belts in one of four ways; high or low on the front or high or low on the back. The location of the center of buoyancy of the human body being where it is, only one location (high on the front) will provide the turning moment in the water necessary to hold the wearer's face out of the water. Three out of the four ways of wearing the de-

vice afford inadequate protection. When compared to the second group, those intended to be grasped, a ski belt provides only 25 percent of the buoyancy required for a device designed to be grasped. An extensive study conducted for the Coast Guard shows that a minimum of 13 to 14 pounds buoyancy is required to support 90 percent of the American population with only their head above water (does not include any portion of neck). A ski belt offers 5 to 6 pounds buoyancy which will support only 10 percent of the population. In many instances, the strap does not pass through the foam and has been known to separate from the foam upon impact with the water (a water skier falling from his skis). Ski belts are not Coast Guard approved, but may be carried as excess equipment in addition to the required approved devices.

One comment spoke to a type of lifesaving device used by lifeguards. This is a device similar in appearance to a ski belt, but one that is not worn by water skiers. This particular device provides over 16 pounds of buoyancy and when put on the victim (high on the front) allows the lifeguard to tow the floating victim onto shore. This device is not Coast Guard approved, but may be carried as excess equipment.

Several comments were received with regard to the acceptability of a wet suit as a suitable replacement for a PFD. The wet suit has not been formally submitted to the Coast Guard for approval. However, the wet suit has been evaluated for cold weather operations. During this evaluation it was determined that the wet suit in no way met any of the performance (amount and location of buoyancy) criteria for PFD approval.

Several comments spoke to the carriage of a Type IV PFD (throwable device) for man-overboard protection. After reviewing the several comments with regard to the supplemental Notice of Proposed Rule Making, the Coast Guard is revising the proposed requirement for the additional throwable device. Boats 16 feet in length and longer, except canoes and kayaks, are required to carry at least one Type IV PFD in addition to the required devices. The notice (37 FR 21262) set the break point at 26 feet, but it was felt that boats in the 16 to 26 foot category would also require the man-overboard protection afforded to the larger boats in the original proposal. On boats less than 16 feet in length, there is no mandatory requirement for the Type IV device. A great majority of boats less than 16 feet in length normally carry cushions as the required device. On most of these boats there is limited space to stow additional items such as a throwable device. Also, many racing associations require the participants to wear their devices when engaged in racing activities. In addition, the boats in the less than 16 foot category are very maneuverable and generally have low freeboard, making reboarding easier. It is therefore not necessary to require a Type IV throwable device for the smaller boats. The Coast Guard will study this area further. It should be

pointed out that the buoyant cushion will continue to be a Coast Guard approved device.

Several comments suggested that carriage requirements be based on where the boat is used and distance from shore traveled. With this setup a boatman would be faced with different criteria during a voyage depending on the waters to be used and the distance he was from the shore. This approach would put an undue burden on the boatman. One comment suggested requiring the PFD to be worn. The purpose of these regulations was to give the boatman a wide choice of approved devices with corresponding performance information from which he could choose an appropriate device for his particular use. The choice of device and whether to wear it or not is left up to the boatman.

One comment suggested that Types I, II, and III be allowed as throwable devices. There are different buoyancy and actual performance criteria for the Type IV than for the other devices. The approval specifications for the Type IV device are based in part on a throwing criteria. Also the performance of Types I, II, and III are different if they are grasped than if worn as they are intended to be. The Type IV when grasped keeps a body higher out of the water than do the Types I, II, and III because of greater buoyancy provided.

Several comments suggested that the Type IV be one of the required devices on boats 16 feet or longer in length. One of the reasons for accepting cushions (Type IV) on smaller boats is because of limited storage space on these boats. On boats 16 feet in length and longer the storage problem is not present, and therefore, the larger devices can be adequately stowed.

One comment questioned the legal authority to regulate private citizens using a private boat. The authority is section 5(a)(2) of the Federal Boat Safety Act of 1971 (Public Law 92-75), which provides: "The Secretary may issue regulations requiring the installation, carrying, or using of associated equipment on boats and classes of boats subject to this Act; and prohibiting the installation, carrying, or using of associated equipment which does not conform with safety standards established under this section. Equipment contemplated by this clause includes, but is not limited to, fuel systems, ventilation systems, electrical systems, navigational lights, sound producing devices, firefighting equipment, lifesaving devices, signaling devices, ground tackle, life and grab rails, and navigational equipment."

Several comments concerning exemption of racing canoes, racing shells, rowing sculls, and racing kayaks, were directed to the regulations "Interim Requirements" published in the February 16, 1972 (37 FR 3433) FEDERAL REGISTER. These comments were answered in the October 6, 1972, notice of proposed rulemaking (37 FR 21263).

One comment suggested that the Type IV throwable device be readily accessible instead of immediately available. This device which would be used for man over-

board protection, should be so located that it can be put to immediate use in an emergency.

Several miscellaneous comments not specifically directed to the notice of proposed rule making were received. The comments on signal lights for PFD's, inflatable boats in lieu of PFD's, and coloring schemes for search and rescue purposes will be reviewed and be a basis for possible future revisions to the regulations.

The effective date of the regulations is October 1, 1973. This date should allow adequate time to properly educate the boatman on the new requirements. However, if a person wishes to follow the new requirements, he will be considered in compliance with the existing requirements.

These regulations revoke the requirements presently applicable to uninspected recreational motorboats in 46 CFR 25.25 and also the interim requirements in 33 CFR Part 199 presently applicable to boats propelled or controlled by oars, paddles, poles, sail, or by another vessel.

This amendment to Subchapter S applies to recreational boats as defined in § 175.3(b). An amendment to Subchapter C, Chapter I of title 46, which appears in this issue of the FEDERAL REGISTER at page 8116, contains the requirements for vessels carrying six or fewer passengers as well as other requirements.

In consideration of the foregoing, Subchapter S of Title 33 of the Code of Federal Regulations is amended by adding a new Part 175 to read as follows:

## Subpart A—General

Sec.	Applicability.
175.1	Definitions.
175.3	Definitions.

## Subpart B—Personal Flotation Devices

175.11	Applicability.
175.13	Definitions.
175.15	Personal flotation devices required.
175.17	Exceptions.
175.19	Stowage.
175.21	Condition; approval; marking.
175.23	Personal flotation device equivalents.

AUTHORITY: Secs. 5 and 39 of the Federal Boat Safety Act of 1971, 46 U.S.C. 1454, 1488; 49 CFR 146(o)(1).

## Subpart A—General

## § 175.1 Applicability.

This part prescribes rules governing the use of boats on waters subject to the jurisdiction of the United States and on the high seas beyond the territorial seas for boats owned in the United States except—

(a) Foreign boats temporarily using waters subject to U.S. jurisdiction;

(b) Military or public boats of the United States, except recreational-type public vessels;

(c) A boat whose owner is a State or subdivision thereof, which is used principally for governmental purposes, and which is clearly identifiable as such;

(d) Ship's lifeboats.

## § 175.3 Definitions.

As used in this part:

(a) "Boat" means any vessel manufactured or used primarily for noncommer-

cial use; leased, rented, or chartered to another for the latter's noncommercial use; or engaged in the carrying of six or fewer passengers.

(b) "Recreational boat" means any vessel manufactured or used primarily for noncommercial use; or leased, rented, or chartered to another for the latter's noncommercial use. It does not include a vessel engaged in the carrying of six or fewer passengers.

(c) "Vessel" includes every description of watercraft, other than a seaplane on the water, used or capable of being used as a means of transportation on the water.

(d) "Use" means operate, navigate, or employ.

(e) "Passenger" means every person carried on board a vessel other than—

(1) The owner or his representative;

(2) The operator;

(3) Bona fide members of the crew engaged in the business of the vessel who have contributed no consideration for their carriage and who are paid for their services; or

(4) Any guest on board a vessel which is being used exclusively for pleasure purposes who has not contributed any consideration, directly or indirectly, for his carriage.

(f) "Racing shell, rowing scull, and racing kayak" means a manually propelled boat that is recognized by national or international racing associations for use in competitive racing and one in which all occupants row, scull, or paddle, with the exception of a coxswain, if one is provided, and is not designed to carry and does not carry any equipment not solely for competitive racing.

## Subpart B—Personal Flotation Devices

## § 175.11 Applicability.

This subpart applies to all recreational boats that are propelled or controlled by machinery, sails, oars, paddles, poles, or another vessel except racing shells, rowing sculls, and racing kayaks.

## § 175.13 Definitions.

As used in this subpart:

(a) "Personal flotation device" means a device that is approved by the Commandant under 46 CFR 160.

(b) "PFD" means "personal flotation device".

## § 175.15 Personal flotation devices required.

(a) Except as provided in § 175.17, no person may use a recreational boat less than 16 feet in length or a canoe or kayak unless at least one PFD of the following types or their equivalents listed in Table 175.23 is on board for each person:

- (1) Type I PFD.
- (2) Type II PFD.
- (3) Type III PFD.
- (4) Type IV PFD.

(b) No person may use a recreational boat 16 feet or more in length, except a canoe or kayak, unless at least one PFD of the following types or their equivalents listed in Table 175.23 is on board for each person:

- (1) Type I PFD.

(2) Type II PFD.

(3) Type III PFD.

(c) No person may use a recreational boat 16 feet or more in length, except a canoe or kayak, unless at least one type IV PFD or its equivalent listed in Table 175.23 is on board in addition to the PFD's required in paragraph (b) of this section.

## § 175.17 Exceptions.

(a) A person using a canoe or kayak that is enclosed by a deck and spray skirt need not comply with § 175.15(a) if he wears a vest-type lifesaving device that—

(1) Has not less than 150 separate permanently inflated air sacs made of not less than 12 mil polyvinylchloride film and has not less than 13 pounds of positive buoyancy in fresh water, if worn by a person who weighs more than 90 pounds; or

(2) Has not less than 120 separate permanently inflated air sacs made of not less than 12 mil polyvinylchloride film and has not less than 8½ pounds of positive buoyancy in fresh water, if worn by a person who weighs 90 pounds or less.

(b) A type V PFD may be carried in lieu of any PFD required in § 175.15 if that type V PFD is approved for the activity in which the recreational boat is being used.

## § 175.19 Stowage.

(a) No person may use a recreational boat unless each type I, type II, type III, or type V PFD required by § 175.15 or 175.17 is readily accessible.

(b) No person may use a recreational boat unless each type IV PFD required by § 175.15 is immediately available.

## § 175.21 Conditions; approval; marking.

No person may use a recreational boat unless each device required by § 175.15, or each device allowed by § 175.17, is—

- (a) In serviceable condition;
- (b) Legibly marked with the approval number as specified in 46 CFR Part 160 for items subject to approval; and
- (c) Of an appropriate size for the person for whom it is intended.

## § 175.23 Personal flotation device equivalents.

Table 175.23 lists devices that are equivalent to personal flotation devices.

TABLE 175.23

Devices marked—	Are equivalent to performance type
160.002 Life preserver.	Type I personal flotation device.
160.003 Life preserver.	Do.
160.004 Life preserver.	Do.
160.005 Life preserver.	Do.
160.009 Ring life buoy	Type IV personal flotation device.
160.047 Buoyant vest.	Type II personal flotation device.
160.048 Buoyant cushion.	Type IV personal flotation device.
160.049 Buoyant cushion.	Do.
160.050 Ring life buoy	Do.
160.052 Buoyant vest.	Type II personal flotation device.
160.053 Work vest.	Type V personal flotation device.
160.055 Life preserver.	Type I personal flotation device.

9. The Coast Guard should require the use of a "non-skid" material on the cover of all throwable devices (type IV).

10. Include in the marking of PFD exactly how long a device will sustain a certain weight individual.

11. Standards which are at least equivalent to those followed by American manufacturers should be required of foreign manufacturers as well.

The Coast Guard found merit in some of the comments received, however, only two referred directly to the proposed changes. The first suggested an effective date of September 1, 1973, however, a later effective date has been chosen with allowance for a manufacturer to comply prior to the effective date if he so wishes. The second comment suggested a different terminology for the classification of personal flotation devices, however, due to the amount of publicity already given the proposed type classification the Coast Guard has chosen to remain with the proposed terminology. The remaining comments which were not directed at the proposed changes will be taken under consideration for the purposes of future changes in the regulations.

A paragraph has been added to allow PFD manufacturers to delay meeting the new requirements until the start of their next season (Nov. 1, 1973). It is permissible, however, to meet the new requirements any time after the effective date. In consideration of the foregoing, Subchapter Q of Title 46 Code of Federal Regulations is amended as follows:

1. By amending § 160.002-1 by adding paragraph (d) to follow paragraph (c) and to read as follows:

§ 160.002-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of life preservers having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

By revising § 160.002-2 to read as follows:

§ 160.002-2 Size and model.

Each life preserver specified in this subpart is to be a:

(a) Model 3, adult, 24 ounces kapok; or

(b) Model 5, child, 16 ounces kapok.

3. By revising § 160.002-6 to read as follows:

§ 160.002-6 Marking.

Each life preserver must have the following clearly marked in waterproof ink on a front section:

(a) In letters three-quarters of an inch or more in height:

(1) Adult (for persons weighing over 90 pounds); or

(2) Child (for persons weighing less than 90 pounds).

(b) In letters capable of being read at a distance of 2 feet:

Type I—personal flotation device.

Kapok life preserver.

Designed to turn unconscious wearer face up in water.

Approved for use on all vessels by persons weighing (more than 90 pounds or less than 90 pounds).

U.S. Coast Guard Approval No. 160.002 (assigned manufacturers' No.); (revision No.); (model No.); (Name and address of manufacturer or distributor); (lot No.).

4. By amending § 160.005-1 by adding paragraph (d) to follow paragraph (c) and to read as follows:

§ 160.005-1 Applicable specification and plans.

(d) *Permissible extension.* Manufacturers of life preservers having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

5. By revising § 160.005-2 to read as follows:

§ 160.005-2 Size and model.

Each life preserver specified in this subpart is a:

(a) Model 52, adult, 46 ounces fibrous glass; or

(b) Model 56, child, 30 ounces fibrous glass.

6. By revising § 160.005-6 to read as follows:

§ 160.005-6 Marking.

Each life preserver must have the following clearly marked in waterproof lettering on a front section:

(a) In letters three-fourths inch or more in height:

(1) Adult (for persons weighing over 90 pounds); or

(2) Child (for persons weighing less than 90 pounds).

(b) In letters capable of being read at a distance of 2 feet:

Type I—personal flotation device.

Fibrous glass life preserver.

Designed to turn unconscious wearer face up in water.

Approved for use on all vessels by persons weighing (more than 90 pounds or less than 90 pounds).

U.S. Coast Guard Approval No. 160.005 (assigned manufacturers' No.); (revision No.); (model No.); (Name and address of manufacturer or distributor); (lot No.).

7. By revising the heading of Subpart 160.009 to read as follows:

Subpart 160.009—Specification for a Buoy, Life Ring, Cork or Balsa Wood for Merchant Vessels and Boats

8. By revising § 160.009-1 by adding paragraph 160.009-1(d) to follow paragraph 160.009-1(c) and to read as follows:

§ 160.009-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of ring life buoys having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

9. By amending § 160.009-2 by revising paragraph (a) to read as follows:

§ 160.009-2 Type and size.

(a) *Type.* Each ring life buoy specified in this subpart must be made of:

(1) Cork; or

(2) Balsa wood.

10. By amending § 160.009-3 by revising paragraph (a) and adding paragraph (a-1) to read as follows:

§ 160.009-3 Materials.

(a) *Cork.* All sheet cork used in a cork ring life buoy must comply with Subpart 164.001 of this chapter.

(a-1) *Balsa wood.* All balsa wood used in a ring life buoy must comply with Subpart 164.002 of this chapter.

11. By revising the heading and paragraph (a) and subparagraph (b) (4) of § 160.009-4 to read as follows:

§ 160.009-4 Construction, workmanship, and performance standards.

(a) *General.* This specification covers ring life buoys, consisting of a body constructed in the shape of a ring with an approximately elliptical cross section as illustrated by Drawing No. 160.009, which provide buoyancy to aid in keeping persons afloat in the water. Alternate arrangements meeting the performance requirements of this specification will be given special consideration.

(b) *Waterproof finish for balsa wood life ring buoys.* The entire finished body of each balsa wood ring life buoy must have a copious coat of waterproof glue that has dried thoroughly before the cover is placed on the buoy. The waterproof glue must be equivalent to the products having trade names of "Hydrotuf," "Synthetic Plasooleum," and "Balsa Wood Coating."

(4) *Waterproof finish for balsa wood life ring buoys.* The entire finished body of each balsa wood ring life buoy must have a copious coat of waterproof glue that has dried thoroughly before the cover is placed on the buoy. The waterproof glue must be equivalent to the products having trade names of "Hydrotuf," "Synthetic Plasooleum," and "Balsa Wood Coating."

12. By revising § 160.009-6 to read as follows:

§ 160.009-6 Marking.

Each ring life buoy must have the following information clearly marked in waterproof lettering:

(a) On the body:

Passed, U.S. Coast Guard, (Inspection Date), (Inspector's Initials), (Port)

(Name and address of manufacturer or distributor)

(Size of buoy.)

Coast Guard Approval No. 160.009/assigned manufacturers' No.)/(revision No.).

(b) On the cover:

Type IV—Personal flotation device. (Cork or balsa wood) ring life buoy.

Designed to be thrown to a person in the water.

Approved for general use on recreational boats, less than 16 feet in length and as a throwing device for all vessels.

Approved, U.S. Coast Guard (Inspection date), (Inspector's Initials), (port).

(Name and address of manufacturer or distributor.)

Coast Guard Approval No. 160.009/(assigned manufacturers' No.)/(revision No.).

(Size of buoy.)

(The lot No.)

13. By revising the heading of Subpart 160.047 to read as follows:

Subpart 160.047—Specification for a Buoyant Vest, Kapok or Fibrous Glass, Adult and Child

14. By amending § 160.047-1 by revising paragraph (d) to read as follows:

§ 160.047-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of buoyant vests having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

15. By revising § 160.047-2 to read as follows:

§ 160.047-2 Model.

Each buoyant vest specified in this subpart is a:

(a) Model AK-1, adult, kapok (for persons weighing more than 90 pounds);

(b) Model AF-1, adult, fibrous glass (for persons weighing more than 90 pounds);

(c) Model CKM-1, child medium, kapok (for children weighing from 50 to 90 pounds);

(d) Model CFM-1, child medium, fibrous glass (for children weighing from 50 to 90 pounds);

(e) Model CKS-1, child small kapok (for children weighing less than 50 pounds); or

(f) Model CFS-1, child small, fibrous glass (for children weighing less than 50 pounds).

16. By revising § 160.047-6 to read as follows:

§ 160.047-6 Marking.

(a) Each buoyant vest must have the following information clearly marked in waterproof lettering:

Type II—Personal flotation device. (Kapok or fibrous glass) buoyant vest.

Designed to turn unconscious wearer face up in water.

Dry out thoroughly when wet.

Do not puncture or snag inner plastic covers.

If pads become waterlogged, replace vest.

Approved for use on uninspected commercial vessel less than 40 feet in length not carrying passengers for hire and all recreational boats by persons weighing (more than 90 pounds or 50 to 90 pounds or less than 50 pounds).

U.S. Coast Guard Approval No. 160.047/(assigned manufacturers' No.)/(revision No.); (model No.).

(Name and address of manufacturer or distributor.)

(Lot No.)

(d) *Permissible extension.* Manufacturers of buoyant cushions having ap-

(b) *Waterproof marking tags.* Marking for buoyant vests shall be sufficiently waterproof so that after 72 hours submergence in water, it will withstand vigorous rubbing by hand while wet without the printed matter becoming illegible.

17. By revising the heading of Subpart 160.048 to read as follows:

Subpart 160.048—Specification for a Buoyant Cushion, Fibrous Glass

18. By amending § 160.048-1 by revising paragraph (d) to read as follows:

§ 160.048-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of buoyant cushions having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

19. By amending § 160.048-6 by revising paragraph (a) to read as follows:

§ 160.048-6 Marking.

(a) Each buoyant cushion must have the following information clearly marked in waterproof lettering:

Type IV—Personal flotation device. (Kapok or fibrous glass) buoyant cushion.

Designed to be thrown to a person in the water.

Warning: Do not wear on back.

Do not puncture or snag inner plastic cover.

Dry out thoroughly when wet.

Replace when waterlogged.

Approved for use on recreational boats less than 16 feet in length, and as a throwing device on recreational boats.

U.S. Coast Guard Approval No. 160.048/(assigned manufacturers' No.)/(revision No.); (model No.).

(Name and address of manufacturer or distributor.)

(Lot No.)

(Size: width, thickness and length, both top and bottom for trapezoidal cushions.)

§ 160.048-7 [Amended]

20. By amending § 160.048-7 by revoking the last sentence of paragraph (a), and revoking paragraph (a) (1).

21. By adding § 160.048-7a to follow § 160.048-7 and to read as follows:

§ 160.048-7a Designated recognized laboratory.

Underwriters' Laboratories, Inc., Marine Department, Tampa East Industrial Park, 2602 Tampa East Boulevard, Tampa, FL 33619, is a recognized laboratory.

22. By revising the heading of Subpart 160.049 to read as follows:

Subpart 160.049—Specification for a Buoyant Cushion Plastic Foam

23. By amending § 160.049-1 by revising paragraph (d) to read as follows:

§ 160.049-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of buoyant cushions having ap-

proval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of the subpart.

24. By revising § 160.049-4(c) to read as follows:

§ 160.049-4 Construction and workmanship.

(c) *Buoyant material.* A buoyant insert for a buoyant cushion must comply with the requirements in paragraph (c) (1) and (2) of this section and may be:

(1) Molded in one piece; or

(2) Built up from sheet material if it is formed from:

(i) Three pieces or less in each layer, cemented together with an all-purpose vinyl adhesive such as or equivalent to U.S. Rubber No. M-6256 or Minnesota Mining No. EC-870 and No. EC-1070;

(ii) Three layers or less that may be cemented; and

(iii) Staggered butts and seams of adjacent layers.

25. By amending § 160.049-6 by revising paragraph (a) to read as follows:

§ 160.049-6 Marking.

(a) Each buoyant cushion must have the following information clearly marked in waterproof lettering:

Type IV—personal flotation device. Unicellular plastic foam buoyant cushion.

Designed to be thrown to a person in the water.

Warning: Do not wear on back.

Dry out thoroughly when wet.

Approved for use on recreational boats, less than 16 feet in length, and as a throwing device for recreational boats.

U.S. Coast Guard Approval No. 160.049 (assigned manufacturers' No.) (revision No.); (model No.); (Name and address of manufacturer and distributor).

(Lot No.)

(Size: width, thickness and length, both top and bottom for trapezoidal cushions.)

§ 160.049-7 [Amended]

26. By amending § 160.049-7 by revoking the last sentence of paragraph (a), and revoking paragraph (a) (1).

27. By adding § 160.049-7a to follow § 160.049-7 and to read as follows:

§ 160.049-7a Designated recognized laboratory.

Underwriters' Laboratories, Inc., Marine Department, Tampa East Industrial Park, 2602 Tampa East Boulevard, Tampa, FL 33619, is a recognized laboratory.

28. By revising the heading of Subpart 160.050 to read as follows: Subpart 160.050—

Specification for a Buoy, Life Ring, Unicellular Plastic

29. By amending § 160.050-1 by adding paragraph (d) to follow paragraph (c) and to read as follows:

§ 160.050-1 Applicable specifications and plans.

## RULES AND REGULATIONS

(d) *Permissible extension.* Manufacturers of ring life buoys having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

30. By revising § 160.050-6 to read as follows:

## § 160.050-6 Marking.

(a) On a sturdy, corrosion-resistant nameplate, permanently attached to the becket, each ring buoy must have the following information in waterproof lettering:

Type IV—personal flotation device.  
Unicellular plastic foam ring life buoy.  
Designed to be thrown to a person in the water.

Approved for use on recreational boats, less than 16 feet in length, and a throwing device for all vessels.

U.S. Coast Guard Approval No. 160.050 (assigned manufacturers' No.) (revision No.); (model No.).

(Name and address of manufacturer and distributor.)

(Size of buoy.)  
(U.S.C.G. Inspector's Initials.)  
(Lot No.)

(b) A method of marking that is different from the requirements of paragraph (a) of this section may be given consideration by the Coast Guard.

31. By revising the heading of Subpart 160.052 to read as follows:

## Subpart 160.052—Specification for a Buoyant Vest, Unicellular Plastic Foam, Adult and Child

32. By amending § 160.052-1 by revising paragraph (d) to read as follows:

## § 160.052-1 Applicable specifications and plans.

(d) *Permissible extension.* Manufacturers of buoyant vests having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this Subpart.

33. By revising § 160.052-2 to read as follows:

## § 160.052-2 Size and model.

(a) A standard buoyant vest is manufactured in accordance with a plan specified in § 160.052-1(b) and is a:

(1) Model AP, adult (for persons over 90 pounds);

(2) Model CPM, child, medium (for persons weighing from 50 to 90 pounds); or

(3) Model CPS, child, small (for persons weighing less than 50 pounds).

(b) A nonstandard buoyant vest is:

(1) Manufactured in accordance with the manufacturer's approved plan;

(2) Equivalent in performance to the standard buoyant vest; and

(3) Assigned a model designation by the manufacturer for the following sizes:

(i) Adult (for persons weighing over 90 pounds);

(ii) Child, medium (for persons weighing from 50 to 90 pounds);

(iii) Child, small (for persons weighing less than 50 pounds).

34. By revising the heading of § 160.052-3 to read as follows:

## § 160.052-3 Materials—standard vests.

35. In § 160.052-4 by revising the heading and paragraph (a) to read as follows:

## § 160.052-4 Materials—nonstandard vests.

(a) *General.* All materials used in nonstandard buoyant vests must be equivalent to those specified in § 160.052-3 and be obtained from a supplier who furnishes an affidavit in accordance with the requirement in § 160.052-3(a).

36. By revising the heading of § 160.052-5 to read as follows:

## § 160.052-5 Construction—standard vests.

37. By revising § 160.052-6 to read as follows:

## § 160.052-6 Construction—nonstandard vests.

(a) *General.* The construction methods used for nonstandard buoyant vests must be equivalent to those requirements in § 160.052-5 for a standard vest and also meet the requirements in this section.

(b) *Size.* Each nonstandard vest must contain the following volume of plastic foam buoyant material, determined by the displacement method:

(1) Five hundred cubic inches or more for an adult size;

(2) Three hundred and fifty cubic inches or more for a child, medium size;

(3) Two hundred and twenty-five cubic inches or more for a child, small size.

(c) *Arrangement of buoyant material.* The buoyant material in a nonstandard vest must:

(1) Be arranged to hold the wearer in an upright or backward position with head and face out of water;

(2) Have no tendency to turn a wearer face downward in the water; and

(3) Be arranged so that 70 to 75 percent of the total is located in the front of the vest.

(d) *Neck opening.* Each cloth-covered nonstandard vest must have at the neck opening:

(1) A gusset; or

(2) Reinforcing tape.

(e) *Adjustment, fit, and donning.* Each nonstandard vest must be made with adjustments to:

(1) Fit a range of wearers for the type designed; and

(2) Facilitate donning time for an uninitiated person.

38. By amending § 160.052-7 by revising the heading, paragraph (g), and the heading of paragraph (c) to read as follows:

## § 160.052-7 Inspections and tests—standard and nonstandard vests.

(c) *Additional compliance tests.*

(g) *Additional approval tests for nonstandard vests.* Tests in addition to those required by this section may be conducted by the inspector for nonstandard vests to determine performance equivalence to a standard vest. Such additional tests may include determining performance in water, suitability of materials, donning time, ease of adjustment, and similar equivalency tests. Costs of any additional tests must be assumed by the manufacturer.

39. By revising § 160.052-8 to read as follows:

## § 160.052-8 Marking—standard and nonstandard vests.

(a) Each buoyant vest must have the following information clearly marked in waterproof lettering:

Type II—Personal flotation device.  
Unicellular plastic foam buoyant vest.  
Designed to turn unconscious wearer face up in water.

Dry out thoroughly when wet.  
Approved for use on uninspected commercial vessels less than 40 feet in length not carrying passengers for hire and all recreational boats by persons weighing (more than 90 pounds or 50 to 90 pounds or less than 90 pounds).

U.S. Coast Guard Approval No. 160.052 (assigned manufacturers' No.) (revision No.); (model No.).

(Name and address of manufacturer or distributor.)

(b) *Waterproof marking.* Marking for buoyant vests shall be sufficiently waterproof so that after 72 hours submergence in water it will withstand vigorous rubbing by hand while wet without the printed matter becoming illegible.

40. By revising the introductory text of paragraph (a) to read as follows:

## § 160.052-9 Procedure for listing and labeling.

(a) A recognized laboratory must inform each manufacturer that requests listing and labeling of a buoyant vest for use on a boat not carrying passengers for hire, of the procedures for—

(1) Model 62, adult (for persons weighing over 90 pounds); or

(2) Model 66, child (for persons weighing less than 90 pounds); or

(b) Standard, bib type, cloth covered:

(1) Model 63, adult (for persons weighing over 90 pounds); or

(2) Model 67, child (for persons weighing less than 90 pounds); or

(c) Nonstandard, shaped type:

(1) Model, adult (for persons weighing over 90 pounds); or

(2) Model, child (for persons weighing less than 90 pounds).

45. By revising the heading of § 160.053-1 to read as follows:

## § 160.053-1 Applicable specifications.

(c) *Permissible extension.* Manufacturers of workvests having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

42. By revising § 160.053-5(a) to read as follows:

## § 160.053-5 Marking.

(a) Each workvest must have the following information clearly printed in waterproof ink on a cloth tag attached to the envelope by stitching along the edges of the tag:

Type V—Personal flotation device.  
Unicellular plastic foam workvest.  
Designed to turn an unconscious wearer face up in the water.

Approved for use on merchant vessels when engaged in work activities.

U.S. Coast Guard Approval No. 160.053 (assigned manufacturers' No.) (revision No.); (model No.).

(Name and address of manufacturer or distributor.)

"This vest is filled with unicellular plastic foam, which repeated wettings will not injure. When vest is wet, hang up and dry thoroughly."

(b) Vinyl dip coating; and

(c) Fitted and adjustable body strap.

43. By revising § 160.055-1 by adding paragraph (d) to follow paragraph (c) and to read as follows:

## § 160.055-1 Applicable specification and plans.

(d) *Permissible extension.* Manufacturers of life preservers having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of this subpart.

44. By revising § 160.055-2 to read as follows:

## § 160.055-2 Type and model.

Each life preserver specified in this subpart is a:

(a) Standard, bib type, vinyl dip coated:

(1) Model 62, adult (for persons weighing over 90 pounds); or

(2) Model 66, child (for persons weighing less than 90 pounds); or

(b) Standard, bib type, cloth covered:

(1) Model 63, adult (for persons weighing over 90 pounds); or

(2) Model 67, child (for persons weighing less than 90 pounds); or

(c) Nonstandard, shaped type:

(1) Model, adult (for persons weighing over 90 pounds); or

(2) Model, child (for persons weighing less than 90 pounds).

45. By revising the heading of § 160.055-3 to read as follows:

## § 160.055-3 Materials—standard life preservers.

46. By revising § 160.055-4 to read as follows:

## § 160.055-4 Materials—nonstandard life preservers.

All materials used in nonstandard life preservers must be equivalent to those

1 A model designation for each nonstandard life preserver is to be assigned by the manufacturer. That designation must be different from any standard lifesaving device designation.

## RULES AND REGULATIONS

specified in § 160.055-3 for standard life preservers.

47. By amending § 160.055-5 by revising the heading and introductory texts of paragraphs (b) and (c) to read as follows:

## § 160.055-5 Construction—standard life preservers.

(b) *Construction—standard, vinyl dip coated life preserver.* This device is constructed from one piece of unicellular plastic foam with a:

(1) Neck hole and the body slit in the front;

(2) Vinyl dip coating; and

(3) Fitted and adjustable body strap.

(c) *Construction—standard, cloth covered life preserver.* This device is constructed from three sections of unicellular plastic foam contained in a cloth envelope and has:

(1) A neck hole;

(2) The body slit in the front; and

(3) A fitted and adjustable body strap.

48. By revising § 160.055-6 to read as follows:

## § 160.055-6 Construction—nonstandard, life preservers.

(a) *General.* The construction methods used for a nonstandard life preserver must be equivalent to the requirements in § 160.055-5 for a standard life preserver and also meet the requirements in this section.

(b) *Size.* Each nonstandard life preserver must contain the following volume of plastic foam buoyant material, determined by the displacement method:

(1) 700 cubic inches or more for an adult size;

(2) 350 cubic inches or more for a child size.

(c) *Arrangement of buoyant materials.* The buoyant material in nonstandard life preservers must:

(1) Be arranged to hold the wearer in an upright or backward position with head and face out of water;

(2) Have no tendency to turn the wearer face downward in the water; and

(3) Be arranged so that 68 to 73 percent of the total is located in the front of the life preserver.

(d) *Adjustment, fit, and donning.* Each nonstandard life preserver must be capable of being:

(1) Worn reversed;

(2) Adjusted to fit a range of wearers for the type designed; and

(3) Donned in a time comparable to that of a standard life preserver.

49. By amending § 160.055-7 by revising the heading and paragraph (i) to read as follows:

## § 160.055-7 Sampling, test, and inspections—standard and nonstandard life preservers.

(i) *Additional tests for nonstandard life preservers.* Tests in addition to those required by this section may be required for nonstandard life preservers to deter-

mine performance equivalence to a standard preserver. Such additional tests may include determining performance in the water, suitability of materials, donning time, ease of adjustment, and similar equivalency tests. Costs for any additional tests must be assumed by the manufacturer.

50. By revising § 160.055-8 to read as follows:

## § 160.055-8 Marking—standard and nonstandard life preservers.

Each life preserver must have the following information clearly marked in waterproof lettering:

(a) In letters three-fourth of an inch or more in height;

(1) Adult (for persons weighing over 90 pounds); or

(2) Child (for persons weighing less than 90 pounds).

(b) In letters capable of being read at a distance of 2 feet:

Type I—personal flotation device.  
Unicellular plastic foam life preserver.  
Designed to turn unconscious wearer face up in water.

Approved for use on all vessels by persons weighing (more than 90 pounds or less than 90 pounds).

U.S. Coast Guard Approval No. 160.055 (assigned manufacturers' No.); (revision No.); (model No.); (Name and address of manufacturer or distributor); (lot No.).

51. By amending § 160.055-9 by revising the heading and paragraphs (b) and (c), and adding paragraphs (b-1) and (c-1) to read as follows:

## § 160.055-9 Procedure for approval—standard and nonstandard life preservers.

(b) *Assignment of inspector; standard life preservers.* Upon receipt of an approval of a standard life preserver, a Coast Guard inspector is assigned to the factory to:

(1) Observe the production facilities and manufacturing methods;

(2) Select from a lot of 10 manufactured life preservers or more, three or more of each model for examination;

(3) Test the selected sample for compliance with the requirements of this subpart; and

(4) Forward to the Commandant a copy of his report of the tests and the production and manufacturing facilities, a specimen life preserver selected from those already manufactured but not tested, and one copy of an affidavit for each material used in the life preservers.

(b-1) *Approval number—standard life preserver.* An approval number is assigned to the manufacturer by the Coast Guard for a standard life preserver found to be in compliance with the requirements of this subpart.

(c) *Assignment of inspector—nonstandard life preserver.* Upon receipt of an application from a manufacturer for approval of nonstandard life preservers, an inspector is assigned to the factory to:

(1) Observe the production facilities and manufacturing methods;

## RULES AND REGULATIONS

(2) Select three samples of life preservers of each model for which approval is desired:

- (3) Forward to the Commandant:
  - (i) Three samples of each model of life preserver;
  - (ii) A copy of the inspector's report of tests and the production and manufacturing facilities; and
  - (iii) Four copies each of fully dimensioned, full-scale drawings showing all details of construction of the sample life preservers submitted, material affidavits, and four copies of a bill of materials showing all materials used in construction of the life preservers submitted by the manufacturer.

(c-1) *Approval number—nonstandard life preserver.* An official approval number is assigned to the manufacturer by the Coast Guard for a nonstandard life preserver approved after tests.

52. By revising the heading of Subpart 160.060 to read as follows:

**Subpart 160.060—Specification for a Buoyant Vest, Unicellular Polyethylene Foam, Adult and Child**

53. By amending § 160.060-1 by revising paragraph (d) to read as follows:

§ 160.060-1 *Applicable specifications and plans.*

(d) *Permissible extension.* Manufacturers of buoyant vests having approval numbers issued prior to April 30, 1973, may continue to mark the devices under the terms of that approval until November 1, 1973. Those manufacturers having approval numbers issued after April 30, 1973, shall comply with the requirements of the subpart.

54. By revising § 160.060-2 to read as follows:

§ 160.060-2 *Type and model.*

Each buoyant vest specified in this subpart is a:

- (a) *Standard:*
  - (1) Model AY, adult (for persons weighing over 90 pounds); or
  - (2) Model CYM, child, medium (for children weighing from 50 to 90 pounds); or
  - (3) Model CYS, child, small (for children weighing less than 50 pounds); or
- (b) *Nonstandard:*
  - (1) Model<sup>1</sup> adult (for persons weighing over 90 pounds);
  - (2) Model<sup>1</sup> child, medium (for persons weighing from 50 to 90 pounds) or
  - (3) Model<sup>1</sup> child, small (for persons weighing less than 50 pounds).

55. By amending § 160.060-3 by revising the heading of § 160.060-3 to read as follows:

§ 160.060-3 *Materials—standard vests.*

56. By amending § 160.060-4 by revising the heading and paragraph (a) to read as follows:

<sup>1</sup> A model designation for a nonstandard vest is to be assigned by the individual manufacturer and must be different from any standard vest.

§ 160.060-4 *Materials—nonstandard vests.*

(a) *General.* All materials used in nonstandard buoyant vests must be equivalent to those specified in § 160.060-3 and be obtained from a supplier who furnishes an affidavit in accordance with the requirements in § 160.060-3(a).

57. By revising the heading of § 160.060-5 to read as follows:

§ 160.060-5 *Construction standard vests.*

58. By revising § 160.060-6 to read as follows:

§ 160.060-6 *Construction—nonstandard vests.*

(a) *General.* The construction methods used for a nonstandard buoyant vest must be equivalent to the requirements in § 160.060-5 for standard vests and also meet the requirements specified in this section.

(b) *Sizes.* Each nonstandard vest must contain the following volume of unicellular polyethylene foam buoyant material, determined by the displacement method:

- (1) Five hundred cubic inches or more for the adult size, for persons weighing over 90 pounds.
- (2) Three hundred and fifty cubic inches or more for a child medium size, for children weighing from 50 to 90 pounds.
- (3) Two hundred and twenty-five cubic inches or more for children weighing less than 50 pounds.

(c) *Arrangement of buoyant material.* The buoyant material in a nonstandard vest must:

- (1) Be arranged to hold the wearer in an upright or backward position with head and face out of water;
- (2) Have no tendency to turn the wearer face downward in the water; and
- (3) Be arranged so that 70 to 75 percent of the total is located in the front of the vest.

(d) *Neck opening.* Each cloth covered nonstandard vest must have at the neck opening:

- (1) A gusset; or
- (2) Reinforcing tape.

(e) *Adjustment, fit, and donning.* Each nonstandard vest must be made with adjustments to:

- (1) Fit a range of wearers for the type designed; and
- (2) Facilitate donning time for an uninitiated person.

59. By amending § 160.060-7 by revising the heading, paragraph (g), and the heading of paragraph (c) to read as follows:

§ 160.060-7 *Inspections and tests—standard and nonstandard vests.*

(c) *Additional compliance tests.*

(g) *Additional approval tests for nonstandard vests.* Tests in addition to those required by this section may be conducted by the inspector for a nonstandard vest to determine performance equivalence to a standard vest. Such additional tests may include determining per-

formance in water, suitability of materials, donning time, ease of adjustment, and similar equivalency tests. Costs for any additional tests must be assumed by the manufacturer.

60. By revising § 160.060-8 to read as follows:

§ 160.060-8 *Marking standard and nonstandard vests.*

(a) Each buoyant vest must have the following information clearly marked in waterproof lettering:

Type II—Personal flotation device. Unicellular polyethylene foam buoyant vest.

Designed to turn unconscious wearer face up in water.

Dry out thoroughly when wet.

Approved for use on uninspected commercial vessels less than 40 feet in length not carrying passengers for hire and all recreational boats by persons weighing (more than 90 pounds or 50 to 90 pounds or less than 50 pounds).

U.S. Coast Guard Approval No. 160.060/ (assigned manufacturers' No.) (revision No.); (model No.).

(Name and address of manufacturer or distributor.) (Lot No.)

(b) *Waterproof marking.* Marking of buoyant vests shall be sufficiently waterproof so that after 72 hours submergence in water it will withstand vigorous rubbing by hand while wet without printed matter becoming illegible.

61. By revising the heading of Subpart 160.064 to read as follows:

**Subpart 160.064—Specification for Special Purpose Water Safety Buoyant Devices**

62. By amending § 160.064-4 by revising paragraph (a) to read as follows:

§ 160.064-4 *Marking.*

(a) Each special purpose buoyant device must have the following information clearly marked in waterproof lettering:

(1) For devices to be worn:

(i) Type II—Personal flotation device. Designed to turn an unconscious wearer face up in the water; or

Type III—Personal flotation device. Designed to keep a conscious person in a vertical or slightly backward position in the water; and

(ii) (Special purpose intended):

Approved for use on uninspected commercial vessels less than 40 feet in length not carrying passengers for hire and all recreational boats by persons weighing (more than 90 pounds or 50 to 90 pounds or less than 50 pounds).

U.S. Coast Guard Approval No. 160.064 (assigned manufacturers' No.) (revision No.); (model No.); (Name and address of manufacturer or distributor).

(2) For devices to be thrown:

Type IV—personal flotation device. Designed to be thrown to a person in the water.

(Special purpose intended.)

Approved for use on recreational boats less than 16 feet in length, and as a throwing device for recreational boats.

U.S. Coast Guard Approval No. 160.064 (assigned manufacturers' No.) (revision No.);

## RULES AND REGULATIONS

(model No.); (Name and address of manufacturer or distributor).

63. By revising § 160.064-5 to read as follows:

§ 160.064-5 *Recognized laboratory.*

To be designated a recognized laboratory, the laboratory must be:

(a) Operated as a nonprofit public service;

(b) Engaged regularly in the examination, testing and evaluation of the safety of materials, installation, and devices for marine use; and

(c) Established in factory inspection and listing and labeling by having an existing program and standards for evaluation, listing, and labeling buoyant devices that are acceptable to the Commandant.

64. By adding §§ 160.064-5a and 160.064-5b to follow § 160.064-5 and to read as follows:

§ 160.064-5a *Designated recognized laboratory.*

Underwriters' Laboratories, Inc., Marine Department, Tampa East Industrial Park, 2602 Tampa East Boulevard, Tampa, FL 33619, is a recognized laboratory.

§ 160.064-5b *Compliance label.*

If a recognized laboratory approves a buoyant device, the device is allowed to carry the compliance label of the recognized laboratory.

65. By revising § 160.064-7 to read as follows:

§ 160.064-7 *Procedure for listing and labeling.*

(a) A recognized laboratory must inform each manufacturer that requests listing and labeling of a special purpose water safety device for use on boats not carrying passengers for hire, of the procedures for:

- (1) Inspection;
- (2) Examination;
- (3) Tests; and

(4) The forwarding to the Coast Guard of the test report and the description of the quality control program of the requesting manufacturer.

(b) The cost of any examination, test, and inspection and the cost of listing and labeling must:

- (1) Be paid by the manufacturer; and
- (2) Be the same for similar services for each manufacturer.

(c) The Coast Guard reviews each test report and quality control procedure forwarded by the recognized laboratory to determine if the approval requirements have been met. After the review is completed, the Coast Guard:

(1) Notifies the laboratory that the device is approved; and

(2) Publishes notice of the approval in the FEDERAL REGISTER and Coast Guard publication CG-190.

(d) The Commandant, U.S. Coast Guard, determines all matters concerning approval requirements. The manufacturer or recognized laboratory may at any time request advice from the Commandant regarding these requirements.

(Sec. 17, 54 Stat. 166, as amended, Sec. 5, 85 Stat. 215, Sec. 6(b) (1), 80 Stat. 937; 46 U.S.C. 526p, 1454, 49 U.S.C. 1655(b) (1); 49 CFR 146 (b) and (c) (1))

*Effective date.* These amendments shall become effective on April 30, 1973.

Dated: March 21, 1973.

C. R. BENDER,  
Admiral,

U.S. Coast Guard, Commandant.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

- INSPECTION BY USDA OF INCOME TAX RETURNS OF PERSONS HAVING FARM OPERATIONS—Executive order.. 8131
- HAZARDOUS MATERIALS—HMRB, FAA and Coast Guard amend requirements for shipment of etiologic agents (3 documents); effective 6-30-73 ..... 8135, 8159, 8161
- RESEARCH GRANTS—NASA prescribes policies ..... 8136
- AIRCRAFT SPEED LIMITS—FAA relaxes certain speed limits in terminal control areas; effective 4-28-73 ..... 8134
- CARGO VESSELS—Commerce Dept. final payment billing procedures to be used by subsidized operators; effective 4-1-73 ..... 8160
- CARGO TIEDOWN ASSEMBLIES—DoT revises minimum strength requirements on trucks; effective 7-1-73 ..... 8162
- UNFAIR TRADE PRACTICES—FTC cease and desist orders on Litton Industries acquiring stock in typewriter industry and on other matters (4 documents) ..... 8147, 8148, 8150, 8151
- NEW DRUGS—
  - FDA notice of opportunity for hearing to withdraw approval of certain nitrofurazone drugs, comments by 4-30-73 ..... 8186
  - FDA evaluation on nitrofurazone soluble dressing ..... 8185
- JOHNNY HORIZON SYMBOL—Interior Dept. proposes rules for commercial and noncommercial use; comments by 4-30-73 ..... 8176
- SUGAR BEETS—USDA determination relating to wage rates ..... 8164
- PROCUREMENT—GSA policies and procedures for obtaining architect-engineer services ..... 8155
- PAYMENT LIMITATION—USDA issues interpretation pertaining to trusts with identical beneficiaries ..... 8164
- CONTRACTING HELP FOR SMALL BUSINESSES—SBA revises proposal on criteria for disadvantaged owners; comments by 4-30-73 ..... 8178

federal register

Area Code 202 Phone 962-5626

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The Federal Register will be furnished by mail to subscribers, free of postage, for \$2.50 per month or \$25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

## List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

<b>3 CFR</b>	<b>16 CFR</b>	<b>41 CFR</b>

### Title 3—The President

#### EXECUTIVE ORDER 11709

#### Inspection by Department of Agriculture of Income Tax Returns Made Under the Internal Revenue Code of 1954 of Persons Having Farm Operations

By virtue of the authority vested in me by section 6103(a) of the Internal Revenue Code of 1954, as amended (26 U.S.C. 6103(a)), it is hereby ordered that income tax returns made for taxable years beginning on or after January 1, 1967, of persons having farm operations shall be open to inspection to the extent readily available in the Internal Revenue Service by the Department of Agriculture as may be needed for statistical purposes only, in accordance and upon compliance with the rules and regulations prescribed by the Secretary of the Treasury in Treasury Decision 7255, relating to inspection by the Department of Agriculture of certain income tax returns, approved by the President on January 17, 1973, and the amendment thereto approved by me this date.

THE WHITE HOUSE,  
March 27, 1973.

[FR Doc.73-6149 Filed 3-27-73; 2:59 pm]

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 14—Aeronautics and Space  
CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airworthiness Docket No. 73-WE-4-AD; Amdt. 39-1612]

PART 39—AIRWORTHINESS DIRECTIVES  
General Dynamics 22M Series Airplane

There has been a failure of the rudder boost actuator fitting on the General Dynamics Model 22M airplane that could result in loss of adequate rudder control particularly at low speeds. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to require inspection of the actuator fitting for cracks and replacement, if necessary, on the General Dynamics Model 22M airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

GENERAL DYNAMICS. Applies to Model 22M Series airplanes certificated in all categories.

Compliance required as indicated. To detect cracks and prevent further failures of the actuator fitting, accomplish the following:

(1) Within the next 150 hours' time in service after the effective date of this AD, unless already accomplished within the last 250 hours' time in service, and thereafter at intervals not to exceed 400 hours' time in service from the last inspection, inspect the rudder boost actuator fitting P/N 30-15701-1 in accordance with General Dynamics 880M S.B. No. A27-47 dated March 1, 1973, or later FAA-approved revision.

(2) If, as a result of the inspection required by paragraph (1), cracks are found, replace the defective fittings with an identical part.

This amendment becomes effective March 29, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6 (c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Hawthorne, Calif., on March 16, 1973.

ROBERT C. BLANCHARD,  
Acting Director,  
FAA Western Region.

[FR Doc. 73-5948 Filed 3-28-73; 8:45 am]

[Airspace Docket No. 73-AL-5]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redescribe Colored Federal Airways and Reporting Point

The purpose of this amendment to Part 71 of the Federal Aviation Regulations (FAR's) is to redescribe Red Federal airway 27, Blue Federal airway 26, and redesignate the Summit, Alaska, radio range as a radio beacon.

The Alaska supplement publication currently advises that the Summit low frequency range is to be used as a non-directional radio beacon, because the range courses are out of tolerance and this condition appears irreparable.

On March 1, 1971, the Federal Aviation Administration, Alaskan region, issued a notice proposing to convert all four-course radio ranges in Alaska to nondirectional radio beacons (Aeronautical Study No. 71-AL-18NR), and no objections were received.

Since this amendment reflects the actual condition and use of the radio facility, and no substantive change in the burden upon the public is made, thereby notice and public procedure are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective May 24, 1973.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

1. Section 71.107 (38 FR 306) is amended as follows:

In R-27 "Summit, Alaska, RR" is deleted and "Summit, Alaska, RBN" is substituted therefor.

2. Section 71.109 (38 FR 306) is amended as follows:

In B-26 "Summit, Alaska, RR; INT north course Summit RR and southwest course Fairbanks, Alaska, RR;" is deleted and "Summit, Alaska, RBN; INT Summit RBN 007° bearing and southwest course Fairbanks, Alaska, RR;" is substituted therefor.

3. Section 71.211 (38 FR 618) is amended as follows:

In Summit, Alaska, RR "RR" is deleted and "RBN" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-5961 Filed 3-28-73; 8:45 am]

[Airspace Docket No. 72-SW-81]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Extension of VOR Federal Airway

On January 23, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 2219) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would extend Victor Airway 62 from the Cabezon Intersection, N. Mex., to Gallup, N. Mex.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

Section 71.123 (38 FR 307) is amended as follows:

In V-62 "from INT Albuquerque, N. Mex., 329° and Santa Fe, N. Mex., 268° radials, via Santa Fe;" is deleted and "from Gallup, N. Mex.; INT Gallup 089° and Santa Fe, N. Mex., 268° radials; Santa Fe;" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 21, 1973.

H. B. HELSTROM,  
Chief, Airspace and Air  
Traffic Rules Division.

[FR Doc. 73-5949 Filed 3-28-73; 8:45 am]

[Airspace Docket No. 72-GL-79]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation and Alteration of VOR Federal Airways

On February 8, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 3610) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would alter V-7, V-9, V-45, V-78, V-191, V-215, V-233, V-271, V-420, and V-430 in the Minneapolis and Chicago Air Route Traffic Control Centers areas and would designate a new airway between Marquette, Mich., and Schoolcraft County, Mich., and revoke Menominee, Mich., additional control area.

Interested persons were afforded an opportunity to participate in the pro-

posed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

Section 71.123 (38 FR 307 and 37 FR 23329) is amended as follows:

1. In V-7 "Escanaba, Mich." is deleted and "Marquette, Mich.," including an east alternate via Escanaba, Mich.," is substituted therefor.

2. In V-9 "via Marquette, Mich." is deleted and "via Marquette, Mich., and also a west alternate from Green Bay to Houghton via Rhinelander, Wis." is substituted therefor.

3. In V-45 "Pellston, Mich." is deleted and "Saulte Ste. Marie, Mich." is substituted therefor.

4. In V-78 "Eau Claire, Wis." is deleted and "Eau Claire, Wis.; Rhinelander, Wis.; Iron Mountain, Mich.; Escanaba, Mich.; Schoolcraft County, Mich.; Pellston, Mich.; to Alpena, Mich." is substituted therefor.

5. In V-191 "Ironwood, Mich." is deleted and "Ironwood, Mich.; including an east alternate," is substituted therefor.

6. In V-215 "White Cloud, Mich." is deleted and "White Cloud, Mich.; to Gaylord, Mich." is substituted therefor.

7. In V-233 "and Gaylord, MI., 206" radials; Gaylord; Pellston, MI." is deleted and "and Gaylord, Mich., 207" radials; Gaylord; to Pellston, Mich.; including a west alternate from Mount Pleasant to Pellston via Traverse City, Mich." is substituted therefor.

8. In V-271 "to Manistee, Mich." is deleted and "Manistee, Mich.; to Escanaba, Mich." is substituted therefor.

9. In V-420 "Mount Pleasant, Mich." is deleted and "Gaylord, Mich.; to Alpena, Mich." is substituted therefor.

10. In V-430 "Escanaba, Mich., from Traverse City, Mich.; Gaylord, Mich.; Alpena, Mich." is deleted and "to Escanaba, Mich." is substituted therefor.

11. V-224 is added as follows:

"V-224 from Marquette, Mich.; to Schoolcraft County, Mich."

Section 71.163 (38 FR 344) is amended as follows:

"Menominee, Mich." title and text is deleted.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[Airspace Docket No. 72-NE-22]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone and Alteration of Transition Area; Change in Effective Date

On page 2963 of the FEDERAL REGISTER dated January 31, 1973, the Federal Aviation Administration issued an amend-

#### RULES AND REGULATIONS

ment effective 0901 G.m.t., March 29, 1973, which designated a Danbury, Conn., control zone and altered the Danbury, Conn., transition area.

It has now been determined that the new air traffic control tower at the Danbury Municipal Airport will not be commissioned until on or about May 14, 1973, and the effective date for this amendment is being changed to correspond with that date. In addition, the hours of operation of the control zone are being modified from 0700 to 1900 hours local time daily to 0800 to 2000 hours local time daily.

Since this action effects no substantive change to the rule as initially adopted, and since thirty (30) days will elapse from the time of publication of these amendments, as modified herein, to this new effective date, these changes are made in compliance with section 4 of the Administrative Procedure Act.

In view of the foregoing, the regulations are further amended as follows:

1. The effective date for this amendment is amended to read 0901 g.m.t., May 14, 1973, in lieu of 0901 g.m.t., March 29, 1973.

2. Section 71.171 of the Federal Aviation Regulations, as published on page 2963 of Volume 38 of the FEDERAL REGISTER, is amended by deleting the words "0700 to 1900 hours local time daily" from the description of the Danbury control zone and inserting the words "0800 to 2000 hours local time daily" in lieu thereof.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Burlington, Mass., on March 21, 1973.

FERRIS J. HOWLAND,  
Director, New England Region.

[FR Doc. 73-5953 Filed 3-28-73; 8:45 am]

[Airspace Docket No. 73-SO-11]

#### PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

The purpose of this amendment to Part 73 of the Federal Aviation Regulations is to alter the time of designation for Restricted Area R-2101, Anniston Army Depot, Ala.

A review of the planned utilization for R-2101 has shown that the using agency does not require this restricted area on Saturday.

Since this amendment makes a minor reduction in the time of designation, notice and public procedure thereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective more than 30 days after publication.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 g.m.t., May 24, 1973, as hereinafter set forth.

In § 73.21 (38 FR 630) Restricted Area R-2101, Anniston Army Depot, Ala., is amended by deleting the present significant environmental impact.

time of designation and substituting the following therefor:

From 0700 to 1800 c.s.t., Monday through Friday.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-5950 Filed 3-28-73; 8:45 am]

[Docket No. 12135; Amdt. 91-113]

#### PART 91—GENERAL OPERATING AND FLIGHT RULES

Speed Limits in Terminal Control Areas

The purpose of this amendment to Part 91 of the Federal Aviation Regulations is to rescind the airport traffic area speed limits within those airport traffic areas which are located within Terminal Control Areas (TCA's). This amendment was proposed in Notice No. 72-22, issued on August 9, 1972 (37 FR 16622).

Interested persons were afforded an opportunity to participate in the rulemaking through the submission of comments. Due consideration was given to all relevant matter presented.

The public comments generally supported the proposal or offered no objection. One comment concurred in the proposed rule change but suggested that the amendment be changed to eliminate all airspeed limitations in TCA's. The FAA believes that elimination of all airspeed limitations within TCA's is not justified. One of the stated purposes of the 250-knot speed limit (when originally established below 10,000 feet m.s.l. within 30 miles of the destination airport) was to enhance the pilot's ability to comply with IFR flight procedures in terminal areas. Since the air traffic situation in terminal areas is constantly changing, the pilot operating under IFR within such areas must be prepared, with little prior notice, to enter a holding pattern, to turn his aircraft to a new course or to interrupt, or to begin a climb or descent. To ensure rapid compliance with such air traffic control clearances or instructions, the speed of the aircraft must be limited in such a manner as to permit maneuvering without using the excessive amount of airspace required by high speed operations. Retention of the 250-knot limit in TCA's is, therefore, desirable.

One comment suggested that 200 knots be established as the speed limitation for all aircraft operating in TCA's. It is believed, however, that this would be unnecessarily restrictive. The 250-knot limitation is adequate to ensure a safe operating environment within TCA's.

Another comment suggested that the proposed change be held in abeyance until it is determined whether implementation would have an adverse environmental impact. The FAA has given consideration to the probable environmental impact of the proposed rule change and has concluded that eliminating the 200-knot speed limit would have no significant environmental impact.

#### RULES AND REGULATIONS

(Sec. 307, 313(a), Federal Aviation Act of 1958, 49 U.S.C. 1348, 1354(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

In consideration of the foregoing, Part 91 of the Federal Aviation Regulations is amended effective April 28, 1973, as hereinafter set forth:

A new flush paragraph is added, following § 91.70(b), to read as follows:

§ 91.70 Aircraft speed.

(b) Paragraph (b) of this section does not apply to any operations within a Terminal Control Area. Such operations shall comply with paragraph (a) of this section.

Issued in Washington, D.C., on March 22, 1973.

ALEXANDER P. BUTTERFIELD,  
Administrator.

[FR Doc. 73-5954 Filed 3-28-73; 8:45 am]

[Docket No. 12652; Amdt. 857]

#### PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAP's) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAP's for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5 and made a part of the public rulemaking dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAP's are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Copies of SIAP's adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAP's may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, DC 20591, or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of \$150 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for \$30 each.

Since a situation exists that requires immediate adoption of this amendment,

I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAP's, effective May 10, 1973.

Carlsbad, Calif.—Palomar Airport, VOR-A, Amdt. 1.  
Dallas, Tex.—Dallas Love Field, VOR/DME Runway 13R, Original.  
Dallas, Tex.—Dallas Love Field, VOR/DME Runway 31L, Original.  
Hanford, Calif.—Hanford Municipal Airport, VOR-A, Amdt. 1.  
Hayward, Calif.—Hayward Air Terminal, VOR-A, Amdt. 3.  
Hayward, Calif.—Hayward Air Terminal, VORTAC-A, Amdt. 1.  
Oakland, Calif.—Metropolitan Oakland International Airport, VOR Runway 9R, Amdt. 3.  
Sheridan, Wyo.—Sheridan County Airport, VOR/DME Runway 31, Amdt. 3.  
Wise, Va.—Lonesome Pine Airport, VOR Runway 24, Amdt. 1.

• • • Effective May 3, 1973.

Lynchburg, Va.—Lynchburg Municipal/Preston Glenn Field, VOR Runway 3, Amdt. 7.  
Lynchburg, Va.—Lynchburg Municipal/Preston Glenn Field, VOR/DME Runway 21, Amdt. 5.

• • • Effective April 5, 1973.

Arcata-Eureka, Calif.—Arcata Airport, VOR Runway 13, Original.  
Arcata-Eureka, Calif.—Arcata Airport, VOR/DME-A, Amdt. 1, Canceled.  
Arcata-Eureka, Calif.—Arcata Airport, VOR/DME Runway 1, Original.

2. Section 97.25 is amended by originating, amending, or canceling the following SDF-LOC-LDA SIAP's, effective May 10, 1973.

Dallas, Tex.—Dallas Love Field, LOC(BC) Runway 13R, Amdt. 7.  
La Crosse, Wis.—La Crosse Municipal Airport, LOC(BC) Runway 36, Amdt. 2.  
Sacramento, Calif.—Sacramento Metropolitan Airport, LOC(BC) Runway 34, Amdt. 5.

• • • Effective March 22, 1973.

Philadelphia, Pa.—Philadelphia International Airport, LOC(BC) Runway 27R, Amdt. 1.

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAP's, effective May 10, 1973.

Sacramento, Calif.—Sacramento Metropolitan Airport, NDB Runway 16, Amdt. 6.  
Salem, Ore.—McNary Field, NDB Runway 31, Amdt. 10.  
Waterville, Maine.—Waterville Robert La Fleur Airport, NDB-A, Amdt. 7.

• • • Effective April 12, 1973.

Lafayette, La.—Lafayette Regional Airport, NDB Runway 28, Original.

• • • Effective April 5, 1973.

Arcata-Eureka, Calif.—Arcata Airport, NDB-A, Amdt. 2.

4. Section 97.29 is amended by originating, amending, or canceling the following ILS SIAP's, effective May 10, 1973.

Dallas, Tex.—Dallas Love Field, ILS Runway 31L, Amdt. 8.  
Sacramento, Calif.—Sacramento Metropolitan Airport, ILS Runway 16, Amdt. 7.  
Salem, Ore.—McNary Field, ILS Runway 31, Amdt. 15.

• • • Effective April 5, 1973.

Arcata-Eureka, Calif.—Arcata Airport, ILS Runway 31, Amdt. 19.  
Presque Isle, Maine.—Presque Isle Municipal Airport, ILS Runway 1, Original.

• • • Effective March 22, 1973.

Philadelphia, Pa.—Philadelphia International Airport, ILS Runway 9L, Amdt. 22.

• • • Effective March 16, 1973.

Duluth, Minn.—Duluth International Airport, ILS Runway 9, Amdt. 9.

5. Section 97.33 is amended by originating, amending, or canceling the following RNAV SIAP's, effective May 10, 1973.

Carlsbad, Calif.—Palomar Airport, RNAV Runway 6, Amdt. 2.

Correction. In Docket No. 12630, Amdt. 855, to Part 97 of the Federal Aviation Regulations, published in the FEDERAL REGISTER dated Thursday, March 15, 1973, on pages 6990 and 6991, disregard all procedures listed under College Station, Texas—Easterwood Field. Previous amendments remain in effect.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1958; 49 U.S.C. 1438, 1354, 1421, 1510, Sec. 6(c) Department of Transportation Act, 49 U.S.C. 1655(c) and 5 U.S.C. 552(a)(1))

Issued in Washington, D.C., on March 22, 1973.

JAMES F. RUDOLPH,  
Director,  
Flight Standards Service.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 (35 FR 5610) approved by the Director of the Federal Register on May 12, 1969.

[FR Doc. 73-5947 Filed 3-28-73; 8:45 am]

[Docket No. 12057; Amdt. No. 103-15]

#### PART 103—TRANSPORTATION OF DANGEROUS ARTICLES AND MAGNETIZED MATERIALS

Etiologic Agents

The purpose of these amendments to Part 103 of the Federal Aviation Regulations is to specify the reporting requirements that are applicable to incidents involving etiologic agents.

This amendment is related to the amendment of the Hazardous Materials Regulations in Docket No. HM-96; Amendment No. 171-18 published on page 8161 of this issue and is based on the notice of proposed rulemaking, Docket No. 12057; Notice No. 72-18, published in the FEDERAL REGISTER on July 22, 1972 (37 FR 14727). That notice was issued concurrently with a notice issued by the Hazardous Materials Regulations Board. The Board's evaluation of the comments received is discussed in detail in the Docket No. HM-96 document published in this issue. On the basis of the reasons stated therein, the Federal Aviation Administration has decided to amend Part 103 of the Federal Aviation Administration regulations.

In consideration of the foregoing, Part 103 of the Federal Aviation Regulations is amended, effective June 30, 1973, as follows:

1. By redesignating paragraph (a) (4) as (a) (6) and (a) (5) as (a) (4) and by adding a paragraph (a) (5) to read as follows:

**§ 103.28 Reporting certain dangerous article incidents.**

(a) \* \* \*

(5) Fire, breakage, spillage, or suspected contamination occurs involving shipment of etiologic agents. In place of the report required by paragraph (a) of this section, a report on an incident involving etiologic agents may be made by telephone directly to the Director, Center for Disease Control, U.S. Public Health, Atlanta, Ga., Area Code 404-633-5313.

(Title VI and sec. 902(h), Federal Aviation Act of 1958, 49 U.S.C. 1421-1430, 1472(h), and 1655(c).

Issued in Washington, D.C., on March 23, 1973.

JAMES F. RUDOLPH,  
Board Member,  
Federal Aviation Administration.  
[FR Doc. 73-5972 Filed 3-28-73; 8:45 am]

**CHAPTER V—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION**  
**PART 1260—GRANTS**

This Part 1260 prescribes policies and regulations relating to the award and administration of NASA research grants. It represents a significant NASA step in the publication and dissemination of NASA policies and procedures.

One of the Nation's most significant achievements in the space effort has been the mobilization of large resources to develop and apply scientific knowledge and advanced technology to attain clearly defined national goals. Universities and other nonprofit organizations have played a major role in this marshaling of research facilities and scientific talent.

Publication of this part is consistent with the NASA policy of disseminating to the academic community information of mutual interest designed to further our close cooperative working relationship in achieving national goals.

Part 1260 of Title 14, Code of Federal Regulations establishes for the National Aeronautics and Space Administration (NASA) uniform policies and procedures relating to the negotiation, award and administration of research grants as follows:

Subpart A—General	
Sec.	
1260.100	Purpose.
1260.101	Applicability.
1260.102	Arrangement.
1260.103	Contents.
1260.104	Amendment.
1260.106	Deviations.
1260.107	Definitions.
Subpart B—Basic Policies	
1260.200	Authority.
1260.201	Policy.

Sec.	
1260.202	Unsolicited proposals.
1260.203	Processing unsolicited proposals.
1260.204	Criteria for selection of grant.
1260.205	Recommendation for acceptance of unsolicited proposal.
1260.206	Processing the grant instrument.
1260.207	Civil Rights Act of 1964—nondiscrimination in federally assisted programs.
1260.208	Aircraft noise research and development programs.
1260.209	Barring of recruiting personnel.
1260.210	Printing, binding and duplicating.
1260.211	Denial of funds resulting from disruption of activities of educational institutions.

Subpart C—Award of Research Grants	
Sec.	
1260.301	Instrument.
1260.302	Grant format.
1260.303	Determination of amount.
1260.304	Cost sharing.
1260.305	Funding of grants [Reserved].
1260.306	Numbering of grants.
1260.307	Distribution of grants and grant supplements.
1260.308	Retention of grant documents for on-site audit.

Subpart D—Research Grant Provisions	
Sec.	
1260.400	General.
1260.401	Technical reports and publications.
1260.402	Extension of grants.
1260.403	Revocation.
1260.404	Travel.
1260.405	Allowable costs.
1260.406	Accounting records.
1260.407	Payment.
1260.408	Equipment.
1260.409	Property rights in inventions.
1260.410	Rights in data.
1260.411	Security.
1260.412	Civil rights.
1260.413	Safety.
1260.414	Subcontracts.
1260.415	Changes in principal investigator or technical objectives.

Subpart E—Administration of Research Grants	
Sec.	
1260.501	General.
1260.502	Grant instrument.
1260.503	Grant period.
1260.504	Grant payments.
1260.505	Adherence to original budget estimates.
1260.506	Vesting of title to research equipment.
1260.507	Revocation of grants.
1260.508	Transfer of grants to other institutions.
1260.509	Accounting procedures.
1260.510	Travel.
1260.511	Audit [Reserved].
1260.512	Use of GSA supply sources by grantees [Reserved].

Subpart F—Reports	
Sec.	
1260.600	General.
1260.601	Reporting of grants.
1260.602	Individual Procurement Action Report (NASA Form 507).
1260.603	Committee on Academic Science and Engineering (CASE) reports.
1260.604	Grantee Quarterly Cash Requirement Report (NASA Form 1031).
1260.605	Status and final reports.

**AUTHORITY:** Public Law 85-934, 72 Stat. 1793 (42 U.S.C. 1891-1893).

**Subpart A—General**

**§ 1260.100 Purpose.**

This Part 1260, issued by the Director of Procurement under authority delegated by the Administrator, establishes for the National Aeronautics and Space

Administration (NASA) uniform policies and procedures relating to the negotiation, award and administration of research grants.

**§ 1260.101 Applicability.**

This part applies to all research grants made by NASA which obligate appropriated funds.

**§ 1260.102 Arrangement.**

**General plan.** This part is divided into subparts, each one of which deals with a separate aspect of research grants. Each subpart is further subdivided into sections.

**§ 1260.103 Contents.**

This Part 1260 contains policies and procedures relating to the negotiation, award and administration of research grants, and is designed to achieve maximum uniformity throughout NASA. This part will be amended from time to time to set forth improved procedures which reduce grant preparation time, simplify and standardize grant forms, and improve the administration of grants.

**§ 1260.104 Amendment.**

**Changes.** This part will be amended by changes containing revised sections or subparts.

**§ 1260.106 Deviations.**

(a) **Applicability.** A deviation shall be considered to be any of the following:

- (1) When a prescribed grant clause is set forth verbatim in this Part 1260, use of a clause covering the same subject matter which varies from, or has the effect of altering, the prescribed clause, or changing its application;
- (2) When a grant clause is set forth in this part but not for use verbatim, use of a clause covering the same subject matter which is inconsistent with the intent, principle and substance of the grant clause or related coverage of the subject matter;
- (3) Omission of any mandatory grant clause;
- (4) When a NASA or other form is prescribed by this part, use of any other form for the same purpose;
- (5) Alteration of a NASA or other form prescribed in this part except as authorized herein;
- (6) When limitations are imposed by this part upon the use of a grant clause, form, procedure, or any other grant action, the imposition of lesser or greater limitations; or
- (7) When a policy, procedure, method, or practice of conducting grant actions is prescribed in this part, any policy, procedure, method, or practice inconsistent therewith.

(b) **Approval of deviations.** Deviations will be authorized only when essential to effect necessary grant actions or where special circumstances make such deviations clearly in the best interests of the Government. Such deviations will be approved only by the Director of Procurement or his duly authorized representative.

(c) **Requests for deviations.** Requests for authority to deviate from this part shall be submitted to the Director of Procurement (Code KDP-1). Such requests shall be signed by the Procurement Officer of a field installation (or the Director in the case of the Headquarters Contracts Division) and shall be submitted as far in advance as exigencies of the situation will permit. Where the deviation involves more than a unique special situation, i.e., will affect grantees as a class, concurrence of the Assistant Administrator for University Affairs is additionally required. Each request for a deviation shall contain as a minimum:

- (1) Identification of the requirement from which a deviation is sought;
- (2) A full description of the deviation and the circumstances in which it will be used;
- (3) A description of the intended effect of the deviation;
- (4) A statement as to whether the deviation has been requested previously, and, if so, circumstances of the previous request;
- (5) The name of the grantee and identification of the grant affected, including the dollar value; and
- (6) Detailed reasons supporting the request, including any pertinent background information which will contribute to a fuller understanding of the deviation sought.

(k) **Subcontract.** A written agreement between a grantee and a third party for the furnishing of services or supplies necessary to carry out the research under a grant.

(l) **Technical officer.** The official of the cognizant NASA program office who is responsible for monitoring the technical aspects of the work under a grant.

Administrator or his duly authorized representative.

(g) **Grants officer.** A contracting officer who has been delegated authority to award and administer grants.

(h) **Grant specialist.** Any employee of NASA who is assigned the responsibility of negotiating with potential grantees the terms and conditions of specific grants, and the administration of such grants.

(i) **NASA.** The National Aeronautics and Space Administration.

(j) **Nonprofit organization.** Any corporation, foundation, trust or institution whose primary purpose is the conduct of scientific research, not organized for profit, no part of the net earnings of which inures to the benefit of any private shareholder or individual.

(k) **Subcontract.** A written agreement between a grantee and a third party for the furnishing of services or supplies necessary to carry out the research under a grant.

(l) **Technical officer.** The official of the cognizant NASA program office who is responsible for monitoring the technical aspects of the work under a grant.

**Subpart B—Basic Policies**

**§ 1260.200 Authority.**

Under the Act of September 6, 1958 (42 U.S.C. 1891-1893), entitled "An Act to Authorize the Expenditure of Funds Through Grants for Support of Scientific Research and for Other Purposes," NASA is authorized to make grants for basic scientific research at nonprofit institutions of higher education or at nonprofit organizations whose primary purpose is the conduct of scientific research. This Act also provides discretionary authority for vesting title to equipment purchased with grant or contract funds in these institutions and organizations, under grants or contracts for the conduct of basic or applied scientific research, without further obligation to the Government, or on such terms and conditions as NASA deems appropriate.

**§ 1260.201 Policy.**

(a) NASA policy is to use the grant instrument to sponsor required basic research at nonprofit institutions or organizations when it is desired to provide latitude to investigators that will encourage maximum creativity, and to have the minimum administration consistent with the public interest.

(b) In addition, it is NASA policy to provide appropriate continuity of support in research sponsored under grants. In general, initial obligation of funds shall not be made for a period of more than 3 years.

**§ 1260.202 Unsolicited proposals.**

(a) It is NASA's policy to inform organizations and individuals of scientific and technological areas encompassed by NASA's mission, and to encourage the submission of unsolicited proposals containing relevant new ideas. An unsolicited proposal is a written offer to perform work which does not result from a formal written request for proposals issued by NASA. However, inquiries re-

garding NASA interest in supporting research and development in a particular technical area shall not be construed as proposals. Unsolicited proposals are offered in the hope that NASA will support the proposer in research or development activities, or the testing of new products. Many of the proposals eventually become a part of a NASA program; others may have little or no value.

(b) Proposals for flight experiments to be carried on earth satellites or spacecraft present special problems of coordination, evaluation, and selection. NASA Handbook "Opportunities for Participation in Space Flight Investigations" (NHB 8030.1A), provides detailed instructions for the preparation and submission of flight experiment proposals. This Handbook may be obtained from the Office of Space Science (Code SS), National Aeronautics and Space Administration, Washington, D.C. 20546.

(c) All proposals should be specific and, as a minimum, include the information set forth below. (Although it is desired that unsolicited proposals be prepared in conformance with the standards set forth below, NASA may accept unsolicited proposals for evaluation purposes which do not conform thereto):

- (1) Name and address of the organization submitting the proposal;
- (2) Date of preparation or submission;
- (3) Type of organization (profit, nonprofit, educational, other);
- (4) Concise title and abstract of the proposed effort or activity for which support is being sought;
- (5) An outline and discussion of the purpose of the proposed effort or activity, the method of attack upon the problem, and the nature and extent of the anticipated results;
- (6) The name of the principal investigator (and other key personnel), social security number and brief biographical information, including principal publications and relevant experience;
- (7) Proposed starting and completion dates;
- (8) Equipment, facility and personnel requirements;
- (9) Proposed budget, including separate cost estimates for salaries and wages, equipment, expendable supplies, services, travel, subcontracts, other direct costs, proposed cost sharing and overhead. Statement whether professional salaries will be accounted for on time and attendance record basis, or whether stipulated salary support is requested in accordance with Exhibit B of this part.
- (10) Names of any other Federal agencies receiving the proposal and/or funding the proposed effort or activity;
- (11) Brief description of the proposer's facilities, particularly those which would be used in the proposed effort or activity;
- (12) If available, a descriptive brochure and a current financial statement;
- (13) If proposed effort or activity requires or may generate classified security information, the security status of the organization and the major investi-

gators, and identification of the cognizant security office;

(14) Period for which proposal is valid;

(15) Names and telephone numbers of proposer's business and technical personnel whom NASA may contact during evaluation and/or negotiation;

(16) Continuation proposals should be accompanied by an estimate of the amount of unspent, uncommitted funds which will be carried over beyond the grant anniversary date. The approximate amounts spent for salaries and wages, equipment, etc.—the usual categories—during the past grant period should be listed;

(17) Each proposal containing technical data, which the submitter intends to be used by NASA for evaluation purposes only, should be marked on the cover sheet with the following, or similar, legend:

Technical data contained in pages—of this proposal shall not be used or disclosed, except for evaluation purposes, provided that if a contract or grant is awarded to this submitter as a result of or in connection with the submission of this proposal, the Government shall have the right to use or disclose this technical data to the extent provided in the contract or grant. This restriction does not limit the Government's right to use or disclose any technical data obtained from another source without restriction.

(18) Signature of a responsible official of the proposing organization or a person authorized to obligate such organization.

(d) Proposals for new projects should be submitted well in advance of the desired beginning date of support, while renewal proposals should be submitted at least 4 months in advance of the expiration date of the grant. Five copies of renewal proposals, 10 copies of initial proposals and 15 copies of bioscience research proposals (either new or renewals) are required to allow simultaneous study by all reviewers.

(e) All unsolicited proposals from educational and nonprofit scientific institutions, proposals to NASA Headquarters from other sources, and requests for additional information regarding the preparation of unsolicited proposals should be submitted to:

National Aeronautics and Space Administration, Proposal Control Office, Office of University Affairs (Code PY), Washington, D.C. 20546.

(f) Proposals from nonuniversity sources, that relate particularly to the activities of a NASA field installation, may be submitted directly to the installation.

(g) Policies and procedures governing the submission and processing of unsolicited proposals for research which, if accepted, would result in a contract are contained in Chapter 18, Title 41.

#### § 1260.203 Processing unsolicited proposals.

(a) All unsolicited proposals shall be processed in an expeditious manner. Proposals shall be acknowledged as soon

after receipt as possible. Submitters shall be notified as to the ultimate disposition of their proposals.

(b) Prior to making a comprehensive evaluation of a document apparently submitted as an unsolicited proposal, the initial receiving office shall determine that the document:

(1) Contains sufficient technical and cost information to enable meaningful evaluation;

(2) Has been approved by a responsible official of the proposing organization or a person authorized to obligate such organization; and

(3) Does not merely offer to perform standard services or to provide "off-the-shelf" articles.

If the document does not meet these requirements, a comprehensive evaluation need not be made, and the document may be considered and handled as correspondence or advertising. In such cases a prompt reply shall be sent to the submitter, indicating how the document is being interpreted and the reason for not considering it a proposal.

(c) Every unsolicited proposal that is circulated for comprehensive evaluation shall be subject, where applicable, to the requirements of § 18-1.304 *Restrictions on data and other information* (41 CFR 18-1.304).

(d) In evaluating a proposal, the evaluating office(s) shall consider, in addition to any other criteria, the following factors:

(1) The overall scientific, technical merit of the proposed effort;

(2) The potential contribution which the proposed effort is expected to make to NASA's specific program objective(s), if supported at this time;

(3) The unique capabilities, related experience, facilities, instrumentation, or techniques which the proposer possesses and offers, and which are considered to be integral factors for achieving the scientific, technical, or technological objective(s) of the proposal; and

(4) The unique qualifications, capabilities and experience of the proposed principal investigator and/or key personnel.

Comprehensive evaluations of the university proposals and of proposals to Headquarters from nonuniversity sources shall be coordinated according to procedures to be established by the Office of University Affairs. If such a proposal is not to be accepted, the submitter shall be informed by a suitable letter, and a copy of the letter and associated proposal shall be retained in the files of the Office of University Affairs.

#### § 1260.204 Criteria for selection of grant.

Selection of the research support instrument (grant or contract), normally (but not necessarily) based upon an unsolicited proposal, shall be made by the contracting officer of the funding installation, taking into account NASA policies for dealing with universities, the special needs of the cognizant technical office, the nature of the proposed research, the manner in which it will be performed,

and the nature and extent of technical direction and management control planned by NASA. Research grants may be made only to support basic scientific research at nonprofit institutions of higher education or at nonprofit organizations whose primary purpose is the conduct of scientific research. Subject to these basic requirements, some of the significant factors to be considered in determining whether to select the grant as the research support instrument are set forth in paragraphs (a) and (b) of this section:

(a) Factors generally indicating the use of the grant instrument are as follows:

(1) The primary purpose is to aid or support the acquisition of knowledge or understanding of the subject or phenomena under study;

(2) The exact course of the work and its outcome are not defined precisely and specific points in time for achievement of significant results are not specified;

(3) NASA desires, or the nature of the proposed investigation is such, that the grantee will bear prime responsibility for the conduct of the research, and exercise judgment and original thought toward attaining the scientific goals within broad parameters of the research areas proposed and the related resources provided;

(4) The research problem is such that long term support (i.e. in excess of 1 year) is required for the study to mature to maximum scientific effectiveness (however, this does not preclude shorter-term grants in special cases);

(5) Meaningful technical reports (as distinguished from the Semiannual Status Reports required pursuant to § 1260.401) will be prepared only as new findings are made, rather than on a predetermined time schedule;

(6) Simplicity and economy in execution and administration are mutually desirable; and

(7) Simplified advance payment is desired by the institution and is acceptable to NASA.

(b) Factors generally indicating the use of a contract rather than the grant instrument are as follows:

(1) The primary purpose is to buy or procure well-defined research or development in direct support of a programed NASA mission or project;

(2) The work to be conducted is directed closely toward the solution of a specific problem;

(3) A specific service, piece of hardware, or improved performance of a specific device is the end product;

(4) NASA considers it necessary to exercise control over the objectives, direction, specifications, costs or methods of the research, and schedule control is desirable and feasible;

(5) The work to be conducted is classified (however, access to security classified information may be given grantees where a demonstrated need exists);

(6) The end result is clearly defined and/or parameters and specifications are prepared in advance of the work; and

(7) A significant portion of the total effort will be performed by an organization other than the one submitting the proposal, and such portion will involve the development, fabrication or acquisition of instruments or hardware.

#### § 1260.205 Recommendation for acceptance of unsolicited proposal.

(a) Where it is known that the grant will be used as the research instrument to support the unsolicited proposal, a "Recommendation for Acceptance of Unsolicited Proposal" shall be prepared by the technical office sponsoring the research and shall include findings set forth in paragraph (a)(1) or (a)(2) of this section:

(1) The grant will provide support to an educational institution for the development or improvement of that institution's capability to contribute to the national aeronautical and space program; the contemplated work consists of basic scientific research; and the proposal was selected on the basis of its overall merit, cost and contribution to NASA program objectives.

(2) The grant is for basic scientific research at a nonprofit institution of higher education or at a nonprofit organization whose primary purpose is the conduct of scientific research; and the proposal was selected on the basis of its overall merit, cost, and contribution to NASA program objectives.

(b) In addition, the recommendation shall include the facts and circumstances that support the proposed action. The following illustrations represent factors which should be considered, as appropriate, in preparing the recommendation:

(1) The scientific/technical merits of the unsolicited proposal and its potential contribution to NASA's program objectives;

(2) The qualifications, capabilities and related experience of the submitting institution, principal investigator and/or key personnel; and

(3) Unique facilities, instrumentation or techniques.

#### § 1260.206 Processing the grant instrument.

(a) If the grant is selected as the research support instrument, negotiations with the grantee shall not begin until a proposal control number has been assigned by the Office of University Affairs (Code PY), NASA Headquarters. (See § 1260.306(a)(2).)

(b) Grants Officers at field installations will furnish to the Office of University Affairs copies of the technical evaluation and procurement request, identified by assigned proposal control number, at the time negotiation is begun, and a copy of the executed grant after award.

(c) Grants Officers at field installations and the Headquarters Contracts Division will furnish to the Office of University Affairs completed NASA Forms 1356, "Committee on Academic Science and Engineering (C.A.S.E.) Report on Support of Colleges and Universities" after award. (See § 1260.603.)

#### § 1260.207 Civil Rights Act of 1964—Nondiscrimination in federally assisted programs.

(a) Section 602 of the Civil Rights Act of 1964 (Public Law 88-352; 42 U.S.C. 2000d-1), provides that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance, and requires that each Government agency which is empowered to extend such financial assistance shall issue rules or regulations effectuating title VI (sections 601-605) of the Act with respect to such programs or activities administered by the agency. NASA's Civil Rights regulation is published in the FEDERAL REGISTER of January 9, 1965, 30 FR 301-305, 14 CFR 1250.

(b) Research grants made under the authority of Public Law 85-934, approved September 6, 1958 (42 U.S.C. 1891-1893) are within the purview of title VI of the Act.

(c) Further implementation, setting forth procedures and guidance, and assigning responsibility to NASA officials, is contained in NASA Management Instruction 2090.1.

(d) (1) No grant shall be made unless and until an Assurance of Compliance, NASA Form 1206 (Exhibit A) has been obtained in accordance with the requirements of NMI 2090.1, or until proceedings pursuant to § 1250.107 of the NASA Civil Rights regulation (14 CFR 1250.107) have been conducted and terminated in favor of the prospective grantee. NASA shall not be obligated to provide assistance in such a case during the pendency of any administrative proceedings under the NASA Civil Rights regulation.

(2) If an unsolicited proposal relating to a covered program does not contain or refer to a prescribed Assurance and it does not appear that the proposer is aware of the requirement for the Assurance, prior to making any grant, the proposer shall be furnished a copy of the desired form of Assurance and shall be informed of the requirements of the NASA Civil Rights regulation and of this § 1260.207.

(e) If a grantee under a grant prior to February 8, 1965, refuses to furnish an Assurance required under § 1250.104 of the NASA Civil Rights regulation (14 CFR 1250.107(b)), or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that Section, NASA shall institute proceedings under the NASA Civil Rights regulation but shall continue assistance during the pendency of the proceedings.

#### § 1260.208 Aircraft noise research and development programs.

NASA and the Department of Transportation have executed an agreement (NMI 1052.103A) to coordinate their research and development efforts in aircraft noise reduction, control, prediction techniques and other aircraft noise related problems. Proposed grant actions

relating to this program will be coordinated with the Deputy Associate Administrator (Programs), NASA Headquarters in accordance with the provisions of the NASA Management Instruction 1052.103A.

#### § 1260.209 Barring of recruiting personnel.

(a) The NASA Authorization Acts for 1969 and 1970 prohibited the use of appropriated funds authorized thereunder for grants to any non-profit institution of higher learning which bars recruiters of the Armed Forces of the United States from the premises or property of such institution. This prohibition is continued in the Authorization Act for 1971, Public Law 91-303, 84 Stat. 370, approved July 2, 1970, as follows:

(Sec. 1. (b)) No part of the funds appropriated pursuant to subsection (a) of this section may be used for grants to any non-profit institution of higher learning unless the Administrator or his designee determines at the time of the grant that recruiting personnel of any of the Armed Forces of the United States are not being barred from the premises or property of such institution except that this subsection shall not apply if the Administrator or his designee determines that the grant is a continuation or renewal of a previous grant to such institution which is likely to make a significant contribution to the aeronautical and space activities of the United States. The Secretary of Defense shall furnish to the Administrator or his designee within 60 days after the date of enactment of this Act and each January 30 and June 30 thereafter the names of any non-profit institutions of higher learning which the Secretary of Defense determines on the date of each such report are barring such recruiting personnel from premises or property of any such institution.

(b) In order to implement this statutory prohibition, all grants awarded to nonprofit institutions of higher learning and using appropriated funds subject to the above restrictions shall be processed as follows:

(1) The Office of University Affairs will furnish each installation, for the use of grants officers, a current list of the institutions which bar Armed Forces recruiters.

(2) If a proposed grantee institution is not on the foregoing list, but the grants officer nevertheless has reason to believe it is barring recruiting personnel from its premises or property, the circumstances and all the available pertinent information shall be forwarded to the Director of Procurement for further processing and coordination with the Director, Office of University Affairs.

(3) If a proposed grantee institution is not on the list, and in the absence of any other evidence that the institution may be barring recruiters, the grants officer may proceed with negotiation of the grant. Immediately prior to mailing the grant, the grants officer shall verify, with an appropriate official of the grantee institution, that recruiters are not, in fact, being barred at that time. If such verification is obtained, and other necessary agreements have been reached in the negotiation, the grant may be forwarded to the grantee. Prior to forward-

ing the grant, a statement reading substantially as follows shall be imprinted on the grant document and completed by the grants officer:

Pursuant to telephone conversation between \_\_\_\_\_ and \_\_\_\_\_ (NASA representative) on \_\_\_\_\_ (Date) the grantee represents that at that time no recruiting personnel of any of the Armed Forces of the United States were being barred from the premises or property of \_\_\_\_\_ (Name of institution)

(Signature—Institution Officer Executing)

(4) Upon mailing the grant to the grantee institution, the grants officer shall include a signed statement reading substantially as follows in the grant file:

In accordance with the procedures prescribed in paragraph 209 of the NASA Grant Handbook, I hereby find that \_\_\_\_\_ (Name of institution) is not listed on the report of the Secretary of Defense of institutions barring recruiters of the Armed Forces of the United States and that \_\_\_\_\_ (Name of institution), representing the grantee, has stated on \_\_\_\_\_ (Date) that recruiters of the Armed Forces of the United States are not being barred from its premises or property and I, therefore, hereby determine that \_\_\_\_\_ (Name of institution) is not barring recruiting personnel of the Armed Forces of the United States from the premises or property of the institution at the time of award of this grant.

(5) Where it has been established, at the time of a proposed continuation or renewal of a grant, that the grantee institution bars recruiting personnel from its premises or property, the grants officer shall so notify the cognizant NASA program official. If the program official believes (considering the project's potential contribution to the space program, its cost, and any other relevant factors) that the grant should nonetheless be awarded, he shall provide the grants officer with a written statement to the effect that the grant is considered likely to make a significant contribution to the aeronautical and space activities of the United States, including a clear demonstration as to how and why such contribution is likely to come about. If the grants officer agrees with the opinion of the program official, he shall prepare the following determination and submit it, together with all supporting documentation, to the Director of Procurement for processing and coordination with the Director, Office of University Affairs. The authority to sign such determination has not been delegated and rests with the Administrator or his designee:

I hereby determine that Grant No. \_\_\_\_\_ is a continuation or renewal of a previous grant to \_\_\_\_\_ which is \_\_\_\_\_ (Name of institution) likely to make a significant contribution to the aeronautical and space activities of the United States."

The grant document shall not be released to the grantee institution until the foregoing determination has been executed.

(c) When a university embodies two or more schools or divisions, and any individual school or division thereof bars recruiting personnel from its premises or property, the statutory prohibition cited in paragraph (a) of this section will apply to any and all schools or divisions of the university if the university as a whole is a single legal entity (i.e., where the individual schools and divisions do not have separate and individual entities of their own). Grants officers shall refer questionable cases in this connection to the Director of Procurement for coordination with the Director, Office of University Affairs.

(d) Grants officers, through official channels, shall advise the Director of Procurement and the Director, Office of University Affairs, of any significant actions, problems or matters of substance related to the implementation of this procedure.

#### § 1260.210 Printing, binding, and duplicating.

Printing, binding, and duplicating required by NASA shall be obtained in accordance with the Government Printing and Binding Regulations published by the Joint Committee on Printing, Congress of the United States, and NMI 1490.2, "Responsibilities, Procedures, and Standards for NASA Printing, Duplicating, and Binding." Technical proposals should be carefully reviewed to assure that unauthorized printing, binding, or volume duplicating constituting printing are not included in grants. When a proposed grant may involve printing, binding, or duplicating, close coordination will be effected with the Installation Central Printing Management Officer in the review process to insure compliance with these regulations.

#### § 1260.211 Denial of funds resulting from disruption of activities of educational institutions.

(a) Beginning with the Authorization Act for 1970, the National Aeronautics and Space Administration Authorization Acts have contained a provision which requires institutions of higher education to deny payment of funds otherwise due under NASA programs to certain individuals who disrupt the educational activities of said institutions if the institutions make certain determinations after notice and opportunity for a hearing. This disruptive activity may involve either a violation of law, or a breach of the legitimate regulations of the institution concerned. In either case, the individuals charged with disruptive activities are to be afforded notice and an opportunity for a hearing upon the issues, before a determination to deny payments may be made by the institution concerned. Any such determination to deny funds to an individual is effective for a period of 2 years, and applies to other educational institutions which employ or which are attended by such individuals during this period.

(b) In order to implement this provision, the following clause shall be included in all grants or extensions and supplements thereto with an institution of higher education using funds subject to the National Aeronautics and Space Administration Authorization Act, 1970 (Public Law 91-119), 83 Stat. 196, approved November 18, 1969, and any other subsequent act of Congress, providing for the denial of funds resulting from disruption of activities of educational institutions.

#### DENIAL OF CERTAIN PAYMENTS

(a) If an institution of higher education determines, after affording notice and opportunity for hearing to an individual attending, or employed by, such institution, that such individual has been convicted by any court of record of any crime which was committed after November 18, 1969, and which involved the use of (or assistance to others in the use of) force, disruption, or the seizure of property under control of any institution of higher education to prevent officials or students in such institution from engaging in their duties or pursuing their studies, and that such crime was of a serious nature and contributed to a substantial disruption of the administration of the institution with respect to which such crime was committed, then the institution which such individual attends, or is employed by, shall deny for a period of 2 years any further payment to, or for the direct benefit of, such individual under any of the programs authorized by the National Aeronautics and Space Act of 1958. If an institution denies an individual assistance under the authority of this clause, then any institution which such individual subsequently attends shall deny for the remainder of the 2-year period any further payment to, or for the direct benefit of, such individual under any of the programs authorized by the National Aeronautics and Space Act of 1958.

(b) If an institution of higher education determines, after affording notice and opportunity for hearing to an individual attending, or employed by, such institution, that such individual has willfully refused to obey a lawful regulation or order of such institution after November 18, 1969, and that such refusal was of a serious nature and contributed to a substantial disruption of the administration of such institution, then such institution shall deny, for a period of 2 years, any further payment to, or for the direct benefit of, such individual under any of the programs authorized by the National Aeronautics and Space Act of 1958.

(c) Nothing in this clause shall be construed to prohibit any institution of higher education from refusing to award, continue, or extend any financial assistance to any individual because of any misconduct which in its judgment bears adversely on his fitness for such assistance.

(d) Nothing in this clause shall be construed as limiting or prejudicing the rights and prerogatives of any institution of higher education to institute and carry out an independent, disciplinary proceeding pursuant to existing authority, practice, and law.

(e) Nothing in this clause shall be construed to limit the freedom of any student to verbal expression of individual views or opinions.

#### Subpart C—Award of Research Grants

##### § 1260.301 Instrument.

(a) The grant instrument shall be brief in format, containing only those provisions necessary to protect the fundamental interests of the Government,

including provision for acquisition by the Government of title to and rights in inventions arising out of the research, and for revocation of the grant, if necessary, after consultation between the grantee institution and NASA.

(b) The grant instrument shall provide for audit of grants by NASA or its representatives at all reasonable times during the life of the grant and for 3 years thereafter. In this connection, the NASA audit program for grants shall involve sample audits on a selective basis. The Government's audit of NASA grants shall generally be for the purpose of appraising and evaluating the grantee's performance from a business management standpoint and not for the purpose of adjustment of grant amounts.

##### § 1260.302 Grant format.

NASA Forms 1463, Research Grant and 1463A, Provisions for Research Grants shall be used for the award of all NASA research grants.

##### § 1260.303 Determination of amount.

(a) Regulations governing contracts generally are not appropriate for application to grants. However, in general, Exhibit B of this part is the basic guidance document in determining the allowability of costs chargeable to research supported by NASA under grants. (Subpart 18-15.3 of 41 CFR Part 18-15 applies to educational institutions, and Subpart 18-15.2 of 41 CFR Part 18-15 to non-profit organizations other than educational institutions.)

(b) In no case shall an overhead rate used for determining grant amounts exceed, in equivalence, the most recent overhead rate at the grantee institution for comparable research contracts of the Government.

(c) Grant amounts determined at the time of the award shall not be reduced other than in case of revocation or in the event grant funds are not committed by the grantee prior to completion of the research involved.

(d) It is the responsibility of the grantee to manage the granted funds in such a manner that they cover the full period of the grant. NASA is not obligated to reimburse over-expenditures. However, this stricture does not preclude acceptance of a proposal requesting supplemental funding to extend the research.

##### § 1260.304 Cost sharing.

NASA's Appropriation Acts for several years have included provisions requiring cost sharing by the grantee under research grants resulting from unsolicited proposals. Office of Management and Budget, Circular A-100, dated December 18, 1970, also sets forth circumstances under which cost sharing should be encouraged in certain grants even when not required by statute. In accordance with the foregoing, and pursuant to the general NASA policy set forth in NMI 8310.2, "Cost Sharing on Research Grants and Contracts," dated October 20, 1971, the following basic guidelines will

be implemented in the negotiation of all research grants and in supplements to such grants which require additional funding.

(a) When cost sharing is applicable. (1) Cost sharing by non-Federal organizations is mandatory in any grant for basic research which results from an unsolicited proposal.

(2) Cost sharing by non-Federal organizations shall be encouraged in any grant for basic research which does not result from an unsolicited proposal but in which the parties nevertheless have considerable mutual interest in the research (e.g., when it is probable that the performing organization or institution will receive significant future benefits from the research, such as: increased technical knowledge useful in future operations; additional technical or scientific expertise or training for its personnel; and the opportunity to benefit through patent rights).

(3) Cost sharing by non-Federal organizations which is not otherwise appropriate under paragraph (a) (1) or (2) of this section may nevertheless be accepted when voluntarily offered by a performing organization.

(b) When cost sharing is not applicable. Except when cost sharing is mandatory pursuant to paragraph (a) (1) of this section, it is not applicable to grants to which the Grants Officer has determined that:

(1) The research effort has only minor relevance to the non-Federal activities of the performing organization, which is proposing to undertake the research primarily as a service to the Government;

(2) The performing organization has little or no non-Federal sources of funds from which to make a cost contribution;

(3) The performing organization is predominantly engaged in research and development and has little or no production or other service activities, and is therefore not in a favorable position to make a cost contribution; or

(4) Payment of the full cost of the project is necessary in order to obtain the services of the particular organization.

(c) Amount of cost sharing—(1) Educational institutions and affiliated not for profit institutions. Cost sharing for such institutions normally may vary from 1 percent to as much as 5 percent of the costs of the project. However, amounts greater than 5 percent may be accepted when voluntarily offered by the institution.

(2) Other performing organizations. Cost sharing for other organizations may vary from less than 1 percent to 50 percent or more of the costs of the research.

(3) Additional considerations. (i) The amount of cost sharing which is appropriate in a given instance is independent of whether cost sharing is mandatory or merely encouraged.

(ii) Mutuality of interest in the results of the work being performed should be of primary significance in assessing the appropriateness of any particular

level of cost sharing within the foregoing ranges.

(d) Implementation. The following policies and procedures are established to implement the basic guidelines set forth above:

(1) Determining mutuality of interest. Factors which may be considered in determining mutuality of interest include:

(i) The potential of the grantee to recover its contribution from non-Federal sources;

(ii) The extent to which a particular area of research requires special stimulus in the national interest; and

(iii) The extent to which the research effort or result is likely to enhance the grantee's capability or expertise.

(2) Method of cost sharing. Cost sharing shall be accomplished by a contribution of part or all of one or more elements of allowable cost of the work being performed, and normally shall be expressed as a stated minimum percentage of the total allowable costs of the project. Costs so contributed may not be charged to the Government under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program).

(3) Institutional cost sharing agreements—(i) Description. An institutional cost sharing agreement covers the aggregate of all or some of the research projects (both grants and contracts) supported by NASA at a given performing organization. Eligibility for institutional cost sharing agreements is limited to nonprofit institutions of higher education and nonprofit organizations whose primary purpose is the conduct of scientific research. During the term of such agreements, relatively high contributions by the performing organization on some NASA projects may be offset by relatively low contributions on other NASA projects, provided that:

(a) The agreed aggregate contribution is made, and

(b) A contribution, even if nominal, is made to each of the grants and contracts to which the agreement applies.

(ii) Applicability. An institutional cost sharing agreement is entered into only when warranted by a large anticipated volume (normally in excess of \$250,000 annually) of contracts and/or grants which will be negotiated with the performing organization during the term of the agreement and will be subject to cost sharing.

(iii) Negotiating authority. The Procurement Office, NASA Headquarters (Code KDO-1) is responsible for the negotiation of all institutional cost sharing agreements. Such agreements, when negotiated, shall be used by all procurement offices.

(iv) Determination of amount. The amount of cost sharing negotiated under an institutional cost sharing agreement will be determined in accordance with paragraph (d) (3) (iii) of this section, and should reflect the anticipated mutuality of interest of the parties during

the term of the agreement. The average amount of cost sharing under previous grants and contracts with the performing organization may be used as a guide for this purpose to the extent that it is consistent with paragraph (d) (3) (iii) of this section. When the negotiated amount of cost sharing differs significantly from this average, appropriate explanation should be included in the institutional cost sharing agreement file.

(V) *Content.* Institutional cost sharing agreements normally shall be executed in the format set forth below. The format may be adapted to fit specific circumstances.

#### INSTITUTIONAL COST SHARING AGREEMENT BETWEEN THE UNITED STATES OF AMERICA AND

This Agreement is entered into as of the \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_ between the United States of America, hereinafter called the "Government," represented by the Contracting Officer, \_\_\_\_\_ and \_\_\_\_\_, a corporation organized and existing under the laws of the State of \_\_\_\_\_, hereinafter called the "Performing Organization."

1. The Performing Organization may, from time to time during the term of this Agreement, perform research under certain NASA grants and contracts (hereinafter referred to as "subject research agreements") pursuant to which the Performing Organization agrees to share the cost of the research in the manner provided in this Agreement.

2. In each year ending \_\_\_\_\_ during the term of this Agreement, the Performing Organization shall participate in the cost of subject research agreements by contributing, from non-Federal sources, a minimum of \_\_\_\_\_ percent of the aggregate direct and indirect costs which are otherwise allowable in accordance with the cost principles applicable to the subject research agreements. A nominal portion, at least, of the allowable costs of each individual subject research agreement shall be included in the aforementioned aggregate contribution.

3. The Performing Organization shall maintain records of all costs contributed pursuant to this Agreement, as well as costs to be paid by the Government. Such records shall be subject to audit by the Government. Costs contributed by the Performing Organization shall not be charged to the Government under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program).

4. This Agreement may be amended only by mutual agreement of the parties, and may be terminated in its entirety by either party upon thirty (30) days written notice to the other party. Amendment or termination of this Agreement shall not affect any subject research agreement theretofore entered into between the parties.

5. Nothing herein contained shall be construed to imply any agreement on the part of the Government to enter into research agreements with the Performing Organization.

6. This Agreement is effective \_\_\_\_\_ and shall remain in effect for a period of three (3) years thereafter unless sooner amended or terminated in accordance with the above.

In Witness Whereof, the parties have executed this Agreement as of the day and year first above written:

UNITED STATES OF AMERICA  
By \_\_\_\_\_  
(Signature of Contracting Officer)  
\_\_\_\_\_  
Typed or Printed Name  
\_\_\_\_\_  
(Name of Performing Organization)  
By \_\_\_\_\_  
(Signature of Authorized Individual)

\_\_\_\_\_  
Title

(4) *Grant clauses.* The appropriate clause set forth in this paragraph d(4) shall be inserted in each grant in which costs are shared by the grantee pursuant to the policies prescribed in this § 1260.304.

(i) In grants for which cost sharing has been individually negotiated, the following clause shall be used. (The clause may be modified to fit specific circumstances):

#### COST SHARING (MARCH 1972)

The Grantee agrees to share in the cost of the research by charging to the Government not more than \_\_\_\_\_ percent of the costs of performance determined to be allowable in accordance with Exhibit B of the NASA Grant Handbook. The remaining \_\_\_\_\_ percent, or more, of the allowable costs of performance so determined will constitute the Grantee's share and will not be charged to the Government under this grant or under any other grant or contract (including allocation to other grants or contracts as part of an independent research and development program). The Grantee will maintain records of all grant costs claimed by the Grantee as constituting part of its share and such records shall be subject to audit by the Government.

(ii) In grants for which cost sharing will be in accordance with a previously negotiated institutional agreement, the following clause shall be used:

#### COST SHARING UNDER INSTITUTIONAL AGREEMENT (MARCH 1972)

The Grantee agrees to share in the cost of the work hereunder in accordance with Institutional Cost Sharing Agreement No. \_\_\_\_\_ dated \_\_\_\_\_.

(5) *Documentation.* Grant files shall contain appropriate documentation setting forth the nature of the mutual interest of the parties and supporting the amount of cost sharing agreed upon. When cost sharing has been waived pursuant to paragraph (b) (4) of this section, documentation shall include the reason for the grantee's refusal to share the cost of the work, and a justification as to why it is necessary for NASA to support the research project notwithstanding the grantee's refusal to share in the costs of the work.

§ 1260.305 *Funding of grants.* [Reserved]

§ 1260.306 *Numbering of grants.*

(a) Grants shall be numbered by using a letter prefix, followed by a hyphen and a serial number.

(1) The letter prefix shall be as follows:

- (i) Research grant..... NGR
- (ii) Research grant, step funded..... NGL
- (iii) Training grant (Headquarters use only)..... NGT
- (iv) Facilities grant (Headquarters use only)..... NQP

(2) The basic serial number of a grant (exclusive of the letter prefix) shall be derived from the proposal control number assigned by the Office of University Affairs, NASA Headquarters (Code PY) and shall consist of eight digits as follows:

- (i) A two-digit number representing the State (or foreign country), followed by a hyphen;
- (ii) A three-digit number representing the grantee institution, followed by a hyphen; and
- (iii) A three-digit number, unique to each grant at a particular institution.

(b) The proposal control number assigned by the Office of University Affairs, NASA Headquarters (Code PY) for new projects contains eight digits and is constructed as follows: (a) (2) of this section, except that the last three digits are unique to each proposal submitted by a particular institution. Control numbers for proposals to supplement existing grants contain 11 digits. The first eight correspond to the serial number of the grant, while the last three are unique to the particular supplementing proposal. The serial numbers prescribed in paragraph (a) (2) of this section shall be determined from proposal control numbers in the following manner:

(1) *New awards.* The eight digit numerical portion of the proposal control number is used as the serial number for a new award. Example: Proposal Y-05-020-021 becomes grant NGR (or NGL) 05-020-021. When two or more proposals from the same institution are combined into a single new award, the lowest unique number is used as the serial number. Example: Proposals Y-05-020-037 and Y-05-020-051 are supported in a single grant whose number is NGR (or NGL) 05-020-037.

(2) *Supplements to existing grants.* A supplement to an existing grant bears the same basic serial number as the original grant, plus a consecutively assigned supplement number. Example: Proposal Y-05-020-001-076 is used to supplement grant NGR 05-020-001 (which has not heretofore been supplemented) and the resulting grant supplement is numbered NGR 05-020-001, Supplement No. 1. (The last three digits of the proposal control number are ignored for serial purposes in this type of action.) Further supplements to this grant will then be numbered NGR 05-020-001, Supplement No. 2, NGR 05-020-001, Supplement No. 3, etc.

(3) *New awards based on proposals to supplement existing grants.* If a proposal is submitted to supplement an existing grant, but, instead, is considered by the Grants Officer to be more appropriate for a new award, the first five digits and

last three digits of the 11-digit proposal control number are used as the serial number for the new award. Example: Proposal Y-05-020-001-315, originally submitted to supplement grant NGR 05-020-001, becomes a new grant which is numbered NGR 05-020-315. (The same numbering procedure is followed when a proposal to supplement an existing contract is, instead, converted into a new grant.)

(c) If a serial number cannot be determined by the procedures in paragraph (b) of this section, an appropriate number shall be obtained from the Office of University Affairs, Code PY, NASA Headquarters.

(d) Identification prefixes and basic serial numbers shall be retained unchanged for the life of the instrument. For example, if it is desired to add step-funding to an existing grant with an NGR prefix, the existing grant must be phased out and a new step-funded grant, bearing an NGL prefix, and serially numbered in accordance with paragraph (b) (3) of this section, issued as of the approximate date funds on the existing grant will be exhausted. In such event, closeout procedures for the old grant may consist simply of documentation in the file to the effect that all necessary reports for the project will be found under the new (step-funded) grant number.

§ 1260.307 *Distribution of grants and grant supplements.*

Distribution of grants and grant supplements shall be made by the initiating office in accordance with its requirements, except that in all cases not less than two copies will be furnished to paying offices, one copy of which will support the payment file and be retained for audit purposes in accordance with § 1260.308.

§ 1260.308 *Retention of grant documents for on-site audit.*

NASA's grants and grant supplements designated in § 1260.307 are subject to on-site audit by the General Accounting Office. The original or a signed copy of each document, with supporting data, shall be retained by the installation to be available to the General Accounting Office for audit purposes.

Subpart D—Research Grant Provisions  
§ 1260.400 *General.*

The provisions set forth in this subpart shall be inserted in and made a part of all NASA research grants.

§ 1260.401 *Technical reports and publications.*

TECHNICAL REPORTS AND PUBLICATIONS  
(a) Publication to accomplish widest practicable and appropriate dissemination of research results is encouraged at any time during the course of the investigation. Examples of appropriate media for such dissemination are the learned journals, the proceedings of professional groups and NASA scientific and technical publications. NASA grantees may elect to publish the results of their work by whichever media they feel

most appropriate. Publications and reports prepared under a grant should contain a statement which properly sets for NASA's responsibility for the material; unless otherwise specified this will consist of acknowledgment of NASA support and identification of the grant by number.

(b) When results obtained under a grant are to be published in a technical journal, or in transactions or proceedings of a technical meeting three copies of a preprint or manuscript of each such publication shall be provided to NASA prior to submission for publication and three copies of a reprint shall be provided promptly after publication. Prior approval for publication is not required unless security classification is involved or the grant contains special conditions pertinent to publication of results.

(c) Material submitted for publication by NASA in a formal NASA report series must comply with the highest practicable standards of excellence. It shall be provided initially in three draft copies. Upon agency review and approval, reproducible copy shall be submitted in the style and format specified by NASA. If the grantee wishes NASA to consider such publication, a specific request to this effect should accompany the draft copies.

(d) Five copies of a brief, informal semi-annual status report including a concise statement of the research accomplished during the report period shall be submitted. This is a minimum requirement and grantees are urged to submit interim reports (or to publish in the open literature) whenever the research has reached a point where it is logical to summarize the results, a research phase has been completed, or whenever significant new findings are made (see paragraph 204(a) (v) of the NASA Grant Handbook).

(e) Upon completion of the research, the grantee shall submit five copies of a final technical report which summarizes the results of the entire project.

(f) The status and final reports must be identified as such and may consist in whole or in part of references to and abstracts of published material resulting from the grant. All reports, including preprints, reprints, manuscripts and repro copy, shall be submitted to:

NASA Scientific and Technical Information Facility  
Post Office Box 33  
College Park, MD 20740

§ 1260.402 *Extension of grants.*

#### EXTENSION OF GRANTS

(a) It is NASA policy to provide maximum possible continuity in the funding of grant-supported research, and grants may be extended for additional periods of time. Any extension requiring additional funding must be supported by an unsolicited proposal submitted at least 4 months in advance of the expiration date of the grant. The period of performance shown in the grant document is approximate, but extension for more than 30 days must be requested by application to the Grants Officer and approved in writing.

(b) When a grant is step funded, NASA will, if circumstances permit, make available additional funding to extend the period for an additional year preserving a similar pattern of step funding. This step funding is based on unsolicited proposals received prior to the completion of each year of full support. NASA shall be the sole judge of whether circumstances will permit this increase. This statement of policy should not be taken as a commitment by NASA.

(c) Unsolicited proposals referenced in this section will be submitted to:  
National Aeronautics and Space Administration  
Proposal Control Officer  
Office of University Affairs (Code PY)  
Washington, D.C. 20546

§ 1260.403 *Revocation.*

#### REVOCATION

It is a condition of each grant that it may be revoked in whole or in part by NASA after consultation with the Grantee. In the event of revocation, the Grantee shall refund to NASA any unexpended funds that it has received under the grant, except such portion thereof as may be required by the Grantee to meet commitments which had in the judgment of NASA become firm prior to the effective date of revocation and are otherwise appropriate.

§ 1260.404 *Travel.*

#### TRAVEL

(a) Domestic travel is an appropriate charge to research grants and NASA authorization for specific trips is not required. Expenditures for domestic travel shall not exceed \$500 or 125% of the amount allotted for such travel in the approved proposal budget, whichever is greater, without the prior authorization of the NASA Grants Officer.

(b) Foreign travel (any travel outside of Canada and the United States, its territories and possessions and Puerto Rico) must be clearly essential to the research effort and must, to be charged against a grant, have the prior approval of the NASA Grants Officer regardless of its inclusion in the approved proposal budget.

§ 1260.405 *Allowable costs.*

#### ALLOWABLE COSTS

NASA Grant Handbook, Exhibit B, is the basic guidance document in determining the allowability of costs chargeable to research sponsored by NASA under grants.

§ 1260.406 *Accounting records.*

#### ACCOUNTING RECORDS

(a) The Grantee shall maintain books and accounting records, in accordance with the principles enunciated in Exhibit B of the NASA Grant Handbook, in a manner sufficient to reflect properly all direct and indirect costs incurred or anticipated as a result of commitments made during the period of the grant.

(b) All accounting records relating to costs under NASA grants are subject to inspection and audit by representatives of NASA and the General Accounting Office during the period of performance and for 3 years thereafter.

§ 1260.407 *Payment.*

#### PAYMENT

(a) NASA Form 1031, "Grantee Quarterly Cash Requirement Report" shall be submitted quarterly. Funds are made available on the basis of the quarterly estimates shown on the Form 1031, either by Treasury Department check or under the Treasury Department Letter of Credit System.

(b) Funds received by the Grantee and not committed prior to the conclusion of the research or within 30 days next following the terminal date of the grant shall be considered excess payments and shall be refunded by check made payable to the National Aeronautics and Space Administration or in accordance with instructions provided by the NASA Grants Officer.

#### § 1260.408 Equipment.

##### EQUIPMENT

(a) NASA research grants permit acquisition of technical equipment required for the conduct of research. The Grantee shall maintain property records for equipment with an acquisition cost in excess of \$1,000, in accordance with generally accepted property accounting procedures. Acquisition of equipment costing in excess of \$1,000 and not included in the approved proposal budget requires the prior approval of the NASA Grants Officer unless such equipment is merely a different model of an item shown in the approved proposal budget. Total expenditures for permanent equipment (property items costing \$200 or more with an expected service life of 1 year or more) shall not exceed 25 percent of the amount allotted for such items in the approved proposal budget without prior authorization from the NASA Grants Officer.

(b) NASA grant funds shall not be used to purchase general purpose equipment such as furniture, furnishings, office equipment or other items of a nontechnical nature; exceptions to this require prior approval of the NASA Grants Officer and must be fully justified as essential to the research under the grant.

(c) Title to equipment purchased with grant funds shall vest in the Grantee unless otherwise provided. The Government reserves the right to require transfer to the Government, or to a third party named by the Government, of title to items purchased at a cost in excess of \$1,000. This right may be exercised at any time, but no later than 180 days after receipt of the final equipment inventory report. Any charges for packing, crating and shipping which may be involved in such transfers will be at the expense of the Government.

(d) Title to Government-furnished equipment (including excess personal property) will remain with the Government. Such property will be maintained in accordance with NASA Grant Handbook, Exhibit C. Semi-annual reports, "Analysis of Government-Owned/Contractor-Held Property Other Than Space Hardware" (NASA Form 1018), will be prepared by the Grantee for such property in accordance with Paragraph C.311 of Exhibit C and with NASA Handbook, "Financial Reporting for Government-Owned/Contractor-Held Property and Space Hardware" (NHB 9500.2). Such reports shall be submitted within 10 workdays following the end of each report period. The Grantee shall insert the reporting requirements of this clause in all first tier subcontracts involving Government-furnished equipment, except that such requirements shall provide for the submission of subcontractor reports directly to the Grantee, in sufficient time to meet the aforementioned reporting dates. The Grantee's semi-annual report shall consist of a consolidation of the subcontractors' reports and its own report.

(e) Final equipment inventory reports, covering purchased items in excess of \$1,000 and Government-furnished equipment, will be forwarded to the NASA Grants Officer within 30 days following the terminal date of the grant.

#### § 1260.409 Property rights in inventions.

##### PROPERTY RIGHTS IN INVENTIONS

(a) This grant and all subcontracts issued thereunder are subject to Section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457) relating to property rights in inventions. The term "invention" includes any invention, discovery, improvement, or innovation. Any invention made in

the performance of work under this grant or any subcontract issued thereunder shall be presumed to have been made under the conditions of and subject to Section 305(a) of the Act and becomes the exclusive property of the United States subject, however, to the retention by the Grantee or subcontractor of a royalty free license to practice the invention pursuant to, and of the scope defined in, 14 CFR 1245.204(a). This license may be revoked under the conditions set forth in 14 CFR 1245.211 (b) and (c). The Grantee or applicable subcontractor may petition for waiver of title to the invention in accordance with the NASA Patent Waiver Regulations (14 CFR Part 1245, Subpart 1).

(b) The Grantee shall furnish to NASA a written report containing full and complete technical information concerning any invention made in the performance of any work under this grant promptly upon the making of such invention and shall require all subcontractors to do so. Upon written request by NASA, the Grantee shall furnish additional information available to him, and shall secure the execution of such documents as may be necessary to enable the Administrator, NASA, to file and prosecute patent applications on any such invention. Upon completion of the work under this grant, the Grantee shall furnish to NASA a report as to whether or not any inventions of the type referred to herein have been made in the performance of such work.

#### § 1260.410 Rights in data.

##### RIGHTS IN DATA

The Grantee grants to the Government, for governmental purposes, the right to publish, translate, reproduce, deliver, use and dispose of, and to authorize others to do so, all data, including reports, drawings, blueprints, and technical information resulting from the performance of work under this grant.

#### § 1260.411 Security.

##### SECURITY

Normally, NASA research grants do not involve classified defense information. However, if information is sought or developed by the Grantee that should be classified in the interests of national security, the NASA Grants Officer that issued the grant shall be notified immediately.

#### § 1260.412 Civil rights.

##### CIVIL RIGHTS

Work on NASA grants is subject to the provisions of the Civil Rights Act of 1964, and the NASA implementing regulations (14 CFR Part 1250).

#### § 1260.413 Safety.

##### SAFETY

(a) The Grantee shall act responsibly in matters of safety and shall take all reasonable safety measures in performing under this grant. The Grantee shall comply with all applicable Federal, State, and local laws relating to safety. The Grantee shall maintain a record of, and will notify the NASA Grants Officer of, any accident involving death, disabling injury or substantial loss of property. The Grantee will advise NASA of hazards that come to its attention as the result of the work under the grant, reporting thereon through routine status reports furnished in compliance with the grant.

(b) Where the work under this grant involves flight hardware, the hazardous aspects, if any, of such hardware will be identified, in writing, by the Grantee. Compliance with the provisions of this clause by subcontractors shall be the responsibility of the Grantee.

#### § 1260.414 Subcontracts.

##### SUBCONTRACTS

Approval of subcontracts for the purchase of equipment under this research grant shall be obtained in accordance with the provision herein entitled "Equipment." All other subcontracts not provided for in the approved proposal budget require the prior consent of the Grants Officer.

#### § 1260.415 Changes in principal investigator or technical objectives.

##### CHANGES IN PRINCIPAL INVESTIGATOR OR TECHNICAL OBJECTIVES

(a) The Grantee shall be permitted to change the methods and procedures employed in performing the research without the need to make special reports on proposed actions or obtain NASA approval. Significant changes in methods or procedures shall be reported to NASA in status reports and final technical reports. However, in the event the methodology or experiment is proposed as a specific stated objective of the research work, this shall be reflected in the grant title.

(b) The stated objectives of the research effort shall not be changed, except with the approval of the NASA Grants Officer.

(c) The phenomenon or phenomena under study, i.e., the broad category of research, shall not be changed except with the prior approval of the NASA Grants Officer.

(d) The Grantee shall obtain the approval of the NASA Grants Officer to change the principal investigator, or to continue the research work during a continuous period in excess of 3 months without the participation of an approved principal investigator.

(e) The Grantee shall consult with the NASA Grants Officer if the principal investigator plans to, or becomes aware that he will, devote substantially less effort to the work than anticipated in the approved proposal. If NASA determines that the reduction of effort would be so substantial as to impair the successful prosecution of the research, it may request a change of principal investigator or other appropriate modification of the grant, or may revoke the grant as provided herein.

(f) In projects which involve coprincipal investigators or otherwise include more than one key person who may be considered essential to the conduct of the proposed research project, the foregoing provisions similarly apply to each such key person. In such event, the grant instrument shall identify the individual(s) to whom the provisions apply.

#### Subpart E—Administration of Research Grants

#### § 1260.501 General.

(a) NASA assumes that, once a grant is made, the principal investigator, operating within the policies of the grantee institution, is in the best position to determine the means by which the research may be conducted most effectively. NASA wishes to avoid any action that might diminish the responsibility of the grantee and the investigator for making sound scientific and administrative judgments. Grantees and investigators are encouraged to seek the advice and opinions of NASA on problems that may arise. Unless otherwise stated, the giving of such advice should not imply that the responsibility for final decisions has shifted to NASA. The primary concern of NASA is that granted funds be used in a manner that will make a maximum

contribution to the scientific area under investigation. It is expected that grantees and investigators will also direct their efforts to this end.

(b) The grantee shall be permitted to change the methods and procedures employed in performing the research without the need to make special reports on proposed actions or obtain NASA approval. Significant changes in methods or procedures shall be reported to NASA in status reports and final technical reports. In the event the methodology or experiment is proposed as a specific stated objective of the research work, this shall be reflected in the grant title.

(c) The stated objectives of the research effort shall not be changed, except with the approval of the NASA Grants Officer.

(d) The phenomenon or phenomena under study, i.e., the broad category of research, shall not be changed except with the prior approval of the NASA Grants Officer.

(e) The grantee shall obtain the approval of the NASA Grants Officer to change the principal investigator, or to continue the research work during a continuous period in excess of 3 months without the participation of an approved principal investigator.

(f) The grantee shall consult with the NASA Grants Officer if the principal investigator plans to, or becomes aware that he will, devote substantially less effort to the work than anticipated in the approved proposal. If NASA determines that the reduction of effort would be so substantial as to impair the successful prosecution of the research, it may request a change of principal investigator or other appropriate modification of the grant, or may revoke the grant as provided in § 1260.507.

(g) In projects which involve coprincipal investigators or otherwise include more than one key person who may be considered essential to the conduct of the proposed research project, the provisions of paragraphs (e) and (f) of this section similarly apply to each such key person. In such event, the grant instrument shall identify the individual(s) to whom the provisions apply.

#### § 1260.502 Grant instrument.

A NASA grant is consummated by an instrument signed by the Administrator, NASA, or his duly authorized representative. This instrument will contain the provisions set forth in Subpart D of this part. The simplicity of the NASA grant instrument does not preclude the possibility of collateral understandings and informal agreements which may, in special instances, accompany the formal grant or accumulate, as the occasion demands, during the life of the grant.

#### § 1260.503 Grant period.

(a) Normally, NASA grants are made for periods up to 3 years. As stated in the grant instrument, the period is approximate; the beginning and ending dates are not specified with precision. The grant period begins approximately on the date of the grant and extends

for approximately the length of time specified. However, when progress of research under the grant is delayed and circumstances make it necessary to request an extension of the grant period without additional funds, the policy of NASA is to permit extensions in time, upon written request.

(b) When it appears that the research contemplated will be completed within 30 days after the approximate ending date, a request for extension of the grant period will be unnecessary. If it appears, however, that the additional time required for completion of the research will exceed 30 days, a request for extension must be made by the grantee. Any extension requiring additional funding must be supported by an unsolicited proposal and submitted at least 4 months in advance of the expiration date of the grant.

#### § 1260.504 Grant payments.

Payments will be made in a lump-sum payment in advance or on a periodic basis, depending on the relative size of the total grant and the estimated timing of financial requirements. Periodic payments will be made on the basis of NASA Form 1031, "Grantee Quarterly Cash Requirement Report" submitted by the grantee and payments will be made either by Treasury Department check or under the Treasury Department Letter of Credit System. Eligibility for the Letter of Credit System is limited to non-profit institutions with which NASA anticipates a continuing relationship of 1 year or longer, and whose aggregate annual volume of business with NASA equals or exceeds \$250,000. It is the policy of NASA to utilize the Letter of Credit System to the maximum feasible extent.

#### § 1260.505 Expenditure approvals.

(a) NASA believes that the principal investigator, operating within the established policies of the grantee, is the individual best qualified to determine the manner in which the grant funds may be used most effectively to accomplish the proposed research. Although NASA assumes no responsibility for overspent budgets, the investigator and the grantee institution are free to spend grant funds for the proposed research without strict adherence to individual allocations within total budgets, except as provided in §§ 1260.404 and 408. Under no circumstances, however, may grant funds be used to acquire land or any interest therein, to acquire or construct facilities or to procure passenger carrying vehicles. Purchase of furniture, furnishings, office equipment or other items of a non-technical nature require the prior approval of the NASA Grants Officer as provided in § 1260.408.

(b) Controls and limitations on expenditures for specific items under NASA grants shall be in accordance with the provisions of Exhibit B of this part.

(c) If any of the actions requiring approval in accordance with Exhibit B of this part have received specific NASA approval during the proposal and award process, a further approval shall not

be required. Whenever practical, the approvals shall be given at the time of the project award or extension to avoid any delays during the course of the project.

(d) Approval requirements relating to expenditures under grants, in addition to those provided for in Exhibit B of this part, shall not be imposed except in accordance with the deviation procedure of § 1260.106 or as specifically required by statute.

#### § 1260.506 Vesting of title to research equipment.

(a) *Background.* (1) Support of research in educational institutions provides substantial long-term and indirect benefits as well as the immediate research results. In addition to the obvious academic advantages of such support, individual and institutional capabilities to perform relevant research are enhanced, and the number of scientists and graduates with research interests in areas of concern to the Nation generally, and to NASA in particular, is increased. Adequate modern research equipment in universities serves to maximize these direct and supplemental benefits.

(2) Every NASA-funded university research project represents an area of mutual interest in which the university has, and expects to maintain, a capacity for research and education. The research equipment that it acquires has, therefore, an especially high potential for continuing effective use at the acquiring institution. The legitimate interests of both NASA and the university, as well as the long-term national interest, require that any decision by the agency to take title for the purpose of transferring grantee equipment to another location reflect careful consideration of all relevant factors. This should include comparison of the expected beneficial use at the present location with that expected at the new location, possible deleterious effects of removal, and the administrative and relocation costs involved.

(b) *Policy.* The following policies will be reflected, as appropriate, in the negotiation and the documentation of NASA research grants and grant supplements and in related correspondence:

(1) Title to equipment purchased with grant funds vests in the grantee institution, and the equipment does not automatically follow the Principal Investigator when he leaves the institution. Title to Government-furnished equipment remains with the Government.

(2) NASA may require transfer to it of title to individual items or coherent systems (paragraph (b)(8) of this section) of major equipment (purchased at a cost of more than \$1,000) at any time but no later than 180 days after receipt by NASA of the final equipment inventory report for the grant.

(3) Title to minor equipment items (costing individually \$1,000 or less) is not subject to transfer to the agency, except under the conditions of this paragraph (b)(8).

(4) NASA procedure does not require a grantee to transfer title to grant-acquired equipment directly to another ac-

## RULES AND REGULATIONS

tual or potential grantee or contractor. Such transfers are accomplished by the Government taking title and issuing the equipment to the second institution as Government-furnished equipment.

(5) NASA normally will not recover equipment that a grantee desires to retain, for reissuance to another institution or to a NASA installation, unless it is specifically required for NASA work at the new location. Exceptions will be made only in highly unusual situations where title transfer is clearly in the best interests of the Government.

(6) Cost sharing by NASA and a grantee in the acquisition of individual items or coherent systems (subparagraph (8) of this paragraph (b)) of equipment in response to a statutory requirement for cost sharing or in any way that could result in joint ownership, shall normally be avoided.

(7) When cost sharing by NASA and a grantee in the acquisition of a major equipment item or coherent system cannot be avoided, and the NASA contribution will exceed \$1,000, agreement regarding NASA retention of its option to take title and the conditions under which the option (if retained) will be exercised shall be reached and documented prior to purchase. NASA shall have no option to take title if its contribution is \$1,000 or less.

(8) When two or more components are fabricated into a single coherent system, in such a way that the components lost their separate identities and their separation would render the system useless for its original purpose, the components will be considered as integral parts of a single system. If such a system includes grantee-owned components (for cost sharing or other purposes), paragraph (b) (7) of this section applies. The requirement that NASA seek agreement to retain its option to take title shall further apply where it is expected that one or more grant-acquired components costing \$1,000 or less will be fabricated into a single coherent system costing in excess of \$1,000. However, an item that is used ancillary to a system, without loss of its separate identity and usefulness, will be considered as a separate item and not as an integral component of the system.

(c) **Procedures.** (1) When a decision is made to revoke or discontinue support of a grant, the Grants Officer shall notify the grantee in writing of the requirement under the grant for submission of a final inventory report of major purchased equipment (individual items or coherent systems costing more than \$1,000) and Government furnished equipment.

(2) When the cognizant NASA Technical Officer or Program Manager desires that NASA take title to a major item of grantee purchased equipment, he shall request the Grants Officer to obtain information regarding the grantee's desire to retain the equipment, the use to which it would be put in the absence of further NASA support of the grant, and any substantial deleterious effects of removal of the equipment.

(3) The Grants Officer shall obtain the information, and provide copies to the Technical Officer and the Office of University Affairs for their coordinated review and recommendation regarding acquisition of title. The Technical Officer shall inform the Grants Officer of his recommendation by means of a memorandum concurred in by the Office of University Affairs.

(4) When NASA acquires title to major items of grantee purchased equipment, the Grants Officer shall notify the cognizant NASA Financial Management Office so that proper entries may be made in accounting records.

## § 1260.507 Revocation of grants.

(a) NASA grants may be revoked in whole or in part by NASA after consultation with the grantee, except that a revocation shall not affect any financial commitment which in the judgment of NASA had become firm prior to the effective date of the revocation and is otherwise appropriate. Upon revocation, the grantee shall reduce, insofar as is possible, the amount of outstanding commitments and repay to NASA, by check made payable to the National Aeronautics and Space Administration, the uncommitted balance of all funds that have been paid to the grantee by NASA under the terms of the particular grant concerned.

(b) The grantee shall communicate with NASA whenever he has reason to believe that circumstances may necessitate revocation of the grant. It is expected that the most common cause for revocation will be the inability of the grantee to carry out the research for which the grant is made or to adhere to the other conditions set forth in the grant instrument. As a general rule, the availability of the services of the principal investigator named in the grant instrument is a decisive factor in NASA's decision to award the grant. Consequently, NASA should be informed immediately whenever it appears that the principal investigator will find it impossible to continue to direct the research.

## § 1260.508 Transfer of grants to other institutions.

When the principal investigator changes his organizational affiliation and desires support for his research at his new location, he must submit a new proposal via the appropriate officials of the new institution. Although such proposal will be reviewed in the normal manner, every effort will be made to expedite a decision. Regardless of the action taken on the new proposal, final reports on the original grant, describing the scientific progress and expenditure to date, will be required if that grant is revoked.

## § 1260.509 Accounting procedures.

While no particular classification of accounts is required, it is expected that grantees will maintain records for each grant, in accordance with the principles enunciated in Exhibit B of this part,

which will permit preparation of the required fiscal report and make possible the determination that grant funds were used for the general purpose for which the grant was made.

## § 1260.510 Travel.

(a) Domestic travel by grantee personnel, when necessary to the performance of a research grant, is an appropriate charge to the grant, and NASA authorization for specific trips is not required. Expenditures for domestic travel shall not exceed \$500 or 125 percent of the amount allotted for such travel in the approved proposal budget, whichever is greater, without the prior authorization of the NASA Grants Officer.

(b) Pursuant to the "Travel" provision of § 1260.404, foreign travel (any travel outside of Canada and the United States, its territories and possessions and Puerto Rico) by grantee personnel may be charged to a grant only when specifically approved in advance by the NASA Grants Officer. (Inclusion of foreign travel in an approved proposal budget is for cost estimating purposes only, and a grant award based on such a budget does not, in itself, constitute specific prior approval in the context of this paragraph (b).) The following criteria shall be applied:

(1) Foreign travel may be approved for:

(i) Participation in meetings, conferences or symposia by presentation of papers or as session chairmen or discussion leaders on subjects directly related to the participant's NASA work; or

(ii) "On site" field work under the participant's NASA grant.

(2) Foreign travel ordinarily will not be approved for:

(i) The principal purpose of visiting or attending meetings;

(ii) Meetings of national (as distinguished from international) bodies, unless the travel is primarily associated with other approved goals; or

(iii) Meetings that are predominantly American in attendance.

(3) Approval of individual requests for foreign travel under grants will be subject to such criteria, policies, and procedures as may be promulgated by the Office of University Affairs or other appropriate authority.

## § 1260.511 Audit. [Reserved]

## § 1260.512 Use of GSA supply sources by grantees. [Reserved]

## Subpart F—Reports

## § 1260.600 General.

This subpart prescribes reports designed to provide records and statistics for management purposes and to comply with statutory requirements.

## § 1260.601 Reporting of grants.

Pursuant to section 3 of the Act of September 6, 1958 (Public Law 85-934; 42 U.S.C. 1891-1893), an annual report shall be made to the appropriate committees of both Houses of Congress on or before June 30th of each year. Such report shall

be prepared by the Procurement Office, NASA Headquarters (Code KD-1) and shall set forth, for the preceding year:

(a) The number of grants made pursuant to section 1 of the Act;

(b) The dollar amount of such grants; and

(c) The institutions in which title to equipment was vested pursuant to section 2 of the Act.

## § 1260.602 Individual Procurement Action Report (NASA Form 507).

The Individual Procurement Action Report (NASA Form 507) is designed to provide essential procurement records and statistics through a single uniform reporting program as a basis for required recurring and special reports to the President, the Congress, the Department of Labor, the Office of Emergency Preparedness, the General Accounting Office, the Renegotiation Board, the Small Business Administration, and other Federal agencies. The preparation and utilization of NASA Form 507 has been made an integral part of the Agencywide system for the recording and reporting of financial and statistical data covering the status of contracts and grants (SCAG). Complete instructions covering the operation of this system are contained in the NASA Financial Management Manual 9332-1-9332-13.

## § 1260.603 Committee on academic science and engineering (CASE) reports.

NASA Form 1356, "Committee on Academic Science and Engineering (C.A.S.E.) Report on Support of Colleges and Universities", is either submitted with funded procurement requests pursuant to NMI 5101.12A, or, in the case of certain nonfunded actions, initiated by the procuring office. All NASA Forms 1356 will be completed, checked and promptly forwarded to the Office of University Affairs, NASA Headquarters (Code FY), in accordance with the instructions on the form.

## § 1260.604 Grantee Quarterly Cash Requirement Report (NASA Form 1031).

The Grantee Quarterly Cash Requirement Report (NASA Form 1031) will be submitted quarterly by the grantee as a basis for payment.

## § 1260.605 Status and final reports.

(a) Five copies of a brief, informal, semiannual status report including a concise statement of the research accomplished during the report period shall be submitted.

(b) Upon completion of the research, the grantee shall submit five copies of a final technical report, which summarizes the results of the entire project. Citation of publications resulting from the research, or abstracts thereof, may serve as all or part of this final report. Research results not intended for publication in technical journals must be in the format prescribed for NASA technical notes. In addition, the grantee will report to NASA whether or not any inventions required to be reported under the grant

## RULES AND REGULATIONS

have been made in the performance of work under the grant.

(c) A properly certified final fiscal report is required for each grant. Report forms for this purpose are forwarded to the business office of the grantee institution, together with the copy of the grant instrument; additional forms may be requested. Two copies of the final fiscal report should be forwarded to NASA after work under the grant has been completed.

## APPENDIX—LISTING OF EXHIBITS

Exhibit A—Assurance of Compliance—Civil Rights Act (NASA Form 1206). Available from Procurement Office, NASA Headquarters (KDP-1).

Exhibit B—Cost Principles and Procedures (Part 18-15, Subparts 18-15.1, 18-15.2, 18-15.3 and 18-15.8 of Title 41).

Exhibit C—Control of Property in Possession of Nonprofit Research and Development Contractors (Appendix C of Title 41, Chapter 18).

Exhibit D—Grant Document Provisions (NASA Forms 1463 and 1463A). Available from Procurement Office, NASA Headquarters (KDP-1).

Exhibit E—Restrictions on Data and Other Information § 18-1304 of Title 41, Chapter 18).

Dated: March 23, 1973.

GEORGE J. VECCHIETTI,  
Director of Procurement,  
National Aeronautics and Space  
Administration.

Title 16—Commercial Practices  
CHAPTER I—FEDERAL TRADE  
COMMISSION

[Docket No. C-2356]

PART 13—PROHIBITED TRADE  
PRACTICES

Georgia-Pacific Corp. and Tri-State Mill  
Supply Co.

Subpart—Discriminating in price under section 2, Clayton Act—Payment or Acceptance of Commission, Brokerage, or other Compensation under 2(c): § 13.800 Buyers' agents; § 13.810 Buyers' corporate or other agent.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or applies sec. 2, 49 Stat. 1526; 15 U.S.C. 13) [Cease and desist order, Georgia-Pacific Corp. et al., Portland, Oreg., Docket No. C-2356, Mar. 1, 1973]

In the Matter of Georgia-Pacific Corp., a Corporation; and Tri-State Mill Supply Co., Inc., a Corporation

Consent order requiring a Portland, Oreg., manufacturer, seller, and distributor of a variety of wood and paper products, and its Crossett, Ark., wholly owned subsidiary, a supplier of general industrial equipment, among other things to cease receiving brokerage allowances.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent Georgia-Pacific Corp., a corporation, its successors, and assigns, and its officers, agents,

representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the purchase of industrial supplies, equipment, machinery, or other products, in commerce, as "commerce" is defined in the Clayton Act, as amended, do forthwith cease and desist from:

1. Receiving or accepting services, moneys or anything of value from Tri-State Mill Supply Co., Inc., or any intermediary, agent, representative, or broker in connection with the purchase by said respondent of industrial supplies, equipment, machinery, or other products when such intermediary, agent, representative, or broker is receiving or accepting anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, from the seller while acting for, or in behalf of, or subject to the direct or indirect control of said respondent.

2. Receiving or accepting directly or indirectly from any seller, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, upon or in connection with any purchase by said respondent of industrial supplies, equipment, machinery, or other products.

It is further ordered, That respondent Tri-State Mill Supply Co., Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the purchase of industrial supplies, equipment, machinery, or other products, in commerce, as "commerce" is defined in the Clayton Act, as amended, do forthwith cease and desist from:

Receiving or accepting, directly or indirectly, from any seller, anything of value as a commission, brokerage, or other compensation, or any allowance or discount in lieu thereof, upon or in connection with any purchase of industrial supplies, equipment, machinery, or other products, for its own account or where said respondent is the agent, representative, or intermediary acting for, or in behalf of, or subject to the direct or indirect control of, the buyer.

It is further ordered, That the respondent corporations shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of any subsidiaries which may affect compliance obligations arising out of the order, or any other change in the corporations which may affect compliance obligations arising out of the order.

It is further ordered, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the man-

ner and form in which they will comply with this order.

Issued: March 1, 1973.

By the Commission.

[SEAL] CHARLES A. TOSIN,  
Secretary.

Subpart—Securing agents or representatives by misrepresentation: § 13.2130 *Earnings*; § 13.2165 *Terms and conditions*. Securing orders by deception: § 13.2170 *Securing orders by deception*. Subpart—Securing signatures wrongfully: § 13.2175 *Securing signatures wrongfully*.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Interstate Publishers Service, Inc., et al., Kansas City, Mo., docket No. 8871, Feb. 14, 1973]

In the Matter of Interstate Publishers Service, Inc., a Corporation, Cecil T. Gay, Edward W. Scott and Thomas R. Gay, Individually and as Officers of Said Corporation and Donald F. Scott, Individually and as a Director of Said Corporation

Consent order requiring a Kansas City,

Mo., seller of magazine subscriptions and other publications, among other things to cease misrepresenting travel opportunities available to representatives; misrepresenting the terms, conditions, or nature of employment; misrepresenting earnings of previous representatives; failing to reveal to prospective representatives the nature of their employment with respondents; misrepresenting the identity of solicitors or of the business in which they are engaged; representing respondents' representatives as connected with a Government agency assisting the underprivileged or competing for college scholarship awards; representatives are bonded; misrepresenting the terms and conditions of any guarantee; and furnishing means and instrumentalities of misrepresentation or deception.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent Interstate Publishers Service, Inc., a corporation, and its officers and Edward W. Scott, individually and as an officer of said corporation, and Donald F. Scott, individually and as a director of said corporation, and Cecil T. Gay and Thomas R. Gay, individually, and respondents' agents, representatives, employees, and successors and assigns, directly or through any corporate or other device, in connection with the advertising, offering for sale, or distribution or sale of magazines, magazine subscriptions or other products or the sale, solicitation or acceptance of subscriptions for magazine or other publications or moneys paid therefore, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, to prospective solicitors and solicitors that they will travel on a planned itinerary to various large cities and resort areas throughout the United States and foreign countries; or misrepresenting in any manner, the travel opportunities available to their representatives or solicitors.

2. Representing, directly or by implication, to prospective solicitors and solicitors that they will serve in any capacity other than as magazine subscription solicitors selling magazines on a door-to-door basis; or misrepresenting, in any manner, the terms, conditions, or nature of such employment, or the manner or amount of payment for such employment.

3. Representing, directly or by implication, to prospective solicitors or solicitors that they will earn or receive \$175 per week or any other stated or gross amount; or representing, in any manner, the past earnings of respondents' representatives or solicitors, unless in fact, the past earnings represented have actually been received by a substantial number of respondents' representatives or solicitors and accurately reflect the

average earnings of such representatives or solicitors.

4. Representing, directly or by implication, to prospective solicitors or solicitors, that respondents will pay all, or any part of, the expenses of such solicitors; or misrepresenting, in any manner, the terms or conditions of employment as a solicitor for respondents.

5. Failing clearly and unqualifiedly, to reveal during the course of any contact or solicitation of any prospective employee, sales agent or representative, whether directly or indirectly, or by written or printed communications, or by newspaper or periodical advertising, or person-to-person, that such prospective employee, sales agent or representative will be employed to solicit the sale of magazine subscriptions.

6. Soliciting or accepting subscriptions for magazines or other publications which respondents have no authority to sell or which respondents cannot promptly deliver or cause to be delivered.

7. Representing, directly or by implication, that respondents' representatives or solicitors are participants in a contest working for prize awards and are not solicitors working for money compensation; or misrepresenting, in any manner, the status of their sales agents or representatives or the manner or amount of compensation they receive.

8. Representing, directly or by implication, that respondents' representatives or solicitors are employed by or for the benefit of any charitable or nonprofit organization; or misrepresenting in any manner, the identity of the solicitor or of his firm or of the business they are engaged in.

9. Representing, directly or by implication, that respondents' representatives or solicitors are employed by or affiliated with programs sponsored by a government agency the purpose of which is to provide assistance to underprivileged groups or persons.

10. Representing, directly or by implication, that respondents' representatives or solicitors are competing for college scholarship awards.

11. Representing, directly or by implication, that respondents' representatives or solicitors are college students working their way through school, unless such is the fact.

12. Representing, directly or by implication, that respondents' sales agents or representatives have been or are bonded or making any references to bonding, unless such sales agents or representatives have been bonded by a recognized bonding agency, and any payments made pursuant to such bonding arrangement would accrue directly to the benefit of subscribers ordering subscriptions from respondents' representatives or solicitors; or misrepresenting, in any manner, the nature, terms or conditions of any such bond.

13. Representing, directly or by implication, that respondents have a legal arrangement with any independent third party which insures the placement and

fulfilment of each and every magazine subscription order; or misrepresenting, in any manner, the nature, terms, and conditions of any such arrangement.

14. Representing, directly or by implication, that respondents guarantee the delivery of magazines for which they sell subscriptions and accept payments, without clearly and conspicuously disclosing the terms and conditions of any such guarantee; or misrepresenting, in any manner, the terms and conditions of any guarantee.

15. Representing, directly or by implication, that the money paid by a subscriber to the respondents' representative or solicitor at the time of the sale is the total cost of the subscription in instances where the subscriber will be required to remit an additional amount in order to receive the subscription as ordered.

16. Representing, directly or by implication, that magazines purchased by subscribers will be distributed to various schools and institutions as gifts or contributions.

17. Misrepresenting the number and name(s) of publications being subscribed for, the number of issues or duration of each subscription or the total price for each and all such publications, or misrepresenting in any way the terms and conditions of the sale.

18. Utilizing any sympathy appeal to induce the purchase of subscriptions, including but not limited to: Illness, disease, handicap, race, financial need, eligibility for benefit offered by respondents, or other personal status of the solicitor, past, present or future; or representing that earnings from subscription sales will benefit certain groups of persons such as students or the underprivileged, or will help charitable or civic groups, organizations, or institutions.

19. Failing to answer and to answer promptly inquiries by or on behalf of subscribers regarding subscriptions placed with respondents.

20. Failing within 30 days from the date of sale of any subscription to enter each magazine subscription with publishers for magazines which respondents are authorized by the publisher or distributor thereof to sell: *Provided, however*, That in those sales in which an additional payment is required, the subscription shall be entered within 14 days of the receipt of the final payment, but in no event shall any subscription be entered later than 60 days from the date of sale.

21. Failing within 30 days from the date of sale of any subscription to notify a subscriber of respondents' inability to place all or a part of a subscription and to deliver each of the magazines or other publications subscribed for; and to offer each such subscriber the option to receive a full refund of the money paid for such subscription or part thereof which respondents are unable to deliver or to substitute other publications in lieu thereof.

22. Failing within 14 days from the receipt of notification of a subscribers' election as provided in paragraph 21

hereof, to make the required refund or to enter the subscription with publishers, as elected by the subscriber.

23. Failing to refund to subscribers the money said subscribers have paid for subscriptions to magazines or, at the election of the subscriber, to enter the subscription as originally ordered in instances where the respondents' representatives or solicitors have appropriated such money to their own use and have failed to enter the subscriptions as ordered by said subscribers, within 14 days of verified notice thereof.

24. Failing to give clear and conspicuous oral and written notice to each subscriber that upon written request said subscriber will be entitled to a refund of all moneys paid if he does not receive the magazine or magazines subscribed for within 120 days of the date of the sale thereof.

25. Failing to refund all moneys to subscribers who have not received magazines subscribed for through respondent within 120 days from the date of the sale thereof upon written request for such refund by such subscribers.

26. Failing to arrange for the delivery of publications already paid for or promptly refunding money on a pro rata basis for all undelivered issues of publications for which payment has been made in advance.

27. Failing to furnish to each subscriber at the time of sale of any subscription a duplicate original of the contract, order, or receipt form showing the date signed by the customer and the name of the sales representative or solicitor together with the respondent corporation's name, address, and telephone number and showing on the same side of the page the exact number and name(s) of the publications being subscribed for, the number of issues and duration of each subscription and the total price for each and all such publications.

28. Failing to:

(a) Inform orally all subscribers and to provide in writing in all subscription contracts that the subscription may be canceled for any reason by notification to respondents in writing within 3 business days from the date of the sale of the subscriptions.

(b) Refund immediately all moneys to (1) subscribers who have requested subscription cancellation in writing within 3 business days from the sale thereof, and (2) subscribers showing that respondents' solicitations or performance were attended by or involved violation of any of the provisions of this order.

29. Furnishing, or otherwise placing in the hands of others, the means or instrumentalities by or through which the public may be misled or deceived in the manner or as to the things prohibited by this order.

It is further ordered, That:

(a) Respondents herein deliver, by registered mail, a copy of this decision and order to each of their present and future crew managers, and other supervisory personnel engaged in the sale or supervision of persons engaged in the sale of respondents products or services;

(b) Respondents herein require each person so described in paragraph (a) above to clearly and fully explain the provisions of this decision and order to all sales agents, representatives, and other persons engaged in the sale of the respondents' products or services;

(c) Respondents provide each person so described in paragraphs (a) and (b) above with a form returnable to the respondents clearly stating his intention to be bound by and to conform his business practices to the requirements of this order;

(d) Respondents inform each of their present and future crew managers, sales agents, representatives, and other persons engaged in the sale of respondents' products or services that the respondents shall not use any third party, or the services of any third party if such third party will not agree to so file notice with the respondents and be bound by the provisions of the order;

(e) If such third party will not agree to so file notice with the respondents and be bound by the provisions of the order, the respondents shall not use such third party, or the services of such third party to solicit subscriptions;

(f) Respondents inform the persons described in paragraphs (a) and (b) above that the respondents are obligated by this order to discontinue dealing with those persons who continue on their own the deceptive acts or practices prohibited by this order;

(g) Respondents institute a program of continuing surveillance adequate to reveal whether the business operations of each said person described in paragraphs (a) and (b) above conform to the requirements of this order;

(h) Respondents discontinue dealing with the persons so engaged, revealed by the aforesaid program of surveillance, who continue on their own the deceptive acts and practices prohibited by this order; and that

(i) Respondents upon receiving information or knowledge from any source concerning two or more bona fide complaints prohibited by this order against any of their sales agents or representatives during any 1-month period will be responsible for either ending said practices or securing the termination of the employment of the offending sales agent or representative.

It is further ordered, That as a part of the program of continuing surveillance as prescribed by the provisions of this order, respondents shall clearly and conspicuously disclose, in writing and prior to the consummation of any sale the information described hereinbelow. Such disclosure shall appear on the duplicate original contract, order, or receipt furnished to subscribers as required by paragraph 27 of this order. Said contract, order, or receipt shall disclose the following information in the indicated order:

1. The term "Magazine Salesman" and place for signature of the salesman.

2. The terminology: "Notice to Consumers—(insert name of applicable bus-

## RULES AND REGULATIONS

[Docket No. 8778o]

## PART 13—PROHIBITED TRADE PRACTICES

Litton Industries, Inc.

Subpart—Acquiring corporate stock or assets: § 13.5 Acquiring corporate stock or assets.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 18) [Cease and desist order, Litton Industries, Inc., Beverly Hills, Calif., Docket No. 8778, Mar. 13, 1973]

In the Matter of Litton Industries, Inc., a Corporation.

Opinion and order requiring a Beverly Hills, Calif., large conglomerate corporation with a broadly diversified product area and a worldwide operation, among other things to divest itself of its stock interest in Triumph-Werke Nurnberg, A.G. and Adlerwerke A.G.; and to cease and desist for a period for 10 years from making acquisitions in the typewriter or typewriter parts or accessories manufacturing industry within the United States without prior Federal Trade Commission approval.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent, Litton Industries, Inc., and its officers, directors, agents, representatives, and employees, subsidiaries, affiliates, successors and assigns, shall within 1 year from the date this order becomes final, divest absolutely and in good faith, and subject to the prior approval of the Federal Trade Commission, all the stock assets, properties, rights and privileges, tangible or intangible, including but not limited to all properties, plants, machinery, equipment, raw material reserves, patents, trade names, trademarks, contract rights, marketing organizations and goodwill, acquired by said respondent as a result of its acquisition of the stock of Triumph-Werke Nurnberg, A.G. and Adlerwerke A.G., together with all additions and improvements thereto so as to assure that said companies are reestablished as a going concern and an effective, viable competitor in the production, distribution, and sale of typewriters and other such office communication products.

It is further ordered, That pending divestiture, respondent shall not make any changes or permit any deterioration in any of the plants, machinery, buildings, equipment, or other property or assets of whatever description of Triumph-Werke Nurnberg, A.G. and Adlerwerke A.G., which may impair their capacity for the manufacture, sale, or distribution of typewriters or their market value.

It is further ordered, That the divestiture ordered by paragraph I shall include nonexclusive, royalty-free licenses, without provision for grantback to Litton, on all patents of whatever description, and engineering production and marketing know-how and expertise relating to the development of typewriter or other such office communication equipment owned

or controlled by respondent Litton Industries, Inc., or any subsidiary or affiliate thereof at the time of divestiture to the end that Triumph-Werke Nurnberg, A.G. and Adlerwerke A.G. shall possess any and all patents, know-how, and expertise in the development, production, or marketing of typewriter and other such office communication equipment developed during ownership of stock in either company by Litton Industries, Inc., or any subsidiary or affiliate thereof.

It is further ordered, That, in accomplishing the aforesaid divestiture, respondent shall not divest the assets, property rights, or privileges described in paragraph I of this order, directly or indirectly, to any person who, at the time of such divestiture, is a stockholder, officer, director, employee, or agent of, or otherwise directly or indirectly connected with or under the control or influence of respondent, or to a subsidiary or affiliated corporation of respondent.

It is further ordered, That respondent for a period of ten (10) years from the date on which this order becomes final shall cease and desist from acquiring, directly or indirectly, through subsidiaries or otherwise, the whole or any part of the stock, share capital or assets (other than products sold in the normal course of business) of any concern, corporate or noncorporate, engaged at the time of such acquisition in the business of manufacturing typewriters or typewriter parts or accessories for sale within the United States without the prior approval of the Federal Trade Commission.

The prohibition on acquisitions in paragraph IV of the order herein shall include, but not be confined to, the entering into of any arrangement by respondent pursuant to which respondent acquires the market share in whole or in part of such concern in any of the aforesaid product lines, (a) through such concern discontinuing manufacturing, or selling any of said products under a brand name or label it owns and thereafter manufacturing or distributing any of said products under any of respondent's brand names or labels, or (b) by reason of such concern discontinuing manufacturing any of said products and thereafter transferring to respondent customer lists or in any other way making available to respondent access to customers or customer accounts.

It is further ordered, That respondent shall, within sixty (60) days after the date of service of this order, and every sixty (60) days thereafter until respondent has fully complied with the provisions of this order submit in writing to the Federal Trade Commission a report setting forth in detail the manner and form in which respondent intends to comply, is complying, or has complied with this order. All compliance reports shall include, among other things that are from time to time required, a summary of all contacts and negotiations with any parties concerning divestiture of the specified assets and properties, the

identity of all such parties, and copies of all written communications to and from such parties.

By direction of the Commission, Chairman Engman did not participate for the reason that he did not hear oral argument. Commissioner Dennison filed a concurring statement. Commissioner MacIntyre abstained.

Issued: March 13, 1973.

CHARLES A. TOBIN,  
Secretary.

[Docket No. 8881]

## PART 13—PROHIBITED TRADE PRACTICES

Sewing Distributors, Inc. and John P. Rooney

Subpart—Advertising falsely or misleadingly: § 13.15 Business status, or connections: 13.15-15 Bonded business: § 13.150 Premiums and prizes: 13.150-35 Prizes: § 13.155 Prices: 13.155-15 Comparative: 13.155-25 Coupon, certificate, check, credit voucher, etc., values: 13.155-35 Discount savings: 13.155-40 Exaggerated as regular and customary: 13.155-70 Percentage savings: § 13.157 Prize contests. Subpart—Misrepresenting oneself and goods—Business Status, Advantages or Connections: § 13.1368 Bonded business; —Goods: § 13.1647 Guarantees; —Prices: § 13.1785 Comparative: § 13.1790 Coupons, credit vouchers, etc., of specified value; § 13.1805 Exaggerated as regular and customary. Subpart—Using contest schemes unfairly: § 13.2270 Using contest schemes unfairly.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Cease and desist order, Sewing Distributors, Inc., et al., Phoenix, Ariz., Docket No. 8881, Feb. 15, 1973]

In the Matter of Sewing Distributors, Inc., a Corporation, and John P. Rooney, Individually and as an Officer of Said Corporation

Consent order requiring a Phoenix, Ariz., seller and distributor of sewing machines, among other things to cease misrepresenting prices at which articles of merchandise have been sold in respondents' trade area; misrepresenting prices as usual and customary; failing to maintain adequate records on which various representations are based; misrepresenting the nature or purpose of any contest schemes; and misrepresenting any discount, credit, or allowances given as reductions from specified selling prices.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondents Sewing Distributors, Inc., a corporation, its successors and assigns, and its officers, and John P. Rooney, individually and as an officer of said corporation, and respondents' agents, representatives, and employees directly or through any corporation, subsidiary, division, or other device,

## RULES AND REGULATIONS

in connection with the advertising, offering for sale, sale or distribution of sewing machines or other products, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Using the word "value" or any other word or words of similar import and meaning, to refer to any price amount which is appreciably in excess of the prices at which substantial sales of the same article of merchandise or service have been made in respondents' trade area and unless respondents have in good faith conducted a market survey which establishes the validity of the trade area prices; or misrepresenting, in any manner, the price at which any article of merchandise or service has been sold in respondents' trade area.

2. (a) Representing, in any manner, that by purchasing any article of merchandise or service, customers are afforded savings amounting to the difference between respondents' stated price and respondents' former price, unless such merchandise or service has been sold or offered for sale in good faith at the former price by respondents for a reasonably substantial period of time in the recent, regular course of their business.

(b) Representing, in any manner, that by purchasing any article of merchandise or service, customers are afforded savings amounting to the difference between respondents' stated price and a compared price for said merchandise or service in respondents' trade area, unless a substantial number of the principal retail outlets in the trade areas regularly sell said merchandise or service at the compared price or some higher price.

(c) Representing, in any manner, that by purchasing any article of the said merchandise or service, customers are afforded savings amounting to the difference between respondents' stated price and a compared value price for comparable merchandise or service, unless substantial sales of articles of merchandise of like grade and quality or similar services are being made in the trade area at the compared price or a higher price and unless respondents have in good faith conducted a market survey or obtained a similar representative sample of prices in their trade area which establishes the validity of said compared price and it is clearly and conspicuously disclosed that the comparison is with an article of merchandise of like grade and quality or a similar service.

3. Misrepresenting, in any manner, the amount of savings available to purchasers or prospective purchasers of respondents' merchandise or services.

4. Using the words "Regular," "Reg.," or any other words of similar import and meaning, to refer to any price amount which is in excess of the price at which any article, merchandise or service has been sold or offered for sale in good faith by respondents for a reasonably substantial period of time in the recent, regular course of their business and unless respondents' business records establish

that said amount is the price at which such merchandise or service has been sold or offered for sale in good faith by respondents for a reasonably substantial period of time in the recent, regular course of their business.

5. Representing, directly or by implication, that any amount is respondents' usual and customary retail price for an article of merchandise or service when such amount is in excess of the price or prices at which an article of merchandise or service has been sold or offered for sale in good faith by respondents at retail for a reasonably substantial period of time in the recent, regular course of their business.

6. Failing to maintain adequate records (a) which disclose the facts upon which any savings claims, including former pricing claims and comparative value claims, and similar representations of the type described in paragraphs 1-5 of this order are based, and (b) from which the validity of any savings claims, including former pricing claims and comparative value claims, and similar representations of the type described in paragraphs 1-5 of this order can be determined.

7. Representing, directly or by implication, that names of winners are obtained through drawings, contests, or by chance, when all of the names selected are not chosen by lot; or misrepresenting, in any manner, the nature or purpose of a contest.

8. Using any advertising, promotional program, or procedure involving the use of false, deceptive, or misleading statements to obtain leads or prospects for the sale of their products.

9. Representing, directly or by implication, that awards or prizes are of a certain value or worth when recipients thereof are not in fact benefited by or do not save the amount of the represented value of such awards or prizes.

10. Representing, directly or by implication, that any discount, credit, or allowance is given purchasers as a reduction from respondents' selling price for a specified product unless such selling price is the amount at which said product has been sold or offered for sale in good faith by respondents at retail for a reasonably substantial period of time in the recent, regular course of their business.

11. Representing, directly or by implication, that any of their articles of merchandise or services are guaranteed unless the nature, extent, and duration of their guarantee, the identity of the guarantor and the manner in which the guarantor will perform thereunder are clearly and conspicuously disclosed in immediate conjunction therewith; and unless respondents do in fact perform each of their obligations directly or impliedly represented under the terms of such guarantee or guarantees.

12. Representing, directly or by implication, that respondents have posted a bond or have established a reserve fund, the benefits of which are available to recipients of their guarantees, unless re-

spondents do in fact have such a bond or fund available and unless the said bond or fund is available to all recipients of their guarantees.

It is further ordered, That the respondents herein shall forthwith distribute a copy of this order to all present and future salesmen or other persons engaged in the sale of respondents' products or services, and shall secure from each such salesman or other person a signed statement acknowledging receipt of said order.

It is further ordered, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

It is further ordered, That respondents shall notify the Commission at least thirty (30) days prior to any proposed change in their business organization such as dissolution, assignment, incorporation, or sale resulting in the emergence of a successor corporation or partnership or any other change which may affect compliance obligations arising out of this order.

Issued: February 15, 1973.

By the Commission.

#### Title 26—Internal Revenue

##### CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

#### SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7267]

#### PART 301—PROCEDURE AND ADMINISTRATION

##### Inspection by Department of Agriculture of Income Tax Returns Made Under the Internal Revenue Code of 1954 of Persons Having Farm Operations

Pursuant to section 6103(a) of the Internal Revenue Code of 1954, as amended (26 U.S.C. 6103(a)), and the Executive order signed this date concerning inspection by the Department of Agriculture of income tax returns made under the Internal Revenue Code of 1954 of persons having farm operations, the regulations on procedure and administration (26 CFR 301) under such section are amended as follows:

Section 301.6103(a)-108 is amended by revising paragraph (c). The amended provision reads as follows:

§ 301.6103(a)-108 Inspection by Department of Agriculture of income tax returns made under the Internal Revenue Code of 1954 of persons having farm operations.

(c) *Data available.* The Secretary of the Treasury, or any officer or employee of the Department of the Treasury with the approval of the Secretary, may furnish the Department of Agriculture (for the purpose of obtaining data as to the farm operations of such persons) with the names, addresses, taxpayer identification numbers, type of farm activity, and one or more measures of size of farm operations such as gross income from farming or gross sales of farm products. Inspection of such returns shall be limited to inspection of the data enumerated above and shall be in accordance with permission granted by the Secretary of the Treasury pursuant to this section. Upon receipt of a request for inspection approved by the Secretary of the Treasury, any officer or employee of the Internal Revenue Service duly authorized by the Commissioner of Internal Revenue may make such returns available for inspection, provided inspection is limited to the data specified above, in an office of the Internal Revenue Service by any duly authorized

officer or employee of the Department of Agriculture or may make the data enumerated above on such returns available to such Department.

Because this Treasury decision constitutes a general statement of policy and establishes rules of departmental practice and procedure, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under 5 U.S.C. 553(b), or subject to the effective date limitation of 5 U.S.C. 553(d).

This Treasury decision shall be effective on March 27, 1973.

[SEAL] GEORGE P. SCHULTZ,  
Secretary of the Treasury.

Approved: March 27, 1973.

RICHARD NIXON,  
The White House.

#### Title 28—Judicial Administration

##### CHAPTER I—DEPARTMENT OF JUSTICE

[Order 511-73]

#### PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

##### Transferring the Functions, Powers, and Duties of the Internal Security Division to the Criminal Division and Abolishing the Internal Security Division

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, all functions, powers, and duties heretofore delegated to the Assistant Attorney General in charge of the Internal Security Division are hereby delegated to the Assistant Attorney General in charge of the Criminal Division, and the Internal Security Division of the Department of Justice is abolished. Existing orders inconsistent with this order are superseded to the extent of such inconsistency.

Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended as follows:

1. Section 0.1 of Subpart A, which lists the organizational units of the Department, is amended by deleting "Internal Security Division."

2. Paragraph (f) of § 0.55 of Subpart K is amended by deleting the phrase "litigation involving subversives, which is assigned to the Internal Security Division by § 0.61, and."

3. Paragraph (p) of § 0.55 is amended by substituting a period for the comma after "(18 U.S.C. 1503)" and by deleting the phrase "except as to obstructions which occur in connection with cases within the jurisdiction of the Internal Security Division."

4. Paragraph (b) of § 0.59 of Subpart K is amended by deleting the phrase "or the Internal Security Division."

5. The caption "Subpart L—Internal Security Division" is deleted, §§ 0.61 through 0.64 are incorporated in Subpart K, and Subpart L is reserved.

6. The heading for § 0.61 is revised to read, "§ 0.61 Functions relating to internal security."

7. The first sentence of § 0.61 is amended by substituting "Criminal Division" for "Internal Security Division."

8. Paragraph (m) of § 0.61 is deleted.

9. Section 0.62 is amended by substituting "Criminal Division" for "Internal Security Division."

10. Section 0.63 is amended by substituting "Criminal Division" for "Internal Security Division."

11. Section 0.64 is amended by substituting "Criminal Division" for "Internal Security Division" each place it appears.

This order is effective as of March 26, 1973.

Dated: March 23, 1973.

1. In the first line of the first example under § 306.11(h), the word "Commission" should read "Commissioner."

2. In the first column on page 7091, under the "Appendix to Subpart E", delete the fourth paragraph.

#### Title 32—National Defense

##### CHAPTER VI—DEPARTMENT OF THE NAVY

#### PART 742—UNIFORM RELOCATION ASSISTANCE AND REAL PROPERTY ACQUISITION POLICIES ACT OF 1970

##### Application Procedure for Relocation Assistance Payments

The regulations in this part, currently appearing at Part 742 of this title (32 CFR Part 742), required by the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, effective January 2, 1971, are amended to comply with the latest guidelines of the Office of Management and Budget issued by Circular No. A-103 of May 1, 1972. It should be noted that an application for relocation assistance payments must be made within 18 months from the date the displaced person moves from the real property acquired or to be acquired, or the date final payment is made, whichever is later. The regulations as amended shall be effective on and after January 2, 1971. The amendments are as follows:

The table of contents Subpart A—Policies is amended by adding a new section designated as follows:

742.107 Review.

In the text of the regulations Subpart A—Policies is amended as follows:

Section 742.102 is amended to read as follows:

§ 742.102 Displacement notice—Application for relocation assistance.

Written notice of displacement served personally or by certified (or registered) first-class mail will be given to each individual, family, business, or farm. A displaced individual, business or farm operation must make application for relocation assistance payments within 18 months from the date on which the displaced person moves from the real property acquired or to be acquired, or the date on which final payment is made for the property acquired whichever is later. The time for filing may be extended upon a proper showing of good cause. A displaced individual, business, or farm operation making proper application will be paid promptly after a move. If the agency head, or his designee, determines that delaying payment until after the move will create a hardship, he will authorize an advance payment.

Subpart A—Policies is further amended by adding a new section reading as follows:

§ 742.107 Review.

There shall be a periodic review of all Federal and federally assisted programs to assure compliance with the Act.

Subpart B—Definitions is amended as follows:

Section 742.205 is amended to read as follows:

§ 742.205 Displaced person.

Any person who, on or after January 2, 1971, moves from real property, or moves his personal property from real property, as a result of the acquisition of such real property, in whole or in part, or as the result of a written order to vacate real property for a project undertaken by the Department; and solely for the purpose of sections 202 (a) and (b) and 205 of the Act, as a result of the acquisition of or as the result of a written order to vacate other real property for such project, on which such person conducts a business or farm operation. If a person moves as the result of such order, it makes no difference whether or not the real property is acquired.

Section 742.206 is amended to read as follows:

§ 742.206 Dwelling.

The place of permanent or customary and usual abode of a person. It includes a single-family building; a one-family unit in a multifamily building; a unit of a condominium or cooperative housing project; any other residential unit, including a mobile home which is either considered to be real property under State law or cannot be moved without substantial damage or unreasonable cost.

Section 742.208 is amended to read as follows:

§ 742.208 Family.

Two or more individuals living together in the same dwelling as a single family unit and who are related to each other by blood, marriage, adoption, or legal guardianship.

§ 742.102 Displacement notice—Application for relocation assistance.

Written notice of displacement served personally or by certified (or registered) first-class mail will be given to each individual, family, business, or farm. A displaced individual, business or farm operation must make application for relocation assistance payments within 18 months from the date on which the displaced person moves from the real property acquired or to be acquired, or the date on which final payment is made for the property acquired whichever is later. The time for filing may be extended upon a proper showing of good cause. A displaced individual, business, or farm operation making proper application will be paid promptly after a move. If the agency head, or his designee, determines that delaying payment until after the move will create a hardship, he will authorize an advance payment.

Subpart A—Policies is further amended by adding a new section reading as follows:

§ 742.107 Review.

There shall be a periodic review of all Federal and federally assisted programs to assure compliance with the Act.

Subpart B—Definitions is amended as follows:

Section 742.205 is amended to read as follows:

§ 742.205 Displaced person.

Any person who, on or after January 2, 1971, moves from real property, or moves his personal property from real property, as a result of the acquisition of such real property, in whole or in part, or as the result of a written order to vacate real property for a project undertaken by the Department; and solely for the purpose of sections 202 (a) and (b) and 205 of the Act, as a result of the acquisition of or as the result of a written order to vacate other real property for such project, on which such person conducts a business or farm operation. If a person moves as the result of such order, it makes no difference whether or not the real property is acquired.

Section 742.206 is amended to read as follows:

§ 742.206 Dwelling.

The place of permanent or customary and usual abode of a person. It includes a single-family building; a one-family unit in a multifamily building; a unit of a condominium or cooperative housing project; any other residential unit, including a mobile home which is either considered to be real property under State law or cannot be moved without substantial damage or unreasonable cost.

Section 742.208 is amended to read as follows:

§ 742.208 Family.

Two or more individuals living together in the same dwelling as a single family unit and who are related to each other by blood, marriage, adoption, or legal guardianship.

ianship. Upon appropriate determination by the agency head, others who live together as a family unit may be treated as a family for determining benefits under Title II of the Act.

Section 742.212 is amended to read as follows:

§ 742.212 Owner.

A person who holds fee title, a life estate, a 99-year lease, or an interest in a cooperative housing project which includes the right of occupancy of a dwelling unit, or is the contract purchaser of any such estate or interest, or who is possessed of such other proprietary interest in the property acquired as, in the judgment of the agency head, warrants consideration as ownership. In the case of one who has succeeded to any of the foregoing interests by devise, bequest, inheritance or operation of law, the tenure of ownership, not occupancy, of the succeeding owner shall include the tenure of the preceding owner.

Section 742.215 is amended by amending paragraphs (b), (e), (g) to read as follows:

§ 742.215 Replacement dwelling.

(b) Functionally equivalent and substantially the same as the acquired dwelling with respect to number of rooms, areas of living space, age, and state of repair. Adequate in size to meet the needs of the displaced person, but may exceed such needs if replacement dwelling has same number of rooms or equivalent square footage as the dwelling from which displaced.

(g) Available on the market to the displaced person at rents or prices within the financial means of the displaced person. For the purpose of determining financial means of families and individuals in accordance with section 205(c)(3) of the Act, a financial means test (ability to pay) must be made. In order to meet a financial means test, a determination should be made as to the displaced person's ability to afford the replacement dwelling. In making this determination, the average monthly rental or housing costs (e.g., monthly mortgage payments, insurance for the dwelling unit, property taxes, and other reasonable recurring related expenses) which the displaced person will be required to pay, in general, should not exceed 25 percent of the monthly gross income or the present ratio of housing payment to the income of the displaced family or individual, including supplemental payments made by public agencies.

Subpart C—Moving and Related Expenses is amended as follows:

Section 742.301 is amended to read as follows:

§ 742.301 Recipient eligibility.

A displaced person (including one who conducts a business or farm operation) is eligible to receive payments for moving and related expenses, as hereinafter set out.

## RULES AND REGULATIONS

Section 742.302 is amended by deleting paragraph (a) (1), (2), and (3) and amending paragraph (a) to read as follows:

**§ 742.302** Extent of eligibility.

(a) Each owner-occupant, tenant-occupant, or family displaced from a dwelling may elect to receive either the payment described in § 742.303(a) or the fixed payment described in § 742.304(a) except that no member of a displaced person's family living in the same dwelling unit is eligible for separate payment for moving expenses.

Section 742.304 is amended to read as follows:

**§ 742.304** Fixed payment.

(a) A displaced person who must vacate a dwelling may elect to receive, in lieu of reimbursement for actual expenses described in § 742.303(a), a moving expense allowance not in excess of \$300 based on schedules maintained by State highway departments, plus a dislocation payment of \$200. A displaced person, who elects to receive a payment based on a schedule, shall be paid under the schedule used in the area where the displacement occurs regardless where he relocates. If there is no highway department schedule in the area involved, the agency head shall cooperate with other displacing agencies in the development of a single moving expense schedule for use of all displacing agencies in the area.

(b) A displaced person who is displaced from his place of business whether he discontinues or re-establishes operations, may elect to receive, in lieu of reimbursement for actual expense, specified in § 742.303, a fixed relocation payment equal to the average annual net earnings of the business as determined in accordance with § 742.308 provided:

(1) The business cannot be relocated without a substantial loss of its existing patronage. Existing patronage in connection with a nonprofit organization includes the persons, community, or clientele served or affected by the activities of the nonprofit organization. The agency head will consider all pertinent circumstances in determining whether the business meets this requirement, including the type of business, the nature of the clientele, and the relative importance of the present and proposed locations to the displaced business and the availability of a suitable replacement location for the displaced person.

(2) The business is not a part of a commercial enterprise having at least one other establishment that is not being acquired which is engaged in the same or similar business. The business must contribute materially to the income of the displaced owner.

(c) A displaced person who is displaced from his farm operation, whether he discontinues or reestablishes operations, may elect to receive, in lieu of reimbursement for actual expenses, specified in § 742.303, a fixed relocation payment equal to the average annual net

earnings of the farm operation as defined in § 742.308. If only part of a farm is acquired, such payment shall be made only if the remainder no longer meets the definition of a farm.

(d) The payment provided in paragraphs (b) and (c) of this section shall be not less than \$2,500 nor more than \$10,000.

Section 742.305 is amended to read as follows:

**§ 742.305** Actual reasonable expenses in moving.

(a) *Items to be included in determining reasonable expenses.* (1) Transportation of individuals, families, and property from acquired site to the replacement site, not to exceed a distance of 50 miles, except where the Secretary's designee determines that relocation cannot be accomplished within the prescribed area.

(2) Packing and crating of personal property, including unpacking and uncrating.

(3) Advertising for packing, crating, and transportation when determined by the agency head to be reasonably required.

(4) Storage of personal property for a period generally not exceeding 12 months when determined by the agency head to be necessary in connection with the relocation.

(5) Insurance premiums covering loss and damage of personal property while in storage or transit.

(6) Removal, reinstallation, and reestablishment, including such modifications as deemed necessary by the agency head of any reconnection of utilities for machinery, equipment, appliances, and other items, not acquired as real property. Prior to payment of any expenses for removal and installation of such property, the displaced person shall be required to agree in writing that the property is personal and the Government is released from any payment for the property.

(7) Property lost, stolen, or damaged (not caused by the fault or negligence of the displaced person, his agents, or employees) in the process of moving, where insurance to cover such loss or damage is not available.

(8) Such other items as the agency head determines to be a reasonable expense.

(b) *Items to be excluded in determining reasonable expenses.* (1) Additional expenses incurred because of living in a new location.

(2) Cost of moving structures, improvements, or other real property in which the displaced person reserved ownership, except as otherwise provided by law.

(3) Improvements to the replacement site, except when required by law.

(4) Interest on loans to cover moving expenses.

(5) Loss of goodwill.

(6) Loss of profits.

(7) Loss of trained employees.

(8) Personal injury.

(9) Cost of preparing the application for moving and related expenses.

(10) Payment for search cost in connection with locating a replacement dwelling.

(11) Such other items as the agency head determines should be excluded.

(c) *Limitations.* (1) If the displaced person moves himself, his family, business, farm operation, or other personal property by other than commercial means, the reimbursement allowance will not exceed the estimated cost of moving commercially based on the prevailing local rates for moving unless the agency head determines a greater amount is justified.

(2) If an item of personal property used in connection with a business or farm operation is not moved, but sold and promptly replaced at the new location with a comparable item, reimbursement will not exceed the replacement cost minus the proceeds from the sale, or the estimated cost of moving, whichever is less.

(3) If personal property used in connection with a business or farm operation to be moved is of low value and high bulk, and the cost of removing, moving, reinstallation, and reestablishment would be disproportionate in relation to the value, in the judgment of the agency head, the allowable reimbursement for the expense of moving the personal property will not exceed the difference between the amount that would have been received for such item on liquidation and the cost of replacing the same with a comparable item available on the market.

(4) If the cost of moving or relocating an outdoor advertising display or displays is determined to be equal to or in excess of the in-place value of the display, consideration should be given to acquiring such display or displays as a part of the real property.

Section 742.306 is amended by amending paragraphs (a) and (e) and adding a new paragraph (f), to read as follows:

**§ 742.306** Actual direct losses, business, or farm operations.

(a) If the displaced person does not move personal property he shall be required to make a bona fide effort to sell it, and should be reimbursed for the reasonable costs incurred.

(e) If the business or farm operation is discontinued, or if not discontinued and personal property abandoned, the distance to be used in estimating moving costs of the personal property is 50 miles.

(f) The cost of removal of the personal property shall not be considered as an offsetting charge against other payments to the displaced person.

Subpart D—Replacement Housing Payments for Homeowners (Over 180 Days) is amended as follows:

Section 742.401 is amended by adding a new paragraph, designated (c), reading as follows:

**§ 742.401** Eligibility.

(c) If replacement housing meeting the criteria of § 742.215 is not available on the market, the agency head may upon a proper finding of the need therefor, consider available housing exceeding the basic criteria.

**§ 742.407** [Amended]

Section 742.407 is amended by deleting paragraph (c).

Subpart E—Replacement Housing for Tenants and Certain Others is amended as follows:

**§ 742.501** [Amended]

Section 742.501 is amended by deleting paragraph (e).

Section 742.506 is amended to read as follows:

**§ 742.506** Computing rental payments for displaced owner-occupants renting replacement housing.

The agency head shall compute the amount of the payment to the displaced owner-occupant in the same manner as prescribed in § 742.505, except that economic rent shall be used in making the determination required by § 742.505 (a) (2).

Section 742.507 is amended by amending paragraph (a) to read as follows:

**§ 742.507** Making payment to a displaced person who rents replacement housing.

(a) If the total rental payment to be made to the displaced person is in excess of \$500, payment will be made in four equal annual installments at the beginning of each annual period, provided the agency head determines that the tenant is continuing to occupy decent, safe, and sanitary housing at the beginning of each annual period. This method of payment may be modified as the circumstances of the displaced person warrants, provided the displaced person continues to occupy decent, safe, and sanitary housing.

Section 742.602 is amended to read as follows:

**§ 742.602** Cooperation with other Federal and State agencies.

(a) When more than one agency, departmental or otherwise, is administering a relocation assistance advisory program which may be of assistance in the community or area to persons displaced under other programs, the agency head shall offer to cooperate to the maximum extent feasible with the other Federal or State agency causing displacements to assure that all displaced persons receive the maximum assistance available to them.

(b) The agency head shall consult with the appropriate Housing and Urban Development Regional/Area Office concern-

## RULES AND REGULATIONS

8155

ing the availability of housing and inform such office as to projects which will cause displacement. The agency head shall also consult with appropriate local officials concerning any proposed project in a community, consistent with the procedural requirements of Office of Management and Budget Circular A-95 (Revised).

(c) The agency head may, by contract or otherwise, secure relocation assistance advisory services from the central relocation agency, if available, in the area, or any other appropriate Federal, State, or local governmental agency or from any person or organization.

(SEAL) H. B. ROBERTSON,  
Rear Admiral, JAGC, U.S. Navy,  
Acting Judge Advocate General.

**CHAPTER VII—DEPARTMENT OF THE AIR FORCE**

**SUBCHAPTER I—MILITARY PERSONNEL**  
**PART 888—ENLISTMENT IN THE REGULAR AIR FORCE**

*Correction*

In FR Doc. 73-4482 appearing at page 6770 of the issue for Tuesday, March 13, 1973, the following changes should be made:

1. In § 888.7(c) (1) the 29th item, designated "(xix)" should be designated "(xxix)".

2. In § 888.7(c) (2) the 33d item, designated "(xxiii)", should be designated "(xxxiii)".

3. In the 12th line of § 888.25(c), "AMFPC/DPMDRR" should read "AFMPC/DPMDRR".

**PART 888—ENLISTMENT IN THE REGULAR AIR FORCE**

**PART 888c—ACTIVE DUTY SERVICE COMMITMENTS**

*Miscellaneous Amendments; Corrections*

1. In FR Doc. 73-4482, Part 888—Enlistment in the Regular Air Force, appearing at page 6770 in the issue of Tuesday, March 13, 1973, the following changes should be made:

a. In § 888.7(c), the subparagraph now designated "(4) Other (nonminor) misdemeanors," should read "(3) Other (nonminor) misdemeanors."

b. In § 888.27(b), subparagraph (3) following subparagraph (7), on page 6778, which reads "(3) Retain applicable records and then . . .", should read "(8) Retain applicable records and then . . .".

2. In FR Doc. 73-4485, Part 888c—Active Duty Service Commitments, appearing at page 6784 in the issue of Tuesday, March 13, 1973, on page 6789, in § 888c.26, under Column B of Rule 6,

which reads "On or after Jan. 1, 1968," should read "On or after Sept. 1, 1968 but before Nov. 1, 1972".

By order of the Secretary of the Air Force.

JOHN W. FAHRNEY,  
Colonel, USAF, Chief, Legislative Division, Office of the Judge Advocate General.

**Title 41—Public Contracts, and Property Management**

**CHAPTER I—FEDERAL PROCUREMENT REGULATIONS**

[Temporary Regulation 30]

**ARCHITECT-ENGINEER SERVICES**  
**Procurement and Construction**

1. *Purpose.* This FPR Temporary Regulation prescribes policies and procedures for obtaining architect-engineer services.

2. *Effective date.* This regulation is effective March 29, 1973.

3. *Expiration date.* This regulation will continue in effect until canceled.

4. *Background.* Public Law 92-582 dated October 27, 1972, amended the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 et seq.), by adding a new "Title IX—Selection of Architects and Engineers." The amendment sets forth policies and procedures concerning the selection of firms and individuals to perform architectural, engineering, and incidental services that members of these professions and those in their employ may logically or justifiably perform. This regulation has been issued prior to receipt of agency and industry comments in the interest of expediting the implementation of the amendment. However, such comments have been solicited and will be considered prior to the issuance of a codified amendment of the Federal Procurement Regulations.

5. *Agency action.* Use of the policies and procedures prescribed by this regulation is mandatory for the General Services Administration and is optional for other executive agencies.

6. *Explanation of changes.*

**PART 1-1—GENERAL**

a. Section 1-1.1003-3 is amended to revise paragraph (b) and add paragraphs (c) and (d) as follows:

§ 1-1.1003-3 Special areas of negotiation.

(b) *Personal and professional (other than architect-engineer) services.* Advance notice of procurements for personal or professional services shall be published in the Synopsis when it is feasible and practicable and in the best interest of the Government.

(c) *Architect-engineer and related services with fees over \$25,000.* For each contract for which the fee is expected to exceed \$25,000, a notice of intention to contract for architect-engineer services

shall be published in the Synopsis. The notice shall be prepared in accordance with § 1-1.1003-7(b)(9) and shall solicit submission of Standard Form 251 from persons or firms that are eligible for consideration and that do not have current data on file with the procuring agency or office. The notice will be published sufficiently in advance to enable the architect-engineer firms to submit to the procurement office a general statement of qualifications and performance data applicable to the expected requirements of that procurement office. Synopses of contract awards shall be in accord with § 1-1.1004.

(d) *Architect-engineer and related services with fees \$25,000 and under.* Agencies may employ the procedures in paragraph (c) above. In the alternative, however, agencies may publicize each contract estimated to be \$25,000 and under only in the area where the project is to be performed.

b. Section 1-1.1003-7(b) is amended to add subparagraph (9) as follows:

**§ 1-1.1003-7 Preparation and transmittal.**

(9) *Architect-engineer services project notice.* Each notice publicizing procurement or architectural and/or engineering services shall be headed "R. Architect-Engineer Services." The project shall be listed with a brief statement as to its location, scope of services required and, where applicable, the construction cost limitation. Appropriate statements will be made to indicate any limitations on eligibility for consideration. Qualifications or performance data required from architect-engineer firms will be described. This shall be followed by statements similar to the following: "Architect-engineer firms which meet requirements described in this announcement are invited to submit a complete Standard Form 251, U.S. Government Architect-Engineer Questionnaire, together with any supplemental data, to the procurement office shown below. Firms having a current Standard Form 251 already on file with this procurement office and those responding to this invitation before (date) will be considered for selection, subject to any limitations indicated with respect to size of firm, specialized technical expertise or other requirements. No other general notification to firms under consideration for this project will be made, and no further action beyond submission of Standard Form 251 and photographs is required or encouraged. Following an initial evaluation of the qualifications and performance data described on the Standard Form 251, three or more firms considered to be the most highly qualified to provide the services required will be chosen for interview. This is not a request for a proposal. Annual statements: Proposed Commerce Business Daily numbered note. Firms desiring automatic consideration for all projects administered by the procurement office

(subject to specific requirements for individual projects) are encouraged to submit annually a statement of qualifications and performance data, utilizing Standard Form 251." The name of the responsible procurement office shall then be shown complete with the full address and telephone number.

**PART 1-4—SPECIAL TYPES AND METHODS OF PROCUREMENT**

**c. Subpart 1-4.10 is added, as follows:**

**Subpart 1-4.10—Architect-Engineer Services**

Sec.	Scope of subpart.
1-4.1000	General policy.
1-4.1001	Definitions.
1-4.1002	Public announcements.
1-4.1003	Selection.
1-4.1004	Establishment of architect-engineer evaluation boards.
1-4.1004-1	Functions of the evaluation boards.
1-4.1004-2	Evaluation criteria.
1-4.1004-3	Action by agency head or his authorized representative.
1-4.1004-4	Procedure for procurement estimated not to exceed \$10,000.
1-4.1005	Negotiation procedures.
1-4.1005-1	General.
1-4.1005-2	Conduct of negotiations.
1-4.1005-3	Independent Government estimate.
1-4.1005-4	Architect-engineer's proposal.
1-4.1005-5	Contract price.
1-4.1005-6	Record of negotiation.
1-4.1006	Contracting for construction work.
1-4.1006-1	Policy.
1-4.1006-2	Procedure.
1-4.1007	Small business.
1-18.133	Architect-engineer services contracts.

**AUTHORITY:** Public Law 92-582 dated October 27, 1972; as amended the Federal Property and Administrative Services Act of 1949; as amended, 40 U.S.C. 471 et seq.

**Subpart 1-4.10—Architect-Engineer Services**

**§ 1-4.1000 Scope of subpart.**

This subpart contains the general policies and procedures for the procurement of professional architect-engineer services, either individually or together, by contract.

**§ 1-4.1001 General policy.**

Pursuant to Public Law 92-582 dated October 27, 1972, which amended the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471, et seq.), it is the policy of the Federal Government to publicly announce all requirements for architect-engineer services, and to negotiate contracts for architect-engineer services on the basis of demonstrated competence and qualification for the type of professional services required and at fair and reasonable prices.

**§ 1-4.1002 Definitions.**

(a) "Firm" means any individual, firm, partnership, corporation, association, or other legal entity permitted by law to practice the professions of architecture or engineering.

(b) "Agency head" means the Secretary, Administrator, or head of a department, agency, or bureau of the Federal Government.

(c) "Architect-engineer services" include those professional services of an architectural or engineering nature as well as incidental services that members of those professions and those in their employ may logically or justifiably perform as described in § 1-16.702.

**§ 1-4.1003 Public announcements.**

To assure the broadest publicity concerning the Government's interest in obtaining architect-engineer services, each agency head shall develop notices in accordance with § 1-1.1003 with respect to individual projects.

**§ 1-4.1004 Selection.**

**§ 1-4.1004-1 Establishment of architect-engineer evaluation boards.**

Each agency head shall establish one or more architect-engineer evaluation boards to be composed of an appropriate number of members who, collectively, have experience in architecture, engineering, construction, and related procurement matters. Members shall be appointed from among highly-qualified professional employees and/or private practitioners engaged in the practice of architecture or engineering. One member of each board shall be designated as the chairman.

**§ 1-4.1004-2 Functions of the evaluation boards.**

Agency architect-engineer evaluation boards shall perform the following functions:

(a) Collect and maintain current data files on architect-engineer firms, including information on the qualifications of their members and key employees and past experience on various types of construction projects. U.S. Government Architect-Engineer Questionnaire, Standard Form 251, supported by required photographs shall be used for this purpose. Information from other sources (such as other clients, other members of the profession, managers or occupants of facilities previously designed, assessments by the procuring agency itself on prior projects awarded to a firm) may also be included in the files;

(b) When procurement of architect-engineer services is proposed, the board shall review the data files on eligible firms including files established on receipt of a Standard Form 251 in response to the public notice of a particular contract, and shall evaluate the firms in accordance with § 1-4.1004-3. After making this review and technical evaluation, the board shall hold discussions with not less than three of the most qualified firms regarding anticipated concepts and relative utility of alternative methods of approach for furnishing the required services; and

(c) Prepare a report for submission to the agency head recommending no less than three firms which are considered

highly qualified to perform the required services. This report shall include in sufficient detail the extent of the evaluation and review and the considerations upon which the recommendations were based.

**§ 1-4.1004-3 Evaluation criteria.**

In evaluating architect-engineer firms, the architect-engineer evaluation board shall apply the following criteria, other criteria established by agency regulation, and any criteria set forth in the public notice on a particular contract:

(a) Specialized experience of the firm (including a joint venture or association) with the type of service required;

(b) Capacity of the firm to perform the work (including any time limitations);

(c) Past record of performance on contracts with Government agencies and private industry with respect to such factors as control of costs, quality of work, and ability to meet schedules;

(d) Familiarity with the area in which the project is located; and

(e) Volume of work previously awarded to the firm by the agency, with the object of effecting an equitable distribution of architect-engineer contracts among qualified firms. Each architect-engineer evaluation board shall give, to the fullest extent practicable, favorable consideration to otherwise qualified firms (including small businesses) that have not had prior experience on Government projects.

**§ 1-4.1004-4 Action by agency head or his authorized representative.**

(a) The agency head (or the responsible official to whom the authority has been delegated) shall review the recommendations of the architect-engineer evaluation board and shall, in concert with his principal technical representatives, develop and approve, in order of preference, a listing of the three most highly qualified firms, based upon the criteria in § 1-4.1004-3.

(b) The agency head or other authorized official shall advise the board of his decision which will serve as an authorization for the contracting officer to commence negotiation.

**§ 1-4.1004-5 Procedure for procurement estimated not to exceed \$10,000.**

When authorized by the agency head, one of the following procedures set forth in paragraphs (a) and (b) of this section may be used in lieu of the procedures prescribed by § 1-4.1004-2 (b) and (c) and actions prescribed by § 1-4.1004-4.

(a) *Selection by the board.* After reviewing and evaluating architect-engineer firms in accordance with § 1-4.1004-2(b), the board will prepare a report for submission to the contracting officer listing in the order of preference, a minimum of 3 firms which are considered the best qualified to perform the required services. This report will include sufficient details as to the extent of the evaluation and review made and the considerations upon which the selection is based. Further, the report will serve as an authorization to the

contracting officer to commence negotiation with the highest qualified firm.

contracting officer to commence negotiation with the highest qualified firm.

(b) *Selection by the chairman of the board.* When, in the judgment of the chairman of the board, it is considered that board action is not required in connection with a particular selection of architect-engineer firms, the following procedures will be followed:

(1) The chairman of the board will perform the functions required under § 1-4.1004-2(b);

(2) The chairman of the board will prepare a report in the same manner as prescribed by § 1-4.1004-2(c) except that the report will be submitted to the agency head's representative for concurrence;

(3) The agency head's representative will review the report and concur with the selection or return the report to the chairman for such action as he may consider necessary; and

(4) Upon receipt of an approved report, the chairman of the board will furnish the contracting officer a copy of the report which will serve as an authorization to commence negotiation.

**§ 1-4.1005 Negotiation procedures.**

**§ 1-4.1005-1 General.**

(a) Each agency head is responsible for negotiation of contracts for architect-engineer services. This responsibility may be delegated to a contracting officer. The contracting officer shall use the services of technical, legal, auditing, pricing, and other specialists in the agency to the extent deemed appropriate. Negotiations shall be directed toward:

(1) Making certain that the architect-engineer has a clear understanding of the essential requirements;

(2) Determining that the architect-engineer will make available the necessary personnel and facilities to accomplish the work within the required time;

(3) Determining, where applicable, whether the architect-engineer can provide the design for construction of the facility at a cost not to exceed the limit established for the project; and

(4) Reaching mutual agreement on the provisions of the contract, including a fair and reasonable price, for the required work.

(b) For public works and utilities projects, the amount of the fee that may be paid to an architect-engineer firm under a cost-plus-a-fixed-fee contract for the production and delivery of the designs, plans, drawings, and specifications may not exceed 6 percent of the estimated construction cost of such project, exclusive of the amount of such fee (see 41 U.S.C. 254). The statutory limitation shall also apply to the fee paid to an architect-engineer for the performance of such services under a fixed-price contract. This limitation shall be applied on an individual contract basis.

(c) *Selection by the board.* After reviewing and evaluating architect-engineer firms in accordance with § 1-4.1004-2(b), the board will prepare a report for submission to the contracting officer listing in the order of preference, a minimum of 3 firms which are considered the best qualified to perform the required services. This report will include sufficient details as to the extent of the evaluation and review made and the considerations upon which the selection is based. Further, the report will serve as an authorization to the

**§ 1-4.1005-2 Conduct of negotiations.**

Negotiations shall be conducted initially with the architect-engineer firm given first preference under the proce-

dures set forth in § 1-4.1004. If a mutually satisfactory contract cannot be negotiated with such firm, the negotiations shall be formally terminated and the firm notified. Negotiations then shall be initiated with the subsequently listed firms in the order of preference and this procedure shall be continued until a mutually satisfactory contract has been negotiated. If negotiations fail with the listed firms, additional firms shall be selected in accordance with § 1-4.1004 and negotiations shall continue in the manner described above.

**§ 1-4.1005-3 Independent Government estimate.**

Prior to the initiation of negotiations, the contracting officer shall develop an independent Government estimate of the cost of the required architect-engineer services, based on a detailed analysis of the costs expected to be generated by the work. Consideration shall be given to the estimated value of the services to be rendered, the scope, complexity, and the nature of the project. The independent Government estimate shall be revised as required during negotiations to reflect changes in, or clarification of, the scope of the work to be performed by the architect-engineer. A cost estimate, based on the application of percentage factors to cost estimates of the various segments of the work involved, e.g., construction project, may be developed for comparison purposes, but such a cost estimate shall not be used as a substitute for the independent Government estimate.

**§ 1-4.1005-4 Architect-engineer's proposal.**

The contracting officer shall request the selected architect-engineer firm to submit its proposal with supporting cost or pricing data in accordance with § 1-3.807. Revisions of the proposal and supporting cost or pricing data may be made as required during negotiations to reflect changes in, or clarification of, the scope of the work to be performed by the architect-engineer or findings derived from pre-award audits conducted pursuant to § 1-3.809.

**§ 1-4.1005-5 Contract price.**

Subject to the provisions of § 1-4.1005-1(b), the contracting officer shall negotiate a contract price considered fair and reasonable based on a comparative study of the independent Government estimate and the architect-engineer's proposal. Significant differences between elements of the two figures and between the overall figures shall be discussed and the contracting officer shall satisfy himself as to the reasons therefor.

**§ 1-4.1005-6 Record of negotiation.**

Promptly at the conclusion of each negotiation, a memorandum setting forth the principal elements of the contract shall be prepared for use by the reviewing authorities and for inclusion in the contract file. The memorandum shall contain sufficient detail to reflect the significant considerations controlling the

establishment of the price and other terms of the contract.

**§ 1-4.1006 Contracting for construction work.**

**§ 1-4.1006-1 Policy.**

The award of a contract for architect-engineer services for a particular project and the award of a contract for the related construction work to the same firm, a parent firm, its subsidiaries or affiliates is prohibited except as otherwise provided by § 1-18.112.

**§ 1-4.1006-2 Procedure.**

An architect-engineer firm selected for negotiation of an architect-engineer services contract shall be advised of the policy set forth in § 1-4.1006-1 prior to the initiation of negotiations. If the firm possesses construction capabilities either within its own organization or through a parent firm, subsidiaries or affiliates, the firm shall have the option of either:

(a) Declining to enter into contract negotiations in order for its parent firm, subsidiaries, or affiliates to be eligible to compete for the related construction contract; or

(b) Entering into contract negotiations with the clear understanding that, if such negotiations are successful, its parent firm, subsidiaries, or affiliates will be ineligible to compete for the related construction contract.

**§ 1-4.1007 Small business.**

The policy of the Government that a fair proportion of contracts for services be awarded to small businesses is applicable without qualification to the award of contracts for architect-engineer services. In complying with this requirement, the provisions of Subpart 1-1.7 shall be followed.

**PART 1-18—PROCUREMENT OF CONSTRUCTION**

d. Subpart 1-18.1 is amended to add a new section as follows:

**§ 1-18.113 Architect-engineer services contracts.**

Policies and procedures applicable to architect-engineer services contracts are set forth in Subpart 1-4.10 of this title.

ARTHUR P. SAMPSON,  
Acting Administrator  
of General Services.

MARCH 23, 1973.

[FR Doc. 73-6026 Filed 3-28-73; 8:45 am]

**CHAPTER 114—DEPARTMENT OF THE INTERIOR**

**MISCELLANEOUS AMENDMENTS TO CHAPTER**

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301 and section 205(c), 63 Stat. 390; 40 U.S.C. 486(c), Subparts 114-1.1, 114-3.1, 114-3.2, 114-25.3, 114-26.6, 114-38.53, 114-42.2, 114-45.1, 114-45.3, 114-45.6, 114-46.4, 114-47.3, and subsection 114-45.000 of Chapter 114, Title 41 of

the Code of Federal Regulations are amended as set forth below.

Since this regulation merely corrects the title of a departmental official and an Office of the Department it is determined that the rulemaking procedure is unnecessary and these amendments shall become effective on March 29, 1973.

CHARLES G. EMLEY,  
Deputy Assistant Secretary  
of the Interior.

MARCH 23, 1973.

**PART 114-1—INTRODUCTION**

**Subpart 114-1.1—Regulations System**

Section 114-1.100 is revised as follows:

**§ 114-1.100 Deviation.**

Deviations from mandatory provisions of FPMR (as provided in 41 CFR 101-1.110) and IPMR shall be kept to a minimum. Deviations in both individual cases and classes of cases must be approved in advance by the Assistant Secretary—Management. Requests for approval of such deviations shall be submitted by the heads of Bureaus and Offices to the Assistant Secretary—Management, citing the specific part of FPMR or IPMR from which it is desired to deviate, setting forth the nature of the deviation and the reasons for the action requested.

**PART 114-3—ANNUAL REAL PROPERTY INVENTORIES**

**Subpart 114-3.1—General Provisions**

Section 114-3.105 is revised as follows:

**§ 114-3.105 Agency liaison.**

The Director of Management Operations, Office of the Assistant Secretary—Management, is the designated agency representative for this Department for liaison with the General Services Administration on matters related to the owned and leased real property inventories. Any questions concerning these inventories shall be referred to him for handling.

**Subpart 114-3.2—Annual Report Real Property Owned by the United States**

In § 114-3.206 the first paragraph is amended as follows:

**§ 114-3.206 Preparation and due dates.**

The annual inventory report on GSA Forms 1186 and 1209 shall be prepared as of June 30 each year and transmitted to reach the Director of Management Operations, Office of the Assistant Secretary—Management, by not later than August 21, in the number of copies indicated below:

**PART 114-25—GENERAL**

**Subpart 114-25.3—Use Standards**

In § 114-25.350 the last paragraph is amended as follows:

**§ 114-25.350 Standard lettering for bench marks and corner markers.**

Exceptions to the use of the foregoing lettering will be granted only where special circumstances warrant exemption. Requests for such exemption shall be transmitted through Bureau channels to the Director, Office of Management Operations, Office of the Assistant Secretary—Management.

**PART 114-26—PROCUREMENT SOURCES AND PROGRAMS**

**Subpart 114-26.6—Procurement Sources Other Than GSA**

In § 114-26.600-50 the last paragraph is revised to read:

**§ 114-26.600-50 Procurement of tax free alcohol.**

Requests for any additional permits should be submitted through Bureau channels to the Director of Management Operations, Office of the Assistant Secretary—Management, for transmittal to the Internal Revenue Service.

**PART 114-38—MOTOR EQUIPMENT MANAGEMENT**

**Subpart 114-38.53—Aircraft**

Section 114-38.5312(d) is amended as follows:

**§ 114-38.5312 Official use of aircraft.**

(d) In the event there is occasion to transport unofficial passengers not specifically identified above, the circumstances should be submitted to the Assistant Secretary—Management, with a request for a decision concerning waiver requirements. Should such an occasion arise under emergency conditions which will not permit advance consideration, a waiver shall be obtained from the individual or individuals involved.

**PART 114-42—PROPERTY REHABILITATION SERVICES AND FACILITIES**

**Subpart 114-42.2—Property Rehabilitation Services Performed by Federal Facilities**

In § 114-42.203(a) the first paragraph is revised to read as follows:

**§ 114-42.203 Notifications.**

(a) Should any bureau or office determine that (1) additional rehabilitation facilities are needed to perform required services or (2) that operation of existing facilities is to be discontinued, the prior information required by FPMR 101-42.203 should be embodied in a letter, prepared for the signature of the Assistant Secretary—Management, and addressed to:

**PART 114-45—SALE, ABANDONMENT, OR DESTRUCTION OF PERSONAL PROPERTY**

In § 114-45.000, paragraph (b) (1) is amended as follows:

**§ 114-45.000 Scope of part.**

(b) . . . .

(1) Except as provided in IPMR 114-45.316 and 114-45.317, properties which are sold or otherwise disposed of pursuant to special statutes authorizing, directing, or requiring the Department of the Interior to dispose of specific properties such as helium, buffalo, maps, electrical power, irrigation and municipal water, trust properties of the Bureau of Indian Affairs, and other properties which are disposed of in furtherance of interior programs, or

**Subpart 114-45.1—General**

Section 114-45.105-3 is revised as follows:

**§ 114-45.105-3 Exemptions.**

(a) Any requests seeking an exemption from the provisions of FPMR Part 101-45 in accordance with FPMR 101-45.105-3. (a), shall be prepared for the signature of the Assistant Secretary—Management, and include full particulars which tend to justify the exemption.

**Subpart 114-45.3—Sale of Personal Property**

Section 114-45.304-2 is revised as follows:

**§ 114-45.304-2 Negotiated sales and negotiated sales at fixed prices.**

(a) Should any Bureau or Office propose to negotiate a sale of surplus personal property which, if disposed of by advertising, might cause such an impact on industry as, to adversely affect the national economy, a statement of the circumstances justifying sale by negotiation shall be submitted to the Assistant Secretary—Management, for consideration and transmittal to the General Services Administration.

(b) Explanatory statements required to be submitted to the General Services Administration for transmittal to the committees of the Senate and House of Representatives pursuant to FPMR 101-45.304-2(c) shall be prepared following the outline shown in FPMR 101-45.4919. Such statements shall be submitted as attachments to a transmittal letter addressed to the Administrator, General Services Administration, Washington, D.C. 20405, prepared for the signature of the Assistant Secretary—Management.

Section 114-45.304-9 is revised as follows:

**§ 114-45.304-9 Credit.**

Requests for approval to offer to sell personal property on credit shall be addressed to the Administrator, General Services Administration, Washington, D.C. 20405, and be prepared for the signature of the Assistant Secretary—Management. Each request should include a brief explanation of the proposed terms and conditions of sale.

**Subpart 114-45.6—Debarred and Suspended Bidders**

Section 114-45.603 is revised as follows:

**§ 114-45.603 Notice of debarment or suspension.**

Determination to debar or suspend a firm or individual for a cause or condition for a specified period of time as provided in FPMR 101-45.6, shall be made by the Assistant Secretary—Management. Whenever cause for debarment or suspension becomes known to the head of a Bureau or Office, or a sales or contracting officer thereof, the matter shall be submitted with the recommendations of the head of the Bureau or Office, to the Assistant Secretary—Management, for appropriate action. All actions required by FPMR 101-45.603 will be taken by the Assistant Secretary—Management.

**PART 114-46—UTILIZATION AND DISPOSAL OF PERSONAL PROPERTY PURSUANT TO EXCHANGE/SALE AUTHORITY**

**Subpart 114-46.4—Disposal**

In § 114-46.407, the first sentence is amended as follows:

**§ 114-46.407 Reports.**

The report required by this subsection shall be submitted to the Director of Management Operations, Office of the Assistant Secretary—Management, by not later than August 15 of each year. . . .

**PART 114-47—UTILIZATION AND DISPOSAL OF REAL PROPERTY**

**Subpart 114-47.3—Surplus Real Property Disposal**

In § 114-47.304-12, paragraphs (a) and (c) are revised as follows:

**§ 114-47.304-12 Explanatory statements.**

(a) Explanatory statements required to be submitted to the General Services Administration for transmittal to the committees of the Senate and House of Representatives pursuant to FPMR 101-47.304-12 shall be prepared following the outline shown in FPMR 101-47.4911. Such statements shall be submitted as attachments to a transmittal letter addressed to the Administrator, General Services Administration, Washington, D.C. 20405, prepared for the signature of the Assistant Secretary—Management.

(c) Twenty-two (22) mimeographed copies of such notices shall be submitted to the Assistant Secretary—Management, twenty (20) of which are for submission to the General Services Administration and transmittal to the appropriate committees of the Congress. The letter transmitting each such notice to the Assistant Secretary—Management, shall include any additional supporting data as may not be incorporated in the "back-

ground and justification" portion of the explanatory statement.

[FR Doc. 73-6979 Filed 3-28-73; 8:45 am]

**PART 114-38—MOTOR EQUIPMENT MANAGEMENT**

**Subpart 114-38.50—Official Use of Motor Vehicles**

**STRANGERS OR HITCHHIKERS; PROHIBITION**

Pursuant to the authority of the Secretary of the Interior contained in 5 U.S.C. 301 and section 205(c), 63 Stat. 390; 40 U.S.C. 486(c), Subpart 114-38.50 of Chapter 114, Title 41 of the Code of Federal Regulations is amended as set forth below.

Since this regulation is a statement of Departmental policy relating to the operation of motor vehicles while on official business, it is determined that the public rulemaking procedure is unnecessary and this amendment shall become effective March 29, 1973.

CHARLES G. EMLEY,  
Deputy Assistant Secretary  
of the Interior.

MARCH 23, 1973.

Section 114-38.5004 is amended by the addition of the following sentence at the end thereof.

**§ 114-38.5004 Transportation of non-official passengers.**

. . . . Picking up strangers or "hitchhikers" is prohibited when operating a Government-owned or leased motor vehicle or a privately-owned vehicle on official business.

In § 114-38.5005, paragraph (e) is redesignated (f) and a new paragraph (e) inserted to read as follows:

**§ 114-38.5005 Instructions to motor vehicle operators.**

(e) The prohibition against picking up strangers or hitchhikers.

[FR Doc. 73-5980 Filed 3-28-73; 8:45 am]

**Title 46—Shipping**  
**CHAPTER 1—COAST GUARD,**  
**DEPARTMENT OF TRANSPORTATION**  
[CGD 73-56R]

**PART 2—VESSEL INSPECTIONS**

**PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES AND COMBUSTIBLE LIQUIDS ON BOARD CARGO VESSELS**

**Incidents Involving Etiologic Agents**

On August 9 and December 13, 1972 the Coast Guard published two notices (CGD 72-148PH and CGD 72-226PH) dealing with etiologic agents. Public Hearings were held on these matters on September 5, 1972 and January 23 1973. No comments were received at either hearing. One written comment was received on

Notice CGD 72-226 supporting the proposal.

The Hazardous Materials Regulations Board has, for reasons fully stated in their amendment published at page 8161 of this issue of the *FEDERAL REGISTER*, made certain changes to their proposal on incident reporting. The Coast Guard is adopting those changes for the water mode.

In consideration of the foregoing Parts 2 and 146 of Title 46 Code of Federal Regulations are amended as follows:

1. By adding in § 2.20-65(a) the words "(12) Etiologic agents."

2. By adding in § 2.20-65(b) the following paragraph:

§ 2.20-65 Immediate notice of certain hazardous materials incidents.

(b) Notice required. . . .

(7) Fire, breakage, spillage or suspected contamination occurs involving a shipment of etiologic agents. In lieu of the requirements of this section, notice may be given to the Center for Disease Control, U.S. Public Health Service, Atlanta, Ga. (Area Code 404-633-5313) for incidents involving etiologic agents.

3. By adding to § 146.30-3(a) subparagraph (3) to read as follows:

§ 146.30-3 Exemptions.

(a) . . . .

(3) Cultures of etiologic agents of less than 50 milliliters (1.66 fluid ounces) total in one package.

Effective date: This amendment is effective on June 30, 1973.

(RS 4472, as amended; sec. 1, 19 Stat. 252, sec. 6(b)(1), 80 Stat. 937; 46 U.S.C. 170, 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b))

Dated: March 23, 1973.

C. R. BENDER,  
Admiral, U.S. Coast Guard,  
Commandant.

[FR Doc 73-5971 Filed 3-28-73; 8:45 am]

#### CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE SUBCHAPTER C—REGULATIONS AFFECTING SUBSIDIZED VESSELS AND OPERATORS

[General Order 116, Rev. (Amdt. 2)]

#### PART 294—OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO VESSELS ENGAGED IN CARRYING BULK RAW AND PROCESSED AGRICULTURAL COMMODITIES FROM THE UNITED STATES TO THE UNION OF SOVIET SOCIALIST REPUBLICS

##### Final Payment Billing Procedures

The following regulations, which has been adopted by the Maritime Subsidy Board, governs procedures to be used by subsidized operators for the final payment billings for operating-differential subsidy under the program in Part 294. The regulation also governs the conduct of an audit by the Maritime Administration of certain financial aspects relating to this subsidy program.

Because the operating-differential subsidy program is exempt from the rule-making procedures required by 5 U.S.C. 553 and because of the need for immediate guidance to those holding subsidy contracts under this part, the rule is issued in final form.

A new § 294.13 is added to Part 294, Title 46, Chapter II, Code of Federal Regulations to read as follows:

#### § 294.13 Final payment billing procedures.

(a) In general. This section sets forth the procedures for the final payment billings and supplemental final payment billings by an Operator. An Operator may make final payment billings after the Maritime Administration completes audit of the Operator's historical costs, subsidizable costs, and revenues from the carriage of bulk raw and processed agricultural products to the Union of Soviet Socialist Republics. This section provides rules for the conduct of the audit and specifies times when an Operator may make final payment or supplemental final payment billings.

(b) Audit.—(1) In general. Audit consists of verification by the Maritime Administration of the following four items in respect to each subsidized vessel:

(i) Historical costs;

(ii) Actual subsidizable costs incurred on the subsidized voyage;

(iii) Actual costs of maintenance and repairs (M&R) and stores, supplies, and expendable equipment (SS&E) incurred in any of the United States or the Commonwealth of Puerto Rico after commencement of the subsidized voyage; and

(iv) Revenues earned on the subsidized voyage for the carriage of bulk raw and processed agricultural commodities from the United States to the U.S.S.R.

(2) Information necessary for audit. In order to perform the audit, the Operator must submit all documents relating to the items specified in paragraph (b) (1) of this section. These documents include, but are not limited to:

(i) Historical costs;

(a) M&R—invoices (as directed by the Maritime Administration) of suppliers and repair yards in support of costs paid during the 5-year period preceding the current year which were submitted to the Board for tentative subsidy per diem calculation purposes;

(b) Protection and indemnity insurance deductible absorptions—crew injury, illness, and death claim records and files compiled in connection with costs absorbed and paid under protection and indemnity insurance policy during the 3-year period preceding the current year or such lesser period as the vessel has been in operation, which were submitted to the Board for tentative subsidy per diem calculation purposes;

(c) SS&E—invoices (as directed by the Maritime Administration) of suppliers in support of costs paid during the 3-year period preceding the current year which were submitted to the Board for tentative subsidy per diem calculation purposes.

(c) Final payment procedures.—(1) In general. After the audit is completed, the Maritime Administration will determine

(ii) Actual subsidizable costs incurred on the subsidized voyage:

(a) Wages of officers and crew—voyage and port payrolls including overtime supports, individual pay vouchers, computation of payroll taxes, and the various payroll contributions payable under collective-bargaining agreements for the period of the subsidized voyage;

(b) Subsistence of officers and crew—computation of subsistence inventories aboard vessel both at the commencement and the termination of the subsidized voyage, vendors invoices and delivery receipts for subsistence stores purchased, vendors invoices for loading of subsistence stores aboard vessel;

(c) Vessel insurance—protection and indemnity insurance and hull and machinery insurance policies in effect during the subsidized voyage, general and particular average claim files, insurance premium invoices;

(d) Fuel—computation of fuel inventories aboard vessel both at the commencement and the termination of the subsidized voyage, vendors invoices and delivery receipts of fuel purchased, contracts for the purchase of fuel;

(e) Other vessel expenses—invoices and receipts on which subsidizable costs were incurred during the subsidized voyage;

(f) Vessel depreciation—computation of depreciation and supporting data on vessel cost capitalized;

(g) Interest expense attributable to vessel indebtedness—computation of interest expense including loan agreements evidencing debt principal, interest rates, amortization schedules, and other terms of the loan.

(iii) Actual costs of M&R and SS&E incurred in any of the United States or the Commonwealth of Puerto Rico after the commencement of the subsidized voyage:

(a) M&R—invoices of domestic suppliers and repair yards for all such items charged to the subsidized vessel; and

(b) SS&E—invoices of domestic suppliers for all such items charged to the subsidized vessel including invoices for such items used to stock inventory immediately preceding the subsidized voyage.

(iv) Revenues earned on the subsidized voyage from the carriage of bulk raw and processed agricultural commodities to the U.S.S.R. for the purpose of determining abatement of subsidy as provided in § 294.6(e)—charter agreements, bills of lading for bulk raw and processed agricultural products carried, and cargo loading and discharge reports.

(3) Time for submission of audit data. Audit data shall be submitted as follows:

(i) Historical cost data shall be submitted as soon as possible after the commencement of a subsidized voyage.

(ii) All other data shall be submitted within 1 year from the termination of a subsidized voyage except as provided in paragraph (d) of this section.

(c) Final payment procedures.—(1) In general. After the audit is completed, the Maritime Administration will determine

final per diem amounts and differential percentages. When such amounts are incorporated into the ODSA, the Operator shall make a final payment billing.

(2) Final payments of subsidy applicable to maintenance and repairs and stores, supplies and expendable equipment.—(i) Negative per diem subsidy amounts. If the final per diem subsidy amount incorporated into the operating-differential subsidy contract for M&R or SS&E is negative, the final payment will be reduced by the product of such negative per diem subsidy amount multiplied by the number of subsidized voyage days.

(ii) Positive per diem subsidy amounts and positive differential percentages. If the final per diem subsidy amount or differential percentage incorporated into the subsidy contract for M&R or SS&E is positive, the final payment will be limited to the lesser of:

(a) An amount determined by multiplying the differential percentage for such category of expense by the costs incurred by the subsidized operator for such items in any of the United States or the Commonwealth of Puerto Rico to the date of the final payment billing;

(b) An amount determined by multiplying the final per diem amount for such category of expense by the number of subsidized voyage days.

(3) Reduction of final subsidy payments due to deviations, idleness or delays. The reduction of subsidy required under § 294.12(c) because of deviations, idleness or delays during the subsidized voyage shall be made on final subsidy payment vouchers.

(4) Reduction of final subsidy payments due to abatement of subsidy. The total subsidy payment as determined under this subsection shall be reduced by the amount of subsidy abatement calculated pursuant to § 294.6(e).

(5) Forms for final payment billing. Final payment billing shall be submitted to the appropriate Maritime Administration Region Finance Office on the forms provided in § 294.12(e). Payment to the Operator will be made by Maritime Administration, Washington, D.C.

(6) Affidavit. The affidavit in § 294.12(f) shall be submitted with the final payment billing.

(7) Finality of final payment billing. Except as provided in paragraph (d) of this section (relating to supplemental final payment billings for M&R and SS&E) all subsidizable costs shall be final when billed and not subject to adjustment by the Operator.

(8) Maximum time for final payment billing. Final payment billing shall be made not later than 30 days from the date final per diem amounts and differential percentages are incorporated into the ODSA.

(d) Supplemental final payment billings.—(1) In general. Under § 294.8(b) (2) (ii), subsidy on M&R and SS&E is not paid until the Operator makes actual expenditures for such items in any of the United States or the Commonwealth of Puerto Rico within a 5-year period from the date that the subsidized voyage commenced and the expenditure

is audited. Within that 5-year period, billings may be made subject to the rules in this subsection.

(2) Rules for supplemental billing. Supplemental final payment billings may be made when the applicable per diem subsidy amount and differential percentage for M&R or SS&E is positive.

(3) Frequency of supplemental billings. Supplemental final payment billings may not be made more often than once each 30 days. Each billing shall include the cumulative costs of M&R and SS&E on which subsidy is payable to the date of such billing.

(4) Submission of supplemental billings. Supplemental billings shall be submitted in the same manner as provided in paragraph (c) of this section.

Effective date. This section shall be effective on April 1, 1973.

Dated: March 26, 1973.

By order of the Assistant Secretary of Commerce for Maritime Affairs and the Maritime Subsidy Board.

JAMES S. DAWSON, JR.,  
Secretary, Maritime Administration.  
[FR Doc 73-6038 Filed 3-28-73; 8:45 am]

#### TITLE 49—TRANSPORTATION CHAPTER I—DEPARTMENT OF TRANSPORTATION SUBCHAPTER A—HAZARDOUS MATERIALS REGULATIONS BOARD

[Docket No. HM-96; Amdt. Nos. 171-18, 173-72]

#### PART 171—GENERAL INFORMATION AND REGULATIONS

##### PART 173—SHIPPER'S

##### Etiologic Agents

On July 22, 1972, and November 29, 1972, the Hazardous Materials Regulations Board published two notices, (1) 72-9 and (2) 72-13, respectively, in Docket No. HM-96 (37 FR 14728 and 25243). Interested persons were invited to comment on the proposals they contained.

1. Notice 72-9 proposed to require direct reporting to the Center for Disease Control (CDC) of the Department of Health, Education, and Welfare in the case of fire, breakage, spillage, or suspected contamination involving etiologic agents. This report was proposed to replace the immediate report to this Department required by § 171.15 for certain hazardous materials incidents.

Comments were about equally divided in their position for or against the proposal. However, those commenters voicing their opinion against the proposal based their objections on the difficulties for carriers to maintain separate emergency telephone numbers for incidents involving different hazardous materials. Because of a higher probability of confusion, safety in transportation of hazardous materials could suffer. In addition, the public should not be required to make two phone calls, reporting the same matter.

The Board finds that the objections are valid and that, as much as possible,

it should not establish rules that would cause proliferation of telephone numbers. Therefore, the amendment provides that reports must be made either to the Department of Transportation or to the CDC. The Board still recognizes the importance of quickly informing the CDC should a report be made to DOT and not CDC. Consequently, the Board has made arrangements to assure that any immediate reports it receives on etiologic agents will be promptly relayed to the Center for Disease Control. Accordingly, the rule has been changed to require reporting to DOT as specified for other hazardous materials. However, any immediate report made directly to CDC will constitute compliance with the regulations without the requirement for an additional call to the Department.

2. Notice 72-13 proposed to authorize that quantities of etiologic agents of less than 50 ml in one outside packaging be exempt from the Hazardous Materials Regulations. Several comments were received on the proposal and each commenter agreed except one, the Atomic Energy Commission. That Commission stated in part: "[h]owever, to exempt them from the regulations in toto by listing them in § 173.386(d) seems to be contrary to the interest of public safety. They should be controlled and regulated, not exempted. They should be allowed on passenger-carrying aircraft by specific provisions for their safe transportation, not by deleting all requirements for their safe packaging and labeling."

The Board has carefully considered the comments from the AEC, which objected in part to the proposed amendment, and all the other comments from other authorities supporting the amendment, and has determined in the interest of public safety, to promulgate the amendment with the exemption. It is to be noted, however, that exempt quantities of etiologic agents will still be regulated by other agencies. The Board specifically stated in the preamble to Notice 72-13 that "[t]his action would have no effect on the present Department of Health, Education, and Welfare regulations on etiologic agents which continue to apply to the packaging of these substances." The petition of CDC and the Board's proposal were based on the fact that the packaging and labeling requirements of 42 CFR 72.25 will continue to apply. No comments or objections were received regarding these packaging requirements.

The Food and Drug Administration of the Department of Health, Education, and Welfare noted that it is of critical importance to the public health that it be permitted to ship samples for analysis, including suspect food products and quality assurance samples, on passenger-carrying aircraft. It requested that § 173.386(d) be amended to list "samples for analysis" as an additional exemption. This request is outside the scope of the present rulemaking and will be covered in a separate notice of proposed rulemaking.

In consideration of the foregoing, 49

CFR Parts 171 and 173 are amended as follows:

1. In § 171.15, paragraph (a) (5) and the introductory text of paragraph (b) are amended; paragraph (a) (6) is added as follows:

§ 171.15 Immediate notice of certain hazardous materials incidents.

(a) . . . . .  
(5) Fire, breakage, spillage, or suspected contamination occurs involving shipment of etiologic agents; or

(6) A situation exists of such a nature that, in the judgment of the carrier, it should be reported in accordance with paragraph (b) of this section even though it does not meet the criteria of paragraph (a) (1), (2), or (3) of this section; e.g., a continuing danger of life exists at the scene of the incident.

(b) Each notice required by paragraph (a) of this section shall be given the Department by telephone at Area Code (202) 426-1830. Notice involving etiologic agents may be given the Director, Center for Disease Control, U.S. Public Health Service, Atlanta, Ga., Area Code (404) 633-5313, in place of the notice to the Department. Each notice must include the following information:

2. In § 173.386, paragraph (d) (3) is added to read as follows:

§ 173.386 Etiologic agents; definition and scope.

(d) . . . . .  
(3) Cultures of etiologic agents of 50 milliliters (1.666 fluid ounces) or less total quantity in one outside package.

This amendment is effective June 30, 1973. However, compliance with the regulations, as amended herein, is authorized immediately.

(Secs. 831-835 title 18, United States Code; sec. 9 Department of Transportation Act, 49 U.S.C. 1657; Title VI sec. 902(h) Federal Aviation Act of 1958, 49 U.S.C. 1421-1430, 1472(h), and 1655(c))

Issued in Washington, D.C., on March 23, 1973.

JAMES F. RUDOLPH,  
Board Member for the

### CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

#### SUBCHAPTER B—MOTOR CARRIER SAFETY REGULATIONS

[Docket No. MC-12; Notice No. 73-11]

### PART 393—PARTS AND ACCESSORIES NECESSARY FOR SAFE OPERATION

#### Minimum Strength of Tiedown Assemblies

The Director of the Bureau of Motor Carrier Safety is amending the provisions of the Motor Carrier Safety Regulations dealing with the minimum strength of tiedown assemblies which are used to secure cargo being transported on commercial motor vehicles. Specifically, he is instituting a requirement that the aggregate static breaking strength of the tiedown assemblies used to secure an article must be at least 1½ times the weight of that article.

The present rule, found in § 393.85(c) (1) of the regulations, provides that the aggregate rated working load of the tiedown assemblies used to secure an article of cargo must equal or exceed the weight of the article. On November 20, 1972, the Director issued a notice of proposed rulemaking, announcing that he had received a petition for rulemaking from the American Trucking Associations, Inc., seeking a change in the rule. The petitioner asked the Director to abandon the rated working load criterion in favor of the aggregate static breaking strength test. The notice invited interested persons to comment on whether the regulations should incorporate one standard or the other or some combination of different standards for different types of tiedown assemblies.

Comments were received from 11 persons. They included the major chain manufacturers, the National Association of Chain Manufacturers, the American Iron and Steel Institute, the Steel Carriers Conference, Inc., and the American Trucking Associations, Inc. Without exception, all persons who filed comments supported the use of the breaking strength test instead of the working load test as the criterion for tiedown assemblies.

Having analyzed the comments and other available data, the Bureau has concluded that the relief sought in the petition should be granted, and that the rule should be changed. Use of the working load criterion requires an increase in minimum strength that is unnecessary because it fails to take into account the fact that friction between an article of cargo and surfaces with which it is in contact, such as the floor of the vehicle, exerts forces tending to prevent the article from becoming dislodged. The extra strength demanded by the working load criterion would be necessary only on the assumption that loads are suspended in midair. They are not, of course, and the present rule mandates an overdesign that generates unnecessary expense without any compensating marginal increase in safety.

Accordingly, the Bureau is changing the rule to provide that the aggregate static breaking strength of the tiedown assemblies used to secure an article of cargo against movement in any direction must be at least 1½ times the weight of that article.

In consideration of the foregoing, § 393.85(c) (1) of the Motor Carrier Safety Regulations (Subchapter B in Chapter III of Title 49, CFR) is revised to read as follows:

§ 393.85 Protection against shifting or falling cargo.

(c) *Securement systems.* . . . .

(1) *Tiedown assemblies.* Except as provided in paragraph (c) (6) of this section (relating to containers designed to transport containerized, intermodal cargo), the aggregate static breaking strength of the tiedown assemblies used to secure an article against movement in any direction must be at least 1½ times the weight of that article. Chain used as a component of a tiedown assembly must conform to the requirements of the August 1961 edition of the National Association of Chain Manufacturers' Welded Chain Specifications<sup>1</sup> applicable to all types of chain. Steel strapping used as a component of a tiedown assembly must conform to the requirements of Federal Specification No. QQ-S-781 (1969).<sup>2</sup> Steel strapping that is 1 inch wide or wider must have at least two pairs of crimps in each seal and, when end-over-end lap joints are formed, must be sealed with at least two seals.

Sec. 204, Interstate Commerce Act, as amended; 49 U.S.C. 304, sec. 6, Department of Transportation Act, 49 U.S.C. 1655; and delegations of authority by Secretary of Transportation and Federal Highway Administrator at 49 CFR 1.48 and 389.4, respectively.

*Effective date:* This amendment is effective on July 1, 1973.

Issued on March 1, 1973.

ROBERT A. KAYE,  
Director,  
Bureau of Motor Carrier Safety.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register on March 26, 1973.

[FR Doc. 73-4756 Filed 3-28-73; 8:45 am]

<sup>1</sup> Copies of these specifications may be secured by writing to the National Association of Chain Manufacturers, 111 W. Washington St., Chicago, IL 60602.

### Title 50—Wildlife and Fisheries CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

#### PART 28—PUBLIC ACCESS, USE, AND RECREATION

##### Parker River National Wildlife Refuge, Mass.

The following special regulation is issued and is effective during the period April 1, 1973, through December 31, 1973.

§ 28.28 Special regulations; recreation; for individual wildlife refuge areas. MASSACHUSETTS

##### PARKER RIVER NATIONAL WILDLIFE REFUGE

Entrance into the refuge is permitted for the purpose of sightseeing, nature study, photography, hiking, bicycling, snowshoeing, cross-country skiing, sunbathing, and ice skating from 6 a.m. to 9 p.m., May 1 through October 15, and from dawn to dusk from October 16 through April 30.

Boating is permitted on navigable waters which lie within the refuge and boats may be landed at the Knobbs, Grape Island, and Stage Island for nature study during the above hours.

The entire refuge beach has no life-guards. Swimming will be at the visitor's own risk.

Surf fishing is permitted during the day on the ocean beach east of parking lots Nos. 3-15 from May 1 through October 15. A permit is required for night fishing on the entire beach from May 1 through October 15. Permits are available at refuge headquarters. The entire beach is open to surf fishing without a permit from October 16 through April 30, from dawn to dusk only.

A limit of one-half bushel of plums and cranberries per family may be picked outside of the dune research natural area from August 25 to October 31.

Access to clam flats for clamming is permitted across refuge marshes. Permits are required and may be obtained at refuge headquarters.

Cooking fires are permitted only on the ocean beach.

Alcoholic beverages, camping, tents, camping trailers, floating devices, skin diving, scuba diving, and pets are not permitted on the refuge.

The possession of any drugs or substances, or immediate precursors, identified in Schedules I, II, III, IV, or V of Part B of the Controlled Substances Act, 21 U.S.C. 812, or any drugs or substances added to these schedules pursuant to the terms of the act is prohibited on the refuge, unless such drugs or substances were obtained in accordance with law. Presence in the refuge when under the influence of a controlled substance to a degree that may endanger oneself, or another person, or property, or may cause interference with another person's enjoyment of the refuge is prohibited.

Organized group activities must be confined to the beach area east of parking lots Nos. 1 and 2.

Bicycles and registered motor vehicles are permitted on the refuge access road and in numbered parking areas only. Parking lot No. 9 is reserved for nature study. Speed limits are posted. Snowmobiles, air cushion, all-terrain, or other similar vehicles are not permitted on the refuge.

A required permit may be obtained upon application to the manager in charge for the use of over-the-sand vehicles for surf fishing only, day and night from May 1 to May 29, and September 5 to October 15 inclusive, and during the hours from 6 p.m. to 8 a.m., from May 30 to September 4 inclusive. No vehicle shall be operated on the beach between the hours of 8 a.m. and 6 p.m. from May 30 to September 4. During such hours all authorized vehicles shall remain in the designated surf fishing vehicle parking area, or exit from the beach area. Applicants for over-the-sand vehicle permits must provide evidence that the vehicle is duly registered and licensed in accordance with applicable State and Federal regulations and show that it is equipped with the following: spare tire, shovel, jack, towrope or chain, board or similar support for jack, and low pressure tire gauge. Permits are to be affixed to the vehicles as instructed at the time of issuance. Vehicles authorized by permit to operate on the beach exclusively for the purpose of surf fishing and which are equipped with self-contained water or chemical toilets having a minimum capacity of not less than 3 days' waste material, may park in the designated surf fishing vehicle parking area for a period not to exceed 72 consecutive hours. At the end of such period, the operator of said vehicle shall exit from the refuge but may be readmitted after emptying the vehicle's holding tank at designated disposal sites. Driving above stated vehicles off the designated beach access routes, or over or behind the dunes, or on the beach area east of parking lots Nos. 1 and 2 is prohibited. Ruts or holes resulting from freeing a stuck vehicle shall be filled by the operator. Riding on fenders, tailgate, roof, or any other position outside of the vehicle is prohibited. Failure to comply with refuge regulations shall be grounds for immediate cancellation of the permit.

A map of the refuge is available at refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office and Courthouse, Boston, Mass. 02109.

The provisions of this special regulation supplement the regulations governing recreation on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 28, and are effective through December 31, 1973.

WILLARD M. SPAULDING, JR.,  
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

MARCH 20, 1973.  
[FR Doc. 73-6014 Filed 3-28-73; 8:45 am]

### CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

#### SUBCHAPTER F—AID TO FISHERIES

### PART 259—CAPITAL CONSTRUCTION FUND

#### Joint Tax Regulations

The following regulations relate to the application of section 607 of the Merchant Marine Act, 1936 (46 U.S.C. 1177) as amended by section 21(a) of the Merchant Marine Act of 1970 (84 Stat. 1026) and to the requirements of the execution of agreements relating to capital construction funds and deposits therein for taxable years beginning after December 31, 1969, and before January 1, 1973. The regulations set forth herein are temporary and are designed to provide transitional rules with respect to the execution of agreements relating to capital construction funds and deposits therein for such years. The regulations are effective until the issuance of final regulations to be prescribed by the Commissioner of Internal Revenue and approved by the Secretary or his delegate and prescribed by the Secretary of Commerce or his delegate. These regulations have been issued jointly by the Secretary of the Treasury and the Assistant Secretary of Commerce for Maritime Affairs and also appear under 26 CFR Part 3 and 46 CFR Part 390.

This regulation would extend the rules established by the outstanding temporary regulation, as amended, to taxable years beginning during 1972. For such taxable years, the agreement must be executed and entered into on or prior to the due date, with extensions, for the filing of the tax return in order to be effective for the year to which that return relates. Deposits must also be made on or before that date, or within 60 days after the date of execution of the agreement, whichever is later, in order to be effective for such taxable year.

In order to extend the provisions of the temporary regulations under section 21(a) of the Merchant Marine Act of 1970 to taxable years beginning in 1972, § 259.1 of Chapter II of 50 CFR is amended by revising so much of such § 259.1 as precedes paragraph (a) thereof and by revising paragraph (d) thereof as follows:

§ 259.1 Execution of agreements and deposits made in a capital construction fund.

In the case of a taxable year of a taxpayer beginning after December 31, 1969, and before January 1, 1973, the rules governing the execution of agreements and deposits under such agreements shall be as follows:

(d) Nothing in this section shall alter the rules and regulations governing the timing of deposits with respect to existing capital and special reserve funds or with respect to the treatment of deposits for any taxable year or years

## RULES AND REGULATIONS

other than a taxable year or years beginning after December 31, 1969, and before January 1, 1973.

**Effective date.** These regulations republish existing Treasury Regulations without substantive change. Accordingly, these regulations shall be effective March 29, 1973.

(Sec. 607, Merchant Marine Act, 1936, 46 U.S.C. 1177; as amended by sec. 21(a) Merchant Marine Act of 1970, 84 Stat. 1026)

Dated: March 20, 1973.

By order of the Administrator, National Oceanic and Atmospheric Administration.

ROBERT M. WHITE,  
Administrator.

**Title 5—Administrative Personnel**  
**CHAPTER I—CIVIL SERVICE COMMISSION**  
**PART 213—EXCEPTED SERVICE**  
**Department of Defense**

Section 213.3306 is amended to show that one position of Deputy Director of Defense Research and Engineering (Research and Advanced Technology), Office of the Secretary of Defense, is no longer excepted under Schedule C.

Effective on March 29, 1973, § 213.3306 (a) (23) is amended as set out below.

§ 213.3306 **Department of Defense.**  
(a) *Office of the Secretary.* . . .  
(23) Four Deputy Directors of Defense Research and Engineering and the Director, Advanced Research Projects Agency.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.

[FR Doc.73-5995 Filed 3-28-73; 8:45 am]

**PART 213—EXCEPTED SERVICE**  
**Department of Transportation**

Section 213.3394 is amended to show that one additional position of Special Assistant to the Under Secretary and one position of Special Assistant to the Assistant Secretary for Congressional and Intergovernmental Affairs are excepted under Schedule C.

Effective on March 30, 1973, § 213.3394 (a) (11) is amended and § 213.3394(a) (36) is added as set out below.

§ 213.3394 **Department of Transportation.**

(a) *Office of the Secretary.* . . .  
(11) Three Special Assistants to the Under Secretary.

(36) One Special Assistant to the Assistant Secretary for Congressional and Intergovernmental Affairs.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.

**Title 7—Agriculture**  
**CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE**

**SUBCHAPTER D—PROVISIONS COMMON TO MORE THAN ONE PROGRAM**  
**PART 795—PAYMENT LIMITATION**  
**Interpretation**

The following interpretation of § 795.8 of the regulations governing the payment limitation, 35 FR 19339, as amended, is issued.

Section 795.8 provides that an estate or irrevocable trust shall be considered as one person, except that an estate or trust which has a sole heir or beneficiary shall not be considered as a separate person from such heir or beneficiary.

In the question raised, five persons are the beneficiaries of three separate trusts. The same five persons, along with a charitable organization holding a 10-percent interest, are the beneficiaries of a fourth trust.

It has been concluded that, where two or more trusts have beneficiaries who are identical or practically identical, the trusts may not be regarded as separate persons and are limited to a single payment limitation. Accordingly, in the question raised, the four trusts are to be regarded as the same person and limited to a single payment limitation.

Signed at Washington, D.C., on March 21, 1973.

KENNETH E. FRICK,  
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.73-6011 Filed 3-28-73; 8:45 am]

**CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE**

**SUBCHAPTER H—DETERMINATION OF WAGE RATES**  
[Docket No. SH-312]

**PART 862—WAGE RATES: SUGAR BEETS**

The Sugar Act requires sugarbeet producers, as one of the conditions with which they must comply to be eligible for government payments under the act, to pay all workers employed in the production, cultivation, and harvesting of sugarbeets in full at not less than mini-

mum wage rates determined by the Secretary of Agriculture to be fair and reasonable. Such determination may not be made until after investigation and opportunity for interested persons to testify on whether the wage rates established under the previous year's determination continue to be fair and reasonable or whether such determination should be amended. Public hearings were held in five locations during the period December 4-13, 1972.

The determination, which becomes effective on April 9, 1973, increases the minimum wage rate for specified hand labor operations performed on a time basis by 15 cents to \$2.15 per hour, and the minimums for work performed on a piecework basis are increased by rates ranging from \$1 to \$2.50 per acre. In addition, the new determination expands the provision for "payment of wages" to require that the worker receive payment upon completion of each hand labor operation on a farm unless other arrangements have been agreed upon between the producer and worker. Prior determinations have provided that the producer shall have paid the worker upon completion of work, but not necessarily upon completion of each operation performed.

Pursuant to the provisions of section 301(c)(1) of the Sugar Act of 1948, as amended (herein referred to as "act"), after investigation and consideration of the evidence obtained at the public hearings held during December 1972, the following determination is hereby issued.

The regulations previously appearing in these sections under "Determination of Wage Rates: Sugarbeets" remain in full force and effect as to the crops to which they were applicable.

Sec. 862.9 General requirements.  
862.10 Wage rates.  
862.11 Compensable working time.  
862.12 Applicability of wage requirements.  
862.13 Payment of wages.  
862.14 Evidence of compliance.  
862.15 Employment of workers through a labor contractor or crew leader.  
862.16 Subterfuge.  
862.17 Claim for unpaid wages.  
862.18 Failure to pay all wages in full.  
862.19 Child labor.  
862.20 Checking compliance.

**AUTHORITY:** Secs. 862.9 to 862.20 issued under secs. 301, 403, 61 Stat. 929, as amended, 932; 7 U.S.C. 1131, 1153.

**§ 862.9 General requirements.**

A producer of sugarbeets shall be deemed to have complied with the wage provisions of the act if all persons employed on the farm in the production, cultivation, or harvesting of sugarbeets, as provided in § 862.12, shall have been paid in accordance with the following:

**§ 862.10 Wage rates.**

All such persons shall have been paid in full for all such work and shall have been paid wages therefor at rates required by existing legal obligations, regardless of whether those obligations

resulted from an agreement (such as a labor union agreement) or were created by State or Federal legislative action, or at rates as agreed upon between the producer and the worker, but not less than the following, which shall become effective on April 9, 1973, and shall remain in effect until amended, superseded, or terminated:

(a) When employed on a time basis: For the hand labor operations of thinning, hoeing, hoe-trimming, blocking and thinning, weeding, pulling, topping, loading, or gleaning: \$2.15 per hour: *Provided*, That for workers 14 or 15 years of age the hourly rate specified herein may be reduced by not more than 15 percent.

(b) When employed on a piecework basis for the hand labor operations in the following table:

Hand labor operations	Rate per acre
A. Thinning: Removing excess beets with a hoe only.....	\$15.50
B. Hoeing: Removing weeds and excess beets with a hoe only.....	20.00
C. Hoe-trimming: Removing weeds with a hoe and by hand and removing excess beets with a hoe only.....	24.00
D. Weeding: Removing weeds with a hoe and by hand following either A, B, or C above, E below, or following the operation specified in paragraph (c) of this section.....	13.00

and in the State of California only

E. Blocking and Thinning: Removing weeds and excess beets with a hoe and by hand.....

Wide row planting. The above rates and the rate provided for in paragraph (c) of this section may be reduced by not more than the indicated percentages for the following row spacing: 28 inches or more but less than 31 inches, 20 percent; 31 inches or more but less than 34 inches, 25 percent; 34 inches or more, 30 percent.

Narrow row planting. The above rates and the rate provided for in paragraph (c) of this section shall be increased by not less than the indicated percentages for the following row spacing: 19 inches or less but more than 16 inches, 25 percent; 16 inches or less, 35 percent.

(c) In the fields that have been completely machine-thinned and on which chemical herbicides have been applied, removing weeds with a hoe only may be employed as a first operation: *Provided*, That the applicable piecework rate therefor shall be not less than \$13 per acre.

(d) When employed on a piecework basis for hand labor operations not specified or defined, or for harvesting. The piecework rate for blocking and thinning in States other than California, weeding not qualified as a first operation under paragraph (c) of this section or not preceded by A, B, C, or E or paragraph (b) of this section, and any other hand labor operation involving the removal of beets or weeds which is not defined above, and for the operations of pulling, topping, loading, or gleaning, shall be as agreed upon between the producer and the worker: *Provided*, That the average hourly rate of earnings of each worker

## RULES AND REGULATIONS

for each operation shall be not less than \$2.15 per hour computed on the basis of the total time such worker is employed on the farm for such operations.

(e) When employed on a time or piecework basis for other operations. For all other operations in the production, cultivation, or harvesting of sugar beets for which no minimum rate is provided for herein, the rate shall be as agreed upon between the producer and the worker.

**§ 862.11 Compensable working time.**

For work performed under § 862.10, compensable working time includes all time which the worker spends in the performance of his duties except time taken out for meals during the workday. Compensable working time commences at the time the worker is required to start work in the field and ends upon completion of work in the field. However, if the producer requires the operator of mechanical equipment, or any other class of worker to report to a place other than the field, such as an assembly point, tractor shed, etc., located on the farm, the time spent in transit from such place to the field and from the field to such place is compensable working time. Any time spent in performing work directly related to the principal work performed by the worker, such as servicing equipment, is compensable working time. Time of the worker while being transported from a central labor recruiting point or labor camp to the farm is not compensable working time.

**§ 862.12 Applicability of wage requirements.**

The wage requirements of this part apply to all persons who are employed or who work on the farm in operations directly connected with the production, cultivation, or harvesting of sugar beets on any acreage from which sugar beets are marketed or processed for the production of sugar, or any acreage which qualifies as bonafide abandoned. Such persons include field overseers or supervisors while directing other workers, and those workers employed by a custom operator who performs the above services on the farm. The wage requirements are not applicable to persons who voluntarily perform work without pay on the farm for a religious or charitable institution or organization; inmates of a prison who work on a farm operated by the prison; truck drivers employed by a contractor engaged by the producer only in hauling sugar beets; members of a cooperative arrangement among producers for the exchange of labor to be performed by themselves or members of their families; persons who have an agreement with the producer to perform all work on a specified acreage in return for a share of the crop proceeds if such share, including the share of any Sugar Act payments, results in earnings at least as much as would otherwise be received in accordance with the requirements of this part for the work performed; custom operators and members of their immediate families; or workers performing services which are indirectly connected with the

production, cultivation, or harvesting of sugar beets, including but not limited to mechanics, welders, and other maintenance workers and repairmen.

**§ 862.13 Payment of wages.**

(a) The producer shall make payment of wages in accordance with the following requirements: (1) Workers shall be paid by check or in currency for all work performed, and shall be paid upon completion of each hand labor operation performed on the farm unless some other arrangement is agreed upon by the producer and worker and acknowledged in writing signed by the worker; (2) deductions from payments are permitted and may be made for cash advances made only by producers to workers and, in reasonable amounts agreed upon by the producer and worker, for items furnished by the producer such as meals and transportation, and for mandatory deductions or withholdings required by law; (3) deductions may not be made from wages for payment of debts originally incurred with someone other than the producer, except as required and provided under applicable garnishment statutes or by other legal process; and (4) deductions may not be made for payment to a labor contractor or supervisor for his services, or for any items which the producer agreed to furnish the worker free of charge.

(b) The producer shall furnish the worker at the time of payment of wages or, if payment of wages is made through a labor contractor or crew leader, require the labor contractor or crew leader to furnish the worker at the time of payment of wages a statement showing the producer's and worker's names, the gross earnings, the items and amounts of deductions, and the net earnings of the worker, and the producer or the labor contractor or crew leader shall obtain the worker's signature acknowledging receipt of the amount of wages received which shall in no event be less than that required by this part.

**§ 862.14 Evidence of compliance.**

Each producer subject to the provisions of this part shall keep and preserve, for a period of 3 years following the date on which his application for a Sugar Act payment is filed, such wage records as will demonstrate that each worker has been paid in full in accordance with the requirements of this part. Wage records should set forth dates work was performed, the class of work performed, units of work (piecework or hours), agreed upon rates per unit of work, total earnings, and any permissible deductions, and the amount paid each worker. The producer shall furnish upon request to the appropriate Agricultural Stabilization and Conservation County Committee such records or other evidence as may satisfy such committee that the requirements of this part have been met.

**§ 862.15 Employment of workers through a labor contractor or crew leader.**

(a) If a producer employs workers through a labor contractor or crew

leader, the producer may make payment of workers' wages through such labor contractor or crew leader: *Provided*, That the producer obtain from such contractor or crew leader and have on file (1) a written record that he is registered or licensed as derived from examination of a valid certificate of registration or a farm labor contractor employee identification card; (2) a copy of his authorization signed by each worker to collect wages due each such worker; (3) a copy of each worker's statement of earnings as required by § 862.13, or a wage record sheet such as the "Wage Record Sheet Sugarbeet Program" shown in Exhibit 9 of Handbook 1-SU, available in county ASCS offices, showing the names of the producer and workers, dates work was performed, description of work performed, units of work, agreed upon rates per unit, and the amounts of wages due each such worker; and (4) the signature of each worker acknowledging receipt of wages received which shall in no event be less than those required by this part. The producer is responsible for paying to the labor contractor or crew leader the fee for his services, and the producer shall have on file a statement signed by the labor contractor or crew leader showing the amount of the fee being paid by the producer to the labor contractor or crew leader for his services, and showing that such fee is over and above the wages agreed upon by the contractor and the producer which shall in no event be less than those provided by this part.

(b) Responsibility for insuring that workers actually receive the minimum wage or the agreed upon wage, whichever is higher, less only deductions authorized by this part, rests with the producer. Whenever it appears that a worker has received less than the minimum or agreed upon wage, whichever is higher, less deductions authorized by this part, the producer shall not have met the requirements of this part for eligibility for payment under the act until it is determined that all workers on the farm have been paid in full: *Provided, however*, That a producer who having acted in good faith to fulfill his obligation to insure that the minimum or agreed upon wage is actually received by the workers, has obtained and has on file documents which meet the requirements set forth in paragraph (a) of this section and which show payment of wages in accordance with this part, shall have met the requirements of this part, except that in cases where the worker files a claim in the county ASCS office that he has not been paid wages in accordance with this part and it is found by the county committee that the worker's signature has been forged or he has been forced to sign under duress or by fraud, the producer shall not have met the requirements of this part for eligibility for payment under the act until the county committee determines that all workers on the farm have been paid in full.

#### § 862.16 Subterfuge.

The producer shall not reduce the wage rates to workers below those determined herein, through any subterfuge or device whatsoever.

#### § 862.17 Claim for unpaid wages.

Any person who believes he has not been paid in accordance with this part may file a wage claim with the Agricultural Stabilization and Conservation Service County Office against the producer on whose farm the work was performed. Detailed instructions and wage claim forms are available at the county ASCS office. Such claim must be filed within 2 years from the date the work with respect to which the claim is made was performed. Upon receipt of a wage claim the county ASCS office shall thereupon notify the producer against whom the claim is made concerning the representation made by the worker. The county ASC committee shall arrange for such investigation as it deems necessary and the producer and worker shall be notified in writing of its recommendations for settlement of the claim. If either party is not satisfied with the recommended settlement, an appeal may be made to the State Agricultural Stabilization and Conservation Service Office. The address of the State ASCS Office will be furnished by the local county ASCS office. Upon receipt of the appeal the State ASC committee shall likewise consider the facts and notify the producer and worker in writing of its recommendations for settlement of the claim. If the recommendation of the State ASC committee is not acceptable, either party may file an appeal with the Deputy Administrator, State and County Operations, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C. 20250. All such appeals shall be filed within 15 days after the date the written notice of the recommended settlement is mailed by the respective committee, otherwise such recommended settlement will be applied in making payments under the act. If a claim is appealed to the Deputy Administrator, State and County Operations, his decision shall be binding on all parties insofar as payments under the act are concerned. Appeals procedures are set forth and explained fully in Part 780 of this title.

#### § 862.18 Failure to pay all wages in full.

(a) Notwithstanding the provisions of this part requiring that all persons employed on the farm in the production, cultivation, or harvesting of sugar beets be paid in full for all such work as one of the conditions to be met by a producer for payment under the act, if the producer has failed to meet this condition but has met all other conditions, a portion of such payment representing the remainder after deducting from the payment the amount of accrued unpaid wages, may be disbursed to producer(s) upon a determination by the county committee (1) that the producer had made

full disclosure to the county committee or its representatives of any known failure to pay all workers on the farm wages in full as a condition for payment under the Sugar Act; and (2) that either (1) the failure to pay all workers their wages in full was caused by the financial inability of the producer, or (2) the failure to pay all workers in full was caused by an inadvertent error or was not the fault of the producer or his agent, and the producer has used reasonable diligence to locate and to pay in full the wages due all such workers. If the county committee makes the determination as heretofore provided in this section, such committee shall cause to be deducted from the payment for the farm the full amount of the unpaid wages which shall be paid promptly to each worker involved if he can be located, otherwise the amount due shall be held for his account, and the remainder of the payment for the farm, if any, shall be made to the producer. If the county committee determines that the producer did not pay all workers in full because of an inadvertent error that was not discovered until after he received his Sugar Act payment, the producer shall be placed on the claims control record for the total amount of the unpaid wages.

(b) Except as provided in paragraph (a) of this section, if upon investigation the county committee determines that the producer failed to pay all workers on the farm the required wages, the entire Sugar Act payment with respect to such farm shall be withheld from the producer until such time as evidence is presented to the county committee which will satisfy the county committee that all workers have been paid in full the wages earned by them, or if unpaid workers cannot be located and the county committee determines that the producer used reasonable diligence to locate such workers, the amounts of unpaid wages shall be deducted from the Sugar Act payment computed for the farm and the balance released to the producer after the expiration of 1 year from the date payment would otherwise be made. If payment has been made to the producer prior to the county committee's determination that all workers on the farm have not been paid in full, the producer shall be placed on the claims control record for the total payment until the county committee determines that all workers on the farm have been paid in full, the producer refunds the entire amount of the debt, or a setoff in the amount of the debt is made from a program payment otherwise due the producer, or the county committee after determining that the producer used reasonable diligence to locate such workers has recovered from such producer the amount of unpaid wages computed for the farm.

#### § 862.19 Child labor.

Notwithstanding any of the foregoing provisions of this part, the act provides that the employment of workers under

14 years of age, or the employment of workers 14 and 15 years of age for more than 8 hours per day (except a member of the immediate family of a person who was the legal owner of not less than 40 percent of the crop at the time work was performed), will result in a deduction from Sugar Act payments to the producer.

#### § 862.20 Checking compliance.

The procedures to be followed by county ASCS offices in checking compliance with the wage requirements of this part are set forth under the applicable sections of Handbook 1-SU issued by the Deputy Administrator, State and County Operations, ASCS. Copies of Handbook 1-SU may be inspected at local county ASCS offices and copies may be obtained from State Agricultural Stabilization and Conservation Service offices. The address of the State ASCS office will be furnished by the local county ASCS office.

#### STATEMENT OF BASES AND CONSIDERATIONS

*General.* The foregoing determination provides fair and reasonable wage rates to be paid for work performed by persons employed on the farm in the production, cultivation, or harvesting of sugar beets as one of the conditions with which producers must comply to be eligible for payments under the act.

*Requirements of the act and standards employed.* Section 301(c)(1) of the act requires that all persons employed on the farm in the production, cultivation, or harvesting of sugar beets with respect to which an application for payment is made, shall have been paid in full for all such work, and shall have been paid wages therefor at rates not less than those that may be determined by the Secretary to be fair and reasonable after investigation and due notice and opportunity for public hearing; and in making such determination the Secretary shall take into consideration the standards therefor formerly established by him under the Agricultural Adjustment Act, as amended (i.e., cost of living, prices of sugar and by-products, income from sugar beets and cost of production), and the differences in conditions among the various sugar-producing areas.

*Wage determination.* This determination differs from the prior determination in that the minimum wage rate for specified hand labor operations performed on a time basis is increased 15 cents to \$2.15 per hour; and minimum piecework rates are increased \$1 per acre for thinning and for hoeing, \$1.50 per acre for hoe-trimming, \$1 per acre for weeding, and \$2.50 per acre for blocking and thinning (applicable only in the State of California). In addition, the grower is required to make payment of wages to a worker upon completion of each hand labor operation on the farm. Other provisions of the prior determination continue unchanged.

Public hearings were held in Ann Arbor, Mich.; Fargo, N. Dak.; Billings, Mont.; San Francisco, Calif.; and Mer-

cedes, Tex., during the period December 4 through December 13, 1972. These hearings afforded interested persons the opportunity to present testimony and make recommendations relating to fair and reasonable wage rates for sugar beet workers. Testimony was presented by representatives of both sugar beet producers and workers.

Producer representatives generally recommended that the minimum hourly and piecework wage rates established in 1972 remain unchanged for 1973. One representative suggested that any increase in minimum wages be comparable to the increase in returns to growers from sugar beets.

Representatives of producers in two large producing areas recommended that present hand labor operations be retained intact. A representative of producers in one region found the Department's proposal on hand labor operations acceptable, except that he suggested the definition for weeding read, in part, "... machine thinned and/or on which chemical herbicides have been applied."

Producer representatives recommended against adoption of a proposal that workers be paid upon completion of work on a farm, or every 2 weeks, whichever occurs first, for the following principal reasons: (1) State laws covering payment of wages are already adequate, and a change in the present procedure would result in Federal-State conflicts; (2) a majority of the workers desire to have some of their earnings held back for various reasons; and (3) more bookkeeping would be required of the producer which would increase the possibility of errors in making final settlement with workers.

Producer representatives recommended that no change be made in the present method of repayment of cash advances by the worker. One representative testified that settlement procedures on cash advances are best handled at the local level between workers and employers.

One producer representative recommended that weeding be allowed as a first operation on beets planted to a stand, and another recommended the addition of a weeding operation at a \$5 rate for relatively clean fields to be performed late in the season without reference to the method of removing weeds.

Representatives of workers recommended that the minimum hourly wage be increased to rates ranging from \$2.50 to \$3.50. Several workers stated that they had no recommendation on wage rates, and that the 1972 determination was satisfactory. One worker representative recommended the following piecework operations and rates per acre:

Thinning .....	\$16.00
Thinning and weeding (Combine present B and C categories and restrict to hoe only) .....	24.00
Blocking and thinning (Make nationwide instead of California only) .....	34.00
Weeding (Fields machine thinned and herbicide treated or as a second operation) .....	13.00

Affidavits from 34 sugar beet workers represented by the United Farm Workers suggested the following range of piecework rates for the hand labor operations proposed for consideration in the Department's notice of hearings:

Thinning .....	\$15.50 to \$18
Thinning and weeding .....	\$21.50 to \$25
Weeding .....	\$24.50 to \$27

A witness for the United Farm Workers also recommended that a written contract, which states the work to be performed and the wage rate, be required between producers and workers. He testified that such a procedure would eliminate many problems which accrue under the current practice of verbal contracts. Other worker representatives expanded this proposal to stipulate that contracts be bilingual, i.e., English-Spanish or English-Navajo, and that additional conditions of employment such as housing be included. Worker representatives testified that adoption of written contracts would make the wage claim procedures provided in the wage determination more effective.

One worker representative recommended that the Department formulate and enforce housing regulations; that 5 percent interest on unpaid wages (from date grievance is filed) be paid to a worker by an employer should the Department rule in favor of the worker's claim; that 7 percent interest be charged to a grower who does not pay wages determined to be due a worker, and this amount plus the unpaid wages be deducted from the Sugar Act payment due the grower; and that when the entire Sugar Act payment is withheld from a grower due to intentional failure to pay the required wages, the money be put into a fund to pay workers unpaid wages in subsequent years.

Several worker representatives proposed a restructuring of county ASC committees to include a worker or worker representative, or an impartial third party mutually acceptable to workers and producers, for the purpose of assuring fairness in the handling of wage claims made by workers. One worker representative asked for provisions to prevent retaliatory acts by growers against workers for filing grievance claims.

Worker representatives supported the proposed changes in hand labor categories and the proposal that workers be paid upon completion of work on a farm or every 2 weeks, whichever occurs first. These representatives also supported the prorating of cash advances over the period of employment. One representative recommended that written contracts be required when cash advances are involved; and failing this, that cash advances not be deducted from wages but paid by the worker to the producer when final payment of wages is made.

Supplemental briefs submitted on behalf of workers concurred in most of the worker recommendations made at the hearings. In addition, it was recommended that the Department set a minimum wage rate of \$2.50 per hour, and

that piece rate incentives be built into the \$2.50 minimum whereby a worker could earn more than the minimum for good work.

Consideration has been given to all recommendations and testimony presented at the public hearings; to the returns, costs, and profits of producing sugar beets obtained by field survey for a prior crop and recast in terms of price and production conditions likely to prevail for the 1973 crop; and to other standards generally considered in wage determinations, including the cost of living and the producers' ability to pay wages.

A principal purpose of the Sugar Act is to protect the welfare of those engaged in the domestic sugar-producing industry. The Act, through a system of conditional payments to growers, assures that all parties engaged in the production and processing of sugar crops share equitably in the proceeds of the industry. Conditional payments act as an incentive to growers to adjust their production to quota and carryover needs. This payment system also has three other objectives: (1) To provide adequate income to growers; (2) to assure growers and fieldworkers a fair sharing of returns to the industry; and (3) to prevent the employment of child labor in fieldwork. The sharing of returns between growers and fieldworkers is accomplished by requiring growers to pay fieldworkers in full for work performed and at rates not less than those determined by the Secretary to be fair and reasonable.

Worker representatives recommended that the minimum hourly wage rate be increased by amounts ranging from 50 cents to \$1.50, and that minimum piecework rates be increased by amounts from \$2 per acre upward. Producer representatives generally recommended that wage rates remain unchanged. This determination increases the minimum wage rate for work performed on a time basis by 15 cents per hour, and the minimum piecework rates for the five specified hand labor operations by amounts ranging from \$1 to \$2.50 per acre. These increases average about 7.5 percent.

The cost of living rose 3.3 percent in 1972 as compared to 1971. However, the cost of food and apparel—the basic items purchased by migratory families—increased 4.1 percent. It is anticipated that the cost of living, and especially the cost of food and apparel, will increase somewhat more during 1973 because of the relaxed economic controls now in effect. The increase in minimum wage rates established in this determination will more than offset the continuing rise in the cost of the most essential items needed by sugar beet fieldworkers. The earnings of all workers on sugar beet farms are expected to average about \$2.29 per hour in 1973, or about 34 cents more than the projected average general farm wage rate in States where sugar beets are grown.

Due to rising net returns from sugar sales, improved yields of beets per planted acre, and reduced requirements for hand labor, producers on average

have had profitable crops in recent years. Growers generally will not receive their final payment for 1972-crop sugar beets until after September 30, 1973, the end of the marketing year for 1972-crop beet sugar in most regions. It is anticipated that net returns from the sale of 1972-crop sugar will increase moderately above the net proceeds realized by beet sugar processors from the 1971 crop, and producers on average are expected to have the most profitable sugar beet crop since 1947—the first crop year for which data were obtained by the Department on the returns, costs and profits of sugar beet production.

Based on average yields and sucrose content of beets for recent years, a level of plantings slightly higher than in 1972, expected net returns from sugar sales, and anticipated prices to be paid by sugar beet producers for wages and other production costs, producers' profit (management income) from the 1973 crop is expected to be somewhat less favorable than from the exceptional 1972 crop. The principal reasons for the expected reduction in profit in 1973 as compared to 1972 are the lower anticipated yields (based on 5-year averages), higher prices for supplies and services, the increases in wages to workers provided by this determination, and related factors.

Some producers in several sections of the sugar beet area were unable to harvest all of their 1972 crop sugar beets because of adverse weather conditions. The ability of these producers to pay higher wages in 1973 will definitely be impaired, but the anticipated results of the 1972 crop for all producers on average, along with the prospective price and production conditions for the 1973 crop, indicate that producers will have the ability to pay the minimum wage rates established in this determination.

Actual results of the 1972 crop should be known early in 1974. Representatives of the Department are currently engaged in a survey of the 1972 crop, and it is anticipated that the data collected in the field study will be available for consideration prior to issuance of the 1974 wage regulation.

The notice of hearings on the matter of wage rates for sugar beet fieldworkers requested witnesses to offer testimony on several proposed changes which the Department had been considering. The first proposal was to reduce the number of hand labor operations and redefine them so as not to specify the method of removing beets or weeds (with a hoe or by hand). Worker representatives generally supported this proposal or some other type of change in the hand labor categories. Producer representatives generally opposed any change in the operations, but two witnesses recommended additional categories. Neither the proposal nor other recommendations concerning hand labor operations have been adopted. A review of Child Labor and Wage Compliance Reports, obtained by county ASCS offices through spot checks of about 10 percent of all sugar beet farms, indicate that each operation spec-

ified in the determination is widely used in various regions of the sugar beet area. Adoption of the proposed changes in the operations could simplify a somewhat complex set of work categories currently in use. However, it is believed that any change would upset well established regional practices to which both producers and workers have become accustomed over the years. The Department believes that the disadvantages outweigh any gains that might accrue from a change. It is also believed that the specified operations offer sufficient variety for the most common practices in use, and that additional operations are not necessary.

The second proposal would require that the worker be paid upon completion of work on a farm or every 2 weeks, whichever occurs first. Worker representatives supported this proposal because of difficulties sometimes encountered by workers due to long intervals between wage payments. Producer representatives opposed such a requirement. The proposal, with some modification, has been adopted. Because several weeks usually lapse between the completion of a first hand labor operation and the weeding operation, it is believed that the worker should be paid upon completion of each hand labor operation on a farm unless the producer and worker agree in writing to a different arrangement. The portion of the proposal concerning payment "every 2 weeks" has not been adopted, since the completion of a single hand operation on a farm seldom takes more than 2 weeks. The proposal as adopted should alleviate any problems which may have been encountered by workers in the past, yet should not present any difficulty to producers. The wage compliance procedures contained in Handbook 1-SU will also be strengthened to ensure compliance with applicable existing State regulations with respect to the payment of wages at certain specified time intervals.

The final proposal contained in the notice of hearings would require that any cash advances made to a worker by the producer be deducted from the worker's earnings on a pro rata basis each pay period. Worker representatives supported such a requirement, while growers strongly objected to the proposal. The adoption of such a requirement would likely benefit workers in cases where the worker might find it difficult to repay a loan in full after he completes work on a farm. However, it is believed that problems encountered by producers and workers regarding settlement procedures for cash advances are neither serious nor wide-spread. It is also believed that it would be to the worker's disadvantage if guidelines were established for handling cash advances, since the grower would likely be much less inclined to advance money to the worker prior to the worker's departure from his home base. If employers are unwilling to make advances to workers, then employment opportunities of workers will be ad-

versely affected. Furthermore, weather conditions would sometimes prevent the worker from earning a sufficient amount of money in a specific period to pay his living costs and to also make payments under such guidelines. Therefore, the proposal has not been adopted. However, the wage compliance procedures contained in Handbook 1-SU will be strengthened to insure compliance with applicable existing State regulations on the matter of cash advances.

The recommendation that workers have a representative on ASC committees for the purpose of resolving wage disputes has not been adopted. The Department strongly believes that adoption of this proposal would eliminate an equitable and workable means of resolving wage claims. A recent analysis of wage claims filed with local ASC committees indicates that the claim of the worker is generally upheld. After eliminating those cases withdrawn by the worker prior to a decision by the committee and those cases disposed of by compromise between the worker and producer, the claim of the worker was upheld in about 75 percent of the cases. It is believed that this is indicative of the effectiveness of the State and county farmer committee system in handling worker's wage claims.

Worker representatives also recommended that housing regulations be formulated and enforced. The adoption of this proposal would benefit workers in those instances where the grower provides inadequate housing, water, and sanitary facilities. As pointed out earlier in this statement of bases and considerations, the benefits of the U.S. sugar program are divided among producers and workers as well as others engaged in the industry. In insuring a fair division of the benefits of the sugar program, the Department takes the view that workers should receive their benefits in the form of cash wages. When the worker receives a fair and reasonable cash wage he is then free to choose for himself whether to live in housing provided by the producer or to make other arrangements for himself. Furthermore, the Department deems it advisable to avoid the duplication of efforts among government agencies wherever possible. For those producers who voluntarily furnish housing to their employees, such housing is subject to the housing and sanitary regulations issued under the Occupational Safety and Health Act of 1970, for which the Department of Labor is responsible. The further enforcement of that Act by this Department with respect to sugar farms would be an unwarranted duplication of effort.

The recommendations made by worker representatives concerning the payment of interest to workers who file claims, and the charge of interest to growers who do not pay wages due a worker have not been adopted. The Department believes that the current provisions regarding failure to pay all wages in full are sufficiently stringent to prevent

deliberate nonpayment of wages. The recommendation that a grower's entire Sugar Act payment, when withheld due to intentional failure to pay the required wages, be put into a fund to pay workers unpaid wages in subsequent years has also not been adopted. This determination continues the provisions for either withholding the entire payment until the producer proves that all workers have been paid in full, or releasing after 1 year the balance of the payment after deducting the amounts of unpaid wages for workers who cannot be located. It is believed that these penalties provide adequate safeguards for those workers whose wages may have been intentionally withheld by producers.

The recommendation that the Department require written contracts before any work is performed on a farm has not been adopted. The execution of written contracts would benefit both the worker and producer, in that both parties would have written evidence of the terms of their agreement. However, the Department believes it inadvisable to impose a general requirement that employers must enter into a written contract. Such a requirement would be unduly restrictive on the freedom of action of both workers and employers. Over the years, the Department has repeatedly recommended the advantages of written contracts and continues to strongly encourage their use to minimize the chances for misunderstandings.

The recommendation that the Department prohibit retaliatory acts by growers against workers for filing grievance claims has not been adopted. A producer must pay the worker in full for work performed whether such work was satisfactory or not, but the producer need not retain his services under these regulations. The Department believes that retaliation against a worker by a grower would be extremely difficult to substantiate. Moreover, such a provision would be equally difficult to administer in an impartial manner, and could engage administrative personnel to such an extent that other provisions of the Sugar Act could not be properly administered.

This determination is issued on a continuing basis and will remain in effect until amended, superseded, or terminated. However, the Department will keep the wage situation under review and will conduct investigations and hold hearings annually.

On the basis of an examination of all relevant factors, the provisions of this determination are deemed to be fair and reasonable. Accordingly, I hereby find and conclude that the foregoing wage determination will effectuate the wage provisions of the Sugar Act of 1948, as amended.

Note: The recordkeeping and reporting requirements of these regulations have been approved by, and subsequent recordkeeping and reporting requirements will be subject to the approval of the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

Effective date. This determination shall become effective on April 9, 1973.

Signed at Washington, D.C., on March 22, 1973.

KENNETH E. FRICK,  
Administrator, Agricultural Stabilization and Conservation Service.

#### CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Orange Reg. 71, Amdt. 8]

#### PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

##### Limitation of Shipments

This amendment lowers the minimum grade and size requirements on the handling of Temple oranges and the minimum size requirements on the handling of Murcott Honey oranges, grown in the production area in Florida. A determination as to the need for less restrictive requirements on shipments of Temple and Murcott Honey oranges was based upon all available information on market prices for oranges, level of supplies on hand at the principal markets, maturity, condition, and available supply of regulated varieties in the production area.

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of Temple and Murcott Honey oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The recommendation by the Growers Administrative Committee for less restrictive grade and size limitations on fresh shipments of Temple oranges is consistent with the external appearance and remaining supply of smaller size fruit in the production area and the current and prospective demand for such fruit by fresh market outlets. The minimum size requirement specified for Murcott Honey oranges is consistent with the available supply of and current and prospective demand for such smaller sizes of Murcott Honey oranges by fresh market outlets.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this

amendment until 30 days after publication in the FEDERAL REGISTER. (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of Temple and Murcott Honey oranges grown in Florida.

Order. The provisions of paragraph (5), (6), and (8) of § 905.545 (Orange Regulation 71; 37 FR 21799, 24432, 25036, 27619, 28606; 38 FR 3396, 4569, 7565) are amended to read as follows:

§ 905.545 Orange Regulation 71.

(a) \* \* \*

(5) Any Temple oranges, grown in the production area, which do not grade at least U.S. No. 1 Golden;

(6) Any Temple oranges, grown in the production area, which are of a size smaller than 2 1/4 in. in diameter, except that a tolerance of 10 percent, by count, of Temple oranges smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in said U.S. Standards for Florida oranges and tangelos;

(7) \* \* \*

(8) Any Murcott Honey oranges, grown in the production area, which are of a size smaller than 2 1/4 in. in diameter, except that a tolerance of 10 percent, by count, of Murcott Honey oranges smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in said U.S. Standards for Florida oranges and tangelos.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated March 23, 1973, to become effective March 26, 1973.

FLOYD F. HEDLUND,  
Director, Fruit and Vegetable  
Division, Agricultural Mar-  
keting Service.

[FR Doc. 73-6012 Filed 3-28-73; 8:45 am]

[Tangerine Reg. 44, Amdt. 5]

**PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA**

**Limitation of Shipments**

This amendment lowers the minimum grade and size requirements on the handling of tangerines grown in the production area in Florida. A determination as to the need for less restrictive grade and size requirements on shipments of tangerines was based upon all available information on market prices for tangerines, level of supplies on hand at the principal markets, condition, and available supply of regulated varieties in the production area.

**Findings.** (1) Pursuant to the marketing agreement, as amended, and Order No. 905, as amended (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The recommendation by the committee for less restrictive grade and size limitations on fresh shipments of tangerines is consistent with the external appearance and remaining supply of smaller size tangerines in the production area and the current and prospective demand for such fruit by fresh market outlets. The regulation is necessary to ensure a supply of the preferred grades and sizes to consumers.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of tangerines grown in Florida.

Order. The provisions of paragraph (a) (1) and (2) of § 905.547 (Tangerine Regulation 44; 37 FR 21799, 24432, 24189, 25914, 27619), are amended to read as follows:

§ 905.547 Tangerine Regulation 44.

(a) \* \* \*

(1) Any tangerines, grown in the production area, which do not grade at least U.S. No. 2; or

(2) Any tangerines, grown in the production area, which are of a size smaller than 2 1/4 in. in diameter, except that a tolerance of 10 percent, by count, of tangerines smaller than such minimum diameter shall be permitted, which tolerance shall be applied in accordance with the provisions for the application of tolerances specified in the U.S. Standards for Florida tangerines.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 23, 1973, to become effective March 26, 1973.

FLOYD F. HEDLUND,  
Director, Fruit and Vegetable  
Division, Agricultural Mar-  
keting Service.

[FR Doc. 73-6013 Filed 3-28-73; 8:45 am]

[Navel Orange Reg. 294]

**PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

**Limitation of Handling**

This regulation fixes the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period March 30-April 5, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907. The quantity of Navel oranges so fixed was arrived at after consideration of the total available supply of Navel oranges, the quantity currently available for market, the fresh market demand for Navel oranges, Navel orange prices, and the relationship of season average returns to the parity price for Navel oranges.

§ 907.594 Navel Orange Regulation 294.

(a) **Findings.** (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel Oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Navel oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Navel orange industry.

(i) The Committee has submitted its recommendation with respect to the quantities of Navel oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The Committee further reports that the fresh market demand for Navel oranges remained active this week, with prices somewhat higher than a week ago. Prices f.o.b. averaged \$3.87 a carton on a reported sales volume of 822 cartons last week, compared with an average f.o.b. price of \$3.75 per carton and sales of 836 cartons a week earlier. Track and rolling supplies at 301 cars were up 66 cars from last week.

(ii) Having considered the recommendation and information submitted by the Committee, and other available information, the Secretary finds that the respective quantities of Navel oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The Committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation, including its effective time, are identical with the aforesaid recommendation of the Committee, and information concerning such provisions and effective time has been disseminated among handlers of such Navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such Committee meeting was held on March 27, 1973.

(b) **Order.** (1) The respective quantities of Navel oranges grown in Arizona and designated part of California which may be handled during the period March 30, 1973, through April 5, 1973, are hereby fixed as follows:

- (i) District 1: 745,174 cartons;
  - (ii) District 2: 400,000 cartons;
  - (iii) District 3: Unlimited movement.
- (2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 28, 1973.

CHARLES R. BRADDER,  
Acting Deputy Director, Fruit  
and Vegetable Division, Agri-  
cultural Marketing Service.

[Valencia Orange Reg. 423]

**PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

**Limitation of Handling**

This regulation sets a minimum size requirement on the handling of California-Arizona Valencia oranges grown in

the production area during the period March 30 through April 26, 1973. A determination as to the need for regulation of shipments of Valencia oranges was based upon all available information on market prices for oranges, level of supplies at the principal markets, maturity, condition, and available supply of Valencia oranges in the production area, and the relationship of season average returns to the parity price for California-Arizona Valencia oranges.

§ 908.723 Valencia Orange Regulation 423.

(a) **Findings.** (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The recommendation by the Valencia Orange Administrative Committee reflects its appraisal of the crop and current and prospective marketing conditions during the period March 30 through April 26, 1973. The committee now estimates that the 1972-73 season crop of Valencia oranges will be 58,000 cartons. It further estimates that the demand in regulated market channels will require about 43 percent of this volume, and the remaining 57 percent will be available for utilization in export, processing, and other outlets. The volume and size composition of the crop are such that ample supplies of the more desirable sizes are available to satisfy the demand in regulated channels. Equivalent fresh on-tree returns for California-Arizona Valencia oranges averaged \$1.95 per carton for the season through February 1973 or 82 percent of the equivalent parity price. The regulation herein specified is designed to permit shipment of ample supplies of fruit of the more desirable sizes in the interest of both growers and consumers. The action is necessary to maintain orderly marketing conditions, provide consumer satisfaction, and guard against the shipment of undesirable sizes of Valencia oranges which tend to demoralize the market for later shipments of such fruit. The regulation therefore is consistent with the objective of the act of promoting orderly marketing, maintaining grower returns, and protecting the interest of consumers.

(3) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section

until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on March 20, 1973.

(b) **Order.** (1) During the period March 30 through April 26, 1973, no handler shall handle any Valencia oranges grown in the production area which are of a size smaller than 2.20 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit: *Provided*, That not to exceed 5 percent, by count, of the Valencia oranges contained in any type of container may measure smaller than 2.20 inches in diameter.

(2) As used in this section, "handle," "handler," and "production area" shall have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated March 26, 1973, to become effective March 30, 1973.

PAUL A. NICHOLSON,  
Deputy Director, Fruit  
and Vegetable Division, Agri-  
cultural Marketing Service.

[FR Doc. 73-6039 Filed 3-28-73; 8:45 am]

[Valencia Orange Reg. 424]

**PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

**Limitation of Handling**

This regulation fixes the quantity of California-Arizona Valencia oranges that

may be shipped to fresh market during the weekly regulation period March 30-April 5, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

#### § 908.724 Valencia Orange Regulation 121.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee reports that during the week ended March 22, 1973, the average f.o.b. price for California-Arizona Valencia oranges was \$3.38 per carton on a sales volume of 212 cars compared to \$3.17 per carton on a sales volume of 136 cars for the previous week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the Federal Register (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became avail-

able and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation for regulation together with its supporting information has been submitted by the committee, however, the Secretary has modified the recommendation to provide for the shipment of a greater quantity of Valencia oranges, retaining the same effective date, and such information is being disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on March 27, 1973.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period March 30, 1973, through April 5, 1973, are hereby fixed as follows:

- (i) District 1: Unlimited;
- (ii) District 2: Unlimited;
- (iii) District 3: 350,000 cartons.

(2) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 28, 1973.

CHARLES R. BRADDER,  
Acting Deputy Director, Fruit  
and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 73-6263 Filed 3-28-73; 1:54 pm]

#### CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order 36; Docket No. AO 179-A37]

#### PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

##### Order Amending Order

*Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments there-

to; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in sec. 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who participated in a referendum and who during the determined representative period were engaged in the production of milk for sale in the marketing area.

##### ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area shall be in conformity to and in compliance

with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. In § 1036.61, a new paragraph (c-1) is added and paragraph (g) is revised as follows:

#### § 1036.61 Computation of uniform price.

(c-1) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

(g) For the months specified in paragraphs (h) and (i) of this section, subtract from the amount resulting from the computations pursuant to paragraphs (a) through (d) of this section an amount computed by multiplying the hundredweight of milk specified in paragraph (e) (2) of this section by the weighted average price plus 5 cents;

2. In § 1036.71, paragraph (a) (2) (ii) is revised as follows:

#### § 1036.71 Payments to the producer-settlement fund.

- (a) . . . .
- (2) . . . .

(ii) The value at the weighted average price applicable at the location of the plants from which received plus 5 cents with respect to other source milk for which a value is computed pursuant to § 1036.60 (e).

3. In § 1036.76, paragraph (b) (4) is revised as follows:

#### § 1036.76 Payments by handler operating a partially regulated distributing plant.

- (b) . . . .

(4) Multiply the remaining pounds by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price) and the weighted average price applicable at the location of the partially regulated distributing plant plus 5 cents (but not to be less than the Class III price); and

4. Immediately following § 1036.86, a new centerhead and new §§ 1036.110 through 1036.122 are added as follows:

##### ADVERTISING AND PROMOTION PROGRAM

#### § 1036.110 Agency.

"Agency" means the body made up of the persons selected pursuant to § 1036.113, which is authorized to expend funds, made available pursuant to § 1036.121 (b) (1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its

products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

#### § 1036.111 Composition of the Agency.

Each cooperative association or combination of cooperative associations as provided for under § 1036.113 (b) with 1.5 percent or more of the total participating producers (producers who have not requested refunds for the most recent quarter) is authorized one Agency member plus one additional Agency member for each additional full 5 percent of the participating producers it represents. Cooperative associations with less than 1.5 percent of the total participating producers that have elected not to combine pursuant to § 1036.113 (b), and participating producers who are not members of cooperatives are authorized to select from such group, in total, one Agency member for the first full 1.5 percent plus one additional Agency member for each additional full 5 percent that such producers constitute of the total participating producers. For the purpose of the Agency's initial organization, all producers shall be considered participating producers.

#### § 1036.112 Term of office.

The term of office of each member of the Agency shall be 1 year or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

#### § 1036.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more Agency members shall notify the market administrator of the name and address of each such member who shall serve at the pleasure of the cooperative.

(b) For the purpose of this section, cooperative associations may combine their participating producer members and, if such combined total is 1.5 percent or more of all participating producers, such cooperatives may select an Agency member(s) under the rules of § 1036.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than 1.5 percent of the total participating producers that have not elected to combine pursuant to paragraph (b) of this section shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this section, and annually thereafter, the market administrator shall notify such participating producers of their opportunity to nominate one or more producers as Agency members and shall

specify the number of members to be selected.

(2) Following the closing date for nominations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an Agency member thus elected subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

#### § 1036.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum and any action of the Agency shall require a majority of concurring votes of those present and voting.

#### § 1036.115 Powers of the Agency.

The Agency is empowered to:

- (a) Administer the terms and provisions of the advertising and promotion program within the scope of Agency authority pursuant to § 1036.110;
- (b) Make rules and regulations to effectuate the terms and provisions of the advertising and promotion program;
- (c) Recommend amendments to the Secretary; and
- (d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1036.110 and 1036.117.

#### § 1036.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

- (a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary and adopt and make public such rules as may be necessary for the conduct of its business;
- (b) Develop programs and projects pursuant to §§ 1036.110 and 1036.117;
- (c) Keep minutes, books, and records and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;
- (d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;
- (e) Employ and fix the compensation of any person deemed necessary to its exercise of powers and performance of duties;
- (f) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(g) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

**§ 1036.117 Advertising, research, education, and promotion program.**

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit all producers under this part;

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

**§ 1036.118 Limitation of expenditures by the Agency.**

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1036.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

**§ 1036.119 Personal liability.**

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever, to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

**§ 1036.120 Procedure for requesting refunds.**

Any producer may apply for refund subject to the conditions set forth in this section.

(a) Refund shall be accomplished only through application filed with, and in the manner prescribed by, the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June or September for

milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, and prior to the end of the ensuing calendar quarter may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all his marketings against which an assessment is withheld for the period from the date of his first marketing as a new producer through the end of such calendar quarter. *Provided:* That, such eligibility for refund shall not apply to a person who during the first 15 days of such December, March, June or September, was a producer under a Federal order under which the same refund notification period applied and he did not appropriately submit a refund application during such period. This paragraph also shall be applicable to all producers during the period between the effective date of this paragraph and the beginning of the first full calendar quarter for which the opportunity exists for such producer to request a refund pursuant to paragraph (b) of this section.

(d) A producer who, with respect to any calendar quarter, has appropriately filed request for refund of advertising and promotion program assessments on his marketings of milk under another Federal order shall be eligible (on the basis of his request filed under the other order) for refund with respect to his producer milk under this order against which an assessment is withheld during such quarter.

**§ 1036.121 Duties of the market administrator.**

Except as specified in § 1036.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this section, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1036.113(c);

(b) Set aside the amount subtracted under § 1036.61(c-1) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to a producer the amount of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producer but not more than 5 cents per

hundredweight of his milk for which deductions were made pursuant to § 1036.61(c-1).

(3) After the end of each calendar quarter, refund upon request pursuant to § 1036.120 to a producer the deductions applicable to his milk made pursuant to § 1036.61(c-1) for such calendar quarter, less the amount of any refund otherwise made to the producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this section, and thereafter with respect to a new producer, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1036.110 through 1036.122).

(d) Make necessary audits to establish that all Agency funds are used only for authorized purposes.

**§ 1036.122 Liquidation.**

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Effective date: On and after May 1, 1973, for §§ 1036.110 through 1036.122 and on and after July 1, 1973, for §§ 1036.61, 1036.71, and 1036.76, as here amended.

Signed at Washington, D.C., on March 23, 1973.

CLAYTON YEUTTER,  
Assistant Secretary.

[FR Doc.73-6010 Filed 3-28-73; 8:45 am]

[Milk Order 46]

**PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA**

**Order Suspending Certain Provisions**

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Louisville-Lexington-Evansville marketing area.

It is hereby found and determined that for the months of April through December 1973, the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In paragraph (d) of § 1046.44, the provision "or cream"; and

2. In the introductory text of paragraph (e) of § 1046.44, the provision, "located less than 250 airline miles as determined by the market administrator, from the nearer of the city halls in either Louisville, Ky., or Evansville, Ind.,".

**STATEMENT OF CONSIDERATION**

This suspension order will continue the effect of a current suspension which removes the automatic Class I classification of fluid cream transferred in bulk from a pool plant to a nonpool plant located more than 250 miles from the nearer of

the city halls in Louisville, Ky., or Evansville, Ind. Such transfers of cream will continue to be classified according to use as is now provided in the order for transfers to nonpool plants located within the 250-mile radius. The current suspension expires March 31, 1973.

The continuation of the current suspension was requested by Dairymen, Inc., a cooperative association representing a majority of the producers on the market. The suspension will continue to facilitate the removal of excess butterfat from the market by permitting cream to be classified as Class II milk if utilized in ice cream at plants located more than 250 miles from either Louisville, Ky., or Evansville, Ind.

It is hereby found and determined that 30 days' notice of the effective date here-

of is impractical, unnecessary, and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that it will facilitate the disposal of surplus milk from the market;

(b) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) This suspension continues the effect of a previous suspension of the same provisions. The elimination of the mileage factor in classifying fluid milk products was considered at the multilateral hearing held in Clayton, Mo., in July of 1970. A recommended decision issued on June 4, 1971, recommended the elimina-

tion of the mileage limitation. There is no indication of any opposition to this suspension providing additional time to complete pending amendatory procedures.

Therefore, good cause exists for making this order effective April 1, 1973.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of April through December 1973.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Effective date: April 1, 1973.

Signed at Washington, D.C., on March 23, 1973.

CLAYTON YEUTTER,  
Assistant Secretary.

## Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

### DEPARTMENT OF THE INTERIOR

#### Office of the Secretary

#### [ 43 CFR Part 25 ]

#### JOHNNY HORIZON

#### Use of Name and Symbol

Notice is hereby given that, in order to update the regulation to recognize organizational changes and a change in the Johnny Horizon symbol, and to provide for additional noncommercial uses, Part 25 of Subtitle A, Title 43, of the Code of Federal Regulations, it is necessary to revise Part 25.

It is the policy of the Department of the Interior whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed amendment to the National Coordinator, Johnny Horizon Program Office, Department of the Interior, Washington, D.C. 20240, on or before April 30, 1973.

RICHARD R. HITE,  
Deputy Assistant Secretary  
of the Interior.

MARCH 22, 1973.

Part 25 is amended to read as follows:

#### § 25.0-1 Purpose.

This subpart establishes rules for the commercial and noncommercial use of the "Johnny Horizon" name and symbol.

#### § 25.0-2 Objectives.

The objectives of these regulations are: (a) To maintain the integrity of the name and characterization of "Johnny Horizon"—the official symbol for a public service antilitter and environmental cleanup program; (b) to authorize the noncommercial use of the name or symbol; and (c) to provide for use or royalty fees for the manufacture, reproduction, or use of the name or symbol for commercial purposes.

#### § 25.0-3 Authority.

The act of September 25, 1970 (84 Stat. 870), authorizes the Secretary of the Interior to establish and collect use or royalty fees for the manufacture, reproduction, or use of the "Johnny Horizon" name and symbol. The Act makes unauthorized manufacture, reproduction, and use a crime (18 U.S.C. 714). The Act also provides that royalty and use fees will be deposited in a special account and used for the purpose of furthering nationwide antilitter campaigns.

#### § 25.0-5 Definitions.

As used in this part:

(a) The term "Johnny Horizon" means the name or characterization "Johnny Horizon" originated by the Bureau of Land Management, Department of the Interior, as the official symbol for a public service antilitter and environmental cleanup program, and as described in 18 U.S.C. 714, the representation of a tall, lean man, with strong facial features, who wears slacks and sport shirt buttoned to the collar (both green when colored), no tie, a field jacket (red, when colored), boot-type shoes (brown, when colored), and who carries a backpack.

(b) "National Coordinator" means the National Coordinator, Johnny Horizon Program Office, or the person he delegates to act for him on matters pertaining to the "Johnny Horizon" Program.

(c) "Johnny Horizon Program" means those activities and supporting services conducted in furtherance of a public service antilitter and environmental cleanup campaign which uses the "Johnny Horizon" name or symbol.

(d) The "Johnny Horizon" symbol is one following the description of the term "Johnny Horizon," as defined herein, or the one portrayed below:

Let's Clean Up America  
For Our 200th Birthday

#### § 25.1 Commercial use.

(a) *Licenses.* The "Johnny Horizon" name or symbol may be used for commercial purposes only under a license issued pursuant to the regulations in this part. Licenses will be granted to any individual, firm, or corporation if the National Coordinator determines that the proposed commercial use will promote the purposes of the "Johnny Horizon" Program and will not impair the integrity of the name or symbol.

(b) *Terms and conditions.* In order to maintain the integrity of the "Johnny

Horizon" Program and to regulate the manufacture, importation, reproduction, or use of the "Johnny Horizon" name and symbol, licensees will be subject, but not limited, to the following terms and conditions:

(1) Payment of fair return shall be made to the United States for its property through negotiation of use or royalty fees.

(2) Licenses will be nontransferable.

(3) All proposed products, services, and programs including marketing and advertising programs which in any way make use of the name or symbol of "Johnny Horizon" must be approved by the National Coordinator prior to manufacture, importation, reproduction, or use by the licensee. Substances inherently dangerous to users shall not be used.

(4) All licenses shall contain Equal Employment Opportunity provisions in compliance with Executive Order 11246, as amended (30 FR 12319 (1965)), and regulations issued pursuant thereto (41 CFR Chapter 60 and Part 17 of this chapter).

(5) Alteration of artwork must first be approved by the National Coordinator.

(6) Licenses shall be subject to revocation by the National Coordinator at any time he finds that (i) the use involved is injurious to the characterization of "Johnny Horizon," or (ii) there has been a violation of the terms and conditions of the license.

#### § 25.2 Noncommercial use.

(a) *Permitted uses.* Products or services using, or bearing the name or symbol of "Johnny Horizon," provided by the Government or acquired from licensed sources, may be used without a license or advance permission by any person or organization for the purpose of furthering antilitter and environmental cleanup campaigns, provided that no charge is made by the unlicensed user for the products or services.

(b) *Permits.* The National Coordinator may issue permits containing such terms and conditions as he may determine, for the use of the name or symbol of "Johnny Horizon" to any non-profit organization for fund raising activities, which may include benefit shows, performances, and other activities at which admissions may be charged or contributions solicited: *Provided*, That any such permittee must agree that no funds so collected shall be expended for purposes contrary to the laws, regulations, or policies of the

United States; and *Provided further*, That any funds so collected will be expended for the purpose of furthering antilitter and environmental cleanup efforts.

(c) *Technical advice.* To the extent possible, technical advice will be given to interested parties upon request to the National Coordinator.

(d) *Cooperation.* The National Coordinator may enter into cooperative agreements with other Federal and State agencies for use of the name or symbol of "Johnny Horizon." Agreements shall state the responsibilities of each agency pertaining to: (1) Manufacturing the integrity of the program; (2) supplying materials; (3) assisting other groups or organizations; (4) restrictions of uses of materials; (5) altering artwork; and (6) making arrangements with public personalities engaged in the program.

#### § 25.3 Contributions.

The National Coordinator may accept contributions of money and personal property by any person or organization for use in the "Johnny Horizon" program.

#### § 25.4 Unauthorized use.

Manufacture, importation, reproduction, or use of the "Johnny Horizon" name or symbol, except as provided for under these regulations in this part is prohibited (18 U.S.C. 714).

[Airspace Docket No. 73-GL-11]

#### CONTROL ZONE AND TRANSITION AREA Proposed Designation and Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a control zone and alter the transition area at Gary, Ind.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before April 30, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the

### PROPOSED RULES

Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

The non-Federal control tower at Gary has been established as a weather reporting station, thus allowing the establishment of a control zone during the tower hours of operation.

In addition, two new instrument approach procedures have been developed and one canceled, requiring a change in the transition area.

In consideration of the foregoing, the Federal Aviation Administration proposed to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.171 (38 FR 351), the following control zone is added:

#### GARY, IND.

Within a 5-mile radius of Gary Municipal Airport (latitude 41°36'54" N., longitude 87°24'37" W.). This control zone shall be effective during the specific dates and times established in advance by a notice to airmen. The effective date and time will thereafter be continuously published in the Airmen's Information Manual.

In § 71.181 (38 FR 435), the following transition area is added:

#### GARY, IND.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Gary Municipal Airport (latitude 41°36'54" N., longitude 87°24'37" W.) and within 3 miles each side of the 124° bearing from the Gary Airport extending from the 5-mile radius to 13 miles southeast of the airport, excluding the portion that overlies Chicago and Griffith, Ind., transition area.

These amendments are proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Des Plaines, Ill., on March 9, 1973.

R. O. ZIEGLER,  
Acting Director, Great Lakes Region.  
[FR Doc. 73-5946 Filed 3-28-73; 8:45 am]

#### [ 14 CFR Part 75 ]

[Airspace Docket No. 72-WA-40]

#### AREA HIGH ROUTES

#### Proposed Designation

The Federal Aviation Administration (FAA) is considering an amendment to Part 75 of the Federal Aviation Regulations that would designate four area high routes between central United States and the west coast.

The routes proposed in this docket would, if designated, replace certain Series 400 routes now in service. The description of waypoints in this notice of proposed rulemaking (NPRM) are approximate and may be refined after a flight inspection of the routes has been made.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should

identify the airspace docket number and be submitted in triplicate to the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. All communications received on or before April 30, 1973, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591.

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the ICAO International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertain to the establishment of air navigation facilities and services necessary to promoting the safe, orderly and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

The FAA proposes to amend Part 75 of the Federal Aviation Regulations by designating area high routes as follows:

# SELECTIVE SERVICE SYSTEM [ 32 CFR Part 1622 ]

## IDENTIFICATION OF REGISTRANTS Classification and Induction Procedures

### Correction

In FR Doc. 73-5286 appearing on page 7347 of the issue for Tuesday, March 20, 1973, the heading of § 1622.26, now reading "§ 1622.26 Class II-S: Registrant deferred because of activity in graduate study," should read "§ 1622.26 Class 2-M: Registrant deferred because of study preparing for a specified medical specialty."

## SMALL BUSINESS ADMINISTRATION

### [ 13 CFR Part 124 ]

## PROCUREMENT AND TECHNICAL ASSISTANCE

### Contracting

Notice is hereby given that the Administrator of the Small Business Administration proposes to amend Part 124 of Chapter I of Title 13 of the Code of Federal Regulations by revising §§ 124.8-1 and 124.8-2 thereof, pertaining to contracting under section 8(a) of the Small Business Act.

These amendments further revise the proposed regulations previously published in the FEDERAL REGISTER on March 6, 1973 (38 FR 6081). As revised, the proposed amendments clarify existing policies and procedures; provide that limited competition will be used in awarding contracts where practicable; and provide program completion and termination guidelines for eligible concerns.

Interested persons may submit written comments, suggestions, or objections regarding the proposed amendments to the Small Business Administration on or before April 30, 1973.

All correspondence shall be addressed to:

Marshall J. Parker, Associate Administrator for Procurement and Management Assistance, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

Accordingly, it is proposed to amend Part 124 of Chapter I of Title 13 of the Code of Federal Regulations by revising §§ 124.8-1 and 124.8-2 to read as follows:

§ 124.8-1 The 8(a) Program.

(a) General. These regulations implement section 8(a) of the Small Business Act which authorizes SBA to enter into all types of contracts (including, but not limited to, supply, services, construction, research, and development) with other Government departments and agencies and negotiate subcontracts for the performance thereof.

(b) Purpose. It is the policy of SBA to use such authority to assist small business concerns owned and controlled by socially or economically disadvantaged persons to achieve a competitive position in the marketplace.

(c) Eligibility. (1) Social or economic disadvantage. An applicant concern must

be owned and controlled by one or more persons who have been deprived of the opportunity to develop and maintain a competitive position in the economy because of social or economic disadvantage. Such disadvantage may arise from cultural, social, chronic economic circumstances or background, or other similar cause. Such persons include, but are not limited to, black Americans, American Indians, Spanish-Americans, Oriental-Americans, Eskimos, and Aleuts. Vietnam-era service in the Armed Forces may be a contributing factor in establishing social or economic disadvantage.

(2) Ownership and control. Disadvantaged persons must presently own and control the concern except where a divestiture agreement or management contract, approved by the Associate Administrator for Procurement and Management Assistance, temporarily vests ownership or control in nondisadvantaged persons.

(i) Proprietorships. If the applicant concern is a proprietorship, it must be 100 percent owned and controlled by disadvantaged persons.

(ii) Partnerships. The ownership of at least 50 percent interest in the partnership by disadvantaged persons will create a rebuttable presumption of ownership and control.

(iii) Corporations. The ownership of at least 51 percent of each class of voting stock by disadvantaged persons will create a rebuttable presumption of ownership and control.

(iv) Divestiture agreement. If an applicant concern is not presently owned and/or controlled by disadvantaged persons, the persons exercising such ownership and/or control must execute a divestiture agreement which will provide for ownership and control vesting in disadvantaged persons in accordance with the foregoing prescribed criteria within a reasonable period of time. All divestiture agreements must be approved by the Associate Administrator for Procurement and Management Assistance.

(v) Management contracts. All management contracts entered into by 8(a) concerns must be approved by SBA.

### § 124.8-2 Procedures.

(a) Submission of business plans. Applicants must submit a business plan, including complete information regarding the concern's qualifications, which will demonstrate that 8(a) assistance will foster its participation in the economy as a self-sustaining, profit-oriented, small business.

(1) In no event may the acceptance or approval of a business plan by SBA be construed as a commitment by SBA to award a single contract, a continuing series of contracts or provide any other assistance, contractual or otherwise.

(b) Selection of potential contracts. SBA will, in consultation and cooperation with other Government departments and agencies, select proposed procurements suitable for performance by 8(a) concerns. In making these selections, among the factors given con-

sideration will be the percentage of all similar contracts awarded under the 8(a) program over a relevant period of time, issuance of prior public solicitation of the procurement under a small business set aside, the probability that an eligible concern could obtain a competitive award of the contract, and the extent to which other small concerns have historically been dependent upon the contract in question for a significant percentage of their sales.

(c) Nondisadvantaged participants in a contract. To insure that the purposes of the 8(a) program are being accomplished, applicants will disclose the extent to which nondisadvantaged persons or firms will participate in the performance of proposed 8(a) contracts. Section 8(a) contractors may not subcontract any portion of an 8(a) contract without the written consent of the SBA contracting officer. Joint Venture Agreements must be approved by the SBA Regional Director.

(d) Negotiation of 8(a) subcontracts. Section 8(a) subcontracts shall be negotiated with approved 8(a) companies on a limited competitive basis to the extent feasible and practicable. Price will not be a factor in such competition. It is recognized that in some cases competition will be neither feasible nor practicable due to limited availability of qualified concerns, geographic considerations, or other factors. Section 8(a) subcontracts shall be awarded at prices which are fair and reasonable to the Government and to the subcontractor.

(e) Program completion and termination. An 8(a) concern which has substantially achieved the objectives of its business plan will be notified that its participation in the program is completed. The judgment as to the completion of program participation will be made in the light of the purposes of the program.

(1) If the objectives and goals set forth in the business plan are not being met, the concern shall be informed what corrective measures are necessary. In cases where it is determined, in the judgment of SBA, that continued participation in the 8(a) program will not further the program objectives, the concern will be notified that its participation in the program is terminated. Reasons which would indicate the necessity for program termination prior to completion of the business plan termination date are, among others: the unavailability of appropriate 8(a) contracting support; the inability of the 8(a) concern to develop suitable commercial or competitive markets; inadequate management performance; evidence of continued inadequate technical performance, et al.

Dated: March 27, 1973.

THOMAS S. KLEPPE,  
Administrator.

## Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF THE TREASURY

#### Internal Revenue Service

#### ART ADVISORY PANEL

#### Notice of Closed Meeting

Notice is hereby given that pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, a closed meeting of the Art Advisory Panel will be held on April 10 and 11, 1973, beginning at 9:30 a.m. in Room 3313, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC 20224.

The agenda will consist of the review and evaluation of the acceptability of market value appraisals of works of art involved in Federal income, estate, or gift tax returns. This involves the discussion of confidential material in individual tax returns. A determination as required by section 10(d) of the Act has been made that these meetings are concerned with matters listed in section 552(b) of Title 5 of the United States Code, and that the meetings will not be open to the public.

[SEAL] JOHNNIE M. WALTERS,  
Commissioner.

### DEPARTMENT OF DEFENSE

#### ARMED FORCES EPIDEMIOLOGICAL BOARD

#### Notice of Open Meeting

Notice is hereby given that the Armed Forces Epidemiological Board will meet on April 18, 1973, commencing at 1:30 p.m. in Room 341, Walter Reed Army Institute of Research, Walter Reed Army Medical Center. The agenda for the meeting includes comments by the Surgeons General of the military departments, a documentary film and report on archives, an executive session with Preventive Medicine Officers and Board Members and an executive session of the Board Members.

The meeting will be open to the public. It is to be held in a room accommodating 50 people. In addition to discussion of agenda topics by Board Members, there will be time for statements by non-members. Persons wishing to make oral statements should advise the Executive Secretary prior to the meeting to aid in scheduling the time available. Any interested person may file a written statement for consideration by the Board by sending it to the Executive Secretary,

Room 6B118, Forrestal Building, Seventh and Independence Avenue, Washington, D.C. 20314.

### Department of the Army ARMY MISSILE COMMAND SCIENTIFIC ADVISORY GROUP

#### Notice of Meeting

MARCH 21, 1973.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463) announcement is made of the following committee meeting:

- Name of committee: U.S. Army Missile Command Scientific Advisory Group.
- Date: 12-13 April 1973.
- Time: 0900 hours.
- Agenda:
  - Army High Energy Laser Program.
  - Chemical Laser Technology.
  - Gas Dynamic Laser Technology.
  - Electric Discharge Laser Technology.

This meeting is closed to the public since the matters to be discussed fall under section 552(b)(1) of Title 5, United States Code, which states that matters required by Executive order to be kept secret in the interest of national defense shall be withheld from disclosure.

For the Commander.

LLOYD L. LIVELY,  
Executive Secretary, U.S. Army  
Missile Command Scientific  
Advisory Group.

### WYOMING STATE MULTIPLE USE ADVISORY BOARD

#### Notice of Meeting

MARCH 23, 1973.

Notice is hereby given that the Wyoming State Multiple Use Advisory Board meeting scheduled for March 14 and 15, 1973, was postponed due to severe winter storm and hazardous travel conditions. The meeting is hereby rescheduled to 1 p.m., April 26 and 27, 1973, at the Little America Motel, Cheyenne, Wyo. The agenda will include election of board officers and discussions of current issues confronting the range livestock industry, implementation of the National Environmental Policy Act, coordination of intergovernmental planning in relation to BLM-administered national resource lands in Wyoming and public information needs for participative management.

The meeting will be open to the public insofar as seating is available. Interested persons will be permitted to appear before the board or file a written statement for its consideration. Those wishing to appear before the board must inform the chairman in writing prior to the meeting.

Written statements and requests to appear before the board should be submitted to Howard E. Miller, Chairman, c/o State Director, Bureau of Land Management, Post Office Box 1828, Cheyenne, WY 82001.

DANIEL P. BAKER,  
State Director.

#### Forest Service

#### MIDDLE FORK SALMON RIVER MANAGEMENT PLAN REVIEW COMMITTEE

#### Notice of Meeting

The Middle Fork Salmon River Management Plan Review Committee will meet at 10 a.m., April 23, 1973, Salmon, Idaho.

The purpose of the meeting is to review and discuss the rough draft Recreation Management Plan for the Middle Fork Salmon River.

The meeting will be open to the public. Persons who wish to attend should notify Forest Supervisor, Salmon, Idaho, phone: 208-756-2215. Written statements may be filed with the committee before or after the meeting.

## NOTICES

Public members will be given the opportunity to discuss the Management Plan along with committee members.

J. L. EMERSON,  
Forest Supervisor.

MARCH 22, 1973.

[FR Doc. 73-6025 Filed 3-28-73; 8:45 am]

### SALMON RIVER ADVISORY COMMITTEE

#### Notice of Meeting

The Salmon River Advisory Committee will meet at 9 a.m., m.s.t., in the Meeting Room of the Idaho Fish and Game Department Building, 600 South Walnut, Boise, ID on April 26, 1973.

The purpose of the meeting will be to review public input concerning the Salmon River Study under the National Wild and Scenic Rivers Act and to obtain advice from the committee on a management proposal for the Salmon River and adjacent lands from North Fork, Idaho to the Snake River.

The committee has established rules for public participation as follows:

- The meeting shall be open to the public.
- The public shall be permitted to file written statements with the committee prior to 12 noon, m.s.t., on April 26, 1973.
- Discussion and debate between members of the public and the committee shall not be considered within the scope of the meeting.

W. B. SENDT,  
Forest Supervisor,  
Payette National Forest.

MARCH 20, 1973.

### DEPARTMENT OF COMMERCE

#### National Oceanic and Atmospheric Administration

#### CHARLES O. HANDLEY, JR.

#### Issuance of Letter of Exemption for Marine Mammals

On March 6, 1973, a notice was published in the FEDERAL REGISTER (38 FR 6087) stating that an application had been filed with the National Oceanic and Atmospheric Administration for an economic hardship exemption by Charles O. Handley, Jr., Curator and Supervisor, Division of Mammals, National Museum of Natural History, Smithsonian Institution, Washington, D.C. to import from Argentina the skeleton of one beaked whale (*Tasmacetus* sp.) which had washed ashore. The skeleton is to be added to the Smithsonian reference collection.

Therefore, notice is hereby given that, pursuant to the provisions of the Marine Mammal Protection Act of 1972 (Public Law 92-522), and after having considered the application and all other pertinent information and facts with regard thereto, the National Marine Fisheries Service issued a letter of exemption to Charles O. Handley, Jr., on March 21, 1973, subject to the limitations and conditions set forth in the letter of exemp-

tion. Such letter, and supporting documents, are available for review by interested persons in the Office of the Director, National Marine Fisheries Service.

Issued at Washington, D.C., and dated March 27, 1973.

ROBERT W. SCHONING,

Acting Director,  
National Marine Fisheries Service.

[FR Doc. 73-6052 Filed 3-28-73; 8:45 am]

### TERRELL C. NEWBY AND MYSTIC AQUARIUM, INC., ET AL. Applications for Economic Hardship Exemptions

Notice is hereby given that the following applicants have filed applications for an economic hardship exemption pursuant to section 101(c) of the Marine Mammal Protection Act of 1972 (Public Law 92-522) and § 216.13 of the interim regulations governing the taking and importing of marine mammals.

1. Terrell C. Newby, graduate student, College of Fisheries, University of Washington, Seattle, Wash. 98195, to tag an unspecified number of newborn Pacific harbor seals (*Phoca vitulina richardi*), as part of a study of the seal populations of Willapa Bay and Grays Harbor, Wash., and to kill as many as 20 Pacific harbor seals of all age classes for purposes of food habit, biological, pollution, and population dynamics studies.

Applicant states that:

(a) The above mentioned taking is part of a continuing study underway since the summer of 1969 under a permit from the Washington State Department of Game, as part of his graduate study program, and was interrupted by the moratorium imposed by the Marine Mammal Protection Act on December 21, 1972.

(b) The capture will be carried out on or near Gertrude Island in southern Puget Sound, on or near Minor Island in northern Puget Sound, and in or around Grays Harbor and Willapa Bay.

(c) The total estimated population of the harbor seal in the State of Washington is 1,800 animals.

(d) The Pacific harbor seal is not considered a rare or endangered species in its range.

(e) Not being able to continue the taking of harbor seals has caused him undue economic hardship in that it has caused the suspension of his educational grant, thus depriving him of funds with which to pay his personal and educational expenses while pursuing his studies in the College of Fisheries.

2. Mystic Aquarium, Inc., 1144 Union Commerce Building, Cleveland, Ohio 44115, and P.O. Box 190, Mystic, CT 06355, to take five Atlantic harbor seals (*Phoca vitulina concolor*), seven Atlantic bottle-nosed dolphins (*Tursiops truncatus*), and three Pacific pilot whales (*Globicephala scammoni*) for purposes of public display at its facility currently under construction at Mystic, Conn.

Applicant states that:

(a) It is an Ohio corporation owned by the same shareholders who own and are financing Aquarium Systems, Inc., which

since 1964 has been engaged in the scientific study and development of water management systems and salts necessary to culture marine organisms for scientific and educational research and display, and which is the recognized leader in this field in the United States;

(b) The same Aquarium Systems, Inc., has operated since 1965 an aquarium at Niagara Falls, N.Y., at which aquarium porpoises and whales have been maintained and exhibited, and that such aquarium is the only salt water aquarium in the northern United States which operates year round;

(c) The facility at Mystic, Conn., will be staffed with specialists knowledgeable in the training, maintenance, display, and care of marine mammals;

(d) The seals will be taken on Sable Island, Nova Scotia, Canada, in June 1973, transported by air to Dalhousie University at Halifax, Nova Scotia, where they will be held until they are feeding consistently, then transferred by air to Boston, and then by truck to the facility at Mystic, Conn.;

(e) That the dolphins will be taken by net near Key Largo, or Fort Myers, Fla., in May 1973, will be transported by boat to suitable holding facilities in the Florida Keys, then shipped to Boston by air in a conventional dolphin holding box (equipped with sling, spray bar, and pumps);

(f) The whales will be taken by hoop net within a 60-mile radius of San Diego, Calif., transported by boat to suitable holding facilities and held until they are hand feeding on whole fish, then shipped by air by the same method described above for dolphins;

(g) Aquarium Systems has had considerable experience in taking and shipping marine mammals, and the taking, transporting, and holding of the mammals described herein will be under the supervision of competent specialists;

(h) The facility under construction at Mystic, Conn., will afford enjoyment and education to as many as 800,000 persons annually, as well as research opportunities for scientists and educators;

(i) The facility at Mystic is designed exclusively for the exhibition and display of whales and dolphins, and cannot be used for another type of aquarium;

(j) It will suffer undue economic hardship by reason of not being able to operate a financially viable enterprise, and its owners will lose millions of dollars.

3. John D. Hall, Assistant Specialist in Marine Biology, University of California, Santa Cruz, Calif., to capture two subadult male California sea lions (*Zalophus californianus*) and six Pacific white sided dolphins (*Lagenorhynchus obliquidens*) in the Monterey Bay area to continue research begun under contract with the United States Naval Undersea Center in San Diego, Calif.

Applicant states that he:

(a) Is a doctoral candidate with the University of California, Santa Cruz, having worked 5 years previous with the Naval Undersea Center.

(b) Desires to capture the two sea lions to affix harnesses with radio telemetry devices for tracking their movements, such two devices to be automatically released after 6 and 24 hours respectively by means of corrosion fastenings;

(c) Desires to capture six Pacific white sided dolphins to attach radio telemetry devices to two, to lavage the stomachs of four, and freeze-brand all six;

(d) Will be caused undue economic hardship as failure to receive an exemption would

result in his inability to complete his contract with the Naval Undersea Center, thus foreclosing further support from the Center for personal and research expenses in pursuance of his doctoral degree.

Documents submitted in connection with these applications are available for inspection in the Office of the Director, National Marine Fisheries Service. Confidential financial documents and trade secrets will not be available.

All factual statements and opinions contained in this notice with respect to each application, are those supplied by the respective applicants and do not necessarily reflect the findings or opinions of the National Marine Fisheries Service.

Issued at Washington, D.C. and dated March 27, 1973.

ROBERT W. SCHONING,  
Acting Director,  
National Marine Fisheries Service.  
[FR Doc. 73-6051 Filed 3-28-73; 8:45 am]

# SEATTLE MARINE AQUARIUM AND BERGNER INTERNATIONAL CORP. Withdrawal of Applications for Economic Hardship Exemptions

Notice is hereby given that the following applicants for economic hardship exemptions pursuant to section 101(c) of the Marine Mammal Protection Act of 1972 (Public Law 92-522), and § 216.13 of the interim regulations governing the taking and importing of marine mammals have filed notifications of withdrawal of their applications.

1. Seattle Marine Aquarium, Seattle, Wash., request to take two killer whales for public display. The notice of withdrawal states:

Northwest Marineland, Inc. (doing business as Seattle Marine Aquarium) hereby withdraws its application for permits to capture two (2) killer whales under sec. 216.13, economic hardship exemption, of the Marine Mammal Act of 1972 with prejudice (50 CFR 216.13). Respectfully, Donald Goldsberry, president, Northwest Marineland, Inc. (Seattle Marine Aquarium).

2. Bergner International Corp., New York, N.Y., request to import about 10,000 dressed Beater and Blueback sealskins from Canada, for resale. The notice of withdrawal states:

Reference our two applications dated January 2 and 3, 1973, numbered application No. 1 and application No. 2, respectively, for economic hardship exemptions under Part 216, Subpart C, § 216.13 Public Law 92-522, 86 Stat. 1027 (50 CFR 216.13). This is notice to you that we are as of this moment withdrawing both these applications without prejudice and with leave to reapply when and if circumstances warrant. This withdrawal is without prejudice to our rights under section 102(a)(2) and Subpart C, § 216.7 of the regulations (50 CFR 216.7) or any other applicable law or regulation which would by operation of law permit us to do that which these applications requested specific permission to do. Bergner International Corp.

The notices of withdrawal are available for inspection in the Office of the

## Office of Import Programs CALIFORNIA INSTITUTE OF TECHNOLOGY

### Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 73-00250-33-46040. Applicant: California Institute of Technology, Division of Biology, 1201 East California Boulevard, Pasadena, CA 91109. Article: Electron microscope, Model EM 301 with accessories, Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used in an investigation of cell membranes which will include the following projects:

- (a) Mapping the distribution of molecules of individual cell surfaces of normal and malignant cells.
- (b) Studies of the structure of the cell membrane.
- (c) Studies of the formation of cell contacts between normal and cancer cells.
- (d) Studies of cell movement.
- (e) Studies of the binding of virus particles to cells during infection.
- (f) Studies of the appearance under various conditions of cell membrane models prepared from purified membrane components, as well as from artificial mixtures of known components.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article has a specified resolving capability of 3 angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forghio Corp. The Model EMU-4C has a specified resolving capability of 5 angstroms. (The lower the numerical rating in terms of angstrom units, the better the resolving capability.) We are advised by the Department of Health, Education, and Welfare in its memorandum dated March 15, 1973, that the additional resolving capability of the

foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C is not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,  
Acting Director,  
Office of Import Programs.

## DAVID LIPSCOMB COLLEGE

### Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles; Correction

In the notice of consolidated decision on applications for duty-free entry of scientific articles appearing at page 1656 in the FEDERAL REGISTER of Wednesday, January 17, 1973, the following docket should be deleted:

Docket No. 72-00112-01-77030. Applicant: David Lipscomb College, Nashville, Tenn. 37203. Article: NMR spectrometer, Model JNM-C60HL. Date of denial without prejudice to resubmission: September 12, 1972.

B. BLANKENHEIMER,  
Acting Director,  
Office of Import Programs.  
[FR Doc. 73-6040 Filed 3-28-73; 8:45 am]

## FORSYTH DENTAL INFIRMARY FOR CHILDREN, ET AL.

### Notice of Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before April 18, 1973.

Amended regulations issued under cited Act, as published in the February 24, 1972 issue of the FEDERAL REGISTER, prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C.

Docket No. 73-00399-33-46070. Applicant: Forsyth Dental Infirmary for

Children, 140 Fenway, Boston, MA 02115. Article: Scanning electron microscope, Model JSM-U3, Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in a variety of research projects which include:

- (1) Investigation of the mechanical properties of teeth and bones and other hard tissues as a means for characterizing mineralization dynamics and other fundamental information.

- (2) Study of the mechanism of formation and prevention of caries and assessment of the effects of the acid solutions and abrasive pastes that are frequently employed in dental practice.

- (3) Study of the ecology of the microorganisms inhabiting the oral cavity. The article will also be used in the training of graduate students and in providing educational material for the Forsyth School for Dental Hygienists.

Application received by Commissioner of Customs: February 28, 1973.

Docket No. 73-00400-33-46040. Applicant: University of Maryland School of Medicine, Department of Anatomy, 29 South Greene Street, Baltimore, MD 21201. Article: Electron microscope, Model EM 201. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used in the following research projects of a biomedical nature:

- (1) An intensive study of cellular content of postnodal lymph. The overall objective of the project is to correlate the information obtained on the structure and function of these cells in peripheral lymph in an attempt to understand the role which these cells play in the defensive mechanism of the body in general and immune process in particular.

- (2) The role of thyrocalcitonin in the induction of tumors. The objectives of the project are (a) to expand the preliminary experiments involving the administration of thyrocalcitonin to potentially leukemic mice to provide further information on the development of neoplastic disease, (b) to investigate the characteristics of any induced neoplasms to determine the site of origin, and (c) to determine by electron microscopy the presence or the absence of viral particles in induced tumors, and if present, to determine whether an apparent relationship exists between this virus and the preexisting virus in the bone cells.

- (3) A comparative study of metastasizing and non-metastasizing murine tumors. The role of the Intracranial A-Particle. The objective of this project is to determine if alteration of cellular properties plays a decisive role in malignancy.

In addition the article will be used in the courses: Techniques in electron microscopy, histology for the medical students and histology for graduate students, for training in electron microscopy and for providing the students with a basic knowledge and understanding of the microscopic structure of the human body. Application received by Commissioner of Customs: March 2, 1973.

Docket No. 73-00401-33-90000. Applicant: William Marsh Rice University, Department of Biochemistry, Houston, Tex. 77001. Article: Rotating Anode X-ray Generator, GX6 and Complete Rotor Plate Assembly, Copper Anode with

## NOTICES

Spindle. Manufacturer: Elliot Automation Radar Systems Ltd., United Kingdom. Intended use of article: The article is intended to be used generally for the studies of the structure and function of biological macromolecules such as proteins and enzymes. The article will also be used extensively in the field of molecular biology which includes: studies of macromolecules and biological structure, study of virus structure, low angle diffraction from muscle and other biological fibers, and structural studies of crystalline and fibrous nucleic acids.

In addition, the article will be used in the courses: Undergraduate Research in Biochemistry, Advanced Experimental Biochemistry, and Graduate Research in Biochemistry to familiarize and train undergraduate and graduate students to the use of instruments and techniques related to biochemistry. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00402-33-46040. Applicant: Baylor University Medical Center, 3500 Gaston Avenue Dallas TX 75246. Article: Electron microscope, Model EM 201. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used for the following research studies:

- (1) Ultrastructural characteristics of human cancer cells;
- (2) Human neoplasms for identification of diagnostic criteria;
- (3) Variables of fixation and embedding on the thickness of diabetic and normal capillary basement membranes; and

- (4) Vascular endothelium for evaluation of venous aorto-coronary jump grafts. The article will also be used by medical and premedical students, dental students, interns, residents, fellows, graduate students, and staff members in various stages of training in various aspects of ultrastructural pathology. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00403-33-46040. Applicant: Brandeis University, 415 South Street, Waltham, MA 02154. Article: Electron microscope, Model EM 301. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used for research of the relation between form and function in biological structures at the molecular level, e.g., virus particles, oligomeric enzymes, muscle, microtubules, fibrinogen, and membranes. Structural studies on representative systems in these categories are to be carried out with emphasis on small viruses, isolated muscle proteins and membranes. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00404-60-02300. Applicant: University of Nebraska North Platte Station, Route No. 4, Box 429, North Platte, NE 69101. Article: Electronic individual animal feeder. Manufacturer: Calan Electronics Ltd., United Kingdom. Intended use of article: The

article is intended to be used to study the effect of supplementing energy to yearling cattle grazing and measurement of the ad libitum intake of supplement consumed by them individually. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00405-33-46500. Applicant: University of Scranton, Monroe Avenue, Scranton, Pa. 18510. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to prepare specimens for study with the electron microscope. The particular biology courses that will require the use of this article are: Plant Taxonomy, Plant Morphology, Cellular Biology, Phycology, and Mycology. A course in the theory and use of the electron microscope is also planned for which this article will be required. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00407-00-46040. Applicant: Institute for Medical Research, Copewood Street, Camden, N.J. 08103. Article: Universal cassette for Elmiskop IA and I Electron microscope. Manufacturer: Siemens AG, West Germany. Intended use of article: The article is intended to be used for etiological studies of mammary carcinoma. Ultrastructural features of the mouse mammary tumor virus will be compared with those of the putative human mammary tumor virus. Application received by Commissioner of Customs: March 5, 1973.

Docket No. 73-00408-33-43780. Applicant: University of Cincinnati, Clifton Avenue, Cincinnati, Ohio 45221. Article: HI-MED HG-100 Series Digital Stimulator Programmer. Manufacturer: Hivotronic Ltd., United Kingdom. Intended use of article: The article is intended to be used as the master timing unit and electrical stimulator in a basic neurophysiology research laboratory. The research in this laboratory involves an investigation into the properties of nerve cells and neuronal interactions, e.g., synaptic transmission, in vertebrate and invertebrate preparations. The experiments conducted routinely entail intracellular recordings from one or more neuronal elements. The article will allow accurate measurements of time-dependent conductance changes following synaptic activation. Application received by Commissioner of Customs: February 26, 1973.

Docket No. 73-00409-33-46040. Applicant: University of Cincinnati, College of Medicine, Eden and Bethesda Avenues, Cincinnati, Ohio 45219. Article: Electron microscope, Model JEM 100B. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for ultrastructural research on biological material. Some of the studies to be undertaken are as follows:

- (1) Ultrastructural studies on embryonic chick connective tissues;
- (2) Fine structure studies of connective tissue after short-term ingestion of cadmium.

## NOTICES

- (3) Ultrastructural and biochemical analysis of isolated liver mitochondria in diabetic rats;
- (4) Study of morphologic changes in testicular interstitial tissue of the rat after cryptorchidism or X-irradiation;
- (5) Ultrastructural studies on cultured Hept-2 cells treated with diphtheria toxin and cytochalasin B;
- (6) Study of ultrastructural morphology, cellular adhesion, and mucopolysaccharide synthesis following treatment with cytochalasin B;
- (7) Study of testicular interstitial morphology following chronic cadmium ingestion;
- (8) Study of ultrastructural changes within the rat testis and epididymis after surgical interruption of the vas deferens;
- (9) Histochemical localization of mucopolysaccharides at the ultrastructural level in the spleens of mice under conditions of erythropoietic stimulation and inhibition and in genetically anemic mice; and
- (10) Ultrastructural characterization of hamster corpora lutea during growth and regressive phases.

The article is also intended to be used in the course Micro Anatomy (Histology) for light and electron microscopic interpretation of tissues within the normal body to understand the disease processes in the practice of medicine. In addition the article will be used to teach graduate and medical students the use of electron microscopy in basic science research. Application received by Commissioner of Customs: March 2, 1973.

Docket No. 73-00500-65-46040. Applicant: The University of Rochester, College of Engineering and Applied Science, River Station, Rochester, N.Y. 14627. Article: Electron microscope, Model JEM 100B. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in research programs in the study of metals, metal alloys, ceramics, ceramic alloys, and polymers. The type of phenomena to be studied are:

- (1) The effects of microstructural variations on the fracture toughness of mild steels.
- (2) The effect of production variables on mechanical properties of grain-size strengthened materials.
- (3) Determination of slip systems and dislocation Burgers vectors.
- (4) Microstructural variations of polymers.
- (5) Precipitation and phase transformation in metals and alloys.
- (6) Deformation substructure studies of materials.
- (7) Annealing phenomena in metals and ceramics.

In addition the article will be used in conjunction with undergraduate courses and graduate courses in materials science, chemical engineering, and mechanical engineering. Application received by Commissioner of Customs: January 24, 1973.

Docket No. 73-00501-33-02300. Applicant: Idaho State University, Purchasing Services, P.O. Box 219, Pocatello, ID 83201. Article: Longworth Small Mammal Trap. Manufacturer: Longworth Scientific Instrument Co., Ltd., United Kingdom. Intended use of article: The

article is intended to be used to capture rodents for analysis in studies of population ecology of microtine rodents in semi-desert habitat. Successive capture and release of these rodents allows assessment of population size, survival rates, dilution rates, growth rates, reproductive changes on a seasonal basis, and movement and home-range patterns. Application received by Commissioner of Customs: March 1, 1973.

Docket No. 73-00502-65-46040. Applicant: Michigan Technological University, Department of Metallurgical Engineering, Houghton, Mich. 49931. Article: Electron microscope, Model EM 301. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used primarily for studying phase transformation in metals and defect structure in materials. The article will also be used to study aerosols, rock structure, and phages in biology. In addition, the article will be used extensively in student instruction in both research and teaching laboratories. Application received by Commissioner of Customs: March 1, 1973.

Docket No. 73-00504-01-77000. Applicant: Brown University, Providence, R.I. 02912. Article: Electron Spectrometer System, ES 100B. Manufacturer: AEI Scientific Apparatus, Ltd., United Kingdom. Intended use of article: The article is intended to be used for a variety of studies of the chemical bonding and electronic structure of materials. Primary research objectives are (1) the characterization of solid surfaces, including studies of adsorption processes and surface reactions; and (2) the investigation of chemical bonding in molecules containing transition metal atoms. In addition, the article will be used by students to learn an important new analytical technique. Application received by Commissioner of Customs: February 26, 1973.

Docket No. 73-00505-33-46040. Applicant: Ohio Agricultural Research and Development Center, Wooster, Ohio 44691. Article: Electron microscope, Model EM 201. Manufacturer: Philips Electronic Instruments, NVD, The Netherlands. Intended use of article: The article is intended to be used in a wide range of investigations which include: (1) Investigation of plant virus pathology of soybean, corn, wheat, grape, and tomato; (2) local lesion formation mechanisms; (3) virus locations within the tissue; (4) pathological conditions in animals including TGE virus in swine, bluecomb disease in turkeys, and rumen bacteria study in cattle; (5) monitoring of purification steps of biological macromolecules such as ilpo-protein from blood and egg yolk. In addition there are various anticipated projects involving studies of virus infected tissues. The article will also be used in the teaching of existing and future staff, faculty, graduate students, and technicians desiring training in those aspects of electron microscopy pertinent to their research programs or

electron microscopy techniques in general. Application received by Commissioner of Customs: March 1, 1973.

Notice of Decision on Application for  
Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 73-00255-33-46040. Applicant: The Johns Hopkins University, Department of Pharmacology, 725 North Wolfe Street, Baltimore, MD 21205. Article: Electron microscope, Model EM-98-2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in a variety of experiments directed at identifying neuronal components at the ultrastructural level. Also, autoradiography with the electron microscope will be conducted to identify sites of accumulation of various radioactive compounds. The article will also be used in the student laboratory course to train students in identifying ultrastructural components of neurons.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article is intended to be used, is being manufactured in the United States.

Reasons: The applicant requires an electron microscope which is suitable for instruction in the basic principles of electron microscopy. The foreign article is a relatively simple, medium resolution electron microscope designed for confident use by beginning students with a minimum of detailed programming. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forgiio Corp. The Model EMU-4C electron microscope is a relatively complex instrument designed for research, which requires a skilled electron microscopist for its operation. We are advised by the Department of Health, Education, and Welfare in its memorandum dated March 15, 1973, that the relative simplicity of design and ease of operation of the foreign article is pertinent to the applicant's educational purposes. We, therefore, find that the Model EMU-4C electron microscope is not of equivalent scientific value

to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

B. BLANKENHEIMER,  
Acting Director,  
Office of Import Programs.

[Docket No. FDA-D-269; Various NDA's]

NEW DRUG APPLICATIONS

Notice of Withdrawal of Approval;  
Correction

In FR Doc. 71-11136 appearing on page 18893 in the issue of the FEDERAL REGISTER dated September 23, 1971, the listing of new drug applications being withdrawn is corrected by deleting the entry "13-538, Decadronpoint" from the NDA numbers and drug names listed under Merck Sharp and Dohme, Division Merck & Co., West Point, Pa. 19486.

Dated: March 23, 1973.

MARY A. MCENIRY,  
Assistant to the Director for  
Regulatory Affairs, Bureau of  
Drugs.

[DESI 5795]

NITROFURAZONE SOLUBLE DRESSING  
Drugs for Human Use; Drug Efficacy Study  
Implementation

The Food and Drug Administration has evaluated a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug for topical use: Furacin Soluble Dressing containing nitrofurazone 0.2 percent in a water-soluble base of polyethylene glycols; Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., 13-27 Eaton Avenue, Norwich, NY 13815 (NDA 5-795).

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An abbreviated new drug application is required from any person marketing such drug without approval.

Other dosage forms containing nitrofurazone and dosage forms containing furazolidone have also been reviewed in the drug efficacy study. The oral administration of nitrofurazone and furazolidone has been shown to induce mammary neoplasia in rats. Having considered the available information and the availability on the market of alternative effective drugs associated with less potential risk, the Commissioner has concluded

that there is a lack of proof of safety of these nitrofurazone products. Accordingly there is published elsewhere in this issue of the FEDERAL REGISTER a notice proposing to withdraw approval of all other new drug applications for nitrofurazone-containing preparations.

However, the Commissioner has further concluded that nitrofurazone soluble dressing, because of a more favorable benefit-risk relationship, should remain on the market under the limited labeling conditions described below. In particular, this product has a fairly broad antimicrobial spectrum, and may be effective in important medical uses when there is bacterial resistance to other agents. Other products which would be substituted for it, if it were not available, are preferably reserved for specific, life-threatening infections.

A. *Effectiveness classification.* The Food and Drug Administration has considered the Academy's report, as well as other available evidence, and concludes that nitrofurazone in the form of a soluble dressing is effective for adjunctive therapy of patients with second- and third-degree burns when bacterial resistance to other agents is a real or potential problem. It is also effective for use in skin grafting where bacterial contamination may cause graft rejection and/or donor site infection, particularly in hospitals with historical resistant-bacteria epidemics.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* Nitrofurazone soluble dressing preparations are in water-soluble ointment form suitable for topical administration.

2. *Labeling conditions.* a. The label bears the statement, "Caution: Federal Law prohibits dispensing without prescription."

b. Each container of the drug, including any individually wrapped unit package, bears as part of the permanently affixed label information, prominently and conspicuously placed, and in legible type size, the following: (1) The statement, "For use only as adjunctive therapy of patients with second- and third-degree burns when bacterial resistance to other agents is a real or potential problem; or in skin grafting where bacterial contamination may cause graft rejection and/or donor site infection, particularly in hospitals with historical resistant-bacteria epidemics," and (2) a reference to the "Warnings" section of the full disclosure labeling that accompanies the package.

c. The drug is labeled to comply with all requirements of the Act and regulations promulgated thereunder and those parts of its labeling indicated below are substantially as follows: (Optional additional information, applicable to the drug, may be proposed under other ap-

propriate paragraph headings and should follow the information set forth below.)

DESCRIPTION

Chemically (name of drug product) is nitrofurazone, 5-nitro-2-furaldehyde semicarbazone with the following structure: (To be supplied by manufacturer). (Additional descriptive information to be included by the manufacturer or distributor should be confined to an appropriate description of the physical and chemical properties of the drug and the formulation.)

ACTIONS

Nitrofurazone is a synthetic nitrofurazone with a broad antibacterial spectrum. It is bactericidal against most bacteria commonly causing surface infections, including many that have become antibiotic resistant.

It acts by inhibiting enzymes necessary for carbohydrate metabolism in bacteria. This action occurs in both the aerobic and anaerobic cycles of carbohydrate metabolism, explaining its bactericidal effect in aerobic, anaerobic, and facultative bacteria. Typically it is without appreciable toxicity to human cells.

INDICATIONS

Nitrofurazone is a topical antibacterial agent indicated for adjunctive therapy of patients with second and third-degree burns when bacterial resistance to other agents is a real or potential problem.

It is also indicated in skin grafting where bacterial contamination may cause graft rejection and/or donor site infection particularly in hospitals with historical resistant-bacteria epidemics.

There is no known evidence of effectiveness of this product in the treatment of minor burns or surface bacterial infections involving wounds, cutaneous ulcers or the various pyodermas.

CONTRAINDICATIONS

Known prior sensitization is a contraindication to the use of nitrofurazone.

WARNINGS

Nitrofurazone has been shown to produce mammary tumors when fed at high doses to female Sprague-Dawley rats. The relevance of this to topical use in humans is unknown.

USAGE IN PREGNANCY

Safe use of nitrofurazone during pregnancy has not been established. Therefore, the drug is not recommended for the treatment of women of child-bearing potential, unless the need for the therapeutic benefit of nitrofurazone is, in the attending physician's judgment, greater than the possible risk.

PRECAUTIONS

Use of topical antimicrobials occasionally allows overgrowth of nonsusceptible organisms including fungi. If this occurs or if irritation, sensitization or superinfection develop, treatment with nitrofurazone should be discontinued and appropriate therapy instituted.

ADVERSE REACTIONS

Nitrofurazone has not been significantly toxic in man by topical application. In quantitative studies published in the period 1945-70, 206 instances of clinical skin reaction were reported out of 18,249 patients treated with nitrofurazone topical formulations, an overall incidence of 1.1 percent.

The treatment of nitrofurazone sensitization is not distinctive; general measures commonly used for a variety of sensitization reactions are adequate, except for the rare instance of severe contact dermatitis in

which steroid administration may be indicated.

#### DOSEAGE AND ADMINISTRATION

**BURNS.** Apply directly to the lesion as with a spatula, or first place on gauze. Impregnated gauze may be used. Reapply once daily or once weekly, depending on the preferred dressing technique.

**SKIN GRAFTS.** The dressing is used both to prepare burns and other lesions for grafting, and postoperatively as a prophylactic measure. By rapid eradication of the infection, it can produce clean, firm granulation tissue. Because it is water-soluble and has negligible tissue toxicity, it does not interfere with successful takes. Flushing the gauze with sterile saline facilitates removal.

#### How Supplied

(To be supplied by manufacturer.)

#### ANIMAL TOXICOLOGY

The oral administration of nitrofurazone for 7 days to rats at extremely high dosage levels of 240 mg/kg/day produced severe hepato-renal lesions whereas only renal changes were seen when the dosage level was reduced to 60 mg/kg/day for 60 days.

Dosage levels of 60 and 30 mg/kg/day shortened the time of appearance of the typical mammary gland tumor associated with older female rats. These tumors exhibited the same histological characteristics seen in the spontaneously occurring tumors and were seen only in the female animals. No mammary tumors were seen in rats treated with nitrofurazone orally for 1 year at levels of approximately 11 mg/kg/day. Spermatogenic arrest was noted in the male rats at dosage levels of 30 mg/kg/day and above.

Dogs treated orally with nitrofurazone for 400 days at levels of 11 mg/kg/day showed no toxic effects related to drug treatment. The single intravenous administration in dogs of 20, 35, or 75 mg/kg nitrofurazone produced clinical signs of irritation, salivation, emesis, diarrhea, excitation, weakness, ataxia and weight loss, whereas 100 mg/kg produced convulsions and death.

There was no evidence of toxicosis in rhesus monkeys treated with doses of nitrofurazone as high as 58 mg/kg/day for 10 weeks and 23 mg/kg/day for 63 weeks.

Finally, when 30 mg/kg of nitrofurazone was administered to pregnant rabbits once daily on days 7 through 16 of pregnancy there was a slight increase in the frequency of stillbirths, but no teratogenic effects were seen.

**3. Marketing status.** Marketing of such drugs may be continued under the conditions described in the notice entitled Conditions for Marketing New Drugs Evaluated in Drug Efficacy Study, published in the FEDERAL REGISTER July 14, 1970 (35 FR 11273), as follows:

a. For holders of "deemed approved" new drug applications (i.e., an application which became effective on the basis of safety prior to October 10, 1962), the submission of a supplement for revised labeling and an abbreviated supplement for updating information as described in paragraphs (a)(1) (i) and (iii) of the notice of July 14, 1970.

b. For any person who does not hold an approved or effective new drug application, the submission of an abbreviated new drug application as described in paragraph (a)(3)(i) of that notice.

#### NOTICES

c. For any distributor of the drug, the use of labeling in accord with this announcement for any such drug shipped within the jurisdiction of the Act as described in paragraph (b) of that notice.

A copy of the Academy's report has been furnished to the firm referred to above. Communications forwarded in response to this announcement should be identified with the reference number DESI 5795, directed to the attention of the appropriate office listed below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852:

Supplements (Identify with NDA number): Office of Scientific Evaluation (BD-100), Bureau of Drugs.

Original abbreviated new drug applications: Drug Efficacy Study Implementation Project Office (BD-60), Bureau of Drugs.

Requests for the Academy's report: Drug Efficacy Study Information Control (BD-66), Bureau of Drugs.

All other communications regarding this announcement: Drug Efficacy Study Implementation Project Office (BD-60), Bureau of Drugs.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application reviewed and are subject to this notice. See 21 CFR 130.40 (37 FR 23185, Oct. 31, 1972). For example, the Food and Drug Administration regards nitrofurazone in either soluble powder form or solution form intended for the conditions of use described herein to be subject to this notice. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-53, as amended; 21 U.S.C. 352, 355), and the Administrative Procedure Act (5 U.S.C. 554), and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Dated: March 22, 1973.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

[FR Doc. 73-5991 Filed 3-28-73; 8:45 am]

[DESI 7358; Docket No. FDC-D-520; NDA 5-795 et al.]

#### NORWICH PHARMACAL CO.

**Certain Nitrofurazone Drugs; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications**

Notice is hereby given to Norwich Pharmacal Co., Division of Morton-Norwich Products, Inc., 13-27 Eaton Avenue, Norwich, NY 13815, and to any interested person who may be adversely affected, that the Commissioner of Food and Drugs proposes to issue an order under the provisions of section 505(e) of

the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the following new drug applications, or pertinent parts thereof, and all amendments and supplements thereto held by the Norwich Pharmacal Co.:

NDA No.	Drug Name
NDA 5-795	That part of the application providing for Furacin (nitrofurazone) Vaginal Suppositories and Ear Solution.
NDA 7-358	Furacin (nitrofurazone with ephedrine) Nasal Drops.
NDA 11-065	Tricofuron (furazolidone and nitrofurazone) Vaginal Powder and Suppositories.
NDA 11-270	Furoxone (furazolidone) Tablets.
NDA 11-323	Furoxone (furazolidone with kaolin and pectin) liquid.
NDA 12-403	Furacin (nitrofurazone and nitrofurazone with dipropion hydrochloride) Otic Drops.

With the exception of Furacin Ear Solution, Nasal Drops, and Otic Drops, the above-listed drug products were reviewed by the National Academy of Sciences-National Research Council, Drug Efficacy Study Group and classified as less than effective.

It is proposed to withdraw approval of these new drug applications on the grounds that (1) new information with respect to the drugs, evaluated together with the evidence available at the time of approval of the applications, shows there is a lack of substantial evidence that the drugs will have all the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling; and (2) tests by methods not deemed reasonably applicable when such applications were approved, evaluated together with the evidence available when the applications were approved, show that such drugs containing either nitrofurazone or furazolidone for human use, are not shown to be safe for use under the conditions of use upon the basis of which the applications were approved. Specifically, the oral administration of nitrofurazone and of furazolidone has been shown to induce mammary neoplasia in rats. None of the nitrofurazone and furazolidone-containing drugs have been adequately tested for absorption in humans. Inadequate animal data exist on topical use. A serious question of safety regarding the use of nitrofurazone and furazolidone in humans is therefore raised. Other equally effective drugs having less potential risk are available. The subject drugs are not specific for use in life-threatening or other important medical uses. Accordingly, the Food and Drug Administration concludes that, because of the unfavorable benefit-to-risk ratio associated with use of these drug products, there is a lack of proof of safety.

#### NOTICES

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed and are covered by this notice. See 21 CFR 130.40 (37 FR 32185, Oct. 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before April 30, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election on or before April 30, 1973, will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s) or pertinent parts thereof.

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before April 30, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that the drugs are safe for use under the conditions of use prescribed, recommended, or suggested in their labeling and that substantial evidence exists demonstrating the effectiveness of the products for such use, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after April 30, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday. This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: March 22, 1973.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

#### CLINICAL CANCER TRAINING COMMITTEE (GENERAL AND DENTAL)

##### Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Clinical Cancer Training Committee (General and Dental), April 19, 1973, at 9 a.m., National Institutes of Health, Building 31, Conference Room 6. This meeting will be open to the public from 9 a.m., April 19, 1973, to discuss the present status of the Clinical Cancer Training Program and closed to the public from 9:30 a.m., April 19, 1973, in accordance with the provisions set forth in section 552(b)(4) of title 5, United States Code, and section 10(d) of Public Law 92-463. Attendance by the public will be limited to space available.

Mr. Frank Karel, Associate Director for Public Affairs, NCI, Building 31, Room 10A31, National Institutes of Health, Bethesda, Md. 20014 (301/496-1911), will furnish summaries of the open/closed meeting and roster of committee members.

William L. Ross, M.D., Executive Secretary, Westwood Building, Room 826, National Institutes of Health, Bethesda, Md. 20014 (301/496-7803), will provide substantive program information.

Dated: March 22, 1973.

# LIPID METABOLISM ADVISORY COMMITTEE

## Amended Notice of Meeting

Pursuant to Public Law 92-463 and previous notice of meeting dated March 13, 1973 (38 FR 7482, March 22, 1973), notice is hereby given that the meeting of the Lipid Metabolism Advisory Committee, National Heart and Lung Institute, April 5 and 6, 1973, 9:15 a.m., National Institutes of Health, Building 31, will be held in Room 4A21 instead of Conference Room 5. This meeting will be open to the public from 9:15 a.m. to 12 noon, April 5, to discuss Lipid Metabolism Branch status regarding various projects which the Branch is conducting; the remaining sessions will be closed to review contracts in accordance with the provisions set forth in section 552(b)(4) of title 5 United States Code and 10(d) of Public Law 92-463. Attendance by the public will be limited to space available.

Dr. Jerome G. Green, Director, Division of Extramural Affairs, NHLI, NIH Westwood Building, Room 5A18, phone 496-7416, will furnish summaries of the meeting and rosters of the committee members. Substantive program information may be obtained from Dr. Basil Rifkind, Deputy Chief, Lipid Metabolism Branch, NHLI, NIH Building 31, Room 4A19, phone 496-1681.

Dated: March 22, 1973.

## Office of Education

# NATIONAL ADVISORY COMMITTEE ON THE EDUCATION OF SPANISH AND MEXICAN AMERICANS

## Notice of Public Meeting

Notice is hereby given, pursuant to Public Law 92-463, that the next meeting of the National Advisory Committee on the Education of Spanish and Mexican Americans will be held on April 11-12, 1973, commencing at 9 a.m., local time, on April 11, in Room 1160, FOB-6, 400 Maryland Avenue SW., Washington, D.C.

The National Advisory Committee on the Education of Spanish and Mexican Americans is established under section 442(a) of General Education Provisions Act, Public Law 91-230, under 20 U.S.C. 1233a. The Committee is established to advise the Commissioner of Education on problems central to the education of Spanish-speaking children and adults, particularly those of bilingual, bicultural families.

The meeting of the Committee shall be open. The proposed agenda includes a review of the draft annual report to the Commissioner of Education. Records shall be kept of all Committee proceedings (and shall be available for public inspection at the Office for Spanish Speaking American Affairs, located in Room 1155, FOB-6, 400 Maryland Avenue SW., Washington, D.C.

Signed in Washington, D.C., on March 19, 1973.

GILBERT CHAVEZ,  
Director for Spanish,  
Speaking American Affairs.

# DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D-73-226]

## ASSISTANT REGIONAL ADMINISTRATOR FOR EQUAL OPPORTUNITY ET AL

### Designations

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Deputy Regional Administrator, Region IX (San Francisco), during a vacancy in the position of, or during the absence of, the Deputy Regional Administrator, with all the powers, functions, and duties redelegated or assigned to the Deputy Regional Administrator: *Provided*, That no officer is authorized to serve as Acting Deputy Regional Administrator unless all other officers whose titles precede his in this designation are unable to act by reason of absence; *Provided, further*, That if an officer designated below is serving as Acting Regional Administrator, the officer whose title follows his in this designation shall serve as Acting Deputy Regional Administrator:

1. Assistant Regional Administrator for Equal Opportunity.
2. Assistant Regional Administrator for Administration.
3. Assistant Regional Administrator for Housing Management.
4. Regional Counsel.
5. Assistant Regional Administrator for Community Development.
6. Assistant Regional Administrator for Housing Production and Mortgage Credit.
7. Assistant Regional Administrator for Community Planning and Management.

This designation supersedes and cancels all previously published designations of Acting Deputy Regional Administrator, Region IX (San Francisco).

Effective as of the eighth day of January 1973.

ROBERT H. BAIDA,  
Regional Administrator,  
Region IX (San Francisco).

# ATOMIC ENERGY COMMISSION ADVISORY COMMITTEE ON REACTOR SAFEGUARDS

## Subcommittee on ATWS—Reliability Analysis; Meeting

MARCH 26, 1973.

In accordance with the purposes of sections 29 and 182b of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards' combined Subcommittee on ATWS (Anticipated Transients with Failure to Scram)—Reliability Analysis will hold a meeting on April 7, 1973, in Room 1046, 1717 H Street NW., Washington, DC. The subjects scheduled for discussion are: Anticipated transients with failure to scram, diversity and redundancy of engineered safety systems, the reactor experience information system, and the Electrical Research Council program.

The Subcommittee is meeting to formulate recommendations to the ACRS regarding the above subjects.

I have determined, in accordance with subsection 10(d) of Public Law 92-463, that the meeting will consist of an exchange of opinions, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close such meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

JOHN V. VINCIGUERRA,  
Advisory Committee  
Management Officer.

[Docket No. 50-418]

# MITSUBISHI INTERNATIONAL CORP.

## Application for Facility Export License

Please take notice that Mitsubishi International Corp., New York, N.Y., has submitted to the Atomic Energy Commission an application for a license to authorize the export of two pressurized water reactors with thermal power levels of 3,411 megawatts each to the Kansai Electric Power Co., Inc., of Osaka, Japan, and that the issuance of such license is under consideration by the Atomic Energy Commission.

No license authorizing the proposed reactor export will be issued until the Atomic Energy Commission determines that such export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to section 123 of the Atomic Energy Act of 1954, as amended (Act), nor until the Atomic Energy Commission has found that:

(a) The application complies with the requirements of the Act, and the Atomic Energy Commission's regulations set forth in Title 10, Chapter 1, Code of Federal Regulations, and

(b) The reactors proposed to be exported are utilization facilities as defined in said Act and regulations.

In its review of applications solely to authorize the export of production or utilization facilities, the Atomic Energy Commission does not evaluate the health and safety characteristics of the facility to be exported.

Unless a request for a hearing is filed with the Atomic Energy Commission by the applicant on or before April 13, 1973, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of Regulation may, upon the determinations and findings noted above, cause to be issued to Mitsubishi International Corp., a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in the notice, the Atomic Energy Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Atomic Energy Commission's Public document room located at 1717 H Street NW., Washington, D.C.

Dated in Bethesda, Md., this 19th day of March 1973.

For the Atomic Energy Commission.

S. H. SMILEY,  
Deputy Director for Fuels and  
Materials, Directorate of Li-  
censing.

[Docket No. 50-395]

# SOUTH CAROLINA ELECTRIC AND GAS CO.

## Issuance of Construction Permit

Notice is hereby given that, pursuant to the Initial Decision of the Atomic Safety and Licensing Board, the Deputy Director for Reactor Projects, Directorate of Licensing, has issued Construction Permit No. CPPR-94 to the South Carolina Electric and Gas Co. for construction of the Virgil C. Summer Nuclear Station, Unit 1, a pressurized water reactor, on the applicant's site in Fairfield County, S.C. The site is located immediately north of Parr, S.C., and is adjacent to the Monticello Reservoir created by placing a series of dams across Frees Creek, a tributary of the Broad River. The Reservoir is located east of the Broad River and west of South Carolina State Highway 215, about 26 miles north of Columbia, in western Fairfield County, S.C.

Copies of the Initial Decision and Construction Permit No. CPPR-94 are available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and in the Fairfield County Library, Vanderhorst Street, Winnsboro, S.C. Copies of the construction permit may be obtained upon request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Md., this 21st day of March 1973.

For the Atomic Energy Commission.

R. C. DEYOUNG,  
Assistant Director for Pressur-  
ized Water Reactors Director-  
ate of Licensing.

##### FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19715; FCC 73-330]

##### ASCERTAINMENT OF COMMUNITY PROBLEMS BY BROADCAST APPLICANTS Requirements and Policies; Notice of Inquiry

In the matter of ascertainment of community problems by broadcast applicants Part I, sections IV-A and IV-B, of broadcast application forms, and primer thereon.

1. The Commission has under consideration its requirements and policies

with respect to ascertaining and meeting community problems by broadcast applicants.<sup>1</sup>

2. Our Task Force study concerning deregulation of broadcasting, under the supervision of Commissioner Wiley, indicates that the ascertainment process should be examined for its overall effectiveness in the public interest.

3. Pursuant to the Commission's Program Policy Statement of 1960, "The broadcaster is obligated to make a positive, diligent, and continuing effort, in good faith, to determine the tastes, needs, and desires of the public in his community and to provide programming to meet those needs and interests." (FCC 60-970; 25 FR 7291.)

4. The Commission's present standards for the ascertainment process are set forth in a question-and-answer type "Primer on Ascertainment of Community Problems by Broadcast Applicants", adopted February 18, 1971 (Report and Order, Docket No. 18774, 27 FCC 2d 650). The Commission stated that, "... the amended Primer, in our view, will aid broadcasters in being more responsive to the problems of their communities, add more certainty to their efforts in meeting Commission standards, make available to other interested parties standards by which they can judge applications for stations licensed to their community, and aid our staff in applying standards uniformly." The Commission indicated, however, that with respect to renewal applicants the Primer was to serve "as an interim measure until other standards are adopted." (Id., at 655.)

5. Our experience indicates that the principle of ascertaining and meeting community problems is one important requisite for service in the public interest. We are concerned here, as part of our continuing study on deregulation of broadcasting, with whether present ascertainment requirements serve the public interest in the most effective way possible and, if not, what improvements could be made to accomplish that objective. Over 600 comments have been filed in our deregulation study. Many contend that various specific requirements of the ascertainment process are unnecessary, impractical, unduly burdensome and, thus, should be modified or deleted.

6. Comments in our deregulation study also assert that radio is a different medium from television and should be treated differently in the matter of ascertainment. Accordingly, Part I of the Inquiry is designed to explore these alleged differences relative to the role of each of the media in discharging its statutory responsibility for serving the public interest, convenience, and necessity. An inherent consideration, in this regard, is any possible conflict with man-

<sup>1</sup> The word "problems" is used as a short form of the phrase "problems, needs and interests." (A. 3. Primer on Ascertainment)

#### NOTICES

dates of the Communications Act of 1934, as amended. Additionally, the comments we have received suggest that certain variables (e.g., market size, numbers of stations, number of employees, specialized formats, etc.) also should be considered in determining ascertainment procedures.

7. While the issues involved in Part I are very broad and relate to many aspects of our regulatory policy (some of which may be the subject of subsequent Commission action), the focus of this inquiry is particularly related to ascertaining and meeting community problems. Thus, Part II deals specifically with ascertainment processes for both radio and television in light of any difference between the two media and operational variables involved (as elicited in Part I).

8. This notice of inquiry elicits comments (on issues set forth below) applicable to both radio and television. Due consideration will be given, of course, to any comments received. However, in all probability, our initial concern will be with radio, since it is the primary focus of our deregulation study. Additionally, radio stations (of which there are approximately 10 times as many as television stations) have wider variances as to size of market, operating power, hours of operation, type of service (AM, FM) and programming format to serve the public. These variances and the resultant diverse nature of radio make its ascertainment considerations of more immediate concern.

9. Comments are invited on the following questions:

##### PART I

(a) What is the role (or function) of radio in discharging its statutory responsibility for serving the public interest, convenience and necessity; and is that role affected by size of market ("small market", Top 50, Top 100, etc.), number of stations in a market, number of station employees, specialized programming or other variables?

(b) What is the role (or function) of television in discharging its statutory responsibility for serving the public interest, convenience and necessity; and is that role affected by any variables such as those indicated in (a) above?

##### PART II

(a) Do the roles (or functions) of radio and television in discharging their responsibility for serving the public interest, convenience and necessity differ to the extent that requirements for ascertaining and meeting community problems should be different for each service? If so, would such different requirements be inconsistent with any part of the Communications Act of 1934, as amended? Similarly, should any of the variables set forth in Part I dictate any different requirements and, if so, would such different requirements be inconsistent with the Act?

(b) In answering the general questions in (a) of this part, and in considering the entire subject of ascertaining and meeting community problems, the following specific questions should be addressed:

(1) Should an ascertainment of commu-

<sup>1</sup> We specifically invite comments on how "small market" should be defined both as to radio and television.

nity problems be made 6 months before filing an application, as now required, at some different time, or on a continuing basis? What should be considered a "continuing" basis? How should it be accomplished? How should it be documented?

(2) Are consultations with community leaders and members of the public, in the manner provided by the Primer, helpful to the station and to the public which the station is licensed to serve?

(3) Should consultations with community leaders be conducted by principals and management-level employees only, or by other employees as well? If so, which ones? By non-employees?

(4) Should a professional research firm be permitted to make the ascertainment of community leaders for a station? For all stations in the community collectively? Would use of a research firm be consistent with the Commission's traditional view that this is "a duty personal to the licensee and may not be avoided by delegation of the responsibility to others." (Commission's Program Policy Statement of 1960, supra.)

(5) Is it advisable to permit:

(i) Group consultations (in which all licensees in the community meet with community leaders, community groups, and members of the public)? If so, under what circumstances, and why?

(ii) Ascertainment of community problems by means of broadcast programming (including announcements) in which community leaders, members of the public, etc., participate (such as panel and interview programs)?

(iii) Ascertainment of community problems by Town Hall types of meetings? Should this procedure be used to consult with all community leaders? The public? Or both? Would such meetings be representative of the public the station is licensed to serve?

(6) Should consultation with community leaders by telephone continue to be permitted? Why?

(7) In the broadcast of matter designed to meet community needs, should credit be given for spot announcements as well as for programs? May spot announcements be used exclusively?

(8) Should a station using a specialized programming format be permitted to ascertain and meet only the problems of its specialized audience? Is it possible to define accurately that audience out of the total general public? If so, how?

(9) Should different requirements for ascertaining and meeting community problems be applied according to different types of applications, i.e., for new stations, major changes in facilities, assignments and transfers and renewals? Why?

(10) Should requirements for ascertaining and meeting community problems be incorporated in the Commission's rules or left, as now, in policy statements and forms? Why?

10. Comments in both parts of this proceeding are not limited to the foregoing questions, but may be addressed to

<sup>1</sup> It is the Commission's current policy to permit joint consultations under the following conditions: Each individual community leader must be given an opportunity to freely present his opinion of community problems; each broadcaster present must have an opportunity to question each leader; and the joint meetings should include community leaders who have the same or equal plane of interest and responsibility. See June 30, 1971, letter to Southern California Broadcasters Association (FCC 71-699); and Aug. 4, 1971, letter to Metro Portland Broadcast Committee (FCC 71-825).

any facet of the processes for ascertaining and meeting community needs. It is hoped that comments, either formal or informal, will be submitted by interested parties from all segments of the public and broadcasting industry.

11. The questions above are designed to elicit information which would be helpful in this proceeding. The Commission takes no position on these matters at this time.

12. This action is taken pursuant to section 403 of the Communications Act of 1934, as amended. Interested parties responding to this Notice of Inquiry may file comments on or before June 1, 1973. Reply comments may be filed on or before June 22, 1973. An original and 11 copies of each formal response must be filed in accordance with the provisions of §§ 1.49 and 1.51 of the Commission's rules. However, in an effort to obtain the widest possible response in this proceeding from licensees and members of the public, informal comments (without extra copies) will be accepted. Copies of all pleadings filed in this matter will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Adopted: March 22, 1973.

Released: March 23, 1973.

FEDERAL COMMUNICATIONS COMMISSION  
[SEAL] BEN F. WAPLE,  
Secretary.  
[FR Doc. 73-6047 Filed 3-28-73; 8:45 am]

##### CHICAGO REGION

##### Return of License Applications

MARCH 21, 1973.

Due to the lack of familiarity of the land-mobile community with the FCC Form 425, the Chicago Regional Office has found that there is an unusually high frequency of errors and omissions on the license applications which have been submitted since January 1, 1973. In most instances the applicant does not have the technical expertise necessary to make corrections. It is usually a manufacturer or an independent service shop which has prepared the application and signed section II of the form. When a defective Form 425 is returned to an applicant it will usually go to the signer of section II for the necessary corrections.

With this in mind and in order to facilitate processing, the Chicago Regional Office will establish the following procedure effective immediately. Minor defects in a Form 425 need not result in its immediate return to the applicant,

<sup>1</sup> Commissioner Johnson dissenting and issuing a statement; Commissioner H. Rex Lee concurring and issuing a statement; Commissioner Hooks absent. Dissenting statement of Commissioner Johnson filed as part of the original document.

but instead the application may be taken out of the processing line and suspended for a period of 1 calendar week. During this week, the manufacturer or service shop may examine these applications at the Chicago office and make note of any correction. These corrections must then be submitted as amendments to the affected application on new pages of Form 425. The amendments must conform in all respects with the Commission's procedural requirements concerning amendments. In no instance will corrections be permitted to the face of the original Form 425 without specific written authorization from the applicant.

Minor details on how the system will operate will be worked out with each interested manufacturer or service shop. However, when no interest in using this procedure is expressed by a particular manufacturer or service shop, the application will be returned immediately to the applicant without the suspense period of 1 week. It is necessary to stress that fairness to the applicant requires a limited period of time for this procedure. Therefore, if specific arrangements to correct the errors have not been made within 7 calendar days the application will be returned to the applicant.

Several additional points should be mentioned. First, this "suspense procedure" is designed for minor deficiencies only. Where questions of legal qualifications, service eligibility, frequency availability, and the like are involved, the application will be returned immediately to the applicant. Second, this system is not intended to operate in the event the applicant himself has signed section II. In these relatively rare instances the applicant will be contacted by phone or mail in order to initiate corrections and clarifications.

Finally, it should be emphasized that this is an experimental procedure and should it appear to result in unfairness to an individual applicant or class of applicants it will be terminated immediately.

#### FEDERAL POWER COMMISSION

[Docket No. CP73-246]

#### BACA GAS GATHERING SYSTEM, INC. Notice of Application

MARCH 27, 1973.

Take notice that on March 19, 1973, Baca Gas Gathering System, Inc. (Applicant), Hartford Building, Dallas, Tex. 75201, filed in Docket No. CP73-246 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Co. (Panhandle) from production in the Playa and Northwest Flank Fields, Baca

County, Colo., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it intends to purchase gas from PetroDynamics, Inc., at 32 cents per Mcf at 14.65 p.s.i.a. and proposes to sell up to 4,000 Mcf of gas per day to Panhandle in Morton County, Kans., at 37.6 cents per Mcf at 14.65 p.s.i.a. for 1 year within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 73-6197 Filed 3-28-73; 10:01 am]

[Docket No. CI73-611]

#### TRIBAL OIL CO. ET AL.

##### Notice of Application

MARCH 22, 1973.

Take notice that on March 15, 1973, Tribal Oil Co., et al (Applicants), % L. E. Donohoe, Jr., P.O. Drawer 3507, Lafayette, LA 70501, filed in Docket No. CI73-

611 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Trunkline Gas Co. from the Oretta Field Area, Beauregard Parish, La., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants propose to sell approximately 30,000 Mcf of gas per month for 1 year at 35 cents per Mcf at 15.025 p.s.i.a., subject to upward and downward B.t.u. adjustment, within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to provide a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

#### FIRST NATIONAL CITY CORP.

##### Proposed Retention of Advance Mortgage Corp.

First National City Corp., New York, N.Y., has applied, pursuant to section 4(c) (8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4 (b) (2) of the Board's Regulation Y, for permission to retain voting shares of Advance Mortgage Corp., Southfield, Mich., and its wholly owned subsidiaries except Lakeland Assurance Inc. Notice of the application was published on December 27, 1972, in various editions of The Wall Street Journal and on December 28, 1972, in 22 newspapers circulated in communities where Advance Mortgage Corp. has offices.

Applicant states that Advance Mortgage Corp. engages in the following mortgage banking activities: (1) Origination and placement of FHA and VA one to four family residential mortgage loans with institutional investors; (2) origination and placement of apartment and other income producing property mortgage loans with institutional investors; (3) servicing of mortgage loans for institutional investors; and (4) origination of FHA multifamily construction loans. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 18, 1973.

Board of Governors of the Federal Reserve System, March 22, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.

#### NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 73-25]

##### AD HOC SUBCOMMITTEE OF THE SPACE SCIENCE AND APPLICATIONS STEERING COMMITTEE

##### Notice of Establishment Determination

Pursuant to section 9(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), and after consultation with the Office of Management and Budget, I have determined that the establishment of the following advisory subcommittee is in the public interest in connection with the performance of duties imposed upon NASA by law:

Ad Hoc Subcommittee of the Space Science and Applications Steering Committee for the Evaluation of Large Space Telescope Experiment Proposals.

The function of this subcommittee will be to review the scientific merit of proposals which are submitted for the definition of instrumentation for the Large Space Telescope. The reason for establishing this subcommittee is to obtain expert scientific advice in connection with the early definition of instrumentation and timely selection of experiments for the Large Space Telescope mission.

The Space Science and Applications Steering Committee, under which the subcommittee will operate, is a NASA internal committee composed entirely of Government employees.

Dated: March 23, 1973.

JAMES C. FLETCHER,  
Administrator.

#### AEROSPACE SAFETY ADVISORY PANEL

##### Notice of Open Meeting

An open meeting of Aerospace Safety Advisory Panel will be held on April 10, 1973, at NASA Headquarters, Room 7002, capacity, 60, 400 Maryland Avenue SW., Washington, DC.

The Panel is to review safety studies and operations plans referred to it and shall make reports thereon, shall advise the Administrator with respect to the hazards of proposed or existing facilities and proposed operations and with respect to the adequacy of proposed or existing safety standards, and shall per-

form such other duties as the Administrator may request.

Pursuant to carrying out its statutory duties, the Panel will review, evaluate, and advise on those program management policies, management systems, procedures, and practices that contribute to risk identification and assessment by management. Priority shall be given to those programs that involve the safety of manned flight.

The Chairman of the Panel is Lt. Gen. Carroll H. Dunn, USA. The other members are Dr. Harold M. Agnew, Hon. Frank C. Di Luzio, Mr. Herbert E. Grier, Mr. Paul L. Kartzke, Mr. Bruce T. Lundin, Mr. Howard K. Nason, Dr. Henry Reining, Jr., and Dr. Ian M. Ross.

The contact for further information is Carl R. Praktish, Executive Secretary, Aerospace Safety Advisory Panel, 400 Maryland Avenue SW., Washington, DC 20546 (Phone: Area Code 202-755-8436). The agenda is:

10 a.m.—Panel presentation and discussion of their Skylab Report with Administrator and Deputy Administrator; 11 a.m.—Orientation briefing on Space Shuttle program by Program Office; and, 1 p.m.—Orientation briefing on Apollo-Soyuz Test program by Program Office.

HOMER E. NEWELL,  
Associate Administrator, National Aeronautics and Space Administration.

MARCH 26, 1973.

#### NATIONAL SCIENCE FOUNDATION

##### ADVISORY PANEL FOR CHEMISTRY

##### Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that a meeting of the Advisory Panel for Chemistry will be held at 9 a.m. on April 7 and 8, 1973, in the Seville Room, Adolphus Hotel, Commerce at Akard Street, Dallas, Tex. 75221. The purpose of this panel is to provide advice and recommendations concerning support for research in chemistry.

The agenda for this meeting shall include:

##### APRIL 7 SESSION

##### MORNING

9:00—Introductory remarks, Panel Chairman.  
9:15—NSF 1974 Budget, Division Director, Mathematical and Physical Sciences Division.  
9:45—"Issues in the Support of Chemical Research", presentations by panel members.  
12:00—Break for lunch.

##### AFTERNOON

1:30—Panel discussion of presentations on "Issues in the Support of Chemical Research".  
3:15—Panel discussion of matrix representation of the importance of chemical research to national goals.  
4:15—Discussion of the NSF Chemistry Section's experiment with data from "Citation Index", Program Director, Chemical Thermodynamics Program.

## NOTICES

APRIL 8 SESSION  
MORNING

9:00—Discussion of the projected 1973 Chemistry Program Review, Program Director, Chemical Instrumentation Program.  
12:00—Break for lunch.

## AFTERNOON

1:30—Discussion under the leadership of the Panel Chairman of specific topics, as outlined below:  
a. Instrument Program—proposed changes.  
b. Analysis of proposal actions, FY 1968-FY 1972.  
c. Analysis of proposal ratings.  
d. U.S.-USSR Cooperative Program in Chemical Catalysis.  
e. Importance of neutron beams in chemical research.  
f. An attempt to quantify the increasing sophistication in chemical synthesis.  
3:45—Period devoted to public discussion.  
5:00—Adjournment.

This meeting shall be open to the public and attendance will be limited to space available.

For further information concerning this panel, contact Dr. M. Kent Wilson, Section Head, Chemistry Section, Room 346, 1800 G Street NW., Washington, DC 20550. Summary minutes of this meeting may be obtained by contacting the Management Analysis Office, Room K-720, 1800 G Street NW., Washington, DC 20550.

T. E. JENKINS,  
Assistant Director  
for Administration.

ADVISORY PANEL FOR PHYSICS  
Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a meeting of the Advisory Panel for Physics will be held at 9 a.m. on April 5, 6, and 7, 1973, in Room 540 at 1800 G Street NW., Washington, DC 20550. The purpose of this panel is to provide advice and recommendations (a) concerning the impact of the NSF support of Physics; and (b) as part of the review and evaluation process for specific proposals and projects.

The agenda for this meeting shall include (entries in parentheses identify open portions of meeting):

APRIL 5 SESSION  
MORNING

Elementary Particle Physics: Discussion of NSF and AEC programs—panel members, NSF staff and AEC staff (open to the public).

## AFTERNOON

Review of proposed NSF support of Elementary Particle Physics projects.

APRIL 6 SESSION  
MORNING

Discussion of specific topics related to other areas of Physics—NSF officials and staff (open to the public):

- NSF FY 1973, and FY 1974, budget.
- Relationship of NSF's RANN programs

- to basic research support.
- Research initiation grants.
- Formulation of long range plans in the various fields of Physics.
- Other business of interest to the panel.

## AFTERNOON

Continuation of discussion of specific topics related to other areas of Physics (open to the public).  
3:00—Discussion of proposed long term NSF support of individual Physics projects.

APRIL 7 SESSION  
MORNING

Resumption of discussion of remaining topics related to other areas of Physics—listed under April 6 session—(open to the public).

## AFTERNOON

Continuation of discussion of remaining topics related to other areas of Physics (open to the public).  
3:00—Period devoted to public discussion (open to the public).  
4:00—Adjournment.

Where specified in the agenda, the meeting will be open to the public on a space available basis. The remainder of the meeting is concerned with matters which are within the exemptions of the Freedom of Information Act, 5 U.S.C. 552(b) and will not be open to the public in accordance with the determination by the Director of the National Science Foundation dated January 15, 1973, pursuant to the provisions of section 10(d) of the Federal Advisory Committee Act.

For further information concerning this panel, contact Dr. Marcel Bardon, Section Head, Physics Section, Room 348, 1800 G Street NW., Washington, DC 20550. Summary minutes relative to the open portion of this meeting may be obtained by contacting the Management Analysis Office, Room K-720, 1800 G Street NW., Washington, DC 20550.

T. E. JENKINS,  
Assistant Director  
for Administration.

OFFICE OF EMERGENCY  
PREPAREDNESS

## TENNESSEE

## Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in me by the President under Executive Order 11575 of December 31, 1970; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744); notice is hereby given that on March 21, 1973, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Tennessee resulting from heavy rains and flooding beginning on or about March 14, 1973, are of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of Tennessee. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in me by the President under Executive Order 11575 to administer the Disaster Relief Act of 1970 (Public Law 91-606), I hereby appoint Mr. William C. McMillen, Regional Director, OEP Region 4, to act as the Federal Coordinating Officer to perform the duties specified by Section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of Tennessee to have been adversely affected by this declared major disaster.

The Counties of:

Bradley,  
Coffee,  
Hamilton,  
Marion.

Maury,  
Monroe,  
Rhea.

Dated: March 23, 1973.

DARRELL M. TRENT,  
Acting Director,  
Office of Emergency Preparedness.

DIVERSIFIED TAX-EXEMPT BOND FUND,  
CALIFORNIA SERIES I AND BLYTH  
EASTMAN DILLON & CO., INC.

## Filing of Application

MARCH 23, 1973.

Notice is hereby given that Diversified Tax-Exempt Bond Fund, California Series I (hereinafter called the Fund), a unit investment trust registered under the Investment Company Act of 1940 (Act), and its sponsor, Blyth Eastman Dillon & Co., Inc. (Sponsor), 555 California St., San Francisco, CA 94104 (the Fund and the Sponsor hereinafter collectively referred to as Applicants), have filed an application pursuant to section 6(c) of the Act for an order of the Commission exempting the Fund and all subsequent national or State series of the same or similar title of which Sponsor is a sponsor or cosponsor from the provisions of section 14(a) of the Act and from the provisions of Rule 19b-1 and Rule 22c-1 thereunder. All interested persons are referred to the application on file with the Commission for a statement of the representations therein, which are summarized below.

The Fund is a unit investment trust organized under the laws of the State of California. Sponsor presently acts as sole sponsor of the Fund.

The Sponsor has filed a Form S-6 Registration Statement under the Securities Act of 1933 (the 1933 Act) covering a maximum of 15,000 Units of fractional undivided interest in the Fund (hereinafter called the Units) to be offered to investors at a public offering price set forth in the prospectus included in the 1933 Act Registration Statement. The number of Units being registered includes 5,000 units which will be resold from time to time by the Sponsor in connection with its market-making activities. The 1933 Act Registration Statement has not yet become effective. The Sponsor has also filed a Form N-8-A Notification of Registration and a Form N-8B-2 Registration Statement under the Act relating to the Fund.

The Fund will be governed by a trust agreement (the Trust Agreement) under which the Sponsor will act as such and Bank of American National Trust and Savings Association (the Association) will act as Trustee and Evaluator. Pursuant to the Trust Agreement, Sponsor will deposit with the Trustee \$10 million principal amount of bonds (the Bonds) which the Sponsor shall have accumulated for such purpose. Simultaneously with such deposit the Trustee will deliver to the Sponsor registered certificates for 10,000 Units, which will represent the entire ownership of the Fund. These

Units are in turn to be offered for sale to the public by the Sponsor.

Applicants state that the Bonds will not be pledged or be in any other way subjected to debt at any time after the Bonds are deposited with the Trustee. All of the Bonds will be tax-free municipal bonds. The Association will act as Bond Advisor to the Fund and will advise the Sponsor regarding the Fund's bond portfolio. It will receive a fee of \$40,000 for such services.

The assets of the Fund will consist of the Bonds, such bonds as may be held from time to time upon certain refundings in exchange for or substitution of any of the Bonds, accrued and undistributed interest, and undistributed cash. Certain of the Bonds may from time to time be sold under the circumstances set forth in the Trust Agreement or may be redeemed or may mature in accordance with their terms. The proceeds from such dispositions will be distributed to the holders of Units of the Fund ("Certificateholders") and not reinvested. There is no provision in the Trust Agreement for the sale and reinvestment of the Bonds, and such activity has not and will not take place.

Initially, each Unit will represent a fractional undivided interest, the numerator of which will be 1 (one), and the denominator of which will be the number of Units issued by the Fund. Units are, and in connection with future Series will be, redeemable. In the event that any Units are redeemed, the denominator of the fraction will be reduced and the fractional undivided interest represented by each Unit increased. Units will remain outstanding until redeemed or until the termination of the Trust Agreement. The Trust Agreement may be terminated by 100 percent agreement of the Certificateholders or, in the event that the value of the Bonds falls below one of two amounts specified, either upon direction of the Sponsor to the trustee or by the trustee without such direction, respectively. There is no provision in the Trust Agreement for the issuance of any Units after the initial issuance and such activity will not take place (except to the extent the secondary trading by the Sponsor in the units is deemed the issuance of Units under the 1933 Act).

The Sponsor, while under no obligation to do so, intends to maintain a market for Units of the Fund for a period of 16 months and during said period continually to offer to purchase such Units at prices based on the most recent evaluation by the evaluator, which prices will be based upon the aggregate bid price of the underlying Bonds.

The organization, operation and marketing of Units of each subsequent Series will be substantially the same as with respect to the Fund, except that the principal amount of bonds deposited (and therefore the number of Units issued), the trustee, evaluator and the respective fees thereof, will or may vary, and there may be depositors in addition to the Sponsor.

## SECTION 14(a)

Section 14(a) of the Act requires that a registered investment company (a) have a net worth of at least \$100,000 prior to making a public offering of its securities; (b) have previously made a public offering and at the time have had a net worth of \$100,000; or (c) have made arrangements for at least \$100,000 to be paid in by 25 or fewer persons before acceptance of public subscriptions.

Applicants seek an exemption from the provisions of section 14(a) of the Act in order to make a public offering, as described above, of Units of the Fund and of subsequent Series. In connection with the requested exemption from section 14(a) of the Act, the Sponsor has agreed (i) to refund on demand and without deduction the sales lead to purchasers of Units of a Series if within 90 days after the Registration Statement of a Series under the 1933 Act becomes effective, the net worth of that Series shall be reduced to less than \$100,000 or if the Series is terminated; (ii) to instruct the trustee on the date the bonds are deposited in each Series that in the event that redemption by the Sponsor of units of the Series which constitute a part of the unsold units shall result in that Series having a net worth of less than 10 percent of the principal amount of bonds originally deposited, the trustee shall terminate the Series in the manner provided in the governing trust agreement and distribute any bonds or other assets deposited with the trustee pursuant to the trust agreement as provided therein; and (iii) in event of termination for the reasons described in (ii) above, to refund any sales lead to any purchaser of units of any Series purchased from the Sponsor or any dealer participating in the underwriting, on demand, and without any deduction.

## RULE 19b-1

Rule 19b-1(a) provides, in substance, that no registered investment company which is a "regulated investment company" as defined in section 851 of the Internal Revenue Code shall distribute more than one capital gain dividend in any 1 taxable year. Paragraph (b) of the rule contains a similar prohibition for a company not a "regulated investment company" but permits a unit investment trust to distribute capital gain dividends received from a "regulated investment company" within a reasonable time after receipt.

Applicants propose to make distributions of principal and interest to Certificateholders of a Series semiannually. Distributions of principal constituting capital gains to Certificateholders may arise in two instances: (1) If an issuing authority calls or redeems an issue in the portfolio, the sums received by the Series will be distributed to Certificateholders on the next distribution date; and (2) if units are redeemed and bonds from the portfolio are sold to provide the funds necessary for such redemption, each Certificateholder will receive his pro rata

portion of the proceeds from the bonds sold. In such instances, a Certificateholder may receive in his distribution funds which constitute capital gains since in many cases the value of the portfolio bonds redeemed or sold will have increased since the date of initial deposit.

As noted, paragraph (b) of Rule 19b-1 provides that a unit investment trust may distribute capital gains dividends received from a "regulated investment company" within a reasonable time after receipt. Applicants state that the purpose of such provision is to avoid forcing unit investment trusts to accumulate valid distributions received throughout the year and to distribute them only at the year end. Applicants further allege that their situation places them squarely within the purpose of such provision, though not within the literal requirements of the rule, since a Series will invest in bonds and not in regulated investment companies. A Series is, therefore, required to hold any moneys, which would constitute capital gains upon distribution, until the end of the taxable year. Applicants contend that such a practice would clearly be to the detriment of the Certificateholders.

In support of the requested exemption, the application states that the dangers against which Rule 19b-1 is intended to guard do not exist in Applicants' situation since they have no control over events which might trigger capital gains, i.e., the tendering of units for redemption and the prepayment of portfolio bonds by the issuing authorities. In addition, it is alleged that the amounts involved in a normal distribution of principal are relatively small in comparison to the normal interest distribution, and such distributions are clearly indicated, in accompanying reports to Certificateholders, as a return of principal.

#### RULE 22c-1

Rule 22c-1 provides, in part, that redeemable securities of registered investment companies may be sold, redeemed, or repurchased at a price based on the current net asset value (computed on each day during which the New York Stock Exchange is open for trading not less frequently than once daily as of the time of the close of trading on such exchange) which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Applicants seek an order exempting the secondary market operations of Sponsor from the provisions of Rule 22c-1 under the Act. Applicants assert that the pricing by the Sponsor in the secondary market will in no way affect the assets of a Series. In addition, the application states that the Sponsor has undertaken to adopt a procedure whereby the evaluator, without a formal evaluation, will provide estimated evaluations on trading days. In the case of a repurchase, if the evaluator cannot state that the previous Friday's price is at least equal to the current bid price, the Sponsor will order a full evaluation.

ation. Sponsor has agreed, in the case of resale of Units in the secondary market, that if the evaluator cannot state the previous Friday's offering side evaluation is not more than one point (\$10 on a Unit representing \$1,000 principal amount of underlying bonds) greater than the current offering price, a full evaluation will be ordered.

Section 6(c) of the Act provides, in part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than April 17, 1973, at 5:30 p.m., submit to the Commission in writing a request for hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in the application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,  
Secretary.

#### FIRST WORLD CORP. Order Suspending Trading

MARCH 23, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the class A and class B common stocks, \$0.15 par value,

and all other securities of First World Corp. being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

It is ordered, Pursuant to section 15(c) (5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from March 26, 1973 through April 4, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,  
Secretary.

[FR Doc. 73-5964 Filed 3-28-73; 8:45 am]

[812-3259]

#### FOUNDERS OF AMERICAN INVESTMENT CORP. AND MODERN AMERICAN LIFE INSURANCE CO.

##### Filing of Application

MARCH 23, 1973.

Notice is hereby given that Founders of American Investment Corporation (Founders), a nondiversified, closed-end management investment company registered under the Investment Company Act of 1940 (the Act), and Modern American Life Insurance Co. (Modern American), 1000 West Sunshine Street, Springfield, MO 65804, a life insurance company organized under the laws of the State of Missouri (hereinafter collectively referred to as Applicants), have filed an application pursuant to section 17(b) of the Act for an order of the Commission exempting from the provisions of section 17(a) of the Act the proposed acquisition by Modern American of 374,934 shares of common stock of Founders Security Life Insurance Co. (Founders Security), from Founders. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Founders owns approximately 10 percent of the outstanding stock of Modern American. W. E. Parker, President of Founders, is also President of Modern American and the largest individual stockholder of each corporation. L. R. Parker, Vice-President of Founders, is also Vice-President of Modern American. M. W. Crabtree, Secretary of Founders, is Senior Vice-President of Modern American. G. Lowther and H. E. Lay, attorneys for, and directors of, Founders are also attorneys for, and directors of, Modern American. Modern American is, therefore, an affiliated person of Founders within the meaning of section 2(a) (3) of the Act.

On August 29, 1972, subsequent to an authorizing resolution of Founders' board of directors, Founders and Modern American entered into an agreement whereby Modern American would purchase from Founders 374,934 shares of common stock of Founders Security, representing all of Founders' interest in that corporation, at a sales price of \$4 per share, or a total

price of \$1,499,736. Such stock represented 76.4 percent of the outstanding common stock of Founders Security, a life insurance company incorporated under the laws of Tennessee in 1964. Founders was the principal promoter and organizer of Founders Security, and the 374,934 shares of common stock which is the subject of the proposed sale is original subscription stock that was acquired by Founders at a price of \$2 per share.

Founders has incurred an indebtedness of approximately \$1,275,000 in the form of long and short term liabilities on notes, and it must sell a portion of its securities to meet its obligations. The decision of Founders to sell its shares of Founders Security is based on its view that such stock will not substantially appreciate in value in the foreseeable future. Founders is of the opinion that the realization of an amount equal to twice its original investment in Founders Security is in the best interests of Founders at this time. Modern American views the proposed acquisition as an attractive business opportunity because it intends to assume the management of Founders Security subsequent to the transaction and to build it into a stronger company.

The stock of Founders Security is not listed on any of the Stock Exchanges and no market is made in said stock in the over-the-counter market. Only a limited number of shares of Founders Security have been traded by brokers and to the knowledge of Applicants, sales by brokers have only occurred in the area of Memphis, Tenn. The latest sales by brokers have been at \$4 to \$4.25 per share.

Founders has endeavored but has been unable to sell any shares at \$6 per share, which is the value that had previously been set by Founders' board of directors as the fair value of such stock; nor has Founders been able to sell any of such stock at \$5. The board of directors of Founders revalued the stock to \$4 per share after the sale by Founders of a limited number of shares at that price through a broker in Memphis, Tenn., in July, 1972. The highest offer received by Applicant for the purchase of its stock in Founders Security has been \$4 per share.

As calculated by an Independent Certified Public Accountant, the "adjusted book" value of the Founders Security stock is \$3.46 per share and the statutory book value of such stock is \$2.09 per share.

Section 17(a) of the Act, as here pertinent, provides that it is unlawful for any affiliated person of a registered investment company knowingly to sell to or purchase from such registered investment company any security or other property. Section 17(b) of the Act provides that the Commission, upon application, shall grant an exemption from such prohibition upon finding that the terms of the proposed transaction are fair and reasonable and do not involve overreaching on the part of any person concerned and that the proposed transaction is consistent with the policy of

each registered investment company concerned and with the general purposes of the Act.

Founders represents that the terms of the proposed transaction have been considered by the board of directors of Founders and of Modern American and that each board has determined that such terms are fair and reasonable and do not involve overreaching with respect to any party and that the proposed transaction is consistent with the policy of each Applicant and with the general purposes of the Act.

Notice is further given that any interested person may, not later than April 17, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of this interest, the reasons for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,  
Secretary.

#### HARTFORD ELECTRIC LIGHT CO.

##### Proposed Issue and Sale of First Mortgage Bonds

MARCH 23, 1973.

Notice is hereby given that The Hartford Electric Light Co. (HELCO), 176 Cumberland Avenue, Wethersfield, CT 06109, a public utility subsidiary company of Northeast Utilities (Northeast), a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

HELCO proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, \$40 million principal amount of First Mortgage Bonds, 1973 Series, due May 1, 2000. The interest rate (which will be a multiple of one-eighth of 1 percent) and the price, exclusive of accrued interest, to be paid to HELCO (which shall be not less than 99 percent nor more than 102 3/4 percent of the principal amount thereof) will be determined by the competitive bidding. The bonds will be issued under the First Mortgage Indenture and Deed of Trust dated January 1, 1958, between HELCO and The First National Bank of Boston, Successor Trustee, as heretofore supplemented and amended and as to be further supplemented by a Twelfth Supplemental Indenture to be dated as of May 1, 1973, and which contains a prohibition until May 1, 1978, against refunding the issue with or in anticipation of the proceeds of borrowings at a lower interest cost. Said supplemental indenture will also contain a minor clarifying amendment to HELCO's indenture relating to the issuance of bonds to refund Bonds previously retired.

It is stated that the net proceeds from the issue and sale of the bonds, together with a capital contribution of \$15 million to be made in March 1973 by Northeast (File No. 70-5308), will be used to repay a portion of short-term borrowings incurred in financing HELCO's construction program. It is estimated that, after such application of the capital contribution and the proceeds from such sale of the 1973 series bonds, short-term borrowings of approximately \$5 million will remain outstanding.

## NOTICES

HELCO's construction program for 1973 is estimated to total approximately \$79 million. It is stated that the construction program will require an additional \$25 million of external financing which the company contemplates will be obtained temporarily through short-term borrowings.

A statement of the fees and expenses incident to the proposed transaction will be filed by amendment. The filing states that the issue and sale of the bonds is subject to the approval of the Connecticut Public Utilities Commission, and that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than April 18, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-named address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,  
Secretary.

**VETERANS ADMINISTRATION  
CAREER DEVELOPMENT SELECTION  
COMMITTEE**

**Notice of Meeting**

The Veterans Administration gives notice pursuant to Public Law 92-463 that a meeting of the Career Development Selection Committee, authorized by 38 U.S.C. 4101, will be held at the Sheraton-Biltmore Hotel, Atlanta, Ga., on April 5 and 6, 1973, at 8:30 a.m. The meeting will be for the purpose of scientific review of applications for appointment to the Career Development Program in the Veterans Administration hospital system. The Committee advises the Assistant Chief Medical Director for Research and Education in Medicine on selection and appointment of Research and Education Associates, Clinical Investigators, Medical Investigators, and Senior Medical Investigators.

The meeting will be open to the public up to the seating capacity of the room from 8:30 a.m. to 9:30 a.m. on April 5 to discuss the general status of the program. Because of the limited seating capacity of the room, those who plan to attend should contact Dr. Chester W. DeLong, Executive Secretary of the Committee, VA Central Office, Washington, D.C. (202-389-5065) prior to April 3.

The meeting will be closed from 9:30 a.m. to 6:30 p.m. on April 5 and from 8 a.m. to 4 p.m. on April 6 for consideration of individual applications. Minutes of the meeting and rosters of the committee members may be obtained from Mrs. Darlene R. Whorley, Chief, Career Development Section, Research Service, Veterans Administration, Washington, D.C. (phone 202-389-5065).

Dated: March 23, 1973.

By direction of the Administrator.

[SEAL] RUFUS H. WILSON,  
Associate Deputy Administrator.

**DEPARTMENT OF LABOR**

**Office of the Secretary**

**ARKWRIGHT MILLS, INC.**

**Investigation Regarding Certification of Eligibility of Workers To Apply for Adjustment Assistance**

After reviewing the Tariff Commission's report on its investigation of the petition for adjustment assistance filed on behalf of workers formerly employed at Arkwright Mills, Inc., Spartanburg, S.C. (TEA-W-160), under section 301(c)(2) of the Trade Expansion Act of

1962, and in which report the Commission being equally divided, made no finding with respect to certain woven fabrics of cotton and of manmade fibers, the President decided, under the authority of section 330(d)(1) of the Tariff Act of 1930 as amended, to consider the findings of those Commissioners who found in the affirmative as the finding of the Commission. Accordingly, he has advised the Secretary of Labor that he may certify the group of workers involved as eligible to apply for adjustment assistance.

In view of the Tariff Commission's report, the President's authorization, and the responsibilities delegated to the Secretary of Labor under section 8 of Executive Order 11075 (28 FR 473), the Director, Office of Foreign Economic Policy, Bureau of International Labor Affairs, has instituted an investigation, as provided in 29 CFR 90.5 and this notice. The investigation relates to the determination of whether any of the group of workers covered by the Tariff Commission report should be certified as eligible to apply for adjustment assistance, provided for under Title III, Chapter 3, of the Trade Expansion Act of 1962, including the determination of related subsidiary subjects and matters, such as the date unemployment or underemployment began or threatened to begin and the subdivision of the firm involved to be specified in any certification to be made, as more specifically provided in Subpart B of CFR Part 90.

Interested persons should submit written data, views or arguments relating to the subjects of investigation to the Director, Office of Foreign Economic Policy, U.S. Department of Labor, Washington, D.C. 20210 on or before April 9, 1973.

Signed at Washington, D.C., this 21st day of March 1973.

GLORIA G. VERNON,  
Director, Office of  
Foreign Economic Policy.

**INTERSTATE COMMERCE  
COMMISSION**

[Notice 208]

**ASSIGNMENT OF HEARINGS**

MARCH 26, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

## NOTICES

**MOTOR CARRIER BOARD TRANSFER  
PROCEEDINGS**

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 18, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of

such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74218. By order of March 15, 1973, the Motor Carrier Board approved the transfer to Harry F. Richards, doing business as Theatrical Film Service, Lawrence, Mass., of certificates Nos. MC-92168 and MC-92168 (Sub-No. 1), issued March 17, 1941, and February 27, 1973, respectively, to Beatrice M. Richards, Harry F. Richards, Executor, doing business as Theatrical Film Service, Lawrence, Mass., authorizing the transportation of motion picture film and theater supplies between Boston, Mass., and Rye Beach, N.H., and between Boston, Mass., and Rochester, N.H., over described regular routes. Mary E. Kelley, 11 Riverside Avenue, Medford, MA 02155, attorney for Applicants.

[Notice 35]

**MOTOR CARRIER TEMPORARY  
AUTHORITY APPLICATIONS**

MARCH 19, 1973.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131) published in the FEDERAL REGISTER issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field office named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

**MOTOR CARRIERS OF PROPERTY**

[Notice 36]

#### MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 21, 1973.

The following are notices of filing of applications<sup>1</sup> for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131), published in the *FEDERAL REGISTER*, issue of April 27, 1965,

<sup>1</sup>Except as otherwise specifically noted each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the *FEDERAL REGISTER* publication, within 15 calendar days after the date of notice of the filing of the application is published in the *FEDERAL REGISTER*. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

#### MOTOR CARRIERS OF PROPERTY

No. MC 2202 (Sub-No. 440 TA), filed March 9, 1973. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, P.O. Box 471, Akron, OH 44309. Applicant's representative: James W. Conner (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving points located in Hunterdon County, N.J., as off-route points, for 180 days. **NOTE:** Applicant will tack with lead certificate MC-2202 and all subs thereto and will also affect interchange at all points served. Supporting shippers: Rexham Corp., P.O. Box 4068, Charlotte, NC 28204; Lehigh Fluid Power Inc., York Road, Route 202, Lambertville, NJ 08530; Tom Tru Corp., 201 South Mail Street, Lambertville, NJ 08530; and Ultramotive Corp., 43 Emery Avenue, Flinton, NJ 08822. Send protests to: Franklin D. Ball, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Building, 1240 East Ninth Street, Cleveland, OH 44199.

No. MC 13235 (Sub-No. 20 TA), filed March 7, 1973. Applicant: CENTRALIA CARTAGE CO., a corporation, 650 West Noleman Street, Centralia, IL 62801. Applicant's representative: R. W. Burgess, 8514 Midland Boulevard, St. Louis, MO 63114. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving the plantsites and warehouse facilities of the Anaconda Aluminum Co. located at or near Seabee, Ky., as an off-route point in connection with applicant's regular route between Evansville, Ind., and St. Louis, Mo., for 180 days. **NOTE:** Applicant will tack with its

existing authority in MC-13235 and will interline at all existing gateway points. Supporting shipper: Robert F. Archer, Director of Transportation, Anaconda Aluminum Co., 1251 South Fourth Street, Louisville, KY 40203. Send protests to: Harold C. Jolliff, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 518 Leland Office Building, 527 East Capitol Avenue, Springfield, IL 62701.

No. MC 13569 (Sub-No. 26 TA), filed March 3, 1973. Applicant: THE LAKE SHORE MOTOR FREIGHT COMPANY, 1200 South State Street, Girard, OH 44420. Applicant's representative: A. David Miller, 744 Broad Street, Newark, NJ 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel and iron and steel articles* from the plantsites of United States Steel Corp., at Clairton, Duquesne, McKeesport, Dravosburg (West Mifflin), and Homestead in Allegheny County, Ellwood City in Lawrence County, and Vandergrift in Westmoreland County, Pa., to points in Michigan, Indiana, and New York for 180 days. Applicant will tack with its existing authority if permitted. Supporting shipper: United States Steel Corp., 660 Grant Street, Pittsburgh, PA 15230. Send protest to: Franklin D. Ball, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Building, 1240 East Ninth Street, Cleveland, OH 44199.

No. MC 14552 (Sub-No. 48 TA), filed March 9, 1973. Applicant: J. V. MCNICHOLAS TRANSFER COMPANY, a corporation, 555 West Federal Street, Youngstown, OH 44507. Applicant's representative: Paul F. Beery, 88 East Broad Street, Columbus, OH 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, from the plantsites of United States Steel Corp., located at or near Clairton, Homestead, Duquesne, McKeesport, Dravosburg, and West Mifflin in Allegheny County, Pa.; Ellwood City in Lawrence County, Pa.; and Vandergrift in Westmoreland County, Pa., to points in Michigan, Indiana, and New York, for 180 days. Restriction: Restricted to traffic originating at the above-named origin points and destined to the above-named destination States. Supporting shipper: United States Steel Corp., 600 Grant Street, Pittsburgh, PA 15230. Send protests to: Franklin D. Ball, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Building, 1240 East Ninth Street, Cleveland, OH 44199.

No. MC 29886 (Sub-No. 291 TA), filed March 6, 1973. Applicant: DALLAS & MAVIS FORWARDING CO., INC., 4000 West Sample Street, South Bend, IN 46621. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trucks and truck chassis*, in subsequent or sec-

ondary movements, via driveway, from points in South Bend, Ind., to points in Portland and McMinnville, Oreg., and Spokane and Seattle, Wash., for 180 days. Restriction: Restricted to traffic having prior transportation from the plantsite of the Ford Motor Co., in Jefferson County, Ky., to South Bend, Ind. Supporting shipper: Gilbert Tilbury Co., 205 Galloway Street, McMinnville, OR 97128; Northside Ford Truck Sales, Inc., 6221 Northeast Columbia Boulevard, P.O. Box 13373, Portland, OR 97213; Wendle Ford Sales, Inc., North 4727 Division, Spokane, Wash. 99208; Francis Ford, Grand Avenue and Hawthorne, Portland, Oreg. 97214; and Sea-Tac Ford Truck Sales, Inc., 11000 Pacific Highway, Seattle, WA 98168. Send protests to: District Supervisor J. H. Gray, Bureau of Operations, Interstate Commerce Commission, 345 West Wayne Street, Room 204, Fort Wayne, IN 46802.

No. MC 52657 (Sub-No. 702 TA), filed March 5, 1973. Applicant: ARCO AUTO CARRIERS, INC., a corporation, 2140 West 79th Street, Chicago, IL 60620. Applicant's representative: S. J. Zangri (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor buses*, in initial movements, in truckaway service, and supplies therefor, when moving together with buses being transported, from Bayertown, Pa., to points in the United States (including Alaska, but excluding Hawaii), for 180 days. Supporting shipper: Harry D. Yoder, Batronic Truck Corp., subsidiary of Bayertown Auto Body Works, Inc., Bayertown, Pa. 19512. Send protests to: R. G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 80430 (Sub-No. 145 TA), filed March 12, 1973. Applicant: GATEWAY TRANSPORTATION CO., INC., a corporation, 455 Park Plaza Drive, P.O. Box 851, La Crosse, WI 54601. Applicant's representative: Joseph E. Ludden (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving the plantsite of Anaconda Aluminum Co. located approximately 3 miles north of Seabee, Ky., as an off-route point in connection with applicant's presently authorized authority to serve Evansville, Ind. as noted in Route 112 of Docket MC-80430, for 180 days. **NOTE:** Applicant does intend to tack at Evansville, Ind., and that route is in connection with all other routes presently authorized to applicant under Docket MC-80430. Supporting shipper: Anaconda Aluminum Co., 1251 South Fourth

Street, Louisville, KY 40203. Send protests to: Barney L. Hardin, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 139 West Wilson Street, Room 202, Madison, WI 53703.

No. MC 103051 (Sub-No. 27 TA), filed March 12, 1973. Applicant: FLEET TRANSPORT COMPANY, INC., 934 44th Avenue, P.O. Box 90408, Nashville, TN 37209. Applicant's representative: Mr. W. G. North, Fleet Transport Co., Inc., Nashville, Tenn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Salt and salt products, in bags, blocks and packages*, from Cairo, Ga. to points in Alabama and Florida, for 180 days. Supporting shipper: Cargill, Inc., Cargill Building, Minneapolis, Minn. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 803 1808 West End Building, Nashville, Tenn. 37203.

No. MC 106943 (Sub-No. 107 TA), filed March 12, 1973. Applicant: EASTERN EXPRESS, INC., 1450 Wabash Avenue, Terre Haute, IN 47801. Applicant's representative: Peter M. Witham (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except classes A and B explosives, livestock, grain, petroleum products, in bulk, household goods as defined by the Commission, and commodities requiring special equipment), serving the plantsite of Anaconda Aluminum Co., at or near Seabee, Ky., as an off-route point in connection with carrier's authorized regular route operations to and from Evansville, Ind., for 180 days. **NOTE:** Applicant states that tacking would be performed at any interstate point on applicant's authority where interline is in effect. Supporting shipper: Anaconda Aluminum Co., 1251 South Fourth Street, Louisville, KY 40203. Send protests to: District Supervisor James W. Habermehl, Interstate Commerce Commission, Bureau of Operations, 802 Century Building, 36 South Pennsylvania Street, Indianapolis, IN 46204.

No. MC 107012 (Sub-No. 175 TA), filed March 7, 1973. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, East and Meyer Road, Lincoln Highway, Fort Wayne, IN 46801. Applicant's representative: Karlon Holle (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Carpet padding*, uncrated, from points in Waterbury, Conn., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Georgia, and the District of Columbia, for 180 days. Supporting shipper: Fairmount Corp., 2600 North Pulaski, Chicago, IL. Send protests to: District Supervisor J. H. Gray, Bureau of Operations, Interstate

Commerce Commission, 345 West Wayne Street, Room 204, Fort Wayne, IN 46802.

No. MC 107012 (Sub-No. 176 TA), filed March 12, 1973. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Lincoln Highway, East and Meyer Road, Fort Wayne, IN 46801. Applicant's representative: Terry G. Fewell (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Materials, supplies and equipment used in the manufacture and distribution of furniture (except (1) commodities in bulk, in tank vehicles, (2) chemicals in bulk, and (3) commodities which because of size or weight require special equipment or handling), from points in the United States (except Montana, Wyoming, Alaska, and Hawaii), to points in Fort Smith and Van Buren, Ark., for 180 days. Restrictions: Restricted against the transportation of (a) iron and steel articles from Kentucky, and (b) paint from Dallas, Tex., and points in its commercial zone, and from Louisville, Ky., and points in its commercial zone. Supporting shippers: Garrison Furniture Co., P.O. Box 1423, Fort Smith, AR 72901; Eads Furniture Manufacturing Co., 4414 Wheeler Avenue, Fort Smith, AR 72901; Craftmaster Industries, Inc., Drawer N, Van Buren, Ark. 72956; Southland Furniture, Inc., P.O. Box 3310, Fort Smith, AR 72901; Holland Woodworks, Inc., P.O. Box 4125, Fort Smith, AR 72901; Ayers Furniture Industries, Fort Smith Chair Co., 1001 North Third Street, Fort Smith, AR 72901; Stell Manufacturing Co., Division National Glass & Manufacturing Co., Inc., Fort Smith, Ark. Send protests to: District Supervisor J. H. Gray, Bureau of Operations, Interstate Commerce Commission, 345 West Wayne Street, Room 204, Fort Wayne, IN 46802.*

No. MC 107496 (Sub-No. 880 TA), filed March 8, 1973. Applicant: RUAN TRANSPORT CORPORATION, Third and Keosauqua Way, Post Office Box 855, 50304 Box Zip, Des Moines, IA 50309. Applicant's representative: E. Check (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Waste oil, in bulk, in tank vehicles, from Clinton, Iowa, to points in Shakopee, Minn., for 150 days. Supporting shipper: Chemplex Co., Rolling Meadows, Ill. 60008. Send protests to: Herbert W. Allen, transportation specialist, Bureau of Operations, Interstate Commerce Commission, 875 Federal Building, Des Moines, Iowa 50309.*

No. MC 107496 (Sub-No. 884 TA), filed March 12, 1973. Applicant: RUAN TRANSPORT CORPORATION, Post Office Box 855, Third and Keosauqua Way, Des Moines, IA 50309. Applicant's representative: E. Check (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *phosphatic fertilizer solution, in bulk, in tank vehicles, from Topeka,*

Kans., to points in Iowa, Missouri, and Nebraska, for 150 days. Supporting shipper: Kaiser Agricultural Chemicals, Division of Kaiser Aluminum & Chemical Sales, Inc., A.M.F. Box 30209, Memphis, TN 38130. Send protests to: Herbert W. Allen, transportation specialist, Bureau of Operations, Interstate Commerce Commission, 875 Federal Building, Des Moines, Iowa 50309.

No. MC 108393 (Sub-No. 69 TA), filed March 8, 1973. Applicant: SIGNAL DELIVERY SERVICE, INC., a corporation, Room 214, 930 North York Road, Hinsdale, IL 60521. Applicant's representative: Eugene L. Cohn, One North La Salle Street, Chicago, IL 60602. No. MC 136930 (Sub-No. 1 TA), filed March 8, 1973. Applicant: THE GAIL CORPORATION, General Delivery, Falls, PA 18615. Applicant's representative: Kenneth R. Davis, 999 Union Street, Taylor, PA 18517. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (A) *Fiberglass reinforced plastic sewage disposal units*, uncrated, weighing less than 500 pounds each, and *parts and supplies* used in the installation and operation of the above-named commodity, from Scranton, Lackawanna County, Pa., to points in the United States (except Alaska and Hawaii); (B) *Materials, equipment, and supplies*, used or useful in the production, manufacture, and distribution of the above commodities (except bulk commodities), from the above-named destination points to the above-named origin; and (C) *plastic drainage tubing*, from Scranton, Lackawanna County, Pa., and Geneva, N.Y., to points in the United States (except Alaska and Hawaii), for 150 days. Supporting shipper: Nayadic Sciences, Inc., Village of Eagle, Uwchland, Pa. 19480. Send protests to: Paul J. Kenworthy, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 309 Post Office Building, Scranton, Pa. 18503.

No. MC 138124 (Sub-No. 2 TA), filed December 20, 1972. Applicant: ROCKO TRANSPORTATION, INC., P.O. Box 608, San Marcos, CA 92069. Applicant's representative: Ernest D. Salm, 8179 Havasu Circle, Buena Park, CA 90621. Authority sought to operate as a contract carrier,

by motor vehicle, over irregular routes, transporting: *Rock*, in bulk, from Gardner Ridge Quarry, near Brookings, Oreg., to Crescent City Harbor, Crescent City, Calif., for 180 days. Supporting shipper: Silberger Constructors, Inc., Palomar Airport Road, P.O. Box 845, Carlsbad, CA 92008. Send protests to: John E. Nance, Officer in Charge, Interstate Commerce Commission, Bureau of Operations, Room 7708, Federal Building, 300 North Los Angeles Street, Los Angeles, CA 90012.

No. MC 138434 TA, filed March 12, 1973. Applicant: NORRIS W. HAYMAN, R.F.D. No. 1, Box 29, Ridgely, MD 21660. Applicant's representative: F. D. Hammond, P.O. Box 53, Dover, DE 19901. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Sulfate of ammonia*, in bulk, in dump vehicles, from Hopewell, Va., to points in Caroline County, Md., for 180 days. Supporting shipper: Walter Palmer, doing business as Soil Service, Denton, Md. 21269, G. W. Olson Smith-Douglass, Division of Borden Chemical, Borden Inc., P.O. Box 419, Norfolk, VA 23501. Send protests to: William L. Hughes, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 814-B Federal Building, Baltimore, Md. 21201.

No. MC 138465 TA, filed March 9, 1973. Applicant: PHIL TOWNSEND, JR., Route 1, Box 19, Live Oak, FL 32060. Applicant's representative: Ronald D. Peterson, 1729 Gulf Life Tower, Jacksonville, Fla. 32207. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Fertilizer and fertilizer materials*, dry, in bulk, in dump vehicles or in bags, from Albany, Savannah, and Cordele, Ga. to points in Baker, Bradford, Union, Alachua, Levy, Dixie, Gilchrist, Columbia, Suwannee, Lafayette, Taylor, Madison, Jefferson, Wakulla, Leon, and Gadsden Counties, Fla., and (2) *feed and feed ingredients*, in bulk, in dump vehicles or in bags, from Valdosta, Ga., to points in Florida on and north of Florida Highway 60, for 180 days. Supporting shippers: Swift Agricultural Chemicals Corp., P.O. Box 1948, Albany, GA 31702, and Farmers Mutual Exchange, P.O. Drawer N, Live Oak, FL 32060. Send protests to: District Supervisor G. H. Fauss, Jr., Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 West Bay Street, Jacksonville, FL 32202.

No. MC 138469 TA, filed March 8, 1973. Applicant: DONCO CARRIERS, INC., 8125 Southwest 15th Street, Oklahoma City, OK 73128. Applicant's representative: Wm. L. Peterson, Jr., 401 North Hudson, P.O. Box 917, Oklahoma City, OK 73101. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Bread cubes and salad dressing*, (1) from the plantsites and warehouses of Consolidated American Industries, Inc., Wichita, Kans.; Elgin and Northfield, Ill., to Los Angeles and Hayward, Calif., and

Seattle, Wash.; (2) between plant sites and warehouses of Consolidated American Industries, Inc., Wichita, Kans., on the one hand, and, on the other, plant sites and warehouses of Consolidated American Industries at Elgin and Northfield, Ill., for 180 days. Supporting shipper: William L. Bennett, Jr., Controller, American Industries, Inc., 410 North St. Francis Street, P.O. Box 800, Wichita, KS 67201. Send protests to: C. L. Phillips, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 240, Old Post Office Building, 215 Northwest Third, Oklahoma City, OK 73102.

No. MC 138470 TA, filed March 8, 1973. Applicant: ELROY A. MOORE, 908 International Avenue, Douglas, AZ 85607. Applicant's representative: Elroy A. Moore (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from points in Arizona to the port of entry at the international boundary line between the United States and Mexico at Douglas, Ariz., for 180 days. Supporting shippers: Corte, S. A., P.O. Box 1025, Douglas, AZ, and Agua Prieta Industrial, S. de R.L., P.O. Box 1025, Douglas, AZ 85607. Send protests to: Andrews V. Baylor, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 3427 Federal Building, 230 North First Avenue, Phoenix, AZ 85025.

No. MC 138471 TA, filed March 12, 1973. Applicant: DANIEL J. LEONARD, doing business as LEONARD TRUCKING, 1878 Delemeter Road, Castle Rock, WA 98611. Applicant's representative: Daniel J. Leonard (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wooden shakes, shingles, and trim* from points in Washington on and west of U.S. Highway 97, to points in California, for 180 days. Supporting shippers: California Shingle & Shake Co., 249 Hookston Road, Pleasant Hill, CA 94523; Washington Cedar & Supply, 223 West Smith Street, Kent, WA 98031; and North Pacific Enterprises, 221 West Smith Street, Kent, WA 98031. Send protests to: District Supervisor Huetig, Bureau of Operations, Interstate Commerce Commission, 450 Multnomah Building, 319 Southwest Pine, Portland, OR 97204.

No. MC 138472 TA, filed March 7, 1973. Applicant: CARGO AFFILIATES, INC., 105 Apollo Street, Brooklyn, NY 11222. Applicant's representative: Thomas A. Phemister, Suite 1212, 425 13th Street NW., Washington, DC 20004. Authority sought to operate as a *common or contract carrier*, by motor vehicle, over irregular routes, transporting: *Refrigerators, air coolers, air-conditioners, air-conditioner parts, and home furnaces*, from Edison, N.J., to points in the New York, N.Y., commercial zone as defined by the Interstate Commerce Commission, and points in Nassau, Suffolk, and Westchester Counties, N.Y., and Bayonne, Camden, and Newark, N.J., for 180 days. Applicant

states that interline with other carriers, at the direction of the supporting shipper, is intended at points within the sought destination territory. Supporting shipper: Fedders Corp., Edison, N.J. 08817. Send protests to: Marvin Kampel, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 26 Federal Plaza, New York, NY.

No. MC 138473 TA, filed March 8, 1973. Applicant: ROSEN TRUCKING CO., INC., 102 Junius Street, Brooklyn, NY 11212. Applicant's representative: William D. Traub, 10 East 40th Street, New York, NY 10016. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities*, which are dealt in or sold by retail home sewing centers and, in connection therewith, *supplies, equipment, and fixtures* used in the conduct of such businesses, between the warehouse of Scottex Corp., Brooklyn, N.Y., on the one hand, and, on the other, points in New Jersey, Connecticut, Maine, New Hampshire, Massachusetts, and Rhode Island, for 180 days. Supporting shipper: Scottex Corp., Consumer Division, 2829 West 21st Street, Brooklyn, NY 11224. Send protests to: Marvin Kampel, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 26 Federal Plaza, New York, NY 10007.

No. MC 138477 TA filed March 13, 1973. Applicant: JAMES B. FENIMORE & DON ROGERS, doing business as HIDE TRANSPORT COMPANY, 2301 Honey-suckle, Fort Worth, TX 76111. Applicant's representative: Clayte Binion, 1108 Continental Life Building, Fort Worth, Tex. 76102. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Green and wet salted hides*, (1) from Guymon, El Reno, and Oklahoma City, Okla., to Fort Worth, Tex.; (2) from Fort Worth, Tex., to Houston and Laredo, Tex.; (3) from Palestine, Tex., to Houston, Tex.; and (4) from San Antonio, Tex., to Houston, Tex., for 180 days. Supporting shipper: Hltex Corp., 3700 North Grove, Fort Worth, TX. Send protests to: H. C. Morrison, Sr., District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 9A27 Federal Building, 819 Taylor Street, Fort Worth, TX 76102.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[Notice 24]

#### MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

MARCH 23, 1973.

The following applications (except as otherwise specifically noted, each applicant (on applications filed after Mar. 27, 1972) states that there will be no significant effect on the quality of the

human environment resulting from approval of its application), are governed by Special Rule 1100.247<sup>1</sup> of the Commission's general rules of practice (49 CFR, as amended), published in the *Federal Register* issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the *Federal Register*. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and on or before May 28, 1973, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the *Federal Register* issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the *Federal Register* of a notice that the proceeding has been assigned for oral hearing.

<sup>1</sup> Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 730 (Sub-No. 343), filed February 5, 1973. Applicant: PACIFIC INTERMOUNTAIN EXPRESS CO., a corporation, 1417 Clay Street, Post Office Box 958, Oakland, CA 94604. Applicant's representative: Alfred G. Krebs (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined in 17 M.C.C. 467, livestock, commodities in bulk and articles which because of size or weight require special equipment), between the Yellow Creek State Inland Port, located at or near Burnsville, Miss., on the one hand, and, on the other, points in Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Pontotoc, Prentiss, Tippah, Tishomingo, Union, and Webster Counties, Miss., and Chester, Decatur, Hardeman, Hardin, Henderson, McNairy, and Madison Counties, Tenn. Note: Applicant states that the proposed authority can be tacked at the port, allowing service between its presently authorized points in MC 921 and subs, located in Mississippi, Tennessee, and Kentucky, on the one hand, and, on the other, the applied for points. If a hearing is deemed necessary, applicant requests it be held at Memphis, Tenn.

No. MC 2202 (Sub-No. 439), filed February 20, 1973. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, OH 44309. Applicant's representative: William Slaugh (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) serving the plantsite and warehouse facilities of Chesebrough-Ponds, Inc. and Westinghouse Electric Corp., at or near Jefferson City, Mo., as off-route points in connection with applicant's present regular route operations to and from Columbia, Mo.; and (2) serving the plantsite and warehouse facilities of Rhodia, Inc. located at points in Buchanan County, Mo., as an off-route point in connection with applicant's present regular route operations to and from Kansas City, Mo. Note: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo. or Washington, D.C.

No. MC 11722 (Sub-No. 33), filed February 20, 1973. Applicant: BRADER HAULING SERVICE, INC., Post Office Box 655, Zillah, WA 98953. Applicant's representative: Douglas A. Wilson, 303 East D Street, Yakima, WA 98901. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hop extract*, liquid or powdered, in cartons or in metal containers, from points in Yakima County, Wash., to ports of entry in Seattle and Tacoma, Wash., and Portland, Ore. Note: Applicant holds contract carrier authority under MC 124658 and Subs, therefore dual operations may be involved. Applicant further states that the

requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Portland, Ore., or Seattle.

No. MC 19227 (Sub-No. 181) (Correction), filed January 26, 1973, published in the *Federal Register* issue of February 23, 1973, and republished as corrected, in part, this issue. Applicant: LEONARD BROS. TRUCKING CO., INC., 2595 Northwest 20th Street, Miami, FL 33162. Applicant's representative: William O. Turney, 2001 Massachusetts Avenue NW., Washington, DC 20036. Note: The purpose of this partial publication is to correct the commodity description to read as follows: "Commodities (except oilfield equipment and boats) which, because of size or weight, require the use of special equipment." Further the tacking information should reflect that applicant proposes to tack through the State of Texas, pursuant to its certificates in Sub-Nos. 75, 88, 143, and 127, to continue to provide transportation to and from points in Arkansas, Oklahoma, Kansas, Nebraska, New Mexico, Arizona, and California. Also the correct address of Applicant's Representative Turney should read 2001 Massachusetts Avenue NW., Washington, DC 20036. All of the above is to correct the *Federal Register* notice in lieu of the previous publication. The rest of the application remains the same.

No. MC 22229 (Sub-No. 75), filed February 26, 1973. Applicant: TERMINAL TRANSPORT COMPANY, INC., 248 Chester Avenue SE., Atlanta, GA 30316. Applicant's representative: Ralph B. Matthews (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving the plantsite of the Pulvair Corp. at Woodstock, Tenn., as an off-route point in connection with applicant's otherwise authorized service to Memphis, Tenn. Note: If a hearing is deemed necessary, applicant requests it be held at Memphis, Tenn.

No. MC 25798 (Sub-No. 235) (Clarification), filed January 8, 1973, published in the *Federal Register* issue of February 23, 1973, and republished, as clarified, this issue. Applicant: CLAY HYDER TRUCKING LINES, INC., 502 East Bridgers Avenue, Post Office Box 1186, Auburndale, FL 33823. Applicant's representative: Tony G. Russell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foodstuffs*, from Seabrook, N.J., to Chicago, Ill., Louisville, Ky., New Orleans, La., Kansas City, Mo., points in St. Louis County, Mo., and points in Florida, Georgia, North Carolina, South Carolina, Tennessee, and Virginia. Note: The purpose of this republication is to more clearly indicate the

origin and destination territories. Common control may be involved. Applicant states that the requested authority can be tacked with its existing authority at points in North Carolina or South Carolina to serve points in Illinois, Indiana, Kentucky, Michigan, Minnesota, Missouri, Ohio, West Virginia, and Wisconsin. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Tampa, Fla.

No. MC 27500 (Sub-No. 5), filed February 23, 1973. Applicant: MISHAK TRUCK LINE, INC., 320 Seventh Avenue North, Clear Lake, IA 50428. Applicant's representative: Larry D. Knox, Ninth floor, Hubbell Building, Des Moines, Iowa 50309. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building materials*, from Shakopee, Minn., to points in Minnesota, Iowa, Wisconsin, and Illinois, restricted to traffic originating at the facilities of Certain-Teed Products Corp. Note: Applicant also holds contract carrier authority under MC 127410 (Sub-No. 1), therefore dual operations and common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Chicago, Ill.

No. MC 29601 (Sub-No. 13), filed February 20, 1973. Applicant: MIDWEST COACHES, INC., 216 North Second Street, Post Office Box 226, Mankato, MN 56001. Applicant's representative: L. C. Major, Jr., Suite 301 Tavern Square, 421 King Street, Alexandria, VA 22314. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations, beginning and ending at all authorized service points on carrier's authorized regular service route, as described below, and extending to points in the United States (including Alaska but excluding Hawaii); between Mankato, Minn., and junction U.S. Highway 75 and Iowa Highway 10 at a point approximately 9 miles west of Orange City, Iowa, as follows: From Mankato over U.S. Highway 14 to junction U.S. Highway 59, thence over U.S. Highway 59 to Slayton, Minn., thence over Minnesota Highway 30 to Pipestone, Minn., thence over U.S. Highway 75 to junction Iowa Highway 10, and return over the same route, serving all intermediate points. Note: If a hearing is deemed necessary, applicant requests it be held at Mankato or Minneapolis-St. Paul, Minn.

No. MC 30837 (Sub-No. 458), filed February 20, 1973. Applicant: KENOSHA AUTO TRANSPORT CORPORATION, 4200—39th Avenue, Kenosha, WI 53140. Applicant's representative: Paul F. Sullivan, 711 Washington Building, Washington, D.C. 20005. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Automobiles and farm tractors*, in

truckaway service, from Wixom, Mich., to points in Wisconsin, and points in Allamakee, Benton, Black Hawk, Bremer, Buchanan, Cedar, Chickasaw, Clayton, Clinton, Delaware, Dubuque, Fayette, Howard, Jackson, Jones, Linn, Muscatine, Scott, Tama, and Winneshiek Counties, Iowa; and Boone, Bureau, Carroll, Henry, Jo Daviess, Lake, Lee, McHenry, Mercer, Ogle, Putnam, Rock Island, Stephenson, Whiteside, and Winnebago Counties, Ill. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 32882 (Sub-No. 68), filed February 21, 1973. Applicant: MITCHELL BROS. TRUCK LINES, a corporation, 3841 North Columbia Boulevard, Portland, OR 97217. Applicant's representative: Norman E. Sutherland, 1200 Jackson Tower, Portland, Ore. 97205. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel and iron and steel articles* as described in Appendix V to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, (1) between points in Oregon, Washington, and California, except those in Inyo, San Bernardino, Ventura, Los Angeles, Orange, Riverside, San Diego, and Imperial Counties, Calif.; and (2) between points in Oregon, Washington, and that part of Nevada located on and west of U.S. Highway 95. Note: Applicant states that the requested authority can be tacked with its authority in MC-32882 (Sub-No. 37) for size and weight commodities, to serve points in Oregon, Washington, California, Idaho, Montana, and Nevada; and also may be tacked with its pending request for authority in MC-32882 (Sub-No. 60) for related commodities, to serve points in Oregon, Washington, Idaho, Nevada, Utah, Colorado, Wyoming, and Arizona. If a hearing is deemed necessary, applicant requests it be held at Portland, Ore. or San Francisco, Calif.

No. MC 39300 (Sub-No. 10), filed January 11, 1973. Applicant: MIDDLE STATES MOTOR FREIGHT, INC., 5723 Este Avenue, Cincinnati, OH 45232. Applicant's representative: Jack B. Josselson, 700 Atlas Bank Building, Cincinnati, Ohio 45202. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Louisville, Ky., and junction Interstate Highway 80 and U.S. Highway 41 near Chicago, Ill.; from Louisville over Interstate Highway 65 to junction Interstate Highway 80, thence over Interstate Highway 80 to junction U.S. Highway 41, as an alternate route in connection with carrier's presently authorized regular-route operations, and serving no intermediate points except those which

the carrier is presently authorized to serve. Note: If a hearing is deemed necessary, applicant requests it be held at Cincinnati, Ohio or Chicago, Ill.

No. MC 42487 (Sub-No. 803), filed February 15, 1973. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025. Applicant's representative: E. T. Lilipfert, Suite 1100, 1600 L Street NW., Washington, DC 20036. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, green hides, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Birmingham, Ala., and junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., (1) from Birmingham over Interstate Highway 59 to junction Interstate Highway 24, thence over Interstate Highway 24 to Chattanooga, Tenn., thence over Interstate Highway 75 to Knoxville, Tenn., thence over Interstate Highway 40 to junction Interstate Highway 81, and thence over Interstate Highway 81 to junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., and return over the same route, and (2) from Birmingham over Interstate Highway 59 to junction Interstate Highway 24, thence over Interstate Highway 24 to Chattanooga, Tenn., thence over Interstate Highway 75 to junction U.S. Highway 11, at or near Ooltewah, Tenn., thence over U.S. Highway 11 to Lenoir City, Tenn., thence over Tennessee Highway 95 to junction Interstate Highway 75, near Lenoir City, Tenn., thence over Interstate Highway 75 to Knoxville, Tenn., thence over Interstate Highway 40 to junction U.S. Highway 11W, at or near Knoxville, Tenn., thence over U.S. Highway 11W to junction Interstate Highway 81, about 5 miles southwest of Bristol, Tenn., thence over Interstate Highway 81 to junction U.S. Highway 11, about 4 miles east of Christiansburg, Va., thence over U.S. Highway 11 to junction Interstate Highway 81, near Glenvar, Va., and thence over Interstate Highway 81 to junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., and return over the same route, as alternate routes in connection with carrier's presently authorized regular-route operations, serving no intermediate points, and serving the junction of Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., for purposes of joinder only, and under (2) above, authority is sought to use additional segments of Interstate Highways 40, 75 and 81 as they are completed with the right to use necessary connecting highways between completed portions of these Interstate Highways and U.S. Highway 11 and 11W. Note: Common control may be involved. If a hearing is deemed necessary, applicant requests

it be held at Washington, D.C., or Atlanta, Ga.

No. MC 42487 (Sub-No. 804), filed February 15, 1973. Applicant: CONSOLIDATED FREIGHTWAYS CORPORATION OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025. Applicant's representative: E. T. Lilipfert, Suite 1100, 1600 L Street NW., Washington, D.C. 20036. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, green hides, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Knoxville, Tenn., and junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., (1) from Knoxville over Interstate Highway 81 to junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., and return over the same route, and (2) from Knoxville over Interstate Highway 40 to junction Interstate Highway 81, at or near Knoxville, Tenn., thence over U.S. Highway 11W to junction Interstate Highway 81, about 5 miles southwest of Bristol, Tenn., thence over Interstate Highway 81 to junction U.S. Highway 11, about 4 miles east of Christiansburg, Va., thence over U.S. Highway 11 to junction Interstate Highway 81, near Glenvar, Va., and thence over Interstate Highway 81 to junction Interstate Highway 81 and U.S. Highway 30, near Chambersburg, Pa., and return over the same route, as alternate routes in connection with carrier's presently authorized regular-route operations, serving no intermediate points, and serving the junction of Interstate Highway 81 and U.S. Highway 30 near Chambersburg, Pa., for purposes of joinder only, and under (2) above, authority is sought to use additional segments of Interstate Highways 40 and 81 as they are completed with the right to use necessary connecting highways between completed portions of those Interstate Highways and U.S. Highways 11 and 11W. Note: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Atlanta, Ga.

No. MC 55037 (Sub-No. 12), filed February 16, 1973. Applicant: DEARMIN TRANSFER, INC., Highway 61, Wapello, Iowa 52653. Applicant's representative: Kenneth F. Dudley, 611 Church Street, Post Office Box 279, Ottumwa, IA 52501. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles and fabricated and pre-fabricated trusses*, from Burlington, Iowa to points in Illinois, Indiana, Missouri, and Wisconsin. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Kansas City, Mo.

No. MC 57591 (Sub-No. 16), filed December 8, 1972. Applicant: EVANS DELIVERY COMPANY, INC., Post Office Box 268, Pottsville, PA 17901. Applicant's representative: Kenneth R. Davis, 999 Union Street, Taylor, PA 16517. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in cargo containers or cargo vans, and those requiring special equipment, between Philadelphia, Pa., on the one hand, and, on the other, points in Lancaster, Montgomery, Lebanon, Berks, Dauphin, Schuylkill, Lehigh, Northampton, Carbon, Northumberland, Union, Montour, Columbia, Luzerne, and Lycoming (west of Interstate Highway 80 and north of U.S. Highway 611) Counties, Pa., restricted to shipments having a prior or subsequent movement by water. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa.

No. MC 62538 (Sub-No. 17), filed February 20, 1973. Applicant: ASHTON TRUCKING CO., a corporation, Post Office Box 472, Monte Vista, CO 81144. Applicant's representative: Leslie R. Kehl, 1600 Lincoln Center Building, Denver, Colo. 80203. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Such commodities* as are manufactured, processed, sold or otherwise dealt in by persons engaged in the milling of flour or in the sale and distribution of feeds and grains, (1) between Monte Vista, Colo., and a 35-mile radius thereof, on the one hand, and, on the other, points in Arizona (except Apache, Navajo, Coconino, and Maricopa Counties), and (2) from points in Apache, Navajo, Coconino, and Maricopa Counties, Ariz., to points in Colorado, under contract with Ranch-Way Feed Mills. Note: Applicant also holds common carrier authority under MC 57880 and Subs, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 63417 (Sub-No. 49), filed February 20, 1973. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, 1814 Hollins Road NE., Post Office Box 2888, Roanoke, VA 24001. Applicant's representative: Nancy Pyeatt, 420 Executive Building, 1030 15th Street NW., Washington, DC 20005. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Tile, clay and earthenware, glazed and not glazed, with and without backings; tile facing and flooring; china bathroom fixtures; quarries, flooring, paving, and promenade tile; cement, grout, and sundry items necessary for tile installation and maintenance*, from Jackson, Tenn., to points in Alabama, Georgia, Maryland, North

Carolina, South Carolina, Virginia, West Virginia, and the District of Columbia. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa. or Washington, D.C.

No. MC 63417 (Sub-No. 50), filed February 20, 1973. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, 1814 Hollins Road NE., Post Office Box 2888, Roanoke, VA 24001. Applicant's representative: Nancy Pyeatt, 420 Executive Building, 1030 15th Street NW., Washington, DC 20005. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Tile, clay and earthenware, glazed and not glazed, with and without backings; tile facing and flooring; china bathroom fixtures; quarries, flooring, paving, and promenade tile; cement, grout, and sundry items necessary for tile installation and maintenance*, from Lewisport and Cloverport, Ky., to points in Alabama, Georgia, Maryland, North Carolina, South Carolina, Tennessee, Virginia, West Virginia, and the District of Columbia. Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa. or Washington, D.C.

No. MC 63417 (Sub-No. 51), filed February 20, 1973. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, 1814 Hollins Road NE., Post Office Box 2888, Roanoke, VA 24001. Applicant's representative: Nancy Pyeatt, 420 Executive Building, 1030 15th Street NW., Washington, DC 20005. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Tile, clay, and earthenware, glazed and not glazed, with and without backings; tile facing and flooring; china bathroom fixtures; quarries, flooring, paving, and promenade tile; cement, grout, and sundry items necessary for tile installation and maintenance*, from Olean, N.Y., and Quakertown and Lansdale, Pa., to points in Virginia. Note: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant holds authority in MC 63417 (Sub-No. 5) to transport general commodities, with the usual exceptions, from Lansdale, Pa., to points in Henry County and a portion of Pittsylvania County, Va., but applicant does not seek duplicating authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa., or Washington, D.C.

No. MC 63417 (Sub-No. 52), filed February 22, 1973. Applicant: BLUE RIDGE TRANSFER COMPANY, INCORPORATED, 1814 Hollins Road NE., Post Office Box 2888, Roanoke, VA 24001. Applicant's representative: Nancy Pyeatt, 420 Executive Building, 1030 15th Street NW., Washington, DC 20005. Authority sought to operate as a common

carrier, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products* (except in bulk), from the plantsites of Pennzoil Co. at Rouseville, Pa., Wolf's Head Oil Refining Co. division of Pennzoil Co. at Reno, Pa., Penreco, a subsidiary of Pennzoil Co., at Karns City, Pa., and Witco Chemical Corp. at Bradford and Petrolia, Pa., to points in Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia. **Note:** Applicant states that the requested authority cannot be tacked with its existing authority. Applicant has authority to transport general commodities from points in Pennsylvania to Rocky Mount, Va. (MC 63417 Sub-No. 5): to Roanoke, Va., restricted to traffic moving by interchange of trailers to points beyond Roanoke, also its Sub 27 certificate authorizes transportation of petroleum products from Bradford, Pa., to Roanoke, Va., but applicant does not seek duplicating authority. If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa., or Washington, D.C.

No. MC 64808 (Sub-No. 14), filed February 12, 1973. Applicant: W. S. THOMAS TRANSFER, INC., 1854 Morgantown Avenue, Fairmont, WV 26554. Applicant's representative: Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, in containers, and *advertising materials*, from Winston-Salem, N.C., to points in Ohio, Pennsylvania, West Virginia, and Maryland. **Note:** Applicant states that the requested authority could be tacked at points in Marion County, W. Va., with its present general commodity authority under MC 64808, so as to permit a through service to points in Maryland and portions of Pennsylvania, but indicates that it has no present intention of tacking. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., Wheeling or Charleston, W. Va.

No. MC 64808 (Sub-No. 15), filed February 20, 1973. Applicant: W. S. THOMAS TRANSFER, INC., 1854 Morgantown Avenue, Fairmont, WV 26554. Applicant's representative: Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wood pallets and shipping devices*, from points in Alabama, Connecticut, Delaware, Georgia, Indiana, Iowa, Illinois, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia, to Clarksburg, Fairmont, and Huntington, W. Va., Charlotte, Mich., Winston-Salem, N.C., Brockport and Elmira, N.Y.,

North Bergen and Bridgeton, N.J., Clarion, Pa., Atlanta, Ga., Alton and Streator, Ill., and Gas City, Ind. **Note:** Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Toledo, Ohio.

No. MC 69116 (Sub-No. 152), filed February 22, 1973. Applicant: SPECTOR FREIGHT SYSTEM, INC., 205 West Wacker Drive, Chicago, IL 60606. Applicant's representative: Edward G. Bazelon, 39 South LaSalle Street, Chicago, IL 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building, roofing, and insulation materials* (except iron and steel and commodities in bulk) and *materials used in the manufacture, installation, and distribution thereof*, between the plantsites and warehouse facilities of Certain-teed Products Corp. located in Scott County, Minn., on the one hand, and, on the other, points in Illinois, Indiana, Kentucky, Ohio, Wisconsin, and the Lower Peninsula of Michigan, restricted to traffic originating at or destined to the plantsites and warehouse facilities of Certain-teed Products Corp., Scott County, Minn. **Note:** Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis or St. Paul, Minn.

No. MC 74321 (Sub-No. 73), filed February 12, 1973. Applicant: B. F. WALKER, INC., 650 17th Street, Denver, CO 80202. Applicant's representative: Richard P. Kissinger (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from Pueblo, Colo., to points in Arizona, Arkansas, California, Illinois, Iowa, Kansas, Missouri, Nebraska, New Mexico, and Utah. **Note:** Applicant states that the requested authority can be tacked with its existing authority in MC-74321 (Sub-Nos. 15, 17, 21, 27, 32, 34, and 48) but indicates that it has no present intention to tack. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Denver or Pueblo, Colo.

No. MC 75320 (Sub-No. 163), filed February 12, 1973. Applicant: CAMPBELL SIXTY-SIX EXPRESS, INC., Post Office Box 807, Springfield, MO 65801. Applicant's representative: John A. Crawford, 700 Petroleum Building, Post Office Box 22567, Jackson, MS 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equip-

ment), between Chicago, Ill., and Nashville, Tenn., from Chicago, Ill., over Interstate Highway 94 to its junction with Interstate Highway 65, thence over Interstate Highway 65 to Nashville, Tenn., and return over the same routes, serving no intermediate points and serving Nashville, Tenn., as a point of joinder with applicant's authority in No. MC 75320 (Sub-Nos. 91, 142, and 157), as an alternate route for operating convenience only in connection with applicant's authorized regular-route operations. **Note:** Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss., or Chicago, Ill.

No. MC 78118 (Sub-No. 22), filed February 16, 1973. Applicant: W. H. JOHNS, INC., 35 Witmer Road, Lancaster, PA 17602. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, PA 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Prepared food products*, serving the H. J. Heinz Co. warehouse located at or near Woodstown, N.J., as an off-route point in connection with carrier's presently authorized regular route operations between Salem, N.J., and Pittsburgh, Pa. **Restriction:** The service authorized herein is restricted to the transportation of traffic moving from, to or between plants, storage, or other facilities of food processing or manufacturing plants. **Note:** If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Harrisburg, Pa.

No. MC 82044 (Sub-No. 3), filed January 22, 1973. Applicant: STAR WEST CARTAGE COMPANY, INC., 4320 West 41st Street, Chicago, IL 60632. Applicant's representative: Philip A. Lee, 33 North Dearborn, Suite 1801, Chicago, IL 60602. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Liquid and dry bulk sugar, and newsprint in rolls*, between points within the territory bounded by a line beginning at Winthrop Harbor, Ill., and extending west along the Illinois-Wisconsin State line to East Dubuque, Ill., thence along the east bank of the Mississippi River to Rock Island, Ill., thence south along U.S. Highway 67 to Rushville, Ill., thence in a southeasterly direction through Beardstown, Ill., to Springfield, Ill., thence in a northeasterly direction through Decatur and Pesotum, Ill., to the Illinois-Indiana State line at a point 5 miles east of Grape Creek, Ill., thence north along said State line to a point directly west of Dyer, Ind., thence east along U.S. Highway 30 to a point 4 miles north of Beatrice, Ind., thence north to Lake Michigan, and thence along the southwest shore of Lake Michigan to Winthrop Harbor, including the points named and points on the indicated portions of the highways specified, under contract with The Great Western Sugar Co. and Wacker Warehouse Co., Inc. **Note:** If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 94350 (Sub-No. 326), filed February 2, 1973. Applicant: TRANSIT HOMES, INC., Post Office Box 1628, Haywood Road, Greenville SC 29602. Applicant's representative: Mitchell King, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers* designed to be drawn by passenger automobiles in initial shipments, from points in Washington County, N.Y., to points in the United States east of the Mississippi River, including Minnesota and Louisiana. **Note:** Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Albany, N.Y.

No. MC 94350 (Sub-No. 328), filed February 20, 1973. Applicant: TRANSIT HOMES, INC., Post Office Box 1628, Greenville, SC 29602. Applicant's representative: Mitchell King, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers designed to be drawn by passenger automobiles*, in initial movements, from points in Merrick County, Neb., to points in Montana, Wyoming, Colorado, New Mexico, Kansas, Texas, Oklahoma, Missouri, Iowa, Minnesota, North Dakota, South Dakota, and Wisconsin. **Note:** Common control may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Omaha, Neb.

No. MC 100666 (Sub-No. 235), filed February 21, 1973. Applicant: MELTON TRUCK LINES, INC., Post Office Box 7666, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, 3535 Northwest 58th, 280 National Foundation Life Building, Oklahoma City, OK 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Doors, laminated flooring planks, blocks, tile, laminated stair treads, risers and adhesives and accessories* necessary for the installation thereof, from Center, Tex., to points in Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia. **Note:** Applicant states that the requested authority can be tacked with its existing authority but indicates that such operations are not feasible and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hear-

ing is deemed necessary, applicant requests it be held at Memphis, Tenn.

No. MC 103786 (Sub-No. 7), filed February 20, 1973. Applicant: SCHJONE-MAN TRUCKING, INC., Post Office Box 237, 703 South Main Street, Colby, WI 54421. Applicant's representative: Nancy J. Johnson, 4506 Regent Street, suite 100, Madison, WI 53705. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, in bulk, in tank vehicles, from Winona, Minn., to points in Wisconsin (except points in Jackson, Clark, Wood, Marathon, Portage, Adams, Juneau, Monroe, and Vernon Counties, Wis.). **Note:** Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Madison or Milwaukee, Wis.

No. MC 106398 (Sub-No. 639), filed February 20, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers* designed to be drawn by passenger automobiles, in initial movements, from points in Baxter County, Ark., to points in the United States (except Alaska and Hawaii). **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Memphis, Tenn.

No. MC 106398 (Sub-No. 640), filed February 20, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Buildings* in sections, mounted on wheeled undercarriages, from points in Montana to points in the United States (except Alaska and Hawaii). **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Billings, Mont.

No. MC 106398 (Sub-No. 641), filed February 20, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic articles*, from the plantsite of Rotadyne, Inc., at Macedonia and Solon, Ohio to points in the United States (except Alaska and Hawaii). **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot

not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Cleveland, Ohio.

No. MC 106398 (Sub-No. 642), filed February 22, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motor homes* between points in the United States including Alaska (but excluding Hawaii). **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 106398 (Sub-No. 643), filed February 22, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipes, ducts, fittings, and couplings used in heating, cooling and air handling systems, and materials used in the installation of such products*, from the plantsite of United Sheet Metal Co. at Westerville, Ohio to points in Arkansas. **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 106398 (Sub-No. 645), filed February 22, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe, tubing, conduit, materials or fittings, and accessories* used in the installation thereof, from the plantsite of Carlon Products, Division of Indianhead, at Nazareth, Pa., to points in the United States (except Alaska and Hawaii). **Note:** Common control and dual operations may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa.

No. MC 106398 (Sub-No. 646), filed February 22, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers designed to be drawn by passenger automobiles*, in initial movements, from points in Merrick County,

Nebr., to points in the United States (except Alaska and Hawaii). **NOTE:** Common control and dual operations may be involved. Applicant states that the requested authority cannot or will not be tacked with existing authority. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 106398 (Sub-No. 647), filed February 22, 1973. Applicant: NATIONAL TRAILER CONVOY, INC., 1925 National Plaza, Tulsa, OK 74151. Applicant's representative: Irvin Tull (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Trailers designed to be drawn by passenger automobiles*, in initial movements, from points in Herkimer County, N.Y., to points in the United States (except Alaska and Hawaii). **NOTE:** Common control and dual operations may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Utica or Syracuse, N.Y.

No. MC 107496 (Sub-No. 881), filed September 28, 1972. Applicant: RUAN TRANSPORT CORPORATION, Post Office Box 855, Third and Keosauqua Way, Des Moines, IA 50309. Applicant's representative: H. L. Fabritz (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Sodium sulfate*, from Danville, Ill., to points in Missouri, Kentucky, Ohio, and Indiana; (2) *chemicals*, in bulk, from points in Jefferson County, Colo., to points in Nebraska, South Dakota, Wyoming, Montana, Washington, Idaho, Utah, Arizona, New Mexico, Oklahoma, Kansas, and Colorado; and (3) *petroleum products*, in bulk, in tank vehicles, from the Kansas City, Mo.-Kans. commercial zone, to points in Nebraska. **NOTE:** Common control may be involved. Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo. or Omaha, Nebr.

No. MC 108633 (Sub-No. 10), filed February 8, 1973. Applicant: BARNES FREIGHT LINE, INC., Box 369, Carrollton, GA 30117. Applicant's representative: Robert S. Richard, Post Office Box 2069, Montgomery, AL 36103. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Anniston, Ala., and Talladega, Ala., over Alabama Highway 21, serving no in-

termediate points. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Montgomery or Birmingham, Ala.

No. MC 108676 (Sub-No. 52), filed February 20, 1973. Applicant: A. J. METLER HAULING & RIGGING, INC., 117 Chica-mauga Avenue NE., Knoxville, TN 37917. Applicant's representative: Carl U. Hurst, Post Office Box E, Bowling Green, KY 42101. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Cooling towers and fluid coolers which because of size or weight require the use of special equipment, and cooling towers, fluid coolers and accessories for cooling towers and fluid coolers which do not require the use of special equipment*, when moving in the same vehicle with cooling towers and fluid coolers which because of size or weight require the use of special equipment, from the plant site of Marley Co., at Louisville, Ky., to points in Alabama, Arkansas, Arizona, California, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, and Wyoming. **NOTE:** Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Louisville, Ky., or Washington, D.C.

No. MC 109533 (Sub-No. 51), filed February 21, 1973. Applicant: OVERNITE TRANSPORTATION COMPANY, a corporation, 1100 Commerce Road, Richmond, VA 23224. Applicant's representative: C. H. Swanson, Post Office Box 1216, Richmond, VA 23209. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, new furniture, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and uncrated new household, office, and store appliances and equipment), between Huntington, W. Va., on the one hand, and, on the other, Gallipolis and Portsmouth, Ohio, serving all intermediate points: (1) From Huntington over U.S. Highway 52 to Chesapeake, Ohio, thence over Ohio Highway 7 to Gallipolis, and return over the same route; (2) from Huntington over U.S. Highway 62 to Portsmouth, and return over the same route; and (3) from Huntington over U.S. Highway 60 to junction U.S. Highway 23, thence over U.S. Highway 23 to Portsmouth, and return over the same route. Restriction: The regular-route authority requested hereinabove shall not be serviceable, by sale or otherwise, from the irregular-route authority in No. MC-109533 (Sub-No. 48). **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 110988 (Sub-No. 294), filed January 8, 1973. Applicant: SCHNEIDER TANK LINES, INC., 2661 South Broadway, Post Office Box 2298, Green Bay, WI 54306. Applicant's representative: E. Stephen Helsley, 666 11th Street NW., Washington, DC 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Waste acid*, in bulk, in tank vehicles, from Burns Harbor, Ind., to points in Wisconsin, and (2) *chemicals*, in bulk, in tank vehicles, from Rhinelander, Wis., to points in Minnesota, North Dakota, and South Dakota. **NOTE:** Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 111045 (Sub-No. 97), filed February 1, 1973. Applicant: REDWING CARRIERS, INC., Post Office Box 426, Tampa, FL 33601. Applicant's representative: J. V. McCoy (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Prestressed and precast concrete forms, pilings, beams, poles, and slabs*, from Jacksonville, Fla., to points in Georgia, and (2) *steel joists and parts, fittings, and accessories used or useful in the installation thereof*, from Starke, Fla., to points in Georgia. **NOTE:** Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 111812 (Sub-No. 485), filed February 20, 1973. Applicant: MIDWEST COAST TRANSPORT, INC., 900 West Delaware, Post Office Box 1233, Sioux Falls, S. Dak. 57101. Applicant's representative: Ralph H. Jinks (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from the plant site and warehouse facilities of Jeno's, Inc., at Duluth, Minn., to points in California, Arizona, Nevada, Utah, Colorado, Wyoming, Montana, Ohio (except Toledo and Cleveland), Michigan (except the Lower Peninsula), New York, New Jersey, Maryland, Vermont, Massachusetts, Maine, Virginia, West Virginia, Pennsylvania, Connecticut, Rhode Island, New Hampshire, Delaware, and the District of Columbia. **NOTE:** Common control was approved by the Commission in Nos. MC-F-8280 and MC-F-11285. Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 112520 (Sub-No. 288), filed February 22, 1973. Applicant: MCKENZIE TANK LINES, INC., Post Office Box 1200, Tallahassee, FL 32302. Applicant's representative: W. Guy McKenzie, Jr. (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer ingredients*, in bulk, in tank vehicles, from points in Barbour County, Ala., to points in Indiana, Kentucky, North Carolina, South Carolina, Tennessee, and Mississippi. **NOTE:** Common control was approved by the Commission in MC-F-5239. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 112822 (Sub-No. 261), filed February 20, 1973. Applicant: BRAY LINES INC., Post Office Box 1191, 1401 North Little Street, Cushing, OK 74023. Applicant's representative: K. Charles Elliott (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts, and articles distributed by meat packing houses*, as described in section A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 786 (except hides and commodities in bulk), from Wallula, Wash., to points in California. **NOTE:** Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg., or Los Angeles, Calif.

No. MC 113622 (Sub-No. 14), filed February 16, 1973. Applicant: SAMPSON HAULING CORP., Pavilion, N.Y. 14525. Applicant's representative: Kenneth T. Johnson, Bankers Trust of Jamestown Building, Jamestown, N.Y. 14701. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Cranes, and parts and components thereof*, (a) from Batavia, N.Y., to points in the New York, N.Y., commercial zone, as defined by the Commission within which local operations may be conducted under the exemption provided by section 203(b)(8) of the Interstate Commerce Act, restricted to shipments having a subsequent movement by water to points other than points in the contiguous 48 States; (b) from Batavia, N.Y., to Buffalo, N.Y., restricted to the transportation of traffic having a subsequent movement by water to points other than points in the contiguous 48 States; and (c) from Batavia, N.Y., to Niagara Falls, Lewiston, and Buffalo, N.Y., restricted to the transportation of traffic delivered to connecting motor carriers at the main destination points. **NOTE:** Common control may be involved. Applicant states it has the authority set forth in (a), (b), and (c) above for the transportation of front-end loaders (tractor shovels) and parts and components thereof, and at the present

time seeks only to extend commodity descriptions in order to provide service to the same shipper for the transportation of cranes, and that there is no desire to extend either origin or destination points or the purposes for which the transportation is now being provided. Applicant further states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 114097 (Sub-No. 4), filed February 21, 1973. Applicant: NIED-FELDT TRUCKING SERVICE, INC., 821 South Front Street, La Crosse, WI 54601. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Empty containers*, sheet iron or steel, with a liquid capacity not exceeding 1 gallon, from the plant site of Continental Can Co., at La Crosse, Wis., and the warehouse facilities of G. Heileman Brewing Co., Inc., at St. Paul, Minn., under a continuing contract, or contracts, with G. Heileman Brewing Co., Inc., at La Crosse, Wis. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at La Crosse, Wis.

No. MC 114457 (Sub-No. 137), filed February 8, 1973. Applicant: DART TRANSIT COMPANY, a corporation, 780 North Prior Avenue, St. Paul, MN 55104. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Plastic articles*, (1) from Chicago, Ill., to points in Minnesota and Wisconsin; and (2) from Milwaukee, Wis., to points in Minnesota. **NOTE:** Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 114552 (Sub-No. 75), filed February 22, 1973. Applicant: SENN TRUCKING COMPANY, a corporation, Post Office Box 333, Newberry, SC 29108. Applicant's representative: William P. Jackson, Jr., 919 18th Street NW., Washington, DC 20006. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Flywood, composition board, and accessories therefor* (except commodities in bulk), from Camden, N.J., to points in Virginia, North Carolina, South Carolina, and Georgia. **NOTE:** Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 115841 (Sub-No. 452), filed February 21, 1973. Applicant: COLONIAL REFRIGERATED TRANSPORTATION, INC., 1215 Bankhead Highway West, Birmingham, AL 35202. Applicant's representative: Roger M. Shaner, P.O. Box 10327, Birmingham, AL 35202. Authority sought to operate as a common carrier, by motor vehicle, over irregular

routes, transporting: *Surgical instruments, medical syringes* (with or without needles), *syringe needles*, *medical needles*, *thermometers* (filled or empty), *glass and plastic blood collecting bottles*, *laboratory glassware and glass tubing*, *laboratory and surgical gloves*, *bandages*, *adhesives*, *swabs* (with alcohol), *chemicals* and *articles distributed by pharmaceutical houses* (except commodities in bulk), from Sumter, S.C., to Dallas, Tex., and Los Angeles, Calif., restricted to traffic originating at the plant site and warehouse facilities of Becton-Dickinson & Co. at or near Sumter, S.C., and destined to the named destination points. **NOTE:** Common control was approved by the Commission in No. MC-F-7304. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 115917 (Sub-No. 26) (Correction), filed February 1, 1973, published in the FEDERAL REGISTER issue of March 15, 1973, and republished as corrected, in part, this issue. Applicant: UNDERWOOD & WELD COMPANY, INC., Post Office Box 247, Crossnore, NC 28616. Applicant's representative: Wilmer B. Hill, 805 McLachlen Bank Building, 666 11th Street NW., Washington, DC 20001. **NOTE:** The sole purpose of this partial republication is to correct the territorial description to include St. Clair, Mich., as an origin point, which was inadvertently omitted in the previous publication. The rest of the application remains the same.

No. MC 116073 (Sub-No. 250), filed February 20, 1973. Applicant: BARRETT MOBILE HOME TRANSPORT, INC., 1825 Main Avenue, Post Office Box 919, Moorhead, MN 56560. Applicant's representative: Robert G. Tassar and David L. Wanner, 1819 Fourth Avenue South, Moorhead, MN 56560. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Buildings*, complete or in sections and mounted on wheeled undercarriages, from Dubuque County, Iowa, to points in the United States (except Alaska and Hawaii). **NOTE:** Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 116073 (Sub-No. 251), filed February 20, 1973. Applicant: BARRETT MOBILE HOME TRANSPORT, INC., 1825 Main Avenue, Post Office Box 919, Moorhead, MN 56560. Applicant's representative: Robert G. Tassar, 1819 Fourth Avenue South, Moorhead, MN 56560. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Trailers* designed to be drawn by passenger automobiles, in initial movements, from points in Dakota County, Minn., to points in the United States (including Alaska but excluding Hawaii). **NOTE:** Applicant states that the requested authority cannot be

tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 116763 (Sub-No. 242), filed February 16, 1973. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Filters, cleaners, purifiers, parts, and accessories thereto*; and (2) *swimming and wading pools, parts, accessories, and attachments thereto*, from points in Darke County, Ohio to points in the United States in and east of Louisiana, Arkansas, Missouri, Iowa, and Minnesota. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 116763 (Sub-No. 243), filed February 20, 1973. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prepared animal food and pet related items*, from the plantsite and/or warehouse facilities of Lipton Pet Foods, Inc. located at or near Woburn, Mass., to points in Arizona, Arkansas, California, Colorado, Idaho, Iowa, Kansas, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Boston, Mass.

No. MC 117427 (Sub-No. 65), filed February 13, 1973. Applicant: G. G. PARSONS TRUCKING CO., a corporation, Box No. 1085, North Wilkesboro, NC 28659. Applicant's representative: Francis J. Ortmann, 1100 17th Street NW., Suite 613, Washington, DC 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pipe and conduit (other than iron and steel)*, from Rootstown Township (Portage County), Ohio, to points in Virginia, West Virginia, North Carolina, South Carolina, and Georgia. NOTE: Applicant also holds contract carrier authority under MC 116145, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus or Cleveland, Ohio.

No. MC 117883 (Sub-No. 177), filed February 15, 1973. Applicant: SUBLER TRANSFER, INC., 791 East Main Street, Versailles, OH 45380. Applicant's representative: Edward J. Subler, Post Office Box 62, Versailles, OH 45380. Authority

sought to operate as a *common carrier*, by motor vehicle over irregular routes, transporting: *Foods, food products, food preparations and foodstuffs, and advertising equipment, materials and supplies* when shipped therewith (except commodities in bulk), in vehicles equipped with mechanical refrigeration; (1) from points in Ohio and those in Boone, Campbell, and Kenton Counties, Ky., to points in Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, and Wisconsin; and (2) from points in Ohio and those in Boone, Campbell, and Kenton Counties, Ky., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia. NOTE: Applicant states that the requested authority can be tacked with its existing authority but indicates that it has no present intention to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 118127 (Sub-No. 24), filed February 12, 1973. Applicant: HALE DISTRIBUTING COMPANY, INC., 914 South Vail Avenue, Montebello, CA 90640. Applicant's representative: William J. Angello, 120 Main Street, Huntington, NY 11743. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* from points in Los Angeles and Orange Counties, Calif., to points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and the District of Columbia (except frozen fruit and avocado dip from points in Los Angeles County to Baltimore, Md., Boston, Mass., Hartford, Conn., Philadelphia, Pa., New York, N.Y., Providence, R.I., and the District of Columbia; frozen fruits and rhubarb from points in Los Angeles and Orange Counties, Calif., to points in Connecticut, Massachusetts, and New York; and frozen bakery products from points in Los Angeles and Orange Counties, Calif., to points in Maryland, New Jersey, New York, Pennsylvania, Virginia, and the District of Columbia). NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 119441 (Sub-No. 32) (Correction) filed January 31, 1973, published in the FEDERAL REGISTER issue of March 1, 1973, and republished as corrected, in part, this issue. Applicant: BAKER HI-WAY EXPRESS, INC., Box 484, Dover, OH 44622. Applicant's representative: Richard H. Brandon, 79 East State Street, Columbus, OH 43215. NOTE: The sole purpose of this partial republication is to correct the territorial description in (1) to include West Virginia, as a

destination point, which was inadvertently omitted in the previous publication. The rest of the application remains the same.

No. MC 119641 (Sub-No. 110), filed February 22, 1973. Applicant: RINGLE EXPRESS, INC., 450 East Ninth Street, Fowler, IN 47944. Applicant's representative: Robert C. Smith, 711 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Tractors (except truck tractors), tractor parts and attachments thereof*, from Romeo, Mich., to points in Arizona, California, Idaho, Montana, Nevada, Oregon, Utah, Washington, and ports of entry on the international boundary line between the United States and Canada located in North Dakota, Minnesota, Montana, Idaho, and Washington, restricted to the transportation of traffic (a) originating at the named origin point, and (b) destined to points in the named destination States, except that the restriction (b) shall not apply to traffic moving in foreign commerce. NOTE: The requested authority can be tacked with applicant's existing authority but applicant states it does not propose to tack and therefore does not identify the points or territories which can be served through tacking. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 119656 (Sub-No. 14), filed February 12, 1973. Applicant: NORTH EXPRESS, INC., 219 East Main Street, Winamac, IN 46996. Applicant's representative: Donald W. Smith, 900 Circle Tower, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Electric synchronous motors*, from Crystal Lake, Ill., to North Manchester, Ind., and (2) *electric switch components*, from Crystal Lake, Ill., to Winamac, Ind., restricted to traffic moving between the plantsite of Controls Co. of America located at Crystal Lake, Ill., North Manchester and Winamac, Ind. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind., or Chicago, Ill.

No. MC 123233 (Sub-No. 42), filed February 12, 1973. Applicant: PROVOST CARTAGE, INC., 7887 Second Avenue, Ville d'Anjou 437, PQ, Canada. Applicant's representative: J. P. Vermette (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Caustic soda*, in bulk, in tank vehicles, from Syracuse, N.Y., to the port of entry on the international boundary line between the United States and Canada located at or near Alexan-

dria Bay, N.Y., restricted to the transportation of shipments destined to Maitland, Ontario, Canada. NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Albany, N.Y.

No. MC 123314 (Sub-No. 17), filed February 16, 1973. Applicant: JOHN F. WALTER, INC., Post Office Box 175, Newville, PA 17241. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, PA 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prepared food products*, from the H. J. Heinz Co. warehouse at Woodstown, N.J., to the H. J. Heinz distribution center at Mechanicsburg, Pa., restricted to the transportation of traffic originating at the indicated origin point and destined to the indicated destination point. NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Harrisburg, Pa.

No. MC 123407 (Sub-No. 119), filed February 20, 1973. Applicant: SAWYER TRANSPORT, INC., South Haven Square, U.S. Highway 6, Valparaiso, Ind. 46383. Applicant's representative: Michael E. Miller, 502 First National Bank Building, Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and paper products*, from Brainerd and Cloquet, Minn., to points in Indiana, Iowa, Michigan, Ohio, Wisconsin, Illinois (except Chicago and points in its commercial zone), and St. Louis, Mo. NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 124083 (Sub-No. 46), filed February 12, 1973. Applicant: SKINNER MOTOR EXPRESS, INC., 1035 South Keystone Avenue, Indianapolis, IN 46203. Applicant's representative: Walter F. Jones, Jr., 601 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Ferrous sulphate crystals*, in dump trucks, from Indianapolis, Ind., to points in St. Clair County, Ill., St. Louis County, Mo., and St. Louis, Mo. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind., or St. Louis, Mo.

No. MC 124174 (Sub-No. 93), filed January 15, 1973. Applicant: MOMSEN TRUCKING CO., a corporation, 2405 Hiway Boulevard, Spencer, IA 51301. Applicant's representative: Marshall D. Becker, 530 Univac Building, 7100 West Center Road, Omaha, NE 68106. Authority sought to operate as a *common car-*

*rier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles, aluminum plate and extrusions, and contractor's machinery, equipment, materials, and supplies*, from Indian Oaks, Ill., to points in Iowa, Kansas, Minnesota, Nebraska, and South Dakota. NOTE: Common control may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests a consolidated hearing with coapplicants.

No. MC 124309 (Sub-No. 8), filed February 8, 1973. Applicant: ALPHIE J. BOUSLEY, Box 61A, Route 3, Armstrong Creek, WI 54103. Applicant's representative: William C. Dineen, 710 North Plankinton Avenue, Milwaukee, WI 53203. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and plywood*, from points in Oregon, Washington, Idaho, and Montana, to points in Wisconsin and the Upper Peninsula of Michigan, under contract with Hartman Wholesale Corp. Dak., restricted to traffic having a subsequent movement in foreign commerce. NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash. or Portland, Ore.

No. MC 133095 (Sub-No. 41), filed February 20, 1973. Applicant: TEXAS-CONTINENTAL EXPRESS, INC., Post Office Box 434, Euless, TX 76039. Applicant's representative: Rocky Moore (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alcohol and alcoholic beverages* from points in Connecticut and Massachusetts to points in Texas, Oklahoma, Arkansas, and Louisiana. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 133917 (Sub-No. 2), filed February 20, 1973. Applicant: CARTHAGE FREIGHT LINE, INC., Post Office Box 174, Carthage, TN 37030. Applicant's representative: Walter Harwood, 1822 Parkway Towers, Nashville, Tenn. 37219. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Lebanon, Tenn. and the junction of Tennessee Highway 53 and Interstate Highway 40 near Hickman, Tenn.; From Lebanon over U.S. Highway 70N to junction Tennessee Highway 53, thence over Tennessee Highway 53 to junction Interstate Highway 40, and return over the same route serving all intermediate

points, restricted to interline with other carriers in service at Lebanon, Tenn. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn.

No. MC 134387 (Sub-No. 16), filed October 19, 1972. Applicant: BLACKBURN TRUCK LINES, INC., 4998 Branyon Avenue, South Gate, CA 90280. Applicant's representative: Warren N. Grossman, 606 South Olive Street, Los Angeles, CA 90014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Empty glass containers* from points in Los Angeles and Alameda Counties, Calif., to points in Washoe County, Nev. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Los Angeles, Calif.

No. MC 134467 (Sub-No. 3), filed January 22, 1973. Applicant: POLAR EXPRESS, INC., Post Office Box 691, Springdale, AR 72764. Applicant's representative: Charles J. Kimball, 2310 Colorado State Bank Building, 1600 Broadway, Denver, CO 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Seafood and seafood products*, including commodities exempted from regulation under section 203(b) (6) of the Interstate Commerce Act, when moving in the same vehicles and at the same time as commodities not so exempted, from South Bend and Ocean Park, Wash., to points in Colorado, New Mexico, Texas, Oklahoma, Kansas, Missouri, New York, Pennsylvania, Wisconsin, California, Michigan, and Minnesota. NOTE: Common control may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash., or Portland, Ore.

No. MC 134547 (Sub-No. 2), filed February 19, 1973. Applicant: BILBO TRANSPORTS, INC., 2722 Singleton Boulevard, Dallas, TX 75212. Applicant's representative: Austin L. Hatchell, 1102 Perry Brooks Building, Austin, Tex. 78701. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Building, roofing and insulation materials and materials and supplies* used in the manufacture, installation, and distribution (except iron and steel and commodities in bulk) between the plantsite of Certain-Teed Products Corp., located at or near Dallas, Tex. on the one hand, and, on the other, points in Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, New Mexico, Oklahoma, and Tennessee, under a continuing contract with Certain-Teed Products Corp. NOTE: If a hearing is deemed necessary, applicant requests it be held at Dallas or Fort Worth, Tex.

No. MC 134599 (Sub-No. 70), filed February 12, 1973. Applicant: INTERSTATE CONTRACT CARRIER CORPORATION, Post Office Box 748, Salt Lake City, UT 84110. Applicant's representative: Richard A. Peterson, Post Office Box 80806, Lincoln, NE 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products; plastic and plastic articles; fabricated metal products; waste and scrap materials; and equipment materials and supplies* used in the manufacture of the above, between the plantsites and warehouse facilities of Container Corporation of America located in points in Washington, Oregon, and California, on the one hand, and, on the other hand, points in the United States located east of the line formed by the western boundaries of Montana, Wyoming, Colorado, New Mexico, and Texas (where contiguous to Mexico), under contract with Container Corporation of America. NOTE: If a hearing is deemed necessary, applicant requests it be held at Salt Lake City, Utah, or Lincoln, Nebr.

No. MC 134922 (Sub-No. 43), filed February 20, 1973. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, AR 72118. Applicant's representative: William J. Boyd, 29 South La Salle Street, Chicago, IL 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Deerfield and Chicago, Ill., to points in Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 134922 (Sub-No. 44), filed February 20, 1973. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, AR 72118. Applicant's representative: William J. Boyd, 29 South La Salle Street, Chicago, IL 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen food* from Chicago and Deerfield, Ill., to points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 136385 (Sub-No. 2), filed February 20, 1973. Applicant: HALL TRUCK LINES, INC., Lone Tree, Iowa 52755. Applicant's representative: William L. Fairbank, 900 Hubbell Building, Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from the facilities of the Kitchens of Sara Lee located at or near New Hampton, Iowa, to

points in Illinois, Indiana, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, South Dakota, and Wisconsin, restricted to traffic originating at the named origin and destined to the named destination States. NOTE: If a hearing is deemed necessary, applicant does not specify a location.

No. MC 136420 (Sub-No. 3), filed February 12, 1973. Applicant: OKLAHOMA BORDER EXPRESS, INC., 903 South Y Street, Fort Smith, AR 72901. Applicant's representative: Tom Harper, Jr., Post Office Box 43, Kelley Building, Fort Smith, AR 72901. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Oklahoma City and Altus, Okla.; From Oklahoma City over the H. E. Bailey Turnpike to Lawton, Okla., thence over U.S. Highway 62 to Altus, and return over the same route, serving the intermediate points of Cache, Oklahoma, Snyder, Headrick, and Altus Air Force Base, Okla. NOTE: Common control was approved by the Commission in MC-P-11260. If a hearing is deemed necessary, applicant requests it be held at Oklahoma City, Okla., or Fort Smith, Ark.

No. MC 136534 (Sub-No. 1), filed January 16, 1973. Applicant: RICHARD L. CLAPP, doing business as CMC FURNITURE TRANSPORT COMPANY, 611 Gaston Street, Raleigh, NC 27603. Applicant's representative: Ernest D. Salm, 8179 Havasu Circle, Buena Park, CA 90621. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture; new children's desk sets; new dishwashers; new fume hoods; new fume hood bases; new kitchen cabinets and tops, tables, bases, and sinks therefor; new marble slabs; new ranges; new refrigerators; new show or display cases; new stoves; new table parts; and new television stands*, from points in North Carolina, South Carolina, and Tennessee, to points in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming. NOTE: Applicant holds temporary authority as a motor contract carrier and has pending in No. MC-136498 (Sub-No. 3) a permanent authority request, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Raleigh, N.C.

No. MC 136903 (Sub-No. 6), filed February 20, 1973. Applicant: INTERMODAL TRANSPORT, INC., Post Office Box 19022, Louisville, KY 40219. Applicant's representative: W. F. Hart (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Commodities*, in bulk, from the site of Bulk Distribution Centers, Inc., lo-

cated in Broward and Palm Beach Counties, Fla., to points in Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, and Tennessee, restricted to shipments having a prior movement by rail. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Louisville, Ky., or Atlanta, Ga.

No. MC 136916 (Sub-No. 3), filed February 20, 1973. Applicant: LENAPE TRANSPORTATION CO., INC., Post Office Box 227, Lafayette, NJ 07848. Applicant's representative: Bert Collins, 140 Cedar Street, New York, NY 10006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Top soil and humus* (exempt), in single or mixed shipments, from points in Sussex, Warren, and Morris Counties, N.J., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia. NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 136949 (Sub-No. 2), filed February 6, 1973. Applicant: BUESING BROS. TRUCKING INC., North 520 Tamarack Avenue, Long Lake, MN 55356. Applicant's representative: B. W. Christopherson, 1421 Park Avenue, Minneapolis, MN 55404. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes transporting: *Washed stone and pea rock, and sand and processed gravel materials*, from points in Minnehaha and Lincoln Counties, S. Dak., to points in Rock, Nobles, Jackson, and Martin Counties, Minn., under contract with Woodrich Construction Co., Arcon Construction Co., and Barton Contracting Co. NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 138099 (Sub-No. 2), filed February 21, 1973. Applicant: EDWARD LOWRANCE, doing business as LOWRANCE MOVING & STORAGE, 735 West Commercial Street, Lebanon, MO 65536. Applicant's representative: Alan F. Wohlstetter, 1700 K Street NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, as defined by the Commission, restricted to the transportation of traffic having a prior or subsequent movement beyond said points in containers, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating, and decontainerization of such traffic between points in Camden, Christian, Dallas, Dent, Douglas, Greene, Howell, Laclede, Maries, Miller, Oregon, Ozark, Phelps, Polk, Pulaski, Shannon, Stone, Taney, Texas, Webster, and Wright Counties, Mo. NOTE: If a hearing

is deemed necessary applicant requests it be held at St. Louis, Mo.

No. MC 138391 (Correction), filed November 8, 1972, published as MC 13891, in the FEDERAL REGISTER of March 1, 1973, and republished as corrected this issue. Applicant: FRED A. PERELLA, 340 39th Street, Pittsburgh, PA 15201. Applicant's representative: Robert McKenzie, 11th Floor, 100 Fifth Avenue, Pittsburgh, PA 15222. NOTE: The purpose of this republication is to show the correct docket number assigned thereto as shown above in lieu of MC 13891, which was in error. The rest of the notice remains as previously published.

No. MC 138406, filed February 14, 1973. Applicant: WATERLOO FREIGHT SERVICE, INC., 409 Second Street, Waterloo, NE 68069. Applicant's representative: Donald L. Stern, 530 Univac Building, Omaha, Nebr. 68106. Authority sought to operate as a common carrier, by motor vehicle, over irregular and regular routes, transporting: Regular route operations: Milk, from Waterloo, Nebr., to Fremont, Nebr., over Milk Route No. 500 of the Nebraska-Iowa Milk Producers Association, via Nebraska Highway 16 and U.S. Highway 30, serving farmers along said route. Irregular route operations: (1) General commodities (except high explosives and commodities requiring special equipment), between points and places within a 15-mile radius of Waterloo, Nebr.; and between points and places within said radial area on the one hand, and, on the other, all points in Nebraska; and (2) contractor's and construction equipment and machinery, materials and supplies, and commodities, which by reason of their weight, size, or length require special handling or equipment, between all points within a 20-mile radius of Waterloo, Nebr. NOTE: The purpose of this application is to convert a certificate of registration issued to Max Wrigg, doing business as Waterloo Freight Service in Docket No. MC 120086 (Sub-No. 1) to a certificate of public convenience and necessity. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 138444 (Sub-No. 1), filed February 12, 1973. Applicant: KEYSTONE LIME CO., INC., Springs, Pa. 15562. Applicant's representative: D. L. Bennett, 129 Edgington Lane, Wheeling, WV 26003. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Crushed limestone and bituminous road materials, in dump equipment, from points in Somerset County, Pa., to points in Gar-

rett County, Md. NOTE: If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa.

#### MOTOR CARRIER OF PASSENGERS

No. MC 112422 (Sub-No. 5) (Correction), filed November 3, 1972, published in the FEDERAL REGISTER of December 7, 1972, and republished, as corrected, this issue. Applicant: SAM VAM GALDER, INC., 74 South Harmony Drive, Janesville, WI 53545. Applicant's representative: Robert M. Kaske, 8 South Madison Street, Evansville, WI 53536. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in the same vehicle with passengers, in special and charter operations, between Janesville and Beloit, Wis., and the Admiral Corp. plant, at Harvard, Ill. NOTE: The purpose of this republication is to properly indicate the applicant's representative which was filed in error. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Madison or Milwaukee, Wis., or Chicago, Ill.

No. MC 116212 (Sub-No. 6), filed February 6, 1973. Applicant: EYRE'S BUS SERVICE, INC., Union Chapel Road, Woodbine, Md. 21797. Applicant's representative: Bruce E. Mitchell, 1600 First Federal Building, Atlanta, Ga. 30303. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in the same vehicle with passengers, in special operations, in round trip, sightseeing, and pleasure tours, beginning and ending at points in Carroll, Frederick, Howard, and Montgomery Counties, Md., and extending to points in the United States, including Alaska (but excluding Hawaii). NOTE: Applicant also holds contract carrier authority to transport passengers under MC 134929 (Sub-No. 1 TA). If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Frederick, Md.

No. MC 138389 (Sub-No. 2), filed November 27, 1972. Applicant: HUDSON VALLEY BUS CO. INC., Englewood Terrace, Mahopac, N.Y. Applicant's representative: Sidney J. Leshin, 501 Madison Avenue, New York, NY 10022. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special round trip operations, between the town of Carmel, N.Y., and the town of Yorktown, N.Y., on the one hand, and, on the other, Philadelphia,

Pa. NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Brewster, N.Y., White Plains, N.Y., or New York, N.Y.

#### APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

##### MOTOR CARRIERS OF PASSENGERS

No. MC 111215 (Sub-No. 4), filed December 18, 1972. Applicant: SASKATCHEWAN TRANSPORTATION COMPANY, a Corporation, 2041 Hamilton Street, Regina, SK S4P 2E2 Canada. Applicant's representative: W. W. Flynn (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in charter and special operations, between points on the international boundary line between the United States-Canada and points in the United States (except Hawaii). NOTE: Common control may be involved.

##### MOTOR CARRIERS OF PROPERTY

No. MC 128672 (Sub-No. 5), filed February 8, 1973. Applicant: TIMBER TRUCKING CO., INC., Post Office Box 8188, 928 Cross Lanes Drive, Nitro, WV 25143. Applicant's representative: Robert L. DeHart (same address as applicant). Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Lumber, timber, and wood products*, (1) from points in Clearfield County, Pa., to points in Delaware, Indiana, Kentucky, Maryland, Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, Georgia, Alabama, Mississippi, Connecticut, Rhode Island, Massachusetts, Vermont, Maine, New Hampshire, Illinois, and the District of Columbia; (2) from points in Roane County, W. Va., Rockbridge County, Va., and Powell County, Ky., to points in Georgia, Alabama, Mississippi, Connecticut, Rhode Island, Vermont, Massachusetts, Maine, New Hampshire, Illinois, and the District of Columbia; and (3) from Chesapeake Bay Plywood Co., near Pocomoke City, Md., to points in Rockbridge County, Va., under contract with the Burke-Parsons-Bowby Corp.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

(Continued inside)

# REMINDERS

Note: There were no items published after October 1, 1972, that are eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

federal register

Area Code 202 Phone 962-8626

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$2.50 per month or \$25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

### Title 3—The President

#### PROCLAMATION 4204

### Cancer Control Month, 1973

*By the President of the United States of America*

#### A Proclamation

The forces fighting cancer in America are being mobilized as never before in our history.

Under the National Cancer Program, authorized by the National Cancer Act of 1971, public and private resources are being marshaled in the most intensive campaign ever waged against malignant disease.

I have on numerous occasions expressed my strong, personal commitment to the attack on cancer. Cancer is now killing Americans at the rate of 350,000 a year and causing untold suffering for many others. Everything that can effectively be done to find better ways of detecting, treating, and ultimately preventing cancer must be done so that we can substantially reduce its impact.

As a means of giving continued emphasis to the cancer problem, the Congress, by a joint resolution of March 28, 1938 (52 Stat. 148), requested the President to issue annually a proclamation setting aside the month of April as Cancer Control Month.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby proclaim the month of April, 1973, as Cancer Control Month, and I invite the Governors of the States and the Commonwealth of Puerto Rico, and the appropriate officials of all other areas under the United States flag to issue similar proclamations.

To give new emphasis to this serious problem, and to encourage the determination of the American people to meet it, I also ask the medical and health professions, the communications industries, and all other interested persons and groups to unite during this appointed time in public reaffirmation of our Nation's strong commitment to control cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of March, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-seventh.

[FR Doc. 73-6313 Filed 3-29-73; 10:22 am]

## Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

### Title 5—Administrative Personnel CHAPTER I—CIVIL SERVICE COMMISSION

#### PART 213—EXCEPTED SERVICE Department of Health, Education, and Welfare

Section 213.3316 is amended to show that one position of Special Assistant to the Secretary for Health Policy is no longer excepted under Schedule C.

Effective on March 30, 1973, § 213.3316 (a) (23) is revoked.

(5 U.S.C. secs. 3301, 3302, E.O. 10577; 3 CFR 1954-58 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,  
[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.

[FR Doc. 73-6076 Filed 3-29-73; 8:45 am]

### Title 28—Judicial Administration CHAPTER I—DEPARTMENT OF JUSTICE PART 18—LEAA ADMINISTRATIVE REVIEW PROCEDURE

On February 7, 1973, rules implementing the Administrative Provisions of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, were published in the FEDERAL REGISTER (38 FR 3566). Part 17 was incorrectly assigned to this issuance. Part 18 is hereby assigned to these rules and all sections redesignated accordingly.

In addition, under § 18.62, as redesignated, the reference to provisions of § 17.56 should be corrected to read § 18.55.

Dated: March 23, 1973.

THOMAS J. MADDEN,  
Assistant Administrator,  
Office of General Counsel.

[FR Doc. 73-6055 Filed 3-29-73; 8:45 am]

### Title 7—Agriculture CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DE- PARTMENT OF AGRICULTURE

#### PART 301—DOMESTIC QUARANTINE NOTICES

##### Subpart—Gypsy Moth and Brown-tail Moth REGULATED AREAS

In the amendment of the gypsy moth and brown-tail moth regulated areas effective January 5, 1973 (FR Doc. 73-309), the regulated county of Clinton was inadvertently omitted from the list of gypsy moth generally infested areas for

the State of New York. Accordingly, in § 301.45-2a(a) under New York in (1) *Generally infested area* Clinton County should be inserted on the seventh line immediately following Chenango County to read as follows:

Clinton County. The entire county.

Done at Washington, D.C., this 26th day of March, 1973.

LEO G. K. IVERSON,  
Deputy Administrator, Plant  
Protection and Quarantine  
Programs.

[FR Doc. 73-6180 Filed 3-29-73; 8:45 am]

### CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE

#### SUBCHAPTER G—DETERMINATION OF PROPORTIONATE SHARES [Docket No. SH-310]

#### PART 850—DOMESTIC BEET SUGAR PRODUCING AREA Allocation of Acreage

The Sugar Act of 1948, as amended in 1971, provides for the growth and expansion of the beet sugar industry by directing the Secretary of Agriculture to allocate the acreage required to yield not more than a total of 100,000 short tons, raw value, of sugar, to localities where new processing facilities are constructed or existing facilities expanded. Allocations are to be for a period of 3 years and limited for any one processing facility to the acreage required to yield a maximum of 50,000 tons of sugar and a minimum of 25,000 tons. An informal public hearing was held in Washington, D.C., on October 5, 1972, at which interested persons were given the opportunity to submit applications for acreage. Requests for allocations were received from five applicants.

The determination commits 30,000 acres for sugar beet production to the locality to be served by a new processing facility in Hillsboro, N. Dak., and 30,000 acres to the locality to be served by a new processing facility in the vicinity of Wahpeton, N. Dak. Each allocation of 30,000 acres is estimated to yield 50,000 short tons, raw value, of sugar.

Pursuant to the provisions of section 302(b) (3) and (4) of the Sugar Act of 1948, as amended, after investigation and consideration of the evidence obtained at the public hearing held on October 5, 1972, the following determination is hereby issued.

Part 850 of 7 CFR Ch. VIII is amended by adding the following sections.

Sec.	Purpose.
850.234	Definitions.
850.235	Allocation of acreage to farms and conditions of allocation.
850.236	Acreage records to be furnished.
850.237	Adjustments in acreages.
850.238	Revocation of acreage allocation.
850.239	

#### § 850.234 Purpose.

The purposes of §§ 850.234 through 850.239 are to provide acreage for two localities in the Red River Valley of North Dakota and Minnesota to be served by new processing facilities; to allocate to such localities the acreage required to yield not more than a total of 100,000 short tons, raw value, of sugar, as authorized under section 302 of the Sugar Act; and to specify conditions under which such acreage is to be used and is to be protected in subsequent proportionate share determinations.

#### § 850.235 Definitions.

For the purpose of this part, the following terms shall have the meanings as defined in Part 891 of this chapter (38 FR 6367): Secretary, State Committee, County Committee, Act or Sugar Act, Producer, Farm, Operator, proportionate share or share, accredited acreage or accredited acres, crop or crop year, and Beet Sugar Area.

#### § 850.236 Allocation of acreage to farms and conditions of allocation.

(a) *Amount of allocation*—(1) *Hillsboro, N. Dak., locality*. An allocation of 30,000 acres, estimated to yield 50,000 short tons, raw value, of sugar, is made to farms in the Hillsboro, N. Dak., locality for the 1974 crop for the purpose of growing sugar beets for delivery to the beet sugar processing facility of the Red River Valley Cooperative, Inc., an agricultural cooperative association.

(2) *Wahpeton, N. Dak., locality*. An allocation of 30,000 acres, estimated to yield 50,000 short tons, raw value, of sugar is made to farms in the Wahpeton, N. Dak., locality for the 1974 crop for the purpose of growing sugar beets for delivery to the beet sugar processing facility of the Minn-Dak Farmers Cooperative, an agricultural cooperative association.

(b) *Conditions of commitment*—(1) *Eligible farms*. An acreage commitment may be made to any new or old sugar beet farm with headquarters located in the Red River Valley of North Dakota and Minnesota, the operator of which is a member of either the Red River Valley

## RULES AND REGULATIONS

Cooperative, Inc., or the Minn-Dak Farmers Cooperative.

(2) *Limits of commitment to individual farms.* The maximum commitment to any farm to be made by the county committee for the county in which the farm headquarters is located shall not be greater than the number of acres on which the grower-member of the cooperative has contributed his share of equity investment in the cooperative. However, any part of an acreage commitment which the grower-member chooses not to use during the 3-year commitment period may be relinquished by him and used to increase the acreage commitment to other grower-member(s).

(3) *Notification of commitments.* The State Committee shall instruct the County Committee to notify the farm operator, on a form provided by the State Committee, of each eligible farm included on the list prepared pursuant to § 850.237 that the acreage, as adjusted in accordance with § 850.238, has been committed to such farm. Such notice shall also inform the farm operator that if proportionate shares are in effect for either the 1975 or 1976 crop, the initial acreage committed will be adjusted in the same proportion as the State's acreage is adjusted from its acreage of the 1974 crop.

(4) *Proportionate share protection to be accorded farms utilizing committed acreage.* If proportionate shares are in effect for either the 1975 or 1976 crop, the acreage committed shall be adjusted in the same proportion as the State's acreage is adjusted from its acreage of the 1974 crop.

§ 850.237 Acreage records to be furnished.

To permit the keeping of records necessary to record accredited acreage, to accord history protection to farms in the event proportionate shares are established in later years, and for other purposes, the Red River Valley Cooperative, Inc., and the Minn-Dak Farmers Cooperative shall furnish to the county office for the county in which the farm headquarters is located the name and address of each eligible farm operator who has an equity investment in the respective cooperative, the number of acres committed within the overall allocation under § 850.236, and an identification of the land on which sugar beets are to be planted. A copy of this list shall be furnished the applicable State Committee.

§ 850.238 Adjustments in acreage.

The State Committee shall determine that the total of the acreage committed to eligible producers does not exceed the acreage allocated pursuant to § 850.236 (a). If it is determined by the State Committee that a cooperative has committed acreage to eligible producers in excess of the allocation, the State Committee shall reduce the acreage for each farm on a pro rata basis so that the total of such adjusted acreage does not exceed the total of the allocation.

§ 850.239 Revocation of acreage allocation.

The allocation of acreage is subject to revocation in accordance with the provisions of the Act if it is found that the construction of sugar beet processing facilities and the contracting for processing of sugar beets has not proceeded in substantial accordance with the representations upon which such commitment of acreage is based.

STATEMENT OF BASES AND CONSIDERATIONS

*Requirements of the Act.* Section 302 (b) of the Act provides as follows:

• • • (3) In order to make acreage available for growth and expansion of the beet sugar industry, the Secretary, in addition to protecting the interests of new and small producers by regulations generally similar to those heretofore promulgated by him pursuant to this Act, shall allocate as needed from the national sugar beet requirements established by him, during 1972, 1973, and 1974, the acreage required to yield not more than a total of 100,000 short tons, raw value, of sugar for localities to be served by new or substantially enlarged existing sugar beet processing facilities. Allocations shall be for a period of 3 years and limited for any one processing facility to the acreage required to yield a maximum of 50,000 short tons, raw value, of sugar and a minimum of 25,000 short tons, raw value, of sugar. The acreage so allocated shall be distributed on a fair and reasonable basis to new and old sugar beet farms to the extent that it can be utilized without regard to any other acreage allocations to States determined by the Secretary. At the time the Secretary allocates acreage for a new or substantially enlarged existing sugar beet processing facility for any year, which determination shall be made as far in advance of such year as practicable, such allocation shall thereby be committed to be in effect for the year in which production of sugar beets is scheduled to commence or to be substantially increased in the locality or localities determined by the Secretary to receive such acreage allocation for such year, such determination by the Secretary shall be final, and such commitment of acreage allocation shall be irrevocable upon issuance of such determination of the Secretary by publication in the *FEDERAL REGISTER*; except that if the Secretary finds in any case that the construction of new or the substantial enlargement of existing sugar beet processing facilities and the contracting for processing of sugar beets has not proceeded in substantial accordance with the representations made to him as a basis for his determination of acreage allocation, he shall revoke such determination in accordance with and upon publication in the *FEDERAL REGISTER* of such findings. In determining acreage allocations for a locality or localities serving new or substantially enlarged existing sugar beet facilities and whenever proposals are made to construct new or to substantially enlarge existing sugar beet processing facilities in two or more localities (where sugar beet production is proposed to be commenced or to be substantially increased in the same year), the Secretary shall base his determination and selection upon the firmness of capital commitment, the proven suitability of the area for growing sugar beets and the relative qualifications of localities and proposals under such criteria. In making his determination under the preceding sentence, the Secretary shall give a preference to any processing facility lo-

cated or to be located in or adjacent to growing areas where processing facilities were closed during 1970 or thereafter if he finds that sugar beets can and will be grown in sufficient quantity and quality to make the production of sugar beets and the operations of such facility successful. If proportionate shares are in effect in either of the 2 years immediately following the year for which such initial acreage allocation is made in any locality, the Secretary shall adjust the initial allocation in the same proportion as the State's acreage is adjusted from its acreage of the year in which such initial allocation was made.

(4) The allocation of the national sugar beet acreage requirement to States for sugar beet production, as well as the acreage allocation for new or substantially enlarged existing sugar beet processing facilities, shall be determined by the Secretary after investigation and notice and opportunity for an informal hearing.

*General.* Five localities applied for acreage under the provisions of section 302(b). An allocation of the acreage required to yield 50,000 tons of sugar has been awarded to each of two localities—Hillsboro, N. Dak., and Wahpeton, N. Dak. These localities have met all the requirements for the allocation, i.e., the interested persons have a firm commitment of capital, and have satisfactorily proven the suitability of the area for growing sugar beets. Of the three localities which received no acreage one did not meet the basic requirement of firmness of capital commitment; another did not have definite plans for the construction of a sugar beet processing facility, and the third, which requested acreage to support a two-phase expansion of an existing processing facility was determined not to have such a need for acreage protection as is consistent with the need for "growth and expansion of the beet sugar industry" contemplated by section 302(b) (3) of the Sugar Act. That section, which was enacted "in order to make acreage available for growth and expansion of the beet sugar industry", provides that whenever proposals are made to construct new or to substantially enlarge existing facilities in two or more localities, the Secretary shall base his determination and selection upon the relative qualifications of localities and proposals under the criteria set forth above.

*Public hearing.* On August 30, 1972, a notice of hearing was published in the *FEDERAL REGISTER* announcing an informal public hearing on the matter of acreage allocations for localities serving new or substantially enlarged existing sugar beet processing facilities. The hearing was held in Washington, D.C., on October 5, 1972. Requests were received for acreage from five localities.

The Red River Valley Cooperative, Inc., requested an allocation of 50,000 acres to produce an estimated 78,324 short tons, raw value, of sugar, beginning with the 1974 crop. The production is based on a sugar beet yield of 12.5 tons per acre, shrink of 4 percent, sugar content of 15.25 percent, and a recovery rate of 80 percent. The processing facility is scheduled to begin operations in

mid-September 1974. Total financing of \$36.07 million, contingent only upon the allocation of acreage sufficient to produce 50,000 tons of sugar, has been arranged: 57.9 percent or \$20.88 million from the St. Paul Bank for Cooperatives; 6.4 percent or \$2.29 million by second lien from the construction contractor, Braunschweigische Maschinenbauanstalt, Inc. (BMA); and 35.7 percent or \$12.9 million from the grower-members, which consists of \$250 per grower for one share of common stock, \$105 per share for Class A preferred stock, \$75 per share for Class B preferred stock, and \$76 per share for Class C preferred stock.

The Utah-Idaho Sugar Co., supported by the Washington Sugar Beet Growers Association, requested an allocation of 7,911 acres to produce 25,000 short tons, raw value, of sugar for the 1972 crop and an additional 7,911 acres to produce 25,000 tons for the 1973 crop. The request was in support of the two-phase expansion of the company's Columbia Basin factory near Moses Lake, Wash., which took place during 1971 and 1972. The 1971 phase of the expansion increased the daily slicing capacity of the facility from 6,700 to 8,500 tons, and the 1972 phase further increased the capacity to 11,500 tons. All necessary equipment for the expansion was on the plantsite at the time of the hearing, and financing of the expansion was accomplished with internally generated funds.

The Appleton (Minnesota) Area Chamber of Commerce and the Appleton Sugar Beet Growers Association, representing growers who went out of business with the closing of a sugar beet processing facility at Chaska, Minn., requested consideration in the allocation of acreage. The locality had no specific plans for the construction of a facility, but stated that growers were willing to help a would-be processor construct a facility in the area.

The Minn-Dak Farmers Cooperative requested an allocation of 50,000 tons of sugar, raw value, and the acreage necessary to produce that quantity of sugar. The processing facility is expected to be completed in time for processing 1974 crop sugar beets. The processing facility is to be located near Wahpeton, N. Dak., in Dwight Township. Total financing of \$36.69 million, contingent only upon the allocation of acreage sufficient to produce 50,000 tons of sugar, has been arranged: 56.9 percent or \$20.88 million from the St. Paul Bank for Cooperatives; 8 percent or \$2.92 million by second lien from BMA, the firm constructing the processing facility; and 35.1 percent or \$12.89 million from grower members, which consists of \$250 per grower for one share of common stock, \$105 per share for Class A preferred stock, \$75 per share for Class B preferred stock, and \$76 per share for Class C preferred stock.

The Southern Minnesota Beet Sugar Cooperative requested an allocation of 26,763 acres, sufficient to produce 50,000 short tons, raw value, of sugar to serve a new beet sugar factory to be built in the vicinity of Renville, Minn. Although

## RULES AND REGULATIONS

the applicant demonstrated the suitability of the area for growing sugar beets, the firmness of capital commitment had not been attained by November 15, 1972, the closing date for the submission of supplemental information.

*Determination.* This determination provides for the allocation of sugar beet acreage for use by farmers in two localities to be served by new processing facilities located in the Red River Valley of North Dakota and Minnesota. The sugar beet processing facilities are owned by the Red River Valley Cooperative, Inc., located near Hillsboro, N. Dak., and the Minn-Dak Farmers Cooperative, located near Wahpeton, N. Dak. The acreage allocated to each locality (30,000 acres) is expected to be sufficient to yield 50,000 short tons, raw value, of sugar or a total of 100,000 short tons.

Based on the average yield and sugar content of sugar beets in the Red River Valley, and assuming that the new processing facilities attain the 80-percent recovery of sugar (extraction rate) expected by the applicants, each allocation of 30,000 acres will result in total production of 50,000 tons of sugar, raw value.

The acreage allocations requested by the Utah-Idaho Sugar Co. on the basis of a "substantially enlarged existing sugar beet processing facility" have not been granted. The first phase of the company's expansion was programed and completed prior to enactment of the 1971 amendments to the Sugar Act. Additional acreage was planted by growers in the State of Washington to support the 1971 expansion. The second phase of the expansion was completed in 1972, and more acreage was planted to support that expansion. The Department does not believe that the growers serving this expanded facility need the additional protection afforded with an allocation of acreage under this determination. The additional acreage planted by these growers to support the expansion will be almost entirely covered by acreage history after the 1973 crop, since proportionate shares have not been in effect in the sugar beet area since the 1966 crop (shares were established for the 1970 crop, but the restrictions were later rescinded). Furthermore, the allocation to this locality of the acreage required to yield 50,000 tons of sugar would eliminate one of the qualified new facilities thus hindering the "growth and expansion of the beet sugar industry" which is contemplated by section 302(b) (3) of the Act.

Each sugar beet factory in the localities receiving allocations will cost upward of \$30 million. The grower-members of each of the cooperative associations have been assessed a substantial amount on a per acre basis to help defray the cost of their respective projects. In the absence of the assessments to and the commitment by the grower-members, construction would not be possible. Accordingly, it is determined that the method of committing the acreage allocation to individual farms of grower-members as provided in this regulation is fair and reasonable.

If the total acreage committed to eligible farms were to exceed the acreage allocation, pro rata reductions would be made in acreages.

If proportionate shares are in effect for either the 1975 or 1976 crop, the initial acreage committed for any farm in each of these years will be adjusted in the same proportion as the State's acreage is adjusted from its acreage of the 1974 crop unless the grower-member has relinquished a portion of such commitment. In such case, new commitments would be made and protection accorded on the basis of the new commitments. Should proportionate shares be applied in future years, any acreage of sugar beets planted in excess of the acreage committed to the farm will not increase that farm's historical proportionate share protection under this determination.

If the acreage committed to a farm is not fully utilized for the 1974 crop, an opportunity shall be accorded such farm to utilize the acreage in 1975 or 1976.

Environmental statements have been filed by the Department as required by section 102(2) (c) of the National Environmental Policy Act, Public Law 91-190 (83 Stat. 852). After considering the statements and the responses to them, I have concluded that the favorable effects upon the environment, including the social gains, will outweigh the adverse effects which might be encountered by this action.

The provisions of this determination are deemed to be fair and reasonable and in accordance with the provisions of the Sugar Act. Accordingly, I hereby find and conclude that the foregoing regulation will effectuate the applicable provisions of the Act.

(Secs. 301, 302, 403, 61 Stat. 929, 930, as amended, 932; 7 U.S.C. 1131, 1132, 1143)

Effective date, March 30, 1973.

Signed at Washington, D.C., on March 27, 1973.

KENNETH E. FRICK,  
Administrator, Agricultural Stabilization and Conservation Service.

# CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 579]

## PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

### Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period April 1-7, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons,

lemon prices, and the relationship of season average returns to the parity price for lemons.

#### § 910.879 Lemon Regulation 579.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(3) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons continues to ease, with the volume of demand down from last week.

Average f.o.b. price was \$5.47 per carton the week ended March 24, 1973, compared to \$5.65 per carton the previous week.

Track and rolling supplies at 160 cars were up 7 cars from last week.

(4) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(5) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and

the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation for regulation together with its supporting information has been submitted by the committee, however, the Secretary had modified the recommendation to provide for the shipment of a greater quantity of lemons, retaining the same effective date, and such information is being disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on March 27, 1973.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period April 1, 1973, through April 7, 1973, is hereby fixed at 240,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 29, 1973.

PAUL A. NICHOLSON,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

[FR Doc. 73-6343 Filed 3-29-73; 3:20 pm]

#### PART 991—HANDLING OF HOPS OF DOMESTIC PRODUCTION

##### Salable Quantity and Allotment Percentage for the 1973-74 Marketing Year

Notice was published in the March 5, 1973, issue of the FEDERAL REGISTER (38 FR 5882) regarding a proposal to establish, for the 1973-74 marketing year, beginning August 1, 1973, a salable quantity of 55,528,000 pounds, and an allotment percentage of 92 percent, for hops grown in Washington, Oregon, Idaho, and California. The salable quantity is the total quantity of hops that may be freely marketed from any crop grown in those States and handled by handlers. The salable quantity is prorated among producers by applying the allotment percentage to each producer's allotment base.

The salable quantity and allotment percentage herein established are based on a recommendation of the Hop Administrative Committee and other available information in accordance with provisions of Marketing Order No. 991, as amended (7 CFR Part 991), regulating the handling of hops of domestic production, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The notice afforded interested persons the opportunity to submit written data, views, or arguments with respect to the proposal. None were received.

The salable quantity and allotment percentage are derived from the following Committee determinations for the marketing year beginning August 1, 1973:

(1) Total domestic consumption of 36 million pounds of hops;

(2) Minus imports of 13 million pounds of hops to result in domestic consumption of U.S. hops of 23 million pounds;

(3) Plus total U.S. exports of 30 million pounds of hops to equal 53 million pounds total usage of U.S. hops;

(4) Minus a desirable inventory adjustment, as of September 1, 1974, of 294,000 pounds; and

(5) Plus an adjustment of 2,182,000 pounds to provide for allotments not produced plus 640,000 pounds to assure production of the quantity needed to meet market requirements, resulting in adjusted requirements for salable hops of 55,528,000 pounds.

After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Committee, the applicable provisions of the marketing order, and other available information, it is found that to establish a salable quantity and allotment percentage as hereinafter set forth will tend to effectuate the declared policy of the Act.

Therefore, the salable quantity and allotment percentage to be applicable to the 1973-74 marketing year (August 1, 1973-July 31, 1974) are established as follows:

§ 991.211 Allotment percentage and salable quantity for hops during the marketing year beginning August 1, 1973.

The allotment percentage during the marketing year beginning August 1, 1973, shall be 92 percent, and the salable quantity shall be 55,528,000 pounds.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: March 26, 1973, to become effective April 30, 1973.

PAUL A. NICHOLSON,  
Deputy Director,  
Fruit and Vegetable Division.

[FR Doc. 73-6181 Filed 3-29-73; 8:45 am]

#### CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 99, Docket No. AO 183-A28]

##### PART 1099—MILK IN PADUCAH, KY., MARKETING AREA

###### Order Amending Order

*Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the

issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Paducah, Ky., marketing area.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective not later than April 1, 1973. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The recommended decision of the Deputy Administrator, Regulatory Programs, was issued February 13, 1973, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued March 15, 1973. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective April 1, 1973, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER (sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551-559).

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers, who during the determined representative period, were engaged in the production of milk for sale in the marketing area.

###### ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Paducah, Ky., marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

In § 1099.51, paragraph (a) is revised as follows:

§ 1099.51 Class prices.

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus \$1.70.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

*Effective date.* April 1, 1973, with respect to marketings on and after May 1, 1973.

Signed at Washington, D.C., on March 27, 1973.

JAMES H. LAKE,  
Deputy Assistant Secretary.  
[FR Doc. 73-6126 Filed 3-29-73; 8:45 am]

#### Title 8—Aliens and Nationality CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

##### REFUGEE TRAVEL DOCUMENT

Reference is made to the notice of proposed rulemaking which was published in the FEDERAL REGISTER on January 29, 1973 (38 FR 2699), pursuant to section 553 of title 5 of the United States Code (80 Stat. 383) and in which there were set forth proposed rules pertaining to the issuance of travel documents to refugees.

The representations which were received concerning the proposed rules of January 29, 1973, have been considered. Those proposed rules have been amended in the following respects:

In proposed § 223a.3, the first sentence has been amended by inserting the words "physically present" immediately preceding the words "in the United States"; the second sentence has been amended by substituting the words "whose presence

in the United States is lawful" in lieu of the words "lawfully staying in the United States"; and the third sentence has been amended by substituting the words "any other refugee" in lieu of the words "a refugee unlawfully in the United States".

In proposed § 223a.5, paragraph (b) has been amended by adding a new subparagraph (4) to include among the classes of invalid refugee travel documents those documents issued to aliens to whom the U.N. Convention of July 28, 1951, ceases to apply or does not apply as provided in Article IC, D, E, or F of the convention.

In proposed § 223a.6, paragraphs (a) and (b) have been amended to clarify the rights of the returning alien and paragraph (c) has been amended by deleting the last two sentences thereof as unnecessary since the provisions relative to the restrictions on exclusion of holders of unexpired refugee travel documents are set forth in § 236.3(e).

In proposed § 223a.7, the penultimate sentence has been amended to provide for the denial of an application to extend a refugee travel document if it is determined that the document is invalid.

Proposed § 235.6(c) has been deleted and in lieu thereof new § 236.3(e) has been created since the restrictive provisions relative to the exclusion of holders of unexpired refugee travel documents have been repositioned from that portion of the regulations which deals with the institution of such proceedings to the portion of the regulations pertaining to orders resulting from exclusion proceedings. The grounds of inadmissibility on which exclusion may be ordered have been amended to include section 212(a)(31) of the Act. For clarification, a sentence has been added to specify the circumstances under which the special inquiry officer shall remand a case to the district director. In conformity with the repositioning of the restrictive provisions pertaining to exclusion, minor technical changes of reference have been made in proposed §§ 223a.5(b)(3) and 223a.6(c).

Proposed § 242.1(b-1) has not been adopted since it is unnecessary to the central purpose and effectiveness of Part 223a. To the extent that it will be necessary to make determinations regarding the impact of Article 32 of the U.N. Convention on deportability of holders of refugee travel documents, it is preferable that this be done by publication of administrative precedent decisions in deportation proceedings.

The proposed rules, as modified, are hereby adopted:

##### PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. In § 103.1, paragraph (e) is amended by adding a new subparagraph (12a) to read as follows:

§ 103.1 Delegations of authority.

(e) *Regional commissioners.* . . .

(12a) Decisions on applications for refugee travel documents, as provided in § 223a.4 of this chapter;

2. In § 103.7(b), subparagraph (1) is amended by adding the following fee after the existing 12th fee and when taken with the introductory material, it will read as follows:

**§ 103.7 Fees.**

(b) *Amounts of fees.* (1) The following fees and charges are prescribed:

For filing application for issuance or extension of refugee travel document... \$10

**PART 211—DOCUMENTARY REQUIREMENTS: IMMIGRANTS; WAIVERS**

**§ 211.1 [Amended]**

1. Subparagraph (2) *Reentry permit* of paragraph (b) *Aliens returning to an unrelinquished lawful permanent residence* of § 211.1 is amended by adding at the end thereof the following sentence: "A refugee travel document issued pursuant to Part 223a of this chapter to a lawful permanent resident shall be regarded as a reentry permit."

2. Section 211.3 is amended by adding the words "refugee travel document" after the words "reentry permit" wherever they appear in the heading and in the first sentence thereof. As amended, § 211.3 reads, in pertinent part, as follows:

**§ 211.3** Expiration of immigrant visas, reentry permits, refugee travel documents, and Forms I-151.

An immigrant visa, reentry permit, refugee travel document, or Form I-151 shall be regarded as unexpired if the rightful holder embarked or enplaned before the expiration of his immigrant visa, reentry permit, or refugee travel document, or, with respect to Form I-151, before the first anniversary of the date on which he departed from the United States: *Provided*, That the vessel or aircraft on which he so embarked or enplaned arrives in the United States or foreign contiguous territory on a continuous voyage.

**PART 223a—REFUGEE TRAVEL DOCUMENT**

Part 223a is added to read as follows:

**Sec.**  
223a.1 Definition of refugee.  
223a.2 Definition of refugee travel document.  
223a.3 Eligibility.  
223a.4 Application.  
223a.5 Validity of refugee travel document.  
223a.6 Return to the United States.  
223a.7 Extension.  
223a.8 Surrender of document.

**AUTHORITY:** Secs. 103, 211, 212, 235, 236, 237, 241; 8 U.S.C. 1103, 1181, 1182, 1225, 1226, 1227, 1251, and Protocol Relating to the Status of Refugees (TIAS 6577).

**§ 223a.1** Definition of refugee.

For the purposes of this part, the term "refugee" shall be as defined in Article 1 of the U.N. Convention of July 28, 1951, relating to the status of refugees (as

modified by Article I of the Protocol Relating to the Status of Refugees of January 31, 1967), which provides in pertinent part as follows:

**Article 1**

**Definition of the Term "Refugee"**

A. For the purposes of the present Convention, the term "refugee" shall apply to any person who:

(1) Has been considered a refugee under the Arrangements of 12 May 1926 and 30 June 1928 or under the Conventions of 28 October 1933 and 10 February 1938, the Protocol of 14 September 1939 or the Constitution of the International Refugee Organization;

Decisions of non-eligibility taken by the International Refugee Organization during the period of its activities shall not prevent the status of refugees being accorded to persons who fulfill the conditions of paragraph 2 of this section;

(2) Owing to well-founded fear of being persecuted for reasons of race, religion, nationality, membership of a particular social group or political opinion, is outside the country of his nationality and is unable or, owing to such fear, is unwilling to avail himself of the protection of that country; or who, not having a nationality and being outside the country of his former habitual residence, is unable or, owing to such fear, is unwilling to return to it.

In the case of a person who has more than one nationality, the term "the country of his nationality" shall mean each of the countries of which he is a national, and a person shall not be deemed to be lacking the protection of the country of his nationality if, without any valid reason based on well-founded fear, he has not availed himself of the protection of one of the countries of which he is a national.

C. This Convention shall cease to apply to any person falling under the terms of section A if:

(1) He has voluntarily re-availed himself of the protection of the country of his nationality; or  
(2) Having lost his nationality, he has voluntarily reacquired it; or  
(3) He has acquired a new nationality, and enjoys the protection of the country of his new nationality; or

(4) He has voluntarily re-established himself in the country which he left or outside which he remained owing to fear of persecution; or  
(5) He can no longer, because the circumstances in connexion with which he has been recognized as a refugee have ceased to exist, continue to refuse to avail himself of the protection of the country of his nationality;

Provided that this paragraph shall not apply to a refugee falling under section A(1) of this article who is able to invoke compelling reasons arising out of previous persecution for refusing to avail himself of the protection of the country of nationality;

(6) Being a person who has no nationality he is, because the circumstances in connexion with which he has been recognized as a refugee have ceased to exist, able to return to the country of his former habitual residence:

Provided that this paragraph shall not apply to a refugee falling under section A(1) of this article who is able to invoke compelling reasons arising out of previous persecution for refusing to return to the country of his former habitual residence.

D. This Convention shall not apply to persons who are at present receiving from organs or agencies of the United Nations

other than the United Nations High Commissioner for Refugees protection or assistance.

When such protection or assistance has ceased for any reason, without the position of such persons being definitively settled in accordance with the relevant resolutions adopted by the General Assembly of the United Nations, these persons shall *ipso facto* be entitled to the benefits of this Convention.

E. This Convention shall not apply to a person who is recognized by the competent authorities of the country in which he has taken residence as having the rights and obligations which are attached to the possession of the nationality of that country.

F. The provisions of this Convention shall not apply to any person with respect to whom there are serious reasons for considering that:

(a) he has committed a crime against peace, a war crime, or a crime against humanity, as defined in the international instruments drawn up to make provision in respect of such crimes;

(b) he has committed a serious non-political crime outside the country of refuge prior to his admission to that country as a refugee;

(c) he has been guilty of acts contrary to the purposes and principles of the United Nations.

**§ 223a.2** Definition of refugee travel document.

As used in this chapter, the term "refugee travel document" means a document issued by the Service on Form I-571 in implementation of article 28 of the U.N. Convention of July 28, 1951, and in accordance with the provisions of this part.

**§ 223a.3** Eligibility.

Any alien physically present in the United States may apply for a refugee travel document if he believes he is a refugee. A refugee travel document shall be issued to a refugee whose presence in the United States is lawful unless compelling reasons of national security or public order otherwise require. A refugee travel document may be issued, in the exercise of discretion, to any other refugee unless reasons of national security or public order otherwise require; sympathetic consideration shall be given to such an application unless the Service intends to expel or exclude the alien from the United States. For reasons of national security, a refugee travel document shall not be issued to an alien who intends to travel to, in, or through Cuba or Communist portions of Korea or Vietnam, unless the restriction with respect to any such place or places has been waived as provided in § 223a.5(b)(2).

**§ 223a.4** Application.

Application for a refugee travel document shall be submitted on Form I-570 at least 45 days prior to the proposed date of departure from the United States. The application shall be submitted to the district director having jurisdiction over the applicant's place of residence and shall be accompanied by his Form I-94 or Form I-151. The applicant shall be notified of the decision on his application. If the application is approved, the refugee travel document shall be issued and the immigration status which may

be accorded to the alien upon his return to the United States shall be specified therein. Unless the applicant is in the United States as a conditional entrant or lawful permanent resident, the status of "Parolee" shall be specified. If he is in the United States as a conditional entrant, that status shall be specified; if he is a lawful permanent resident, that status shall be specified. If the application is denied, the applicant shall be notified of the reasons therefor and of his right to appeal in accordance with the provisions of part 103 of this chapter.

**§ 223a.5** Validity of refugee travel document.

(a) *General.* A refugee travel document shall be valid for a period not to exceed 1 year from date of issuance and its validity may be extended for a period not to exceed 1 additional year. The document may be used for one or more applications for admission to the United States. It shall have no effect under the immigration laws except to show that during the period of its validity the lawful holder thereof may be accorded the status specified in the refugee travel document upon returning to the United States.

(b) *Invalidity.*—(1) *False application.* A refugee travel document shall be invalid if the alien obtained it by making a material false representation or concealment in his application.

(2) *Area restrictions.* A refugee travel document shall be invalid if the alien during his absence abroad travels to, in, or through Cuba or Communist portions of Korea or Vietnam, unless the document bears an endorsement, or the alien presents a letter issued to him by the Department of State, stating that the restriction with respect to any such place or places has been waived. The waiver shall not be endorsed in the document unless the Secretary of State has granted the alien permission to travel to, in, or through any such place or places.

(3) *Exclusion or deportation proceedings.* A refugee travel document shall be invalid if the alien is ordered excluded or deported.

(4) *Aliens who are no longer refugees.* A refugee travel document shall be invalid if the U.N. Convention of July 28, 1951, shall cease to apply or shall not apply to the alien as provided in Article 1C, D, E, or F of the convention.

**§ 223a.6** Return to the United States.

(a) *General.* Every alien returning to the United States who presents a valid unexpired refugee travel document shall be permitted to come physically within the territory of the United States to receive consideration of his application for admission in conformity with paragraphs (b) and (c) of this section.

(b) *Inspection and immigration status.* Upon arrival, an alien who presents a valid unexpired refugee travel document shall be examined as to his admissibility under the Act, and under the U.N. Convention of July 28, 1951, and

the Protocol of January 31, 1967, except that any question of admissibility as a lawful permanent resident or as a conditional entrant shall be determined solely in accordance with the provisions of the Act. An alien shall be accorded the immigration status endorsed in his refugee travel document unless he is no longer eligible therefor or he applies for and is found eligible for some other immigration status.

(c) *Exclusion.* If an alien who presents a valid unexpired refugee travel document appears to the examining immigration officer to be excludable as provided in § 236.3(e) of this chapter, he shall be referred for proceedings under sections 236 and 237 of the Act. Section 235(c) of the Act shall not be applicable.

**§ 223a.7** Extension.

An application for extension of a refugee travel document shall be submitted on Form I-570 60 to 90 days prior to the expiration of the document's validity. The application shall be submitted to the immigration office having jurisdiction over the applicant's place of residence in the United States, or, if the applicant is temporarily sojourning abroad, he may submit the application to a U.S. immigration or consular officer as specified in § 232.2 of this chapter. An extension application mailed during the document's validity is considered as timely submitted, even though received by a Service or consular officer after the document's validity has expired. If the extension application is granted, the document shall be noted to show the extension and returned to the applicant; if denied, the applicant shall be notified of the decision, and the document returned to him if the remaining period of its validity permits its use for return to the United States. The application may be denied only for compelling reasons of public order or national security, or if it is determined that the refugee travel document is invalid. No appeal shall lie from a decision denying an application for extension of a refugee travel document.

**§ 223a.8** Surrender of document.

(a) *Expired document.* Upon expiration of the period of validity of a refugee travel document, it shall be surrendered to an immigration officer or to the issuing office of the Service. If an alien's expired refugee travel document has not been surrendered to the Service, no subsequent refugee travel document shall be issued to him unless he shall first surrender the expired document or satisfactorily account for his failure to do so. A refugee travel document shall also be surrendered if the alien's immigration status has changed so that upon return to the United States he may not be accorded the status endorsed in the document.

(b) *Invalid document.* An invalid refugee travel document shall be surrendered to an immigration officer except that an alien traveling abroad shall be

permitted to retain it until his return to the United States prior to its expiration date. A refugee travel document shall be surrendered provisionally upon notification within the United States that its validity is being investigated or upon notification of institution of exclusion or deportation proceedings, and it shall be returned to the alien if the outcome of the investigation is favorable to him or the final order issued under the institution proceedings does not result in the document becoming invalid pursuant to § 223a.5(b)(3).

**PART 236—EXCLUSION OF ALIENS**

Section 236.3 is amended by adding a new paragraph (e) to read as follows:

**§ 236.3** Decision of the special inquiry officer; notice to the applicant.

(e) *Holders of refugee travel documents.* Aliens who are the holders of valid unexpired refugee travel documents may be ordered excluded only if they are found to be inadmissible under section 212 (a) (9), (10), (12), (23), (27), (28), (29), or (31) of the Act, and it is determined that on the basis of the acts for which they are inadmissible there are compelling reasons of national security or public order for their exclusion. If the special inquiry officer finds that the alien is inadmissible but determines that there are no compelling reasons of national security or public order for exclusion, the special inquiry officer shall remand the case to the district director for parole.

**PART 299—IMMIGRATION FORMS**

**§ 299.1** [Amended]

The list of forms in § 299.1 *Prescribed forms* is amended by adding the following forms and references thereto in alphabetical and numerical sequence:

Form No.	Title and description
I-570....	Application for Issuance or Extension of Refugee Travel Document.
I-571....	Refugee Travel Document.

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103)

The basis and purpose of the above-prescribed rules are to incorporate into the regulations provisions authorizing the issuance of travel documents to refugees in implementation of Article 28, U.N. Convention of July 28, 1951, and Protocol Relating to the Status of Refugees Between the United States and Other Governments entered into force with respect to the United States on November 1, 1968.

*Effective date.* This order shall become effective on June 1, 1973.

Dated: March 27, 1973.

RAYMOND F. FARRELL,  
Commissioner of  
Immigration and Naturalization.  
[FR Doc. 73-6151 Filed 3-29-73; 8:45 am]

**Title 9—Animals and Animal Products**  
**CHAPTER I—ANIMAL AND PLANT HEALTH**  
**INSPECTION SERVICE, DEPARTMENT**  
**OF AGRICULTURE**

**SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES**

**PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY**

**Areas Quarantined and Released**

These amendments quarantine additional portions of Riverside and San Bernardino Counties in California because of the existence of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles from quarantined areas, as contained in 9 CFR Part 82, as amended, apply to the quarantined areas.

The amendments exclude portions of San Luis Obispo and Los Angeles Counties in California from the areas quarantined because of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mynah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles from quarantined areas, as contained in 9 CFR Part 82, as amended, will not apply to the excluded areas.

Pursuant to the provisions of sections 1, 2, 3, and 4 of the Act of March 3, 1905, as amended, sections 1 and 2 of the Act of February 2, 1903, as amended, sections 4, 5, 6, and 7 of the Act of May 29, 1884, as amended, and sections 3 and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 112, 113, 115, 117, 120, 123, 124, 125, 126, 134b, 134f), Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

1. In § 82.3, in paragraph (a) (1) relating to the State of California, subdivisions (ii) relating to San Luis Obispo County and (v) (g) relating to Los Angeles County are deleted.

2. In § 82.3, in paragraph (a) (1) relating to the State of California, new subdivisions (i) relating to Riverside County and (ii) relating to San Bernardino County are added to read:

(a) . . . . .  
 (1) *California*. (i) The following areas in Riverside County:

(a) The premises of Marvin D. and Jessie K. Rhodes, 28260 Brodiaea Street, Sunnymead, CA, comprised of lots 7 and 8 of sec. 14, T. 3 S., R. 3 W.

(b) The premises of Rycherbosch Turkey Ranch, 40400 Newport Road, Hemet, CA, comprised of lots 1, 2, and 3 of sec. 35, T. 5 S., R. 1 W.

(c) The premises of Quality Farms, 26285 Cottonwood, Sunnymead, CA, comprised of sec. 9, T. 3 S., R. 3 W.

(d) The premises of James Maurice and Barbara Annette Hood, 33574 Beverly Drive, Hemet, CA.

(ii) The premises of Quality Farms, 2127 Mountain Avenue, city of Upland in San Bernardino County, comprised of S½ of sec. 25, T. 1 N., R. 8 W.

(Sec. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111-113, 115, 117, 120, 123-126, 134b, 134f; 37 FR 28464, 28477)

**Effective date.** The foregoing amendments shall become effective March 23, 1973.

The amendments impose certain restrictions necessary to prevent the interstate spread of exotic Newcastle disease, a communicable disease of poultry, and must be made effective immediately to accomplish their purpose in the public interest. The amendments relieve certain restrictions presently imposed but no longer deemed necessary to prevent the spread of exotic Newcastle disease, and must be made effective immediately to of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 23d day of March 1973.

G. H. Wise,  
*Acting Administrator, Animal and Plant Health Inspection Service.*

[FR Doc 73-6125 Filed 3-29-73; 8:45 am]

**SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS**

**PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON**

**General Prohibition; Exceptions**

The purpose of these amendments is to change the terminology used to refer to pigeons for purposes of regulations governing their importation.

Pursuant to the provisions of section 2 of the Act of February 2, 1903, as amended, and sections 2, 3, 4, and 11, of the Act of July 2, 1962 (21 U.S.C. 111, 134a, 134b, 134c, and 134f), Part 92, Title 9, Code of Federal Regulations, is hereby amended as follows:

1. Section 92.1(j) is amended as follows:

(a) In subparagraph (1), the term "pigeon" is deleted;

(b) Subparagraph (2) is amended;

(c) Subparagraph (3) is added to read as follows:

**§ 92.1 Definitions.**

- (j) . . . . .
- (2) *Birds*. All members of the class *aves* (including eggs for hatching), other than poultry or pigeons.
- (3) *Pigeons*. All species of pigeons.

2. In § 92.2, a new paragraph (e) is added to read:

**§ 92.2 General prohibitions; exceptions.**

(e) All of the provisions of this Part 92 shall apply to pigeons to the same extent and in the same manner as they apply to poultry.

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 3, 4, and 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134b, 134c, 134f; 37 FR 28464, 28477)

**Effective date.** The foregoing amendments shall become effective March 30, 1973.

These amendments remove pigeons from classification as "poultry" under the regulations in this Part 92 and do not impose or relieve any restrictions. They should be made effective promptly to be of maximum benefit to persons affected by local ordinances restricting the maintenance of "poultry." It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, and unnecessary, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 26th day of March 1973.

G. H. Wise,  
*Acting Administrator, Animal and Plant Health Inspection Service.*

**Title 10—Atomic Energy**  
**CHAPTER I—ATOMIC ENERGY COMMISSION**

**PART 81—PATENT LICENSING REGULATIONS**

**Licensing of AEC-Owned Inventions**

This revision of the Atomic Energy Commission Regulations Part 81 sets forth the standard specifications for the issuance of licenses on foreign patents and patent applications owned by the AEC, and is issued pursuant to sections 156 and 161g, of the Atomic Energy Act of 1954, as amended. It is promulgated for the purpose of enhancing the utilization by industry of AEC-owned foreign patents in the public interest.

The table of contents is amended as follows:

**LICENSING OF AEC-OWNED FOREIGN INVENTIONS**

- Sec. 81.61 Specific policy as to Licensing Foreign Inventions.
- 81.62 Publication of AEC foreign inventions available for licensing.
- 81.63 Grant and construction of licenses.
- 81.64 Terms and conditions.
- 81.65 Contents of application.
- 81.66 Appeals.

**AUTHORITY:** Secs. 156 and 161g of the Atomic Energy Act of 1954, as amended.

Part 81 is modified as follows:

Add to § 81.2 *Definitions*.

**§ 81.2 Definitions.**

(e) "AEC foreign invention" means an invention covered by a patent, or an application for a patent, issued by a government or authority of a country other than the United States that is vested in the Government of the United States, as represented by the Commission.

**LICENSING OF AEC-OWNED FOREIGN INVENTIONS**

**§ 81.61 Specific policy as to licensing foreign inventions.**

(a) In addition to the general policy expressed in § 81.11 as respects the licensing of Commission-owned patents in order to secure utilization, the following additional policy applies to inventions covered by patents and patent applications issued by a government or authority of a country other than the United States and vested in the Government of the United States of America, as represented by the Commission. The public interest will best be served when such inventions are beneficially utilized.

(b) Licenses granted by the Commission in AEC-owned foreign inventions will be negotiated on terms and conditions which, in the discretion of the Commission, are deemed most favorable to the interests of the United States.

(c) The Commission may grant licenses to practice AEC foreign inventions in accordance with laws of the country or countries in which such patents are applied for or issued. The licenses will usually be for royalties and/or other consideration, but, in the discretion of the Commission, royalties may be waived depending upon the circumstances of a particular case.

(d) All licenses shall be by express written instruments. No license shall be granted or implied in an AEC foreign invention, except as provided for in these regulations or in patent rights articles of Commission Contracts or in an existing or future treaty or agreement between the United States and any foreign government or intergovernmental organization.

**§ 81.62 Publication of AEC foreign inventions available for licensing.**

(a) The Commission will have published periodically lists of AEC foreign inventions available for licensing in the FEDERAL REGISTER and in other publications, where advisable.

(b) Abstracts of AEC foreign inventions, arranged by country, will be distributed periodically by the Commission and will be available from the Office of Information Services, or from the Office of the Assistant General Counsel for Patents, U.S. Atomic Energy Commission, Washington, D.C. 20545.

(c) Copies of foreign patents may be obtained for a fee from the Foreign Patent Office or authority of the issuing country. In some cases, copies of foreign patents may be obtained from the U.S. Patent Office. Copies of U.S. patent application specifications corresponding to the foreign specification may be secured from the U.S. Patent Office for a reasonable fee by arrangement with the Commission.

**§ 81.63 Grant and construction of licenses.**

(a) AEC foreign inventions may be made available for the grant of licenses to responsible applicants who will practice the inventions in the foreign country where the patent is applied for or issued, and thus make the benefits of the invention available to the public. The Commission will determine whether to grant a particular license on bases consistent with the policy set forth in § 81.61 in accordance with the procedures herein, based upon, in addition to other information acquired by the Commission, the information supplied by an applicant for a license on any AEC foreign invention in an application under § 81.65. Some of the factors which the Commission will consider in the grant of a foreign license to a particular applicant are the following:

(1) The nature of the invention and related technology and the effect of the license of the invention upon the policies and practices of the U.S. Government.

(2) The capabilities of the license applicant to further the technical and market development of the invention to bring the same to the point of practical application and to fulfill the demand for the invention primarily in the foreign country.

(3) The applicant's plan to undertake development and marketing of the invention, and, where appropriate, his promise, in consideration for the grant of the license to expend a minimum sum of money and/or take other specified action to bring the invention to the point of practical application and to pay a fee and royalties for the practice of the invention.

(4) The effect of the license and applicant's plan to undertake development and marketing of the invention upon (i) domestic and international commerce and competition, (ii) the balance of payments of the United States and foreign countries, (iii) the improvement and assistance of underdeveloped and developing countries of the world, and (iv) the overall posture of the United States in world markets.

(5) The benefit of the grant of the license to the public and the Government of the United States.

**§ 81.64 Terms and conditions of AEC foreign licenses.**

(a) AEC foreign inventions may be licensed under the following, or other, terms as negotiated between the Commission and the license applicant:

(1) The duration of the license shall be for a specified period of not more than five (5) years and for such additional renewal periods as may be provided for in the license.

(2) The license shall be granted for all of the fields of use of the invention, or only such fields of use as may be specified in the license agreement. The license may grant one or more of the separate rights to manufacture, use, import, export, and to sell, as provided for by the law of the foreign country for which the license is granted.

(3) The license may be granted in any one or all of the foreign countries in which the AEC foreign invention is covered by a patent application, or any lesser geographic area thereof.

(4) The license may be nonexclusive or exclusive. If exclusive, the license will reserve the irrevocable, royalty-free right of the Government of the United States to practice and have practiced the invention by or on behalf of the Government of the United States and on behalf of any foreign government or intergovernmental organization pursuant to any existing or future treaty or agreement with the United States, or any agency thereof, and will reserve the right of the U.S. citizens and corporations to use and sell and have used and sold the product of the invention in the country of grant where manufactured in the United States by a U.S. licensee.

(5) The license will usually require the licensee to pay royalties according to amounts and terms agreed upon with the Commission. Royalties may consist of a minimum fee on consummation of the license and annual royalties consisting of a flat fee or percentage of the licensee's manufacture, use or sale of the invention in each country in which the license is granted with a minimum annual royalty.

(6) The license may require the licensee to expend a specified minimum sum of money and/or to take other specified action, within indicated periods as specified in the license, in an effort to bring the invention to the point of practical application or to practice the invention.

(7) The Commission may require the grant of a nonexclusive license, with the right to grant sublicenses, for use and practice in the United States of any inventions made or conceived by a non-exclusive licensee during the period of the nonexclusive license, and shall require such nonexclusive licenses, with the right to grant sublicenses, in any exclusive license on an AEC foreign invention.

(8) The license will require the licensee to submit periodic reports, and if applicable, royalty accountings, on his practice of the invention in the country or countries in which a license is granted.

(9) The Commission may revoke the license if the licensee fails to make any

report or royalty payments required by the license or commits any breach of any covenant or agreement therein contained, or if the licensee willfully makes or has made a false statement of a material fact or willfully omitted a material fact in the license application submitted pursuant to § 81.65, or in any report or royalty accounting required by the License Agreement.

(10) The licensee may be granted the right to bring suit or otherwise enforce the rights of the license according to the laws of the country for which the license is granted.

(11) The licensee will be required to secure any approvals or validations of any foreign government and may be required to pay the annuity or other fees for the renewal or maintenance of the licensed AEC foreign invention.

#### § 81.65 Contents of a license application.

(a) An application for a license under an AEC foreign invention should include the following information:

(1) Identification of the invention for which the license is desired, including the foreign patent application serial number or the foreign patent number, title, and date, if known, and any other identification of the invention.

(2) Name and address of the person, company, or organization applying for a license and the citizenship or State of incorporation thereof.

(3) Name and address of a representative of applicant to whom correspondence should be sent and any notices served.

(4) Nature and type of applicant's business.

(5) Identification of the source of applicant's information concerning the availability of a license on the invention.

(6) Purpose for which a license is desired: i.e., manufacture, use, or sale in the particular foreign country, and a brief description of applicant's plan to accomplish such purpose.

(7) A statement of the field and the field(s) of use in which applicant intends to practice the invention.

(8) A statement of the foreign country and geographical area(s) in which the applicant will practice the invention.

(9) A statement of applicant's capability to undertake the development and/or marketing required to bring the invention to the point of practical application.

(10) A statement describing the time, expenditure, and other acts which the applicant considers necessary to bring the invention to the point of practical application, and the applicant's offer to invest the time and moneys to accomplish such acts if the license is granted, and applicant's willingness to pay the Commission fees, royalties, and other consideration for the license.

(11) Any other facts which the applicant believes to show it to be in the interest of the public and the U.S. Government for the Commission to grant a foreign license to the applicant.

#### § 81.66 Appeals.

(a) Any decision concerning the grant, denial, interpretation, modification, or revocation of a foreign license under this subpart may be appealed by any party affected by such decision in accordance with the appeal procedures of this subpart by filing a notice of appeal with the Assistant General Counsel for Patents of the Commission within thirty (30) days from the date of the mailing of a written notice of the decision to the party or parties, or if no such written notice is sent, then thirty (30) days from publication in the Federal Register.

(b) Upon receipt of an appeal, the Assistant General Counsel for Patents will notify the General Manager who will designate a Board who shall review and determine the matter in accordance with § 81.53.

This part is effective March 30, 1973. Dated at: Germantown, Md., this 23d day of March 1973.

For the Atomic Energy Commission.

PAUL C. BENDER,  
Secretary of the Commission.

[FR Doc. 73-5983 Filed 3-29-73; 8:45 am]

#### Title 14—Aeronautics and Space

### CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-CE-3-AD; Amdt. 39-1617]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Cessna Models 310 and 320 Airplanes

Service history has disclosed problems in the wing leading edge on Cessna Models 310 and 320 airplanes. There have been service reports of fuel line corrosion, leaks, chafing, and other potential fire hazards. Additional reports have been received on electrical wire harness insulation deterioration, chafing and support. As a result of these incidents the manufacturer has issued Cessna Multiengine Service Letter No. ME73-5, dated March 16, 1973, applicable to Cessna Models 310 and 320 airplanes, which recommends inspections and modifications in the wing leading edge area to detect existing and incipient flammable fluid leakage, to provide drainage of any such leakage and to remove possible sources of ignition. Since the conditions described herein are likely to exist or develop in other aircraft of the same type design an airworthiness directive is being issued making compliance with the service letter mandatory.

Since a situation exists which requires expeditious adoption of the amendment, notice and public procedure hereon are impracticable and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD.

**Cessna.** Applies to all Models 310 and 320 series airplanes and Serial Nos., except Models 310, 310A, 310B, and 310Q (Serial Nos. 310Q0710 and up).

**Compliance:** Required as indicated, unless already accomplished.

To determine condition of fuel lines, electrical wiring, and to detect loose fittings and attachments, to reduce possible collection of flammable fluids and to eliminate possible ignition sources within the leading edges of the wings, within the next 25 hours' time in service after the effective date of this AD, accomplish the following in accordance with Cessna Multiengine Service Letter ME73-5 dated March 16, 1973, and Cessna Service Kit SK 310-90 dated March 7, 1973, or later FAA approved revisions or any other method approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region:

(1) Inspect the fuel lines and electrical harnesses in the wing leading edge for corrosion, chafing, looseness, or other unserviceable conditions. Procedures for this inspection are contained in Cessna Service Kit SK 310-90.

(2) Prior to further flight replace and/or repair any unserviceable parts or conditions found as result of the above inspection.

(3) Install leading edge drainage and sealant provisions in the wings in accordance with paragraph B of Cessna Service Kit SK 310-90.

(4) Remove, relocate, and reinstall the auxiliary fuel boost pump resistor and relay in accordance with paragraphs C and D of Cessna Service Kit SK 310-90.

(a) On those airplanes in which P/N 0850404-1 boost pump relay is installed, relocate this relay to wing trailing edge per Cessna Service Kit SK 310-90. (This relay is no longer eligible for installation in the wing leading edge.)

(b) P/N FC 215-136 boost pump relay already installed in the wing leading edge is acceptable and as an alternative to paragraph (a), P/N 0850404-1 boost pump relay may be replaced with P/N FC 215-136 boost pump relay installed in the present wing leading edge location.

(c) On all airplanes relocate the boost pump resistor in accordance with Cessna Service Kit SK 310-90.

(5) Place amended checklist entitled "Aircraft Fire Procedures Checklist" in the cockpit. This checklist is supplied with Cessna Service Kit SK 310-90.

This amendment becomes effective April 6, 1973.

(Sec. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Kansas City, Mo., on March 22, 1973.

JOHN M. CYROCKI,  
Director, Central Region.

[FR Doc. 73-6074 Filed 3-29-73; 8:45 am]

[Docket No. 73-SO-21; Amdt. 39-1607]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Pitts Model S-2A Series Airplanes

There have been cracks occurring to the horizontal stabilizer leading edge tubes and the horizontal stabilizer support tubes on the Pitts Model S-2A series airplanes. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued to

require inspection of the horizontal stabilizer tubes for cracks.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, is amended by adding the following new airworthiness directive:

**Pitts Aviation Enterprises, Inc.** Applies to Pitts Model S-2A series airplanes, S/N 2001 through 2044. Compliance required as indicated.

(a) Within the next 5 hours' time in service after the effective date of this AD, unless already accomplished, inspect the horizontal stabilizer, P/N 2-3100, front and rear tubes, and the horizontal stabilizer support tubes, front (P/N 2-2123) and rear (P/N 2-2100-109) for cracks.

(1) Disassemble the stabilizers (right and left) in accordance with instructions in Pitts Service Bulletin No. 6, Step 1, or the instructions of paragraph (a) (1) of AD 72-19-5. Also remove horizontal stabilizer root fairing.

(2) Thoroughly clean the exposed portions of all tubes noted above with solvent. Dye-check the tubes in the vicinity of the AN3 bolt holes, and visually inspect for cracks.

(1) If cracks are found, contact Aerotek, Inc., P.O. Box 547, Afton, WY 83110, for approved repair or repair in accordance with a method approved by the Chief, Engineering and Manufacturing Branch, FAA, Southern Region, Atlanta, Ga.

(1) If no cracks are found, reassemble in reverse order of disassembly.

**CAUTION:** Use care on reassembly to insure that the AN365-1032 nuts on the AN3 bolts, which secure the horizontal stabilizer to the support tubes, are tight enough to prevent any axial movement of the bolt, without having any preload or crushing action on the tubes.

(b) Repeat the inspection in paragraph (a) above every 50 hours' time in service after initial inspection.

This amendment becomes effective April 3, 1973, for all persons except those to whom it was made effective upon receipt of the airmail letter dated March 9, 1973, which contained this amendment.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on March 19, 1973.

DUANE W. GREER,  
Acting Director, Southern Region.

[FR Doc. 73-6072 Filed 3-29-73; 8:45 am]

[Docket No. 73-NE-7; Amdt. 39-1616]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Pratt and Whitney Model JT3D Engines

There have been reports of loosening of the return tube elbow jam nuts, P/N 217477, due to improper torque with resulting fuel leakage into the cowl area and possible engine fires. Since this condition is likely to exist or develop in other engines of the same model, an airworthiness directive is being issued to require inspection of the return tube elbow jam

nut for jam nut torque value and repair or replacement of the loose parts as necessary.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

**Pratt & Whitney.** Applies to all Pratt & Whitney JT3D-1, JT3D-1-MC6, JT3D-1-MC7, JT3D-3, and JT3D-3B model engines containing fuel control to fuel return line elbow P/N 424790 and jam nut P/N 217477.

Compliance required within the next 500 hours' time in service after the effective date of this AD and every 1,000 hours in service thereafter, or until modified in accordance with the service bulletin referenced in paragraph (b) (2) or equivalent method approved by the Chief, Engineering and Manufacturing Branch, New England Region.

To prevent the possibility of fuel leakage due to loosening of fuel control to fuel pump return tube elbow P/N 424790, and jam nut P/N 217477, check jam nut torque value.

(a) If found to be a minimum of 285 in-lb, continue in service operation.

(b) If the jam nut is found to be less than 285 in-lb, break the connection and examine the mating threads of the elbow P/N 424790 and fuel control cover P/N 704972-1 on their loaded sides for wear.

**NOTE:** The loaded side will be on the fuel side (inside) rather than the air side (outside) of the cover.

(1) If the threads are not worn, remake the fitting according to the instructions given in the Overhaul Manual, P/N 411568, section 72-00, Fits and Clearances.

(2) If threads are worn replace fuel control to fuel pump return tube elbow, P/N 424790, with P/N 483848 and associated hardware in accordance with Pratt & Whitney Service Bulletin No. 1511 Revision 4, dated June 30, 1969.

(c) Upon submission of substantiating data through an FAA maintenance inspector, the Chief, Engineering and Manufacturing Branch, FAA, New England Region, may adjust repetitive inspection intervals specified in this AD.

This amendment becomes effective April 11, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Burlington, Mass., on March 21, 1973.

FERRIS J. HOWLAND,  
Director, New England Region.

[FR Doc. 73-6073 Filed 3-29-73; 8:45 am]

[Docket No. 72-SO-74; Amdt. 39-1613]

#### PART 39—AIRWORTHINESS DIRECTIVES

##### Teledyne Continental Models IO-470 and TSIO-470 Engines

Amendment 39-1522, 37 FR 19120, AD 72-20-2 requires retirement at next overhaul of all P/N 626820 "Non-H" cylinders and those "H" cylinders manufac-

tured or remanufactured (rebarreled) prior to April 1963, and retains the inspections procedures of AD 67-31-5 on the affected engines only so long as necessary to facilitate the orderly retirement of cylinders on Teledyne Continental Motors Models 0-470 and IO-470 series engines. After issuing Amendment 39-1522 due to service experience, the agency determined that the methods outlined in the airworthiness directive to identify bona fide "H" cylinders were not sufficiently clear to personnel in the field to prevent confusion. Therefore the AD is being amended to provide additional information in the form of Teledyne Continental Service Bulletin M73-2 to aid in identification of "H" and "Non-H" cylinders.

Since this amendment provides a clarification only and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 31 FR 13697, § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-1522, 37 FR 19120, AD 72-20-2, is amended by revising note 3 under paragraph B to read as follows:

**NOTE 3:** On engines manufactured or remanufactured by Teledyne Continental Motors during 1964 or later, as indicated by the year suffix on the serial number, it may be assumed without further verification that "H" type cylinders installed were manufactured subsequent to April 1963, if maintenance records do not indicate a cylinder exchange.

On other engines having "H" type cylinders installed, it will be necessary to establish the cylinder's date of manufacture by removing the rocker box cover and inspecting the area beneath the rocker arm for the impression stamped manufacture date. Information on the location of this stamp was given on page 115 of the August 1971 General Aviation Inspection Aids Summary. However, in the event the manufacture date appears ambiguous or illegible Teledyne Continental Service Bulletin M73-2 should be used to identify cylinders.

This amendment becomes effective April 2, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on March 19, 1973.

DUANE W. FREER,  
Acting Director, Southern Region.

[FR Doc. 73-6071 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 72-GL-46]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Designation of Transition Area

On page 20953 of the FEDERAL REGISTER dated October 5, 1972, the Federal Aviation Administration published a notice of

## RULES AND REGULATIONS

proposed rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Bellefontaine, Ohio.

Interested persons were given 45 days to submit written comments, suggestions, or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 G.m.t., May 24, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Des Plaines, Ill., on March 13, 1973.

H. W. POGGEMEYER,  
Acting Director,  
Great Lakes Region.

In § 71.181 (37 FR 2143), the following transition area is added:

BELLEFONTAINE, OHIO

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Bellefontaine Airport (latitude 40°24'45" N., longitude 83°44'10" W.) and within 3 miles each side of the 049° bearing from the airport extending from the 6-mile-radius area to 13 miles northeast of the airport.

[FR Doc. 73-6065 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 72-GL-76]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Designation of Transition Area

On Page 1939 and Page 1940 of the FEDERAL REGISTER dated January 19, 1973, the Federal Aviation Administration published a notice of proposed rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations, so as to designate a transition area at Hillsboro, Ohio.

Interested persons were given 30 days to submit written comments, suggestions, or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 G.m.t., May 24, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Des Plaines, Ill., on March 13, 1973.

H. W. POGGEMEYER,  
Acting Director,  
Great Lakes Region.

In § 71.181 (38 FR 435), the following transition area is added:

HILLSBORO, OHIO

That airspace extending upward from 700 feet above the surface within an 8-mile ra-

dius of the Highland County Airport (latitude 39°11'21" N., longitude 83°32'18" W.).

[FR Doc. 73-6064 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-GL-12]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Deletion of Transition Areas

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to delete the Plymouth, Mich., and Salem, Mich., transition areas.

The Plymouth, Mich., and Salem, Mich., transition areas will be included in the Detroit, Mich., transition area effective March 29, 1973. Since this deletion imposes no additional burden on any person, therefore notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended effective 0901 G.m.t., March 29, 1973, as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition areas are deleted:

Salem, Mich.  
Plymouth, Mich.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Des Plaines, Ill., on March 13, 1973.

H. W. POGGEMEYER,  
Acting Director,  
Great Lakes Region.

[FR Doc. 73-6066 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-NE-6]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of VOR Federal Airway

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to revoke Victor Airway 139E between Providence, R.I., and Whitman, Mass.

The low altitude en route Instrument Flight Rule (IFR) peak day traffic count for June 29, 1972, indicates one (1) operation on V-139E. Since the volume of IFR traffic does not justify the continued designation of the airspace and as there is no longer an operational requirement for V-139E, termination of this underutilized east alternate segment of V-139 is a minor action upon which the public affected thereby would not be particularly interested in commenting, therefore, notice and public procedure are unnecessary. However, to allow sufficient time for making the necessary changes on the appropriate charts, this action will not become effective until May 24, 1973.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

In § 71.123 (38 FR 307) is amended as follows:

In V-139 "Whitman, Mass., including an E alternate;" is deleted and "Whitman, Mass.;" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-6070 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-SW-2]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Alteration of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Fort Worth, Tex. (Greater Southwest International Dallas-Fort Worth Field) control zone.

On January 24, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 2335) stating the Federal Aviation Administration proposed to delete the Fort Worth, Tex. (Greater Southwest International Dallas-Fort Worth Field) control zone, designate the Dallas-Fort Worth, Tex. (Regional Airport) control zone, and alter the Dallas, Tex. (Love Field), (NAS Dallas), and (Redbird Airport) control zones.

Interested persons were afforded an opportunity to participate in the rulemaking through submission of comments. All comments received were favorable. Subsequent to this proposal, it was determined that there was an operational requirement to conduct flight operations from Greater Southwest International Dallas-Fort Worth Field Airport and the new Dallas-Fort Worth Regional Airport starting on July 12, 1973, and extending until the closure of Greater Southwest International Dallas-Fort Worth Field Airport on or about September 30, 1973. During this interim period, the Greater Southwest International Dallas-Fort Worth Field Airport control zone will be amended to provide controlled airspace for aircraft operating from and to both the Dallas-Fort Worth Regional Airport and the Greater Southwest International Dallas-Fort Worth Field Airport. At the time of closure of the Greater Southwest International Dallas-Fort Worth Field Airport, the alterations of the control zones as proposed in Airspace Docket No. 73-SW-2 will be accomplished through further rulemaking action.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., July 12, 1973, as hereinafter set forth.

In § 71.171 (38 FR 351), the Fort Worth, Tex. (Greater Southwest International Dallas-Fort Worth Field), control zone is amended to read:

FORT WORTH, TEX. (GREATER SOUTHWEST INTERNATIONAL DALLAS-FORT WORTH FIELD)

That airspace within an area bounded by a line beginning at latitude 32°48'00" N.,

longitude 96°59'00" W.; thence east along latitude 32°48'00" N. to and clockwise along the arc of a 5-mile radius circle centered at Love Field (latitude 32°51'00" N., longitude 96°50'50" W.) to latitude 32°49'40" N., west of Love Field; thence northwest to latitude 32°53'15" N., longitude 96°59'35" W.; thence northeast to latitude 32°55'00" N., longitude 96°57'10" W.; thence counterclockwise along the arc of a 5-mile radius circle centered on Greater Southwest International Dallas-Fort Worth Field; thence north along longitude 96°59'00" W. to point of beginning; within 2 miles each side of the Greater Southwest International Dallas-Fort Worth Field ILS localizer north-west course, extending from the arc of a 5-mile radius circle centered on Greater Southwest International Dallas-Fort Worth Field to 1 mile northwest of the OM, within 2 miles each side of the Greater Southwest International Dallas-Fort Worth VORTAC 201° radial extending from the arc of a 5-mile radius circle centered on Greater Southwest International Dallas-Fort Worth Field to 6 miles south of the VORTAC; and within 2.5 miles west and 3.5 miles east of the runway 35L ILS localizer north course of the Dallas-Fort Worth Regional Airport extending from the 5-mile radius zone of the Dallas-Fort Worth Regional Airport to the OM (latitude 32°59'42" N., longitude 97°03'02" W.).

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Fort Worth, Tex., on March 21, 1973.

R. V. REYNOLDS,  
Acting Director,  
Southwest Region.

[FR Doc. 73-6063 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-WA-16]

#### PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

##### Correction to Domestic High Altitude Reporting Points

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to update the list of domestic high altitude reporting points.

Since the designation and deletion of reporting points in accordance with the current requirements of air traffic control is a minor matter upon which the public would not have particular reason to comment, notice and public procedure thereon are unnecessary. Also, as it is desirable to incorporate these changes in the regulations to correctly reflect current requirements, good reason exists for making these changes effective on less than 30 days' notice.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective on March 30, 1973, as hereinafter set forth.

In § 71.207 (38 FR 613) is amended as follows:

1. "Herndon, Va." is deleted.  
2. "Mineral Wells, Tex." is deleted and "Millsap, Tex." is substituted therefor.

## RULES AND REGULATIONS

3. "Pullman, Mich." is added.  
4. "San Angelo, Tex." is deleted.  
(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 22, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-6069 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-EA-15]

#### PART 73—SPECIAL USE AIRSPACE Redesignation of Restricted Airspace

The purpose of this amendment to Part 73 of the Federal Aviation Regulations is to redesignate the using agency of Restricted Areas R-6601, Camp A. P. Hill, Va., and R-6602, Camp Pickett, Va. The U.S. Army has requested that the names of the using agencies for R-6601 and R-6602 be changed effective on or about July 1, 1973. This change is requested due to a reorganization of the Army commands.

Since this amendment is minor in nature and no substantive change in the regulation is effected, notice and public procedure thereon are unnecessary.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., June 21, 1973, as hereinafter set forth. In § 73.66 (38 FR 673), the Camp A. P. Hill, Va., Restricted Area R-6601, and the Camp Pickett, Va., Restricted Area R-6602, are amended by deleting the present using agency and substituting therefor:

Commander, Fort G. Meade, Md.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(a), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 23, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-6067 Filed 3-29-73; 8:45 am]

[Airspace Docket No. 73-WE-7]

#### PART 73—SPECIAL USE AIRSPACE Redesignation of Restricted Airspace

The purpose of this amendment to Part 73 of the Federal Aviation Regulations is to redesignate the using agency of Restricted Areas R-2502N, Fort Irwin, Calif., R-2502E, Fort Irwin, Calif., and R-2504, Camp Roberts, Calif.

The U.S. Army has requested that the names of the using agencies for R-2502N, R-2502E, and R-2504 be changed.

Since this amendment is minor in nature and no substantive change in the regulation is effected, notice and public procedure thereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective May 24, 1973.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., May 24, 1973, as hereinafter set forth.

In § 73.25 (38 FR 634),

(1) The Fort Irwin, Calif., Restricted Areas R-2502N and R-2502E are amended, by deleting the present using agency and substituting therefor:

Commander, Fort Irwin, Calif.

(2) The Camp Roberts, Calif., Restricted Area R-2504, is amended, by deleting the present using agency and substituting therefor:

Commander, Camp Roberts, Calif.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(a), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on March 23, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

[FR Doc. 73-6068 Filed 3-29-73; 8:45 am]

#### Title 26—Internal Revenue CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY SUBCHAPTER H—INTERNAL REVENUE PRACTICE

#### PART 601—STATEMENT OF PROCEDURAL RULES

##### Comments or Suggestions Submitted in Connection With Notices of Proposed Rulemaking

This document contains an amendment to paragraph (b) of § 601.601 of the Statement of Procedural Rules (26 CFR Part 601) and adds a new paragraph (d) (9) to § 601.702 of such rules. The amended and added provisions relate to comments or suggestions submitted in connection with notices of proposed rulemaking of the Internal Revenue Service.

As amended by this document, § 601.601(b) provides that comments on proposed regulations are exempt from disclosure only if the person submitting the comments states in writing (1) which portions of the comments, in his opinion, are exempt from disclosure under law, and (2) the reasons for such exemption.

The amended § 601.601(b) also states that the name of any person submitting comments does not qualify for exemption from disclosure. This provision will apply without regard to the confidential status of his comments.

A new paragraph (d) (9) is added to 26 CFR 601.702 in order to provide a specialized procedure for requesting inspection, or copies, of comments that are not exempt from disclosure.

It is anticipated by the Internal Revenue Service that the form usually used for a notice of proposed rulemaking will be revised in order to accommodate the amended § 601.601(b) and the added § 601.702(d) (9).

The amendment of § 601.601(b) set forth below is, in general, effective with respect to comments received in response to notices of proposed rulemaking of the Internal Revenue Service published in the FEDERAL REGISTER after

## RULES AND REGULATIONS

April 29, 1973. This time lag was chosen in order to give adequate time to make the necessary changes in the form of notices of proposed rulemaking that are currently being developed. Also, it is felt that some time is needed for the public to become informed of the amended rules. Comments in response to notices of proposed rulemaking published in the FEDERAL REGISTER on or before April 30, 1973, are governed by the provisions of 26 CFR 601.601 prior to its amendment. However, the provisions of § 601.702(d) (9) shall apply in the case of requests for the inspection of, or copies of comments, that are made after April 30, 1973, regardless of when the comments were submitted or regardless of when the related notice of proposed rulemaking was published.

This part (26 CFR Part 601), as filed with the FEDERAL REGISTER on June 29, 1955, was last amended on February 23, 1973.

The effective dates of the amended paragraph (b) of 26 CFR 601.601 and the added paragraph (d) (9) of 26 CFR 601.702, as set forth below, are indicated in such sections as set forth below.

The following amendments are made to 26 CFR Part 601:

PARAGRAPH 1. Section 601.601 is amended by revising paragraph (b) thereof to read as follows:

§ 601.601 Rules and regulations.

(b) *Comments on proposed rules*—(1) *In general.* Interested persons are privileged to submit any data, views, or arguments with respect to a notice of proposed rulemaking published pursuant to 5 U.S.C. 553. Any person submitting comments in response to a notice of proposed rulemaking shall specifically designate in writing that portion (if any) of his comments which, in his opinion, contains material which is exempt from disclosure under law and shall state in writing the reasons for such exemption. Any portion of a comment which is designated as exempt from disclosure and the reasons for such exemption shall be set forth on pages separate from the balance of the comment. Any comments or any portion thereof not specifically designated as exempt from disclosure in accordance with this paragraph (b) will be made available pursuant to paragraph (d) (9) of § 601.702. The name of any person submitting comments (whether or not exempt from disclosure in whole or in part) or requesting a public hearing, the issues which may be discussed at the hearing, and outlines relating to the hearing are not exempt from disclosure. (See paragraph (a) (3) of this § 601.601 for rules relating to hearing outlines.) The disclosure by the Internal Revenue Service of—

(i) Any name,

(ii) Any comments, or any portion thereof not specifically designated as exempt from disclosure by the person submitting the comment,

(iii) Any comments, or any portion thereof which is designated as exempt from disclosure by the person submitting

the comments but which is not so exempt under law, or

(iv) The issues which will be discussed at a public hearing and related outlines, will be a disclosure authorized by law within the meaning of any statute governing the disclosure of information.

(2) *Effective date*—(i) *In general.* This paragraph (b) applies to comments submitted in response to notices of proposed rulemaking of the Internal Revenue Service published in the FEDERAL REGISTER after April 29, 1973. Comments submitted in response to notices of proposed rulemaking published in the FEDERAL REGISTER on or before April 30, 1973, are governed by the provisions of 26 CFR Part 601 then in effect.

(ii) *Exception.* Notwithstanding the provisions of paragraph (b) (2) (i) of this section, the provisions of § 601.702(d) (9), relating to the inspection and copying of comments received in response to a notice of proposed rulemaking, shall apply to requests that are made after April 29, 1973, for the inspection or copies of such comments. The preceding sentence shall apply regardless of when the comments were submitted or regardless of when the related notice of proposed rulemaking was published in the FEDERAL REGISTER.

PAR. 2. The following new paragraph (d) (9) is added immediately after paragraph (d) (8) of § 601.702:

§ 601.702 Publication and public inspection.

(d) *Rules for disclosure of certain specified matters* . . . . .

(9) *Comments received in response to a notice of proposed rulemaking.* Written comments received in response to a notice of proposed rulemaking may be inspected by any person upon compliance with the provisions of this subparagraph (9) unless such comments are exempt from disclosure under law. Comments which may be inspected are located in the Office of the Chief Counsel, Legislation and Regulations Division, Technical Section, Room 4317, 1111 Constitution Avenue, Washington, DC 20224. The request to inspect comments must be in writing and signed by the person making the request and should be addressed to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224. Upon delivery of such a written request to the place where the comments are located during the regular business hours of that office, the person making the request may inspect those comments (or portions thereof) which are not exempt from disclosure. Copies of comments (or portions thereof) which are not exempt from disclosure may be obtained by a written request addressed to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224. The person making the request for copies should allow a reasonable time for processing the request. The provisions of paragraph (c) (5) of this section, relating to fees, shall apply with

respect to requests made in accordance with this subparagraph. The provisions of this subparagraph shall apply in the case of requests for the inspection of, or copies of comments that are made after April 29, 1973, regardless of when the comments were submitted or regardless of when the related notice of proposed rulemaking was published in the FEDERAL REGISTER.

[SEAL] JOHNNIE M. WALTERS,  
Commissioner of Internal Revenue.

# Title 33—Navigation and Navigable Waters CHAPTER II—CORPS OF ENGINEERS, DEPARTMENT OF THE ARMY

## PART 207—NAVIGATION REGULATIONS Vessel Speed Limits in Detroit and St. Clair Rivers

MARCH 27, 1973.

The purpose of this amendment is to prescribe speed limits for the St. Clair River and Detroit River for commercial vessels (including tug and barge combinations) 65 feet, or greater, in length pursuant to the authority of the Secretary of the Army to regulate the use, administration and navigation of navigable waters of the United States under section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1).

Since this amendment is local in nature and since the U.S. Army Engineer District, Detroit, has provided notice and opportunity for local public participation in this rulemaking, the Under Secretary of the Army has found that notice of proposed rulemaking and public procedures thereto are unnecessary, and that good cause exists for making this amendment effective April 1, 1973.

Accordingly, the Secretary of the Army hereby amends § 207.510 of Part 207 of Title 33 of the Code of Federal Regulations as set forth below.

For the Chief of Engineers.

JAMES L. KELLY,  
Brigadier General, USA,  
Acting Director of Civil Works.

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) § 207.510(d) (1), (2) and (3) governing the use, administration and navigation of those waters within the United States is hereby amended with respect to the vessel speed limits in the Detroit and St. Clair Rivers as follows effective April 1, 1973:

§ 207.510 Connecting waters of the Great Lakes from Lake Huron to Lake Erie, use, administration and navigation.

(d) *Speed.* Commercial vessels (including tug and barge combinations) 65 feet, or greater, in length shall not exceed the following speeds measured in statute miles per hour over the bottom:

(1) In the St. Clair River:

(i) Between Fort Gratiot Light and Stag Island Upper Junction Lighted

## RULES AND REGULATIONS

8247

Buoy, 9 m.p.h. for upbound vessels and 12 m.p.h. for downbound vessels.

(ii) Between Stag Island Upper Junction Lighted Buoy and Harsens Island Rear Range Light, 12 m.p.h. for both upbound and downbound vessels.

(iii) Between Harsens Island Rear Range Light and St. Clair Cut-off Channel Lt2, FIR, 10 m.p.h. for both upbound and downbound vessels.

(2) In the Detroit River:

(i) Between the black turn buoy (lat. 42°22.0' N., long. 82°54.0' W.—Lake St. Clair), and Fighting Island South Light, 12 m.p.h. for upbound vessels and 14 m.p.h. for downbound vessels.

(ii) Between Fighting Island South Light and Detroit River Light 12 m.p.h. for both upbound and downbound vessels.

(3) [Revoked]

[Regs., Mar. 21, 1973] [Sec. 7, 40 Stat. 266; 33 U.S.C. 1]

[FR Doc. 73-6144 Filed 3-29-73; 8:45 am]

# Title 47—Telecommunication CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 73-315]

## PART 0—COMMISSION ORGANIZATION Delegation of Authority to Chief, Safety and Special Radio Services Bureau

*Order.* In the matter of amendment of Part 0 of the Commission's rules to delegate authority to the Chief, Safety and Special Radio Services Bureau to act on requests for waivers of Part 97 as they relate to amateur radio space stations.

1. Since 1961 six amateur communication satellites have been placed into orbit. The newest satellite, OSCAR 6, was launched on October 15, 1972, and has been successfully transmitting amateur radiocommunication since that date.

2. In order to allow the operation of an amateur radio space station on board a satellite, it is necessary that a number of rules contained in Part 97 of the Commission's rules be waived. Therefore, to facilitate the orderly and efficient regulation of amateur radio space stations, while they are in their present experimental stage, delegated authority is granted to the Chief, Safety and Special Radio Services Bureau to act on such waiver requests of the provisions of Part 97. Waivers granted under this delegated authority will be limited to rules regarding station location, authorized emissions, station control, identification, logging, and operator privileges.

3. Authority for the rule adopted herein is contained in sections 4(i), 5(d) and 303 of the Communications Act of 1934, as amended. Since this change involves only a matter of internal Commission organization, the prior notification requirement of 5 U.S.C. section 553 is not applicable.

4. It is ordered, effective May 3, 1973, that § 0.331 of Part 0 of the Commission's rules is amended as set forth below.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303)

Adopted: March 21, 1973.

Released: March 26, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,<sup>1</sup>  
BEN F. WAPLE,  
Secretary.

In Part 0 of Chapter I of Title 47 of the Code of Federal Regulations, § 0.331 (b) (24) is added to read as follows:

§ 0.331 Authority delegated.

(b) . . . . .  
(24) To act on requests for waivers of the requirements of Part 97 of this chapter when it is shown that such a waiver is required, taking into account the state of the radio art, to allow the operation of an amateur radio space station. Waivers will be limited to the following areas: Station location, authorized emission, station control identification, logging, and operator privileges.

[FR Doc. 73-6139 Filed 3-29-73; 8:45 am]

## [Docket No. 18703; FCC 73-327] PART 1—PRACTICE AND PROCEDURE Tariffs and Evidence

*Memorandum opinion and order.* In the matter of amendment of Part 61 of the Commission's rules relating to tariffs and Part 1 of the Commission's rules relating to evidence.

1. The Commission has before it several petitions requesting reconsideration of our final report and order released herein on October 13, 1970 (see 35 FR 16247), wherein we adopted certain tariff and evidentiary rules (25 F.C.C. 2d 957 (1970)). These petitions were filed on or about November 12, 1970, by two domestic carriers, American Telephone & Telegraph Co. (AT&T) and the Western Union Telegraph Co. (WU), and by two international carriers, Western Union International, Inc. (WUI), and RCA Global Communications, Inc. (RCA). In addition, an opposition to the AT&T, WU, and WUI petitions was filed by the National Retail Merchants Association (NRMA).

2. In essence, the petitioners raise both legal and policy objections to the rules. Insofar as the legal issues are concerned, it is argued:

(a) That section 203(d) of the Communications Act, as amended, sets forth the one and only basis upon which the Commission may reject a tariff filing; that is, for failure to give "lawful notice of its effective date" and that, therefore, the Commission is without power to reject tariff filings for violation of the Commission's rules.

(b) That the requirement that tariff increases and data in support thereof be filed 60 days prior to the effective date

<sup>1</sup> Commissioner Johnson concurring in the result; Commissioner Reid and Hooks dissenting.

of such proposed increase is contrary to the requirements of section 203(b) of the Communications Act which puts a limitation of 30 days' notice which the Commission may require of any proposed tariff revision including increased rates.

(c) That the requirement for data to support new or reduced rates, as distinguished from increased rates, is an unlawful attempt to place the burden of proof on the carrier with respect to new or reduced rates and that section 204 places such burden on the carrier only with respect to increased rates.

3. The objections raised in the petitions on policy grounds relate to such matters as:

(a) The propriety or wisdom of including various requirements with respect to the filing of data and forecasts in those instances where there are competing carriers;

(b) The need to keep data confidential in those instances where there is actual active competition between carriers;

(c) The alleged reliance on cost data to the exclusion of other considerations;

(d) The need for and usefulness of 3-year projections as well as the other detailed data required;

(e) The advisability of substituting a provision which would permit the carrier to cure or rectify deficiencies in their filings rather than subjecting such filing to rejection;

(f) The alleged requirement for data that is not reasonably required to facilitate an understanding or evaluation of any particular filing;

(g) The need for exemptions from rules for tariff changes involving routine alterations on the basis that it is not necessary that the Commission have a detailed analysis of routine changes; and

(h) The need to formulate rules closely related to the diverse situations of each of the various kinds of carriers, such as, for example, certain rules for domestic landline carriers, certain rules for the domestic miscellaneous carriers and other rules for the international voice carrier and the several international record carriers.

## DISCUSSION

## LEGAL ISSUES

4. We shall address the legal objections first. In this connection we note that many of the matters raised in the petitions for reconsideration merely repeat arguments set forth in previous pleadings. We have considered such arguments fully in our final report and order and find no basis for changing our original decision thereon. Insofar as the petitioners' first contention is concerned, that we have power to reject tariffs only for failure to provide a 30-day effective date on tariff filings, it is sufficient to note that we and the courts have held to the contrary. We have held that we can reject tariffs even when the effective date shown on the tariff provides the full 30 days' notice where, for example, there is lack of authorization to perform the service offered in the tariffs. "In Re AT&T Private Line Rate Case," Dockets 18128 and 18684, FCC 72-619, 36 FCC 2d

484 (July 17, 1972); "Press Wireless, Inc.," 21 FCC 311; 511 (1956); aff'd, 264 F.2d 372 (D.C. Cir. 1959). Moreover, subsequent to our final report and order and the filing of the petitions for reconsideration, the U.S. Court of Appeals for the District of Columbia has summarized the powers and duties of regulatory agencies to reject tariffs in the following language:

We recognize, however, that an agency has the power and in some cases the duty to reject a tariff that is demonstrably unlawful on its face. Thus, an agency will reject a tariff that conflicts with a statute, agency regulation or order, or with a rate fixed in a contract sanctioned by statutes; similarly, a tariff will be rejected if it is unlawful without prior agency approval, and approval has not been obtained. "The Associated Press v. FCC et al.," 448 F.2d 1095 (1971) (D.C. Cir.).

5. In connection with the above-stated language of the court, it is to be noted that we have never construed the provisions of section 203(d) as limiting the Commission's powers of rejection solely to tariffs that fail to give notice of their effective date. Rules relating to the filing of tariffs have been in effect during almost the entire period the Commission has existed. These rules, now incorporated as Part 61 of the Commission's rules, set forth numerous requirements with respect to tariffs in addition to notice of effective date. Failure to comply with these rules has always been recognized as grounds for rejection. Petitioners have not heretofore challenged the power of the Commission to reject a tariff which fails substantially to comply with rules governing such minor matters as letters of transmittal, number of copies, prepaid postage, erasures, alterations, etc., none of which is expressly mentioned in section 203(d) of the Act as grounds for rejection. In light of all of the foregoing, we cannot accept as valid a challenge to the authority of the Commission to reject a tariff which is in patent violation of any of the provisions of Part 61 of the rules. Accordingly, we reiterate our position, for the reasons set forth above and in paragraphs 47 through 52 of our final report and order that we have ample authority to reject a tariff for failure to comply with these rules (see 25 FCC 2d 957; 973-975).

6. Fears are expressed in the petitions to the effect that the Commission will exercise power arbitrarily in the rejection of tariffs. In the more than 2 years that the rules have been effective, out of many thousands of filings made, there have been but few rejections based upon failure to comply with our rules. Section 61.69(c) states that failure to comply with our rules constitutes "grounds" for rejection. However, the rule does not mandate that we reject all tariffs that do not comply fully with our rules. Section 61.69(c) means that tariff filings are subject to the exercise of reasonable judgment in implementing the rejection provisions. As the record shows, we have not invoked this power lightly, frequently, or in an arbitrary fashion. Thus, we reject the contention that we will abuse our discretion in exercising our authority to re-

ject tariffs for rule violation. Furthermore, in the light of the experience since the rules became effective, we must reject as unfounded in fact the allegations that retention of our rules will invite incessant petitions for rejections by the public or protracted court tests of every significant filing not rejected.

7. We have dealt fully with the second legal argument challenging the validity of the 60 days' notice requirement for rate increases and data in support thereof, in paragraphs 37 through 43 of our Final Decision and Order (See, 25 FCC 2d 957; paragraphs 969-971). We note that no arguments of any significance in addition to those already considered have been made on this point. Accordingly, we reaffirm our conclusion that we have ample authority under sections 4(i), 4(j), and 203(b) of the Act to require the submission of tariffs and data in support of proposed increases 60 days in advance of the effective date of such increases.

8. As to the third and final legal issue raised, i.e., the power of this Commission under section 204 to require submission of detailed supporting data in connection with new or changed tariff material (not involving a rate increase), we believe that petitioners have misconstrued the effect of section 204 and have misunderstood both the purpose and effect of our rule (§ 61.38) and the legal authority upon which it rests. Petitioners first premise their argument on the contention that section 204 sets forth the one and only situation under which carriers have any burden of proof in any proceeding involving questions of lawfulness of their tariffs, i.e., only at hearings involving a charge increased or sought to be increased. For reasons which we shall state, we disagree with this basic contention.

9. Section 204, enacted in 1934, does not say, as the petitioners appear to contend, that it is only in cases of increased rates that a carrier has any burden of proof. Subsequent to the passage of section 204, the Administrative Procedure Act was enacted with the provision that "Except as otherwise provided by statute, the proponent of a rule or order has the burden of proof." 5 U.S.C. 556(d). Thus, it would appear clear that in any tariff proceeding in which the carrier seeks a rule or order from the Commission approving or prescribing a charge, regulation, classification, or practice the carrier would have the burden of proof irrespective of whether increased rates are being sought. In addition, we have repeatedly held that the burden of proof is on the carrier in tariff proceedings (where increased rates are not being sought) involving questions of lawfulness of "like and contemporaneous communication service be-

The relevant provisions states that: "At any hearing involving a charge increased or sought to be increased, after the organization of the Commission, the burden of proof to show the increased charge, or proposed increased charge, is just and reasonable shall be upon the carriers." 47 U.S.C. 204.

tween the same points at different charges to different users." "Private Line Rate Case," 34 FCC 217, at page 317 (1961); "Telpak Case," 38 FCC 370, 381-382 (1964); "Telpak Sharing Case," 23 FCC 2d 606, at page 625 (1970). On review of our Telpak decisions, the U.S. Court of Appeals for the District of Columbia Court affirmed our decisions including our holding therein on burden of proof in the aforementioned types of cases. "American Trucking Association, Inc. v. FCC," 126 U.S. App. D.C., 236, 377 F.2d 121 (1966), cert. denied, 386 U.S. 943 (1967). Accordingly, we reject the basic contention made herein that carriers have the burden of proof in tariff or rate proceedings only where increased rates are being sought.

10. Furthermore, it is our view that questions of burden of proof in rule-making cases involving the lawfulness of tariffs are largely academic. Under our procedural rules carriers are required to open and close in such cases and, irrespective of where the burden of proof lies, we must make our decision on the basis of reliable, probative, and substantial evidence of record whether adduced by the carriers or other parties. Additionally, contrary to the contentions, we do not view the requirements in our tariff rules for the submission of data to support new or changed tariffs, as having any effect whatsoever on whether or to what extent a carrier may have the burden of proof in any rate or tariff proceeding. In this respect petitioners misconstrue the purpose and effect of our rules. As the reviewing court held in "The Associated Press case, supra, the purpose of our rules is "to provide the Commission with the information necessary to decide whether an investigation and suspension of proposed rates should be ordered" and referred to the decision by the U.S. Supreme Court in "American Farm Lines v. Black Ball Freight Service," 397 U.S. 532 (1970), holding that similar rules of the Interstate Commerce Commission are "mere aids to the exercise of the agency's independent discretion." Thus, the purpose and effect of our rules in this regard is not to impose new burdens of proof on carriers but is to provide us with information by which, in the reasonable exercise of our discretion, we can determine the orderly and proper procedures to follow in the solution of the difficult and complex problems increasingly presented in tariffs filed with us by the carriers. In short, the purpose of the rules is to elicit information and data which will facilitate the Commission's judgment as to whether such proposed tariffs present questions of lawfulness which warrant our investigation and hearing.

#### POLICY OBJECTIONS

11. We have also given careful consideration to the aforementioned policy objections raised by petitioners and it is our conclusion that such objections do not warrant any revisions in our final decision or any substantive changes in our rules. Although extended discussion of such objections is not warranted, it

may be useful to touch briefly upon the principal reasons for our conclusion.

12. We recognize that, in competitive situations, the requirement of our rules that a carrier must submit cost and other data to support new or revised competitive tariffs may make it necessary for such carrier to make public certain information about its operations that it would not ordinarily want to reveal to its competitors. However, disclosures of this nature are inherent characteristics of the regulatory requirements imposed by the Communications Act on carriers subject to our jurisdiction. Carriers must, for example, make public their prices through tariffs filed with us and they must adhere to such prices until changed on proper advance public notice; and, with certain limited exceptions, carriers' contracts, agreements, arrangements, statistics, tables, and figures contained in annual and other reports filed with the Commission must be made public. 47 U.S.C. 412. Moreover, carriers have the obligation under the Act to supply such information as the Commission may need to enable it to carry out its regulatory duties. 47 U.S.C. 218, 219. Our own recent experience under these rules, has been that the submission by carriers of the required cost and other data to support competitive tariff filings has been helpful to us in determining the most orderly and effective regulatory steps to be taken and procedures to be followed in administering the Communications Act and implementing our policy and objective thereunder of maintaining such competition on a full and fair basis. (See e.g., proceedings in Dockets 18684, 19129, 19419, and 19546.) We have found that it is particularly important to obtain the data required by our rules where questions are raised as to whether a new or reduced rate competitive service is being cross-subsidized by other services and whether there is factual support for allegations of anticompetitive impact from such rates. Thus, the value of our rules as a regulatory tool in the public interest far outweigh any supposed detriment to the private interests of carriers who desire to keep such data from their competition. Moreover, petitioners have made no persuasive showing that, as a general rule, the submission of the kind of data we require will, in fact, reveal sensitive data that actually affords competitors any advantage over the filing carrier in the marketplace.

13. Much concern was expressed in the petitions that our rules seem to place too heavy reliance on cost data to the exclusion of other considerations (e.g., value of service) which allegedly may also support proposed rates, particularly competitive rates. However, our requirement for the submission of cost data does not mean that we intend to consider only cost as support for tariff filings, to the exclusion of other factors or principles. On the other hand, the carriers themselves generally stress that their revenues must exceed their costs, and our established regulatory policies are to regard costs either as directly controlling in the fixing of rates or as benchmarks from

which to measure any departures, from costs with a clear and persuasive showing required for such departures. "Private Line Rate Case," 34 FCC 217, at page 231 (1963). Subject to the foregoing, carriers are free to submit any data they wish, in addition to cost, to support their tariff filings and appropriate consideration will be given thereto.

14. With respect to our requirement that the carriers furnish 3-year estimates with respect to the effects of new or changed tariff provisions on the carriers' traffic and revenues, it is true that no carrier can foretell with complete accuracy what will happen over a future 3-year period, particularly in a field as dynamic as interstate and foreign communications. On the other hand, it appears to us that responsible management would not ordinarily undertake to make new or revised service or rate offerings unless and until it has surveyed the potential market and made some assessment of what it may expect will be the results of such offering. Under these circumstances we find it reasonable to have a general rule, subject to waiver in appropriate cases, that the Commission be furnished with such projections to assist it in discharging its statutory duties.

15. With respect to the advisability of adopting a new rule which would allow the carriers to cure or rectify deficiencies in their filings, before rejection, we believe that such a rule would unreasonably inhibit the ability of the Commission to take on its own motion or in response to pleadings filed by the public, prompt and effective action to prevent patently defective tariffs from becoming effective. Moreover, any rejection of tariffs for violation of our tariff rules is always without prejudice to the prompt refiling by the carrier of appropriate revisions in full compliance with the rules.

16. As to the contention that the data required by the Commission's rules should be limited to data that would be reasonably needed by the Commission to understand and evaluate tariff filings, we believe that our rules do just that and no more. The data required by § 61.38 is the minimum which we believe is required for us to make necessary decisions with respect to most, if not all, tariff filings that are subject thereto.

17. As to the argument that a de minimis exemption should exist for certain kinds or levels of tariff filings and that a need exists for expanding or increasing the categories of items exempted from the requirements of the rules, we dealt fully with this matter in paragraph 26 of our final decision. Experience gained since the effective date of our rules indicates that there has been no great difficulty on the part of most carriers in complying with the requirements of our rules. Accordingly, we do not believe that we should revise our rules to allow for any further exemption at this time. With regard to the possibility of exemptions for so-called "routine" tariff changes, we indicated in paragraph 26 of our final decision that if it becomes apparent after experience has been

gained that certain types of routine changes do not require all or part of the support required by our rules, then waiver of the rules would be granted or new rules would be promulgated. Based on our experience we believe that we should continue to handle any such "routine" exemptions by waivers made upon specific application by the carriers rather than by any rule changes at this time.

18. The contentions that the diverse requirements of the various kinds of carriers dictate different application of the rules as to each class of carriers are not sufficiently supported by probative factual data for us to conclude that any significant benefit would accrue to the carriers or to the public by making this kind of revision in our rules. It may be true that one class of carriers may have problem areas that other classes do not have, but we do not believe that any undue burden is placed upon any particular class of carriers under the rules as they now stand. In those instances where the carrier can make a reasonable demonstration that our rules as written cause undue burden or are not relevant to the rate schedule submitted, we will, of course, grant a waiver upon specific application therefor as provided for in the rules. If experience shows in the future that changes are necessary to accommodate the needs of different classes of carriers, we will entertain specific proposed amendments with respect thereto.

19. Although we have concluded that no changes should be made at this time in the rules under review, we currently have under consideration further possible changes therein. These prospective changes relate to the notice requirements for tariffs offering new or revised classes and subclasses of service.<sup>1</sup> At the time of any such proposed rulemaking, we expect to give consideration to any additional changes that interested parties may wish to propose in the light of further experience under the rules. However, there is one procedural rule change that we believe should be effectuated at this time.

20. The 14-day time period now permitted by § 1.773(b) for filing petitions to suspend tariffs may be appropriate for tariffs that are filed on approximately 30 days' notice and we propose no change therein. However, our rules now require carriers to file tariffs which constitute rate increases on at least 60 days', rather than 30 days' notice (§ 61.58). As to such 60-day notice filings, we believe that petitions to suspend should be filed with the Commission and served upon the publishing carrier and the Chief, Common Carrier Bureau, substantially earlier than is now permitted under the 14-day rule. At present, interested parties have approximately 16 days after a 30-day tariff is filed within which to prepare and submit any petitions to suspend. We believe that for tariffs that are filed on 60 days' notice we should modify the filing requirements so as to afford the

<sup>1</sup> See report and order adopted Jan. 31, 1973, in Docket No. 19117, FCC 73-132; 39 FCC 2d 131.

Commission adequate time to consider protests without imposing undue time constraints on potential protesters. It appears to us that in these instances, it is reasonable to require any petitions to suspend to be filed within approximately 25 days after the tariff is filed. This would afford interested parties 9 days more than they now have to file objections to 30-day tariffs and would allow us adequate time to consider objections and timely filed responses. Accordingly, we shall require such petitions to be filed at least 35 days prior to the effective date of any 60-day tariff filing. This amendment to our rules is set forth below. Authority for this amendment is contained in sections 4(i), 4(j), and 203(b) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), and 203(b). Because this amendment relates to procedure and practice, the prior notice and effective date provisions of 5 U.S.C. 553 are inapplicable.

21. Accordingly, it is ordered, That the petitions for reconsideration are denied, and that § 1.773(b) of our rules is amended, effective April 3, 1973, as set forth below. It is further ordered, That this proceeding is terminated.

(Secs. 4, 203, 48 Stat., as amended 1066, 1070; 47 U.S.C. 154, 203)

Adopted: March 21, 1973.

Released: March 27, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

In Part 1 of Chapter 1 of Title 47 of the Code of Federal Regulations, § 1.773 (b) is revised to read as follows:

§ 1.773 Petitions for suspension of tariff schedules.

(b) When filed. Any petition for suspension shall be filed with the Commission and served upon the publishing carrier and the Chief, Common Carrier Bureau, and the Chief of the appropriate Division of that Bureau at least 14 days before the effective date of the tariff schedule, except in those cases in which the tariff schedule in question is filed on 60, or more, days' notice to the public prior to the effective date thereof. In the latter cases, a petition for suspension shall be filed with the Commission and served upon the publishing carrier, the Chief, Common Carrier Bureau, and the Chief of the appropriate Division of that Bureau at least 35 days before the effective date of the tariff schedule. In case of emergency and within the time limits provided herein, a telegraphic request for suspension may be sent to the Commission setting forth succinctly the substance of the matters required by paragraph (a) of this section. A copy of any such telegraphic request shall be sent simultaneously to the publishing carrier and the Chief, Common Carrier Bureau, and the Chief of the appropriate Division.

\*Commissioners Burch, Chairman; Reid and Wiley concurring in the result; Commissioner Johnson dissenting.

sion of that Bureau and forthwith confirmed by petition filed and served in accordance with this section. (Sec. 1.4 does not apply to this § 1.773(b).)

[FR Doc 73-6138 Filed 3-29-73; 8:45 am]

[Docket No. 19617; FCC 73-324]

#### PART 73—RADIO BROADCAST SERVICES Television Stations in Nashville, Tenn.

Report and order. In the matter of amendment of § 73.606(b), table of assignments, Television Broadcast Stations (Nashville, Tenn.), Docket No. 19617, RM-1944.

1. We here consider the rulemaking to amend the Television Table of Assignments (§ 73.606(b) of the Commission's rules and regulations) to change the educational noncommercial reservation from Channel 2 to Channel 8 at Nashville, Tenn., and to simultaneously modify the licenses of WSIX-TV (now Channel 8) and WDCN-TV (now Channel 2). This proceeding was instituted by a joint petition of the General Electric Broadcasting Co., Inc. (General Electric), and the Metropolitan Board of Education (the "Board"), the respective licensees of these stations. A notice of proposed rulemaking was adopted October 18, 1972 (FCC 72-945). (See 37 FR 22991.) Timely comments were filed separately by the two petitioners supporting the rulemaking proposal. South Central Broadcasting Corp., licensee of television station WTVK, Channel 26 at Knoxville, Tenn., and Mr. Ben Lewis, TAVC Co., Inc., Nashville, Tenn., submitted comments by letter. WDXR-TV, Inc. (WDXR), licensee of UHF television station WDXR-TV, Channel 29, Paducah, Ky., filed its opposition to the notice of proposed rulemaking. Reply comments were filed by General Electric and the Board directed to the WDXR opposition. WDXR also filed reply comments directed to comments of both General Electric and the Board.

2. The notice was adopted by the Commission so that it might explore the proposal of the petitioners, particularly the claim that its adoption would bring significant improvement and enlargement of the educational television service in the Nashville metropolitan area; immediate financial assistance for the improvement of educational telecasting including the establishment of color television and continuing support for an educational operation which has been "chronically underfinanced." General Electric also claimed that the requested changes would enlarge the service area of WSIX-TV and make the operation of that station and the ABC Television Network, with which it is affiliated, fully competitive with the low band VHF operations of the competing NBC and CBS affiliates.

3. The engineering aspects of the proposed substitution of channels has been addressed by all parties of interest. The Board submits that the Grade A service they would obtain by moving to Channel 8 would be greatly improved and that the

Grade B service would be improved but to a lesser degree. Operating on Channel 2 the area within the proposed Grade A service for General Electric would be somewhat reduced but there would be a gain in the area encompassed by the Grade B contour. One engineering report included with the petition provides area figures for both grades of service on both channels based upon the standards set forth in Report R-6602 (a joint FCC/Industry method not yet incorporated in our rules.) Although these figures show a lessened coverage area, they parallel the current rules in showing the relative potential for channels. The proponents assert that the shadowing effect on Channel 8 is greater than that on Channel 2 so if General Electric operated on Channel 2 it could only render more effective service in hilly areas surrounding Nashville. The population and area figures for both the present and proposed services are not significantly different than they would be if new facilities were to be installed and the licensees remained on their present channels.

4. The terms of the agreement between the Board and General Electric provide that the present WSIX-TV transmitter and associated equipment required for transmission on Channel 8 would be installed by and at the expense of General Electric. A new antenna and transmission line would be supplied by General Electric and installed on a heavy duty tower on which General Electric would also install its new antenna. Alternatively the Board would be given \$107,000 in cash. General Electric also agrees to provide antenna terminal equipment or \$18,000, microwave links or \$25,000, transmitter terminal equipment or \$15,000, two color cameras, film chain and projector, multiplexer, one color video tape recorder and all terminal equipment or \$410,000, for a total cash consideration equivalent of \$575,000.

5. In addition to the foregoing equipment or cash offered to the Board, General Electric would construct a heavy duty tower upon which to mount the Channel 2 and Channel 8 antenna and all other equipment necessary to the operation of WDCN-TV. Tower space and space for a main and auxiliary transmitter would be leased to the Board for 99 years at \$1 per year. General Electric also agrees to operate and maintain the transmitting and other equipment for a period of 99 years at no cost to the Board and within 5 years from the date of the Commission's final orders to install a new transmitter for Channel 8 or at the Board's option pay the Board \$180,000 cash. In turn, the Board agrees to assign its present transmitter and associated equipment plus antenna and transmission line to General Electric which would absorb the expenses involved in moving the equipment. The agreement contains a host of other details relating to items such as warranties, guarantees, indemnity, closing, etc., none of which are pertinent here.

6. The proponents submitted a report on the estimated financial gain to WSIX-TV resulting from its proposed move to

Channel 2. This report (dated November 1970) provided estimates based on three assumed heights above average terrain, but no change in height is involved in the channel exchange here proposed. Consequently, we do not need to consider this matter further.

7. Upon invitation by the Board, WLAC-TV, Inc., Channel 5, Nashville submitted comments on the proposed channel exchange. WLAC suggests that consideration be given to a study with regard to the Channel 8 site location of WDCN so to permit it to provide a greater degree of service as part of the statewide system of educational stations. WLAC also discusses the economic considerations of the channel exchange, pointing out that the offer of equipment, (the) location on a tall tower and transmitter operation for a period of years in itself recognizes that there is considerable value to be gained on Channel 2 as opposed to operating on Channel 8. In the total scheme of things, states WLAC, this is a relatively small, temporary one-time funding, affecting only the plant and equipment and which in no way solves the real heart of the problem, adequate, permanent funding of the station's operation so as to bring maximum educational service to the public. WLAC feels there would be a material loss to the educational effort by the proposed exchange of channels.

8. WDXR-TV, Inc., licensee of independent UHF station WDXR-TV, Channel 29, Paducah, Ky., opposed the proposed channel exchange. The thrust of WDXR-TV's opposition is directed to the overlap of its Grade B contour by the Grade B contour of WSIX-TV operating on Channel 2 at 1,349 feet HAAT as proposed, at 1,850 feet HAAT as discussed in the estimated financial gain of WSIX-TV and at 2,000 feet HAAT the maximum height permitted by FCC rules. As mentioned in paragraph 6, these matters would warrant consideration only when such a proposal were before us. Overlap of 192 square miles, 555 square miles, and 735 square miles with 3,140, 14,848, and 23,437 persons respectively it is said, would result. WDXR-TV further states that overlap would occur with Grade B contours of six other commercial UHF stations.<sup>1</sup> WDXR-TV also provides a map showing the overlap of WDCN-TV's Grade B contour by nine educational stations, five of which are in Kentucky, three in Tennessee, and two in Alabama. The Grade B contours of six of the nine stations overlap the present Grade B contour of WDCN-TV. WDXR-TV avers that these educational stations essentially surround the existing WDCN-TV coverage area and leave no significant area which will be filled by improved coverage from WDCN-TV. WDXR-TV asserts that the Commission has refused to exchange high-band and

<sup>1</sup>WRIP-TV, Channel 61, Chattanooga, Tenn.; WOWL-TV, Channel 15, Florence, Ala.; WHNT-TV, Huntsville, Ala.; WAAY-TV, Channel 31, Huntsville, Ala.; WMSL-TV, Channel 48, Huntsville, Ala.; and WEHT, Channel 25, Evansville, Ind.

low-band VHF channels in circumstances where there were demonstrable advantages such as the improvement of service and coverage, and it cites the comments of WDCN-TV's consulting engineers to the effect that each channel has an advantage but on balance are equivalent.

9. Reply comments by General Electric concede the equivalence of the two channels and acknowledges that the competitive advantage conceived for the operation of WSIX-TV is slight, long range and debatable. When balanced against the financial undertakings of General Electric to improve the operation of WDCN-TV it contends that the advantage altogether disappears for some very considerable period of time, if not forever. General Electric asserts that WDCN-TV now operates a significantly substandard station; that its signal is poor and restricted; that its origination capacity is limited and its service suffers accordingly. General Electric submits that its proposed offer would solve each of these problems immediately, giving the public an excellent service and placing WDCN-TV in a far better position to find additional long range solutions to its funding problems. Thus, it is said, would enable WDCN-TV to improve its service to the public undistracted by at least some of the financial and technical limitations now characterizing its operation. Engineering data is provided by General Electric in an effort to show that WDXR-TV's overlap figures are not correct, and to show that taking into account cochannel interference to the WSIX-TV Grade B contour, the interference-free overlap area contains only 157 persons. This is based on the proposed height above average terrain of 1,349 feet and used the method specified in the present FCC rules.

10. Reply comments by the Board contend that an overlap involving 157 persons is de minimis and that WDXR-TV has failed to come forward with the barest prima facie case of economic impact. In answer to WDXR-TV's statement that there is no need for improved educational coverage, the Board states that the channel exchange will provide a first Tennessee educational service to an in-State area of 1,950 square miles with an approximate population of 85,000. The exchange would not only enlarge WDCN-TV's Grade B coverage but also its Grade A coverage from 2,855 square miles containing 608,103 persons to 7,716 square miles with 880,391 persons. According to a survey submitted by the Board, WDCN-TV's signal quality was noticeably inferior to WSIX-TV's signal. The Board expects the exchange and the improvement in WDCN-TV's facilities which would result to correct this problem.

11. In its reply comments, WDXR-TV states that approval of the proposed channel exchange would create a bad precedent and disputes WDCN-TV's claims of "unique facts" since there are numerous television markets with a low band educational allocation and a high

band commercial allocation each of which is a candidate for a similar proposal for exchange.

12. One of the two letters received in comment contains an objection to the exchange proposal if there is a reduction in the service of the ETV station. The other letter from Station WTVK Channel 26, Knoxville, Tenn., outlines that station's history as a pioneer UHF station, supports the exchange of channels and gives notice of its intention to again apply for the use of Channel 8 in Knoxville with the expressed hope that the Commission will be prepared to demonstrate the same reasonableness and flexibility with respect to their request for help.

#### CONCLUSIONS

13. The situation here presented is in many respects similar to that found in the exchange of channels in New Orleans, La., where the Commission authorized the ETV reservation on Channel 8 to be changed to Channel 12. In other respects the conditions differ. The ETV station in New Orleans on Channel 8 was underfinanced, poorly located, did not have color equipment and was experiencing delays in expansion. The exchange in channels provided immediate financial relief and an improved broadcasting facility serving a greater area and population with the capability to broadcast in color. Technically the exchange of channels in New Orleans involved two channels in the VHF high band whereas the exchange of channels in Nashville involves one channel in the low VHF band and one in the high VHF band. With equal antenna-power facilities the high-band exchange would have no effect on coverage as determined by the methods contained in the Commission's rules. In low band/high band exchange assuming equivalent antenna height and power a form of trade off would result. To compensate for the advantages inherent in signal propagation on the lower channels, the Commission permits higher channel operations to utilize power more than three times that permitted on the lower channels. The intention was to make the channels, high and low, essentially equivalent. Each, however, has its advantages and disadvantages. The low band user gains in the Grade B service which is slightly extended and the high band user because of higher power, in Grade A service area. In the Nashville case, the educational operation would benefit by a considerable improvement in picture quality in the densely populated area within the Grade A service area. In this instance it would considerably increase Grade B service operating on Channel 8 simply because of the increased height of the antenna. An increase in Grade B service area could also be accomplished on Channel 2 through the same means if it had funds available for the purpose. It has not been our policy to sanction exchanges between high band and low band television channels. Thus,

\*We express no view in this regard since no such proposal is before us.

## RULES AND REGULATIONS

in the matter of amending § 73.606 to substitute Channel 2 for Channel 11 in Fort Worth, Tex., the Commission held that its general allocation policy of not changing individual assignments on the basis of claims of superior performance of one VHF channel over another would not be departed from except on a showing of exceptional circumstances. The Commission continues in its adherence to this policy. However, in this particular instance we are of the view that such exceptional circumstances do exist. In part these circumstances relate to the benefits which would flow to the Metropolitan Board of Education of Nashville and to the public it serves. WDCN-TV's service area would be enlarged (on Channel 8) by virtue of an increase in antenna height. While this same enlargement in service area could be achieved on Channel 2, funds for this purpose have not become available. At essentially no cost to it the Board would be able to improve its signal and correct current reception problems as well as reach a sizable additional in-State audience. WDCN-TV's ability to provide better and more flexible local programming would be greatly enhanced by the addition of improved studio equipment which will include new color cameras and a video tape recorder. WDCN-TV's picture quality will be measurably improved and its operating costs will be substantially reduced. It is reasonable to expect that these benefits would give immediate financial relief to WDCN-TV, thereby enabling it to concentrate its efforts toward a better educational and instructional service to the public not only of Nashville but to the midsection of Tennessee as a part of the State educational system. While it could be argued that these benefits are only short term, the fact remains that without these benefits WDCN-TV could continue for years as an underfinanced operation incapable of attracting financial assistance because of an inferior service.

14. Although General Electric has agreed to pay a substantial amount to the Board, this does not establish that in nonmonetary terms the Board or the public has lost. General Electric's advantage (and hence its willingness to compensate the Board) flows from the gain in Grade B coverage on Channel 2. State boundaries are of no moment to General Electric but the area servable by Channel 2 but not 8 lies in good measure outside Tennessee. Thus the Board has little need for this extension of coverage, for which it has no funds of its own in any event. Because of the coverage gain made possible by the exchange, the Board would much extend its coverage where it is needed, in state, as part of the statewide system. While high and low band VHF channels are equivalent, there are differences between them and the most effective utilization of them both is furthered by this proposal. In the Texas case cited earlier, such was not the case and the petitioner there simply preferred the low band channel because of the slightly larger Grade B coverage it would have provided. To accept this would have brought endless

channel changes wherever the situation arose but our action here will have no such effect.

15. Concern about UHF impact has been expressed but the showings do not suggest that a real problem exists on this score. Using the present curves,\* the overlap by General Electric's of WDXR-TV's Grade B contour would affect only 3,140 persons in the interference-free areas of both stations. The impact of such overlap, occurring at the periphery of WDXR-TV's Grade B contour, is clearly minimal. As such it poses no impediment to favorable action on this proposal. Slight increases in overlap to five other stations has not caused them great concern nor does it us. The effects, if not minuscule, appear minor. In terms of increase in coverage by the educational station, contrary to one of the arguments, it comes in significant part in just those areas where it is needed. A first Tennessee educational service would be extended greatly and the presence of out-of-State educational signals is of highly limited importance. In sum, we find that the proposal before us is meritorious and it shall be ordered into effect.

16. In view of the foregoing, *It is ordered*, That, effective May 3, 1973, pursuant to authority contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended, the Television Table of Assignments (§ 73.606 (b) of the Commission's rules and regulations) is amended to read as follows for the community indicated:

City Channel No.  
Nashville, Tenn. 2-, 4+, 5, \*8+, 17, 30, \*42

17. *It is further ordered*, That, effective May 3, 1973, and pursuant to section 316 (a) of the Communications Act of 1934, as amended, the outstanding license held by the Metropolitan Board of Education for Station WDCN-TV, Nashville, Tenn., is modified to specify operation on Channel \*8 in lieu of Channel \*2 subject to the following conditions:

(a) The licensee shall inform the Commission in writing no later than April 19, 1973, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by June 4, 1973, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station WDCN-TV on Channel \*8 at Nashville, Tenn., with the facilities specified in its "Petition for Rulemaking and the Issuance of Modified Authorization," filed jointly with the General Electric Broadcasting Co., Inc., in this proceeding.

(c) The licensee may continue to operate on Channel 2 under its outstanding authorization until it is ready to operate on the new frequency. Ten days prior to

commencing operation on Channel \*8, the licensee shall submit the same measurement data normally required in an application for a television broadcast station license.

(d) The Metropolitan Board of Education shall not commence operation on Channel \*8 until the Commission specifically authorizes it to do so.

18. *It is further ordered*, That, effective May 3, 1973, and pursuant to section 316(a) of the Communications Act of 1934, as amended, the outstanding license held by the General Electric Broadcasting Co., Inc., for Station WSIX-TV, Nashville, Tenn., is modified to specify operation on Channel 2 in lieu of Channel 8 subject to the following conditions:

(a) The licensee shall inform the Commission in writing no later than April 19, 1973, of its acceptance of this modification.

(b) The licensee shall submit to the Commission by June 4, 1973, all necessary information complying with the applicable technical rules for modification of authorization to cover the operation of Station WSIX-TV on Channel 2 at Nashville, Tenn., with the facilities specified in its "Petition for Rulemaking and the Issuance of Modified Authorization," filed jointly with the Metropolitan Board of Education, in this proceeding.

(c) The licensee may continue to operate on Channel 8 under its outstanding authorization until it is ready to operate on the new frequency. Ten days prior to commencing operation on Channel 2, the licensee shall submit the same measurement data normally required in an application for a television broadcast station license.

(d) The General Electric Broadcasting Co., Inc., shall not commence operation on Channel 2 until the Commission specifically authorizes it to do so.

19. *It is further ordered*, That, the change to operation on Channel 8 by Station WDCN-TV, and to operation on Channel 2 by Station WSIX-TV, with the facilities specified in the aforementioned petition, shall be effected simultaneously, or, if not effected simultaneously, shall be effected by one station only if the other station has gone off the air for a period prior to changing frequency pursuant to Commission authorization.

20. *It is further ordered*, That, the opposition pleading filed herein is denied.

21. *It is further ordered*, That, this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: March 21, 1973.

Released: March 27, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-6137 Filed 3-29-73; 8:45 am]

\* Using those curves in R-6603, there would be no overlap with WDXR-TV at all.

\* It has not been our practice to utilize the concept of an interference-free contour in resolving cases of alleged UHF impact. We therefore have not based our decision on the figure of 157 mentioned by General Electric, nor, as indicated above, need we.

\* Commissioner Robert E. Lee dissenting and issuing a statement, which is filed as part of the original copy; Commissioner Johnson dissenting; Commissioner H. Rex Lee concurring in the result.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## RULES AND REGULATIONS

Title 50—Wildlife and Fisheries  
CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 262—U.S. STANDARDS FOR GRADES OF FROZEN RAW BREADED SHRIMP

Miscellaneous Amendments

MARCH 26, 1973.

In the September 7, 1972, issue of the FEDERAL REGISTER, a notice was published by the National Marine Fisheries Service to amend Title 50, CFR, Part 262—U.S. Standards for Grades of Frozen Raw Breaded Shrimp, pursuant to the authority vested in the Secretary of Commerce by Reorganization Plan No. 4 effective October 3, 1970 (35 FR 15627), and under the authority of Title II of the Agriculture Marketing Act of 1946, as amended (7 U.S.C. 1622 and 1624), transferred from the Department of the Interior to the Department of Commerce.

The purposes of the proposed amendments are: (1) To extend the standard to cover an additional style and sizes; (2) To include an optional alternate method for determining shrimp material; and (3) To allow for compliance to be determined during processing.

Interested persons were provided an opportunity to submit written comments in regard to the proposed amendments and three comments were received and considered.

One comment indicated that a proposed new style, designated as "Breaded Split Shrimp", would require amendment of the standard of identity for raw breaded shrimp, 21 CFR 36.0 and 21 CFR 36.1, to accommodate the product identity and designation for the new style. Accordingly, that product style and designation has been recognized but reserved.

Other comments questioned the limitation of loose breading and frost in the package on the basis of "Good Manufacturing Practice", and inclusion of such loose breading and frost as a part of the quantity of contents of the package. Examination of test results over the past several months revealed that no significant amount of loose breading and frost has been found in commercial samples of the packaged product. Thus no change has been made in the standard in respect to loose breading and frost.

Another comment dealt with a proposed change in the product description requiring that the shrimp be "deveined only where applicable", and defining "where applicable" as all shrimp larger than 70 count per pound in the raw headless state. The product description section of the standard requires that the shrimp be cleaned and peeled. Since the commercial process of peeling very small shrimp also results in a thorough cleaning and deveining of the shrimp, no change has been made in respect to deveining small shrimp, i.e., over 70 count per pound.

No changes, other than deletion of the text of § 262.2(c), have been made in the amendments to the standard as given below in respect to the proposed amendments.

The amendments to Part 262—U.S. Standards for Grades of Frozen Raw Breaded Shrimp follow:

Section 262.1 is amended as follows:

§ 262.1 Product description.

Frozen raw breaded shrimp are whole, clean, wholesome, headless, peeled shrimp which have been deveined where applicable of the regular commercial species, coated with a wholesome, suitable batter and/or breading. Whole shrimp consist of five or more segments of unutilized shrimp flesh. They are prepared and frozen in accordance with good manufacturing practice and are maintained at temperatures necessary for the preservation of the product. Individual shrimp and/or pieces consolidated into larger units and covered with breading are not considered for grading under this standard.

A new § 262.2 Composition of the product is added as follows:

§ 262.2 Composition of the product.

(a) Frozen raw breaded shrimp shall contain not less than 50 percent by weight of shrimp material when the weight of the shrimp material is determined by the end product method as set forth in § 262.21(u).

(b) Shrimp material content of raw breaded shrimp may be determined by the on-line method as set forth in § 261.21(v): *Provided*, That the results are at least in compliance with the shrimp material content requirement of 50 percent by weight when verified by the official end product method.

(c) Production methods employed in official establishments shall be kept relatively constant for each product lot so as to minimize variations in any factor which may affect the relative shrimp material content.

Section 262.2 is redesignated as follows:

§ 262.3 Styles of frozen raw breaded shrimp.

Section 262.3 is redesignated and paragraph (c) is amended as follows:

§ 262.4 Types of frozen raw breaded shrimp.

(c) *Type III—Breaded split shrimp.*  
[Reserved]

Section 262.4 is redesignated as follows:

§ 262.5 Grades of frozen raw breaded shrimp.

Section 262.12 is amended as follows:

$$\text{Percent shrimp material} = \frac{\text{Weight of debreaded sample (20 shrimp)}}{\text{Weight of sample (20 shrimp)}} \times 100 \pm 3$$

§ 262.12 Factors evaluated on the product in the breaded state.

(a) Factors affecting qualities that are measured on the product in the breaded state are uniformly of size, condition of coating, extraneous material, and damaged breaded shrimp. For the purpose of rating the factors that are scored in the breaded state, the schedule of point deduction in table 1 applies. This schedule of point deductions is based on the examination of one complete individual package or intended package (sample unit) regardless of the net weight of the contents of the package.

(b) The factor—ease of separation in the frozen state—shall be rated in addition to all other factors when frozen raw breaded shrimp is lot inspected on a lot basis.

Section 262.13 is amended as follows:

§ 262.13 Factors evaluated on unbreaded or thawed debreaded product.

Factors affecting qualities that are measured on the product in the unbreaded or thawed debreaded state are degree of deterioration, dehydrations, sand veins, black spot, extra shell, extraneous material, and swimmerets. For the purpose of rating the factors that are scored in the unbreaded or thawed debreaded state, the schedule of point deductions in table 2 applies. This schedule of point deductions is based on the examination of 20 whole shrimp selected from the processing line or from one or more packages. Examination of this sample of 20 whole shrimp is continued under § 262.21(u).

A new § 262.14 is added as follows:

§ 262.14 Hygienic processing.

Frozen raw breaded shrimp shall be processed and maintained in accordance with the applicable requirements of the Good Manufacturing Practice Regulations contained in Part 128 of Title 21, CFR, and the applicable requirements contained in Part 260 of this chapter.

§ 262.21 [Amended]

Section 262.21 is amended as follows:

a. Paragraph (s) is changed as follows:  
(s) Net weight: Net weight is determined by use of a balance and by following steps given below:

b. Delete Step 7 and the paragraph following it and replace with a new Step 7.

7. Net weight of the shrimp is the weight of the shrimp and of any loose breading and frost, exclusive of packaging material. The amount of loose breading and frost shall not exceed the limits of good manufacturing practices.

c. Paragraphs (u) and (u) (2) (ii) are changed as follows:

(u) Percent shrimp material—official end product method:

(2) . . . . .  
(ii) Calculate percent shrimp material.

(d) Paragraph (v) is redesignated as § 262.21(w) and a new paragraph (v) is added as follows:

(v) Percent shrimp material—on-line method: Percent shrimp material determined by the on-line method refers to the percent by weight of shrimp material in a sample as described below:

(1) Equipment needed:  
(i) Water bath (a container with a 3- to 4-liter capacity).  
(ii) Balance accurate to 0.1 gram or 0.01 ounce.

(iii) Stop-watch or regular watch readable to a second.

(iv) U.S. Standard sieve—1/2-inch sieve opening; 12-inch diameter.

(v) U.S. Standard sieve ASTM No. 20, 12-inch diameter.

(vi) Thermometer (immersion type accurate to  $\pm 2^\circ$  F.).

(vii) Forceps, with blunt points.

(viii) Shallow pan.

(ix) Rubber policeman to remove bits of breading from shrimp.

(2) Procedure:

(i) Select in a random manner, a composite sample of 20 unfrozen raw breaded shrimp from production line(s). Weigh the composite sample on a scale, determining the weight of the sample to the nearest 0.1 gram or 0.01 ounce. Place the sample in a water bath filled to three-fourths capacity and in a container maintained at 60° F.-85° F. After shrimp are submerged in water and breading becomes soft, a "gentle" swirling action with hands may be applied to the shrimp to speed up the removal of the breading. Stack the sieves, the 1/2-inch mesh over the No. 20 and pour contents of container into them. Remove top sieve and drain on 45-degree angle for 2 minutes then transfer shrimp to balance. Rinse contents of No. 20 sieve onto a shallow pan and collect any particles of shrimp material (flesh, tail fin, etc.), and add to the shrimp on the balance and then weigh.

(ii) Calculate percent shrimp material:

Percent shrimp material =  $\frac{\text{Weight of debreaded sample}}{\text{Weight of sample}} \times 100$

(iii) Frequency of on-line shrimp material content determination: A minimum of three determinations of shrimp material content shall be carried out for small production runs or lots of the same style product, i.e., 3 x (20 unfrozen raw breaded shrimp). For larger production runs or lots of the same style product, a minimum of one determination, i.e., 1 x (20 unfrozen raw breaded shrimp) shall be carried out for every hour of production of product of the same style.

A new § 262.22 is added as follows:

§ 262.22 Use of alternate methods of shrimp material determination.

(a) The official end product method in § 262.21(u) for determining shrimp ma-

terial content shall be used for lot inspection, appeal inspection, and inspection for verification in official establishments when the on-line method is used.

(b) The on-line method in § 262.21(u) (2) for determining shrimp material content may be used during processing operations.

TABLE 1.—SCHEDULE OF POINT DEDUCTION FOR RATING IN FROZEN BREADED STATE

Delete the word "Frozen" from the title of Table 1.

Delete Factor 1. Loose breading or frost; and renumber remaining factors.

Add the words "in the frozen state" to renumbered Factor 1. Ease of separation.

TABLE 2.—SCHEDULE FOR POINT DEDUCTIONS FOR EXAMINATION IN THAWED, DEBREADED STATE DEDUCTIONS BASED ON 20 SHRIMP

Change the title of Table 2 to read as follows: Schedule for Point Deductions for Examination in Unbreaded or Thawed Debreaded State.

Change the designation of Factor 3 to read, "Sand veins where applicable."

In the quality description of Factor 7. Extraneous material, change the footnote number from 1 to 2 and renumber footnote 1 to 2.

A new footnote 1 is added to Table 2 as follows:

<sup>1</sup> Deduction points for sand veins shall not be applied to shrimp smaller than 70 count per pound in the raw, headless state. The corresponding size in the breaded state is 40 count per pound and 80 count per pound in the peeled state.

The amendments to 50 CFR Part 262—U.S. Standards for Grades of Frozen Raw Breaded Shrimp shall become effective May 1, 1973, except that § 262.4(c) Type III—Breaded Split Shrimp, has been reserved and will be published and made effective after the Food and Drug Administration Standard of Identity for Raw Breaded Shrimp, 21 CFR 36.0 and 21 CFR 36.1 is amended to accommodate this product type and designation.

ROBERT M. WHITE,  
Administrator.

SUBCHAPTER I—MILITARY PERSONNEL

PART 888b—ENLISTMENT IN THE AIR FORCE RESERVE

Correction

In FR Doc. 73-4484 appearing at page 6779 of the issue for Tuesday, March 13, 1973, the following changes should be made:

1. In the table in § 888b.16: (1) in Rule 1 the "X" under "Prior service" should be deleted; (2) in Rule 3 the footnote "2" under "Prior service" should be an "X"; and (3) in Rule 15, "or IV-For under orders" should read "IV-F or under orders".

2. In the table in § 888b.18, in Rule 3 under column B delete "(note 2)", which appears under "A U.S. citizen".

3. In § 888b.22, the paragraphs designated "aa", "bb", "cc", and "dd", should be designated "aa", "ab", "ac", and "ad" respectively.

PART 888f—SPECIFIED PERIOD OF TIME CONTRACT (SPCT)

Correction

In FR Doc. 73-4486 appearing at page 6793 of the issue for Tuesday, March 13, 1973, in the table in § 888f.6, in Rule 1 under column B, the material in parentheses, now reading "(information cycle to numbered AF or comparable level)", should read "(information copy to numbered AF or comparable level)".

SUBCHAPTER K—MILITARY TRAINING AND SCHOOLS

PART 901a—APPOINTMENT TO THE U.S. AIR FORCE ACADEMY

Correction

In FR Doc. 73-4487 appearing at page 6794 of the issue for Tuesday, March 13, 1973, § 901.9 Regular (competitive) and § 901.10 Reserve (competitive) should be designated §§ 901a.9 and 901a.10 respectively.

Title 21—Food and Drugs

CHAPTER II—BUREAU OF NARCOTICS AND DANGEROUS DRUGS, DEPARTMENT OF JUSTICE

PART 308—SCHEDULES OF CONTROLLED SUBSTANCES

On January 8, 1973, the Bureau republished the schedules of controlled substances in compliance with section 202(a) (21 U.S.C. 812(a)). (38 FR 953)

This republication listed only those sections of Part 308 which actually enumerated substances which were controlled or excluded, exempted or excepted from some or all of the controls under the Act. The Bureau has been informed that the FEDERAL REGISTER construes this publication as a repeal of all of the portions of Part 308 not contained in the January 8, 1973, order. Since this was not the Bureau's intent and although the Bureau does not believe that the other sections were actually repealed, the Director has ordered the publication of the entire Part 308 of title 21 of the Code of Federal Regulations as in effect on March 31, 1973. The January 8 publication also omitted certain excepted

compounds in § 308.24 and this omission has been corrected in this publication.

Dated: March 23, 1973.

JOHN E. INGERSOLL,  
Director, Bureau of  
Narcotics and Dangerous Drugs.

GENERAL INFORMATION

Sec. 308.01 Scope of Part 308.

308.02 Definitions.

308.03 Bureau Controlled Substances Code Number.

308.04 Submission of information by manufacturers.

SCHEDULES

308.11 Schedule I.

308.12 Schedule II.

308.13 Schedule III.

308.14 Schedule IV.

308.15 Schedule V.

EXCLUDED NONNARCOTIC SUBSTANCES

308.21 Application for exclusion of a non-narcotic substance.

308.22 Excluded substances.

EXEMPT CHEMICAL PREPARATIONS

308.23 Exemption of certain chemical preparations; application.

308.24 Exempt chemical preparations.

EXCEPTED STIMULANT OR DEPRESSANT COMPOUNDS

308.31 Application for exception of a stimulant or depressant compound.

308.32 Excepted compounds.

HEARINGS

308.41 Hearings generally.

308.42 Purpose of hearing.

308.43 Waiver of modification of rules.

308.44 Initiation of proceedings for rule-making.

308.45 Request for hearing or appearance; waiver.

308.46 Burden of proof.

308.47 Time and place of hearing.

308.48 Final order.

308.49 Control required under international treaty.

308.50 Control of immediate precursors.

308.51 Pending proceedings.

AUTHORITY: Secs. 201, 202, 501(b), 84 Stat. 1245, 1246, 1247, 1248, 1249, 1250, 1251, 1252, 1271, 21 U.S.C. 811, 812, 871(b).

GENERAL INFORMATION

§ 308.01 Scope of Part 308.

Schedules of controlled substances established by section 202 of the Act (21 U.S.C. 812), as they are changed, updated, and republished from time to time, are set forth in this part.

§ 308.02 Definitions.

As used in this part, the following terms shall have the meanings specified:

(a) The term "Act" means the Controlled Substance Act (84 Stat. 1242; 21 U.S.C. 801) and/or the Controlled Substances Import and Export Act (84 Stat. 1285; 21 U.S.C. 951).

(b) The term "hearing" means any hearing held pursuant to this part for the issuance, amendment, or repeal of any rule issuable pursuant to section 201 of the Act.

(c) The term "isomer" means, except as used in § 308.11(d), the optical isomer.

As issued in § 308.11(d), the term "isomer" means the optical, position or geometric isomer.

(d) The term "interested person" means any person adversely affected or aggrieved by any rule or proposed rule issuable pursuant to section 201 of the Act.

(e) The term "proceeding" means all actions taken for the issuance, amendment, or repeal of any rule issued pursuant to section 201 of the Act, commencing with the publication by the Director of the proposed rule, amended rule, or repeal in the FEDERAL REGISTER.

(f) Any term not defined in this section shall have the definition set forth in section 102 and 1001 of the Act (21 U.S.C. 802 and 951) and § 301.02 of this chapter.

§ 308.03 Bureau Controlled Substances Code Number.

(a) Each controlled substance, or basic class thereof, has been assigned a "Bureau Controlled Substances Code Number" for purposes of identification of the substances or class on certain Certificates of Registration issued by the Bureau pursuant to § 301.44 of this chapter and on certain order forms issued by the Bureau pursuant to § 305.05(d) of this chapter. Certain applicants for registration must include the appropriate numbers on the application as required in § 301.32(d) and applicants for procurement and/or individual manufacturing quotas must include the appropriate number on the application as required in §§ 303.12(b) and 303.22(a).

(b) Except as stated in paragraph (a) of this section, no applicant or registrant is required to use the Bureau Controlled Substances Code Number for any purpose.

§ 308.04 Submission of information by manufacturers.

(a) Each person who manufactures, packages, repackages, labels, relabels, or distributes under his own label any product (including any compound, mixture, or preparation, diagnostic, reagent, buffer, or biological) containing any quantity of any controlled substance (whether such product is itself controlled or is excepted, exempted, or excluded from some or all controls pursuant to § 308.21-24 or § 308.31-32) shall submit information required in paragraph (b) of this section for each such product being manufactured or sold on July 1, 1972. The information should be submitted by registered mail, return receipt requested, to the Assistant Director for Scientific Support, Attention: Label Project, Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537, by August 31, 1972. In the case of new products manufactured after July 1, 1972, or new dosage forms or other unit forms manufactured after July 1, 1972, or changes in information submitted by August 31, 1972, the registrant shall submit the information regarding such item within 30 days after the date on which the manufacture com-

mences or information change occurs. In the case of products, the manufacture of which is discontinued after July 1, 1972, the registrant shall submit notice of such discontinuance within 30 days after the date on which manufacture ceases. In the case of products the manufacture of which was discontinued before July 1, 1972, which are still being sold, the registrant shall submit a notice of such discontinuance with his initial submission.

(b) Two labels or other documents reflecting the following information shall be submitted with reference to each dosage form or other unit form of each item containing any quantity of any controlled substance:

(1) The trade name, brand name, or other commercial name of the product;

(2) The generic or chemical name and quantity of each active ingredient, including both controlled and noncontrolled substances (if any of this information is a proprietary trade secret, please indicate those portions);

(3) The National Drug Code Number assigned to the product, if any; and

(4) The weight (in metric measure) of each dosage unit or the weight (in metric measure) of the controlled substance per 100 grams of finished product for all items containing any quantity of any narcotic controlled substance in solid dosage forms.

SCHEDULES

§ 308.11 Schedule I.

(a) Schedule I shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the Bureau Controlled Substances Code Number set forth opposite it.

(b) *Opiates*. Unless specifically excepted or unless listed in another schedule, any of the following opiates, including its isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:

(1) Acetylmethadol ..... 9601

(2) Allylprodine ..... 9602

(3) Alphacetylmethadol ..... 9603

(4) Alphameprodine ..... 9604

(5) Alphamethadol ..... 9605

(6) Benzethidine ..... 9606

(7) Betacetylmethadol ..... 9607

(8) Betameprodine ..... 9608

(9) Betamethadol ..... 9609

(10) Betaprodine ..... 9611

(11) Clonitazene ..... 9612

(12) Dextromoramide ..... 9613

(13) Dextropropion ..... 9614

(14) Diampromide ..... 9615

(15) Diethylthambutene ..... 9616

(16) Dimenoxadol ..... 9617

(17) Dimepheptanol ..... 9618

(18) Dimethylthambutene ..... 9619

(19) Dioxaphetyl butyrate ..... 9621

(20) Dipipanone ..... 9622

(21) Ethylmethythambutene ..... 9623

(22) Etomidate ..... 9624

(23) Etorphidine ..... 9625

(24) Furethidine ..... 9626

(25) Hydroxypethidine ..... 9627

(26) Ketobemidone ..... 9628

(27) Levomoramide	9629
(28) Levophenacymorphan	9631
(29) Morpheridine	9632
(30) Noracymethadol	9633
(31) Norlevorphanol	9634
(32) Norpianone	9635
(33) Norpianone	9636
(34) Phenadoxone	9637
(35) Phenampromide	9638
(36) Phenomorphan	9647
(37) Phenoperidine	9641
(38) Pirintramide	9642
(39) Proheptazine	9643
(40) Propertidine	9644
(41) Propiram	9649
(42) Racemoramide	9645
(43) Trimeperidine	9646

(c) *Opium derivatives.* Unless specifically excepted or unless listed in another schedule, any of the following opium derivatives, its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Acetorphine	9319
(2) Acetyldihydrocodeine	9051
(3) Bexylmorphine	9052
(4) Codeine methylbromide	9070
(5) Codeine-N-Oxide	9053
(6) Cyrenorphine	9054
(7) Desomorphine	9055
(8) Dihydromorphine	9145
(9) Etorphine	9056
(10) Heroin	9200
(11) Hydromorphanol	9301
(12) Methylidesorphine	9302
(13) Methylidihydromorphine	9304
(14) Morphine methylbromide	9305
(15) Morphine methylsulfonate	9306
(16) Morphine-N-Oxide	9307
(17) Myrophine	9308
(18) Nicocodine	9309
(19) Nicomorphine	9312
(20) Normorphine	9313
(21) Pholcodine	9314
(22) Thebaceon	9315

(d) *Hallucinogenic substances.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation, which contains any quantity of the following hallucinogenic substances, or which contains any of its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation (for purposes of this paragraph only, the term "isomer" includes the optical, position, and geometric isomers):

(1) 3,4-methylenedioxy amphetamine	7400
(2) 5-methoxy-3,4-methylenedioxy amphetamine	7401
(3) 3,4,5-trimethoxy amphetamine	7390
(4) Bufotamine	7433
Some trade and other names: 3-( $\beta$ -Dimethylaminoethyl)-5-hydroxyindole; 3-(2-dimethylaminoethyl)-5-indole; N,N-dimethylserotonin; 5-hydroxy-N-dimethyltryptamine; mappine.	
(5) Diethyltryptamine	7434
Some trade and other names: N,N-Diethyltryptamine; DET.	
(6) Dimethyltryptamine	7435
Some trade and other names: DMT	
(7) 4-methyl-2,5-dimethoxyamphetamine	7395

Some trade and other names: 4-methyl-2,5-dimethoxy- a-methylphenethylamine; "DOM"; and "STP".	
(8) Ibogaine	7280
Some trade and other names: 7-Ethyl-6,6a,7,8,9,10,12,13-octahydro-2-methoxy-6,9-methano-5H-pyrido (1',2':1,2-azepino 4,5-b) indole; tabernanthe iboga.	
(9) Lysergic acid diethylamide	7315
(10) Marihuana	7360
(11) Mescaline	7381
(12) Peyote	7415
(13) N-ethyl-3-piperidyl benzilate	7482
(14) N-methyl-3-piperidyl benzilate	7484
(15) Psilocybin	7437
(16) Psilocybin	7438
(17) Tetrahydrocannabinols	7370

Synthetic equivalents of the substances contained in the plant, or in the resinous extracts of *Cannabis*, sp. and/or synthetic substances, derivatives, and their isomers with similar chemical structure and pharmacological activity such as the following:  
 $\Delta^1$  cis or trans tetrahydrocannabinol, and their optical isomers.  
 $\Delta^8$  cis or trans tetrahydrocannabinol, and their optical isomers.  
 $\Delta^9$  cis or trans tetrahydrocannabinol, and its optical isomers.  
(Since nomenclature of these substances is not internationally standardized, compounds of these structures, regardless of numerical designation of atomic positions are covered.)

#### § 308.12 Schedule II.

(a) Schedule II shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the controlled substances code number set forth opposite it.

(b) *Substances, vegetable origin or chemical synthesis.* Unless specifically excepted or unless listed in another schedule, any of the following substances whether produced directly or indirectly by extraction from substances of vegetable origin, or independently by means of chemical synthesis, or by a combination of extraction and chemical synthesis:

(1) Opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding naloxone hydrochloride, but including the following:

(i) Raw opium	9600
(ii) Opium extracts	9610
(iii) Opium fluid extracts	9620
(iv) Powdered opium	9630
(v) Granulated opium	9640
(vi) Tincture of opium	9650
(vii) Apomorphine	9030
(viii) Codeine	9050
(ix) Ethylmorphine	9190
(x) Hydrocodone	9193
(xi) Hydromorphone	9194
(xii) Metopon	9260
(xiii) Morphine	9300

(xiv) Oxycodone	9143
(xv) Oxymorphone	9652
(xvi) Thebaine	9333

(2) Any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of the substances referred to in subparagraph (1) of this paragraph, except that these substances shall not include the isoquinoline alkaloids of opium.

(3) Opium poppy and poppy straw, 9650.

(4) Coca leaves (9040) and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, except that the substances shall not include decocainized coca leaves or extraction of coca leaves, which extractions do not contain cocaine (9041) or ecgonine (9180).

(c) *Opiates.* Unless specifically excepted or unless in another schedule any of the following opiates, including its isomers, esters, ethers, salts, and salts of isomers, esters and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:

(1) Alphaprodine	9010
(2) Anileridine	9020
(3) Benztramide	9800
(4) Dihydrocodeine	9120
(5) Diphenoxylate	9170
(6) Fentanyl	9801
(7) Isomethadone	9226
(8) Levomethorphan	9210
(9) Levorphanol	9220
(10) Metazocine	9240
(11) Methadone	9250
(12) Methadone-Intermediate, 4-cyano-2-dimethylamino-4,4-diphenyl butane	9254
(13) Moramide-Intermediate, 2-methyl-3-morpholino-1,1-diphenylpropane-carboxylic acid	9802
(14) Pethidine	9230
(15) Pethidine-Intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine	9232
(16) Pethidine-Intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate	9233
(17) Pethidine-Intermediate-C, 1-methyl-4-phenylpiperidine-4-carboxylic acid	9234
(18) Phenazocine	9715
(19) Piminodine	9730
(20) Racemethorphan	9732
(21) Racemorphan	9733

(d) *Stimulants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

(1) Amphetamine, its salts, optical isomers, and salts of its optical isomers	1100
(2) Methamphetamine, its salts, isomers, and salts of its isomers	1105
(3) Phenmetrazine and its salts	1630
(4) Methylphenidate	1726

#### § 308.13 Schedule III.

(a) Schedule III shall consist of the drugs and other substances, by whatever

official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the Bureau controlled substances code number set forth opposite it.

(b) *Stimulants.* Unless specifically excepted or unless listed in another schedule any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the central nervous system:

(1) Those compounds, mixtures, or preparations in dosage unit form containing any stimulant substances which compounds, mixtures, or preparations were listed on August 25, 1971, as excepted compounds under § 308.32, and any other drug of the quantitative composition shown in that list for those drugs or which is the same except that it contains a lesser quantity of controlled substances, 1405.

(c) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a depressant effect on the central nervous system:

(1) Any substance which contains any quantity of a derivative of barbituric acid, or any salt of a derivative of barbituric acid	2100
(2) Chlorhexadol	2510
(3) Glutethimide	2550
(4) Lysergic acid	7300
(5) Lysergic acid amide	7310
(6) Methyprylon	2575
(7) Phenylethidine	7471
(8) Sulfonethymethane	2600
(9) Sulfonethymethane	2605
(10) Sulfonmethane	2610

(d) *Nalorphine* (a narcotic drug) 9400.

(e) *Narcotics drugs.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation containing limited quantities of any of the following narcotic drugs, or any salts thereof:

(1) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium	9803
(2) Not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts	9804
(3) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium	9805
(4) Not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts	9806

(5) Not more than 1.8 grams of dihydrocodeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9807 |

(6) Not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9808 |

(7) Not more than 500 milligrams of opium per 100 milliliters or per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9809 |

(8) Not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts 9810 |

#### § 308.14 Schedule IV.

(a) Schedule IV shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section. Each drug or substance has been assigned the Bureau controlled substances code number set forth opposite it.

(b) *Depressants.* Unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances, including its salts, isomers, and salts of isomers whenever the existence of such salts, isomers, and salts of isomers is possible within the specific chemical designation:

(1) Barbitol	2145
(2) Chloral betaine	2450
(3) Chloral hydrate	2465
(4) Ethchlorvynol	2540
(5) Ethinamate	2545
(6) Methohexital	2264
(7) Meprobamate	2830
(8) Methylphenobarbital	2250
(9) Paraldehyde	2585
(10) Petrichloral	2591
(11) Phenobarbital	2285

#### § 308.15 Schedule V.

(a) Schedule V shall consist of the drugs and other substances, by whatever official name, common or usual name, chemical name, or brand name designated, listed in this section.

(b) *Narcotic drugs containing non-narcotic active medicinal ingredients.* Any compound, mixture, or preparation containing any of the following limited quantities of narcotic drugs or salts thereof, which shall include one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by the narcotic drug alone:

(1) Not more than 200 milligrams of codeine per 100 milliliters or per 100 grams.

(2) Not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams.

(3) Not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams.

(4) Not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit.

(5) Not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

#### EXCLUDED NONNARCOTIC SUBSTANCES

§ 308.21 Application for exclusion of a nonnarcotic substance.

(a) Any person seeking to have any nonnarcotic substance which may, under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301), be lawfully sold over the counter without a prescription, excluded from any schedule, pursuant to section 201(g)(1) of the Act (21 U.S.C. 811(g)(1)), may apply to the Director, Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537.

(b) An application for an exclusion under this section shall contain the following information:

(1) The name and address of the applicant;

(2) The name of the substance for which exclusion is sought; and

(3) The complete quantitative composition of the substance.

(c) Within a reasonable period of time after the receipt of an application for an exclusion under this section, the Director shall notify the applicant of his acceptance or nonacceptance of his application, and if not accepted, the reason therefor. The Director need not accept an application for filing if any of the requirements prescribed in paragraph (b) of this section is lacking or is not set forth as to be readily understood. If the applicant desires, he may amend the application to meet the requirements of paragraph (b) of this section. If the application is accepted for filing, the Director shall issue and publish in the Federal Register his order on the application, which shall include a reference to the legal authority under which the order is issued and the findings of fact and conclusions of law upon which the order is based. This order shall specify the date on which it shall take effect. The Director shall permit any interested person to file written comments on or objections to the order within 60 days of the date of publication of his order in the Federal Register. If any such comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which the order is based, the Director shall immediately suspend the effectiveness of the order until he may reconsider the application in light of the comments and objections filed. Thereafter, the Director shall reinstate, revoke, or amend his original order as he determines appropriate.

RULES AND REGULATIONS

RULES AND REGULATIONS

S259

## RULES AND REGULATIONS

(d) The Director may at any time revoke any exclusion granted pursuant to section 201(g) of the Act (21 U.S.C. 811 (g)) by following the procedures set forth in paragraph (c) of this section for handling an application for an exclusion which has been accepted for filing.

## EXCLUDED OVER-THE-COUNTER DRUGS

Trade name or other designation	Composition	Manufacturer or supplier
Amocline	Tablet: Phenobarbital, 8 mg.; aminophylline, 100 mg.; reserpine hydrochloride, 25 mg.	G. D. Searle & Co.
Bronkaid	Tablet: Phenobarbital, 8 mg.; ephedrine sulfate, 24 mg.; glyceryl guaiacolate, 100 mg.; theophylline, 100 mg.; thionylamine, 10 mg.	Drew Pharmaceutical Co., Inc.
Bronkolut	Tablet: Phenobarbital, 8 mg.; ephedrine sulfate, 12 mg.; glyceryl guaiacolate, 50 mg.; theophylline, 15 mg.; chlorpheniramine maleate, 1 mg.	Breon Laboratories Inc.
Bronkotabs	Tablet: Phenobarbital, 8 mg.; ephedrine sulfate, 24 mg.; glyceryl guaiacolate, 100 mg.; theophylline, 100 mg.; thionylamine, 10 mg.	Do.
Primatene	Tablet: Phenobarbital, 8 mg.; ephedrine sulfate, 12 mg.; glyceryl guaiacolate, 100 mg.; theophylline, 100 mg.; thionylamine, 10 mg.	Whitehall Laboratories.
Kynal	Solution for spray: dl-Desoxyephedrine HCL 0.2%; antipyrine 0.2%; pyriminone maleate 0.01%; methyl dodecylbenzyltrimethyl ammonium chloride 0.02%; glycerine dehydrate 1.5%.	Blaine Co.
Tedral	Tablet: Phenobarbital, 8 mg.; theophylline, 130 mg.; ephedrine hydrochloride, 24 mg.	Warner-Chilcott Laboratories.
Tedral anti-H	Tablet: Phenobarbital, 8 mg.; chlorpheniramine maleate, 2 mg.; theophylline, 130 mg.; ephedrine hydrochloride, 24 mg.	Do.
Tedral one-half strength	Tablet: Phenobarbital, 4 mg.; theophylline, 65 mg.; ephedrine hydrochloride, 12 mg.	Do.
Tedral pediatric suspension	Suspension (5 cc): Phenobarbital, 4 mg.; ephedrine hydrochloride, 12 mg.; theophylline, 65 mg.	Do.
Tedral suppositories double strength	Suppository: Phenobarbital, 16 mg.; theophylline, 30 mg.; ephedrine hydrochloride, 45 mg.	Do.
Tedral suppositories regular strength	Suppository: Phenobarbital, 8 mg.; theophylline, 150 mg.; ephedrine hydrochloride, 24 mg.	Do.
Verequad	Tablet: Phenobarbital, 8 mg.; theophylline calcium salicylate, 130 mg.; ephedrine hydrochloride, 24 mg.; glyceryl guaiacolate, 100 mg.	Knoll Pharmaceutical Co.
Do	Suspension (5 cc): Phenobarbital, 4 mg.; theophylline calcium salicylate, 65 mg.; ephedrine hydrochloride, 12 mg.; glyceryl guaiacolate, 60 mg.	Do.

## EXEMPT CHEMICAL PREPARATIONS

§ 308.23 Exemption of certain chemical preparations; application.

(a) The Director may, by regulation, exempt from the application of all or any part of the Act any chemical preparation or mixture containing one or more controlled substances listed in any schedule, which preparation or mixture is intended for laboratory, industrial, educational, or special research purposes and not for general administration to a human being or other animal, if the preparation or mixture either:

- (1) Contains no narcotic controlled substance and is packaged in such a form or concentration that the packaged quantity does not present any significant potential for abuse (the type of packaging and the history of abuse of the same or similar preparations may be considered in determining the potential for abuse of the preparation or mixture); or
- (2) Contains either a narcotic or non-narcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion, or concentration, that the preparation or mixture does not present any potential for abuse. If the preparation or mixture contains a narcotic controlled substance, the preparation or mixture must be formulated in such a manner that it incorporates methods of

denaturing or other means so that the preparation or mixture is not liable to be abused or have ill effects, if abused, and so that the narcotic substance cannot in practice be removed.

(b) Any person seeking to have any preparation or mixture containing a controlled substance and one or more non-controlled substances exempted from the application of all or any part of the Act, pursuant to paragraph (a) of this section, may apply to the Director, Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537.

(c) An application for an exemption under this section shall contain the following information:

- (1) The name, address, and registration number, if any, of the applicant;
- (2) The name, address, and registration number, if any, of the manufacturer or importer of the preparation or mixture, if not the applicant;
- (3) The exact trade name or other designation of the preparation or mixture;
- (4) The complete qualitative and quantitative composition of the preparation or mixture (including all active and inactive ingredients and all controlled and noncontrolled substances);
- (5) The form of the immediate container in which the preparation or mixture will be distributed with sufficient

descriptive detail to identify the preparation or mixture (e.g., bottle, packet, vial, soft plastic pillow, agar gel plate, etc.);

(6) The dimensions or capacity of the immediate container of the preparation or mixture;

(7) The label and labeling, as defined in § 302.01 of this chapter, of the immediate container and the commercial containers, if any, of the preparation or mixture;

(8) A brief statement of the facts which the applicant believes justify the granting of an exemption under this paragraph, including information on the use to which the preparation or mixture will be put;

(9) The date of the application; and

(10) Which of the information submitted on the application, if any, is deemed by the applicant to be a trade secret or otherwise confidential and entitled to protection under subsection 402(a)(8) of the Act (21 U.S.C. 842(a)(8)) or any other law restricting public disclosure of information.

(d) The Director may require the applicant to submit such documents or written statements of fact relevant to the application as he deems necessary to determine whether the application should be granted.

(e) Within a reasonable period of time after the receipt of an application for an exemption under this section, the Director shall notify the applicant of his acceptance or nonacceptance of his application, and if not accepted, the reason therefor. The Director need not accept an application for filing if any of the requirements prescribed in paragraph (c) or requested pursuant to paragraph (d) is lacking or is not set forth as to be readily understood. If the applicant desires, he may amend the application to meet the requirements of paragraph (c) and (d) of this section. If the application is accepted for filing, the Director shall issue and publish in the Federal Register his order on the application, which shall include a reference to the legal authority under which the order is based. This order shall specify the date on which it shall take effect. The Director shall permit any interested person to file written comments on or objections to the order within 60 days of the date of publication of his order in the Federal Register. If any such comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which the order is based, the Director shall immediately suspend the effectiveness of the order until he may reconsider the application in light of the comments and objections filed. Thereafter, the Director shall reinstate, revoke, or amend his original order as he determines appropriate.

(f) The Director may at any time revoke or modify any exemption granted pursuant to this section by following the procedures set forth in paragraph (e) of this section for handling an application for an exemption which has been accepted for filing. The Director may also modify or revoke the criteria

by which exemptions are granted (and thereby modify or revoke all preparations and mixtures granted under the old criteria) and modify the scope of exemptions at any time.

## § 308.24 Exempt chemical preparations.

(a) The chemical preparations and mixtures set forth in paragraph (1) of this section have been exempted by the Director from application of sections 302, 303, 305, 306, 307, 308, 309, 1002, 1003, and 1004 of the Act (21 U.S.C. 822-3, 825-9, 952-4) and § 301.74 of this chapter, to the extent described in paragraphs (b) to (h) of this section.

(b) Registration and security: Any person who manufactures an exempt chemical preparation or mixture must be registered under the Act and comply with all relevant security requirements regarding controlled substances being used in the manufacturing process until the preparation or mixture is in the form described in paragraph (1) of this section. Any other person who handles an exempt chemical preparation after it is in the form described in paragraph (1) of this section is not required to be registered under the Act to handle that preparation, and the preparation is not required to be stored in accordance with security requirements regarding controlled substances.

(c) Labeling: In lieu of the requirements set forth in Part 302 of this chapter, the label and the labeling of an exempt chemical preparation must be prominently marked with its full trade name or other description and the name of the manufacturer or supplier as set forth in paragraph (1) of this section, in such a way that the product can be readily identified as an exempt chemical preparation. The label and labeling must also include in a prominent manner the statement "For industrial use only" or "For chemical use only" or "For in vitro use only—not for human or animal use" or "Diagnostic reagent—for professional use only" or a comparable statement warning the person reading it that human or animal use is not intended. The symbol designating the schedule of the controlled substance is not required on either the label or the labeling of the exempt chemical preparation, nor is it necessary to list all ingredients of the preparation.

(d) Records and reports: Any person who manufactures an exempt chemical preparation or mixture must keep complete and accurate records and file all reports required under Part 304 of this chapter regarding all controlled substances being used in the manufacturing process until the preparation or mixture is in the form described in paragraph (1) of this section. In lieu of records and reports required under Part 304 of this chapter regarding exempt chemical preparations, the manufacturer need only record the name, address, and registration number, if any, of each person to whom the manufacturer distributes any exempt chemical preparation. Each importer or exporter of an exempt narcotic chemical preparation must submit

## RULES AND REGULATIONS

a semiannual report of the total quantity of each substance imported or exported in each calendar half-year within 30 days of the close of the period to the Distribution Audit Branch, Bureau of Narcotics and Dangerous Drugs, Department of Justice, Washington, D.C. 20537. Any other person who handles an exempt chemical preparation after it is in the form described in paragraph (1) of this section is not required to maintain records or file reports.

(e) Quotas, order forms, prescriptions, import, export, and transshipment requirements: Once an export chemical preparation is in the form described in paragraph (1) of this section, the requirements regarding quotas, order forms, prescriptions, import permits and declarations, export permit and declarations, and transshipment and intranet permits and declarations do not apply. These requirements do apply, however, to any controlled substances used in manufacturing the exempt chemical preparation before it is in the form described in paragraph (1) of this section.

(f) Criminal penalties: No exemption granted pursuant to § 308.23 affects the criminal liability for illegal manufacture, distribution, or possession of controlled

substances contained in the exempt chemical preparation. Distribution, possession, and use of an exempt chemical preparation are lawful for registrants and nonregistrants only as long as such distribution, possession, or use is intended for laboratory, industrial, or educational purposes and not for immediate or subsequent administration to a human being or other animal.

(g) Bulk materials: For materials exempted in bulk quantities, the Director may prescribe requirements other than those set forth in paragraphs (b) through (e) of this section on a case-by-case basis.

(h) Changes in chemical preparations: Any change in the quantitative or qualitative composition of the preparation or mixture after the date of application, or change in the trade name or other designation of the preparation or mixture, set forth in paragraph (1) of this section, requires a new application for exemption.

(i) The following preparations and mixtures, in the form and quantity listed in the application submitted (indicated as the "date of application") are designated as exempt chemical preparations for the purposes set forth in this section:

Manufacturer or supplier	Product name and supplier's catalog number	Form of product	Date of application
Abbott Laboratories	CEP agarose plates, No. 9023-01 and 9023-02	Fold pouch: 4 1/2" x 4" and 6 1/2" x 5 1/2"	Aug. 21, 1972
Do	CEP agarose plates (for research studies only), No. 9023-03 and 9023-04	Fold pouch: 4 1/2" x 4" and 6 1/2" x 5 1/2"	Do.
Do	DILU-tainer CEP barbiturate buffer, No. 9025-03	Plastic bag: 6" x 13"	Do.
Do	Tetracarb-125 T-4 diagnostic kit, No. 7776	Vial: 11 ml.	Do.
Do	Irosorb-59 diagnostic kit, No. 6764	Vial: 10 ml.	Do.
Do	T-7-1-125 diagnostic kit No. 7734	Vial: 11 ml.	Nov. 15, 1972
Do	Quantisorb T-4N diagnostic kit No. 6719	Vial: 11 ml.	Do.
American Hospital Supply Corp. (Dade Division)	Adsorbed plasma reagent No. B4233-1 and No. B4233-2	Bottle: 1 ml.	Aug. 16, 1971
Do	Owren's venous buffer No. B4234-25	Bottle: 15 ml.	Do.
Do	Phosphatase substrate No. B6312-1 and No. B6312-5	Bottle: 73 mg. dry powder	Do.
Do	Serum reagent No. B4233-1 and No. B4233-2	Bottle: 2 ml.	Do.
Do	Thrombin reagent (bovine) No. B4233-16	Bottle: 1 ml.	Do.
Do	Thyroxine buffer No. B4233-1	Bottle: 5 ml.	Do.
American Hospital Supply Corp. (Harleco Division)	Barbiturate buffer B-1 No. 9072	Vial: 12.12 grams per 7 dram vial	Sept. 15, 1971
Do	Barbiturate standards set, No. 64808	Vial: 9 x 3 ml. of 8 single and 1 mixed at 16 mg per dl.	Oct. 22, 1971
Do	Barringer & Woodard buffered substrate No. 2895	Vial: 0.73 gram per 15 x 45 mm. vial	Sept. 15, 1971
Do	Buehler instrument buffer B-2 double strength, pH 8.6, 0.075 m No. 93834	Vial: 36.36 grams	Do.
Do	Buffer barbiturate, pH 8.6, No. 96804	Vial: 1.61 grams per 15 x 45 mm. vial	Do.
Do	Buffer barbiturate, pH 8.8, No. 7691	Vial: 11.76 grams per 10 dram vial	Do.
Do	Barbiturate-sodium buffer salt, No. 11731	Bottle: 250 ml.	June 6, 1972
Do	Barbiturate-acid buffer salt, No. 11732	Bottle: 250 ml.	Do.
Do	Buffer salt-barbiturate mixture, pH 8.6, No. 3787	Vial: 14.7 grams per 29.5 x 80 mm. vial	Sept. 15, 1971
Do	Buffer salt mixture, pH 8.8, No. 7644	Vial: 17.85 grams per 29.5 x 80 mm. vial	Do.
Do	Buffer salt mixture Spino B-1, pH 8.6, 0.05 ionic strength, No. 3947	Vial: 12.12 grams per 29.5 x 80 mm. vial	Do.
Do	Buffer salt mixture Spino B-2, pH 8.6, 0.075 ionic strength, No. 3948	Vial: 18.18 grams per 29.5 x 80 mm. vial	Do.
Do	Buffered barbiturate sodium chloride, pH 7.5, No. 64047	Vial: 14.7 grams per vial	Do.
Do	Buffered substrate glycerophosphate Bodansky, No. 22881	Vial: 0.924 grams per 15 x 45 mm. vial	Do.
Do	Buffered veronal, pH 7.5, No. 64322	Vial: 16.48 grams per vial	Do.
Do	Gillies & Davis buffered substrate, No. 23701	Vial: 1.228 grams per 15 x 45 mm. vial	Do.
Do	Hematocritin, acid-alum solution No. 64720	Bottle: 15 and 32 oz., and 2.5 gal.	Dec. 29, 1972
Do	King & Armstrong buffered substrate, No. 23721	Vial: 1.14 grams per 15 x 45 mm. vial	Sept. 15, 1971
Do	Joe & Whitmore buffered substrate, No. 23686	Vial: 0.554 grams per 15 x 45 mm. vial	Do.
Do	Shinowara, Jones & Reinhardt buffered substrate, No. 23738	Vial: 0.946 grams per 15 x 45 mm. vial	Do.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## RULES AND REGULATIONS

Manufacturer or supplier	Form of product	Date of application
Cadette Laboratory Division of American Cyanamid Co.	Urine toxicology control drugs 8-2056-61.	Do.
Do.	Urine toxicology control, prophylaxis No. 2057-61.	Do.
Do.	Urine toxicology control, drugs 4-2058-61.	Do.
Do.	Urine toxicology control, drugs 4-2059-61.	Do.
Mallinckrodt Chemical Works.	High resolution buffer-tris barbital alkaloid, prophylaxis No. 2067-61.	Dec. 22, 1971.
Malvern Medical Research Center.	Res-O-Mat ETR solution. Vial 1M dram.	Feb. 17, 1972.
MCI Biomedical.	TEP buffer, pH 8.2, 0.04 tonic strength. Vial 50 cc.	Dec. 19, 1972.
MEACD Diagnostics.	T-1 test kit No. LA905. Vial 5 x 1 1/4".	Mar. 3, 1972.
Mealy Laboratories.	Agar gel plate kit No. F-201, F-211. Package: 6 plates and 2 vials (8 x 70 mm) per lot.	Nov. 30, 1971.
Do.	F-212, F-213, G-292, G-309, and G-310.	Do.
Do.	Barbital buffer for electrophoresis. Vial: 1212 grams per 29.5 x 89 mm. vial.	Sept. 15, 1971.
Miles Laboratories, Inc.	Tetraline, 702. Pilsen 10 g each.	July 29, 1971.
Nato Chemical Co.	Zn-2P Zn-72. Pilsen 10 g each.	Nov. 30, 1971.
Purix Laboratories, Inc.	Cannabis saliva, alendone extract, Vial: 2 cc.	Sept. 20, 1971.
Do.	1,000 ppm/cc. Vial: 80 cc.	Do.
Do.	Cannabis plasma, alendone extract, Vial: 80 cc.	Do.
Ortho Diagnostics.	Activated Thrombo Pak X No. 721000. Bottle: 3.2 ml.	Sept. 21, 1971.
Do.	Haptiden, agar gel plate No. 740000... Plate: 43 mm per plate.	Do.
Do.	Orthonorm plasma coagulation control. Packet: 80 mg.	Do.
Do.	Orbit HAA positive control No. Vial: 1 mg.	Mar. 27, 1972.
Rhefing Corp., Division, Becton Dickinson and Co.	D-amphetamine sulfate C14 sterile sequeus solution. Vial: 9 dram and plate. 0.5 mc, 0.1 mc.	July 14, 1972.
Do.	L-phenylephrine sulfate C14 sterile sequeus solution. Vial: 10 mc, 1.0 mc.	Do.
Do.	Sceobacidal 6 C14. Vial: 80 cc.	Do.
Do.	Berthel buffer acid mixture, No. 0762. Vial: 80 cc.	Do.
BGA Scientific Corp.	Berthel-acid buffer salt, No. 1173. Bottle: 4 oz.	Do.
Do.	Berthel-acid buffer salt, No. 1173. Vial: 0.73 gram per 15 x 45 mm. vial.	Sept. 15, 1971.
Do.	Bernier & Weddard buffered substrate No. 22885.	Do.
Do.	Bucher instrument buffer B-2 double distilled water. Vial: 30.38 gm.	Do.
Do.	Buffer barbital, pH 8.0, No. 7091. Vial: 26.36 grams.	Do.
Do.	Buffer barbital, pH 8.0, No. 7091. Vial: 11.76 grams per 10 dram vial.	Do.
Do.	Buffer salt-barbital acetate, mixture No. 7044. Vial: 14.7 grams per 29.5 x 80 mm. vial.	Do.
Do.	Buffer salt mixture pH 8.8, No. 7044. Vial: 17.85 grams per 29.5 x 80 mm. vial.	Do.
Do.	Buffer salt mixture Spino B-1, pH 8.8. Vial: 12.12 grams per 29.5 x 80 mm. vial.	Do.
Do.	Buffer salt mixture Spino B-2, pH 8.8, 0.075 tonic strength, No. 3948. Vial: 18.18 grams per 29.5 x 80 mm. vial.	Do.
Do.	Buffered barbital, sodium chloride, Vial: 14.7 grams per vial.	Do.
Do.	Buffered substrate glycerophosphate Bodansky No. 22681. Vial: 0.924 gram per 15 x 40 mm. vial.	Do.
Do.	Buffered veronal, pH 7.5, No. 6432. Vial: 16.48 grams per vial.	Do.
Do.	Do. Davis buffered substrate, No. 2370. Vial: 15.15 x 40 mm. vial.	Do.

## RULES AND REGULATIONS

Trade name or other designation	Composition	Manufacturer or supplier
Phenobarbital and atropine tablets	Tablet: Phenobarbital, 8 mg.; atropine sulfate, 1 mg.	P. J. Noyes Co.
Phenobarbital and atropine tablets, No. 2	Tablet: Phenobarbital, 16 mg.; atropine sulfate, 2 mg.	Do.
Phenobarbital and atropine tablets, No. 3	Tablet: Phenobarbital, 24 mg.; atropine sulfate, 3 mg.	Do.
Phenobarbital and belladonna	Tablet: Phenobarbital, 16 mg.; belladonna extract, 16 mg.	The Vale Chemical Co., Inc.
Do.	Tablet: Phenobarbital, 16 mg.; belladonna extract, 16 mg.	Do.
Phenobarbital and belladonna No. 2	Tablet: Phenobarbital, 32 mg.; belladonna extract, 32 mg.	Do.
Phenobarbital with mannitol hexanitrate	Tablet: Phenobarbital, 75 mg.; mannitol hexanitrate, 25 mg.	Paul B. Elder Co., Inc.
Phenobarbital and mannitol hexanitrate	Tablet: Phenobarbital, 15 mg.; mannitol hexanitrate, 5 mg.	Do.
Phenobarbital sodium atropine	Tablet: Phenobarbital sodium, 8 mg.; atropine sulfate, 1 mg.	McNeil Laboratories, Inc.
No. 1	Tablet: Phenobarbital sodium, 16 mg.; atropine sulfate, 2 mg.	Do.
No. 2	Tablet: Phenobarbital sodium, 24 mg.; atropine sulfate, 3 mg.	Do.
No. 3	Tablet: Phenobarbital sodium, 32 mg.; atropine sulfate, 4 mg.	Do.
Phenobarbital and sodium nitrite	Tablet: Phenobarbital, 16 mg.; sodium nitrite, 1 mg.	The Upjohn Co.
Phenobarbital theobromine	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Phenodona tablets	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Phenodol	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Phyllox.	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Pipal PFB elixir	Tablet: Phenobarbital, 16 mg.; pipal, 16 mg.	Do.
Pipal PFB tablet	Tablet: Phenobarbital, 16 mg.; pipal, 16 mg.	Do.
Premarin with phenobarbital	Tablet: Phenobarbital, 16 mg.; premarin, 16 mg.	Do.
Proanthine with phenobarbital	Tablet: Phenobarbital, 16 mg.; proanthine, 16 mg.	Do.
Probiol	Tablet: Phenobarbital, 16 mg.; probiol, 16 mg.	Do.
Propenite	Tablet: Phenobarbital, 16 mg.; propenite, 16 mg.	Do.
Prydonal Spasule	Tablet: Phenobarbital, 16 mg.; prydonal, 16 mg.	Do.
Quadrinal	Tablet: Phenobarbital, 16 mg.; quadrinal, 16 mg.	Do.
Do.	Tablet: Phenobarbital, 16 mg.; quadrinal, 16 mg.	Do.
Quistrate with nitroglycerin and phenobarbital	Tablet: Phenobarbital, 16 mg.; nitroglycerin, 16 mg.	Do.
Quistrate with phenobarbital	Tablet: Phenobarbital, 16 mg.; quistrate, 16 mg.	Do.
Do.	Tablet: Phenobarbital, 16 mg.; quistrate, 16 mg.	Do.
Robinal-PH	Tablet: Phenobarbital, 16 mg.; robinal, 16 mg.	Do.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## RULES AND REGULATIONS

Trade name or other designation	Composition	Manufacturer or supplier
Theophaphen	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	The S. E. Massengill Co.
Theominal	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Winthrop Laboratories.
Theominal M	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Theominal R 8	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Do.
Theophen	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	The Vale Chemical Co., Inc.
Theorate	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	Whittier Laboratories, Inc.
Thymodyne	Tablet: Phenobarbital, 16 mg.; theobromine, 16 mg.	P. J. Noyes Co.
Trocinat with phenobarbital	Tablet: Phenobarbital, 16 mg.; trocinat, 16 mg.	Win. P. Poythress & Co., Inc.
Tricoelid	Tablet: Phenobarbital, 16 mg.; tricoelid, 16 mg.	Burroughs Wellcome & Co., Inc.
Triphen	Tablet: Phenobarbital, 16 mg.; triphen, 16 mg.	The Vale Chemical Co., Inc.
Valpin-PB	Tablet: Phenobarbital, 16 mg.; valpin, 16 mg.	Endo Laboratories, Inc.
Vasorutin	Tablet: Phenobarbital, 16 mg.; vasorutin, 16 mg.	Buffington's, Inc.
Veratrem	Tablet: Phenobarbital, 16 mg.; veratrem, 16 mg.	The Ziemer Co.
Veratrite	Tablet: Phenobarbital, 16 mg.; veratrite, 16 mg.	Nelsler Laboratories, Inc.
Veritag	Tablet: Phenobarbital, 16 mg.; veritag, 16 mg.	S. J. Tutag and Co.
Vertegus	Tablet: Phenobarbital, 16 mg.; vertegus, 16 mg.	Burt Krone Co.
Veruphen	Tablet: Phenobarbital, 16 mg.; veruphen, 16 mg.	The Ziemer Co.
Virutin	Tablet: Phenobarbital, 16 mg.; virutin, 16 mg.	Lemmon Pharmacal Co.
W-T	Tablet: Phenobarbital, 16 mg.; W-T, 16 mg.	Warren-Teed Pharmaceuticals Inc.
W-T	Tablet: Phenobarbital, 16 mg.; W-T, 16 mg.	Do.
Xanlophen	Tablet: Phenobarbital, 16 mg.; xanlophen, 16 mg.	Pittman-Moore.
Zalogen compound	Tablet: Phenobarbital, 16 mg.; zalogen, 16 mg.	The S. E. Massengill Co.
Zantrate	Tablet: Phenobarbital, 16 mg.; zantrate, 16 mg.	The Upjohn Co.
Zem-Dab	Tablet: Phenobarbital, 16 mg.; zem-dab, 16 mg.	The Ziemer Co.
No. 35	Tablet: Phenobarbital, 16 mg.; No. 35, 16 mg.	Stayner Corp.
No. 36	Tablet: Phenobarbital, 16 mg.; No. 36, 16 mg.	Do.
No. 65	Tablet: Phenobarbital, 16 mg.; No. 65, 16 mg.	Do.
No. 66	Tablet: Phenobarbital, 16 mg.; No. 66, 16 mg.	Do.
No. 75	Tablet: Phenobarbital, 16 mg.; No. 75, 16 mg.	Bariatric Corp.
No. 88	Tablet: Phenobarbital, 16 mg.; No. 88, 16 mg.	Stayner Corp.
No. 89	Tablet: Phenobarbital, 16 mg.; No. 89, 16 mg.	Do.
No. 111	Tablet: Phenobarbital, 16 mg.; No. 111, 16 mg.	Do.
No. 136	Tablet: Phenobarbital, 16 mg.; No. 136, 16 mg.	Do.
No. 643	Tablet: Phenobarbital, 16 mg.; No. 643, 16 mg.	Do.
Rx. No. 4104	Tablet: Phenobarbital, 16 mg.; Rx. No. 4104, 16 mg.	The Ziemer Co.
Rx. No. 4105	Tablet: Phenobarbital, 16 mg.; Rx. No. 4105, 16 mg.	Do.
Rx. No. 4108	Tablet: Phenobarbital, 16 mg.; Rx. No. 4108, 16 mg.	Do.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## HEARINGS

## § 308.41 Hearings generally.

In any case where the Director shall hold a hearing on the issuance, amendment, or repeal of rules pursuant to section 201 of the Act, the procedures for such hearing and accompanying proceedings shall be governed generally by the rulemaking procedures set forth in the Administrative Procedure Act (5 U.S.C. 551-559) and specifically by section 201 of the Act (21 U.S.C. 811), by §§ 308.42-308.51, and by §§ 316.41-316.67 of this chapter.

## § 308.42 Purpose of hearing.

If requested by any interested person after proceedings are initiated pursuant to § 308.44, the Director shall hold a hearing for the purpose of receiving factual evidence and expert opinion regarding the issues involved in the issuance, amendment or repeal of a rule issuable pursuant to section 201(a) of the Act (21 U.S.C. 811(a)). Extensive argument should not be offered into evidence but rather presented in opening or closing statements of counsel or in memoranda or proposed findings of fact and conclusions of law.

## § 308.43 Waiver or modification of Rules.

The Director or the presiding officer (with respect to matters pending before him) may modify or waive any rule in this part by notice in advance of the hearing, if he determines that no party in the hearing will be unduly prejudiced and the ends of justice will thereby be served. Such notice of modification or waiver shall be made a part of the record of the hearing.

## § 308.44 Initiation of proceedings for rulemaking.

(a) Any interested person may submit a petition to initiate proceedings for the issuance, amendment, or repeal of any rule or regulation issuable pursuant to the provisions of section 201 of the Act.

(b) Petitions shall be submitted in quintuplicate to the Director in the following form:

(Date)

DIRECTOR, BUREAU OF NARCOTICS  
AND DANGEROUS DRUGS  
Department of Justice  
Washington, D.C. 20537.

DEAR SIR: The undersigned hereby petitions the Director to initiate proceedings for the issuance (amendment or repeal) of a rule or regulation pursuant to section 201 of the Controlled Substances Act.

Attached hereto and constituting a part of this petition are the following:

(A) The proposed rule in the form proposed by the petitioner. (If the petitioner seeks the amendment or repeal of an existing rule, the existing rule, together with a reference to the section in the Code of Federal Regulations where it appears, should be included.)

(B) A statement of the grounds which the petitioner relies for the issuance (amendment or repeal) of the rule. (Such grounds shall include a reasonably concise statement of the facts relied upon by the petitioner,

V

XUM

including a summary of any relevant medical or scientific evidence known to the petitioner.)

All notices to be sent regarding this petition should be addressed to:

-----  
(Name)  
-----  
(Street Address)  
-----  
(City and State)  
Respectfully yours,  
-----  
(Signature of petitioner)

(c) Within a reasonable period of time after the receipt of a petition, the Director shall notify the petitioner of his acceptance or nonacceptance of the petition, and if not accepted, the reason therefor. The Director need not accept a petition for filing if any of the requirements prescribed in paragraph (b) of this section is lacking or is not set forth so as to be readily understood. If the petitioner desires, he may amend the petition to meet the requirements of paragraph (b) of this section. If accepted for filing, a petition may be denied by the Director within a reasonable period of time thereafter if he finds the grounds upon which the petitioner relies are not sufficient to justify the initiation of proceedings.

(d) The Director shall, before initiating proceedings for the issuance, amendment, or repeal of any rule either to control a drug or other substance, or to transfer a drug or other substance from one schedule to another, or to remove a drug or other substance entirely from the schedules, and after gathering the necessary data, request from the Secretary a scientific and medical evaluation and the Secretary's recommendations as to whether such drug or other substance should be so controlled, transferred, or removed as a controlled substance. The recommendations of the Secretary to the Director shall be binding on the Director as to such scientific and medical matters, and if the Secretary recommends that a drug or other substance not be controlled, the Director shall not control that drug or other substance.

(e) If the Director determines that the scientific and medical evaluation and recommendations of the Secretary and all other relevant data constitute substantial evidence of potential for abuse such as to warrant control or additional control over the drug or other substance, or substantial evidence that the drug or other substances should be subjected to lesser control or removed entirely from the schedules, he shall initiate proceedings for control, transfer, or removal as the case may be.

(f) If and when the Director determines to initiate proceedings, he shall publish in the FEDERAL REGISTER general notice of any proposed rule making to issue, amend, or repeal any rule pursuant to section 201 of the Act. Such published notice shall include a statement of the time, place, and nature of any hearings

on the proposal in the event a hearing is requested pursuant to § 308.45. Such hearings may not be commenced until after the expiration of at least 30 days from the date the general notice is published in the FEDERAL REGISTER. Such published notice shall also include a reference to the legal authority under which the rule is proposed, a statement of the proposed rule, and, in the discretion of the Director, a summary of the subjects and issues involved.

(g) The Director may permit any interested persons to file written comments on or objections to the proposal and shall designate in the notice of proposed rule making the time during which such filings may be made.

#### § 308.45 Request for hearing or appearance; waiver.

(a) Any interested person desiring a hearing on a proposed rulemaking, shall, within 30 days after the date of publication of notice of the proposed rulemaking in the FEDERAL REGISTER, file with the Director a written request for a hearing in the form prescribed in § 316.47 of this chapter.

(b) Any interested person desiring to participate in a hearing pursuant to § 308.41 shall, within 30 days after the date of publication of the notice of hearing in the FEDERAL REGISTER, file with the Director a written notice of his intention to participate in such hearing in the form prescribed in § 316.48 of this chapter. Any person filing a request for a hearing need not also file a notice of appearance; the request for a hearing shall be deemed to be a notice of appearance.

(c) Any interested person may, within the period permitted for filing a request for a hearing, file with the Director a waiver of an opportunity for a hearing or to participate in a hearing, together with a written statement regarding his position on the matters of fact and law involved in such hearing. Such statement, if admissible, shall be made a part of the record and shall be considered in light of the lack of opportunity for cross-examination in determining the weight to be attached to matters of fact asserted therein.

(d) If any interested person fails to file a request for a hearing, or if he so files and fails to appear at the hearing, he shall be deemed to have waived his opportunity for the hearing or to participate in the hearing, unless he shows good cause for such failure.

(e) If all interested persons waive or are deemed to waive their opportunity for the hearing or to participate in the hearing, the Director may cancel the hearing, if scheduled, and issue his final order pursuant to § 308.48 without a hearing.

#### § 308.46 Burden of proof.

At any hearing, the proponent for the issuance, amendment, or repeal of any rule or regulation shall have the burden of proof.

#### § 308.47 Time and place of hearing.

The hearing will commence at the place and time designated in the notice of proposed rulemaking published in the FEDERAL REGISTER but thereafter it may be moved to a different place and may be continued from day to day or recessed to a later day without notice other than announcement thereof by the presiding officer at the hearing.

#### § 308.48 Final order.

As soon as practicable after the presiding officer has certified the record to the Director, the Director shall cause to be published in the FEDERAL REGISTER his order in the proceeding, which shall set forth the final rule and the findings of fact and conclusions of law upon which the rule is based. This order shall specify the date on which it shall take effect, which shall not be less than 30 days from the date of publication in the FEDERAL REGISTER unless the Director finds that conditions of public health or safety necessitate an earlier effective date, in which event the Director shall specify in the order his findings as to such conditions.

#### § 308.49 Control required under international treaty.

Pursuant to section 201(d) of the Act (21 U.S.C. 811(d)), where control of a substance is required by U.S. obligations under international treaties, conventions, or protocols in effect on May 1, 1971, the Director shall issue and publish in the FEDERAL REGISTER an order controlling such substance under the schedule he deems most appropriate to carry out obligations. Issuance of such an order shall be without regard to the findings required by subsections 201(a) or 202(b) of the Act (21 U.S.C. 811(a) or 812(b)) and without regard to the procedures prescribed by § 308.41 or subsections 201(a) and (b) of the Act (21 U.S.C. 811(a) and (b)). An order controlling a substance shall become effective 30 days from the date of publication in the FEDERAL REGISTER, unless the Director finds that conditions of public health or safety necessitate an earlier effective date, in which event the Director shall specify in the order his findings as to such conditions.

#### § 308.50 Control of immediate precursors.

Pursuant to section 201(e) of the Act (21 U.S.C. 811(e)), the Director may, without regard to the findings required by subsection 201(a) or 202(b) of the Act (21 U.S.C. 811(a) or 812(b)) and without regard to the procedures prescribed by § 308.41 or subsections 201(a) and (b) of the Act (21 U.S.C. 811(a) and (b)), issue and publish in the FEDERAL REGISTER an order controlling an immediate precursor. The order shall designate the schedule in which the immediate precursor is to be placed, which shall be the same schedule in which the controlled substance of which it is an immediate

precursor is placed or any other schedule with a higher numerical designation. An order controlling an immediate precursor shall become effective 30 days from the date of publication in the FEDERAL REGISTER, unless the Director finds that conditions of public health or safety necessitate an earlier effective

date, in which event the Director shall specify in the order his findings as to such conditions.

#### § 308.51 Pending proceedings.

All administrative proceedings pending before the Bureau on the effective date of this part, including the matter

of listing chlorthalidopoxide and its salts and diazepam as drugs subject to control under the Drug Abuse Control Amendments of 1965, shall be continued and brought to final determination in accord with the laws and regulations in effect prior to such effective date.

### CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies: (1) The effective date of the authorization of the sale of flood insurance in the area under the emergency or under the regular flood insurance program; (2) the effective date on which the community became ineligible for the sale of flood insurance because of its failure to submit land use and control measures as required pursuant to § 1909.24(a); or (3) the effective date of a community's formal reinstatement in the program pursuant to § 1909.24(b). The entry reads as follows:

#### § 1914.4 Status of participating communities.

#### PART 1915—IDENTIFICATION OF SPECIAL HAZARD AREAS List of Communities With Special Hazard Areas

The Federal Insurance Administrator finds that comments and public procedure and the use of delayed effective dates in identifying the areas of communities which have special flood or mudslide hazards, in accordance with 24 CFR Part 1915, would be contrary to the public interest. The purpose of such identifications is to guide new development away from areas threatened by flooding, a purpose which is accomplished pursuant to statute by denying subsidized flood insurance to structures there-after built within such areas. The practice of issuing proposed identifications for comment or of delaying effective dates would tend to frustrate this purpose by permitting imprudent or unscrupulous builders to start construction within such hazardous areas before the official identification became final, thus increasing the communities' aggregate exposure to loss of life and property and the agency's financial exposure to flood losses, both of which are contrary to the statutory purposes of the program. Accordingly, the Department is not providing for public comment in issuing this amendment and it will become effective March 29, 1973. Section 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

#### § 1915.3 List of communities with special hazard areas.

## Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

#### Food and Drug Administration

##### [ 21 CFR Part 11 ]

##### BOTTLED WATER

#### Proposed Quality Standards; Extension of Time for Filing Comments

In the FEDERAL REGISTER of January 8, 1973 (38 FR 1019), the Commissioner of Food and Drugs proposed to amend 21 CFR Part 11 (37 FR 20038) by adding to Subpart B a new § 11.7 *Bottled Water*. Interested persons were invited to file written comments regarding this proposal on or before March 9, 1973.

The Commissioner has received a request for extension of such time and, good reason therefor appearing, the time for filing written comments regarding this proposal is extended to April 10, 1973.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403(h), 701, 52 Stat. 1046, 1047 and 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343(h), 371) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: March 26, 1973.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

[FR Doc.73-6132 Filed 3-29-73; 8:45 am]

##### [ 21 CFR Parts 1, 3, 5, 20 ]

##### FOOD LABELING

#### Extension of Time for Filing Comments

The following notices of proposed rulemaking published in the FEDERAL REGISTER of January 19, 1973, provided for the filing of written comments on or before March 20, 1973:

1. Amendment of § 1.8 *Food in package form, labeling; identity* (38 FR 2138).
2. Revocation of 21 CFR 3.10, 3.23(b), and 3.201 and amendment of § 1.12 *Food; labeling; artificial flavoring or coloring, chemical preservatives* (38 FR 2139).
3. Revocation of § 1.10(e), (f), and (g), redesignation of § 1.10(h) as § 1.10(e), establishment of new § 1.10a *Food; labeling; exemptions from labeling requirements*, revocation of 21 CFR 3.1 and 3.26, and revocation of 21 CFR Part 5 (38 FR 2141).
4. Revocation of 21 CFR 3.39 and amendment of 21 CFR Part 20 to estab-

lish new identity standards for mellowine and parevine (38 FR 2150).

The Commissioner of Food and Drugs has received requests for an extension of such time and, good reason therefore appearing, the time for filing comments is extended to April 20, 1973. To be considered, such comments must be received at the Office of the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, by the close of business (5 p.m.) on April 20, 1973.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403, 701, 52 Stat. 1046, as amended, 1047, as amended, 1055-1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343, 371) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: March 26, 1973.

WILLIAM F. RANDOLPH,  
Acting Associate Commissioner  
for Compliance.

#### AVAILABILITY OF INFORMATION TO THE PUBLIC

##### Notice of Proposed Rulemaking

Notice is hereby given of proposed amendments to the Department regulation on availability of records to the public, pursuant to 5 U.S.C. 552 and 42 U.S.C. 1306. The substance of the Department's regulation has remained unchanged since it was first promulgated in 1967. It is now advisable in light of our experience under the Freedom of Information Act and the regulation to revise the format of the regulation. The new format would specifically identify types of records which the Department as a matter of policy, has determined will be available to the public and those types of records which will not normally be disclosed by the Department. This format would give greater guidance to both Department personnel and to the general public on what records will be freely available.

Certain technical and conforming changes are also made to reflect the current organization of the Department. In Subpart A, § 5.3 is amended to list the current operating agencies of the Department and § 5.4 is amended to correctly list the heads of the operating

agencies. In Subpart B, § 5.11 is amended to list the regulations of the operating agencies which, with qualifications identified in Subpart F, continue in full force and effect. Such agency regulations will be revised after publication of this regulation to conform to this regulation. In Subpart C, §§ 5.31 and 5.32 are amended to reflect the Department's current organization. Section 5.32 also adds an information center officer for Food and Drug Administration, thereby delegating to an official of Food and Drug Administration authority to make initial denials of requests for records. Appeal from such denial will continue to lie with the Assistant Secretary for Health.

Section 5.51(c) expresses a new policy that all requests for information be responded to within 10 days of receipt, allowing a reasonable time for locating and reproducing the materials. If the request cannot be acted upon within 10 days, an interim reply will be made.

Section 5.61 is revised to set forth the fee schedule for the Office of the Secretary and to refer to agency regulations for fee schedules applicable to such agencies.

Subpart F is entirely revised. Section 5.70 reiterates the policy of the Department to make fullest possible disclosure consistent with its obligations of confidentiality and administrative necessity. Section 5.71 identifies the kinds of information, in whatever record contained, which will not be disclosed. Section 5.72 sets forth, with such additional clarification as is necessary, those types of records which will generally be made available. Disclosure, however, will be subject to the limitations indicated in §§ 5.71 and 5.73. Significant changes effected by this subpart include:

(1) The deletion of the exemption for correspondence or other communications between the Department and State or local governmental officials; and

(2) The release of final reports of audits, surveys, reviews or evaluations, whether made by, for or on behalf of the Department, of performance by any grantee, contractor, or provider.

Section 5.73 lists those types of records which, in the judgment of the Department fall within the exemptions and for which the protection of the proper exemptions will normally be invoked by the Department. These include:

(1) All interagency and intraagency communications which reflect opinions or judgments of agency officials or other Government officials;

## PROPOSED RULE MAKING

(2) Files relating to pending investigations for law enforcement purposes; and

(3) Financial and commercial information, trade secrets and other normally confidential materials.

Section 5.74 gives discretion to the head of an operating agency to release otherwise exempt records, except where prohibited by law, when he determines that disclosure is in the public interest and is consistent with obligations of confidentiality and administrative necessity.

Section 5.82 is revised to require the concurrence of the Assistant Secretary for Public Affairs in denials on review by the Assistant Secretary for Administration and Management or the Assistant Secretary for Health.

Appendix A is entirely revised. Instead of listing only examples of exempt records, the appendix now provides examples of both specific records which are and those which are not generally available.

Prior to the final adoption of the proposed amendments to the Regulations, consideration will be given to any data, views, or arguments, pertaining thereto which are submitted in writing on or before April 30, 1973.

Comments should be addressed to:

Director of Public Services, Department Information Center Officer, Department of Health, Education, and Welfare, 330 Independence Avenue SW., Washington, DC 20201.

Comments received will be available for inspection at the Department's Information Center, Room 1528 at the above address.

Dated: March 27, 1973.

CASPAR W. WEINBERGER,  
Secretary.

1. Section 5.3 is revised to read as follows:

**§ 5.3 Operating agency.**

As used in this part, "operating agency" means the constituent operating agencies of the Department, i.e., the Health Services and Mental Health Administration, the National Institutes of Health, the Food and Drug Administration, the Office of Education, the National Institute of Education, the Social Security Administration, and the Social and Rehabilitation Service. Three operating agencies, the Health Services and Mental Health Administration, the National Institutes of Health, and the Food and Drug Administration constitute the Public Health Service.

2. Section 5.4 is revised to read as follows:

**§ 5.4 Heads of Office of Secretary and operating agencies.**

The heads of the Office of the Secretary, the Public Health Service, and the operating agencies are as follows:  
Office of the Secretary—Secretary of Health, Education, and Welfare.  
Public Health Service—Assistant Secretary for Health.

Food and Drug Administration—Commissioner of Food and Drugs.  
Health Services and Mental Health Administration—Administrator, Health Services and Mental Health Administration.  
National Institutes of Health—Director, National Institutes of Health.  
Office of Education—Commissioner of Education.

National Institute of Education—Director, National Institute of Education.  
Social Security Administration—Commissioner of Social Security.  
Social and Rehabilitation Service—Administrator, Social and Rehabilitation Service.

3. Section 5.11 is revised to read as follows:

**§ 5.11 Purpose and scope.**

This part constitutes the regulation of the Department respecting the availability to the public, pursuant to the Act, of records of the Department. It informs the public what records are generally available and where and how they may be obtained. To the extent that they are not inconsistent with this regulation, it does not revoke, modify, or supersede the following regulations of the

Office of the Secretary	HEW North Building, 330 Independence Avenue SW., Washington, DC 20201.
Food and Drug Administration	Federal Building No. 8, 200 C Street SW., Washington, DC 20204.
National Institutes of Health	Building No. 1, 9000 Rockville Pike, Bethesda, MD 20814.
Health Services and Mental Health Administration	Parklawn Building, 5600 Fishers Lane, Rockville, MD 20852.
Office of Education	Federal Office Building No. 6, 400 Maryland Avenue SW., Washington, DC 20202.
Social Security Administration	Social Security Building, 6401 Security Boulevard, Baltimore, MD 21235 (as set forth in 20 CFR, Part 401).
Social and Rehabilitation Service	HEW North Building, 330 Independence Avenue SW., Washington, DC 20201.
Saint Elizabeths Hospital, National Institute of Mental Health, Public Health Service	Administration Building, St. Elizabeths Hospital, Martin Luther King, Jr. Avenue SE., Washington, DC 20032.
National Institute of Education	[To be designated.]

Section 5.32(c) is revised to read as follows:

**§ 5.32 Information center officers.**

(c) The information center officer for each of the operating agency information

Health Services and Mental Health Administration and National Institutes of Health	Director of Public Services, Department Information Center Officer.
Food and Drug Administration	Assistant Commissioner for Public Affairs.
Office of Education	Assistant Commissioner for Public Affairs.
Social Security Administration	Assistant Commissioner for Public Affairs.
Social and Rehabilitation Service	Assistant to the Director for Public Information.
National Institute of Education	

6. Section 5.51(c) is revised to read as follows:

**§ 5.51 Procedure.**

(c) A request should identify the requested record by brief description, containing the name, number, or date as applicable, sufficient to enable the record to be identified and located. It is the policy of the Department that requests

Public Health Service, of the operating agencies, or of subsidiaries of operating agencies:

Public Health Service—42 CFR Part 1.  
Food and Drug Administration—21 CFR Parts 1, 2, 4, 8, 121, 130, 135, 146, and 191 (see Notice of Proposed Rulemaking 37 FR 9128 May 5, 1972).  
Saint Elizabeths Hospital, NIMH, PHS—42 CFR Part 300.  
Social Security Administration—20 CFR Part 401 and Part 422, Subpart E.

4. Section 5.31 is amended to read as follows:

**§ 5.31 Information centers or facilities.**

(b) . . . . .  
Region III—P.O. Box 12900, Philadelphia, PA 19108.

Region X—Arcade Plaza Building, 1321 Second Avenue, Seattle, WA 98101.

(c) Centers are maintained for the Office of the Secretary and the operating agencies, or subsidiaries thereof, at the following locations:

HEW North Building, 330 Independence Avenue SW., Washington, DC 20201.
Federal Building No. 8, 200 C Street SW., Washington, DC 20204.
Building No. 1, 9000 Rockville Pike, Bethesda, MD 20814.
Parklawn Building, 5600 Fishers Lane, Rockville, MD 20852.
Federal Office Building No. 6, 400 Maryland Avenue SW., Washington, DC 20202.
Social Security Building, 6401 Security Boulevard, Baltimore, MD 21235 (as set forth in 20 CFR, Part 401).
HEW North Building, 330 Independence Avenue SW., Washington, DC 20201.
Administration Building, St. Elizabeths Hospital, Martin Luther King, Jr. Avenue SE., Washington, DC 20032.
[To be designated.]

centers shall have, concurrently with other duly authorized officers, a like responsibility for the records of his operating agency. The information center officer for the respective operating agencies shall be as follows:

Director of Public Services, Department Information Center Officer.
Assistant Commissioner for Public Affairs.
Assistant Commissioner for Public Affairs.
Assistant Commissioner for Public Affairs.
Assistant to the Director for Public Information.

be answered within 10 days from date of receipt; however, a reasonable time should be allowed for records to be located, evaluated, reproduced, and mailed. If the action cannot be completed within 10 days, a letter will be sent to the requester explaining the reasons for the delay.

7. Section 5.61 is revised to read as follows:

**§ 5.61 Fee schedules.**

The fee schedule for Office of the Secretary is as follows:

1. Search for records—\$3 per hour; provided however that no charge will be made for the first one-half hour.
2. Reproduction, duplication, or copying of records—10 cents per page; provided however that no charge will be made where the total amount does not exceed 50 cents.
3. Certification or authentication of records—\$3 per certification or authentication.
4. Forwarding material to destination—postage, insurance, and special fees will be charged on an actual cost basis.

Fee schedules for operating agencies may be found in the applicable agency regulations; see § 5.11.

8. Subpart F—Exemptions, is deleted and the following new Subpart F—Availability of Specific Records, is substituted in lieu thereof:

**Subpart F—Availability of Specific Records**

- Sec.
- 5.70 Policy.
  - 5.71 Protection of personal privacy and proprietary information.
  - 5.72 Records available.
  - 5.73 Records not available.
  - 5.74 Further disclosure by agency head.
  - 5.82 By whom review is made.

**Subpart F—Availability of Specific Records**  
**§ 5.70 Policy.**

This subpart specifies the types of records which the Department shall, in keeping with its policy of fullest possible disclosure, make available for inspection and copying. For clarity and purposes of guidance, there are also set forth below the kinds or portions of records which generally will not be released, except as may be determined under § 5.74. The appendix to this part contains some examples of the kinds of materials which, in accordance with § 5.72, will generally be released and other materials which, in accordance with § 5.73, are not normally available. Regulations of the operating agencies (see § 5.11) may provide for disclosure of records beyond that provided for in § 5.72.

In the event that any record contains both information which is discloseable and that which is not discloseable under this regulation, the nondiscloseable information will be deleted and the balance of the record disclosed unless the nondiscloseable material is so intertwined that deletion would render the balance of the record unintelligible.

**§ 5.71 Protection of personal privacy and proprietary information.**

As set forth with more particularity below, certain types of information in whatever record or document contained shall not be disclosed where disclosure would be inconsistent with individual rights of personal privacy or would violate obligations of confidentiality.

(a) Except to the extent specifically otherwise provided by regulations of operating agencies, no disclosure will be made of information of a personal and private nature, such as information in personnel and medical files, in welfare

## PROPOSED RULE MAKING

and social security records and any other information of a private and personal nature.

(b) Except to the extent specifically otherwise provided by regulations of operating agencies, information having a commercial, financial, or professional value and in which the person providing the information has a proprietary interest will not be disclosed if it is in fact confidential. In determining whether such information is in fact confidential, consideration may be given to such factors as (1) the general custom or usage in the occupation or business to which the information relates that it be held confidential, (2) the number and situation of the individuals who have access to such information, (3) the type and degree risk of financial injury to be expected if disclosure occurs, and (4) the length of time such information should be regarded as retaining the characteristics noted above.

(c) Information solicited and obtained by the Department from any individual or organization, relying upon provision for confidentiality authorized by applicable statute or regulation, will not be disclosed. This subpart does not itself authorize the giving of any pledge of confidentiality authorized by applicable statute or regulation, will not be disclosed. This subpart does not itself authorize the giving of any pledge of confidentiality by any officer or employee of the Department.

This section does not preclude use of nondiscloseable records or information from such records for authorized program purposes, including law enforcement purposes and litigation. Release of information of the nature described in this section to the individual or the organization to whom the information pertains or to an authorized representative of either will not be deemed a disclosure within the meaning of this part.

**§ 5.72 Records available.**

The following records of the Department shall, subject to the exceptions set forth in §§ 5.71 and 5.73, be available upon request for inspection and copying.

(a) *Correspondence.* Correspondence between the Department and individuals or organizations outside the executive branch of the Federal Government relating to or resulting from the conduct of the official business of the Department.

(b) *Records pertaining to grants.* (1) Portions of funded grant applications and other supporting documents submitted by applicants which are not excepted from disclosure by this subpart. (2) Grant award documents.

(3) *All State plans, amendments, and supplements thereto, including applications for the waiver of any provision thereof.*

(c) *Contracts.* (1) Contract instruments.

(2) Portions of offers reflecting final prices submitted in negotiated procurements.

(d) *Reports on grantee, contractor, or provider performance.* Final reports of audits, surveys, reviews, or evaluations (excluding those which are subject to the provisions of 20 CFR Parts 401 and 422), by, for, or on behalf of the Department, of performance by any grantee, contractor, or provider under any departmentally financed or supported program or activity, which reports have been transmitted to the grantee, contractor, or provider. However, except as may be provided in 20 CFR, such reports will be available only after 14 days have elapsed following transmittal of the report to the grantee, contractor, or provider.

(e) *Research, development, and demonstration project records.* The final report of a grantee or a contractor of the performance under any research, development, or demonstration project. Records, other than reports, produced in such projects, such as films, computer software, other copyrightable materials and reports of inventions, will be available, except that considerations relating to obtaining copyright and patent protection may require delay in disclosure for such period as necessary to accomplish such protection. Disclosure of records which are copyrightable or which reflect patentable inventions shall not confer upon the requester any license under any copyright or patent without regard to the holder or owner thereof.

**§ 5.73 Records not available.**

The following types of records or information contained in any record, in addition to those prohibited by law from disclosure, are not available for inspection or copying, any provision of § 5.72 notwithstanding:

(a) *Intra-agency and inter-agency communications.* Communications within the Department, other than those described in § 5.72(d) or between the Department or any official of the Department and any other agency, department, or official of the executive branch of the Federal Government, to the extent they reflect the views or judgment of the writer or of other individuals. If disclosure of any factual portion of the communication would tend to indicate the views or judgment being withheld from disclosure, then such factual portions will also be withheld.

(b) *Investigatory files.* (1) Investigatory files compiled for law enforcement purposes in cases not yet closed. A file is closed within the meaning of this regulation when a final decision has been made not to take enforcement action or enforcement action has been taken and has been concluded. For the purpose of this section "enforcement action" means any authorized action intended to abate, prevent, counteract, deter, or terminate violations of law and includes action involving possible civil, criminal, or administrative sanctions, whether such sanctions involve adversary proceedings or other procedures, such as termination of benefits, protective measures, etc.

(2) Investigatory files compiled for law enforcement purposes in cases that

## PROPOSED RULE MAKING

have been closed, to the extent that disclosure of such files would tend to:

- (i) Identify informants;
- (ii) Name or otherwise identify, or make available statements with respect to, persons referred to in such file, so as unjustly to defame, embarrass, or prejudice such persons or their successors, affiliates, families, or descendants in their professional, commercial, occupational, community, or personal activities, or otherwise result in a clearly unwarranted invasion of personal privacy;
- (iii) Release trade secrets, commercial or financial information, personnel files or medical files; or
- (iv) Reveal policy recommendations, or other expression of views or opinions.

#### § 5.74 Further disclosure by agency head.

(a) The head of any operating agency, or the Assistant Secretary for Administration and Management with respect to documents in the possession of the Office of the Secretary, or the Assistant Secretary for Health with respect to documents of the three operating agencies comprising the Public Health Service, or the designee of either may in particular instances disclose documents or portions of documents described in § 5.73 if he determines that disclosure is in the public interest and is consistent with obligations of confidentiality and administrative necessity.

(b) In making such a determination, consideration may be given to the Department's responsibilities under law for dissemination to the public of information relating to public health, safety of products or services, education, and welfare.

(c) When such determination has been made, the particular document or portion of document to which it relates shall thereafter be available upon request for inspection and copying: *Provided however*, That use of nondiscloseable records or information from such records for authorized program purposes, including law enforcement purposes and litigation is not a disclosure within the meaning of this section.

#### § 5.82 By whom review is made.

(a) Request for review shall be addressed to the Assistant Secretary for Administration and Management, or his designee, with respect to records of the Office of the Secretary, to the Assistant Secretary for Health, or his designee, with respect to the records of the Food and Drug Administration, Health Services and Mental Health Administration, and National Institutes of Health, and to the head of the operating agency, or his designee, with respect to the records of the other operating agencies.

(b) The decision of the Assistant Secretary for Administration and Management or of the Assistant Secretary for Health, if adverse to the requester, shall be made only with the concurrence of the Assistant Secretary for Public Affairs.

The following are some examples of specific records (or specific information relating to personnel, programs, or activities of this Department) listed according to whether or not they are available upon request for inspection and copying.

APPENDIX	
GRANTS	
Generally Available <sup>1</sup>	Generally Not Available <sup>1</sup>
Name of grantee, date, subject matter, and amount of grant.	Research protocol, design, processing, and other technical information to the extent proprietary or of a confidential nature.
Fact sheet of funded grant application.	Confidential financial information of grantee.
Final report of grantee.	Raw research data and interim reports on research prior to submission of the final report.
Records of any funded grant other than research grants.	Research or research training grant application on which award is not made.

Final report of any review or evaluation of grantee performance conducted or caused to be conducted by the Department.

Application for demonstration, experimental, or pilot project under section 1115 of the Social Security Act.

State plan material.

CONTRACTS	
Name of contractor, subject matter, date, and amount of contract.	Trade secrets.
Contract performance review report.	Confidential pricing data contained in contract proposal if in the Department's judgment it is properly so designated by the offeror.
Deficiency report.	Proprietary technical data contained in a contract proposal if in the Department's judgment it is properly so designated by offeror.
Report on performance of providers of medical services.	Confidential financial information of contractor.
	Draft of proposed final report submitted for comment prior to acceptance.
	Research protocol, design, processing, and other technical information to the extent proprietary or of a confidential nature, including proprietary contents of unsolicited proposals.

ADVISORY COMMITTEES	
Name of committee.	Minutes or transcripts of committee meetings or portions thereof which are involved with matters exempt from mandatory disclosure under Freedom of Information Act.
Final report.	
Minutes or transcripts of meetings open to the public and not involved with matters exempt from disclosure under Freedom of Information Act.	

PERSONNEL INFORMATION	
Name of employee, title of position, and location of regular duty station.	Home addresses of employees.
Grade, position description, and salary of public employees.	

AFFIRMATIVE ACTION PLAN FILED PURSUANT TO EXECUTIVE ORDER 11246	
Approved action plan, including analysis, proposed remedial or affirmative steps to be taken with goals and timetables, policies on recruitment, hiring, and promotion, and description of grievance procedures.	

MISCELLANEOUS	
Names of individual beneficiaries of departmental programs or a list of the benefits they receive if release would be an unwarranted invasion of privacy.	
Earnings records, claims file, and other personal information maintained by or for the Social Security Administration.	
Office for Civil Rights investigatory files in open cases.	

[FR Doc.73-6145 Filed 3-29-73; 8:45 am]

<sup>1</sup> Since there may be unforeseen variations in the contents of documents in the examples given, or in the circumstances pertinent to the Government's activities concerning matters relating to such documents, these examples do not apply in each and every instance, and they do not override provisions of the regulation that may be applicable in a given case.

## DEPARTMENT OF TRANSPORTATION

## Coast Guard

[33 CFR Part 110]

[CGD 73-59 P]

## ANCHORAGE GROUNDS; BARBERS POINT, OAHU, HAWAII

## Pipeline Terminal Anchorage

This proposed amendment to 33 CFR 110.236 and 237 would create a new anchorage for barges and small tankers off Barber's Point, and would combine the two sections establishing the three existing tanker anchorages and nonanchorage off Barber's Point.

The Coast Guard finds good cause to follow only a 20 day public comment period and to eliminate the 30 day effective date of the regulation. This is because extensive contacts with the public have already occurred regarding the substantive change made by this proposal, and because the additional anchorages will ease overcrowding and enhance safety.

The proposed consolidation of 33 CFR 110.236 and 237 was publicized by the Commander, Fourteenth Coast Guard District, Honolulu, Hawaii, by a Public Notice 14-71-03 on December 22, 1971. All known interested persons were advised of the proposal. Copies of the notice were mailed to agencies of the Federal, State, and local governments as well as to Members of Congress, shipping and boating interests, newspapers and copies were posted at various post offices. One comment was received from the Standard Oil Company of California, Western Operations, recommending minor changes in the heading and wording in the regulations to permit the bunkering and watering of vessels occupying the anchorages. As these recommendations had merit, and would not affect the overall operations of the anchorages, the suggestions have been adopted and incorporated into the proposal.

The proposed establishment of an additional anchorage for barges and small tankers off Barber's Point (proposed below as 33 CFR 110.236(a)(7)) was promulgated by the Commander, Fourteenth Coast Guard District, by Public Notice 14-72-01 on July 17, 1972. All known interested persons were advised of the proposal. One response to the proposal was received from the Department of Parks and Recreation, city and county of Honolulu, Hawaii, objecting to the establishment of the anchorage because of a possible threat of pollution in the event of a leakage or spillage. Representatives of Conoco Dillingham Oil Co., met with the representatives of the Department of Parks and Recreation and explained the contents of the Oil Spill Contingency Plan and the Department of Parks and Recreation withdrew their objection.

The existing regulations contained in § 110.236 were published on May 11, 1960. Since that time numerous changes have occurred and some of the original regulations do not apply or are unnecessary.

## PROPOSED RULE MAKING

8277

These include provisions when the U.S. Navy is conducting mining exercises, periods of time when the anchorages will be occupied, reference to the restriction of prohibition on the operations of military aircraft in the vicinity of the anchorages, restriction to the use of "Butterworth" equipment, restrictions on the pumping of bilges, and the reference to the installation of mooring buoys. All of the above regulations are either outdated or redundant, and are omitted from this proposed consolidation of 33 CFR 110.236.

Interested persons may participate in this proposed rulemaking by submitting written data, views, or arguments to the Commander (mps), Fourteenth Coast Guard District, 677 Ala Moana, Honolulu, HI 96813. Each person submitting comments should include his name and address and give reasons for any recommended change in the proposal. Copies of all written communications received will be available for examination by interested persons at the Office of the Commander, Fourteenth Coast Guard District. The Commander, Fourteenth Coast Guard District, will forward any comments received before April 20, 1973, with his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, who will evaluate all communications received and take final action on this proposal. The proposal may be changed in light of the comments received.

If no substantive changes are warranted, the regulation will by a subsequent FEDERAL REGISTER document, be made effective upon publication of that document. The usual 30-day waiting period will not be used because the interest of safety requires that the creation of this anchorage be hastened.

In view of the foregoing, it is proposed that § 110.237 of 33 CFR Part 110 be revoked, and that § 110.236 of 33 CFR Part 110 be revised to read as follows:

§ 110.236 Pacific Ocean off Barber's Point, Island of Oahu, Hawaii: Off-shore pipeline terminal anchorages.

(a) *The anchorage grounds.* (1) *Anchorage A.* The waters within an area described as follows: A circle of 1,000-foot radius centered at latitude 21°17'55" N., longitude 158°07'46" W.

(2) *Nonanchorage Area A.* The waters extending 300 feet on either side of a line bearing 059° from Anchorage A to the shoreline at latitude 21°18'22" N., longitude 158°06'57" W.

(3) *Anchorage B.* The waters enclosed by a line beginning at latitude 21°16'31.5" N., longitude 158°05'09.0" W.; thence to latitude 21°16'03.9" N., longitude 158°05'16.9" W.; thence to latitude 21°16'11.1" N., longitude 158°05'45.8" W.; thence to latitude 21°16'38.8" N., longitude 158°05'37.9" W.; thence to the point of beginning.

(4) *Nonanchorage Area B.* The waters extending 300 feet on either side of a line bearing 334.5° from Anchorage B to the shoreline at latitude 21°17'50.5" N., longitude 158°06'13.1" W.

(5) *Anchorage C.* The waters enclosed by a line beginning at latitude 21°16'58" N., longitude 158°04'39" W.; thence to latitude 21°16'58" N., longitude 158°04'12" W.; thence to latitude 21°16'44" N., longitude 158°04'12" W.; thence to latitude 21°16'44" N., longitude 158°04'39" W.; thence to the point of beginning.

(6) *Nonanchorage Area C.* The waters extending 300 feet on either side of a line bearing 306° from Anchorage C to the shoreline at latitude 21°17'54.9" N., longitude 158°06'07.8" W.

(7) *Anchorage D.* The waters enclosed by a line beginning at latitude 21°18'00" N., longitude 158°07'20" W.; thence to latitude 21°17'56" N., longitude 158°07'16" W.; thence to latitude 21°17'49" N., longitude 158°07'24" W.; thence to latitude 21°17'53" N., longitude 158°07'28" W.; thence to the point of beginning.

(b) *The regulations.* (1) No vessels may anchor, moor, or navigate in Anchorages A, B, C, or D except—

(i) Vessels using the anchorages and their related pipelines for loading or unloading;

(ii) Commercial tugs, lighters, barges, launches, or other vessels engaged in servicing the anchorage facilities or vessels using them;

(iii) Public vessel of the United States.

(2) When vessels are conducting loading or unloading operations as indicated by the display of a red flag (International Code Flag "B") at the masthead, passing vessels of over 100 gross tons shall not approach within 1,000 yards at a speed in excess of 6 knots.

(3) The owner of any vessel wanting to use an anchorage ground and use of the related pipeline facilities shall notify the Captain of the Port, Honolulu, Hawaii, and the Commanding Officer, U.S. Naval Air Station, Barber's Point, Hawaii, at least 25 hours in advance of desired occupancy of the anchorage ground by the vessel. Such notification must include the maximum height above the waterline of the uppermost portion of the vessel's mast and a description of the masts' lighting including height of the highest anchor light and any aircraft warning lights to be displayed by the vessel at night.

(4) When, in the opinion of the Captain of the Port, or his authorized representative, oil transfer operations within these anchorages could jeopardize the safety of vessels or facilities in the area, or cause an undue risk of oil pollution, such oil transfer operations shall be immediately terminated until such time as the cognizant Coast Guard officer determines that the danger has subsided.

(5) Nonanchorage Areas A, B, and C are established for the protection of submerged pipelines. Except for vessels servicing pipeline facilities, no anchoring, dragging, seining, or other potential pipeline fouling activities are permitted within these areas.

8279

(6) Nothing in this section shall be construed as relieving the owner or person in charge of any vessel from complying with the rules of the road and safe navigation practice.

(7) The regulations of this section are enforced by the Captain of the Port or his duly authorized representative.

(Sec. 7, 38 Stat. 1053, as amended; sec. 6(g) (1) (A), 80 Stat. 937; 33 U.S.C. 471, 49 U.S.C. 1655(g) (1) (A); 49 CFR 1.46(c) (1), 33 CFR 1.05-1(c) (1))

Dated: March 27, 1973.

W. M. BENKERT,  
Rear Admiral, U.S. Coast Guard,  
Chief, Office of Marine En-  
vironment and Systems.

#### Federal Aviation Administration

##### [14 CFR Part 71]

[Airspace Docket No. 73-RM-9]

#### TRANSITION AREA

##### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the description of the Minot, N. Dak., transition area.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, CO 80207. All communications received on or before April 25, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, CO 80010.

An extension to the southeast of the existing 700-foot transition area is necessary in order to provide additional controlled airspace for the protection of aircraft executing the proposed ILS Runway 30 instrument approach procedure for the Minot International Airport, Minot, N. Dak.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (38 FR 435), the description of the Minot, N. Dak., transition area is amended to read in part:

MINOT, N. DAK.

In the description of the 700-foot transition area, delete "within 5 miles each side

of the Minot VORTAC 120° radial extending from the 10-mile radius to 12 miles south-east of the VORTAC", and insert "and within 4 miles each side of the Minot VORTAC 138° radial extending from the 10-mile radius area to 15.5 miles southeast of the VORTAC."

This amendment is proposed under authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Aurora, Colo., on March 21, 1973.

M. M. MARTIN,  
Director, Rocky Mountain Region.

[FR Doc 73-6062 Filed 3-29-73; 8:45 am]

#### [14 CFR Part 71]

[Airspace Docket No. 73-SO-9]

#### VOR FEDERAL AIRWAY

##### Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter Federal Airway No. 159 and revoke 159W between Ocala, Fla., and Greenville, Fla.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320. All communications received on or before April 30, 1973, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

Victor Airway No. 159, as aligned, transits Moody 2 Intensive Student Jet Training Area (ISJTA), which extends from 10,000 to 18,000 feet m.s.l. Moody AFB was the sole user of this airspace.

Recently, an agreement was executed with NAS Cecil and NAS Jacksonville to share Moody 2 ISJTA. Navy training activities include acrobatic maneuvers requiring descent below 10,000 feet. Airway V-159 prevents acrobatic maneuvers, thus adversely affecting the Navy training mission. We have encouraged military sharing of airspace in the interest of more efficient utilization.

The distance between Ocala and Greenville via Gainesville, Fla., or via Cross City is identical (119 NM); therefore, no additional burden would be imposed on the flying public operating between Ocala and Greenville.

To accommodate traffic to and from the Gainesville area from the northwest,

a Part 95 route would be established between Gainesville and Greenville. This off-airway route would be used when training activity is not being conducted in the Moody 2 ISJTA.

The proposed amendment would realign V-159 from Ocala, Fla., via Cross City, Fla., via Greenville, Fla., and also revoke V-159W between Ocala and Greenville.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on March 23, 1973.

CHARLES H. NEWPOL,  
Acting Chief, Airspace and  
Air Traffic Rules Division.

#### COST ACCOUNTING STANDARDS BOARD

##### [4 CFR Part 405]

#### ACCOUNTING FOR UNALLOWABLE COSTS

##### Proposed Cost Accounting Standard

Notice is hereby given of a proposed cost accounting standard on accounting for unallowable costs which the Cost Accounting Standards Board is considering for promulgation to implement further the requirements of section 719 of the Defense Production Act of 1950, as amended, Public Law 91-379, 50 U.S.C. App. 2168. When promulgated, the standard will be used by all relevant Federal agencies and national defense contractors and subcontractors.

The proposed standard, if adopted, will be one of a series of cost accounting standards which the Board is promulgating "to achieve uniformity and consistency in the cost-accounting principles followed by defense contractors and subcontractors under Federal contracts." (See section 719(g) of the Defense Production Act of 1950, as amended.) It is anticipated that any contractor receiving an award of a contract on or after the effective date of this standard will be required to follow it as of the date of such award.

The Cost Accounting Standards Board solicits comments on the proposed cost accounting standard from any interested person on any matter which will assist the Board in its consideration of the proposal.

Interested persons should submit written data, views, and arguments concerning the proposed cost accounting standard to the Cost Accounting Standards Board, 441 G Street NW., Washington, DC 20548.

To be given consideration by the Board in its determination relative to final promulgation of the cost accounting standard covered by this notice, written submissions must be made to arrive no later than Friday, June 1, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Board's offices during regular business hours.

#### PART 405—COST ACCOUNTING STANDARD—ACCOUNTING FOR UNALLOWABLE COSTS

Sec.	
405.10	General applicability.
405.20	Purpose.
405.30	Definitions.
405.40	Fundamental requirement.
405.50	Techniques for application.
405.60	Illustrations.
405.70	Exemptions.

AUTHORITY: Public Law 91-379, 84 Stat. 796 (50 U.S.C. App. 2168).

##### § 405.10 General applicability.

This standard shall be used by defense contractors and subcontractors under Federal contracts entered into after the effective date hereof, and by all relevant Federal agencies, in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and subcontract national defense procurements with the United States in excess of \$100,000, other than contracts or subcontracts where the price negotiated is based on (a) established catalog or market prices of commercial items sold in substantial quantities to the general public, or (b) prices set by law or regulation.

##### § 405.20 Purpose.

(a) The purpose of this cost accounting standard is to facilitate contract negotiation, audit, administration, and settlement of prime contracts and subcontracts by establishing guidelines covering:

(1) Identification by contractors of specific costs which are unallowable, at the time such costs first become defined as unallowable; and (2) the cost accounting treatment to be accorded such identified costs.

(b) This standard is predicated on the concept that certain costs, which are a constituent part of a contractor's total costs incurred in carrying out his activities, are not allowable under Government contracts, but nevertheless are allocable to the particular cost pools/cost objectives with which they are identified.

(c) Coverage of this standard does not encompass determination of the particular categories or types of costs which are to be defined as unallowable, a function of the appropriate procurement authority.

##### § 405.30 Definitions.

(a) The following are definitions of terms prominent in this standard:

(1) *Allocate*. To assign an item of cost, or a group of items of cost, to one or more cost objectives. This term includes both direct assignment of cost and the reassignment of a share from an indirect cost pool.

(2) *Directly associated cost*. Any cost which is generated solely as a result of the incurring of another cost and which would not have been incurred had the other cost not been incurred.

(3) *Indirect cost*. Any cost not directly identified with a single final cost objective, but identified with two or more final

cost objectives or with at least one intermediate cost objective.

(4) *Unallowable cost*. Any cost item(s), or the total costs of any organizational activity, which because of applicable laws, regulations, and/or contractual agreements cannot be included as costs used for pricing, billing, or settlement of a particular prime contract or subcontract.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable to this standard: None.

##### § 405.40 Fundamental requirement.

(a) Contractors shall identify any costs which are patently unallowable under the specific provisions of applicable laws, regulations, or the terms and conditions of a contract. Contractors shall also identify, from the date of agreement or decision, any specific costs which become designated as unallowable as a result either of mutual agreement or a final decision of the contracting officer issued pursuant to contract disputes procedures. Such identification will be reflected in any proposals, billings, or claims involving cost recovery; identification for interim indirect billing rates need not be made except at the time such rates are established or revised.

(b) The contractor's accounting records shall provide an appropriate detail and depth of cost accounting treatment (see § 405.50(b) below) for any unallowable costs which are identified pursuant to the requirements of paragraph (a) of this section.

(c) Unallowable costs shall include directly associated costs, and shall remain subject to the same cost accounting requirements for cost determination as allowable costs. In circumstances where these costs, apart from considerations of allowability, would be a part of a contractor's regular indirect cost allocation base(s), they shall remain as a part of such base(s) and have allocated thereto their full pro rata share of the allocable indirect costs, including general and administrative costs. Where directly associated costs, or any part of the total unallowable costs of an organizational activity, are also part of an indirect expense pool which will be allocated over a base that includes the related unallowable cost(s), they shall be retained in the indirect expense pool and allocated through the normal indirect expense allocation process in lieu of being included directly.

##### § 405.50 Techniques for application.

(a) Costs which have specifically been identified as unallowable in accordance with § 405.40(a) shall be clearly designated as direct or indirect costs allocable to the specific cost objectives to which they would normally be related, apart from considerations of allowability. This accounting distinction shall be maintained in any subsequent estimating, accumulating, or reporting of costs which include the identified costs or other costs incurred for the same purpose in like circumstances.

(b) The detail and depth of cost accounting treatment required of a contractor as backup support for proposals, billings, or claims, shall be the minimum necessary to establish and maintain visibility as to the following:

(1) The amount and nature of the costs which have been identified as unallowable, and

(2) The accounting treatment which has been accorded such costs.

(c) The visibility requirement of paragraph (b) of this section, for actual costs, may be satisfied by the contractor through segregation of unallowable costs in separate accounts maintained for this purpose in the regular books of account, through development and maintenance of separate accounting records or worksheets, or through use of any other accounting technique which establishes and maintains adequate cost identification. The visibility requirement for estimated costs may be satisfied either (1) by designation and description (in backup data, workpapers, etc.) of the amounts and types of any unallowable costs which the contractor has identified and excluded in making the estimates, or (2) by description of any equivalent means employed by the contractor to insure that the estimates do not include such costs without appropriate identification thereof.

(d) Where any work project is undertaken which is related to performance of a proposed or existing contract(s), but which is not contractually authorized and is therefore excluded from contract cost/price coverage by statute, regulation, or contract, the costs of such work project shall, to the extent appropriate, be accounted for separately from those of authorized work projects. The costs of such noncovered work projects shall be subject to the same cost accounting principles as would apply to authorized work performed under like circumstances.

(e) Where the total of the allocable and otherwise allowable costs exceeds a limitation-of-cost or ceiling-price provision in a contract, full direct and indirect cost allocation shall be made to the contract cost objective, in accordance with established cost accounting practices and standards which regularly govern a given contractor's allocations to cost objectives for purposes of Government contract pricing, billing, and settlement. The overrun amount is identifiable in terms of the excess of allowable costs, rather than through specific identification of particular cost items or cost elements.

(f) Separate accounting for unallowable costs is not required in circumstances where the low incidence of negotiated Government contracts relative to other types of work warrants the conclusion that the purposes of the standard can be satisfied through negotiation and prior agreement on the basis of past experience or other reliable indicators.

## § 405.60 Illustrations.

(a) An auditor recommends disallowance of certain direct labor and direct material costs, for which a claim for payment has been submitted under a contract, on the basis that these particular costs were not required for performance and were not authorized by the contract. The contracting officer issues a final decision which supports the auditor's position that the questioned costs are unallowable. Following the contracting officer's final decision, the contractor must separately identify the disallowed direct labor and direct material costs in his accounting records, and must allocate thereto the full pro rata share of any indirect cost pool(s) for which the contractor's base for allocation consists of direct labor (dollars or hours), direct material, total prime cost, total cost input, etc. He must thereafter clearly identify these direct and indirect cost totals in any subsequent claim.

(b) A contractor incurs, and separately identifies, as a part of his manufacturing overhead, certain costs which are patently unallowable under the existing and currently effective agency regulations. If the contractor is claiming a share of his manufacturing overhead as a contract cost, he must also separately identify any directly associated costs in his accounting records and reports covering his manufacturing overhead pool. Also, if manufacturing overhead is regularly a part of his base for allocation of general and administrative (G&A) or other indirect expenses, the contractor must allocate the G&A or other indirect expenses over a base which includes the identified unallowable costs.

(c) The entire salary and wage costs of certain indirect labor personnel included by a contractor in his G&A expense pool are designated as unallowable by a final decision of the contracting officer. G&A expenses are not part of any base used by the contractor for allocation of other indirect expenses. In this situation, labor fringe benefit costs attributable to the unallowable salary and wage costs constitute one example of directly associated costs which shall be included as part of the contractor's unallowable costs.

(d) The president, general counsel, and the head of the engineering department of a contractor travel to participate in the prosecution of a contract disputes clause claim against the Government. Their corporate duties involve all facets of the company's overall operation. Under pertinent Government regulations, the costs of prosecuting such claims are unallowable costs, and the contractor agrees that these costs are, in fact, unallowable. The salaries and travel costs of the first two officials are charged regularly as general and administrative (G&A) expenses, while those of the head of the engineering department are charged as departmental overhead. G&A

expenses are not part of any indirect cost allocation base; engineering department overhead, however, is regularly included in the base for allocation of G&A. Under these circumstances, the travel and subsistence expenses of all three contractor officials would constitute directly associated costs, to be included with other unallowable costs of prosecuting the contractor's claim. Also, the travel and subsistence costs of the head of the engineering department would be accounted for as engineering department overhead costs for purposes of their inclusion in the contractor's base for G&A allocation. Because the salary costs of the officials involved in this example were not generated solely as a result of the unallowable claim cost activity, but rather constituted indirect expenses which would have been incurred in any event, no part of such salaries is considered as directly associated costs of the unallowable claim prosecution costs.

(e) An auditor recommends disallowance of the total direct and indirect costs attributable to an organizational planning activity, including a pro rata share of utility costs and space costs devoted to this activity. The contractor claims that these costs are allowable under the Armed Services procurement regulation as "Economic Planning Costs" (ASPR 15-205.47); the auditor contends that they constitute "Organization Costs" (ASPR 15-205.23) and therefore are unallowable. The issue is referred to the contracting officer for resolution pursuant to the contract disputes clause. The contracting officer issues a final decision supporting the auditor's position that the total costs questioned are unallowable under the regulation. Following the contracting officer's final decision, the contractor must identify the disallowed costs or other costs incurred for the same purpose in like circumstances in any subsequent estimating, cost accumulation or reporting for Government contracts, in which such costs are included.

(f) An official of a company, whose salary, travel, and subsistence expenses are charged regularly as general and administrative (G&A) expenses, takes several business associates on what is clearly a business entertainment trip. The cost of such trips is patently unallowable because it constitutes entertainment expense and is separately identified by the contractor. The contractor does not regularly include his G&A expenses in any indirect expense allocation base. In these circumstances, the official's travel and subsistence expenses would be directly associated costs for identification with the unallowable entertainment expense. However, unless this type of activity constituted a significant part of the official's regular duties and responsibilities on which his salary was based, no part of the official's salary would be required to be identified as a directly associated cost of the unallowable entertainment expense.

## § 405.70 Exemptions.

None for this standard.

**Effective date.** The effective date of this standard is (reserved).

ARTHUR SCHOENHAUT,  
Executive Secretary.

[FR Doc 73-6310 Filed 3-29-73; 10:18 am]

## FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 19712; FCC 73-322]

## RADIO BROADCAST SERVICES

## Frequency Monitors and Maintenance of Operating Frequency of Stations

In the matter of amendments of §§ 73.40, 73.49, 73.60, 73.63, 73.69, 73.113, 73.114, 73.252, 73.255, 73.283, 73.284, 73.295, 73.297, 73.317, 73.330, 73.331, 73.552, 73.555, 73.583, 73.584, 73.595, 73.596, 73.638, 73.672, 73.687, 73.690, 73.692, and 73.693 of the rules, concerning frequency monitors and the maintenance of the operating frequency of stations, Docket No. 19712.

1. In its continuing study concerning reorganization of the broadcasting services the Commission has under consideration amendment of its rules to delete: (1) The requirement that standard (AM) and FM broadcasting stations have in operation a type-approved frequency monitor; (2) the requirement that television stations perform daily frequency checks; and (3) the requirement that SCA subcarrier and stereo pilot subcarrier frequency checks be made daily.

2. Consistent with the Commission's effort to up-date its rules to reflect current technology, we note that present state-of-the-art of automatic frequency control of transmitters provides an inherent stability which substantially exceeds that required by our rules. Relating this observation to the requirement that each AM and FM station have in operation an approved frequency monitor, a valid question is raised regarding the need for this requirement.

3. The Commission recognizes that there are a number of transmitters in use today which do not incorporate features representing current state-of-the-art technology. Even so, performance of such transmitters must be in compliance with all pertinent Commission rules. Accordingly, the operating frequency of all broadcast transmitters must be maintained within prescribed tolerances and rule amendments proposed herein will not relieve the licensee of this responsibility. Adoption of the proposed rules will merely delete the requirement that frequency be monitored continuously, or in the case of television, that it be checked daily. In lieu thereof, we would require, as a minimum, a monthly measurement of the actual transmitter frequency.

4. In making this proposal the Commission is adopting the position that licensees using transmitters with automatic frequency control systems which perform

reliably and do indeed maintain frequency within prescribed tolerances will find it adequate to measure the actual transmitter frequency once each month. Other licensees who may experience some difficulty in maintaining frequency within tolerance will be expected to make frequency measurements more often. The ultimate responsibility for proper performance rests with the licensee and he must expect to be held strictly accountable for operation not in compliance with Commission rules.

5. In developing this proposal we have examined existing rules which relate to the subject of this proceeding and feel that it will be helpful to explain our position regarding particular rules or requirements, and our treatment of them, which may raise questions. Specifically, we are deleting rules for AM, FM, and TV which specify requirements for type approval of frequency monitors. In doing so, we take the position that, if approved frequency monitors are not required, proper performance of such devices will be a matter of concern solely between manufacturers and users. We have also examined our application forms and take the position that it is unnecessary to change them at this time. Those sections of the form which refer to frequency monitors will no longer be applicable. At such time as the Commission's reorganization study undertakes an overall examination of application forms all appropriate changes will be considered and hopefully accomplished in a single exercise.

6. In the matter of SCA subcarrier and stereo pilot subcarrier frequencies, existing rules specify tolerances allowed and require frequency checks as often as necessary to insure operation within tolerance. The proposal herein would delete the requirement which calls for making and logging daily frequency checks. In lieu thereof, we would require that these subcarrier frequencies be measured at least once each month and appropriate log entries be made at that time. We wish to emphasize again that this relaxation concerning daily frequency checks continues unaltered the licensee's ultimate responsibility for proper operation at all times and he must expect to be held strictly accountable for operation not in compliance with Commission rules.

7. Set out in the appendix are the specific rule amendments being proposed. The Commission solicits comments from interested parties on all aspects of this proposal. Pursuant to § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before May 3, 1973, and reply comments on or before May 14, 1973. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. In reaching its decision in this matter, the Commission may take into account any relevant information before it in addition to the specific comments received.

8. In accordance with the provisions of § 1.419 of the Commission's rules and

regulations, an original and 14 copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

9. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C. (1919 M Street NW).

10. Authority for the action proposed herein is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

Adopted: March 21, 1973.

Released: March 26, 1973.

FEDERAL COMMUNICATIONS COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

1. Section 73.40(a) (10) is amended to read as follows:

§ 73.40 Transmitter; design, construction, and safety of life requirements.

(a) . . . .

(10) Means are provided for connection and continuous operation of an approved modulation monitor.

. . . . .

§ 73.49 [Deleted]

2. Section 73.49 is deleted.

3. Section 73.60 is amended to read as follows:

§ 73.60 Frequency measurements.

(a) The carrier frequency of the transmitter shall be accurately measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements be more than 1 month.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of stations WWV, WWVB, WWVH, and WWVL of the National Bureau of Standards.

4. Section 73.63 is amended by adding a new paragraph (g) and redesignating existing paragraphs (g) and (h) as (f) and (i) respectively, and as amended, reads as follows:

§ 73.63 Auxiliary transmitter.

(g) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 1 month, the interval between successive measurements shall not exceed 1 month.

(h) The authorized antenna input power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the

actual operating power is not limited to 105 percent of the authorized antenna input power of the auxiliary transmitter but shall in no event exceed the authorized antenna input power produced by the regular transmitter.

(i) All regulations as to safety requirements and spurious emissions applying to broadcast transmitting equipment shall apply also to an auxiliary transmitter.

5. Section 73.89 is amended to delete the reference to frequency monitors, and as amended reads as follows:

§ 73.89 Use of modulation monitors at auxiliary transmitters.

(a) The following shall govern the installation of approved modulation monitors at auxiliary transmitters:

(1) Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two (2) calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter. The monitor, if taken from the main transmitter, shall be reinstalled at the main transmitter immediately upon resumption of operation of the main transmitter.

(2) In all cases where the auxiliary transmitter and the main transmitter have the same location, the same modulation monitor may be used for monitoring both transmitters, provided the installation permits ready switching from one transmitter to the other.

6. Section 73.113 is amended by deleting paragraph (a) (1) (iv) (B) thereunder and redesignating paragraph (a) (1) (iv) (C) as paragraph (a) (1) (iv) (B) and, as amended, reads as follows:

§ 73.113 Operating log.

(a) . . . .  
(1) . . . .  
(iv) . . . .

(B) Antenna current on remote antenna current (for nondirectional operation); common point current or remote common point current (for directional operation).

7. Sections 73.114(a) (1) (iii) and (a) (2) (i), (ii), (iii), (iv), (v), and (vi) are amended to read as follows:

§ 73.114 Maintenance log.

(a) . . . .  
(1) . . . .

(iii) A notation of all frequency measurements, including date performed and description of method used.

(2) . . . .

(i) Modulation monitor.  
(ii) Final stage plate voltmeter.  
(iii) Final stage plate ammeter.  
(iv) Base current ammeter(s).  
(v) Common point ammeter.

## PROPOSED RULE MAKING

(vi) Antenna monitor.

8. Section 73.252 is amended to read as follows:

**§ 73.252 Frequency measurements.**

(a) The carrier frequency of the transmitter shall be measured as often as is necessary to insure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements be more than 1 month.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Stations WWV, WWVB, WWVH, and WWVL of the National Bureau of Standards.

9. Section 73.255 is amended by adding a new paragraph (f) and redesignating existing paragraph (f) as paragraph (g), and as amended reads as follows:

**§ 73.255 Auxiliary transmitter.**

(f) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 1 month, the interval between successive measurements shall not exceed 1 month.

(g) The authorized operating power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall in no event exceed the authorized operating power of the regular transmitter.

10. Section 73.283 is amended by deleting paragraphs (a) (3) (iii) and (a) (6) thereunder, and, as amended, reads as follows:

**§ 73.283 Operating log.**

(a) . . . .

(3) . . . .

(i) Operating constants of last radio stage (total plate voltage and plate current).

(ii) RF transmission line meter reading, except when power is being determined by the indirect method.

(iii) [Deleted]

(6) [Deleted]

11. Sections 73.284(a) (2) and (a) (4) (i), (ii), (iii), and (iv) are amended to read as follows:

**§ 73.284 Maintenance log.**

(a) . . . .

(2) A notation of all frequency measurements, including date performed and description of method used.

(4) . . . .

(i) Modulation monitor.

(ii) Final stage plate voltmeter.

(iii) Final stage plate ammeter.

(iv) Transmission line radio frequency voltage, current, or power meter.

12. Section 73.295 is amended by deleting paragraph (f) (5), adding a new paragraph (g), redesignating existing paragraphs (g)-(i) and amending (i), and as amended reads as follows:

**§ 73.295 Operating under Subsidiary Communications Authorizations.**

(f) . . . .

(5) [Deleted]

(g) Each licensee or permittee shall determine the frequency of each SCA subcarrier at least once each month and shall make an entry in the station maintenance log, showing results obtained and describing method employed.

(h) Program and operating logs for SCA operation may be kept on special columns provided on the station's regular program and operating log sheets.

(i) Technical standards governing SCA operation (§ 73.319) shall be observed by all FM broadcasting stations engaging in such operation.

(j) The frequency of each SCA subcarrier shall be measured as often as necessary to ensure that it is kept at all times within 500 Hz of the authorized frequency. The choice of method of performing the frequency measurement is left to the discretion of the licensee. However, whatever method is used shall be capable of sufficient accuracy to reveal deviations of the operating frequency in excess of the 500 Hz tolerance.

13. Section 73.297 is amended by revising paragraph (b) and adding a new paragraph (c), and as amended reads as follows:

**§ 73.297 Stereophonic broadcasting.**

(b) The pilot subcarrier frequency shall be measured as often as necessary to insure that it is kept at all times within the prescribed tolerance. The choice of method of performing the frequency measurement is left to the discretion of the licensee. However, whatever method is used shall be capable of sufficient accuracy to reveal deviations of the pilot subcarrier frequency in excess of the prescribed 2 Hz tolerance.

(c) Each licensee or permittee engaging in stereophonic broadcasting shall measure the pilot subcarrier frequency at least once each month and shall make an entry in the station maintenance log, showing results obtained and describing method employed.

14. Section 73.317 is amended by revising paragraphs (a) (10) and (c) (5), and as amended reads as follows:

**§ 73.317 Transmitters and associated equipment.**

(a) . . . .

(10) Means should be provided for connection and continuous operation of an approved modulation monitor.

(c) . . . .

(5) The modulation monitor and radio frequency lines to the transmitter shall be thoroughly shielded.

15. Section 73.330 is amended to delete the reference to frequency monitors, and as amended reads as follows:

**§ 73.330 Use of modulation monitors at auxiliary transmitters.**

(a) The following shall govern the installation of approved modulation monitors at auxiliary transmitters:

(1) Installation of an approved modulation monitor at the location of the auxiliary transmitter, when different from that of the main transmitter, is optional with the licensee. However, when it is necessary to operate the auxiliary transmitter beyond two (2) calendar days, a modulation monitor shall be installed and operated at the auxiliary transmitter. The monitor, if taken from the main transmitter, shall be reinstalled at the main transmitter immediately upon resumption of operation of the main transmitter.

(2) In all cases where the auxiliary transmitter and the main transmitter have the same location, the same modulation monitor may be used for monitoring both transmitters: *Provided*, The installation permits ready switching from one transmitter to the other.

**§ 73.331 [Deleted]**

16. Section 73.331 is deleted.

17. Section 73.552 is amended to read as follows:

**§ 73.552 Frequency measurements.**

(a) The carrier frequency of transmitters licensed for transmitter power output greater than 10 w. shall be measured as often as necessary to insure that it is maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements be more than 1 month.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Stations WWV, WWVB, WWVH, and WWVL of the National Bureau of Standards.

(c) The licensee of each noncommercial educational FM broadcast station licensed for transmitter power output of 10 W or less shall provide for the measurement of the station frequency by a means independent of the frequency control of the transmitter. The station frequency shall be measured (1) when the transmitter is initially installed, (2) at any time the frequency determining elements are changed, and (3) at any time the licensee may have reason to believe the frequency has shifted beyond the tolerance specified by the Commission's rules.

18. Section 73.555 is amended by adding a new paragraph (f) and redesignating existing paragraph (f) as paragraph (g), and as amended, reads as follows:

**§ 73.555 Auxiliary transmitter.**

(f) The carrier frequency of the auxiliary transmitter shall be measured as often as is necessary to ensure that it is maintained within the prescribed tolerance. If the transmitter is used daily for a period of more than 1 month, the interval between successive measurements shall not exceed 1 month.

(g) The authorized operating power of an auxiliary transmitter may be less, but not more, than that of the regular transmitter. If it is less, the actual operating power is not limited to 105 percent of the authorized operating power of the auxiliary transmitter, but shall in no event exceed the authorized operating power of the regular transmitter.

19. Section 73.583 is amended by deleting paragraphs (a) (3) (iii) and (a) (6) thereunder, and, as amended, reads as follows:

**§ 73.583 Operating log.**

(a) . . . .

(3) . . . .

(i) Operating constants of last radio stage (total plate voltage and plate current).

(ii) RF transmission line meter reading, except when power is being determined by the indirect method.

(iii) [Deleted]

(6) [Deleted]

20. Sections 73.584 (a) (2) and (a) (4) are amended to read as follows:

**§ 73.584 Maintenance log.**

(a) . . . .

(2) A notation of all frequency measurements, including date performed and description of method used.

(4) . . . .

(i) Modulation monitor.

(ii) Final stage plate voltmeter.

(iii) Final stage plate ammeter.

(iv) Transmission line radiofrequency voltage, current, or power meter.

21. Section 73.595 is amended by deleting paragraph (f) (5), adding a new paragraph (g), redesignating existing paragraphs (g)-(i) and amending (i), and as amended reads as follows:

**§ 73.595 Operating under subsidiary communications authorizations.**

(f) . . . .

(5) [Deleted]

(g) Each licensee or permittee shall determine the frequency of each SCA subcarrier at least once each month and shall make an entry in the station main-

## PROPOSED RULE MAKING

tenance log, showing results obtained and describing method employed.

(h) Program and operating logs for SCA operation may be kept on special columns provided on the station's regular program and operating log sheets.

(i) Technical standards governing SCA operation (§ 73.319) shall be observed by all FM broadcasting stations engaging in such operation.

(j) The frequency of each SCA subcarrier shall be measured as often as necessary to insure that it is kept at all times within 500 Hz of the authorized frequency. The choice of method of performing the frequency measurement is left to the discretion of the licensee. However, whatever method is used shall be capable of sufficient accuracy to reveal deviations of the operating frequency in excess of the 500 Hz tolerance.

22. Section 73.596 is amended by revising paragraph (b) and adding a new paragraph (c), and as amended reads as follows:

**§ 73.596 Stereophonic broadcasting.**

(b) The pilot subcarrier frequency shall be measured as often as necessary to insure that it is kept at all times within the prescribed tolerance. The choice of method of performing the frequency measurement is left to the discretion of the licensee. However, whatever method is used shall be capable of sufficient accuracy to reveal deviations of the pilot subcarrier frequency in excess of the prescribed 2 Hz tolerance.

(c) Each licensee or permittee engaging in stereophonic broadcasting shall measure the pilot subcarrier frequency at least once each month and shall make an entry in the station maintenance log, showing results obtained and describing method employed.

23. Section 73.638 is amended by adding a new paragraph (f) and redesignating existing paragraph (f) as paragraph (g) and as amended reads as follows:

**§ 73.638 Auxiliary transmitter.**

(f) The visual carrier frequency of an auxiliary transmitter and the difference between the visual carrier frequency and the center frequency of the auxiliary aural transmitter shall be measured as often as is necessary to ensure that they are maintained within the prescribed tolerance. If the transmitters are used daily for a period of more than 1 month, the interval between successive measurements shall not exceed 1 month.

(g) The operating power of auxiliary transmitters may be less than the authorized power of the main transmitters, but in no event shall it be greater than such power.

24. Section 73.672(a) (3) is amended by deleting paragraph (1) and incorporating (1) within subparagraph (3). As amended § 73.672(a) (3) will read as follows:

**§ 73.672 Maintenance log.**

(a) . . . .

(3) An entry whenever the frequency measurement required by § 73.690(a) is made, including the date performed and description of method used.

25. § 73.687 paragraph (e) (5) is amended to read as follows:

**§ 73.687 Transmitters and associated equipment.**

(e) . . . .

(5) The modulation monitors and radio frequency lines to the transmitters shall be thoroughly shielded.

26. Section 73.690 is amended by deleting paragraphs (a) and (b) and redesignating paragraphs (c) and (d) as (a) and (b). As amended § 73.690 will read as follows:

**§ 73.690 Frequency measurements.**

(a) The visual carrier frequency and the difference between the visual carrier frequency and the center frequency of the aural transmitter shall be measured as often as necessary to ensure that they are maintained within the prescribed tolerance. However, in no event shall the interval between successive measurements be more than 1 month.

(b) The primary standard of frequency for radio frequency measurements shall be the national standard of frequency maintained by the National Bureau of Standards, Department of Commerce, Washington, D.C. The operating frequency of all radio stations will be determined by comparison with this standard or the standard signals of Stations WWV, WWVB, WWVH, and WWVL of the National Bureau of Standards.

27. Section 73.692 is amended to delete the reference to frequency monitors and by revising the section title and paragraphs (a) and (b). As amended it will read as follows:

**§ 73.692 General requirements for type approval of modulation monitors.**

(a) A manufacturer desiring to submit a monitor for type approval shall supply the Commission with full specification details (two sworn copies) as well as the test data specified in § 73.694. If this information appears to meet the requirements of the rules shipping instructions will be issued to the manufacturer. The shipping charges to and from the laboratory at Laurel, Md., shall be paid for by the manufacturer. Approval of a monitor will only be given on the basis of the data obtained from the sample monitor submitted to the Commission for test.

(b) In approving a monitor upon the basis of tests conducted by the Laboratory, the Commission merely recognizes

that the type of monitor has the inherent capability of functioning in compliance with the rules. If properly constructed, maintained, and operated.

**§ 73.693 [Deleted]**

28. Section 73.693 is deleted.

**[ 47 CFR Part 87 ]**

[Docket No. 19699]

**AVIATION SERVICES**

**Notification Procedures of Aircraft Operating Under Fleet License; Correction**

In the matter of amendment to Part 87 of the rules to provide for procedures to notify the Commission of the aircraft operating under a fleet license, Docket No. 19699.

In the notice of proposed rulemaking released March 3, 1973 (FCC 73-253; 38 FR 7402), some editorial errors of omission make it difficult to determine which aircraft are excluded from the proposed new notification procedure. The intention of paragraph (b) of the proposed new § 87.140 is to exclude aircraft which are identified solely by company radiotelephony designator and flight number because there is no problem in determining current owner or operator. In order that this intent be fully understood, it is necessary that the proposed subparagraph be changed to read:

(b) The notification procedure set forth in subparagraph (2) of this paragraph, does not apply to any aircraft station which will be identified solely by a radiotelephony designator in accordance with § 87.115(e) (1) (ii).

An additional 10 days for the filing of comments and reply comments is granted. The new dates for interested parties to file comments are April 30, 1973, and reply comments May 10, 1973.

Released: March 26, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc 73-6136 Filed 3-29-73; 8:45 am]

**VETERANS ADMINISTRATION**

**[ 38 CFR Part 3 ]**

**AUTOMOBILES OR OTHER CONVEYANCES**

**Proposed Regulatory Development**

The Administrator of Veterans Affairs proposes a regulatory revision reflecting a policy change in providing financial assistance to veterans in purchasing automobiles or other conveyances under authority of Chapter 39, title 38, United States Code. Section 1902(a) of that chapter provides that the Administrator will pay the total purchase price or \$2,800 whichever is lesser. "Total purchase price" has been construed to mean the basic price of the vehicle exclusive of taxes. Under this interpretation, when the basic price of the vehicle is less than the statutory allowance of \$2,800, only the basic price is payable by the Veterans

**PROPOSED RULE MAKING**

Administration and the veteran is required to pay any State or local sales or excise taxes even though the total amount payable may not equal or exceed \$2,800. This regulatory change recognizes that, insofar as it affects the veteran, "total purchase price" includes all charges involved in the purchase and should be so construed. Under this construction, charges for State and local taxes may be included in the amount payable by the Veterans Administration up to a maximum of \$2,800. To effect this change, it is proposed to amend Part 3, title 38, Code of Federal Regulations, as set forth below.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (232H), Veterans Administration, Central Office, 810 Vermont Avenue NW, Washington, DC 20420. All relevant material received before April 30, 1973, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in Room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office and will be furnished the address of the above room number.

Notice is also given that it is proposed to make this regulatory change effective the date of final approval.

In § 3.808, the portion preceding paragraph (a) is amended to read as follows:

**§ 3.808 Automobiles or other conveyances; certification.**

A certification of eligibility for financial assistance in the purchase of one automobile or other conveyance in an amount not exceeding \$2,800 (including State and/or local taxes where such are applicable and included in the purchase price) and of basic entitlement to necessary adaptive equipment will be made where the claimant meets the requirements of paragraphs (a), (b), and (c) of this section. State and local taxes may be included only when the sales agreement is signed by seller and claimant on or after \_\_\_\_\_, 1973.

Approved: March 25, 1973.

By direction of the Administrator.

[SEAL] FRED B. RHODES,  
Deputy Administrator.

[FR Doc 73-6148 Filed 3-29-73; 8:45 am]

**[ 38 CFR Part 21 ]**

**VETERAN-STUDENT SERVICES**

**Proposed Regulatory Development**

The following changes, implementing a provision of Public Law 92-540 (86 Stat. 1074), provide for a veteran-student

services benefit in addition to the allowance the veteran receives under the Veterans Administration Vocational Rehabilitation program or under the GI bill.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (232H), Veterans Administration, 810 Vermont Avenue NW, Washington, DC 20420. All relevant material received before April 30, 1973, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting central office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in Room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in central office and furnished the address and the above room number.

Notice is also given that it is proposed to make any regulations that are adopted effective October 24, 1972, as provided in Public Law 92-540.

It is proposed to amend Subparts A and D to read as follows:

**Subpart A—Vocational Rehabilitation Under 38 U.S.C. Chapter 31**

1. Section 21.145 is added to read as follows:

**§ 21.145 Veteran-student services.**

(a) *Eligibility.* Veteran-students who are pursuing full-time programs of education or training under chapter 31 are eligible to receive a work-study allowance. This allowance will be paid in advance in the amount of \$250 in return for the veteran-student's agreement to perform services totaling 100 hours during an enrollment period. Advances of lesser amounts may be made in return for agreements to perform services for periods of less than 100 hours.

(b) *Selection criteria.* Whenever feasible, veteran-students with disabilities rated at 30 percent or more are to be given priority in selection for this allowance. In addition the following selection criteria should be considered:

- (1) Need of the veteran to augment his subsistence allowance;
  - (2) Availability to the veteran of transportation to the place where his services are to be performed;
  - (3) Motivation of the veteran; and
  - (4) Compatibility of the work assignment to the veteran's physical condition.
- (c) *Utilization.* Veteran-student services may be utilized in connection with:
- (1) Outreach services program as carried out under the supervision of a Veterans Administration employee;
  - (2) Preparation and processing of necessary papers and other documents at educational institutions or regional offices or facilities of the Veterans Administration;

(3) Hospital and domiciliary care and medical treatment at Veterans Administration facilities; and

(4) Any other appropriate activity of the Veterans Administration.

**PROPOSED RULE MAKING**

(3) Hospital and domiciliary care and medical treatment at Veterans Administration facilities; and

(4) Any other appropriate activity of the Veterans Administration.

(d) *Employment limitation.* Total veteran-student services under either Chapter 31 or Chapter 34 are limited to 800 man-years or their equivalent in man-hours during any fiscal year. A survey of each regional office will be conducted annually to determine the number of veteran-students whose services can be effectively utilized.

**Subpart D—Administration of Educational Benefits; 38 U.S.C. Chapters 34, 35, and 36**

2. Section 21.4145 is added to read as follows:

**§ 21.4145 Veteran-student services.**

(a) *Eligibility.* Veteran-students who are pursuing full-time programs of education or training under Chapter 34 are eligible to receive a work-study allowance. This allowance will be paid in advance in the amount of \$250 in return

for the veteran-student's agreement to perform services totaling 100 hours during an enrollment period. Advances of lesser amounts may be made in return for agreements to perform services for periods of less than 100 hours.

(b) *Selection criteria.* Whenever feasible, veteran-students with disabilities rated at 30 percent or more are to be given priority in selection for this allowance. In addition the following selection criteria should be considered:

- (1) Need of the veteran to augment his subsistence allowance;
- (2) Availability to the veteran of transportation to the place where his services are to be performed;
- (3) Motivation of the veteran; and
- (4) Compatibility of the work assignment to the veteran's physical condition.

(c) *Utilization.* Veteran-student services may be utilized in connection with:

- (1) Outreach services program as carried out under the supervision of a Veterans Administration employee;

(2) Preparation and processing of necessary papers and other documents at educational institutions or regional offices or facilities of the Veterans Administration;

(3) Hospital and domiciliary care and medical treatment at Veterans Administration facilities; and

(4) Any other appropriate activity of the Veterans Administration.

(d) *Employment limitation.* Total veteran-student services under either Chapter 31 or Chapter 34 are limited to 800 man-years or their equivalent in man-hours during any fiscal year. A survey of each regional office will be conducted annually to determine the number of veteran-students whose services can be effectively utilized.

Approved: March 25, 1973.

By direction of the Administrator.

[SEAL] FRED B. RHODES,  
Deputy Administrator.

[FR Doc 73-6147 Filed 3-29-73; 8:45 am]

2. For households with monthly income of \$600 or more, use the following formula:

For each \$30 worth of monthly income (or portions thereof) over \$599.99, add \$4 to the monthly purchase requirement shown for an eight-person household with an income of \$599.99.

3. To obtain maximum monthly purchase requirements for households of more than eight persons, add \$12 for each person over eight to the maximum purchase requirement shown for an eight-person household.

**Effective date.** The provisions of this notice shall become effective on July 1, 1973.

CLAYTON YEUTTER,  
Assistant Secretary.

#### Forest Service

#### HOOSIER NATIONAL FOREST Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Off-Road Vehicle Policy on the Hoosier National Forest, USDA-FS-DES(Adm.) 73-51.

This draft environmental statement proposes a policy to permit and regulate the use of off-road motor vehicles on the Hoosier National Forest. The policy will divide the forest into two different type zones. The use of motor vehicles off the public roads will be permitted on designated trails on part of the forest (57,500 acres) and will be prohibited on the remainder of the forest (105,600 acres). This policy does not affect ORV use on private lands within the Hoosier National Forest located in southern Indiana.

This draft environmental statement was filed with CEQ on March 14, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3230, 12th Street and Independence Avenue SW., Washington, DC 20250.

USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, WI 53203.

USDA, Forest Service, Wayne-Hoosier National Forests, 1615 J Street, Bedford, IN 47421.

A limited number of single copies are available upon request to the Forest Supervisor, Wayne-Hoosier National Forests, 1615 J Street, Bedford, IN 47421.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines.

Comments are invited from the public and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Donald S. Gorton, Forest Supervisor, Wayne-Hoosier National Forests, 1615 J Street, Bedford, IN 47421. Comments must be received by April 27, 1973, in order to be considered in the preparation of the final environmental statement.

ADRIAN M. GILBERT,  
Acting Deputy Chief,  
Forest Service.

#### Packers and Stockyards Administration CLEBURNE COUNTY LIVESTOCK AUCTION SALE ET AL.

##### Depositing of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., name, location of stockyard, and date of posting

AR-119 Cleburne County Livestock Auction Sale, Heber Springs, Ark., Feb. 17, 1959.

IN-124 Middletown Sale Barn, Middletown, Ind., Nov. 4, 1959.

MS-149 Columbus Stockyard, Inc., Columbus, Miss., Aug. 1, 1972.

NB-157 Neligh Livestock, Inc., Neligh, Neb., Apr. 21, 1959.

OH-130 Producers Livestock Association, Marion, Ohio, Feb. 5, 1934.

TX-130 Caldwell Livestock Commission Company, Inc., Caldwell, Tex., Mar. 6, 1959.

WV-112 Union Livestock Sales Co., Inc., Parkersburg, W. Va., Nov. 5, 1959.

Notice or other public procedure has not preceded promulgation of the foregoing rule. There is no legal justification for not promptly depositing a stockyard which is no longer within the definition of that term contained in the Act.

The foregoing is in the nature of a rule relieving a restriction and may be made effective in less than 30 days after publication in the FEDERAL REGISTER. This notice shall become effective March 30, 1973.

(42 Stat. 159, as amended and supplemented; 7 U.S.C. 181 et seq.)

Done at Washington, D.C., this 26th day of March 1973.

EDWARD L. THOMPSON,  
Chief, Registrations, Bonds, and  
Reports Branch, Livestock  
Marketing Division.

[FR Doc. 73-6186 Filed 3-29-73; 8:45 am]

#### CLEBURNE COUNTY LIVESTOCK AUCTION SALE ET AL.

##### Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyard Administration, U.S. Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

AR-148 Cleburne County Livestock Auction Sale, Heber Springs, Ark.

GA-176 Tri-County Feeder Pig Sales, Broxton, Ga.

GA-177 Longhorn Livestock Auction, Inc., Poulan, Ga.

IA-247 Decorah Sales Commission, Decorah, Iowa.

NC-142 Albermarle Marketing Association, Inc., Edenton, N.C.

SC-126 Greer Livestock Company, Greer, S.C.

TX-303 Caldwell Livestock Commission Company, Inc., Caldwell, Tex.

WA-127 Puget Sound Horse and Mule Auction, Olympia, Wash.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 26th day of March 1973.

EDWARD L. THOMPSON,  
Chief, Registrations, Bonds,  
and Reports Branch, Live-  
stock Marketing Division.

#### Soil Conservation Service

#### SOWASHEE CREEK WATERSHED PROJECT Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Soil Conservation Service, U.S. Department of Agriculture, has prepared a draft environmental statement for the Sowashsee Creek Watershed Project, Lauderdale County, Miss., USDA-SCS-ES-WS-(ADM)-73-1(D).

The environmental statement concerns a plan for watershed protection, flood prevention, and recreation. The planned works of improvement include conservation land treatment, supplemented by 13 floodwater retarding structures, one multiple purpose structure for floodwater retardation and recreation, basic facilities and about 54.2 miles of channel modification.

Copies of the draft environmental statement are available during regular working hours at the following locations:

Soil Conservation Service, USDA, South Agriculture Building, Room 5227, 14th and Independence Avenue SW., Washington, D.C. 20250.

Soil Conservation Service, USDA, Room 502, Milner Building, 310 South Lamar Street, Jackson, MS 39201.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151. Please use name and number of statement above when ordering. The estimated cost is \$3.50.

Copies of the draft environmental statement have been sent for comment to various Federal, State, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having

knowledge of or special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to William L. Heard, State Conservationist, Soil Conservation Service, P.O. Box 610, Jackson, MS 39205.

Comments must be received on or before May 25, 1973, in order to be considered in the final environmental statement.

Dated: March 26, 1973.

WM. B. DAVEY,  
Deputy Administrator for Wa-  
tersheds, Soil Conservation  
Service.

#### DEPARTMENT OF COMMERCE

##### Maritime Administration

[Docket No. S-339]

#### AMERICAN STEAMSHIP CO.

##### Notice of Application for Operating- Differential Subsidy

Notice is hereby given that American Steamship Co. has filed an application dated March 5, 1973, under the Merchant Marine Act of 1936, as amended, for extension of its Operating-Differential Subsidy Agreement, Contract No. MA/MSB-137 for a 2-year period beyond the close of the 1973 season. Inasmuch as American Steamship Co. and related companies, own and/or operate U.S.-flag bulk cargo vessels which are employed in the domestic Great Lakes service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for American Steamship Co. if its application for extension of operating-differential subsidy is granted.

American Steamship Co. and its subsidiary or affiliated companies own or operate a total of 20 U.S.-flag vessels. American Steamship Co., accordingly, requests permission in its operating-differential subsidy contract for the transportation of bulk cargoes within the area of the Great Lakes with free interchange of the vessels in that domestic trade.

As information, the following U.S.-flag bulk cargo vessels are owned, managed, or operated by American Steamship Co., its subsidiaries or affiliates:

Adam E. Cornelius, Jr.	Harris N. Snyder, United States Gypsum.
John J. Boland.	Ben W. Calvin.
Detroit Edison.	Richard J. Reiss.
H. Lee White.	Charles C. West.
John T. Hutchinson.	John A. Kling.
Consumers Power.	Peter Reiss.
Diamond Alkali.	Nicolet.
Joseph S. Young.	J. F. Schoellkopf, Jr.
J. F. Schoellkopf, Jr.	Hennepin.
Fred A. Manske.	McKee Sons.

Interested parties may inspect this application in the Office of the Secretary, Maritime Administration, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20235.

Any person, firm, or corporation having any interest (within the meaning of

section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning the application must by close of business on April 10, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for 10 a.m. on April 12, 1973, in Room 4896, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20235. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal services, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

By order of the Maritime Administration.

Dated: March 27, 1973.

JAMES S. DAWSON, JR.,  
Secretary.

#### Social and Economic Statistics Administration

#### CENSUS ADVISORY COMMITTEE ON STATE AND LOCAL GOVERNMENTS STATISTICS

##### Notice of Meeting

The Census Advisory Committee on State and Local Government Statistics will convene on April 13, 1973, at 9:30 a.m. The Committee will meet in Room 2113, Federal Building 3, at the Bureau of the Census in Suitland, Md.

The Census Advisory Committee on State and Local Governments Statistics was established in October 1948 to advise the Director, Bureau of the Census, on planning current work and various censuses of Governments, and to advise on where the needs of users of the statistics could be served better.

The Committee is composed of 10 members appointed by the Secretary of Commerce, and five members appointed by the organization they represent.

The agenda for the meeting is: (1) Revenue Sharing Program, (2) discussion of current surveys, and (3) status of the 1972 Census of Governments.

A limited number of seats—approximately 15—will be available to the public. A brief period will be set aside for public comment and questions. Extensive questions or statements must be

submitted in writing to the Committee Guidance and Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting should contact Mr. Curtis Hill, Division Chief, Governments Division, Bureau of the Census, Federal Building 3, Suitland, Md. (Mail address: Washington, D.C. Telephone 301-763-5203.)

Dated: March 26, 1973.

JOSEPH R. WRIGHT, JR.,  
Acting Administrator, Social  
and Economic Statistics Ad-  
ministration.

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

[DESI's 5378, 5504; Dockets Nos. FDC-D-582, FDC-D-587; NDA's 9-946, etc., 5-674, 5-757]

### AMPHETAMINES FOR HUMAN USE

#### Notice of Withdrawal of Approval of New Drug Applications

In the FEDERAL REGISTER of February 12, 1973 (38 FR 4249), the Commissioner of Food and Drugs revised § 130.46 of Part 130, Subpart A concerning amphetamines (amphetamine, dextroamphetamine, and their salts, and levamphetamine and its salts) for human use. That revision became effective March 14, 1973.

When published in the FEDERAL REGISTER on August 8, 1970 (35 FR 12652), § 130.46 permitted continued marketing of these amphetamines based upon receipt of a new drug application. In response to that regulation, 106 new drug applications were received and continued marketing of those products was permitted pending their detailed review in conjunction with a review of all anorectic drugs and consideration of any issues they presented.

Also published in the FEDERAL REGISTER on February 12, 1973 were notices of opportunity for a hearing to withdraw approval of all previously approved new drug applications providing for anorectic drugs in combination with other ingredients such as sedatives, tranquilizers, rauwolfia derivatives, or vitamins (38 FR 4279) and for parenteral methamphetamine hydrochloride (38 FR 4282). Thirty days were allowed for holders of the new drug applications or any interested person who manufactures or distributes a drug similar, related, or identical to a drug provided for in the approved new drug applications to file a written appearance requesting a hearing and giving the reasons why new drug application approval should not be withdrawn, together with a well-organized and full-

## NOTICES

factual analysis of the clinical and other investigational data they were prepared to prove in support of their opposition.

In accordance with the decision announced with the revision of § 130.46 published in the FEDERAL REGISTER of February 12, 1973 (38 FR 4249), each of the new drug applications providing for a combination anorectic drug for oral administration or for parenteral methamphetamine hydrochloride, whether submitted pursuant to § 130.46 or the subject of a previous approval, has been the subject of a notice of opportunity for hearing, either in a letter mailed to the firm or through notice in the FEDERAL REGISTER, or both.

Pursuant to those notices, requests for hearings have been received with respect to the following combination drugs:

NDA No.	Drug	NDA holder
11-322	Obetrol 10 and Obetrol 20 tablets, containing methamphetamine saccharate, methamphetamine hydrochloride, and dextroamphetamine sulfate.	Obetrol Pharmaceuticals, Division of Baxa Pharmaceutical Corp., 382 Schenck Ave., Brooklyn, NY 11207.
12-042	Fskatrol Spansules (sustained release capsules), containing dextroamphetamine sulfate and pseudoephedrine (as the maleate).	Smith Kline & French Laboratories, 1500 Spring Garden St., Philadelphia, PA 19101.
12-070	Banadex Sequels (sustained release capsules), containing dextroamphetamine sulfate and meprobamate.	Lederle Laboratories Division, American Cyanamid Co., P.O. Box 500, Pearl River, NY 10965.
	Dexamyl Tablets, Dexamyl Spansules (No. 1) (sustained release capsules), and Dexamyl Spansules (No. 2) (sustained release capsules), containing amphetamine and dextroamphetamine sulfate.	Smith Kline & French Laboratories.
	Delobase Tablets, Delobase Sustained Release Capsules, and Delobase Sustained Release Capsules, containing dextroamphetamine sulfate, methamphetamine hydrochloride, methamphetamine adipate, and methamphetamine sulfate.	Deleo Chemical Co., Inc., 7 MacQuesten Parkway North, Mount Vernon, NY 10550.

The products specifically named above may continue to be marketed pending a ruling on the requests for hearing.

Also, pursuant to the notice of opportunity for hearing for parenteral methamphetamine hydrochloride proposing to withdraw approval on the grounds that the drug is not shown to be safe,

a request for hearing was received from Merle Diment, M.D. pertaining to all such products. Included in the request were the writer's opinion concerning the effectiveness of parenteral amphetamines in improving the mental status and well being of patients in their toleration of, and recovery from, anesthetic procedures, and his statements taking exception to the Commissioner's conclusion that the well-documented history of abuse of this dosage form, the severe risk of dependence, and the availability of effective, alternative drugs constitute lack of proof of safety. The contentions of Dr. Diment have been considered and the Commissioner of Food and Drugs concludes that there is no genuine and substantial issue of fact requiring a hearing. No charge was made in the notice of opportunity for hearing that parenteral methamphetamine hydrochloride lacks substantial evidence of effectiveness; rather, the notice stated that such products were considered effective. However, the use for which Dr. Diment recommends continued availability of the drugs has not been approved in the new drug applications, and no substantial evidence to support such use accompanied the request. His comments concerning safety of the drug and espousing a principle that allows continued availability notwithstanding the known potential for misuse and abuse are testimonial at best and do not comprise adequate proof of safety. Thus, based on the information before him and a review of the statements made by Dr. Diment to support his contention that approval of the new drug applications should not be withdrawn, the Commissioner finds that there has been a failure to present adequate evidence of safety for parenteral methamphetamine hydrochloride and the request for a hearing is denied.

Comments were received from two physicians, Dr. William K. Hamilton, Professor and Chairman, Department of Anesthesia, School of Medicine, University of California, San Francisco, and Dr. Jack Moyers, Chief of Anesthesia, Professor and Head of Department of Anesthesia, University of Iowa, both objecting to the removal of a useful drug from the market because of its use and abuse for nontherapeutic purposes. No data accompanied the responses.

In response to the notices of opportunity for hearing published in the FEDERAL REGISTER of February 12, 1973 (38 FR 4279 and 4282), none of the holders of the following new drug applications named in those notices have filed a written appearance of election as provided by said notice. The failure to file such an appearance constitutes an election by such persons not to avail themselves of the opportunity for a hearing:

NDA No.	Drug	NDA holder
9-946	Du-Orla tablets, containing methamphetamine hydrochloride and reserpine.	Formerly marketed by B. F. Ascher & Co., Inc., P.O. Box 87, Kansas City, MO 64130.
10-207	Doxerpine "50" tablets, containing dextroamphetamine sulfate and reserpine.	Formerly marketed by Nyco Laboratories, Inc., 34-24 Vernon Boulevard, Long Island City, NY 11106.
11-280	Banadex tablets, containing dextroamphetamine sulfate and meprobamate.	Lederle Laboratories Division, American Cyanamid Co., P.O. Box 500, Pearl River, NY 10965.
11-538	Ruphetamine-T "125" capsules and Ruphetamine-T "250" capsules, containing dextroamphetamine, amphetamine, and methamphetamine, all as cation exchange resin complexes of sulfonated polystyrene.	Straenburgh Pharmaceuticals, Division of Pennwalt Corp., 755 Jefferson Rd., Rochester, NY 14623.
12-127	Appetrol tablets, containing dextroamphetamine sulfate and meprobamate.	Wallace Pharmaceuticals, Division of Carter Wallace, Inc., Half Acre Rd., Cranbury, NJ 08512.
12-371	Trol-Vite capsules, containing phenylalanine hydrochloride, vitamin A, vitamin D, thiamine mononitrate, riboflavin, niacinamide, calcium pantothenate, pyridoxine hydrochloride, cobalamin concentrate, ascorbic acid, iron, calcium, phosphorus, iodine, and copper.	Formerly marketed by Geigy Pharmaceuticals, Division of Ciba Geigy Co., Saw Mill River Rd., Ardsley, NY 10502.
12-415	Delobase Sustained Release Tablets (sustained release tablets), containing d-methamphetamine hydrochloride and amobarbital.	Eastern Research Laboratories, Inc., 302 South Central Ave., Baltimore, MD 21202.
12-624	Appetrol-S.R. (sustained release capsules), containing dextroamphetamine sulfate and meprobamate.	Wallace Pharmaceuticals.
5-674	Methedrine Injection, containing methamphetamine hydrochloride.	Formerly marketed by Burroughs Wellcome & Co., Inc., 300 Cornwell Rd., Research Triangle Park, NC 27709.
5-757	Drinalta Injection, containing methamphetamine hydrochloride.	E. R. Squibb & Sons, Georges Rd., New Brunswick, NJ 08903.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug applications reviewed and are subject to this notice. See 21 CFR 130.40 (37 FR 23185, Oct. 31, 1972). Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

The Commissioner of Food and Drugs, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1053, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to him (21 CFR 2.120) finds on the basis of new information before him, evaluated together with the evidence available to him at time of approval of the applications that, with respect to

## NOTICES

the above-listed combination preparations for which no hearing was requested: (1) there is a lack of substantial evidence that the drugs will have all the effects they purport or are represented to have; and (2) the drugs are not shown to be safe for use under the conditions of use prescribed, recommended, or suggested in their labeling; and with respect to the parenteral drug products containing methamphetamine hydrochloride, such products are not shown to be safe for use under the conditions of use prescribed, recommended, or suggested in their labeling.

Therefore, pursuant to foregoing findings, approval of the above new drug applications (except for those for which a request for hearing was received), and all amendments and supplements applying thereto, is withdrawn effective on March 30, 1973. Shipment in interstate commerce of any combination drug product other than those few listed above that may continue to be marketed pending a ruling on the request for a hearing, or of any parenteral amphetamine product (e.g., amphetamine, dextroamphetamine, levamphetamine, or methamphetamine) is henceforth unlawful.

Dated: March 28, 1973.

WILLIAM F. RANDOLF,  
Acting Associate Commissioner  
for Compliance.

## NATIONAL ADVISORY COMMITTEES

### Notice of Meetings

The Acting Administrator, Health Services and Mental Health Administration, announces the meeting dates and other required information for the following National Advisory bodies scheduled to assemble during the month of April 1973:

Committee name	Date, time, place	Type of meeting and/or contact person
National Migrant Health Advisory Committee	Apr. 11-13, 9 a.m., Parklawn Bldg., Conference Room L, 5600 Fishers Lane, Rockville, Md.	Open-Contact Bully M. Sandlin, Parklawn Bldg., Room 6-37, 5600 Fishers Lane, Rockville, Md. Code 301-443-2250

Purpose: The committee is charged with advising the Administrator on national policies and priorities; program guidelines, standards, and evaluation techniques; and other crucial issues relating to the migrant health program.

Agenda: The committee will consider the program's legislative authority, hospitalization policy, and new models of care for migrant and seasonal farmworkers.

Committee name	Date, time, place	Type of meeting and/or contact person
Long Term Care for the Elderly Research Review and Advisory Committee	Apr. 23-24, 9 a.m., Parklawn Bldg., Conference Room G, 5600 Fishers Lane, Rockville, Md.	Closed-Contact Elliott Lesser, Parklawn Bldg., Room 15-29, 5600 Fishers Lane, Rockville, Md. Code 301-443-2950

Purpose: The committee is charged with the review of research grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research and Development relating to research on long-term care, including research approaches for studying and improving the delivery of care in nursing homes and other long-term care facilities and for identifying alternatives to institutional care.

Agenda: The committee will be performing review of grant applications for Federal assistance and will not be open to the public. In accordance with the determination by the Acting Administrator, Health Services and Mental Health Administration, pursuant to Public Law 92-463, section 10(d).

Committee name	Date, time, place	Type of meeting and/or contact person
Loan Guarantees Programs in Health Advisory Committee	Apr. 26, 9 a.m., New York Room, Statler-Hilton Hotel, 16th and K Sts., N.W., Washington, D.C.	Open—Contact Rosemary J. Jackson, Parklawn Bldg., Room 9-06, 5000 Fishers Lane, Rockville, Md. Code 301-443-1920.

**Purpose:** The major objective of this committee is to advise the Administrator, Health Services and Mental Health Administration, on developing marketing procedures, pricing estimation and practices for Department of Health, Education, and Welfare issues, federally backed securities and various alternatives available in the administration of the loan program vis-a-vis the private financial community.

**Agenda:** The committee will advise on implementation of the provisions of Title II, Public Law 91-296, "Loan Guarantee and Loans for Modernization and Construction of Hospitals and Other Medical Facilities."

Committee name	Date, time, place	Type of meeting and/or contact person
Health Services Development Grants Study Section	Apr. 26, 27, 8:30 a.m., Parklawn Bldg., Conference Room C, 5000 Fishers Lane, Rockville, Md. Code 301-443-290.	Closed—Contact David McFall, Parklawn Bldg., Room 15-29, 5000 Fishers Lane, Rockville, Md. Code 301-443-290.

**Purpose:** The study section is charged with the initial review of developmental grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research and Development.

**Agenda:** The study section will be performing initial review of grant applications for Federal assistance and will not be open to the public, in accordance with the determination by the Acting Administrator, Health Services and Mental Health Administration, pursuant to Public Law 92-463, section 10(d).

Agenda items are subject to change as priorities dictate.

A roster of members and other relevant information regarding open sessions may be obtained from the contact persons listed above.

Dated: March 22, 1973.

ANDREW J. CARDINAL,  
Acting Associate Administrator  
for Management, Health Services  
and Mental Health Administration.

### ATOMIC ENERGY COMMISSION

#### SPECIAL NUCLEAR MATERIAL

#### Modification of Leasing Policy

The Atomic Energy Commission hereby gives notice that effective June 30, 1973, it will modify its policy of leasing special

nuclear material to both domestic and foreign customers. No special nuclear material will thereafter be furnished on a lease basis except as hereinafter provided.

As exceptions to the foregoing policy, leasing of special nuclear material will be permitted in the following situations:

1. For use by certain domestic lessees participating in the power demonstration program who are exempt from the statutory prohibitions on leasing for power reactor use;

2. To further AEC's programmatic objectives when such objectives can best be achieved through lease arrangements;

3. In the supply of relatively scarce material which, because of its scarcity or unique properties, the AEC deems to have returned for subsequent use;

4. For use by other Government agencies.

Existing leases (other than those with section 103 and section 104b licensees) may, at the lessee's option, be extended to December 31, 1974, by which date the lessee must obtain title to the material through an in-situ enriching services arrangement, direct purchase or other mechanism, or return the material in accordance with the provisions of the lease.

Dated at Germantown, Md., this 26th day of March 1973.

PAUL C. BENDER,  
Secretary of the Commission.

[Docket No. 50-423]

### MILLSTONE POINT CO., ET AL.

#### Receipt of Application for Construction Permit and Facility License and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matters

The Millstone Point Co.; the Connecticut Light and Power Co.; the Hartford Electric Light Co.; Western Massachusetts Electric Co.; New England Power Co.; the United Illuminating Co.; Public Service Company of New Hampshire; Central Vermont Public Service Corp.; Vermont Electric Power Corp.; city of Burlington, Vt.; Green Mountain Power Corp.; Montauk Electric Co.; Fitchburg Gas and Electric Light Co.; Chicopee; Massachusetts Municipal Lighting Plant; town of South Hadley Electric Light Department, Westfield; Massachusetts Gas and Electric Light Department, Peabody; Massachusetts Municipal Light Plant, North Attleborough; Massachusetts Electric Department, Boylston; Massachusetts Municipal Lighting Plant, West Boylston; Massachusetts Municipal Lighting Plant, Wakefield; Massachusetts Municipal Light Department, Shrewsbury; Massachusetts Light Plant, Paxton; Massachusetts Municipal Light Department, Middleton; Massachusetts Municipal Light Department, Ashburnham; Massachusetts Municipal Lighting Plant, Templeton; Massachusetts Municipal Lighting Plant, and Marblehead; Massachusetts Municipal Light Department (the applicants), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, have filed an application, which was docketed February 10, 1972, for authorization to construct and operate a pressurized water nuclear reactor at its site, located in the town of Waterford, New London County, Conn. The site consists of 500 acres of land, and is located on the north shore of Long Island Sound approximately 3 miles from New London, Conn., and 40 miles southeast of Hartford, Conn.

The proposed nuclear facility, designated by the applicants as Millstone Nuclear Power Station, Unit 3, is designed for initial operation at approximately 3,425 megawatts (thermal) with a net electrical output of approximately 1,156 megawatts.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the Commission by May 22, 1973.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20545, and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. 06385.

The applicants have also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10

CFR Part 50, a report entitled, "Environmental Report—Construction Permit Stage," dated February 7, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed construction of the Millstone Nuclear Power Station, Unit 3, is also being made available at the Office of State Planning, Department of Finance and Control, 340 Capitol Avenue, Hartford, CT 06115, and at the Southeastern Connecticut Regional Planning Agency, 139 Boswell Avenue, Norwich, CT 06360.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement related to the proposed action will be prepared by the Commission.

Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement. The summary notice will request comments from interested persons on the proposed action and on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Md., this 15th day of March 1973.

For the Atomic Energy Commission.

D. B. VASSALLO,  
Chief, Pressurized Water Reactors Branch No. 1 Directorate of Licensing.

### PHILADELPHIA ELECTRIC CO.

#### Supplementary Notice of Hearing on Application for Construction Permits

On December 3, 1971, a notice of hearing on Application for Construction Permits was published by the Atomic Energy Commission (the Commission) in the FEDERAL REGISTER (36 FR 23087) in the captioned proceeding. That notice indicated that an Atomic Safety and Licensing Board (Board) would be designated by the Commission to conduct the hearing, specified the issues to be determined by the Board, provided an opportunity to intervene with respect to the issues specified in such notice to persons whose interests may be affected by the proceeding, and provided an opportunity to make limited appearances to other persons who wished to make a statement in the proceeding but who did not wish to intervene. That notice also indicated that the Commission would give further public notice regarding hearing consideration of the matters covered by the Commission's regulations in 10 CFR Part 50, Appendix D, "Implementation of the National Environmental Policy Act of 1969".

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50, (1) determine whether the requirements of section 102 (2) (C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied

Notice is hereby given, pursuant to 10 CFR Part 2, rules of practice, and Appendix D of 10 CFR Part 50, "Licensing of Production and Utilization Facilities," that in the conduct of the captioned proceeding, the Atomic Safety and Licensing Board will, in addition to considering and determining the issues pertaining to radiological health and safety and the common defense and security specified for hearing in the notice of hearing in this proceeding published on December 3, 1971, consider and make determinations, pursuant to the National Environmental Policy Act of 1969, on the following issue:

Whether, in accordance with the requirements of Appendix D of 10 CFR Part 50, the construction permits should be issued as proposed.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 2.4(n), the Board will determine whether the review conducted by the Commission pursuant to NEPA has been adequate. In the event that this proceeding is not contested, the Board will convene a prehearing conference of the parties within sixty (60) days after this notice of hearing or such time as may be appropriate, at a time and place to be set by the Board. It will also set the schedule for the evidentiary hearing on the issue covered by this supplementary notice. Notice of the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

In the event that this proceeding is or becomes a contested proceeding, the Board will consider and decide, as issues in this proceeding, the issue above as a basis for determining whether the construction permits should be issued to the applicant.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, with respect to said issue, or their counsel, to be held on or before May 29, 1973, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any special prehearing conference and within sixty (60) days after discovery has been completed, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.752.

Notices of the dates and places of the special prehearing conference, the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50, (1) determine whether the requirements of section 102 (2) (C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied

with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine whether the construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

This supplementary notice does not affect the status of any person previously admitted as a party to this proceeding with respect to, or provide an additional opportunity to any person to intervene on the basis of, or to raise matters encompassed within, the issues pertaining to radiological health and safety and the common defense and security specified for hearing in the above-referenced notice of hearing published December 3, 1971.

For further details, see the applicant's Environmental Report (Revised) dated May 1972 and Supplements 1 and 2 thereto dated August 11 and September 18, 1972, respectively, and the AEC Draft Environmental Statement dated December 1972, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20545, between the hours of 8:30 a.m. and 5 p.m. on weekdays. Copies of these documents are also available at the Pottstown Public Library, 500 High Street, Pottstown, PA 19464, for inspection by members of the public between the hours of 10 a.m. and 9 p.m. Monday through Friday and 10 a.m. and 5 p.m. on Saturday. Transcripts of the prehearing conferences and of the hearing are also available at the above locations. As they become available, a copy of the Commission's final environmental statement and other relevant documents will also be available at the above locations. Copies of the Commission's final environmental statement may be obtained, when available, by request to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Any person who does not wish to, or is not qualified to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may only make an oral or written statement on the record, and may not participate in the proceeding in any other way. Limited appearances will be permitted at the time of the hearing in the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, not later than April 29, 1973.

A person permitted to make a limited appearance does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of the hearing as specified in the issues set out above.

Any person whose interest may be affected by the proceeding, who does not wish to make a limited appearance and who wishes to participate as a party in the proceeding with respect to the issue set forth in this notice must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714.

A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A petition for leave to intervene must be filed with the Office of the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or the Commission's Public Document Room, 1717 H Street NW., Washington, DC, not later than April 29, 1973.

A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR 2.714(a)(1)-(4) and 2.714(d).

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene and have all the rights of the applicant to participate fully in the conduct of the hearing, such as the examination and cross-examination of witnesses, with respect to their contentions related to the matters at issue in the proceeding.

The presiding Board has previously admitted certain parties as intervenors to this proceeding with respect to the issues set forth in the notice of hearing published December 3, 1971. Such persons need not again specify contentions relating to their interest and right to be made a party to the proceeding, but shall set forth their other contentions in the same manner and with the same particularity as is required for other persons filing a petition for leave to intervene in accordance with this supplementary notice. Such contentions shall

be filed within the time period provided by this supplementary notice for the filing of a petition for leave to intervene.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicant not later than April 19, 1973.

Papers required to be filed in the proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street NW., Washington, DC. A copy of the petition or request for a limited appearance should also be sent to the Chief Hearing Counsel, Office of the General Counsel, U.S. Atomic Energy Commission, Washington, D.C. 20545, and to Troy B. Conner, Esq., Conner & Knotts, 1701 K Street NW., Washington, DC 20006, attorney for the applicant.

Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission.

Dated at Germantown, Md., this 27th day of March 1973.

UNITED STATES ATOMIC  
ENERGY COMMISSION,  
PAUL C. BENDER,  
Secretary of the Commission.

#### PUBLIC SERVICE ELECTRIC & GAS CO. Supplementary Notice of Hearing on Application for Construction Permits

On December 7, 1971, a notice of hearing on application for construction permits was published by the Atomic Energy Commission (the Commission) in the FEDERAL REGISTER (36 FR 23266), in the captioned proceeding. That notice indicated that an Atomic Safety and Licensing Board (Board) would be designated by the Commission to conduct the hearing, specified the issues to be determined by the Board, provided an opportunity to intervene with respect to the issues specified in such notice to persons whose interests may be affected by the proceeding, and provided an opportunity to make limited appearances to other persons who wished to make a statement in the proceeding but who did not wish to intervene. That notice also indicated that the Commission would give further public notice regarding hearing consideration of the matters covered by the Commission's regulations in 10 CFR Part 50, Appendix D, "Implementation of the National Environmental Policy Act of 1969."

Notice is hereby given, pursuant to 10 CFR Part 2, rules of practice, and appendix D of 10 CFR Part 50, "Licensing of Production and Utilization Facilities," that in the conduct of the captioned proceeding, the Atomic Safety and Licensing Board will, in addition to considering and

determining the issues pertaining to radiological health and safety and the common defense and security specified for hearing in the notice of hearing in this proceeding published on December 7, 1971, consider and make determinations, pursuant to the National Environmental Policy Act of 1969, on the following issue:

Whether, in accordance with the requirements of Appendix D of 10 CFR Part 50, the construction permits should be issued as proposed.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR 2.4(n), the Board will determine whether the review conducted by the Commission pursuant to NEPA has been adequate. In the event that this proceeding is not contested, the Board will convene a prehearing conference of the parties within sixty (60) days after this notice of hearing or such time as may be appropriate, at a time and place to be set by the Board. It will also set the schedule for the evidentiary hearing on the issue covered by this supplementary notice. Notice of the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

In the event that this proceeding is or becomes a contested proceeding, the Board will consider and decide, as issues in this proceeding, the issue above as a basis for determining whether the construction permits should be issued to the applicant.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, with respect to said issue, or their counsel, to be held on or before May 29, 1973, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.751a.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any special prehearing conference and within sixty (60) days after discovery has been completed, or within such other time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR 2.752.

Notices of the dates and places of the special prehearing conference, the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50, (1) determine whether the requirements of section 102(2) (C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine whether the construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

This supplementary notice does not affect the status of any person previously admitted as a party to this proceeding with respect to, or provide an additional opportunity to any person to intervene on the basis of, or to raise matters encompassed within, the issues pertaining to radiological health and safety and the common defense and security specified for hearing in the above-referenced notice of hearing published December 7, 1971.

For further details, see the applicant's environmental report, dated March 1971, as amended, and the Commission's draft environmental statement, dated December 1972, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20545, between the hours of 8:30 a.m. and 5 p.m. on weekdays. Copies of these documents are also available at the Trenton Free Public Library, 120 Academy Street, Trenton, NJ 08608, for inspection by members of the public between the hours of 9 a.m. and 9 p.m. Monday through Friday and 9 a.m. and 6 p.m. on Saturday. As they become available, copies of the Commission's final environmental statement and other relevant documents will also be available at the above locations. Transcripts of the prehearing conferences and of the hearing are also available at the above locations. Copies of the Commission's final environmental statement may be obtained, when available, by request to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Any person who does not wish to, or is not qualified to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715. A person making a limited appearance may only make an oral or written statement on the record, and may not participate in the proceeding in any other way. Limited appearances will be permitted at the time of the hearing in the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, not later than April 29, 1973.

A person permitted to make a limited appearance does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of the hearing as specified in the issues set out above.

Any person whose interest may be affected by the proceeding, who does not wish to make a limited appearance and who wishes to participate as a party in the proceeding with respect to the issue set forth in this notice must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR 2.714.

A petition for leave to intervene shall set forth the interest of the petitioner in

the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A petition for leave to intervene must be filed with the office of the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20545, not later than April 29, 1973. A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR 2.714(a)(1)-(4) and 2.714(d).

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene and have all the rights of the applicant to participate fully in the conduct of the hearing, such as the examination and cross-examination of witnesses, with respect to their contentions related to the matters at issue in the proceeding.

The presiding Board has previously admitted certain parties as intervenors to this proceeding with respect to the issues set forth in the notice of hearing published December 7, 1971. Such persons need not again specify contentions relating to their interest and right to be made a party to the proceeding, but shall set forth their other contentions in the same manner and with the same particularity as is required for other persons filing a petition for leave to intervene in accordance with this supplementary notice. Such contentions shall be filed within the time period provided by this supplementary notice for the filing of a petition for leave to intervene.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the applicant not later than April 19, 1973.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention:

ENERGY COMMISSION,  
PAUL C. BENDER,  
Secretary of the Commission.  
[FR Doc 73-6269 Filed 3-29-73; 8:45 am]

[Docket No. 50-406]

**TUSKEGEE INSTITUTE**  
**Issuance of Construction Permit**

No request for a hearing or petition for leave to intervene having been filed following publication of the notice of proposed action in the FEDERAL REGISTER on February 14, 1973 (38 FR 4430), the Atomic Energy Commission (the Commission) has issued Construction Permit No. CPRR-117 to the Tuskegee Institute as proposed in that notice, except that the earliest and latest dates for completion of the construction of the reactor have been changed from March 15, 1973, and June 15, 1973, to June 15, 1973, and October 15, 1973, respectively. The construction permit authorizes Tuskegee Institute to receive, possess, transport, and construct the AGN-201 (Serial No. 102) nuclear research reactor on its campus in Tuskegee, Ala., for subsequent operation at power levels up to 100 milliwatts for teaching and training purposes, in accordance with Tuskegee's application dated March 14, 1972, as supplemented. The permit also authorizes Tuskegee to receive, transport, and store up to 700 grams of contained uranium 235 and the small quantity of byproduct material contained in the reactor components that are being transferred from the Oklahoma State University.

The Commission has found that the application for the construction permit complies with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations published in 10 CFR Chapter I. The Commission has made the remainder of the findings required by the Act and the Commission's regulations, which are set forth in the construction permit, and has concluded that the issuance of the construction permit will not be inimical to the common defense

and security or to the health and safety of the public. The Tuskegee Institute is executing an indemnity agreement which satisfies the requirements of section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

A copy of the construction permit and a copy of the Safety Evaluation dated February 2, 1973, are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, or may be obtained upon request sent to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Md., this 23d day of March 1973.

For the Atomic Energy Commission,  
DENNIS L. ZIEMANN,  
Chief, Operating Reactors  
Branch No. 2 Directorate of  
Licensing.

**CIVIL AERONAUTICS BOARD**

[Docket No. 23333; Order 73-3-99]

**INTERNATIONAL AIR TRANSPORT  
ASSOCIATION**

**Order Regarding Reduced Fares for Cargo  
Sales Agents**

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 26th day of March 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted for March 1, 1973, effectiveness pursuant to the fourth meeting of the Cargo Agency Committee held November 28-30, 1972, in Montreal.

The agreement would revise the basis upon which reduced fare concessions for U.S.-based cargo sales agents are allocated. The general effect is to establish an incentive program geared to productivity in place of the present allocation of a fixed number of tickets to each agency location.

The current resolution permits each IATA-approved agency location two tickets annually, at a 75 percent reduction from the applicable fare. Under the new proposal, each agency registered in a particular country is entitled to a total of two such tickets, regardless of the number of locations it operates. The productivity provision would allot two additional tickets, at a 50 percent discount of the applicable first-class or normal economy fare, for each 100 percent (or fraction thereof) by which an agent's total international sales<sup>1</sup> exceed the annual

<sup>1</sup> On IATA members' waybills only.

average for the country of registration.<sup>2</sup> The maximum annual allowance of these tickets would be set at 40.

Trans World Airlines, Inc. (TWA), has filed comments in support of the agreement, and claims that the new program represents a significant improvement over the present system. TWA alleges that allocation of reduced-fare tickets by agency location is obsolete since IATA now registers its agents by country rather than individual location, and that in any event the number of locations is not a reliable index of growth and progress in air cargo sales. It is contended that sales volume is more directly related to the agents' bona fide travel requirements since it is a reliable index of productivity. TWA further alleges a need for prompt action since the current agreement is scheduled to expire March 31, 1973.

The matter of reduced fares for cargo agents has historically been one of considerable controversy, and the present proposal may be expected to provoke substantial comment from interested persons. The Board has repeatedly expressed its opinion that any system of reduced-fare concessions for cargo agents should be directly related to the legitimate business requirements of each agent.<sup>3</sup> However, it is unclear to what extent the subject agreement would accomplish this objective, and we are unable to determine, from the information now available, what the practical effect would be on the number of reduced-fare tickets available to individual agents or to the cargo agency industry as a whole. We will, therefore, require that each air carrier party to the agreement submit data relating to the number of reduced-fare tickets issued under the existing system in 1972, and an estimate of the number of such tickets which would have been issued had the new method of allocation been in effect.

For these reasons, and in view of the need for prompt disposition of the agreement, we will provide a 30-day period for the receipt of comments and supporting data in support of or in opposition to the agreement. In view of the fact that the current agreement will expire March 31, we would not oppose extension of the present system pending final action on the subject agreement.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, finds that it would be in the public interest to defer action on Agreement CAB 23516, R-3, pending the receipt, within 30 days

<sup>2</sup> Country averages, as well as each agent's allotment, are to be determined by the IATA Agency Administrator on the basis of annual reports already required of each agent under terms of the IATA Cargo Agency Agreement; \$1 million would be used as the average for any country whose actual average exceeds that amount. Reports submitted in a given year would be used to calculate quotas for following year, i.e., reports covering 1971, required to be submitted by Mar. 1, 1972, would determine the allocations for 1973.

<sup>3</sup> See order 72-5-69 of May 15, 1972, and Order 72-1-52 of Jan. 17, 1972.

of the date of service of this order, of comments and supporting data in support of or in opposition to the agreement.

Accordingly, it is ordered, That:

1. Action on Agreement CAB 23516, R-3, be and hereby is deferred pending the receipt, within 30 days of the date of service of this order, of statements in writing from any air carrier party to the agreement, or any interested person, together with supporting data in support of or in opposition to the agreement;

2. Each air carrier party to the agreement shall submit within 30 days of the date of service of this order, data relating to the number of reduced-fare tickets issued to cargo sales agents under the existing system in 1972; and an estimate of the number of such tickets which would have been issued had the proposed method of allocation been in effect; and

3. This order shall be served upon all carrier parties to the agreement, the Air Freight Forwarders Association of America, and the International Airfreight Agents' Association, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

[FR Doc 73-6173 Filed 3-29-73; 8:45 am]

[Docket No. 24488; Order 73-3-96]

**INTERNATIONAL AIR TRANSPORT  
ASSOCIATION**

**Order Regarding Passenger Fare and  
Currency Matters**

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 26th day of March 1973.

The Board, by Order 72-12-95 dated December 20, 1972, approved the subject agreement establishing rules for currency conversion adopted by the carrier members of the International Air Transport Association (IATA), subject to the following condition:

"2. The outstanding approval of Resolution 001, Permanent Effectiveness Resolution is subject to the following condition:

"No provision of any resolution shall be construed so as to require payment in United States dollars of fares, rates, or charges in excess of the dollar amounts stipulated in the appropriate tariffs on file with the Board."

IATA Resolution 021f provides that when currency exchange rates vary more than 2 1/4 percent from previously agreed IATA relationships, all rates and fares are to be sold in local currencies. The effect of the resolution is to create stability in airline rates and fares during periods of unstable monetary relationships until such time as new currency exchange relationships can be agreed in IATA.

Although the resolution may require the expenditure in certain currencies in certain countries at higher than U.S. tar-

<sup>1</sup> An original and nineteen copies of the statements should be filed with the Board's Docket Section.

iff levels for temporary periods, the resolution also prevents "shopping" for transportation services in the most favorable currency market. For example, with devaluation of the dollar, the purchase of air transportation in Germany would presently require a higher than tariff fares expenditure in dollars for the required conversion into marks for the period until new tariffs reflecting new currency relationships are filed and approved. U.S. carriers thus suffer a loss of revenues if prevented from collecting more than tariff dollar fares for air transportation originating and sold abroad. In the present monetary situation our condition is also conducive to the purchase in the United States in dollars of air transportation originating abroad with a consequent loss in revenues to the carriers. The reverse of the examples cited above can, of course, occur when the relationship of other major IATA currencies vary from agreed exchange rates. Thus the resolution seeks to establish a practical stability in air transportation for interim periods until currencies stabilize and new tariffs can be filed. This stability is warranted in our opinion for such interim periods in the interests of both the traveling public and the carriers.

Upon consideration of these various factors the Board finds that the noted condition on the operation of IATA Resolution 021f should be removed.

Accordingly, it is ordered, That:

Order 72-12-95, December 20, 1972, be and hereby is amended by the deletion of ordering paragraph 2.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

[Docket No. 24697]

**TRANS WORLD AIRLINES, INC.-  
FLYING MERCURY, INC.**

**Postponement of Hearing**

By motion filed March 22, 1973, Trans World Airlines, Inc., and Flying Mercury, Inc., requested an indefinite postponement of the hearing in this proceeding in order to explore settlement possibilities with the Bureau of Enforcement. In its answer, the Bureau objected to an indefinite postponement but agreed to a limited delay for this purpose.

Upon consideration of the request and answer, notice is hereby given that the hearing in the above-entitled proceeding now assigned to be held on April 3, 1973 (38 FR 4436, Feb. 14, 1973), is postponed to May 15, 1973, at 10 a.m. (local time), in Room 911, Universal Building, 1825 Connecticut Avenue NW., Washington, DC, before the undersigned Administrative Law Judge.

The carriers are directed to file an appropriate rule in their tariffs providing for collections consistent with our action herein.

Dated at Washington, D.C., March 27, 1973.

[SEAL] THOMAS P. SHEEHAN,  
Administrative Law Judge.

**COMMISSION ON CIVIL RIGHTS**  
**COLORADO STATE ADVISORY COMMITTEE**

**Notice of Open Meeting**

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Colorado State Advisory Committee will convene at 9 a.m. on April 7, 1973, at Room 216, Ross Building, 1726 Champa Street, Denver, CO 80202.

Persons wishing to attend this meeting should contact the Committee Chairman, or the Mountain States Regional Office of the Commission at Room 216, Ross Building, 1726 Champa Street, Denver, CO 80202.

The purpose of this meeting shall be to inform members of the Prison Subcommittee to the Colorado State Advisory Committee of the redirection of the Prison Project, and to request that the State Advisory Committee have some input into the Preliminary Report on the Prison Project.

This meeting will be conducted pursuant to rules and regulations of the Commission.

Dated at Washington, D.C., March 26, 1973.

ISAIAH T. CRESWELL, Jr.,  
Advisory Committee  
Management Officer.

# WASHINGTON STATE ADVISORY COMMITTEE

## Notice of Meeting; Correction

This is an amendment to FR Doc. 73-5509 appearing in the FEDERAL REGISTER of March 22, 1973, on page 7487.

This amendment pertains to a 2-day open meeting being held on March 30-31, 1973, at Seattle, Wash. 98401.

In addition to this 2-day open meeting, there will be a closed or executive session of the Washington State Advisory Committee which will convene on March 29, 1973, at 7:30 p.m., at the Seattle Hilton Hotel, Chinook Room, Sixth and University Streets, Seattle, WA 98101. At this session committee members will discuss matters which may tend to defame, degrade, or incriminate individuals, and as such this session is closed to the public.

The meeting being scheduled to be held on March 30-31, 1973, at the Seattle Public Library, Main Library Building, Fourth and Madison Streets, Seattle, Wash., shall be open to the public and the press.

Dated at Washington, D.C., March 26, 1973.

ISAIAH T. CRESWELL, JR.,  
Advisory Committee  
Management Officer.

# COUNCIL ON ENVIRONMENTAL QUALITY

## ENVIRONMENTAL IMPACT STATEMENTS

Environmental impact statements received by the Council from March 19 through March 23, 1973.

NOTE: At the head of the listing of statements received from each agency is the name of an individual who can answer questions regarding those statements.

DEPARTMENT OF DEFENSE

Contact: Mr. Robert L. Gilliat, Office of General Counsel, Room 3E977, Department of Defense, the Pentagon, Washington, D.C. 20301.

Draft, March 19

Air installations compatible use zones. The proposal is the publishing of a policy which would recognize the characteristics of air installations operations as incompatible with certain possible land uses in the vicinity of the installation. The policy would define the methods by which compatible use zones may be determined and delineated, and require that the Military Departments develop programs to establish compatible use zones. Methods would range from local zoning, through State legislation, and acquisition of restrictive easements or fee title by the Federal Government. The establishment of compatible use zones would promote the development of non-noise sensitive activities in the high noise areas. (27 pages) (ELR Order No. 00468) (NTIS Order No. EIS 73 0468-D)

## ARMY CORPS

Contact: Mr. Francis X. Kelly, Director, Office of Public Affairs, Attention: DAEN-PAP, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, DC 20314, 202-693-7168.

**Supplement, March 20**  
Jacksonville Harbor, Fla. The document provides supplemental information to final environmental impact statements on section 1 and section 2 of Jacksonville Harbor. The statements, which were received on February 15, 1972, and July 3, 1972, respectively, are numbered EIR No. 1899, NTIS No. PB 199 880-F, and EIR No. 1826, NTIS No. EIS 72 4826-F. (91 pages) (ELR Order No. 00476) (NTIS Order No. EIS 73 0476-D)

**Draft, March 8**  
Weymouth Landing Local Protection, County, Norfolk. The proposal is for a flood protection project, which would consist of a concrete dam, 1,200 feet of 96-inch pressure pipe and a 230-foot long arch conduit, and 1,000 feet of channel works. Some hardwood trees and other vegetation will be lost to the project. (32 pages) (ELR Order No. 00400) (NTIS Order No. EIS 73 0400-D)

**Draft, March 9**  
Tybee Island, Ga. County, Chatham. The proposed project is one of restoration and periodic nourishment of 13,200 feet of ocean beach and an 800-foot rubble stone groin. Proposed for the future is the placement of two additional 760-foot rubble groins, and a 1,200-foot extension to the terminal groin. There will be adverse impact to marine biota. (29 pages) (ELR Order No. 00403) (NTIS Order No. EIS 73 0403-D)

**Draft, March 14**  
Mississippi River, Baton Rouge to Gulf of Mexico, Louisiana. The proposed project is the maintenance of operation of navigation channels in the Mississippi River from Baton Rouge to deep water in the Gulf of Mexico. There will be maintenance dredging at 8 crossings in the Mississippi River, New Orleans Harbor, south and southwest passes, and bar channels; regulating and contracting works at the head of passes in south and southwest passes; regulating and controlling of outlets below New Orleans; and maintenance of jetty systems at the seaward ends of south and southwest passes. Placement of spoil on 725 acres of marsh and existing spoil banks below head of passes destroys wildlife habitat. (91 pages) (ELR Order No. 00444) (NTIS Order No. EIS 73 0444-D)

**Draft, March 6**  
Dixon Farm Levee Improvement, Clackamas River, Oreg. The proposed project is the raising and extension of an existing levee to provide protection against floods to a 240 acre area. Land acquired for the project totals 5.3 acres, of which 2.25 acres is timber and brush cover. An increase in stream velocities would occur causing additional erosion and higher water pollution levels. (27 pages) (ELR Order No. 00378) (NTIS Order No. EIS 73 0378-D)

**Draft, March 5**  
Seattle Bulk Mail Center, Federal Way, Washington, County, King. The proposed project is the construction of a U.S. Postal Service facility at Federal Way, Seattle. Fifty-five acres of wildlife habitat and timber land will be lost. Major adverse effects which will result are: increased noise and air pollution levels, reduction of tax base, and increased traffic congestion. (47 pages) (ELR Order No. 00363) (NTIS Order No. EIS 73 0363-D)

Final, March 19

**Patterson Watershed, California. County, Stanislaus.** The statement considers the land treatment measures; the construction of a subsurface drainage system (10.9 miles of open joint tile and 4.5 miles of closed joint tile); and the cleaning and deepening of 1.6 miles of existing open drainage ditches. The project will improve drainage, lowering the high water table on 4,190 acres, removing accumulated salts from the soil and eliminating health hazards. The salt content of water delivered from the area to the San Joaquin River will be increased. (40 pages) Comments made by: COE, DOC, DOI, HEW, and EPA (ELR Order No. 0465) (NTIS Order No. EIS 73 0465-F)  
**Calcasieu River, Coon Island, La. County, Calcasieu.** The statement refers to the proposed construction of a 40' x 200' ship channel and a 750' x 1000' turning basin in order to allow more efficient use of the channel by larger and deeper-draft vessels. Approximately 3,253 acres of dredged spoil will be deposited at diked sites. The project will stimulate industrial growth. There will be adverse impacts upon fish, wildlife, water, and recreational resources in the project area. (53 pages) Comments made by: DOC, DOI, HEW, and EPA State agencies (ELR Order No. 00467) (NTIS Order No. EIS 73 0467-F)

Final, March 20

**Chincoteague Inlet, Va. County, Accomack.** The statement considers the construction of a navigation channel (2,800' long and 150' wide by 12' deep), across the ocean bar at Chincoteague Inlet. The purpose of the project is that of providing navigational improvements which will enhance commercial usage of existing resources. Approximately 43,000 cubic yards of material will be dredged. Marine biota will be damaged; 3 acres of low upland terrain will be used for spoil deposit. (28 pages) Comments made by: DOC, EPA, and DOI State agencies (ELR Order No. 00475) (NTIS Order No. EIS 73 0475-F)

## INTERSTATE COMMERCE COMMISSION

Contact: Mr. James Tao, Office of the General Counsel, Room 5107, Washington, D.C. 20423, 202 343-2087.

Draft, March 16

**Ex parte 281, increased freight rates and charges.** The proposed action involves authorization for increases in railroad rates and charges on commodities moving for purposes of recycling. Final agency action is planned to become effective on June 7, 1973. (240 pages) (ELR Order No. 00391) (NTIS Order No. EIS 73 0391-D)

## DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Quality, 400 Seventh Street SW., Washington, DC 20590, 202-466-4357.

## FEDERAL AVIATION ADMINISTRATION

Draft, March 8

**Kasigluk Airport, Alaska.** The statement refers to the proposed development of a new airport to serve the villages of Kasigluk, Nunapitchuk, and Atmautluak. The project will involve the construction of a landing strip, a parking apron, and the connecting taxiway. Noise and air pollution from aircraft operation will be introduced to the area. (12 pages) (ELR Order No. 00393) (NTIS Order No. EIS 73 0393-D)

**Nampa Municipal Airport, Idaho, county: Canyon.** The proposed project is the construction of a new general utility runway, together with taxiway, apron, terminal, and parking facilities. Approximately 40 acres will be acquired for clear zones and future development. There will be an increase in noise and air pollution. (20 pages) (ELR Order No. 00398) (NTIS Order No. EIS 73 0398-D)

**Mississippi County Airport, Mo., county: Mississippi.** The statement refers to the proposed acquisition of 100 acres of land for the development of a new airport facility. The development of the facility includes a 3,800 foot by 75 foot primary runway, a 3,000 foot crosswind runway, and related facilities. Adverse effects include exposure of a new area to airport operation and increased air and noise pollution. (27 pages) (ELR Order No. 00396) (NTIS Order No. EIS 73 0396-D)

**Modisett Field, Nebr., county: Sheridan.** The statement refers to the acquisition of approximately 11 acres of land and 7 acres by easement or clear zone for additional airport development at Modisett Field. The project includes the construction of a 4,300 foot by 150 foot safety area and 3,900 foot by 50 foot primary runway, segmented circle, perimeter fencing along new areas, and safety fencing. Noise and air pollution levels will increase. (17 pages) (ELR Order No. 00394) (NTIS Order No. EIS 73 0394-D)

**Linton Municipal Airport, N. Dak., county: Emmons.** The statement refers to the acquisition of 5.3 acres of land and 14.6 acres of clear zone easements to upgrade the present airport facility. The project will realign, lengthen, and hard surface the present runway (3,100 feet by 50 feet); a connecting taxiway, a ramp, and related facilities will be constructed. There will be an increase in noise and air pollution. (41 pages) (ELR Order No. 00395) (NTIS Order No. EIS 73 0395-D)

**Stigler Municipal Airport, Okla., county: Haskell.** The statement refers to the proposed acquisition of 160 acres of land for the development of a new airport and clear zones. The project involves constructing a 50 foot by 3,000 foot runway, stub taxiway, tiedown aprons, and medium intensity runway lights, including VASI. There will be an increase in air and noise pollution. (15 pages) (ELR Order No. 00397) (NTIS Order No. EIS 73 0397-D)

**Madison Municipal Airport, S. Dak., county: Lake.** The proposed project includes land acquisition (53 acres), navigation easements for the extension of the existing runway from 50 feet by 3,100 feet to 75 feet by 4,200 feet. The action also contemplates constructing a connecting taxiway and apron; installing a MRL/VASI lighting system; relocating a county road; and fencing, seeding, and obstruction removal. Noise and air pollution will increase with increased usage. (34 pages) (ELR Order No. 00399) (NTIS Order No. EIS 73 0399-D)

## FEDERAL HIGHWAY ADMINISTRATION

Draft, March 14

**SR 80, Florida, county: Palm Beach.** The proposed project is the improvement of SR 80. Depending upon the alternate chosen, the project will: Vary in length 23.7 to 24.3 miles; acquire 317.3 to 392 acres of land; and displace 14 to 31 families and 19 to 60 businesses. Construction of the facility may affect the drainage system and water table. Increases in noise and air pollution levels will occur. (63 pages) (ELR Order No. 00437) (NTIS Order No. EIS 73 0437-D)

Draft, March 9

**Iowa 330, Iowa, counties: Jasper, Story, and Marshall.** The proposed project is an upgrading of present Iowa 330 on the existing alignment. It would involve either building two new lanes or reconstructing the existing roadway and purchasing additional right-of-way for an eventual four-lane facility. Two residences and two farmsteads will be displaced. The project would remove cropland from productivity and several timbered tracts which constitute wildlife habitat will be lost. Noise and exhaust emissions will increase. (ELR Order No. 00402) (NTIS Order No. EIS 73 0402-D)

Draft, March 12

**US 20, Iowa, county: Webster.** The proposed project is the construction of 0.8 mile of US 20. Nine residences and eight businesses will be displaced. Numerous trees will be lost to right-of-way. Increases in noise and air pollution levels will occur. (20 pages) (ELR Order No. 00427) (NTIS Order No. EIS 73 0427-D)

Draft, March 14

**SR 193 relocated, Md., county: Prince Georges.** The proposed project is the relocation and improvement of State Route 193. Length of the project is 3 miles. Depending upon the alternate chosen, between 9 and 13 families will be displaced. Increases in noise and air pollution will result from the project. (89 pages) (ELR Order No. 00435) (NTIS Order No. EIS 73 0435-D)

Draft, March 9

**US 311, High Point to Winston-Salem, N.C., counties: Guilford and Forsyth.** The statement refers to the proposed relocation of US 311 between High Point and Winston-Salem, a distance of 12.2 miles. The project will consist of a four-lane divided highway with full access control. Approximately 800-900 acres of land will be committed to right-of-way; 50 families and three businesses will require relocation. (38 pages) (ELR Order No. 00406) (NTIS Order No. EIS 73 0406-D)

Final, March 9

**State Route 50, Groveland to Clearmont, Fla., county: Lake.** The statement considers two alternate corridors for the improvement of SR 50 from SR 33 in Groveland to SR 561 in Clearmont. The action involves upgrading an existing two-lane facility to a multilane highway. Project length is 4.7 miles. The number of displacements and the amount of right-of-way acquired will depend upon the alignment selected. (48 pages) Comments made by: EPA, DOI, HEW, and USDA. (ELR Order No. 00411) (NTIS Order No. EIS 73 0411-F)

**Hess Creek-Chehalis Creek, Pacific Highway West, Oreg., county: Yamhill.** The project proposal consists of a couplet system constructed through the city of Newberg from River Street to the Southern Pacific Transportation Co. railroad tracks. First and Hancock elements with First Street one way east and Hancock Street one way west. A small amount of land will be acquired for right-of-way. (36 pages) Comments made by: COE, DOI, and State and local agencies. (ELR Order No. 00410) (NTIS Order No. EIS 73 0410-F)

## ENVIRONMENTAL PROTECTION AGENCY

## N-sec-BUTYL-4-tert-BUTYL-2,6-DINITROANILINE

## Notice of Establishment of Temporary Tolerance

Amchem Products, Inc., Ambler, Pa. 19002, submitted a petition (PP 2G1285) requesting establishment of temporary tolerances for negligible residues of the herbicide N-sec-butyl-4-tert-butyl-2,6-dinitroaniline in or on the raw agricultural commodities cottonseed and soybeans at 0.1 part per million.

It has been determined that these temporary tolerances are safe and will protect the public health. They are therefore established as requested on condition that the herbicide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the Amchem Products, Inc. name.

These temporary tolerances expire March 26, 1974.

This action is being taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated: March 26, 1973.

**HENRY J. KOPP,**  
Deputy Assistant Administrator  
for Pesticide Programs.

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19716; FCC 73-331]

## OBSCENITY IN BROADCASTING

## Inquiry; Procedures for Investigation

1. The Commission has under consideration information and complaints from the public that certain broadcast licensees or permittees may have broadcast obscene, indecent, or profane material in violation of section 1464, title 18 of the United States Code, which raises serious questions as to whether the licensees or permittees are operating in the public interest. Similar questions have arisen in connection with cable-casting.

2. Therefore, it is ordered, On the Commission's own motion, pursuant to sections 403 and 409(e) of the Communications Act of 1934, as amended, that an inquiry is hereby instituted to determine whether any licensee, permittee, or cable system, or any principal, agent, or employee thereof, has engaged in the above-described practice, and if so to what extent and under what circumstances.

3. It is further ordered, That the inquiry shall be a nonpublic proceeding unless and until the Commission orders that public sessions be held after determining that the public interest would be served thereby. Such nonpublic proceedings are in accord with the Commission's practices in investigations of the nature indicated above.

4. It is further ordered, That, pursuant to section 5(d)(1) of the Communications Act of 1934, as amended, for the purpose of this inquiry, authority is hereby delegated to the Chief Administrative Law Judge of the Commission to require by subpoena the production of books, papers, correspondence, memorandums, and other records deemed relevant to the inquiry; to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and to perform such other duties in connection therewith as may be necessary or appropriate to the compilation of a complete record concerning the subject matter of this inquiry.

5. It is further ordered, That the Chief Administrative Law Judge is specifically authorized to designate a Commission Administrative Law Judge to exercise the authority conferred by this order; and to require witnesses to testify and produce evidence under authority of, and in the manner provided in, section 409 of the Communications Act of 1934, as amended, when requested to do so by Commission Counsel.

6. It is further ordered, That the subpoena powers delegated by this order shall be exercised in accordance with §§ 1.331 through 1.340 of the Commission's rules. Motions to quash or limit subpoena shall be directed to the presiding Administrative Law Judge in accordance with § 1.334 of the rules. Applications for review of the presiding Administrative Law Judge's rulings on such motions may be filed with the Commission within ten (10) days after the issuance by the presiding Administrative Law Judge of such rulings.

7. It is further ordered, That the provisions of § 1.27 of the Commission's rules shall apply to the production of oral and documentary evidence under subpoena.

8. It is further ordered, That upon conclusion of the inquiry ordered herein, the presiding Administrative Law Judge shall certify the record thereof to the Commission for appropriate action.

Adopted: March 22, 1973.

Released: March 27, 1973.

FEDERAL COMMUNICATIONS  
COMMISSION,<sup>1</sup>  
[SEAL] BEN F. WAPLE,  
Secretary.

[FR Doc. 73-6143 Filed 3-29-73; 8:45 am]

<sup>1</sup> Commissioner Johnson dissenting; Commissioner Hooks absent.

[Dockets Nos. 19519, 19581; FCC 73R-120]  
**WESTERN COMMUNICATIONS, INC., AND  
 LAS VEGAS VALLEY BROADCASTING CO.**

**Memorandum Opinion and Order Enlarging  
 Issues**

In regard applications of Western Communications, Inc. (KORK-TV), Las Vegas, Nev., Docket No. 19519, File No. BRCT-327, for renewal of license; Las Vegas Valley Broadcasting Co., Las Vegas, Nev., Docket No. 19581, File No. BPCT-4465, for construction permit for new television broadcast station.

1. This proceeding involves the mutually exclusive applications of Western Communications, Inc. (Western), for renewal of its license for Station KORK-TV, Channel 3, Las Vegas, Nev., and Las Vegas Valley Broadcasting Co. (Valley), for a construction permit for a new television broadcast station to operate on Channel 3, Las Vegas, Nev. (38 FR 7140). Now before the Review Board is a petition to enlarge issues, filed October 6, 1972, by Valley, which requests disqualifying and comparative issues inquiring into alleged fraudulent billing practices, network clipping, and false sponsorship identification at stations wholly owned or operated by Donald W. Reynolds, the owner of Station KORK-TV, as well as disqualifying and comparative issues relative to Western's efforts to ascertain community needs and interests.

**BILLING, CLIPPING, AND SPONSORSHIP  
 IDENTIFICATION ISSUES**

2. A brief statement of the history of this proceeding will facilitate an understanding of the Board's present disposition of the requested issues. Western is owned by Donrey, Inc., which is wholly owned by Donald W. Reynolds, who also owns or controls Station KFSA-TV, Fort Smith, Ark., and Station KOLO-TV, Reno, Nev. As a result of complaints filed with the Commission, an investigation was initiated which resulted in a letter to Western, FCC 72-75, dated January 26, 1972, detailing various alleged instances of network clipping<sup>1</sup> at all three stations, and fraudulent billing practices with local businesses and false sponsorship identification in certain political announcements at Station KFSA-TV. Subsequently, on June 9, 1972, the Commission issued a notice of apparent liability to Station KFSA-TV, FCC 72-502, for a forfeiture in the amount of \$5,000; thereafter, the forfeiture was paid in full. The application for renewal of license for Station KOLO-TV was granted without hearing on June 15, 1972, FCC Report No. 10731. The Commission did, however, designate the renewal application of Station KORK-TV for hearing by order, FCC 72-503, 35 FCC 2d 517, on an issue to determine whether it had engaged in fraudulent

<sup>1</sup> Also before the Board are the following related pleadings: (a) Broadcast Bureau's comments, filed Nov. 20, 1972; (b) opposition, filed Nov. 27, 1972, by Western; and (c) reply, filed Dec. 22, 1972, by Valley.

**NOTICES**

billing practices by network clipping, as well as a misrepresentation and candor issue. A subsequent order, FCC 72-767, released September 1, 1972, consolidated Valley's application with the KORK-TV renewal proceeding under the same issues, and a comparative issue.

3. Citing the above-described Commission investigation, information contained in the letter to Western and the notice of apparent liability issued to and paid by KFSA-TV, Valley contends that a consistent pattern of conduct by stations under common ownership is evidenced, and "must raise questions as to the principal licensee's character and qualifications to remain a Commission licensee." Furthermore, argues Valley, it is significant that after Western's response to a Commission letter of May 14, 1971, transmitting certain viewer complaints of clipping, the other commonly owned stations continued clipping, at least through June 1971, the end of the period covered by the Commission investigation. Such violations by other stations owned by an applicant, argues Valley, are clearly a proper basis for addition of qualifying issues in a comparative hearing, regardless of whether such violations have resulted in a forfeiture, citing, e.g., "Harvit Broadcasting Corp.," 31 FCC 2d 876, 22 RR 2d 1062 (1971); and "Du Page County Broadcasting, Inc.," 21 FCC 2d 395, 18 RR 2d 321 (1970). Valley concludes that the above circumstances represent a consistent pattern of "deliberate fraud" requiring disqualifying issues and, in the event Western is determined qualified to continue as a Commission licensee, a comparative issue for "evaluation of the licensee's overall broadcast record."

4. The Broadcast Bureau agrees with Valley that the Commission investigation provides an adequate basis for adding issues inquiring into network clipping at KFSA-TV and KOLO-TV, and into the local double billing at KFSA-TV. The Bureau believes that the "cumulative impact of all the violations" should be considered on both a disqualifying and comparative basis. The Bureau does not believe, however, that the violations of Stations KOLO-TV and KFSA-TV, standing alone, can determine whether Western is basically qualified because of the Commission's actions regarding these stations. As for the alleged sponsorship identification violations, the Bureau is satisfied that Western's response to the Commission inquiry was sufficient to negate the need for that inquiry.

5. In opposition, Western initially opposes the requested issues on procedural grounds. Western's renewal application was first designated for hearing on June 9, 1972, supra, and the order was published in the FEDERAL REGISTER on June 22, 1972, 37 FR 12346; therefore, argues

<sup>2</sup> The instances of network clipping included discontinuing the broadcast of network programs before their completion, joining programs after they had begun and expanding station breaks within network programs so as to fail to carry such programs in their entirety and, then, falsely representing to the networks that each of the programs was broadcast in its entirety.

Western, since § 1.229 requires that petitions to enlarge be filed not later than 15 days after the issues "have first been published" in the FEDERAL REGISTER, Valley's petition is nearly 3 months late. Moreover, argues Western Valley cannot "take advantage" of the fact that its application was not formally designated for consolidated hearing with the Western application until September 1, 1972, because Valley was well aware of the status of the Western renewal proceeding and its own interest therein, as evidenced by various other pleadings filed and, concludes Western, it was therefore Valley's obligation to intervene and file a timely petition to enlarge. Substantively, Western argues that Valley's request is defective because it seeks to add issues pertaining to alleged rule violations which have already been fully considered by the Commission. Specifically, Western notes that all of the information relied upon by Valley was available to the Commission prior to either the June 9, or the September 1, 1972, designation order, and the Commission must have concluded that no action was necessary. In this regard, Western relies heavily on Commissioner Johnson's dissenting opinion to the June 9, 1972, designation order, which was based on the Commission's decision not to issue an order to show cause why KFSA-TV's license should not be revoked nor to take any action against KOLO-TV. Western also points to the notice of apparent liability issued to KFSA-TV, arguing that both it and Commissioner Johnson's dissent clearly indicate that the Commission gave full consideration to the matters raised by Valley and that, therefore, the Board is precluded from reconsidering such matters, citing "Atlantic Broadcasting Co.," 5 FCC 2d 717, 8 RR 2d 991 (1966). Moreover, contends Western, "Harvit Broadcasting," supra, and "Du Page County Broadcasting," supra, are inapposite because in those cases additional or continuing rule violations were brought to light after designation. Finally, argues Western, the orderly presentation of evidence would be disrupted if rule violations issues at KFSA-TV and KOLO-TV are added, because meritorious programing issues regarding those stations would also have to be added, citing "Friendly Broadcasting Co.," 35 FCC 2d 611, 24 RR 2d 712 (1972).

6. In reply, Valley urges that it could not have filed a petition to enlarge prior to the issuance of the consolidated designation order because it was not a party to the proceeding (§ 1.229(a)), and that it was not required to intervene because, in the order, released June 12, 1972, the Commission indicated that, if Valley wished to prosecute its application on a comparative basis, a subsequent order would be issued. Moreover, argues Valley, the order released September 1, 1972, clearly stated that the issues there designated superseded the previously specified issues. Substantively, petitioner argues that neither the "mere consideration by the Commission" of the matters at issue nor the notice of apparent liability precludes addition of the requested

issues so long as factual matters relating to the qualifications of an applicant remain unresolved, as they do here. Whether violations come to light "prior to or subsequent to designation" is immaterial, petitioner contends, so long as the Commission did not provide a "reasoned analysis," citing "Atlantic," supra. Valley concludes that no such analysis has been provided by the Commission, and therefore urges the Board to add the requested issue (citing "National Broadcasting Co., Inc.," 21 FCC 2d 195, 18 RR 2d 74 (1970)).

7. The Board will add the issues relating to fraudulent billing practices and network clipping at Stations KFSA-TV and KOLO-TV; however, in light of previous Commission actions, the issues will be added on a comparative basis only. The requested sponsorship identification issue will be denied. As to the timeliness of Valley's petition, the Board believes that, while Valley may have technically been under an obligation to seek timely intervention subsequent to the release of the June 12, 1972, designation order, in view of the language of the June 12 order indicating that the proceeding would be redesignated if a proposed merger was terminated, and the fact that the proceeding was redesignated, the petition should be treated as having been timely filed. Cf. "WPIX, Inc. (WPIX)," 34 FCC 2d 419, 24 RR 2d 59 (1972), review denied FCC 72-616, released July 12, 1972. Turning to the merits of the petition, the Board is of the view that the question of the effect on Western's basic qualifications of the alleged fraudulent billing practices and network clipping at KFSA-TV and KOLO-TV, as detailed in the Commission letter dated June 9, 1972, and the Notice of Apparent Liability issued to KFSA-TV, was resolved by the Commission when the license renewal application of KOLO-TV was routinely granted and the Notice of Apparent Liability issued to KFSA-TV. The timing of these actions, considered in light of Commissioner Johnson's dissent to the Commission order, released June 12, 1972, in which he urged the issuance of an order to show cause to KFSA-TV and designation of KOLO-TV's renewal application for hearing, clearly indicates that the Commission considered the consequences of the alleged violations in question in designating this proceeding for hearing. The Board cannot agree with Western, however, that the Board is precluded from adding issues inquiring into these matters on a comparative basis in this proceeding. These allegations, taken together with the allegations in the instant case, raise a substantial question as to whether individual acts or a consistent pattern of misconduct of substantial proportions over a relatively lengthy period of time by three stations under common ownership has occurred. The consequences of such actions are clearly relevant to the comparative qualifications of Western. Nor is the Board precluded by the doctrine set forth in "Atlantic," supra because the prior Commission actions relate to the individual

**NOTICES**

stations and the effect of the alleged violations on the basic qualifications of the licensees. These matters are clearly separate from the question of Western's comparative qualifications and, consequently, there can be no "reasoned analysis" in the orders designating the KORK-TV application for hearing.

8. In our view, the "NBC" case, cited by the petitioner, supports our conclusion that, although we are not barred from allowing consideration of these alleged violations on a comparative basis, their effect on Western's basic qualifications has already been determined. In that case, involving the renewal of an NBC station in Los Angeles, the Board added disqualifying issues inquiring into the circumstances surrounding certain allegedly misleading programs produced and presented by NBC, even though, as noted by petitioner, the Commission had previously renewed the license for the NBC station in New York. However, the Board believes this aspect of the case to be inapplicable to the present proceeding because, in granting the New York renewal application, the Commission had indicated that the allegedly misleading programs were being considered in the Los Angeles proceeding and, in a footnote to the Los Angeles proceeding designation order, indicated the programs would "be considered in this proceeding." No comparable circumstances are present in this proceeding. Rather, in our view, the present circumstances more closely parallel another aspect of the same "NBC" case where the Board, when presented with requests for disqualifying issues pertaining to other allegedly misleading programs, indicated that such requests must be denied due to previous adjudication of such matters, including appropriate sanctions and subsequent renewal of all the NBC licenses at least once; the Board indicated, however, that these matters could be considered on a comparative basis. 21 FCC 2d at 204, 18 RR 2d at 85. Here, the Commission has also imposed sanctions with regard to one, and renewed the license of the other, offending station. And, like the "NBC" case, the Board is nevertheless of the view that the allegations can be considered in the comparative evaluation of the two applicants. Finally, as to the requested sponsorship identification issue, we agree with the Broadcast Bureau that Western's March 20, 1972, response to the Commission's inquiry adequately dispels the need for further inquiry. That response indicates that it identified the main contributors to the candidates' campaigns as the sponsors because neither candidate had established a formal campaign committee. It therefore appears that KFSA-TV acted in good faith and without intentional wrongdoing and that further inquiry would serve no useful purpose.

**SUBURBAN AND COMPARATIVE EFFORTS  
 ISSUES**

9. In support of the requested ascertainment issue, petitioner initially alleges that Western has relied upon "out-

dated" census figures and county school registration records which have resulted in inaccurate population and minority group statistics, citing the "Primer" (Q. & A. 9).<sup>1</sup> Thus, argues Valley, Western has no valid basis for determining the composition of its community of license. Petitioner urges that the inaccuracies are demonstrated by comparing Western's figures with 1970 U.S. Census statistics. For example, argues Valley, Western's renewal application places more than 50 percent of Clark County's population in Las Vegas, whereas the 1970 Census reduces that figure to 46 percent; in addition, Western's application projects 7 percent of the population in North Las Vegas, 6 percent in Henderson and 3 percent in Boulder City, while the 1970 Census indicates that those communities have 13 percent, 6 percent, and 1.9 percent, respectively, of the population. Valley points to similar discrepancies in the minority group breakdown. Petitioner also contends that the use of outdated statistics has resulted in an "imbalance" in Western's community leader survey because the communities listed above did not receive adequate examination. Finally, Valley asserts that, even though Western's service area has a 5.5 percent Spanish-surnamed population, no leader was contacted "who could truly be classified" as a member of that minority. Valley also contends that its ascertainment efforts are sufficiently superior to those of Western's to require a comparative efforts issue. In support of this contention, Valley alleges that it utilized a much wider range of current sources in compiling its population statistics and in the number and breakdown of its community surveys. In this regard, Valley notes that Western interviewed only 84 community leaders, 80 of whom reside in Las Vegas, and 145 members of the general public, with little or no breakdown into smaller, more revealing groups. In contrast, argues petitioner, it interviewed 198 community leaders, 16 of whom reside in the smaller communities surrounding Las Vegas, and 211 members of the general public. In addition, Valley contends, the community leaders it interviewed, unlike those of its opponent, are broken down into representative minority and ethnic groups. In conclusion, Valley argues that all of the above requires a disqualifying Suburban issue against Western and a comparative efforts issue in the event Western satisfies the disqualifying issue.

10. In opposition, Western initially responds to Valley's attack on its alleged inaccurate statistics by arguing that the 1970 Census data was not available, at least in part, at the time it conducted its prereneval survey. Moreover, argues Western, its total population estimate was based on an approximate 10 percent per year increase since 1960, which percentage is reflected in the current Census data, and, therefore, Western's

<sup>1</sup> Primer on Ascertainment of Community Problems by Broadcast Applicants, 27 FCC 2d 650, 682, 21 RR 2d 1507, 1541 (1971).

1971 estimate of 300,000 for the population of Clark County is more current and accurate than Valley's use of the 1970 Census figure of approximately 273,000. As to the minority percentages, Western argues that its estimate of a larger black population (13 percent) than the 1970 Census determined (9.1 percent) is not a basis for penalty, and the difference in Mexican-American population percentages (3.5 percent) by Western and 5.5 percent by 1970 Census) is insignificant. With regard to its estimates of the populations in the smaller communities surrounding Las Vegas, Western argues that the percentage differences from the 1970 Census are similarly insignificant and that, in the absence of any current data, Western's estimates represent a good faith and adequately accurate attempt to comply with the Primer. In reference to its community leader surveys, Western argues that its first survey was adequate but that, in addition, the Presiding Judge accepted a Western amendment by Order, FCC 72M-1320, released October 24, 1972, which clearly demonstrates compliance with the Primer. This amendment shows consultations with 124 more community leaders, including those representing the smaller communities and minority groups. Finally, Western opposes Valley's request for a comparative efforts issue on the grounds that all of the above demonstrates that Western's ascertainment efforts are not defective and, in fact, are in many respects superior to those of Valley. The Broadcast Bureau opposes addition of both issues, basically for the reasons stated by Western.

11. The Review Board will deny the requested issues. In reference to the requested Suburban issue, the Board believes that the Western amendment sufficiently dispels any doubt as to the adequacy of Western's surveys and showing. See, e.g., "Eastern Broadcasting Corp.," 31 FCC 2d 724, 22 RR 2d 966 (1971). In all, Western interviewed 226 community leaders with a fair and representative percentage of minorities, as well as of the smaller communities in the area. As to the population figures and minority percentages derived therefrom, the Board believes that the percentage disparities are not sufficient to require addition of a Suburban issue—particularly since 1970 Census data does not appear to have been readily available and the methods used by Western to estimate the population percentages were reasonably explained and substantially accurate. In view of the above determination

\* In this regard the Board finds significant the statement in the Primer (in reference to the number of persons who should be consulted) that:

(No set number or formula has been adopted. Community leaders from each significant group must be consulted. A sufficient number of members of the general public to assure a generally random sample must also be consulted. The number of consultations will vary, of course, with the size of the city in question and the number of distinct groups or organizations. No formula has been adopted as to the number of consultations in the city of license compared to other communities falling within the station's coverage contours. (Primer, Q & A 14.)

## NOTICES

and after a review of Valley's ascertainment efforts, the Board is similarly of the opinion that no useful purpose would be served by adding a comparative efforts issue. Valley's central basis for comparison appears to be on numerical differences; however, the Western amendment substantially equalizes any imbalance of this nature. For example, Western has conducted 226 community leader interviews and 245 general public interviews, while Valley has contacted 220 community leaders and 311 members of the general public. Nor do the other differences suggest a significant disparity. Therefore, the Board will add neither of the requested issues.

12. Accordingly, it is ordered, That the petition to enlarge issues, filed October 6, 1972, by Las Vegas Valley Broadcasting Co., is granted to the extent indicated below, and is denied in all other respects; and

13. It is further ordered, That the issues in this proceeding are enlarged to include the following issues:

1. a. To determine whether the American Television Co., Inc., former licensee of Station KFSA-TV, Channel 5, Fort Smith, Ark., owned wholly by Donald W. Reynolds, engaged in fraudulent billing practices in violation of § 73.1205 of the Commission's rules and regulations, by sending invoices to distributors and manufacturers representing charges for advertising in excess of the amounts actually charged a local advertiser, and by certifying to the CBS and NBC Television Networks in certain documents that the licensee broadcast certain network programs in their entirety, including commercial content, whereas the licensee had deleted portions of said programs, including certain network commercial advertisements in the programs certified as having been broadcast in their entirety.

b. To determine whether Nevada Radio-Television, Inc., licensee of Station KOLO-TV, Channel 8, Reno, Nev., owned wholly by Donald W. Reynolds, engaged in fraudulent billing practices in violation of § 73.1205 of the Commission's rules and regulations, by certifying to the CBS Television Network in certain documents that the licensee broadcast certain network programs in their entirety, including commercial content, whereas the licensee had deleted certain network commercial advertisements in the programs certified as having been broadcast in their entirety.

c. To determine the effect, if any, of the evidence adduced under the foregoing issues, considered individually or together with the evidence adduced under Issues 1 (a), (b), and (c), on the comparative qualifications of Western Communications, Inc. (KORK-TV).

Adopted: March 16, 1973.

Released: March 23, 1973.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

[Dockets Nos. 19519, 19581; FCC 73R-123]

## WESTERN COMMUNICATIONS, INC., AND LAS VEGAS VALLEY BROADCASTING CO.

## Memorandum Opinion and Order Enlarging Issues

In re applications of Western Communications, Inc. (KORK-TV), Las Vegas, Nev., Docket No. 19519, File No. BRCT-327, for renewal of license; Las Vegas Valley Broadcasting Co., Las Vegas, Nev., Docket No. 19581, File No. BPCT-4465, for construction permit for new television broadcast station.

1. On January 18, 1973, Western Communications, Inc. (Western), filed its sixth motion to enlarge issues in this proceeding (38 FR 7140), requesting the Board to add the following issues:

To determine whether Mr. Meyer (Mike) Gold, vice president, director, 12.5 percent stockholder/subscriber and proposed full-time general manager of Las Vegas Valley Broadcasting Co., made misrepresentations to the Commission, or exhibited lack of candor, concerning his reasons for assigning his licenses for KLUC and KLUC-FM in December 1969, and the effect of these matters on the qualifications of Valley to be a licensee.

To determine whether grant of the application of Las Vegas Valley Broadcasting Co. for Channel 3 in Las Vegas would be in violation of § 73.636(a) of the Commission's rules, or in violation of the Commission's "cross-interest" policy.

2. Western alleges that Meyer (Mike) Gold, a vice president, a member of the Board of Directors, and a 12.5 percent stock subscriber and proposed full-time general manager of Las Vegas Valley Broadcasting Co. (Valley), as an individual formerly was the licensee of Stations KLUC and KLUC-FM, Las Vegas, Nev., and that on December 23, 1969, he tendered applications to assign those licenses to others, stating as his reason for the transfer:

Assignor desires to concentrate his time on the operation of station KLOM, Lompoc, Calif., of which he is president and 50 percent owner, and to develop a new syndicated program service.

Petitioner alleges that Gold has not in fact concentrated his time on the operation of KLOM in Lompoc nor has he developed a new syndicated program service or tried to do so. Moreover, Western notes that in Gold's deposition in the instant proceeding, taken January 8, 1973, he stated that after the sale of his Las Vegas radio stations, his only other business interest was KLOM; that he had more time on his hands which he devoted to his hobbies; that he devotes only 10 or 15 days out of the year at the most to KLOM; and that he now spends a little less time on the affairs of the KLOM station than he did before he sold his Las Vegas station. Moreover, Western notes that Gold stated on deposition that he sold his Las Vegas stations, which were not for sale at the time, because

\* The Board also has before it the Broadcast Bureau comments, filed Jan. 31, 1973; Valley's opposition, filed Feb. 22, 1973, and a reply to the opposition, filed by Western on Mar. 5, 1973.

he received an offer that was so attractive. Under these circumstances, Western contends, a misrepresentation issue must be added to this proceeding.

3. In opposition, Valley contends that Western's petition is late filed and that Western has not shown good cause for its delay. Valley submits an affidavit of Gold, who states that at the time he sold the Las Vegas stations, he did in fact intend to devote substantial time to the affairs of KLOM; however, after a trip to Lompoc, he ascertained: That the area was somewhat depressed, that his partner was doing an excellent job in operating the station, and that no useful purpose would be served by devoting his full time to the station's affairs. Moreover, Gold contends that the transcript of his deposition supports his contention that he and his son, Steven, did devote considerable effort to the development of a syndicated program service which did not prove to be successful.

4. On the current state of the record before us, the requested issue will be included in the proceedings. There are a number of inconsistencies among Gold's statement made at the time he transferred his station, at his subsequent depositions, and in his affidavit filed with the Review Board. In view of these inconsistencies, the questions can best be resolved in the context of the hearing process.

5. Western also requests addition of an issue to determine whether a grant of Valley's application would be in violation of § 73.636(a) of the Commission's rules or of the Commission's "cross-interest" policy. In support of this request, Western alleges that Steven J. Gold, who is the son of Meyer (Mike) Gold is a 51 percent stockholder, president, director, and general manager of Broadcast Associates, Inc., licensee of standard broadcast station KBMI, Henderson, Nev.; that Las Vegas and Henderson are located approximately 15 miles apart and that the entire city of Henderson lies within the proposed principal city and Grade A contours of Valley's proposed television station. Western notes that § 73.636(a) and the related cross-interest policy precludes the same person from acquiring an interest in both an AM and TV station serving substantially the same area, and argues that, although Steven Gold is not an officer, director, stockholder, or employee of Valley, the nature of the relationship between Steven Gold and his father and mother is such that a cross-interest issue should be added. More specifically, Western relies on the facts that Steven Gold is 28 years of age, unmarried, that he has resided with his parents at their home for the past several years, and that he will apparently continue to reside with them. Western also contends that Steven Gold and his parents have a record of close-knit relationships in the broadcasting business; that Steven Gold was employed full time at Stations KLUC and KLUC-FM until those stations were sold by Meyer Gold; that Steven Gold did not continue his employment at those stations after their sale; and that, after the sale of the sta-

## NOTICES

tions, Steven Gold was largely unemployed until he purchased his interest in Station KBMI. Western alleges further that there is a creditor/debtor or other form of intimate financial relationship between Steven Gold and his interest in KBMI, on one hand, and his mother and father on the other hand. In this regard, Western notes that Steven Gold relied upon a \$52,000 promissory note from his father to him, and a \$10,000 loan from his mother for his financial contribution to Broadcast Associates. Moreover, Western contends that KBMI and Valley have a common mailing address; that Steven Gold's accountant, W. Irving Haut, is the treasurer, a director, and a 12.5 percent stockholder in Valley, that the September 30, 1971, balance sheet of Mr. and Mrs. Meyer Gold filed with the KBMI amendment of April 3, 1972, is the same balance sheet filed by Meyer Gold with Valley's application 5 or 6 months earlier, and that the demographic survey relied on in the KBMI is the same demographic survey relied on by Valley, except that on three of the four pages of the copy used for KBMI, the Valley exhibit numbers have been lined through with pen or pencil. In these circumstances, Western contends, an issue to determine whether a grant will be in conflict with the Commission's rules or its cross-interest policy should be added to the proceeding.

6. The requested issue will be denied. Initially, the Board agrees with Valley that the request for this issue is untimely and that good cause for the delay has not been shown. Although Western contends that the matters relied upon were not available to it prior to Mr. Gold's deposition, it is apparent that these circumstances are such that Western could have, with due diligence, known of them in time to file a timely request for the issue. As to the merits of the request, Steven Gold is not a stockholder-subscriber, officer, director, or employee of Valley. Nor do either of his parents hold any position with or stock in Broadcast Associates. Moreover, based on our examination of the pleadings, we are not satisfied that the relationship between Steven Gold and his parents is such as to warrant the requested issue. It is clear from the affidavits filed with the opposition that as of that date Steven Gold was not financially dependent upon his parents. The \$52,000 note to Steven Gold was given to him by his father as a bonus for past service and the loan from his mother has been fully repaid. Thus, no debtor-creditor relationship exists. Nor do we find grounds in the other circumstances alleged to warrant inclusion of the requested issue. The Commission has consistently held that family relationship alone is insufficient to create a presumption of common control, and the allegations relied on by the petitioner show little more than an ordinary family relationship. Cf. "Community Broadcasting Co. of Hartsville," 16 FCC 2d 891, 15 RR 2d 1093 (1969); and "L & S Broadcasting Co.," 6 FCC 2d 535, 9 RR 2d 423 (1967).

7. Accordingly, it is ordered, That the sixth motion to enlarge issues, filed by Western Communications, Inc., on January 18, 1973, is granted to the extent indicated herein, and is denied in all other respects; and the issues are enlarged as follows:

To determine whether Mr. Meyer (Mike) Gold, Vice President, Director, 12.5 percent stockholder/subscriber and proposed full-time general manager of Las Vegas Valley Broadcasting Co., made misrepresentations to the Commission, or exhibited lack of candor, concerning his reasons for assigning his licenses for KLUC and KLUC-FM in December 1969, and the effect of these matters on the basic or comparative qualifications of Valley to be a licensee.

8. It is further ordered, That burden of going forward with the evidence under the issue added herein is on Western and the burden of proof is on Valley.

Adopted: March 19, 1973.

Released: March 23, 1973.

## Memorandum Opinion and Order Enlarging Issues

In re applications of WIOO, Inc., Carlisle, Pa., Docket No. 19468, file No. BPH-6572; Howard J. Hilton, John E. McGowan, and John E. Hilton, doing business as Hilton, McGovern & Hilton, Carlisle, Pa., Docket No. 19469, File No. BPH-6631; Alexander Contract and Sylvia Contract doing business as Cumberland Broadcasting Co., Carlisle, Pa., Docket No. 19471, File No. BPH-7404, for construction permits.

1. The above-captioned mutually exclusive applications for an FM broadcast station in Carlisle, Pa., were designated for hearing by Commission Order, FCC 72-233, 34 FCC 2d 919, released March 24, 1972. Since then, the Board has added several issues against both WIOO, Inc. (WIOO), and Cumberland Broadcasting Co. (Cumberland), including issues inquiring into the character qualifications of each. Now before the review board are two petitions requesting the addition of more issues to this proceeding (38 FR 6430): (a) A further petition to enlarge issues, filed October 30, 1972, by WIOO; and (b) a petition to enlarge issues, filed

\* See, e.g., FCC 73R-45, 26 RR 2d 704, released Jan. 31, 1973, and 37 FCC 2d 740, 25 RR 2d 567, released Oct. 19, 1972.

\* The following related pleadings are also before the Board: (1) Broadcast Bureau's comments, filed Nov. 14, 1972; (2) Cumberland's opposition, filed Nov. 22, 1972; (3) Cumberland's supplement to its opposition, filed Nov. 29, 1972; and (4) WIOO's reply, filed Dec. 11, 1972.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

No. 61—Pt. I—11

## NOTICES

January 10, 1973, by WIOO.<sup>2</sup> The "further petition" requests the addition of the following five issues against Cumberland:

(a) To determine whether the hiring practices and policies of Cumberland Broadcasting Co. will comport with equal opportunity employment requirements.

(b) To determine whether Cumberland Broadcasting Co. may be relied upon to program its station as proposed, and in the best interests of the entire population of its service area, with particular reference to the black population.

(c) To determine the history of dealings of Cumberland Broadcasting Co.'s principals with blacks and the surrounding facts and circumstances.

(d) To determine whether the principals of Cumberland Broadcasting Co. possess the requisite character qualifications to be a Commission licensee.

(e) To determine, in light of evidence adduced under the foregoing issues, the effect thereof upon the comparative and absolute qualifications of Cumberland Broadcasting Co.

The January petition arose out of Cumberland's response to WIOO's further petition and requests the addition of an issue to determine whether Cumberland's principals knowingly submitted false information to the Commission. The requests will be considered *seriatim*.

#### WIOO'S FURTHER PETITION

2. In its October 30, 1972, petition, WIOO makes several allegations which purportedly evidence on the part of Cumberland principal Alexander Contract, a "clear pattern of discrimination and denial of opportunity", and which, in WIOO's opinion, demonstrate that Cumberland "would not in fact treat its black employees in the fair and nondiscriminatory manner which Commission policy requires." WIOO also accuses Contract of salacious behavior with several women in Carlisle, contending that this conduct, too, reflects adversely on Cumberland's character qualifications. To support its allegations, petitioner relies on several affidavits and unsworn statements which it attaches to its petition. The affidavits and statements are from local residents who allege that they know Contract and who denounce him for various reasons (e.g., racial discrimination, salacious behavior). WIOO deduces from this potpourri of complaints and denunciations that "(1) it would be completely unrealistic for the Commission to expect fair and sympathetic treatment of black persons, either as employees or as members of the public, by a station owner having the attitudes described here." Petitioner relies on "Chapman Radio and Television Co.", 24 FCC 2d 282, 19 RR 2d 589 (1970) (hereinafter "Chapman I"), as precedent for inquiring into whether the hiring practices "comport with Com-

<sup>2</sup> The following related pleadings are also before the Board: (1) Comments of the Broadcast Bureau, filed Jan. 23, 1973; (2) opposition of Cumberland, filed Feb. 2, 1973; and (3) reply of WIOO, filed Feb. 19, 1973.

<sup>3</sup> Contract is the owner and operator of a Carlisle laundry business.

mission policy, and "Chapman Radio and Television Co.", 34 FCC 2d 159, 24 RR 2d 51 (1972) (hereinafter "Chapman II"), in support of the contention that Contract's rental practices as a Carlisle landlord<sup>3</sup> also "raise the most serious questions about the spirit in which Cumberland could reasonably be expected to follow equal employment policies." WIOO acknowledges that its request is filed "sometime after the original designation for hearing", but argues that it was unaware of the serious matters raised "until recently".

3. The Broadcast Bureau supports the addition of an issue with respect to Contract's employment policies, and also favors an evidentiary inquiry into allegations concerning Contract's discriminatory policies as a landlord. Citing "Chapman II", the Bureau asserts that alleged past discriminatory conduct constitutes "clear cause for exploration by the Commission in the form of a more searching scrutiny of the applicant in this important respect." However, the Bureau does not concur with WIOO's request for a programing inquiry because, in the Bureau's view, the petitioner fails to show the shortcomings of Cumberland's proposal vis-a-vis the needs of the black community and neglects to substantiate its claims with supporting factual data. Finally, the Bureau recommends the use of "broad language" in framing an issue in order to facilitate "inquiry into the other allegations which have a reasonable relationship" to a determination of Contract's character qualifications.

4. Cumberland's opposition is based upon both procedural and substantive grounds. Cumberland first impugns the veracity of all of WIOO's affidavits and unsworn statements by charging that one affiant was paid by WIOO; Cumberland then points to the untimeliness of the petition wherein "good cause isn't ever mentioned"; and finally Cumberland suggests that the subject matter raised in the petition is more properly within the jurisdiction of the Human Relations Commission of the Commonwealth of Pennsylvania. On the merits, Cumberland denies that Contract has exhibited bias or prejudice, or ungentlemanly behavior. A number of affidavits and statements are submitted which purportedly illumine Contract's "true" relationship with the black community and which, in Cumberland's words, present "(h)ardly a picture of a racist or one who has discriminated with respect to race," but rather "one who has helped black people tremendously and treats them with fairness and respect."

5. In reply, WIOO characterizes Cumberland's charge with respect to the payment of an affiant as "hearsay" and "conjecture," and swears that no money was ever exchanged. WIOO submits that Contract's representations in the opposition are either unverified or unsubstantiated and that WIOO's allegations continue to raise questions of a sufficiently serious nature so as to necessitate an

<sup>3</sup> Contract rents apartments in Carlisle.

inquiry, citing the Edgefield-Saluda case.<sup>4</sup>

6. The Review Board will deny the requested issues. First, the petition is grossly late because more than 7 months have expired since the designation order was published on March 24, 1972, and because the facts relied upon allegedly occurred prior thereto. Further, petitioner's explanation that it was unaware of the matters raised "until recently" is too vague and less than adequate to excuse the untimeliness. "WENY, Inc.", 12 FCC 2d 606, 12 RR 2d 1160 (1968). The Board also agrees with Cumberland that the issues raised should be initially pleaded before the Pennsylvania Human Relations Commission, a local forum better suited to handle complaints of the nature submitted by WIOO. The Commission is, of course, very concerned about the specific allegations encompassing discrimination by applicants for broadcast licenses.<sup>5</sup> However, the allegations in WIOO's petition relate to conduct in a local business not *per se* within our jurisdiction, no action in an appropriate forum is pending, and the allegations themselves do not raise a serious question regarding discrimination. The Board has in the past ordinarily declined to intervene in matters of alleged violations of Federal or local law where the matters have not been presented to or acted upon by the authority charged with the responsibility of interpreting and enforcing those laws. See, e.g., "Bangor Broadcasting Corp.", 33 FCC 2d 687, 689, 23 RR 2d 883, 886 (1972); "Lamar Life Broadcasting Co.", 26 FCC 2d 112, 120, 20 RR 2d 509, 520 (1970). Under the particular circumstances of this case, we are of the view that this principle should be applied here. Moreover, the charges, particularly those regarding proposed programing, amount to mere speculation and unsupported conclusions, and, as such, are insufficient to require the addition of an issue.<sup>6</sup>

7. Neither do the "Chapman" cases, *supra*, support the addition of an issue in this proceeding. In "Chapman I," the Commission "deem(ed) it appropriate to delve into the matter of (the applicant's) employment policies" because of an adverse civil judgment, because of possible misrepresentations concerning

<sup>4</sup> The "Edgefield-Saluda Radio Co. (WJES)", 5 FCC 2d 148, 8 RR 2d 611 (1966).

<sup>5</sup> "If a violation has been established, this clearly raises a question as to the applicant's qualifications" and "... even where no violation of a specific statute is established or alleged, specific allegations may raise serious public interest issues warranting a full hearing." "Notice of Proposed Rule-making to Require Broadcast Licensees to Show Nondiscrimination in Their Employment Practices," 13 FCC 2d 766, 769, 13 RR 2d 1645, 1650 (1968), and cases cited therein.

<sup>6</sup> The Board notes, and the petitioner as much as acknowledges, that Cumberland's survey includes members of the black community, including leaders thereof, and that the applicant has proposed certain programs which are apparently responsive to the needs and interests of that community.

the incident involved therein, and because of the applicant's "apparent failure to contact members of minority groups with regard to community needs \* \* \*." In "Chapman II," an issue was added to inquire "into the significance of the civil judgment" entered against two of the applicant's principals for Civil Rights Act violations, in the evaluation of the applicant's qualifications, but inquiry was stayed pending resolution of an appeal from the civil judgment. In addition, the case was remanded to the presiding judge for a further hearing under an existing equal opportunity employment issue encompassing "an inquiry into the civil rights compliance of the companies owned by (the applicant's) directors \* \* \*." The important and distinctive elements are missing in the instant proceeding: there is no outstanding adverse judgment against Cumberland; there is none pending; and there is no existing equal opportunity employment issue. "Chapman I and II" are, therefore, inapposite.

#### WIOO'S JANUARY PETITION

8. Cumberland, in opposition to WIOO's further petition, charged that WIOO had purchased a sworn statement, and, in support, appended an affidavit of George Corbin, dated November 10, 1972, relating an allegedly incriminating conversation he had with the paid affiant, his brother, WIOO. In its reply, denied the allegation, and on January 10, 1973, filed a petition requesting the addition of an issue:

To determine the circumstances under which Cumberland submitted the affidavit of "George Corbin" with its November 22, 1972, opposition, and in the light thereof, to determine whether Cumberland's principals knowingly submitted false information to the Commission.

In support, WIOO submits an affidavit of George Corbin, dated January 6, 1973, in which he relates that he was out of town on November 10, 1972 (the date of the alleged first Corbin affidavit), that he did not sign that affidavit, and further, that the facts regarding payment for the sworn statement are untrue. The notary public for the November 10 affidavit, states that the individual signing that affidavit, and the individual who appeared before him on January 8, 1973, are not the same person. The Broadcast Bureau supports the addition of the requested issue, urging that the serious public interest questions raised override the defect of untimeliness.<sup>7</sup> The Bureau also suggests the addition of an issue encompassing a determination of "the effect of a resolution of the requested issue on Cumberland's requisite and/or comparative qualifications" which, the Bureau points out, the Board did in adding a similar issue in this proceeding (37 FCC 2d 740, 25 RR 2d 567, released October 19, 1972).

9. In opposition, Cumberland characterizes WIOO's petition as a "total fabri-

<sup>7</sup> In support, the Bureau cites "RKO General, Inc. (WNAC-TV)", 30 FCC 2d 138, 22 RR 2d 178 (1971).

cation". George Corbin submits two more affidavits in which he swears that he is the same individual who signed all of the affidavits bearing the signature of his November 10 affidavit (submitted with Cumberland's opposition to the further petition); and that he repudiates the truth of the affidavits signed by him and submitted by WIOO with its January petition. Corbin claims that he signed the affidavits for WIOO while under the influence of alcohol offered to him by a WIOO principal, who also paid him. Cumberland submits a laboratory report of a document examiner who finds that all of the signatures of "George Corbin" were "written by the same writer". Cumberland concludes that if the issue is to be added at all, it should include a determination of "the facts and circumstances concerning the procurement of WIOO, Inc. of its January 6, 1973, affidavit and its January 8, 1973, statement."

10. WIOO, in reply, submits affidavits from one of its principals, from various witnesses and from its attorney, all of whom deny any wrongdoing on the part of WIOO, and attempt to rebut the countercharges asserted by Cumberland. WIOO notes Cumberland's suggestion to inquire into the circumstances surrounding the procurement of all of the affidavits in question, and "earnestly entreats" the Board to go into the "entire matter".

11. It appears from an examination of the affidavits submitted to the Board that someone may not be telling the truth regarding this matter and, because the glaring conflicts in the affidavits preclude our resolution of the serious questions raised, they must be resolved at the hearing. "Christian Voice of Central Ohio," 26 FCC 2d 76, 81-82, 20 RR 2d 389, 395 (1970); "Sumiton Broadcasting Co., Inc.", 15 FCC 2d 400, 404, 14 RR 2d 1000, 1005 (1968), and cases cited therein. Because both parties agree that all the matters raised should be subject to inquiry at the hearing, the Board will add appropriate issues against both Cumberland and WIOO.

12. Finally, the Board notes that, according to the Commission's files, no less than 25 interlocutory requests have been filed in this proceeding, giving rise to responsive pleadings, which, in turn, generate supplements and supplements to supplements, and more pleadings responsive thereto. This activity frustrates an orderly and efficient administrative process, and introduces unnecessary delay. In view of the plethora of pleadings filed in the instant proceeding, the Board suggests that the parties may wish to re-appraise their approach to the case, with the understanding that the ultimate determination will be based on facts of record rather than arguments and allegations contained in a seemingly endless chain of interlocutory pleadings. See "RKO General, Inc. (WNAC-TV)", 34 FCC 2d 736, 737, 24 RR 2d 200, 201 (1972).

13. Accordingly, it is ordered, That the further petition to enlarge issues, filed October 30, 1972, by WIOO, Inc., is denied; and

14. It is further ordered, That the petition to enlarge issues, filed January 10, 1973, by WIOO, Inc., is granted; and

15. It is further ordered, That the issues in this proceeding are enlarged by the addition of the following issues:

(a) To determine the facts and circumstances surrounding the procurement of the affidavits of Jerry Corbin and George Corbin in connection with the pleadings submitted by Cumberland Broadcasting Co. and WIOO, Inc.

(b) To determine in light of the evidence adduced pursuant to issue (a), the effect thereof on the basic and/or comparative qualifications of Cumberland Broadcasting Co.

(c) To determine in light of the evidence adduced pursuant to issue (a), the effect thereof on the basic and/or comparative qualifications of WIOO, Inc.

16. It is further ordered, That the burden of proceeding with the introduction of evidence under the issues added herein shall be on WIOO, Inc., and the burden of proof under issues (a) and (b) shall be on Cumberland Broadcasting Co., and the burden of proof under issues (a) and (c) shall be on WIOO, Inc.

Adopted: March 16, 1973.

Released: March 22, 1973.

[Docket No. 71-92]

# C. E. TOLONEN CO., INC.

## Order of Suspension

By motion filed July 12, 1972, respondent requested that the Commission order the subject proceeding discontinued with suspension of respondent's independent ocean freight forwarder license (FMC 1347) for a period of 90 days from the service date of the order. Hearing counsel have no objection to respondent's motion.

Therefore, it is ordered, That pursuant to section 44 of the Shipping Act, 1916 (46 U.S.C. 841(b)) and § 510.9(c) of the Commission's General Order 4 (46 CFR 510.9(c)), the independent ocean freight forwarder license (FMC 1347), issued in the name of C. E. Tolonen Co., Inc., is hereby suspended for 90 days from the date of service of this order.

It is further ordered, That license No. 1347 be returned to the Commission to be held during the period of suspension which will expire June 24, 1973.

It is further ordered, That respondent be allowed to complete any forwarding transactions in which it is currently engaged, but that respondent neither solicit nor accept any new forwarding business during this suspension period.

It is further ordered, That, provided respondent does not operate as an independent ocean freight forwarder, except as set forth in the preceding paragraph, this proceeding be discontinued upon completion of the suspension period.

It is further ordered, That should respondent operate as an independent ocean freight forwarder during this suspension period, its license will be subject to revocation.

It is further ordered, That a copy of this order be published in the FEDERAL REGISTER.

By the Commission.

[SEAL] FRANCIS C. HURNEY,  
Secretary.

## NOTICES

[Docket No. 72-47]

# TRANS-PACIFIC FREIGHT CONFERENCE OF JAPAN

## Extension of Authority for Intermodal Services; Order of Clarification

The Commission instituted this proceeding on September 1, 1972, in response to a petition filed by Seatrain Lines, Inc., requesting the Commission to reconsider its approval of Agreement No. 150-54.

Agreement No. 150-54, as approved by the Commission on March 30, 1972, modifies the basic agreement of the Trans-Pacific Freight Conference of Japan to permit it to: (1) Broaden its jurisdiction to include inland points in the United States; (2) establish port-to-point, including through and joint, rates in addition to its conventional port-to-port rates; and (3) prohibit any conference line from negotiating, establishing, publishing, filing, or operating under "any transportation arrangement except as the conference may specifically authorize in its tariff."

When Agreement No. 150-54 was originally noticed in the FEDERAL REGISTER it was protested by both Seatrain and American Mail Line, Ltd. (AML). The gravamen of these parties' protests was that the approval of the subject agreement would compel them to cancel their intermodal tariffs on file with this Commission and the Interstate Commerce Commission. AML subsequently withdrew its protest when on March 3, 1972, the Conference adopted a resolution which permits any Conference line to publish its own intermodal tariffs until such time as the Conference, pursuant to Agreement No. 150-54, adopts its own Conference-wide intermodal tariff.

Although Seatrain did not withdraw its protest to the approval of Agreement No. 150-54, it joined the Conference on March 23, 1972. Believing that the Conference-adopted resolution satisfied Seatrain's complaint (by allowing it to publish its own intermodal tariffs), the Commission approved Agreement No. 150-54.

Subsequently, Seatrain filed a petition for reconsideration of the Commission's approval of Agreement No. 150-54, and the Commission instituted this proceeding. In view of the circumstances surrounding its prior approval of Agreement No. 150-54, particularly that Seatrain is permitted to retain and utilize its "landbridge" tariff, the Commission did not vacate its order of approval, but rather set the matter down for hearing as to whether the agreement should be granted continued approval.

This resolution further provides that cargoes carried by Conference members under intermodal tariffs which are permitted by the Conference are fully subject to the Conference's self-policing provisions, including requirements for the reporting of misrating and statistical data.

In addition to the continued approvability of Agreement No. 150-54, the Commission also raised as an issue for determination in this proceeding the question of whether:

\* \* \* any modification of Agreement No. 150-54 is warranted in order to establish more clearly defined standards governing the cancellation of individual intermodal tariffs published by conference members or in order to restrict the rights of members to vote on matters related to intermodal traffic and tariffs to only those lines who offer and participate in such services, or in order to prohibit the application of Conference self-policing procedures to independent tariffs published by any of its member lines.

In response to a Seatrain prehearing memorandum, and as a result of certain discussions held at the prehearing conference, as well as the intervention of several ports into this proceeding, the Conference has now filed a motion to clarify issues, to which Seatrain and Hearing Counsel have replied. This matter is now before the Commission for consideration and disposition.

The Conference, through its motion, requests that the Commission rule that its order of investigation and hearing does not raise the following issues for determination in this proceeding:

1. The question whether by adoption of the Conference resolution of March 3, 1972, the Conference had carried out an unapproved section 15 agreement without the Commission's prior approval;

2. The question whether approval of Agreement No. 150-54 may cause the diversion of traffic from gulf ports to movement through west coast ports; and

3. The question whether the Commission ordered an unlimited de novo review of Agreement No. 150-54.

Seatrain believes that all three issues described above are incorporated in the Commission's Order of Investigation and Hearing served in this proceeding and

Seatrain in its reply, questions, as a "preliminary matter", whether the Conference's motion is properly before the Commission in view of the requirements of Rule 5(m) of the Commission's rules of practice and procedure that "all motions be addressed to and passed upon by the presiding officer". Seatrain views this rule as requiring the Administrative Law Judge "to rule on \* \* \* (the Conference's) motion in the first instance" and accuses the Conference of attempting to prevent the presiding officer from performing his duty under the regulations by initially filing its motion with the Commission. Whatever may have been the merits of Seatrain's argument at the time it was made, it is clear that Judge Levy's referral of the Conference's motion to the Commission for disposition satisfies the requirements of Rule 5(m). In transmitting the motion to the Commission, the presiding officer has for all intents and purposes "passed upon" said motion. The Conference's motion to clarify, therefore, is properly before the Commission.

accordingly urges the Commission to deny the Conference's motion to clarify in toto.

Hearing Counsel in their reply suggest that the Commission clarify its order as requested with regard to the first issue raised, but decline decision as to the remainder of the motion on the grounds that it is merely an attempt to narrow issues and that "the responsibility for narrowing issues at this stage of the proceeding rests with the parties and the Presiding Administrative Law Judge".

Since we feel that our Order of Investigation and Hearing of September 1, 1972, fully and adequately sets forth the matters of fact and law to be explored in this proceeding, our disposition of the Conference's motion here is offered not so much as a clarification as it is an affirmation thereof.

First, the Conference and Hearing Counsel are correct in reading our order to exclude the status of the Conference's resolution of March 2, 1972, from the scope of this proceeding. The question of whether the Conference resolution constitutes an unfiled and unapproved section 15 agreement is not, nor was it intended to be, an issue for resolution in this proceeding. While we did specifically express an interest in, and raise issues as to, those portions of the resolution which relate to the cancellation of individual intermodal tariffs and the application of Conference self-policing procedures to such tariffs, the status of the resolution itself insofar as its filing and implementation are concerned was not made an issue for consideration.

Since the resolution appears to be a proper and acceptable implementation of the authority accorded in Agreement No. 150-54, we saw no reason when instituting this proceeding, nor do we see any now, to consider the resolution anything other than an interstitial type of arrangement. We are therefore acceding to the Conference's request by making it clear, if it was not before, that our order of September 1, 1972, does not include as an issue the question whether by adoption of the Conference resolution of March 3, 1972, the Conference had carried out an approved section 15 agreement without the Commission's prior approval.

We cannot agree with the Conference, however, that (1) possible "cargo diversion" is not an issue to be considered in this proceeding, and/or (2) the Commission did not order an "unlimited de novo review" of Agreement No. 150-54.

While the Commission did not specifically assign "cargo diversion" as an issue for determination in this proceeding, the fact remains that the question of whether Agreement No. 150-54 does result in the diversion of cargo generally is a matter which must be considered along with all the others, in determining the continued approvability of the agreement under investigation. It is axiomatic that any matter that legitimately goes to the approvability of an agreement before the Commission raises a proper issue for consideration in that proceeding. Accordingly, evidence pertaining to cargo diversion

## NOTICES

should be admitted if it is reasonably related to the ultimate issue to be resolved in this proceeding, i.e., whether Agreement No. 150-54 should be disapproved, canceled, or modified, and we would expect the Administrative Law Judge to make whatever rulings are necessary in that respect.

Finally, as regards the scope of the Commission's investigation in this proceeding, we believe that the first ordering paragraph, to wit:

Therefore, it is ordered, That a proceeding be instituted pursuant to sections 15 and 22 of the Shipping Act, 1916 (46 U.S.C. 814, 821) to determine whether Agreement No. 150-54 should be disapproved, canceled, or modified in accordance with the standards enunciated in section 15 of the Act.

clearly indicates that the Commission intended to subject Agreement No. 150-54 to a complete and thorough review. Thus, while the other ordering paragraphs do single out particular matters which we felt should be considered, they were not intended to limit the scope of the Commission's review in anyway. Agreement No. 150-54, therefore, is before the Commission in this proceeding for all intents and purposes, and any attempt by the Conference to limit the proceeding to anything less than a full and comprehensive investigation must be rejected.

Therefore, it is ordered, That the motion to clarify filed by the Trans-Pacific Freight Conference of Japan in this proceeding is, except to the extent granted herein, denied.

By the Commission.

[SEAL] FRANCIS C. HURNEY,  
Secretary.

## FEDERAL POWER COMMISSION

[Docket No. R-432]

# MONTHLY REPORT OF COST AND QUALITY OF FUELS FOR STEAM ELECTRIC PLANT

## Order Permitting Intervention

MARCH 27, 1973.

On February 26, 1973, Consolidated Edison Company of New York (Petitioner), filed a petition to intervene in the matter of Docket No. R-432, Monthly Report of Cost and Quality of Fuels for Steam Electric Plants, and an accompanying motion requesting: (1) Amendment of Commission regulations to provide for the reporting of fossil fuel cost information on the basis of average cost per million B.t.u.; (2) Commission authorization pendente lite to report fuel cost information only on an average cost per million B.t.u. basis; and (3) confidential treatment by the electric utilities on Form No. 423, and release of that information on a confidential basis only to other Federal agencies.

By order issued March 2, 1973, the Commission denied a Petition for Amendment of the Commission's regulations with respect to Form No. 423, as promulgated under Order No. 453, requesting revision to: (1) Require the reporting of average cost of fossil fuels,

rather than actual prices; (2) eliminate the reporting of identity of the fuel supplier and the date of contract expiration; and (3) assure that Form No. 423 data be made available only to Commission members or other Federal agencies. The Commission issued an additional order March 2, 1973, denying a motion to stay pendente lite the public dissemination of information required by Commission Order No. 453 to be provided on Monthly Form No. 423, and to treat Form No. 423 confidentially.

The Commission ruled upon similar matters contained in Petitioner's motion in the orders of March 2, 1973. Petitioner's allegations here do not differ materially from those considered and rejected on March 2, 1973. Petitioner maintains that the public disclosure of the specific price data on fuel supply costs contained in Form No. 423 is causing injury to itself and its customers by providing its fuel suppliers with specific price data for use in negotiations on new contracts; that the collection and dissemination of such data are inconsistent with the antitrust laws; and that the purposes for which Form No. 423 was adopted can be satisfied without public disclosure. We reject these same allegations for reasons set forth in the orders of March 2, 1973.

Those orders, however, did allow Petitioners in that case to file an offer of proof, under oath, on or before April 2, 1973, setting forth facts and other circumstances to support their allegations that disclosure of data under Form No. 423 resulted in injury to electric utilities and that such injury outweighs the public benefit from full disclosure and the relief which the Commission can grant, if any. We will grant Consolidated Edison Co. a similar opportunity in this docket to submit a written Offer of Proof on or before April 2, 1973.

The Commission finds:

(1) The participation in this proceeding of Petitioner may be in the public interest.

(2) Petitioner's Motion for Confidential Treatment of Form No. 423 and amendment of the Commission's regulations with respect to Form No. 423 should be denied.

(3) Petitioner should be afforded the opportunity to file an Offer of Proof, under oath, on or before April 2, 1973, to support its allegations of injury.

The Commission orders:

(1) Petitioner is hereby permitted to intervene in this proceeding subject to the rules and regulations of the Commission: *Provided, however*, That the participation of the intervenor shall be limited to matters affecting rights and interests specifically set forth in its petition to intervene: *And provided, further*, That the admission of intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders issued by the Commission in the proceeding.

(2) Petitioner's Motion for Confidential Treatment of Form No. 423 and Amendment of the Commission's regulations with respect to Form No. 423 is hereby denied.

## NOTICES

(3) Petitioner may file an Offer of Proof, under oath, on or before April 2, 1973, setting forth facts and other circumstances to support its allegation that disclosure of data under Form No. 423 has resulted in injury to electric utilities and that such injury outweighs the public benefit from full disclosure and the relief which the Commission can grant, if any.

By the Commission.

[SEAL] KENNETH F. PLUMB,  
Secretary.

# **SUPPLY-TECHNICAL ADVISORY TASK FORCE—LIQUEFIED NATURAL GAS (LNG)**

## **Agenda of Meeting**

Meeting to be held in Conference Room 2043 of the Federal Power Commission, 441 G Street NW., Washington, DC, April 3, 1973—9 a.m. Presiding: Mr. Randolph E. Mathura, Alternate TF FPC Survey Coordinating Representative and Secretary.

1. Call to Order and Introductory Remarks—Mr. Mathura.

2. Objectives and Purposes of Meeting: A. Discussion of the activities and progress of the Task Force—Mr. George D. Carameros, Jr., Director, Supply-Technical Advisory Task Force—Liquefied Natural Gas (LNG).

B. Discussion of the draft of the Task Force Report—Mr. Carameros.

C. Discussion of the environmental aspects concerning the work of the Task Force—Mr. Carameros.

D. Status of assigned work and estimated date for completion—Mr. Carameros.

E. Time of the next meeting.

F. Other business.

3. Adjournment—Mr. Mathura.

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the Task Force, which statements, if in written form, may be filed before or after the meeting, or if oral, at the time and in the manner permitted by the Task Force.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-7616]

## **CITIZENS UTILITIES CO.**

### **Notice of Application**

MARCH 26, 1973.

Take notice that on February 9, 1973, Citizens Utilities Co. (Applicant), filed a supplemental application seeking an order pursuant to section 204 of the Federal Power Act authorizing the issuance of short-term promissory notes in an aggregate principal amount not to exceed \$27,500,000 outstanding at any one time.

Applicant is incorporated under the laws of the State of Delaware and is qualified to do business in the States of

Arizona, Colorado, Connecticut, Hawaii, Idaho, and Vermont.

The notes are to be issued pursuant to a credit arrangement with Marine Midland Bank—New York, or, in the alternative, in the form of commercial paper to an established commercial paper dealer or dealers for resale in the customary commercial paper market without limitation as to the number of offerees or purchasers public. All notes are to have a final maturity on or before April 2, 1974. The interest rate for notes issued pursuant to the bank credit agreement shall be at the prime commercial interest rate at Marine Midland Bank—New York for 90 day notes as of the date of issuance. The maximum principal amount of all notes to be issued pursuant to the supplemental application shall not exceed \$27,500,000 outstanding at any one time.

The net proceeds from the sale of the notes will be used, together with other funds of the Applicant, for the replenishment of the treasury for expenditures for current transactions and for the construction, extension, and improvement of facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 2, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 73-6095 Filed 3-29-73; 8:45 am]

[Docket No. CI73-614]

## **EXXON CORP.**

### **Application**

MARCH 23, 1973.

Take notice that on March 19, 1973, Exxon Corp. (Applicant), P.O. Box 2180, Houston, TX 77001, filed in Docket No. CI73-614 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to South Texas Natural Gas Gathering Co. from the Aurora Field Area, Jim Hogg County, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell up to 7,500 Mcf of gas per day until February 1, 1974, at 38 cents per Mcf at 14.65 p.s.i.a. within the contemplation of § 2.70 of the Com-

mission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before April 9, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

[Docket No. RP73-4]

## **GREAT LAKES GAS TRANSMISSION CO.**

### **Further Extension of Time and Postponement of Hearing**

MARCH 20, 1973.

On March 15, 1973, Natural Gas Pipeline Company of America filed a motion for an extension of the procedural dates previously fixed by notice issued January 4, 1973. The motion states that all parties concur in or have no objection to the requested postponement.

Upon consideration, notice is hereby given that the procedural dates in the above matter are further modified as follows:

Service of Intervener evidence, April 17, 1973.  
Service of Great Lakes' rebuttal evidence, May 18, 1973.  
Commencement of cross-examination, June 5, 1973 (10 a.m., e.d.t.).

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-8076]

## **GULF STATES UTILITIES CO.**

### **Amendatory Application**

MARCH 23, 1973.

Take notice that on March 14, 1973, Gulf States Utilities Co. (Applicant), filed an amendment to its Interconnection and Interchange Agreement pursuant to section 205 of the Federal Power Act and Part 35 of the regulations issued thereunder, between Applicant and Beauregard Electric Cooperative, Inc. (Coop), and designated in Gulf States Utilities Company Rate Schedule FPC No. 73. The amendment gives notice that service between Applicant and Coop will commence at or near Hecker, La., located 10 miles north of Iowa, La., on March 9, 1973. Delivery at this point will be made over a 3 phase wye, 7,620/13,200 volt facility with an initial load of 250 kw.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 6, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-8077]

## **GULF STATES UTILITIES CO.**

### **Supplemental Applications**

MARCH 23, 1973.

Take notice that on March 14, 1973, Gulf States Utilities Co. (Applicant), filed a supplemental application, pursuant to section 205 of the Federal Power Act and Part 35 of the regulations issued thereunder, relating changes in points of delivery in accordance with Interconnection and Interchange agreements between Applicant and (1) Sam Rayburn Dam Electric Cooperative, Inc., designated Gulf States Utilities Company Rate Schedule FPC No. 98, and (2) Sam Houston Electric Cooperative, Inc., agreement designated Gulf States Utilities Company Rate Schedule FPC No. 69.

According to the application Applicant proposes to discontinue its 13.2 kv. service to aforementioned cooperatives at the following delivery points:

(1) Effective February 20, 1973, at the Cude Cemetery Road metering point located on Cude Cemetery Road at FM

## NOTICES

Road 830 southwest of Willis, Tex., and (2) Effective February 23, 1973, at Coldsprings, Tex., located on Coldsprings Highway 150 West.

The Applicant also proposes to commence delivery of service at SHECO Metering Point, located 4 miles east of SHECO Substation on Line No. 565 to above-mentioned cooperatives. This new service will deliver 3,400 kv.-a., 34.5 kv. at the above point, effective on February 23, 1973.

Additional temporary service between Applicant and aforementioned cooperatives is proposed to be delivered to a point on FM Road 1011, located 0.3 mile off State Highway 146 north of Liberty, Tex. This facility will carry a voltage of 13.8 kv.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 6, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

[Docket No. E-7898, etc.]

## **MINNESOTA POWER & LIGHT CO., ET AL.**

### **Notice of Applications**

MARCH 22, 1973.

Take notice that each of the applicants listed herein has filed an application pursuant to section 204 of the Federal Power Act and Part 35 of the regulations issued thereunder.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 12, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The applications are on file with the Commission and available for public inspection.

Docket No.	Date filed	Name of applicant
E-7898	Dec. 8, 1972	Minnesota Power & Light Co.

Applicant files September 22, 1972, Transmission Service Agreement between Lake Superior District Power Co., and Minnesota Power & Light Co. This Agreement amends Rate Schedule FPC No. 108 by including U.S. Bureau of Reclamation replacement and maintenance power and energy. The agreement is to take effect as soon as possible.

Docket No.	Date filed	Name of applicant
E-7984	May 8, 1972	Consumers Power Co.
	June 12, 1972	The Detroit Edison Co.

Consumers Power Co. and the Detroit Edison Co. file separate Agreements for sale of portion of generating capability of Ludington Pumped Storage Plant by Consumers and Detroit Edison to Commonwealth Edison Co., dated June 1, 1971, by and among Consumers Power Co., Detroit Edison Co., Commonwealth Edison Co. and Indiana & Michigan Electric Co. Applicants also file August 15, 1971, amendments to the Agreement. The Agreements become effective (a) on the date on which the fifth unit of the Ludington Plant is declared to be commercial operation if such date is prior to January 1, 1974, or (b) on January 1, 1974 if at least one unit of the plant is declared to be in commercial operation on or before January 1, 1974, or (c) on the date on which the first unit of the Plant is declared to be in commercial operation if such date is subsequent to January 1, 1974, whichever of (a), (b) or (c) occurs first.

Docket No.	Date filed	Name of applicant
E-7990	Jan. 22, 1973	Northern States Power Co.

Applicant files October 23, 1972, Supplement No. 1 to the Transmission Service Agreement, dated August 31, 1966, between Renville Sibley Cooperative Power Association and Northern States Power Co., designated Northern States Power Co. (Minnesota), Rate Schedule FPC No. 331. Supplement No. 1 deletes Exhibit A in its entirety, provides for a first revision of Exhibit A adding the Troy Connection, and supersedes August 31, 1966, Letter Agreement, designated Northern States Power Co., Rate Schedule FPC No. 331.1.

Docket No.	Date filed	Name of applicant
E-8005	Mar. 5, 1973	Mississippi Power Co.

Applicant files February 13, 1973, Supplement to January 4, 1972 Contract for Electric Service for Resale between Mississippi Power Co. and Coast Electric Power Association, establishing a new service delivery point at Bayou Lacroix on or about June 1, 1973. Applicant also

files January 11, 1973 Supplement to January 4, 1972 Contract for Electric Service for Resale between Mississippi Power Co. and Singing River Electric Power Association, establishing a new delivery point at Hickory Hills on or about March 1, 1973.

Docket No.	Date filed	Name of applicant
E-598	Mar. 5, 1973	Public Service Company of Indiana, Inc.

Applicant files November 1, 1972 Supplement to November 1, 1964 Supply for Retail Sale Agreement between Tipmont Rural Electric Membership Corp. and Public Service Company of Indiana, designated Rate Schedule FPC No. 187. The Supplement amends "Exhibit A" of the Rate Schedule by adding of a new delivery point designated TETC-69 delivery point, to take effect February 21, 1973.

[Docket No. CP72-233]

#### NATURAL GAS PIPELINE COMPANY OF AMERICA

##### Availability of Environmental Impact Statement

MARCH 27, 1973.

Notice is hereby given in the captioned Docket that on March 27, 1973, as required by § 2.82(b) of Commission Order No. 415-C, a draft environmental statement prepared by the staff of the Federal Power Commission, was made available for comments. This statement deals with the environmental impact in the proceeding under Docket No. CP72-233, Natural Gas Pipeline Company of America for certificate of public convenience and necessity under section 7(c) of the Natural Gas Act for construction of approximately 27 miles of 16-inch pipeline, a side tap connection on an existing natural gas transmission pipeline of the applicant in the area, measurement facilities and miscellaneous appurtenant facilities, including a liquid removal facility. All construction would occur in the Sabine Pass area of Texas, near Port Arthur, Tex.

This statement has been circulated for comments to Federal, State, and local agencies, has been placed in the public files of the Commission's Office of Public Information, Room 2523, General Accounting Office Building, 441 G Street NW., Washington, DC, and at its Regional Office located at 819 Taylor Street, Fort Worth, TX. Copies may be ordered from the National Technical Information Service, Department of Commerce, Springfield, Va. 22151.

The Commission has found that it is necessary and appropriate in the public interest to dispense with the 45-day time period for review and comment and herewith shortens the period to 30 days from the above date to afford the Commission the opportunity to decide in as expeditious manner as possible if the

#### NOTICES

merits of this application serve the public convenience and necessity.

Any person who wishes to do so may file comments on the staff draft statement for the Commission's consideration. All comments must be filed on or before April 26, 1973.

Any person who wishes to present evidence regarding environmental matters in this proceeding must file with the Commission a petition to intervene pursuant to § 1.8 of the Commission's rules of practice and procedure. Petitioners must also file timely comments on the draft statement in accordance with § 2.82(c) of Order No. 415-C.

All petitions to intervene must be filed on or before April 26, 1973.

KENNETH F. PLUMB,  
Secretary.  
[FR Doc.73-6118 Filed 3-29-73; 8:45 am]

[Docket No. E-8069]

#### NEPOOL POWER POOL AGREEMENT

##### Proposed Changes in Rates and Charges

MARCH 23, 1973.

Take notice that NEPOOL on March 5, 1973, tendered for filing the following rate schedule materials:

NEPOOL POWER POOL AGREEMENT, dated as of September 1, 1971 (amended July 1, 1972).

NEPOOL AGREEMENT, signature page executed by Newport Electric Corp.

NEPOOL states that the materials filed here do not change in any manner the NEPOOL agreement previously filed with the Commission, other than to make Newport Electric Corp. an additional participant in the power pool. NEPOOL also states that no estimates of transactions and revenues relating to Newport Electric Corporation's participation in the power pool were submitted because they cannot be made with relative accuracy. NEPOOL states that electric service under the NEPOOL agreement, as related to Newport Electric Corp., will commence on April 1, 1973. NEPOOL further states that copies of this letter and copies of the additional page bearing the conformed signature of Newport Electric Corp. have been mailed to all systems rendering or delivering service under the NEPOOL agreement and to each of the persons on the Commission's service list in Docket No. E-7690.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 2, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on

file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.  
[FR Doc.73-6110 Filed 3-29-73; 8:45 am]

[Docket No. C173-615]

#### PHILLIPS PETROLEUM CO.

##### Application

MARCH 27, 1973.

Take notice that on March 16, 1973, Phillips Petroleum Co. (Applicant), Bartlesville, Okla. 74004, filed in Docket No. C173-615 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to El Paso Natural Gas Co. at Applicant's Crane Gasoline Plant in Crane County, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it commenced the sale of natural gas on February 16, 1973, within the contemplation of § 157.29 of the regulations under the Natural Gas Act (18 CFR 157.29) and that it proposes to continue said sale for 2 years from the end of the 60-day emergency period within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70). Applicant proposes to sell approximately 62,000 Mcf of gas per month at 45 cents per Mcf at 14.65 p.s.i.a.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before April 5, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition

for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

#### PUGET SOUND POWER & LIGHT CO.

##### Application for Withdrawal of Application for Major License

MARCH 23, 1973.

Public notice is hereby given that an application was filed on January 15, 1973, under the Federal Power Act (16 U.S.C. 791a-825r) by Puget Sound Power & Light Co. (Correspondence to: Mr. Lucius H. Biglow, Jr., Perkins, Cole, Stone, Olsen & Williams, 1900 Washington Building, Seattle, Wash. 98101) for approval of withdrawal of application for major license for White River Project No. 2494 located on the White River in Pierce County, Wash.

The request to withdraw the application is based on a decision of the U.S. Court of Appeals for the Second Circuit, Farmington River Power Company v. Federal Power Commission, 455 F.2d 86 (2d Cir. 1972), that a Federal license under these circumstances is not required.

The White River Project consists of the following: (1) a rock-filled crib and concrete diversion dam 352 feet long and 4 feet high with 7-foot flashboards; (2) a concrete intake to which has been added a Corps of Engineers' fish trap; (3) a 7-mile long flow line consisting of: (a) a 5,000-foot timber flume; (b) a 2-mile long series of desilting basins; (c) 7,000 feet of unlined canal; (d) a 2-mile long timber lined canal; (e) a 1,600-foot long storage basin and short canal; and (f) Lake Tapps, a 2,566 acre reservoir with storage capacity of 46,000 acre feet; (4) a lined tunnel to a forebay; (5) steel penstocks; (6) a powerhouse containing two 18,000 hp. turbines each connected to a 15,000 kw. generator and two 23,000 hp. turbines each connected to a 20,000 kw. generator; and (7) a 0.5-mile long tail-race and appurtenant facilities.

Any person desiring to be heard or to make protest with reference to said application should on or before April 30, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must

#### NOTICES

file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

[Docket No. CP72-118]

#### SEA ROBIN PIPELINE CO.

##### Notice of Filing Amendment to Transportation Agreement

MARCH 23, 1973.

Take notice that on March 9, 1973, Sea Robin Pipeline Co. (Sea Robin) tendered for filing First Revised Sheet No. 63 amending Rate Schedule X-4 of its FPC Gas Tariff, Original Volume No. 2, a transportation agreement dated September 29, 1971, between Sea Robin and Tennessee Gas Pipeline Co. (Tennessee).

The subject transportation agreement was authorized, under a temporary certificate issued in Docket No. CP72-118, by Commission letter dated December 23, 1971. It is proposed that the revised tariff sheet be accepted and made effective January 1, 1973, the date agreed upon by the parties in the amendment to the original contract.

The company states that copies of the filing have been mailed to Tennessee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 6, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. C173-616]

#### SUPERIOR OIL CO.

##### Notice of Application

MARCH 26, 1973.

Take notice that on March 19, 1973, The Superior Oil Co. (Applicant), P.O. Box 1521, Houston, TX 77001, filed in Docket No. C173-616 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Natural Gas Pipeline Company of America from the Sand Dunes Field, Eddy County, N. Mex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell approximately 7,500 Mcf of gas per month for 1 year at 35 cents per million Btu. Within the contemplation of § 2.70 of the Commission's general policy and interpretations (18 CFR 2.70).

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before April 6, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Upon the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.  
[FR Doc.73-6097 Filed 3-29-73; 8:45 am]

#### FEDERAL RESERVE SYSTEM AMERICAN BANCORPORATION, INC. Proposed Acquisition of Linwood Mortgage Co.

American Bancorporation, Inc., Kansas City, Mo., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of Linwood Mortgage Co., Kansas City, Mo. Notice of the application was published on October 30, 1972, in The Kansas City Star, a newspaper circulated in Kansas City, Mo.

Applicant states that the proposed subsidiary would engage in the following activities: Extending credit for the account of Linwood Mortgage Co., or others, such as would be made by a mortgage company, and selling and servicing such

loans; acting as an insurance agent or broker for certain types of insurance, including fire and extended coverage, and credit life insurance, which are directly related to such extensions of credit and loans, or insurance which is sold as a convenience to the purchaser, so long as such convenience insurance does not constitute a significant portion of the aggregate insurance premium income of American Bancorporation, Inc. Applicant states that such activities have been determined by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 18, 1973.

Board of Governors of the Federal Reserve System, March 22, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.  
[FR Doc 73-6176 Filed 3-29-73; 8:45 am]

#### BARNETT BANKS OF FLORIDA, INC. Order Approving Acquisition of Banks

Barnett Banks of Florida, Inc., Jacksonville, Fla., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of Southern Bank of West Palm Beach, West Palm Beach, Fla. (West Palm Beach Bank), and Florida Southern Bank, Palm Beach County (P.O. Lake Worth), Fla. (Palm Springs Bank).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

#### NOTICES

Applicant controls 37 banks with aggregate deposits of \$1 billion, representing 7 percent of total deposits of commercial banks in the State and is the second largest banking organization in Florida. (All banking data are as of June 30, 1972, and reflect holding company formations and acquisitions approved through February 28, 1973.) The acquisitions of West Palm Beach Bank (\$24 million deposits) and Palm Springs Bank (\$6 million deposits) would increase applicant's share of Florida deposits by two-tenths of one percentage point, and it would remain the second largest State banking organization.

The proposed subsidiaries are located in the West Palm Beach banking market, and the proposal would represent applicant's initial entry into the area. West Palm Beach Bank and Palm Springs Bank hold 2.66 and 0.6 percent of total market deposits and rank 18th and 26th, respectively, among the 28 banks represented in this market area. Seven of the market's 16 banking organizations are multibank holding companies, two of which hold approximately 34 percent of aggregate market deposits. Although West Palm Beach and Palm Springs Banks are 4 miles apart they do not actively compete with each other due to the fact that Palm Springs Bank was organized in 1970 by directors and principal stockholders of West Palm Beach Bank, and both are under common management and control. It appears that no present or future competition between the banks would be eliminated by this proposal.

Applicant's closest subsidiary banking office is located 40 miles south of the banks. There is no significant competition between these banks and any of applicant's subsidiary offices, and due to the densely populated areas, the distances involved, and Florida's restrictive branching laws, it appears that there is little likelihood of the development of future competition. Consequently, competitive considerations are consistent with approval of the applications.

The financial condition and managerial resources of applicant and its subsidiaries are satisfactory in view of applicant's commitment to improve the capital position of its banks, and prospects for the group are favorable. The capital of West Palm Beach Bank has been recently increased and the financial condition of both banks is satisfactory, their managements capable, and prospects favorable. Banking factors are consistent with approval of the applications. Although the 28 market banks satisfactorily serve the more important banking needs of the area, applicant's proposed expansion and improvement of services now available at the banks, especially development of trust services at West Palm Beach Bank, would benefit the public and enable the banks to become stronger competitors with the larger area banking offices. Accordingly, considerations relating to the convenience and needs of the communities to be served are consistent with and lend slight support toward approval of the applications.

It is the Board's judgment that consummation of the proposed acquisitions would be in the public interest and that the applications should be approved.

On the basis of the record, the applications are approved for the reasons summarized above. The transactions shall not be consummated (a) before the 30th calendar day following the effective date of this order or (b) later than 3 months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,  
effective March 23, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.  
[FR Doc 73-6175 Filed 3-29-73; 8:45 am]

#### BERKSHIRE BANCORP, INC. Acquisition of Bank

Berkshire Bancorp, Inc., Pittsfield, Mass., has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares (less directors' qualifying shares) of Guaranty Bank & Trust Co., Worcester, Mass. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Boston. Any person wishing to comment on the application should submit his views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than April 18, 1973.

Board of Governors of the Federal Reserve System, March 22, 1973.

#### HAMBROS BANK, LTD. Order Granting Determination Under Bank Holding Company Act

In the matter of the request by Hambros Bank, Ltd., on behalf of itself, Hambros Investment Co. A.G., Hambros, Ltd., The Hambros Trust, Ltd., all of London, England, and Hambro American Corp., New York, N.Y. (collectively referred to as the "Hambros Group"), for a determination pursuant to section 2(g)(3) of the Bank Holding Company Act of 1956, as amended.

The Hambros Group, bank holding companies within the meaning of section 2(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(a)), on the

<sup>1</sup> Voting for this action: Vice Chairman Robertson and Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governor Daane.

basis of their direct and indirect ownership of 100 percent of the voting shares of Hambro American Bank & Trust Co., New York, N.Y. (Bank), seeks to terminate said status as a bank holding company as a result of transferring all of its shares of Bank to First Empire State Corp., Buffalo, N.Y. (First Empire).<sup>1</sup>

Hambros Bank, Ltd., and the Hambros Group seek a determination pursuant to section 2(g)(3) of the Bank Holding Company Act of 1956, as amended, that notwithstanding the existing interlocking director relationship between Hambros Bank, Ltd., and First Empire, they will not be capable of controlling the transferee of shares of the aforementioned Bank.

Under the provisions of section 2(g)(3) of the Act (12 U.S.C. 1841(g)(3)), shares transferred after January 1, 1966, by any bank holding company to a transferee that has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, are deemed to be indirectly owned or controlled by the transferor unless the Board of Governors of the Federal Reserve System, after opportunity for hearing, determines that the transferor is not in fact capable of controlling the transferee.

Mr. C. R. Diebold, president and a member of the board of directors of First Empire, is a member of the board of directors of Hambros Bank, Ltd. The Hambros Group was advised by the Board that consummation of the transfer of Bank to First Empire would not terminate the Hambros Group's ownership and control of Bank, unless the Board, after opportunity for hearing, made a determination of the kind described in section 2(g)(3). The Hambros Group has requested such a determination, and it has submitted to the Board documentary evidence to support its contention that none of the Hambros Group companies can in fact control First Empire.

Notice of an opportunity for hearing with respect to the Hambros Group's request for a determination under section 2(g)(3) was published in the FEDERAL REGISTER on Friday, July 7, 1972 (37 FR 13382). The time provided for requesting a hearing expired on August 6, 1972. No such request has been received by the Board, nor has any evidence been received to show that Hambros Bank, Ltd., or any of the Hambros Group companies is in fact capable of controlling First Empire.

It is hereby determined that neither Hambros Bank, Ltd., nor any of the Hambros Group companies is in fact capable of controlling First Empire. This determination is based upon the evidence of record in this matter, including (1) a certified copy of a resolution passed by

<sup>1</sup> By order of May 9, 1972 (1972 Federal Reserve Bull. 682), the Board of Governors approved the application of First Empire to acquire, for cash, 100 percent of the voting shares of Hambro American Bank & Trust Co.

#### NOTICES

the board of directors of Hambros Bank, Ltd., on October 23, 1972, to the effect that neither Hambros Bank, Ltd., nor any of the Hambros Group companies controls or will control or exert a controlling influence over First Empire through common directorships; (2) a certified copy of a resolution adopted on October 30, 1972, by the executive committee of the board of directors of First Empire to the effect that neither Hambros Bank, Ltd., nor any of the Hambros Group companies controls or will control or exert a controlling influence over First Empire through common directorships; (3) an affidavit of October 30, 1972, by Mr. Diebold stating, that in performing his responsibilities as a director of First Empire he is not acting pursuant to any agreement or understanding with, or under instructions from, any of the Hambros Group companies, and that he does not report to any of the Hambros Group companies the nature of actions taken at meetings of the board of directors of First Empire, nor report to First Empire the nature of actions taken at meetings of the board of directors of any Hambros Group company; and (4) statements in a letter of May 10, 1972, that neither Hambros Bank, Ltd., nor any of the Hambros Group companies owns directly or indirectly, in a fiduciary capacity, or has options to acquire, any of the capital shares or indebtedness of First Empire.

Accordingly, it is ordered, That the request of Hambros Bank, Ltd., on behalf of itself and the Hambros Group companies for a determination pursuant to section 2(g)(3) be and hereby is granted.

By order of the Board of Governors, acting through its General Counsel, pursuant to delegated authority (12 CFR 265.2), March 23, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.  
[FR Doc 73-6178 Filed 3-29-73; 8:45 am]

#### MOUNTAIN BANKS, LTD. Order Approving Merger of Bank Holding Companies and Acquisition of Bank

Mountain Banks, Ltd., Colorado Springs, Colo., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(5) of the Act (12 U.S.C. 1842(a)(5)) to merge with Boulder National Corp., Boulder, Colo., a registered bank holding company, and to thereby acquire all of the voting shares of Boulder National Bank, Boulder, Colo. (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the eighth largest banking organization in Colorado, controls five banks with aggregate deposits of \$195.6 million, representing slightly less than 4 percent of the total deposits in commercial banks in Colorado. Upon acquisition of Bank, Applicant's share of commercial bank deposits in the State would increase insignificantly and it would become the seventh largest banking organization in the State.

Bank, with deposits of \$15.1 million, is the fourth largest of six banks in the city of Boulder and the sixth largest of 13 banks in Boulder County. Bank is located approximately 40 miles from Applicant's closest subsidiary bank. Due to the distances separating Bank and Applicant's existing subsidiary banks and the number of competing banks in the intervening area, it does not appear that consummation of the proposed transaction would eliminate any significant existing or potential competition.

The financial and managerial resources and future prospects of Applicant and its existing subsidiary banks appear generally satisfactory and consistent with approval, particularly in view of Applicant's commitment to augment the capital of its existing subsidiary banks within the next year. The financial and managerial resources and future prospects of Bank are satisfactory, taking into account Applicant's commitment to increase Bank's capital by \$750,000 upon acquisition. The banking factors are consistent with and lend some weight toward approval of the application. While the banking needs of the area appear to be adequately met at present, Applicant's acquisition of Bank and its addition to Bank's capital should enable Bank to expand and improve its services. Considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the 30th calendar day following the effective date of this order, or (b) later than 3 months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,  
effective March 23, 1973.

[SEAL] TYNAN SMITH,  
Secretary of the Board.  
[FR Doc 73-6174 Filed 3-29-73; 8:45 am]

<sup>1</sup> Banking data are as of June 30, 1972, adjusted to reflect bank holding company formations and acquisitions approved through Dec. 31, 1972.

<sup>2</sup> Voting for this action: Vice Chairman Robertson and Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Chairman Burns and Governor Daane.

### GENERAL SERVICES ADMINISTRATION

### INTERNATIONAL JOINT COMMISSION, UNITED STATES AND CANADA

#### WATER LEVELS OF LAKE SUPERIOR

Notice of Public Hearings Regarding Future Regulation

The International Joint Commission, a permanent Canada-United States body established under the terms of the Boundary Waters Treaty of 1909, will hold public hearings at the times and places noted below on the question of the future regulation of the water levels of Lake Superior.

In 1964, during a period of extreme low water, the Governments of Canada and the United States requested the International Joint Commission to determine the practicability of further regulating the levels of the Great Lakes or any of them and their connecting channels so as to establish a more beneficial range of stage. The International Great Lakes Levels Board was established to carry out the necessary technical investigations and studies and to report its findings and recommendations to the Commission. It is expected that the Board's comprehensive report on these studies will be submitted to the Commission later this year. Shortly thereafter, the International Joint Commission will hold public hearings at several locations in the Great Lakes Basin to receive public comment on that report and will then prepare its final report to Governments.

However, because of the unusually high levels experienced on the Great Lakes this year and the concern expressed by Governments and by shore property owners and municipalities located along the shores of the Great Lakes, the Commission requested its Great Lakes Levels Board to submit an Interim Report focusing upon the further regulation of Lake Superior and the effects of such regulation of downstream waters. This would allow the Commission to give earlier consideration to the desirability of amending the present Regulation Rule for Lake Superior. The Board's "Interim Report on Lake Superior and Lake Ontario" has now been received and is being distributed to interested individuals, organizations and governmental agencies. Copies may be obtained upon request by writing to the International Joint Commission in either Washington or Ottawa at the addresses noted below.

The purpose of these public hearings is to receive testimony and evidence relating to the regulation of Lake Superior. Opportunity will be given to anyone, either on his own behalf or in a representative capacity, to offer pertinent information which may assist the Commission in determining the advisability of prescribing a new regulation plan for Lake Superior. The Commission will hold a further hearing to consider the regulation of Lake Ontario levels. The time and place of this hearing will be announced later.

The Commission's hearings are international in nature and irrespective of the location in which they are held, the citizens of both the United States and Canada are invited. Statements may be made orally or in writing. If written statements are submitted it is requested that if possible, thirty (30) copies be provided for the Commission's use. Additional copies may be deposited with the Secretaries at the hearing for the use of the news media and others present.

#### Times and Places of Hearings

Tuesday, May 8, 1973, 9:30 a.m., Engineering Society of Detroit, ESD Theater, Rackham Memorial Building, 100 Farnsworth Street, Detroit, MI 48202.

### LOGOS DEVELOPMENT CORP. Order Suspending Trading

MARCH 23, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, \$0.01 par value, and all other securities of Logos Development Corp., being traded otherwise than on a national securities exchange, is required in the public interest and for the protection of investors:

It is ordered, Pursuant to section 15(c) (5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be in effect for the period from March 26, 1973, through April 4, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,  
Secretary.

### MASSMUTUAL INCOME INVESTORS, INC. Filing of Application

MARCH 26, 1973.

Notice is hereby given that MassMutual Income Investors, Inc., 1295 State Street, Springfield, MA 01111 (the Fund), a closed-end, diversified management investment company registered under the Investment Company Act of 1940 (the Act), has filed an application for an order of the Commission pursuant to section 6(c) of the Act declar-

ing that Howard Weaver McCall, Jr., a director of the Fund, shall not be considered an "interested person" (as defined in section 2(a)(19) of the Act) of the Fund solely by reason of the fact that Mr. McCall is a director of the Mutual Life Insurance Company of New York (MONY). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Mr. McCall is a director of MONY, a New York mutual life insurance company which is principally engaged in the business of selling life insurance, health insurance, retirement plans for individuals and employee groups and variable annuities and acting as investment adviser to MONY Mortgage Investors, a real estate investment trust. Solely because it sells variable annuity contracts, including contracts for funding HR-10 plans, MONY has registered as a broker-dealer under the Securities Exchange Act of 1934. MONY does not otherwise act as a broker-dealer. Through its subsidiary, MONY Sales, Inc. (MONY Sales), MONY distributes to the public shares of The MONY Fund, Inc. (MONY Fund). Solely because it distributes shares of MONY Fund, including shares for funding HR-10 plans, MONY Sales has registered as a broker-dealer under the Securities Exchange Act of 1934. MONY Sales does not otherwise, directly or indirectly, act as a broker-dealer. The Fund represents that neither MONY nor MONY Sales has ever engaged in securities transactions on behalf of the Fund. Furthermore, the Fund has undertaken that, so long as Mr. McCall remains one of its directors, the Fund will not knowingly purchase any securities from or through, or sell any securities to or through, MONY or any subsidiary of MONY.

Mr. McCall in no way participates in the day-to-day operations of MONY or MONY Sales and is neither a director nor an officer of MONY Sales.

Section 2(a)(19) of the Act defines an "interested person" of any investment company to include, among others, any broker or dealer registered under the Securities Exchange Act of 1934, or any affiliated person of such a broker or dealer. Section 2(a)(3) of the Act defines an affiliated person of another person to include any director of another person.

Because Mr. McCall is a director of MONY, he is an affiliated person of a registered broker-dealer and an affiliated person of an affiliated person of a registered broker-dealer, MONY Sales. Accordingly, he may be deemed to be an "interested person" of the Fund.

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person from any provision of the Act if such exemption is necessary or appropriate in the public

interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant contends that Mr. McCall should not be deemed an "interested person" of the Fund because his affiliation with MONY does not affect, and will not impair, his independence in acting on behalf of the Fund and its shareholders, and the requested exemption is therefore consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than April 19, 1973, submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the Fund at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,  
Secretary.

## SMALL BUSINESS ADMINISTRATION

[License 01/01-5070]

### NORTH AMERICAN MESBIC, INC.

#### Notice of Surrender of License

Notice is hereby given that North American MESBIC, Inc., 114 State Street, Boston, MA 02109, has surrendered its license to operate as a small business investment company pursuant to § 107.105 of the rules and regulations of the Small Business Administration (SBA), governing small business investment companies (13 CFR 107.105 (1972)).

North American MESBIC, Inc., a Massachusetts corporation, was licensed by SBA on January 11, 1971, to operate solely as a minority enterprise small business investment company (MESBIC) under the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.), and the SBA regulations issued thereunder.

Under the authority vested by the Act, and pursuant to the cited regulation, the surrender by North American MESBIC, Inc. of its license is hereby accepted and all rights, privileges and franchises derived therefrom are hereby canceled.

Dated: March 20 1973.

DAVID A. WOLLARD,  
Associate Administrator for  
Finance and Investment.

## SPECIAL ACTION OFFICE FOR DRUG ABUSE PREVENTION

### ADVISORY COMMITTEE ON DRUG DETECTION

#### Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given of a meeting of the Advisory Committee on Drug Detection on April 9, 1973, 9:30 a.m., Room 3104, The New Executive Office Building, 726 Jackson Place NW., Washington, D.C. The principal purpose of the meeting is to review the results of the initial proficiency testing survey conducted by the Center for Disease Control.

This meeting is open to the public. Any member of the public wishing to attend or participate should contact the Chairman, Watson Reid, M.D., 202-456-5276. If attendance is not possible, the committee will receive written statements which will be read at the time and in the manner permitted by the committee.

WATSON REID,  
Chairman.

## OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Docket No. 73-3]

### TRADE INFORMATION COMMITTEE

#### Notice of Public Hearing

Notice of public hearing requesting views regarding trade agreements between the European Communities and five EFTA countries.

Notice is hereby given pursuant to § 2003.2 of the Regulations of the Trade Information Committee of the Office of the Special Representative for Trade Negotiations (15 CFR Ch. XX, Part 2003) that a public hearing will be held beginning at 10 a.m. on May 15 and 16, 1973, to adjourn and reconvene at a later date if needed, in Conference Room 730, 1800 G Street NW., Washington, DC. The purpose of said hearings is to provide an opportunity to the public to present all facts and views pertaining to the effect on U.S. exports and other commercial interests of the trade agreements between the European Communities and five countries belonging to the European Free Trade Association—Austria, Iceland, Portugal, Sweden, and Switzerland—signed in Brussels on July 22, 1972.

With the exception of the EC-Iceland agreement, which has not yet been fully implemented, these arrangements became effective on January 1, 1973.

Interested parties are invited to express their views on this subject by written brief or other communication, submitted in not less than 20 copies, to the Chairman of the Trade Information Committee. Interested parties are also invited to express their views on this subject in person at the aforementioned public hearing, provided they notify the Chairman of the Trade Information Committee, Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Room 725, Washington, DC 20506. Such notification must be received by April 24, 1973. Requests to appear in person should be submitted in an original and 15 copies which must be legibly typed, printed, or duplicated and must include the following information:

(a) The name, address, and telephone number of the party submitting the request;

(b) The name, address, telephone number, and official position of the person submitting the request on behalf of the party referred to in subparagraph (a);

(c) A brief indication of the interest of, and the position to be taken by, the party;

(d) The name, address, and telephone number of the person or persons who will present oral testimony; and

(e) The amount of time desired for the presentation of oral testimony.

Requests to present oral testimony should not contain any confidential information. Any requests marked "For Official Use Only" or similarly marked will not be accepted.

## NOTICES

Washington, D.C. 20250, or telephoning 202-447-7677.

JOHN H. JACKSON,  
General Counsel, Office of the  
Special Representative for  
Trade Negotiations, Acting  
Chairman, Trade Information  
Committee.

## TARIFF COMMISSION

[TEA-W-192]

### I. JABLOW & CO., INC.

#### Workers' Petition for Determination; Notice of Investigation

On the basis of a petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the workers and former workers of I. Jablow & Co., Inc., Philadelphia, Pa., the U.S. Tariff Commission, on March 26, 1973, instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with boys' dress and sport shirts, knit and nonknit, with chief value of cotton or man-made fibers (of the types provided for in Items 380.00, 380.04, 380.06, 380.27, 380.81, and 380.84 of the Tariff Schedules of the United States) produced by said firm are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such firm or an appropriate subdivision thereof.

The optional public hearing afforded by law has not been requested by the petitioners. Any other party showing a proper interest in the subject matter of the investigation may request a hearing, provided such request is filed on or before April 10, 1973.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., and at the New York City Office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: March 27, 1973.  
By order of the Commission.  
[SEAL] KENNETH R. MASON,  
Secretary.

## Office of the Secretary

### MONTANA

#### Determination of Temporary on Indicator and Beginning of Temporary Benefit Period

Pursuant to the provisions of section 202 of the Emergency Unemployment Compensation Act of 1971 (Public Law 92-224, title II as amended by Public Law 92-329), hereinafter referred to as the Act, and 20 CFR 617.13(a), I hereby give notice of my determination as follows:

1. There is a "temporary on" indicator for the week ending February 10, 1973, for the State of Montana.

2. This determination is based on my finding that the rate of unemployment as defined in the Act for the 13-week period ending February 10, 1973, was 6.62 percent in the State of Montana.

3. A temporary benefit period as provided in section 202(c)(3)(A)(iii) of the Act and 20 CFR 617.5 began on February 25, 1973, the first day of the third calendar week after which there is a "temporary on" indicator in the State of Montana.

Temporary compensation, as defined in 20 CFR 617.2(d), shall be payable to eligible individuals who have received temporary compensation for a week or weeks beginning before January 1, 1973, and who file claims for such compensation for weeks of unemployment which begin in the temporary benefit period with respect to the State of Montana. However, no temporary compensation under the Act is payable for any week of unemployment which ends after March 31, 1973, even though such week is in a temporary benefit period.

Signed at Washington, D.C., this 26th day of March 1973.

PETER J. BRENNAN,  
Secretary of Labor.

## NEVADA

## Determination of Temporary On Indicator and Beginning of Temporary Benefit Period

Pursuant to the provisions of section 202 of the Emergency Unemployment Compensation Act of 1971 (Public Law 92-224, title II, as amended by Public Law 92-329), hereinafter referred to as the Act, and 20 CFR 617.13(a), I hereby give notice of my determination as follows:

1. There is a "temporary on" indicator for the week ending January 27, 1973, for the State of Nevada.

2. This determination is based on my finding that the rate of unemployment as defined in the Act for the 13-week period ending January 27, 1973, was 6.57 percent in the State of Nevada.

3. A temporary benefit period as provided in section 202(c)(3)(A)(iii) of the Act and 20 CFR 617.5 began on February 11, 1973, the first day of the third calendar week after which there is a "temporary on" indicator in the State of Nevada.

Temporary compensation, as defined in 20 CFR 617.2(d), shall be payable to eligible individuals who have received temporary compensation for a week or weeks beginning before January 1, 1973, and who file claims for such compensation for weeks of unemployment which begin in the temporary benefit period with respect to the State of Nevada. However, no temporary compensation under the Act is payable for any week of unemployment which ends after March 31, 1973, even though such week is in a temporary benefit period.

Signed at Washington, D.C., this 26th day of March 1973.

PETER J. BRENNAN,  
Secretary of Labor.

## MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 23, 1973.

The following are notices of filing of applications for temporary authority under section 210(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-87 (49 CFR 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, on or before April 16, 1973. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies. A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

## MOTOR CARRIERS OF PROPERTY

No. MC 39568 (Sub-No. 11 TA), filed March 14, 1973. Applicant: ARROW TRANSFER & STORAGE CO., a corporation, 1124 Market Street, Chattanooga, TN 37402. Applicant's representative: Walter Harwood, 1822 Parkway Towers, Nashville, TN 37219. ## MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MARCH 26, 1973.

The following are notices of filing of applications for temporary authority under section 210(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131), published in the FEDERAL REGISTER, Issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, on or before April 16, 1973. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

## MOTOR CARRIERS OF PROPERTY

No. MC 20992 (Sub-No. 27 TA), filed March 15, 1973. Applicant: DOTSETH TRUCK LINE, INC., a corporation, Knapp, Wis. 54749. Applicant's representative: Robert G. Planansky, P.O. Box 82028, 605 South 14th Street, Lincoln, NE 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such merchandise* as is dealt in by lawn and garden dealers (except chemicals and commodities in bulk), from the plants, warehouse site, and experimental farms of Deere & Co. in Dodge County, Wis., to points in Minnesota, Nebraska, North Dakota, South Dakota, and Wisconsin, for 150 days. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Feed, animal or poultry*, prepared in bulk or in bags; *feed supplements* in bags; *condimental or medicinal feeding compounds* for animals or poultry, from Decatur, Ill., to points in Indiana, Iowa, Missouri, and Wisconsin, for 180 days. Restriction: Restricted to operations limited to a transportation service to be performed under a continuing contract with Gooch Feed Mill Corp. Supporting shipper: Andrew J. Roberts, Manager of Operations, Gooch Feed Mill Corp. (Gooch Feed), P.O. Box 1470, Decatur, IL 62525. Send protests to: Harold C. Jolliff, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Leland Office Building, 527 East Capitol Avenue, Springfield, IL 62701.

No. MC 138493 TA filed March 15, 1973. Applicant: JAKUM TRUCKING, INC., 4902 South 13th Street, Sheboygan, WI 53081. Applicant's representative: Nancy J. Johnson, 4306 Regent Street, Madison, WI 53705. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cheese, cheese spreads, poultry products, bread, processed meats, pickles*, from points in Iowa, Wisconsin, Minnesota, Illinois, to Los Angeles, Calif., for 180 days. Supporting shipper: Crescent Food Co., 5403 Santa Fe Avenue, Los Angeles, CA 90058

(Ernest L. Rose). Send protests to: District Supervisor John E. Ryden, Interstate Commerce Commission, Bureau of Operations, 135 West Wells Street, Room 807, Milwaukee, WI 53203.

## MOTOR CARRIERS OF PASSENGERS

No. MC 3647 (Sub-No. 442 TA), filed March 16, 1973. Applicant: TRANSPORT OF NEW JERSEY, 180 Boyden Avenue, Maplewood, NJ 07040. Applicant's representative: John F. Ward (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, and express, and newspapers* in the same vehicle with passengers, between Allentown and Lancaster, Pa., from Allentown, Pa., over U.S. Highway 222 to Lancaster, Pa., and return over the same route, serving all intermediate points (except Reading, Kutztown, and Westcoastville, Pa.) for 180 days. Note: (1) Applicant states that the above-described route will be tacked to its existing route operated between Allentown, Pa., and New York, N.Y.; (2) applicant seeks this authority in order to continue a service now provided under authority granted to applicant in Docket No. MC 3647 R-20; and (3) applicant further states that the authority sought herein will terminate no later than 5 days after the resumption of service by Safeway Trails, Inc., now undergoing a work stoppage by its employees. Supporting shippers: There are approximately 21 statements of support attached to the application, which may be examined here at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: District Supervisor Robert S. H. Vance, Bureau of Operations, Interstate Commerce Commission, 970 Broad Street, Newark, NJ 07102.

No. MC 118832 (Sub-No. 6 TA), filed March 16, 1973. Applicant: WESTOURS MOTOR COACHES, INC., 900 IBM Building, Seattle, Wash. 98101. Applicant's representative: A. T. Wendells, 3933 Sea-First National Bank Building, Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage* in special and charter operations, limited to seasonal operations between May 1, 1973, and September 30, 1973, from the junction of Alaska Highways 2 and 5 at Tetlin Junction, Alaska, to the Alaska/Yukon border over Alaska Highway 5, and the unnumbered Alaska highway from its junction with Alaska Highway 5 to the Alaska/Yukon border en route to Dawson, Yukon Territory, and return over the same route, for 153 days.

## NOTICES

NOTE: This authority tacks onto applicant's authority in MC 118832, Subs 2 and 4. It also connects with White Pass and Yukon Rail at Whitehorse, Yukon Territory. Supporting shippers: Westours, Inc., IBM Building, Seattle, Wash. 98101, and White Pass and Yukon Route, Joseph Vance Building, Seattle, Wash. 98101. Send protests to: L. D. Boone, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 6049 Federal Office Building, Seattle, Wash. 98104.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

## [Notice 241]

## MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 19, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74155. By order of March 16, 1973, the Motor Carrier Board approved the transfer to Larry C. Wolff, doing business as Wolff Transportation Co., Dubuque, Iowa, of the operating rights in Certificates No. MC-93143 and MC-93143 (Sub-No. 2), issued January 31, 1945, and November 16, 1950, respectively, to A. N. Schueller and L. J. Gartner, doing business as S & G Motor Freight Co., Dubuque, Iowa, authorizing the transportation of general commodities, with exceptions, between specified points and areas in Iowa, Illinois, and Wisconsin. Carl E. Minson, 469 Fischer Building, Dubuque, Iowa 52001, attorney for applicants.

[SEAL] ROBERT L. OSWALD,  
Secretary.

## [Notice 242]

## MOTOR CARRIER TRANSFER PROCEEDINGS

MARCH 27, 1973.

Application filed for temporary authority under section 210a(b) in connection with transfer application under section 212(b) and Transfer Rules, 49 CFR Part 1132:

No. MC-FC-74366. By application filed March 21, 1973, CHESAPEAKE VAN LINES, INC., 400 South Highland Avenue, Baltimore, MD 21224, seeks temporary authority to lease the operating rights of WILLIAM T. GEIPE MOVING & STORAGE CO., INC., 9722 Pulaski Highway, Baltimore, MD 21220, under section 210a(b). The transfer to Chesapeake Van Lines, Inc., of the operating rights of William T. Geipe Moving & Storage Co., Inc., is presently pending.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

## READING CO.

## Rerouting or Diversion of Traffic

Upon further consideration of ICC Order No. 76 (Reading Co., Richardson Dilworth and Andrew L. Lewis, Jr., trustees) and good cause appearing therefor:

It is ordered, That:

ICC Order No. 76 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., August 31, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., March 31, 1973, and that this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., March 23, 1973.

## Title 20—Employees' Benefits

CHAPTER VI—EMPLOYMENT STANDARDS  
ADMINISTRATION, DEPARTMENT OF  
LABORSUBCHAPTER B—FEDERAL COAL MINE HEALTH  
AND SAFETY ACT OF 1969, AS AMENDEDPART 722—CRITERIA FOR DETERMINING  
WHETHER STATE WORKMEN'S COM-  
PENSATION LAWS PROVIDE ADEQUATE  
COVERAGE FOR PNEUMOCONIOSIS  
AND LISTING OF APPROVED STATE  
LAWS

Section 421 of the Federal Coal Mine Health and Safety Act of 1969, 83 Stat. 795, as amended by Public Law 92-302, 86 Stat. 156, entitled the Black Lung Benefits Act of 1972, requires the Secretary of Labor to publish in the Federal REGISTER a list of those States whose workmen's compensation laws provide adequate coverage for pneumoconiosis. On March 12, 1971, there were published in the Federal REGISTER as 29 CFR Part 1520 (later redesignated as 20 CFR Part 722) criteria to be applied by the Secretary for determining whether any State's workmen's compensation law or laws provided adequate coverage for pneumoconiosis.

Pursuant to authority contained in Title IV of the Federal Coal Mine Health and Safety Act, as amended, and in order to give effect to applicable legislative amendments contained in Public Law 92-302, the Black Lung Benefits Act of 1972, and Public Law 92-576, the Longshoremen's and Harbor Workers' Compensation Act Amendments of 1972, Subchapter B of 20 CFR Chapter VI is amended by revising Part 722 to read as set forth below.

This amendment is effective March 30, 1973.

It has not been possible to provide a period for public comment on specific proposals in advance of final adoption of these rules. This is so because incorporation in these amended rules of changes required as a result of amendments effective November 26, 1972, made by Public Law 92-576 (86 Stat. 1251) to provisions of the Longshoremen's and Harbor Workers' Compensation Act with which these rules are required to be in accord, could not be accomplished in time to permit promulgation of these rules in advance of the November 30, 1972, date provided earlier by the Black Lung Benefits Act of 1972, for publication of these rules in final form. Accordingly, I find on the basis of good cause as above set forth that it is impracticable to provide for notice, public procedure, and delayed effective date in accordance with 5 U.S.C. 553. In the period during which these amended rules were being formulated, the Department of Labor actively solicited informal recommendations, comments, and other information from all of the States in which coal is mined to assist it in the preparation of these rules. In addition, the Employment Standards Administration will receive and consider any comments submitted before May 1, 1973, on any provision of these rules, will follow the procedures set forth in 29 CFR 13.5 (37 FR 13617), and will make such

changes as are warranted through subsequent amendments of these rules. Inasmuch as the conformance of State workmen's compensation laws to the criteria set forth in these rules will not be required after adoption until claims to which they apply are filed pursuant to section 421 of the Federal Coal Mine Health and Safety Act many months hence, the foregoing provision should provide ample opportunity for persons affected to participate in the formulation of the rules which will actually be effective when claims are filed. Interested persons are accordingly invited to submit written data, views, and arguments concerning the rules in this revised Part 722 to OWCP, Employment Standards Administration, U.S. Department of Labor, Washington, D.C. 20210, prior to May 1, 1973.

The revised Part 722 reads as follows:

## INTRODUCTORY

Sec. 722.101 Purpose and scope of this part.  
722.102 Definitions and use of terms.

PROCEDURE FOR DETERMINING WHETHER A  
STATE LAW PROVIDES ADEQUATE COVERAGE  
FOR PNEUMOCONIOSIS

722.103 Application to the Secretary.  
722.104 Contents of application, supporting documents.  
722.105 Initial action on the request.

## CRITERIA: STANDARDS OF COVERAGE, ELIGIBILITY

722.110 Coverage generally.  
722.111 Miner.  
722.112 Widow, surviving divorced wife.  
722.113 Child.  
722.114 Parents, brothers, or sisters.

## CRITERIA: CLAIMS FOR BENEFITS

722.115 Claims generally.  
722.116 Time limitations on filing claims.

CRITERIA: MEDICAL STANDARDS FOR DETERMIN-  
ING WHETHER MINER'S TOTAL DISABILITY OR  
DEATH WAS DUE TO PNEUMOCONIOSIS

722.117 Medical criteria—generally.  
722.118 Medical evidence.  
722.119 Medical presumptions.  
722.120 Total disability determination.  
722.121 Cause of death.

## CRITERIA: ADMINISTRATIVE STANDARDS

722.122 Administrative standards—general-ly.  
722.123 Cessation of payment of benefits.  
722.124 Regulation of fees for legal services.

CRITERIA: GUARANTEE OF BENEFITS TO  
ELIGIBLE INDIVIDUALS

722.126 Guarantee of benefits—generally.  
722.127 Voluntary and elective compensa-  
tion systems.  
722.128 Responsible coal mine operators.  
722.129 Insurance, self insurance.  
722.130 State protections of benefits.  
722.131 Contributions by miners.  
722.132 Waiver of right to benefits.  
722.133 Retroactive coverage required.  
722.134 Residency requirements.

CRITERIA: AMOUNT OF BENEFITS: MEDICAL  
BENEFITS

722.135 Amount of benefits, computation.  
722.136 Augmented benefits.  
722.137 Minimum benefit amounts.  
722.138 Offsets for Federal benefits prohib-  
ited.  
722.139 Lump sum awards; settlement.  
722.140 Protection of benefits.  
722.141 Payment periods.

Sec. 722.142 Prompt payment of benefits.  
722.143 Medical benefits.  
722.144 Medical examinations, reexamina-  
tions.

## 722.145 Vocational rehabilitation.

## ACTION BY THE SECRETARY

722.146 Standards for review of a State  
workmen's compensation law.  
722.147 Action subsequent to review.  
722.148 Provisional approval.  
722.149 Judicial review.  
722.150 Reports.  
722.151 Removal from the Secretary's list.  
722.152 The Secretary's list.

AUTHORITY: Secs. 421, 426 of Part C of  
Title IV, Federal Coal Mine Health and  
Safety Act of 1969, 83 Stat. 795, 798 (30 U.S.C.  
921, 926), as amended by Public Law 92-302,  
86 Stat. 156 and pursuant to such act, under  
44 Stat. 1424 (33 U.S.C. 901 et seq.), as  
amended by Public Law 92-576, 86 Stat. 1251.

## INTRODUCTORY

§ 722.101 Purpose and scope of this  
part.

Section 421 of Part C of Title IV of the Federal Coal Mine Health and Safety Act, as amended, provides that on and after January 1, 1974, any claim for benefits for death or total disability due to pneumoconiosis shall be filed pursuant to the applicable State workmen's compensation law, except that during any period when miners or their eligible surviving dependents are not covered by a State workmen's compensation law which provides adequate coverage for pneumoconiosis, such persons shall be entitled to claim benefits under section 422 and related provisions of Part C of Title IV of such Act. Section 421(b)(1) in Part C of Title IV of the Federal Coal Mine Health and Safety Act, as amended, provides that a State workmen's compensation law shall not be deemed to provide adequate coverage for pneumoconiosis during any period unless it is included in the list of State laws (see § 722.152) found by the Secretary of Labor to provide adequate coverage for pneumoconiosis during such period. Section 421(b)(2) of such Act provides that no State workmen's compensation law shall be included on such list during any period unless such law is consistent with each of the criteria mandated by paragraphs A through E of section 421(b)(2) of the Act, as amended, and that there are certain other provisions, regulations, or interpretations which are consistent with the Longshoremen's and Harbor Workers' Compensation Act, as amended (44 Stat. 1424, 86 Stat. 1251, 33 U.S.C. 901 et seq.), as described in this part. This Part 722 is designed to assure that any State law which appears on the list herein described shall provide appropriate claimants with adequate benefits for total disability or death due to pneumoconiosis. The purpose of this part is to describe the procedures by which the Secretary shall determine whether any State workmen's compensation law does, in fact, provide adequate coverage for death or disability due to pneumoconiosis and further describes with particularity the standards and criteria to be applied by the Secretary in making such determination.

## § 722.102 Definitions and use of terms.

(a) For purposes of this part except where the content clearly indicates otherwise, the following definitions apply:

(1) "Act" means Title IV of the Federal Coal Mine Health and Safety Act of 1969, 83 Stat. 795 (30 U.S.C. 901 et seq.), as amended by Public Law 92-302, 86 Stat. 156, the Black Lung Benefits Act of 1972.

(2) "Longshoremen's and Harbor Workers' Compensation Act (44 Stat. 1424, 86 Stat. 1251 (33 U.S.C. 901 et seq.)), as amended by Public Law 92-576, 86 Stat. 1251.

(3) "Social Security Act" means the Social Security Act (49 Stat. 620 (42 U.S.C. 301 et seq.)), as amended from time to time.

(4) "Department" means the Department of Labor.

(5) "Secretary" means the Secretary of Labor or a person authorized by him to perform his functions under section 421 of the Act.

(6) "State" includes a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Trust Territory of the Pacific Islands.

(7) "Workmen's compensation law" means the law or laws of a State providing for payment of compensation by employers to employees (and their dependents or survivors) for injury including occupational disease, or death suffered in connection with the employment.

(8) "State agency" means, with respect to any State, the agency, department, or officer designated by the workmen's compensation law of the State to administer such law. In any case in which more than one agency participates in the administration of a State workmen's compensation law, the Governor may designate which of such agencies shall be the State agency for purposes of this part.

(9) "The Secretary's list" means the list published by the Secretary of Labor in the Federal REGISTER (see § 722.152) containing the names of those States which have in effect a workmen's compensation law which provides adequate coverage for death or total disability due to pneumoconiosis.

(10) "Pneumoconiosis" means coal workers' pneumoconiosis as defined in section 402(b) of the Act.

(b) Masculine gender includes the feminine, and the singular includes the plural.

(c) No definition contained in this part shall be deemed to derogate from the meaning of any term defined in the Act or any term elsewhere defined in this subchapter B with respect thereto.

PROCEDURE FOR DETERMINING WHETHER A  
STATE LAW PROVIDES ADEQUATE COVER-  
AGE FOR PNEUMOCONIOSIS

## § 722.103 Application to the Secretary.

The Governor of any State or any duly authorized State agency may, at any time

after the effective date of this revised Part 722, request that the Secretary include such State's workmen's compensation law on his list of those State workmen's compensation laws providing adequate coverage for total disability and death due to pneumoconiosis.

§ 722.104 Contents of application, sup-  
porting documents.

Each request that a State be included on the Secretary's list shall be in writing and shall be accompanied by the following documents and information:

(a) A copy of the State workmen's compensation law and any other pertinent State laws;

(b) A copy of any regulations either proposed or promulgated in final form with respect to the administration of the State law or laws submitted;

(c) A copy of any administrative or court decision interpreting State laws or regulations so as to bring such laws or regulations in compliance with the standards set forth in this part. If such decisions are published and reported in official or privately published reporter systems or in some other readily available case reporter, it shall be permissible to refer to such decision by its appropriate citation in such case reporter; and

(d) Each request shall be accompanied by a written analysis completed by a duly authorized State official describing by citation, explanation, or with reference to the decisional law of the State, the appropriate provision or provisions of such State's workmen's compensation law which bring it in compliance with each standard prescribed in this Part 722.

§ 722.105 Initial action on the request.  
Upon receipt by the Secretary of a request that a State be included on the Secretary's list, action shall be taken to review such request. Each State law submitted shall be reviewed in light of the specific standards and criteria set forth below.

CRITERIA: STANDARDS OF COVERAGE,  
ELIGIBILITY

## § 722.110 Coverage generally.

The following §§ 722.111-722.114 describe the individuals who are eligible to claim benefits for total disability or death due to pneumoconiosis under the Act. In order that a State workmen's compensation law be deemed by the Secretary to provide adequate coverage for total disability or death due to pneumoconiosis, such State law shall insure that such individuals shall be entitled to receive benefits under conditions in accordance with those described below.

## § 722.111 Miner.

(a) An individual shall be entitled to receive benefits for total disability due to pneumoconiosis if he is a miner as defined in this section and if such individual is totally disabled due to pneumoconiosis (see §§ 722.117-722.120).

(b) Such individual shall be entitled to receive benefits until his death or until such disability ceases.

(c) For purposes of this part an individual is a miner if he is or was employed in a coal mine.

(d) For purposes of this part, "Coal mine" means an area of land and all structures, facilities, machinery, tools, equipment, shafts, slopes, tunnels, excavations, and other property, real or personal, placed upon, under, or above the surface of such land by any person, used in, or to be used in, or resulting from, the work of extracting in such area bituminous coal, lignite, or anthracite, from its natural deposits in the earth by any means or method, and the work of preparing the coal so extracted, and includes custom coal preparation facilities.

(e) Any State workmen's compensation law which does not separately define miner or coal miner shall be deemed adequate for purposes of this section if such law contains a definition or use of the terms employee, worker, or any other related term which is sufficiently broad to encompass all individuals contemplated by the term miner as defined in this section.

§ 722.112 Widow, surviving divorced  
wife.

(a) An individual shall be entitled to claim for and receive benefits as the widow or surviving divorced wife of a deceased miner if:

(1) Such individual is not married and is the "widow" of such miner as defined in section 402(e) of the Act; and

(2) Such miner's death or total disability at time of death was due to pneumoconiosis (which, for purposes of the Act, includes any death of a miner who was totally disabled by pneumoconiosis or was receiving benefits for such disability at the time of his death).

(b) A widow or surviving divorced wife shall be entitled to receive benefits until she remarries, or dies, or her entitlement otherwise ceases.

## § 722.113 Child.

(a) An individual shall be entitled to claim for and receive benefits if:

(1) Such individual is a child, as defined in section 402(g) of the Act (including a stepchild) of a deceased miner or of the widow of a miner; and if

(2) Such individual was dependent upon the deceased miner or widow for his support; and if

(3) Such deceased parent, (i) If a miner, was receiving pneumoconiosis benefits at the time of his death, or his death was due to pneumoconiosis, or at the time of his death was totally disabled by pneumoconiosis; or

(ii) If a widow, was receiving pneumoconiosis benefits at the time of her death.

(b) A child or stepchild shall be entitled to receive benefits until one of the following events first occurs:

(1) The child dies;  
(2) The child marries;  
(3) The child attains age 18, unless

(i) He is a "full time" student as defined in section 202(a)(7) of the Social Security Act, or a "student" as defined in section 8101(7) of Title 5, United

States Code, in which case such child's or stepchild's eligibility is extended until he reaches age 23; or unless

(i) He is under a disability as defined in section 223(d) of the Social Security Act and such disability began before he attained age 18 (see 202(d)(1)(B)(ii) of the Social Security Act).

(c) A child or stepchild is not entitled to claim benefits for any month for which a widow of a miner establishes entitlement to benefits.

#### § 722.114 Parents, brothers, or sisters.

(a) An individual shall be entitled to claim for and receive benefits if:

(1) Such individual is the parent, brother, or sister of a deceased miner; and if

(2) Such individual, for not less than 1 year prior to the miner's death, was living in the same household as the miner and was totally dependent on the miner for support; and if

(3) The deceased miner was entitled to benefits at the time of his death, or his death is determined to have been due to pneumoconiosis, or at the time of his death was totally disabled by pneumoconiosis; and,

(4) In the case of a parent, if the deceased miner was not survived by a widow or child at the time of his death; and,

(5) In the case of a brother or sister, if the deceased miner was not survived by a widow, child or parent at the time of his death; and,

(6) In the case of a brother, he also is under 18 years of age unless he is a full-time student or under a disability as described in § 722.113(b)(3) in which case his eligibility shall be extended as is appropriate.

(b) No benefits to a sister or brother shall be payable for any month beginning with the month in which he or she receives support from his or her spouse, or marries.

(c) The individuals described in this section shall be eligible to claim for or receive benefits until such time as the requirements for eligibility cease.

#### CRITERIA: CLAIMS FOR BENEFITS

##### § 722.115 Claims generally.

In order to assure that a State workmen's compensation law will provide adequate coverage for total disability or death due to pneumoconiosis, such law shall contain or shall be implemented by available rules and regulations which establish a comprehensive and viable scheme for the filing and processing of claims. If filing and processing procedures in any State are substantially informal, such State shall include in its application to be included on the Secretary's list, a full description of such State's filing and processing procedures, copies of any material disseminated to individuals to assist them in pursuing a claim, and a full description, including exemplary cases, of the time periods required by such State to fully process such claims. No State workmen's compensation law shall be included on the Secretary's list if it appears that any class of claimants shall be subject to inordinate

delays, unnecessarily protracted proceedings, unnecessarily difficult requirements of proof, or other unwarranted difficulties in the pursuit of a claim.

##### § 722.116 Time limitations on filing claims.

(a) No State workmen's compensation law shall be deemed to provide adequate coverage for total disability or death due to pneumoconiosis unless the determination of claims filed pursuant to it shall be permitted:

(1) In the case of claims for disability benefits, if filed within 3 years of the date of the discovery of total disability due to pneumoconiosis; or

(2) In the case of claims for death benefits, if filed within 3 years of the date of such death;

(3) And in the case of any claim for benefits predicated upon the presumption contained in section 411(c)(4) of Part B of Title IV of the Act (see § 722.119);

(1) If in the case of total disability due to pneumoconiosis it is filed within 3 years from the date of last exposed employment in a coal mine; or

(ii) If in the case of death from a respiratory or pulmonary impairment for which benefits would be payable under section 411(c)(4) of the Act, incurred as a result of employment in a coal mine, it is filed within 15 years from the date of last exposed employment in a coal mine.

(b) Any State workmen's compensation law which provides longer periods for filing a claim subsequent to the events specified in this section shall be deemed to have met the requirements described herein. Any State workmen's compensation law which provides shorter time limitations on filing a claim, or which commences the period for filing a claim beginning with an event which is more restrictive than those specified in this section, shall be deemed not to have met the requirements of this section.

#### CRITERIA: MEDICAL STANDARDS FOR DETERMINING WHETHER MINER'S TOTAL DISABILITY OR DEATH WAS DUE TO PNEUMOCONIOSIS

##### § 722.117 Medical criteria—generally.

Section 402(f) of the Act authorizes the Secretary of Health, Education, and Welfare to establish and promulgate standards and medical criteria for determining whether a miner is totally disabled due to pneumoconiosis, whether a miner's death was due to pneumoconiosis, and whether a miner was totally disabled by pneumoconiosis at the time of his death. Section 421(b)(2)(C) of the Act requires that in order for a State to be included on the Secretary's list, such State must promulgate standards for determining death or total disability due to pneumoconiosis which are substantially equivalent to those promulgated by the Secretary of Health, Education, and Welfare (see 20 CFR Part 410, Subpart D) and adopted pursuant to sections 415(a) and 422(c) of the Act by the Secretary of Labor in respect of claims filed subsequent to June 30, 1973 (see 20 CFR Part 718). Therefore, no State shall be included on the Secretary's list if it

does not by statute or published formal rules and regulations provide standards which are substantially equivalent to or less restrictive than those standards published by the Secretary of Health, Education, and Welfare in Subpart D of 20 CFR Part 410 as amended on September 30, 1972 (37 FR 20641-20645).

##### § 722.118 Medical evidence.

No State workmen's compensation law shall be included on the Secretary's list unless such law or regulations promulgated thereunder provide that no claim shall be denied solely on the basis of a chest roentgenogram and, that in determining the validity of claims all evidence shall be considered, including, where relevant, medical tests such as blood gas studies, X-ray examination, electrocardiogram, pulmonary function studies, or physical performance tests, and any medical history, evidence pertaining to future employability, evidence submitted by a miner's physician, or a miner's wife's affidavits, and in the case of a deceased miner, autopsy, biopsy, or other appropriate affidavits of persons with knowledge of the miner's physical condition, and any other supportive materials.

##### § 722.119 Medical presumptions.

Section 411(c) of Part B of Title IV of the Act establishes a series of presumptions which shall be available to claimants for purposes of determining whether a miner's death or total disability was due to pneumoconiosis. No State workmen's compensation law shall be included on the Secretary's list if it does not provide or if regulations promulgated pursuant to such State law do not make available to claimants presumptions which are equivalent to or less restrictive than those presumptions contained in section 411(c) of the Act as set forth below:

(a) If a miner who is suffering or suffered from pneumoconiosis was employed for 10 years or more in one or more coal mines, there shall be a rebuttable presumption that his pneumoconiosis arose out of such employment;

(b) If a deceased miner was employed for 10 years or more in one or more coal mines and died from a respirable disease, there shall be a rebuttable presumption that his death was due to pneumoconiosis;

(c) If a miner is suffering or suffered from a chronic dust disease of the lung which (1) when diagnosed by chest roentgenogram, yields one or more large opacities (greater than one centimeter in diameter) and would be classified in category A, B, or C in the International Classification of Radiographs of the Pneumoconioses by the International Labor Organization, (2) when diagnosed by biopsy or autopsy, yields massive lesions in the lungs, or (3) when diagnosis is made by other means, would be a condition which could reasonably be expected to yield results described in subparagraph (1) or (2) of this paragraph if diagnosis had been made in the manner prescribed in subparagraph (1) or (2) of

this paragraph, then there shall be an irrebuttable presumption that he is totally disabled due to pneumoconiosis or that his death was due to pneumoconiosis, or that at the time of his death he was totally disabled by pneumoconiosis, as the case may be; and

(d) If a miner was employed for 15 years or more before July 1, 1971, in one or more underground coal mines, and if there is a chest roentgenogram submitted in connection with such miner's, his widow's, his child's, his parent's, his brother's, his sister's, or his dependent's claim and it is interpreted as negative with respect to the requirements of paragraph (c) of this section, and if other evidence demonstrates the existence of a totally disabling respiratory or pulmonary impairment, then there shall be a rebuttable presumption that such miner is totally disabled due to pneumoconiosis, that his death was due to pneumoconiosis, or that at the time of his death he was totally disabled by pneumoconiosis. In the case of a living miner, a wife's affidavit may not be used by itself to establish the presumption. A State shall not apply all or a portion of the requirement of this paragraph that the miner work in an underground mine where it determines that conditions of a miner's employment in a coal mine other than an underground mine were substantially similar to conditions in an underground mine. Such presumption may be rebutted only by establishing that (1) such miner does not, or did not, have pneumoconiosis, or that (2) his respiratory or pulmonary impairment did not arise out of, or in connection with, employment in a coal mine.

##### § 722.120 Total disability determination.

The Act requires that benefits be paid for total disability of a miner if pneumoconiosis prevents him from engaging in gainful employment requiring the skills and abilities comparable to those of any employment in a mine or mines in which he previously engaged with some regularity and over a substantial period of time. No State workmen's compensation law shall be included on the Secretary's list if such law prohibits a finding that a miner is totally disabled solely on the basis of his ability to engage in gainful noncoal mine related employment, except that in cases where a miner engaged in noncoal mine related employment utilizes skills comparable to those required in his coal mine employment, it may be found that such miner is not entitled to benefits for total disability due to pneumoconiosis.

##### § 722.121 Cause of death.

Section 421 of the Act requires the Secretary to find, before including a State workmen's compensation law in his listing of laws which provide adequate coverage for pneumoconiosis, that such law assures payment of benefits for total disability or death of a miner, determined under standards substantially equivalent to those established under Part B of Title IV of the Act, in all cases where either such total dis-

ability or such death was due to pneumoconiosis. Accordingly, in the case of death benefits, such benefits must be paid whether the miner's death or his total disability at the time of death was due to pneumoconiosis. Thus, sections 401 and 430 of the Act require that benefits be paid (a) for death due to pneumoconiosis and (b) for death due to any cause if the miner was totally disabled by pneumoconiosis at the time of his death. No State workmen's compensation law shall be included on the Secretary's list unless it contains a provision or provisions equivalent to those described in this section.

#### CRITERIA: ADMINISTRATIVE STANDARDS

##### § 722.122 Administrative standards—generally.

In order to insure that each claimant for pneumoconiosis benefits under a State workmen's compensation law be afforded full due process of law, including notice and opportunity to be heard on all matters materially affecting such claimant's claim, no State workmen's compensation law shall be included on the Secretary's list unless it provides, or regulations promulgated pursuant to such law provide (a) that a claimant in a contested case shall have a right to a full adversary hearing to resolve contested issues of fact or law, (b) that a claimant shall be notified of and shall have a means of legal recourse by right in the event that any adverse action is taken in respect of his claim, and (c) that a claimant shall in appropriate cases be entitled to have his claim finally adjudicated by an appellate court of the State.

##### § 722.123 Cessation of payment of benefits.

No State workmen's compensation law shall be included on the Secretary's list unless such law provides, or regulations promulgated pursuant to such law provide, that in the event the payment of benefits to any beneficiary is terminated or suspended for any reason, such beneficiary shall be given prior notice thereof and shall have an opportunity to be heard in a formal proceeding before an appropriate adjudication officer of the State in respect of such suspension or termination, and that such investigations, including medical examination, shall be undertaken as will properly protect the rights of all parties.

##### § 722.124 Regulation of fees for legal services.

Unrestricted fees for legal services incurred by a claimant in the pursuit of a claim undermine the intent of Congress expressed in the enactment of Title IV of the Act. Section 28 (33 U.S.C. 928) of the Longshoremen's Act, as incorporated by section 422(a) of the Act, requires the Secretary to exercise reasonable control over professional fees for services incurred by a claimant in the pursuit of a claim. Accordingly, no State workmen's compensation law shall be included on the Secretary's list if such law permits unrestricted or unreasonable fees

for services rendered in the pursuit of a claim to be charged to a claimant.

#### CRITERIA: GUARANTEE OF BENEFITS TO ELIGIBLE INDIVIDUALS

##### § 722.126 Guarantee of benefits—generally.

It is the intent of the Act to insure that every eligible individual who has proven his entitlement to benefits for total disability or death due to pneumoconiosis shall be guaranteed such benefits whether or not there is in existence an employer, coal mine operator, or insurance carrier who is or may be adjudicated liable for the payment of such benefits. No State workmen's compensation law shall be included on the Secretary's list unless such law explicitly provides that every claimant who is, based upon the medical evidence and the evidence of such claimant's identity as a miner or eligible relation or dependent, entitled to receive benefits for total disability or death due to pneumoconiosis shall be paid such benefits either by a responsible coal mine operator or employer or such operator or employer's insurance carrier, or by the State from its general revenue or whatever funds are available for such purposes. A State must bear the ultimate liability for the payment of benefits to an entitled individual in all cases where no other source of benefits is available to such claimant.

##### § 722.127 Voluntary and elective compensation systems.

A State workmen's compensation law may be included on the Secretary's list, notwithstanding the fact that such law permits voluntary or elective participation by an employer or coal mine operator in any program to insure the payment of benefits for total disability or death due to pneumoconiosis, provided that there is in effect in such State an alternative system to guarantee that all benefits including medical benefits shall be paid.

##### § 722.128 Responsible coal mine operators.

Sections 421 and 422 of Part C of Title IV as well as the legislative history of the Act, indicate that Congress intended the coal mine operators in the several States to bear as fully as possible the liability for the payment of pneumoconiosis benefits. In accordance with this intent Congress in section 421(b)(2)(E) of the Act has required that no State workmen's compensation law shall be included on the Secretary's list, unless such law provides that a coal mine operator who acquires his or its mine or substantially all of the assets thereof from a person (hereinafter referred to in this section as a "prior operator") who was an operator of such mine on or after December 30, 1969, shall be liable for and shall secure the payment of all benefits which would have been payable by the prior operator with respect to miners previously employed in such mine if the acquisition had not occurred and the prior operator had continued to operate such mine, and further that such prior operator shall

## RULES AND REGULATIONS

not be relieved of his or its liability for the payment of pneumoconiosis benefits in the event that his successor to such mine is for any reason unable to discharge his liability (see section 422(d) of the Act).

## § 722.129 Insurance, self insurance.

(a) A State workmen's compensation law may, in appropriate circumstances, be excluded from the Secretary's list if such law permits coal mine operators or employers to obtain commercial contracts of insurance to guarantee the payment of pneumoconiosis benefits and such State law does not require (1) that such commercial insurer be authorized under the laws of the State to insure workmen's compensation, and (2) that each such commercial contract of insurance contain a provision that insolvency or bankruptcy of the insured or discharge therein (or both) shall not relieve the insurance carrier from liability for all current and future payments of benefits due an entitled individual.

(b) A State workmen's compensation law may, in the discretion of the Secretary, be excluded from the Secretary's list if it is apparent that self-insurance arrangements permitted under such State law in general are not sufficient to insure the uninterrupted payment of benefits to an entitled individual.

(c) Contribution or apportionment of liability among insurers and/or self-insurers, if so provided for by a State workmen's compensation law, shall not be a basis for exclusion of such law from the Secretary's list.

(d) This section shall not be construed to require that a State workmen's compensation law guarantee the payment of pneumoconiosis benefits by means of commercial insurance or self-insurance programs.

## § 722.130 State protections of benefits.

No State workmen's compensation law shall be included on the Secretary's list, unless such State law establishes and provides a means of obtaining revenues to insure that pneumoconiosis benefits shall be paid to entitled individuals for whom no other source of benefits is available.

## § 722.131 Contributions by miners.

No State workmen's compensation law shall be included on the Secretary's list if such law permits or requires miners to provide funds for the payment of insurance premiums, the support for a self-insurance fund, or the support for any State fund established for the purpose of insuring the payment of pneumoconiosis benefits.

## § 722.132 Waiver of right to benefits.

No State workmen's compensation law shall be included on the Secretary's list if such law permits a miner or other prospective claimant to by any means waive, in whole or in part, such individual's rights to receive full benefits for total disability or death due to pneumoconiosis. However, under appropriate circumstances, a waiver may be permitted in respect of the liability of any individual

coal mine operator or employer if such State workmen's compensation law contains a provision or provisions which otherwise insure that benefits shall be available to be paid to such claimant from some other approved source.

## § 722.133 Retroactive coverage required.

No State workmen's compensation law shall be included on the Secretary's list if such law prohibits the filing of or does not provide for benefits in respect of an otherwise timely (see § 722.116) and valid claim solely on the grounds that the miner on whose total disability or death the claim is predicated was not employed in a coal mine in such State on the effective date of such State's law.

## § 722.134 Residency requirements.

No State workmen's compensation law shall be included on the Secretary's list if such law requires that the claimant be domiciled in or a resident of such State at the time the claim is filed. This section shall not be construed to prohibit a State from refusing to process a claim for benefits in any case in which the miner on whose total disability or death a claim is predicated, was not exposed for a reasonable period of time in such State.

## CRITERIA: AMOUNT OF BENEFITS: MEDICAL BENEFITS

## § 722.135 Amount of benefits, computation.

(a) Section 412(a) of the Act sets forth the amount of benefits for total disability or death due to pneumoconiosis to which an individual shall be entitled, the extent of such entitlement and persons so entitled. No State workmen's compensation law shall be included on the Secretary's list if it does not, in every case, provide benefit amounts which are substantially equivalent to or greater than those amounts to which an eligible individual would be entitled under section 412(a).

(b) No State workmen's compensation law which arbitrarily limits the total amount of benefits to which an eligible individual may be entitled over such individual's lifetime shall be included on the Secretary's list.

(c) No State workmen's compensation law which subsequent to the effective date of this Part 722 is amended to reduce the amount of benefits to which an eligible individual is entitled for total disability or death due to pneumoconiosis shall be included on the Secretary's list.

## § 722.136 Augmented benefits.

As set forth in section 412(a) of the Act the amount of benefits to which a beneficiary is entitled may be augmented by up to 100 percent based upon the number of persons (wife, children, parents, brothers, sisters) dependent upon such beneficiary for support. No State workmen's compensation law shall be excluded from the Secretary's list because it does not contain similar augmentation provisions if such law otherwise insures that beneficiaries and their dependents shall receive benefits substantially equivalent

to or greater than the amounts such persons would receive under section 412(a) of the Act.

## § 722.137 Minimum benefit amounts.

No State workmen's compensation law shall be included on the Secretary's list if it does not guarantee that the minimum amount of benefits payable to any beneficiary or dependent shall be substantially equivalent to or greater than the amount to which such beneficiary or dependent would be entitled if the claim were paid under section 412(a) of the Act, notwithstanding any provision contained in the State workmen's compensation law which requires the computation of benefit amounts based upon the miner's average weekly or monthly wage.

## § 722.138 Offsets for Federal benefits prohibited.

No State's workmen's compensation law shall be included on the Secretary's list if such law requires that pneumoconiosis benefits payable to any individual shall be offset by any amount to which such individual is or may be entitled on account of total disability or death due to pneumoconiosis under any law of the United States.

## § 722.139 Lump sum awards; settlement.

No State workmen's compensation law shall be excluded from the Secretary's list solely on the grounds that such law permits lump sum awards, or commutation or settlement of claims or awards: *Provided*, That (a) such lump sum award or commutation or settlement is approved by an appropriate State agency; (b) such lump sum award, commutation, or settlement is equal to the present value of future benefits payments commuted, computed at no less than 4 percent true discount compounded annually; (c) accepted and reliable tables of probabilities are used for the purpose of computing the present value of future benefits payments commuted and (d) no lump sum award, commutation, or settlement, shall be construed to deprive a miner of his right to future medical benefits or services under such State law.

## § 722.140 Protection of benefits.

No State workmen's compensation law shall be included on the Secretary's list unless such State law contains a provision or provisions:

(a) Which declare invalid any assignment or release of benefits or future benefits payable;

(b) Which exempt all current and future benefits from all claims of creditors, and from levy, execution, attachment, garnishment, or any other remedy for recovery or collection of a debt, which exemption may not be waived; and

(c) Which insure that any person entitled to benefits for total disability or death due to pneumoconiosis shall have a lien against the assets of the responsible insurance carrier or coal mine operator for such benefits without limit of amount, and shall, upon insolvency,

bankruptcy, or reorganization in bankruptcy proceedings of the insurer or operator, or both, be entitled to preference and priority in the distribution of the assets of such insurer or operator, or both. This paragraph shall not be construed to require the creation of a statutory lien against the assets of any State fund.

## § 722.141 Payment periods.

No State workmen's compensation law shall be included on the Secretary's list unless such law provides that compensation payable on account of total disability or death due to pneumoconiosis shall be paid not less frequently than once each month.

## § 722.142 Prompt payment of benefits.

No State workmen's compensation law shall be included on the Secretary's list unless such law provides some means such as judicial enforcement whereby an eligible claimant shall have effective recourse to insure that benefits due such claimant are paid fully and promptly.

## § 722.143 Medical benefits.

(a) Section 422(a) of the Act by incorporating section 7(a) of the Longshoremen's Act (33 U.S.C. 907(a)) requires that medical services and supplies be furnished to a miner totally disabled by pneumoconiosis. No State law shall be included on the Secretary's list unless such State law guarantees that every miner who is totally disabled due to pneumoconiosis shall be furnished, at no cost to the miner, with such medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus, for such period as the nature of the disability may require.

(b) No State law shall be included on the Secretary's list if such law places arbitrary time or dollar limitations on a totally disabled miner's entitlement to the medical benefits described in this section.

## § 722.144 Medical examinations, re-examinations.

No State workmen's compensation law shall be included on the Secretary's list unless such State law provides that medical examinations or re-examinations conducted in respect of a claim at the request or order of an insurance carrier, coal mine operator, employer, or State agency shall be conducted at the expense of the insurance carrier, coal mine operator, employer, or State agency as the case may be. In no event shall the cost of such examination or re-examination be chargeable to the claimant.

## § 722.145 Vocational rehabilitation.

(a) Section 422(a) of the Act, by incorporating section 39 of the Longshoremen's and Harbor Workers' Compensation Act requires the Secretary to arrange for and direct the vocational rehabilitation of miners totally disabled for work in or around a coal mine. No State workmen's compensation law shall be included on the Secretary's list unless such State law makes available to

## RULES AND REGULATIONS

miners totally disabled for such work such vocational rehabilitation facilities as are provided by the State under its workmen's compensation programs to disabled employees in general.

(b) No State workmen's compensation law shall be included on the Secretary's list if the use of vocational rehabilitation facilities in such State would result in a partial or total loss of benefits to such miner.

## ACTION BY THE SECRETARY

## § 722.146 Standards for review of a State workmen's compensation law.

(a) The standards for determining whether a State workmen's compensation law provides adequate coverage for total disability or death due to pneumoconiosis as set forth in this part are mandatory, in that compliance therewith is prerequisite to inclusion of any such law on the Secretary's list. Such standards have been determined to be the minimum requirements that a State workmen's compensation law must meet in order that the intent of section 421 of the Act be carried out. After review of the information submitted by a State pursuant to § 722.104 and any other information made available to the Department of Labor, the Secretary shall determine whether a State workmen's compensation law meets all of such requirements.

(b) Notwithstanding any other provision of this part, if it is shown, despite the language contained in a State workmen's compensation law, that because of judicial or administrative decision, or duly promulgated rules and regulations, or common practice in the State, such law does not provide adequate coverage for total disability or death due to pneumoconiosis, such law shall be excluded from the Secretary's list.

(c) Notwithstanding any other provision of this part, if it is found that any provision contained in a State's workmen's compensation laws or general laws serves or would be likely to serve to diminish the coverage available in such State for total disability or death due to pneumoconiosis, such State's workmen's compensation law may be excluded from the Secretary's list.

## § 722.147 Action subsequent to review.

(a) If it is found that a State workmen's compensation law during any period provides adequate coverage for total disability or death due to pneumoconiosis, such law shall be included for such period on the Secretary's list to be published in the FEDERAL REGISTER and set forth in § 722.152 pursuant to section 421(b)(1) of the Act. The appropriate State agency shall be notified of the Secretary's action.

(b) If it is found that a State workmen's compensation law submitted for consideration pursuant to § 722.103 does not provide adequate coverage for total disability or death due to pneumoconiosis during any period, the appropriate State agency shall be notified of such decision and, if such law has previously been on the Secretary's list, of the fact

that the decision requires deletion of such law from the list during such period. Such notice shall contain a brief statement of reasons enumerating the provision or provisions of the State's law which are unacceptable.

(c) In the event of a denial of a request that a State workmen's compensation law be included on the Secretary's list, or of a decision to delete a previously listed law from the list, the appropriate State agency shall have the right to request the Secretary to reconsider his action. Such request shall be accompanied by a brief or memorandum in support thereof.

## § 722.148 Provisional approval.

The Secretary may, in his discretion, provisionally approve a State's request that its workmen's compensation law be included on the Secretary's list pending the final promulgation of rules and regulations or the effective date of certain amendments to the State's law. Notice of such provisional approval shall be given to the appropriate State agency, but such State's workmen's compensation law shall not be published on the Secretary's list in the FEDERAL REGISTER until such regulations or amendments are effective.

## § 722.149 Judicial review.

The action by the Secretary in including or failing to include any State workmen's compensation law on the Secretary's list shall be subject to judicial review exclusively in the U.S. Court of Appeals for the circuit in which the State is located or in the U.S. Court of Appeals for the District of Columbia (see section 421(b)(2)(f) of the Act).

## § 722.150 Reports.

The Secretary shall from time to time require that each State which has been included on the Secretary's list submit reports, data, or other information to the Secretary concerning the administration and operation of the State's workmen's compensation law with respect to total disability or death due to pneumoconiosis.

## § 722.151 Removal from the Secretary's list.

At any time after a State's workmen's compensation law has been included on the Secretary's list such State's law may be removed from the list if it appears that under such law adequate coverage for total disability or death due to pneumoconiosis is not being provided. Such removal action shall be taken only after notice and an opportunity to be heard has been afforded such State. In the event a State's workmen's compensation law is removed from the Secretary's list the consequences of such removal on claims for pneumoconiosis benefits filed in that State shall be determined by the Secretary.

## § 722.152 The Secretary's list.

(a) In order to provide a ready reference source for any person interested in knowing at any given time which, if any,

8334-8351

# RULES AND REGULATIONS

States' laws met the currently applicable criteria for approval, it has been determined that provision should be made for listing such States in the Code of Federal Regulations. Accordingly, the Secretary's list of those States having in effect a workmen's compensation law which provides adequate coverage for total disability or death due to pneumoconiosis, as published in the FEDERAL REGISTER pursuant to section 421(b)(1) of the Act, appears in paragraph (b) of this section. When first published on September 7, 1972 (37 FR 18076; see also 37 FR 21429), as provided by the

Act, the document listed no such State because there was no State workmen's compensation law which had been found to provide adequate coverage for total disability or death due to pneumoconiosis. The Secretary's list shall be republished in the FEDERAL REGISTER with amendments from time to time as is necessary.

(b) The Secretary, upon examination of State workmen's compensation laws pursuant to the provisions of section 421 of the Federal Coal Mine Health and Safety Act of 1969, as amended, and 20 CFR 722.101-151, has found that the workmen's compensation law of each of

the following listed States, for the period from the date shown in the list until such date as the Secretary may make a contrary determination, provides adequate coverage for pneumoconiosis:

State	Period commencing
None	

Signed at Washington, D.C., this 27th day of March 1973.

HERBERT A. DOYLE, JR.,  
Acting Director, Office of Workmen's Compensation Programs.

**DEPARTMENT OF LABOR**  
**Employment Standards Administration**  
**MINIMUM WAGES FOR FEDERAL AND FED-**  
**ERALLY ASSISTED CONSTRUCTION**  
**Modifications and Supersedes Decisions**  
**to Area Wage Determination Decisions**

Area wage determination decisions. Area Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a), and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

Area Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without

limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedes decisions to area wage determination decisions. Modifications and Supersedes Decisions to Area Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedes Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138), and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing Area Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedes Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department.

Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original Area Wage Determination Decision.

Set forth below in this document are the following Modifications to Area Wage Determination Decisions for the following States (the numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State):

Colorado: AP-232 ----- Sept. 15, 1972.  
 Illinois: AP-622 ----- Feb. 2, 1973.  
 AP-637 ----- Feb. 23, 1973.  
 Indiana: AP-17; AP-18; AP-19; AP-20; AP-21; AP-22 ----- Sept. 29, 1972.  
 Kentucky: AP-133 ----- Oct. 13, 1972.  
 Pennsylvania: AP-465 ----- Jan. 26, 1973.  
 Tennessee: AP-154 ----- Mar. 2, 1973.  
 Texas: AP-389; AP-395 ----- Jan. 26, 1973.  
 Virginia: AP-468 ----- Feb. 9, 1973.

Supersedes Decisions to Area Wage Determination Decisions for the following States (the numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State; Supersedes Decision numbers are in parentheses following the number of the decision being superseded):

California: AP-245 (AP-281); AP-248 (AP-280) ----- Oct. 13, 1972.  
 Montana: AP-237 (AP-279); AP-239 (AP-278) ----- Sept. 22, 1972.  
 Nebraska: AM-2441 (AP-522) ----- Aug. 25, 1971.  
 AP-210 (AP-523) ----- Aug. 4, 1972.  
 Nevada: AP-225 (AP-282) ----- Aug. 25, 1972.  
 AP-243 (AP-266) ----- Sept. 22, 1972.  
 New York: AM-1726 (AP-800) ----- Aug. 11, 1971.  
 Virginia: AP-441 (AP-499) ----- Nov. 3, 1972.

Signed at Washington, D.C., this 23rd day of March 1973.

WARREN D. LANDIS,  
 Assistant Administrator,  
 Wage and Hour Division.

## NOTICES

Area II: III; & IV:

Area II - That portion of Los Angeles County including the Cities of Pomona, El Monte, Covina, Alhambra, Pasadena, South Pasadena, La Canada, to line that intersects Arroyo, east of San Bernardino County line, then south along the San Bernardino County line.

Area III - Beginning at the edge of Reeves Field, north along Long Beach City limits to 223rd Street, west to Avalon Boulevard, north to Torrance Boulevard, west to Pacific Ocean, including Santa Catalina Island.

Area IV - Beginning at the edge of Reeves Field, north along Long Beach City limits to 223rd Street, west to Avalon Boulevard, north to Rosecrans Avenue, east to Atlantic Avenue, north to Imperial Highway, east to the Orange County line, south along County line to Western Avenue, south to Lincoln Avenue, east to Highway 39 (Beach Boulevard), south to the Pacific Ocean including San Clemente Island.

## PAID HOLIDAYS:

New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

## FOOTNOTES:

a. Employer contributes 4% basic hourly rate for over 5 years' service & 2% basic hourly rate for 6 months to 5 years' service as Vacation Pay Credit. Six Paid Holidays: A through F.

b. Employer contributes \$.17 per hour to Holidays Fund plus \$.10 per hour to Vacation for 1 year's service, \$.20 per hour after 1 year but less than 5 years' service, \$.30 per hour after 5 years but less than 10 years' service, \$.40 per hour after 10 years' service.

\* Area I - That portion of Los Angeles County including the Cities of Burbank, Castaic, Chatsworth, Correll, Glendale, Hermosa Beach, Hollywood, Los Angeles, Malibu Beach, Redondo Beach, San Fernando, Santa Monica, Torrance, Van Nuys, Whittier, Zuma Beach.

\*\* Area II: III; & IV:

Area II - That portion of Los Angeles County including the Cities of Pomona, El Monte, Covina, Alhambra, Pasadena, South Pasadena, La Canada, to line that intersects Arroyo, east of San Bernardino County line, then south along the San Bernardino County line.

Area III - Beginning at the edge of Reeves Field, north along Long Beach City limits to 223rd Street, west to Avalon Boulevard, north to Torrance Boulevard, west to Pacific Ocean, including Santa Catalina Island.

Area IV - Beginning at the edge of Reeves Field, north along Long Beach City limits to 223rd Street, west to Avalon Boulevard, north to Rosecrans Avenue, east to Atlantic Avenue, north to Imperial Highway, east to the Orange County line, south along County line to Western Avenue, south to Lincoln Avenue, east to Highway 39 (Beach Boulevard), south to the Pacific Ocean including San Clemente Island.

## NOTICES

## LABORERS

CLEANING & HANDLING OF PANEL FORMS;  
Concrete Screeding for rough strike  
off; Concrete, water curing; Demolition laborer; the cleaning of brick & lumber; Dry packing of concrete; plugging, filling of She-Bolt Holes; Fire watcher, limbers, brush loaders, piers & debris handler; Gas & oil pipeline; Laborers, general or construction; Laborer, temporary water & air lines; Material hosiema (walls, slab, floors & decks); Mixer-truck chute man (walls, slabs decks, floors foundations & footing-curb & gutter & sidewalks); Rigging & signalling; Slip form raisers; Window cleaner

CUTTING TORCH (Demolition); Scaler; Trencher; Mortarman

## GUINEA CHASER

ASPHALT SHOVELER; Fine grader, highway & street paving, airports, runways, & similar type heavy construction; Landscape gardener & nursery man

PACKING ROD STEEL & PANS; Tanks scaler & cleaner

UNDERGROUND (INCL. CAISSON BELLFLOWER)

CHUCKTENDER; Septic tank digger & installer

CESSPOOL DIGGER & INSTALLER

CONCRETE CURER-IMPREGNATION & FORM OILER; Riprap stonepaver; Placing stone or sacked concrete; Sandblaster (pot tender)

PIPELAYERS' BACKUP MAN; COATING, CRACKING, MAKING OF JOINTS, SEALING, CHUCKING

A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day;  
E-Thanksgiving Day; F-Christmas Day.

## LABORERS

Cascade, Clatsop, Clallam, Forks, Glacier, Judith, Malheur, Pendleton, Teton, and Toole Counties

Laborers:  
General laborers; Concrete (wet or dry); Dumpmen (spotter); Fence erectors & installers; Scalmen brick tenders; Dumpmen (grade); Small concrete mixers  
Air-track; Asphalt raker & tamper; Barco tamper; Concrete nozzle; High scaler; Rod carriers; Plaster tenders  
Car or truck mounted air operated drills & tools; Jackhammers; Mechanical breakers; wagon drillers; Pipelayers (non-metallic); Power driven wheelbarrow; Power saw (bucking & falling)

Blaine, Hill & Liberty Counties

Laborers; Car and truck loaders; Carpenter tender and form stripper; Concrete laborers; Dumpmen (spotter); Small power tools; chippers; Clay spades, pogo sticks; Fence erectors and installers

Dumpmen (Grade)

Caisson workers (free air); Concrete saw; Small concrete mixer; Concrete nozzle; Barco tamper; Jackhammer; Pavement breaker; Place operator; Pipe layers (non-metallic); Power driven concrete bugger; Concrete barrows; Motorized shovel; Vibrator tender; Vibrator turtle; Vibrator (over 2 1/2); Tailorhouse; Ball gang; Chuck tender; Muckers & nippers pot tender; Primerhouseman

Brick tenders (handling bricks & blocks only)

Concrete nozzle; Miner

Lazer tools & equipment; Powderman

## TRUCK DRIVERS:

GROUP I  
Drivers of Dump Trucks (less than 12 yds. water level); Drivers of Trucks (legal payload capacity less 15 tons); Water & Fuel Truck Drivers under 2500 gals.; Pickup Drivers; Service Truck Driver--Teamster Equipment (highest rate paid for dual craft operation) Truck Repairman Helper; Drivers or Buses on Job Site used for transportation of up to 25 passengers

GROUP II  
Drivers of Dump Trucks 12 yds. but less than 10 yds. water level; Drivers of Trucks (legal payload capacity less 15 tons); Water & Fuel Truck Drivers under 2500 gals.; Gas & Oil Pipeline Working Truck Driver, including winch truck & all sizes of trucks; water & Fuel Truck Drivers 2500 gals. to 4000 gals.; Truck Greaser & Tireman; Drivers of Buses (on job site used for transportation or more than 25 passengers); Road Oil Spreading by Truck Drivers; Time spent Spreading Oil

GROUP III  
Drivers of Transit-mix Trucks, under 3 yds. Dumpcrete Truck, less than 6 1/2 yds. water level

Basic Hourly Rates	H & W	Pensions	Vacation	App. Tr.	Other

POWER EQUIPMENT OPERATORS:					
Group I					
Air compressor, pump or generator operator; engineer-oiler & signalman; heavy duty repairman's helper; switchman or brakeman					
Group II					
Concrete mixer operator, skip type; conveyor operator & beltman; fireman; generator, pump or compressor operator (2-5 inclusive over 5 units \$8.10 per hour for each additional unit up to 10 units, portable units) generator, pump or compressor plant operator; hydrostatic pump; skip-loader; wheeltube Ford, Ferguson Jeep or similar type 3/4 yd., or less (w/o drag-type attachments); temporary heating plant operator; truck crane oiler					
6.12	.60	1.00	.30	.02	
Group III					
Air compressor, pump or generator operator; diesel locomotive or tunnel motor operator; elevator hoist operator; equipment greaser; Ford, Ferguson or similar type (with drag-type attachments); Hydra-hammer or similar type equipment; power concrete curing machine; power concrete saw operator; power-driven jumbo form setter operator; Ross carrier; self-propelled tar pipelining machine operator; stationary pipe wrapping & cleaning machine operator; towblade operator					
6.36	.60	1.00	.30	.02	
Group IV					
Asphalt plant fireman; boring machine operator; boxman or mixer box operator (concrete or asphalt plant); water well drilling machine operator; highline cableway signalman; locomotive engineer; power sweeper operator; roller operator, compacting; screed operator; trenching machine operator (up to six foot depth capacity manufacturer's rating)					
6.47	.60	1.00	.30	.02	
Group V					
Asphalt or concrete spreading; asphalt plant engineer; deck engine operator; fork lift, under 5 ton; grade checker; heavy duty repairman; heavy duty

 a. Employers contributes 4% basic hourly rate for 5 years or more of service or 7% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

b. Holidays: A through F.

c. Employer contributes \$6.20 per month to Health and Welfare.

FEDERAL REGISTER, VOL. 38, NO. 61—FRIDAY, MARCH 30, 1973

## NOTICES

AP-449 p. 3

VA-44-PEO-1-A

## BUILDING CONSTRUCTION

## POWER EQUIPMENT OPERATORS:

Tunnel machines  
 Cranes, cats or rubber mounted with or without attachments, derricks, pile drivers or other floating equipment, compressors, bank air (4 or more regardless of motive power), pavers, mechanics (heavy duty), welding machines (gas or diesel driven, bank for or more), shovels, disc cutters, motor graders, boom motor patrols, high lifts, turnapulls, Cobra and Euclid scrapers, locomotives (over 20 tons)  
 Bulldozers, pumpcrete op., trenching machines, mixers (larger than 16-S), pans  
 Compressors (air, larger than 115 cu. ft.), truck Euclids (when manned by operator), tractors without attachments, hoists (1 drum active), rollers, asphalt, welding machines (gas or diesel driven, 1 or more larger than 300 amps), locomotives (up to 20 tons), power plant op., pumps (over 2" discharge including well points), A-frame trucks (with power driven winches)  
 Rollers (earth)  
 Mixers (16-S or smaller, bank or more than 2), deck engines  
 Firemen  
 Truck crane lifters  
 Oilers  
 Blade Grader  
 Finishing machine

# An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

# RESOLUTION CHART

100 MILLIMETERS

**INSTRUCTIONS** Resolution is expressed in terms of the lines per millimeter recorded by a particular film under specified conditions. Numerals in chart indicate the number of lines per millimeter in adjacent "T-shaped" groupings.

In microfilming, it is necessary to determine the reduction ratio and multiply the number of lines in the chart by this value to find the number of lines recorded by the film. As an aid in determining the reduction ratio, the line above is 100 millimeters in length. Measuring this line in the film image and dividing the length into 100 gives the reduction ratio. Example: the line is 20 mm. long in the film image, and  $100/20 = 5$ .

Examine "T-shaped" line groupings in the film with microscope, and note the number adjacent to finest lines recorded sharply and distinctly. Multiply this number by the reduction factor to obtain resolving power in lines per millimeter. Example: 7.9 group of lines is clearly recorded while lines in the 10.0 group are not distinctly separated. Reduction ratio is 5, and  $7.9 \times 5 = 39.5$  lines per millimeter recorded satisfactorily.  $10.0 \times 5 = 50$  lines per millimeter which are not recorded satisfactorily. Under the particular conditions, maximum resolution is between 39.5 and 50 lines per millimeter.

Resolution, as measured on the film, is a test of the entire photographic system, including lens, exposure, processing, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.
